

PPLPMDL0020000001	Cleveland	OH	44106	1/5/2011	talked to Patty,Pharmacist,about Butrans FPI,black box warning,dosage strengths available,medication guide,instructions for patients on how to apply Butrans transdermal system,stocking,formulary coverage and patient savings cards.Patty said this was a great option for patients on Vicodin that she feels are taking too many pills a month and are in more of that moderate pain side and could really benefit from Butrans.Patty loved that Butrans was a once weekly transdermal system,she said i should be sure i talk to Family Medicine, referred me to a Clinical Pharm D in Oncology to share all of this information with and a Clinical Pharm D in HIV/Aids clinic.i asked what she see's the most of in the out-patient pharmacy and Patty said Vicodin is the biggest and Percocet, so they would like to decrease their stock of those medicines and Butrans could help do that.
PPLPMDL0020000001	Lyndhurst	OH	44124	1/5/2011	Reminded Karen of the Ryzolt patient type/indication, the 3 available strengths and how the value card works. Asked her to convert appropriate patient to once a day ryzolt. She said she would if the pain is chronic. Oxycontin indication reminder.
PPLPMDL0020000001	Cleveland	OH	44114	1/5/2011	talked to Laura,Pharmacy Manager and Liz,Pharmacy Technician,about Butrans FPI,black box warning,appropriate patient selection,dosage strengths available,stocking/ndc codes and formulary coverage.i asked Laura who she thought could benefit from Butrans? Laura said they have so many patients taking hydrocodone combo's that this would be a good place before the short-acting,so i agreed and said that was where we were placing Butrans as well as opioid naive patients.i asked if Laura or Liz saw any Lidoderm or Flector patches written here? they said no not recently and i asked who are doctors that write a lot of hydrocodone combo's-Robson,Pate,Nickels,Katz and Marshall were some doctors Laura noted and said to work with them on Butrans.i asked if Laura would order 2 boxes each strength,she said no,tried for 1 box of 2strengths and Laura said when she gets a script,she'll order Butrans and it will be in pharmacy the next morning.i told her i would follow-up end of month
PPLPMDL0020000001	Westlake	OH	44145	1/5/2011	Met Dr in the hospital, He is ER Dr at St John Westshore and also works with the resident program. He was sorry to miss the LELE and finds treating pain patients extremely frustrating as an ER DR. He said he sees constant drug seekers. We discussed some of the tools to help pick appropriate patients. We discussed the providing relief preventing abuse brochure, partners against pain resources and Oarrs program. He liked the OxyContin conversion guide for his reference.
PPLPMDL0020000001	Cleveland	OH	44106	1/5/2011	Talked to Margie Barron,Pharmacy Manager for Bolwell Health,University Hospitals out-patient pharmacy,about Butrans FPI,black box warning,dosage strengths available,stocking,formulary coverage and patient savings cards.i asked Margie who was the patient in her mind that could benefit from Butrans? Margie said all of these patients on hydrocodone combo's as she would like to decrease her Vicodin supply and this could be a great option before the doctor ever considers Vicodin.We also talked about the opioid-naive patients and Butrans being an option for them and Margie thought that was a great place.Margie said i should try and talk to Family Medicine,Internal Medicine and then Pain management and Oncology physicians about this medication.i asked if Margie would order a few boxes of each dosage strength of Butrans and she agreed but said i should come back Friday afternoon and we can look at computer together to see if Butrans ndc codes are in system.
PPLPMDL0020000001	Cleveland	OH	44106	1/5/2011	talked to Patty,Pharmacist,Sheila,Pharmacist and Margie,Pharmacy Manager and 5 Pharmacy Technicians about Butrans FPI,black box warning,dosage strengths,stocking and formulary coverage and savings cards for Butrans.I asked who was the patient in their minds that could benefit from Butrans? ALL of them said the patients on hydrocodone combo's that have moderate pain.i talked to them about the indication and asked which doctors/departments i should target? they all said family medicine,internal medicine, hiv/aids clinic,pain management and oncology. I asked if Margie,Pharmacy manager,would order Butrans and she said yes she would order a couple boxes of each strength. i asked if i could follow-up with her Friday,Jan7th,to look at her computer system about the ndc codes, to be sure she has everything in computer correctly and she agreed saying she would have more time Friday to do that.
PPLPMDL0020000001	Westlake	OH	44145	1/5/2011	Met Dr at the LELE lecture. He said he is a 2nd year resident. We reviewed the conversion guide for OxyContin. We discussed the tools in the pain management kit and the sample agreement. We discussed the Oarrs
PPLPMDL0020000001	Mayfield Heights	OH	44124	1/5/2011	Quick call....reminded doc of the oxycontin and ryzolt patient types. Explained the ryzolt value card and gave oxycontin conversion guide. She said she did not need oxycontin cards.
PPLPMDL0020000001	Westlake	OH	44145	1/5/2011	Met Dr at the LELE lecture. We reviewed the conversion guide for OxyContin. We discussed the tools in the pain management kit and the sample agreement. We discussed the Oarrs program.
PPLPMDL0020000001	Lyndhurst	OH	44124	1/5/2011	Spoke to Meagan about the Butrans indication, strengths, app sites, voucher program. They do not participate in Relay Health program as they do not have internet access. She could not commit to ordering but said she would leave info for pharmacist in charge. Steve.
PPLPMDL0020000001	Lakewood	OH	44107	1/5/2011	Spoke with Joe and Cindy, Joe had already heard about Butrans, we reviewed the Butrans FPI, indication, dosing and medication guide. He said they will wait for a script to come in. Reminder about OxyContin as an option as well, and asked to recommend Senokot S with opioids.
PPLPMDL0020000001	Lyndhurst	OH	44124	1/5/2011	Spoke to Adrienne about the Butrans indication, strengths, contents of the box. Reviewed the savings program. They do not participate in the Relay Health program. She committed to ordered 10mcg.
PPLPMDL0020000001	Cleveland	OH	44114	1/5/2011	talked to Dave Pulp,Pharmacy Manager,about Butrans FPI,discussed Black Box warning, dosage strengths,medication guide and instructions for use,stocking info and formulary coverage.i asked Dave if he felt Butrans had a place in his patient practice? Dave said yes and asked can patients cut Butrans? i told Dave no, they can not cut Butrans transdermal system and referred to the Butrans FPI.Dave then asked if Medicaid and Medicare covered Butrans? i explained Medicaid and Medicare would be a Prior Authorization and what that meant to doctors and then we discussed commercial plan patients using patient savings cards and explained out-of-pocket expenses for patient.Dave said CVS is a part of relay health,as they do have an electronic voucher program,so the savings will come up immediately.i asked if Dave would order a few boxes of each strength of Butrans? Dave said he will order Butrans as soon as he see's a script so i said i would follow-up the last week of January
PPLPMDL0020000001	Westlake	OH	44145	1/5/2011	Met Dr LELE lecture. We reviewed the conversion guide for OxyContin and discussed Ryzolt as a once a day option. i reviewed the laxative lines. We discussed the tools in the pain management kit and the sample agreement. We discussed the Oarrs program.
PPLPMDL0020000001	Mayfield Heights	OH	44124	1/5/2011	Quick call.....Discussed the appropriate patients for the oxycontin and ryzolt indication. Explained that both offer more convenient dosing than IR opioids dosed ATC for chronic pain. Gave her a formulary grid. She asked about medicaid coverage. Explained that oxycontin is covered.
PPLPMDL0020000001	Westlake	OH	44145	1/5/2011	Met Dr at the LELE lecture. We reviewed the conversion guide for OxyContin. We discussed the tools in the pain management kit and the sample agreement. We discussed the Oarrs program.
PPLPMDL0020000001	Cleveland	OH	44106	1/5/2011	talked to Sheila,Pharmacist,about Butrans FPI,black box warning,dosage strengths available,medication guide,instructions for patients on how to apply Butrans transdermal system,stocking,formulary coverage and patient savings cards.Sheila said this was a great option for patients on Vicodin that she feels are taking too many pills a month and are in more of that moderate pain side and could really benefit from Butrans.Sheila liked the once weekly transdermal delivery of Butrans and said i should talk to Family Medicine,as the doctors there write the most hydrocodone combo's and these patients arent being properly managed for their pain so Sheila said i should also work with them on pain management education tools,our Partners against Pain website would be beneficial to that group and also conversion guides for OxyContin.i asked if Sheila felt Butrans had a place in their patient population and she said yes and hopes doctors prescribe Butrans
PPLPMDL0020000001	Cleveland	OH	44111	1/5/2011	Spoke with Lynn, we reviewed the Butrans, FPI, indication, dosing and medication guide. She said she thinks she has some morphine patients on lower doses that this might be a good fit for. She said that she can order in one day, but they don't typically prescribe unless they get a script. I explained the importance of having it in stock for patients in pain who don't want to wait a day.
PPLPMDL0020000001	LAKEWOOD	OH	44107	1/5/2011	Spoke with Ronnie and Pam was listening in. I reviewed Butrans FPI, boxed warning, dosing. She said they have to wait for a script in order to stock.
PPLPMDL0020000001	Westlake	OH	44145	1/5/2011	Met Dr at the LELE lecture. We reviewed the conversion guide for OxyContin. We discussed the tools in the pain management kit and the sample agreement. We discussed the Oarrs program. We discussed Purdue's product lines, Ryzolt as a once a day option and the laxatives
PPLPMDL0020000001	Westlake	OH	44145	1/5/2011	Met Dr at the LELE lecture. We reviewed the conversion guide for OxyContin. We discussed the tools in the pain management kit and the sample agreement. We discussed the Oarrs program.
PPLPMDL0020000001	Westlake	OH	44145	1/5/2011	Met Dr at the LELE lecture. We reviewed the conversion guide for OxyContin. We discussed the tools in the pain management kit and the sample agreement. We discussed the Oarrs program.
PPLPMDL0020000001	Brooklyn	OH	44144	1/5/2011	Introduced myself & Butrans to Michelle, who said she does the ordering for that location. I reviewed indication, dosing/strengths, patient types, managed care/savings. Asked what her thoughts were and she said she wasn't sure what type of demand it would have. Reminded her that there is not another medication like this with this delivery system and that we anticipate it being very successful. Asked if she would stock it and she said she is going to wait for a prescription. Reminded her that upon launch, physicians will want to know where their patients can obtain Butrans and I would be letting them know who was stocking it in the area. She said to return after launch and let her know what type of response physicians are having.
PPLPMDL0020000001	440-827-5566	OH	44145	1/5/2011	Met Dr LELE lecture. He is a 2nd year resident. We reviewed the conversion guide for OxyContin. We discussed the tools in the pain management kit and the sample agreement. We discussed the Oarrs program.
PPLPMDL0020000001	Westlake	OH	44145	1/5/2011	Met Dr LELE lecture. We reviewed the conversion guide for OxyContin. We discussed the tools in the pain management kit and the sample agreement. We discussed the Oarrs program.
PPLPMDL0020000001	Westlake	OH	44145	1/5/2011	Met Dr LELE lecture. We reviewed the conversion guide for OxyContin. We discussed the tools in the pain management kit and the sample agreement. We discussed the Oarrs program.
PPLPMDL0020000001	Parma	OH	44129	1/5/2011	Met with Jackie who said that she was able to take some time to review the Butrans information that i had left for her yesterday. I reviewed indication, pt types, dosing/strengths and asked her if she would order one box of each strength. She said that she would because they have a lot of customers on "refill after refill of Vicoden". She said that she thinks that Butrans sounds like a great option instead of Vicoden and tramadol. I asked her who in the area may be interested in hearing about Butrans at launch and she mentioned Stith, Sustersic, and Chagin. I asked her to verify that all three strengths were in her computer and she said that they are. I asked if she could put the order in and she said that she is submitting a McKesson order tonight and that one box of each Butrans strength will be on her order. Thanked her and let her know that i would be back to follow-up on the
PPLPMDL0020000001	Westlake	OH	44145	1/5/2011	Spoke with Dr at LELE Program, he was the attending for the residents. He thought the information provided by the LELE was excellent for his students and residents and would like to have another LELE in the fall for new students coming in.
PPLPMDL0020000001	Cleveland	OH	44106	1/5/2011	worked Pharmacy-Bolwell Health-had lunch with 3 pharmacists and 5 pharmacy technicians to discuss Butrans and then worked Pharmacy-In-Patient/Main University Hospital:met with Wes,Clinical Specialist and Cheryl,Narcotics Buyer,to discuss Butrans fpi,black box warning,dosage strengths available,stocking and formulary coverage for Butrans.i asked Wes how can we get Butrans on the hospitals formulary? Wes said all i need is ONE doctor,to fill out a drug form,state who is the patient they will use this medication in,how much usage,dosage strength,etc,submit to pharmacy,Wes reviews all drugs submitted for P&T committee review,P&T committee meets last week of every month,Wes said have a Pain Management dr,like Dr.Hayek try Butrans in a few patients,fill out form,submit to him before end of feb,so P&T can review Butrans and get approved by 2nd week of March 2011. All i need is ONE dr though and Wes said this is a different product that they don't have in hospital and could be a great option
PPLPMDL0020000001	Shaker Heights	OH	44122	1/5/2011	Introduced myself and Purdue's products to Dr. Zivic. I asked him where he finds a place for OxyContin in his practice-He said that he writes it for "all different" pt types & conditions. I asked him what strengths he uses mostly & he said usually 10 or 20mg. I showed him conversion/titration guide with 7 tablet strengths & reminded him of the intermediate strengths. He agreed that they allow for individualization of dosing. I asked him if he would consider titrating a patient to 15mg instead of 20mg & he said he would. I asked him what patients are generally on before he switches to OxyContin and he said Ultram or NSAIDs. I asked if he ever starts opioid-naive pts and he said yes. I showed FPI 2,2. He asked how it compares with MS Contin & I told him we have no head-to-head data & therefore i couldn't compare. Dr. Zivic said he does not write Ryzolt. I asked him to explain why and he said that it is poorly covered by insurance companies-Reminded him of Ryzolt Value Cards.
PPLPMDL0020000001	Cleveland	OH	44106	1/5/2011	talked to dr about his patients on short-acting opioids that he feels are ready to convert to a long-acting opioid and asked if the convenience of q12h dosing of OxyContin was a factor that he considered when choosing a long-acting opioid? dr said yes,he did look at that as many patients arent compliant with q4/6h dosing and he has seen an increase in dosing compliance with q12h dosing.i asked dr to think of OxyContin 10mg or 15mg q12h for those patients he decides are ready to convert from short-acting opioids,dr agreed and said he does do this now but doesnt start a lot of patients on OxyContin.we discussed Oxycontin's formulary coverage and left OxyContin conversion guide.recommended Senokot-S
PPLPMDL0020000001	Parma Heights	OH	44129	1/5/2011	Spoke with Al about Butrans, reviewing indication, dosing/strengths, patient types, usage, and conversion/titration (Table 1 in FPI). I asked him what his thoughts were and he said that it sounded interesting. I asked him if he would place an order for all three strengths so that when we launch, patients will be able to get it immediately when they bring in a prescription. He asked me for the Cardinal item numbers and said that he would order all three strengths today. He then got called for a phone call & patient consultation so i thanked him and let him know that i would be back to follow-up to ensure that everything with the ordering went smoothly.
PPLPMDL0020000001	Mayfield Heights	OH	44124	1/5/2011	Spoke to Dana about the Butrans indication, boxed warning, application sites, how to dispose, contents of box, and avail strengths. The store was busy and she was filling in for Hillary. Gave her info to give to pharmacy mgr.

PPLPMDL0020000001	Brooklyn	OH	44144	1/5/2011	Stopped Dr. Detwiler who saw the Ryzolt Value Cards in my hand and asked me what it was. I delivered 2-3-1 message and he asked that I schedule a lunch so that we could sit down. He said he was interested to hear why he would want to write that instead of generic but that he didn't have time now. He signed for value cards and I asked him if he had had the opportunity to utilize the OxyContin savings cards that we discussed and that I had left behind last time. He said that he was actually glad that I reminded him because he had not remembered they were there. I reminded him how they are used and that they are for both cash-pay and commercial insurance patients. He asked me again to schedule time to sit down with him to discuss further. Lunch is scheduled for next week.
PPLPMDL0020000001	Brooklyn	OH	44144	1/5/2011	Spoke with Gary and introduced Butrans. He said he had heard of it. I reviewed the indication, pt types, managed care, dosing/strengths. I asked him if he would stock it and he said that over 70% of his business is Medicaid and that until or unless Butrans is covered under Medicaid, he will not stock it. I let him know that Medicaid patients will be able to obtain Butrans with a prior authorization after they fail one week of two covered therapies. He said that this was not enough for him to stock it at this time. He let him know that physicians will want to know a list of pharmacies that are stocking it upon launch. He still said he would not stock it.
PPLPMDL0020000001	Westlake	OH	44145	1/5/2011	Dr is a 1st year resident. She is interested in going into geriatric care and palliative medicine. We discussed pain management as a whole and some of the challenges. We discussed the pain management kit, and Oarrs program and other resources to help keep her practice safe. We reviewed the conversion guide for OxyContin and let her know about Ryzolt and Senokot medications.
PPLPMDL0020000001	BEACHWOOD	OH	44122	1/5/2011	Spoke with Sandra, who said she does the ordering in the pharmacy. Introduced Butrans (indication, dosing/strengths, patient types) and asked her what her thoughts were. She said that it sounded fine and that when she sees prescriptions for it she would order it. I asked her who in the area she would recommend I speak with but she said she couldn't think of anyone in particular. I asked if she would consider stocking it now so that when physicians start writing that their patients could obtain Butrans immediately, but she said she would be lying to me if she said she would stock it prior to seeing a prescription. She also said that she has seen a lot of switches for patients from OxyContin since the reformulation. She said that the reformulation was "less easy to crush or chew or snort". I reminded her of two field card bullet points and she said that she understands that & she did not have any questions on it.
PPLPMDL0020000001	Brooklyn	OH	44144	1/5/2011	Introduced myself and Butrans to David (Pharmacy Manager). Reviewed indication, usage, dosing/strengths, patient types, managed care/e-voucher. He asked if it has any abuse potential. I reminded him that because it is an opioid, it carries all the attendant risks of other opioids and is abusable and does not have an indication for drug addiction. Asked if he would stock it & he said he waits until he gets a prescription. I let him know that when we launch, physicians will ask me where they can get it and that many pain patients will not wait the 1-2 days for them to get it in, but will go to a pharmacy that has it. Asked if he would stock it if a physician requested it or committed to write it and he said he would do that, even before the prescription comes in.
PPLPMDL0020000001	MAYfield Heights	OH	44124	1/5/2011	Spoke to Jesse about the coming of Butrans, the indication, box warning, strengths, application sites. He said they are a part of the Relay Health program. Asked him to order at least a box of the 10mcg. He said he receives shipments daily so "its not a problem". He said, "I will take care of it".
PPLPMDL0020000001	Cleveland	OH	44106	1/5/2011	I talked to dr about his patients on short-acting opioids that he is ready to re-fill their scripts and asked if he could stop and consider OxyContin 10mg or 15mg q12h as an option? dr said he does prescribe OxyContin, usually all 7 tablet strengths but does sometimes forget about the 15mg strength, so I asked if he could consider a few of his Vicodin or Percocet patients dosing q4/6h now to convert them to OxyContin, with convenience of q12h dosing? dr said he would consider and also wanted an OxyContin conversion guide, recommended Senokot-S
PPLPMDL0020000001	Brooklyn	OH	44144	1/5/2011	Stopped Dr. Miguel in hallway and told him I had a couple of questions for him. He stopped me and said that he just had a 51 year old male patient come in who was on 80mg OxyContin 4 times a day & that this patient also had a Duladid pump in place. Dr. Miguel said the pt came to him from a physician in Akron and he couldn't believe how much pain medication this pt was on. He said he was not comfortable writing that much OxyContin. I reviewed w him that OxyContin is a q12h medication. Reminded him that during our last conversation, we discussed switching appropriate pts who were on ATC Vicodin over to an appropriate dose of OxyContin and asked if he has done that. He said that he has started switching patients. I asked if he had had any feedback and he said he had not yet. Thanked him and asked him to continue doing this & he said he would. I asked him if he had written Ryzolt yet & he said he had forgotten. 2-3-1 reminder and showed value cards. He said he would try to remember.
PPLPMDL0020000001	Cleveland	OH	44106	1/5/2011	talked to dr about his patients on short-acting combo's that he felt could benefit by converting to OxyContin, with convenience of q12h dosing, showed OxyContin conversion guide and formulary coverage for commercial plan patients and Medicaid patients paying \$2.00 at pharmacy, I asked if dr could start a few patients on 10mg q12h of OxyContin or 15mg when appropriate instead of refilling short-acting combo scripts and dr agreed saying he would remember the lower dosage strength options for OxyContin, recommended Senokot-S
PPLPMDL0020000001	Lyndhurst	OH	44124	1/5/2011	Doc said that express scripts is no longer covering oxycontin for patients and that a couple of patients have received letters stating that they need to be switched to morphine, effective Jan 1st 2011. She also said that some patients have commented on the difference in the oxycontin tablets. I reminded her about the ltr to patients explaining the change and showed her where they were in the cabinet. Told her that I would look into the express coverage issue but explained the savings cards for those patients that may not have previously needed the card. She said ryzolt patients are doing fine and there are no concerns. I reviewed the 3 strengths and the covered
PPLPMDL0020000001	Mayfield Hts	OH	44124	1/5/2011	Spoke to Nate (fill in pharmacist for Sandy). Discussed the coming on Butrans, the indication, application sites, and the voucher savings. They do not participate in Relay Health and auto shipments are not to all stores. He suggested that I come back to speak with Sandy.
PPLPMDL0020000001	Cleveland	OH	44106	1/5/2011	I talked to dr about his patients on short-acting combo's and considering OxyContin 10mg or 15mg q12h as an option instead of re-filling the short-acting script, dr said he does prescribe some OxyContin, typically for severe pain, but would consider that as I asked what's the clinical benefit of continuing the short-acting combo? dr said a lot of times its convenience for patient, if a CII he can call in scripts or if a CII like Percocet, patients can still take it q4/6h or as needed, so those are only benefits he can think of now, gave OxyContin conversion guide and recommended Senokot-S
PPLPMDL0020000001	Westlake	OH	44145	1/5/2011	Presented LEELE program for the students and residents with Ed Cartwright speaker. Spoke with attending Dr Tollentino and Dr Bloddorf regarding further pain management education for the residents. They are no longer allowed to have reps come in to discuss product, but they do journal clubs. They thought the LEELE talk was excellent and would like to have it again in the fall for the new students and residents coming into the program.
PPLPMDL0020000001	Westlake	OH	44145	1/5/2011	We went over the new partners against pain resource. She liked the USB instead of the CD. She said she may update her current pain agreement. Reminder about convenience of Q12hr dosing with OxyContin and once a day with Ryzolt.
PPLPMDL0020000001	Cleveland Heights	OH	44118	1/6/2011	Reviewed the range of appropriate patients for oxycontin and the flexible dosing options. Asked him if he is still providing savings cards for patients with high out of pocket expenses. He said he still has them. Reminded him of the expiration of 03/31/11. Also reminded him of the ryzolt patient.
PPLPMDL0020000001	University Hts	OH	44118	1/6/2011	Quick call....oxycontin and ryzolt patient type reminders. Discussed the BWC coverage for both and offered savings cards. They were not needed. Nothing learning.
PPLPMDL0020000001	Cleveland	OH	44120	1/6/2011	I talked to Bill, Pharmacist and discussed Butrans fpl, black box warning, dosage strengths available, medication guide, instructions for use, savings cards and formulary coverage and stocking. Bill said he really liked that Butrans was a transdermal system and patients only had to switch the system every 7 days. I asked if there was a place for this product in their patient population and he said yes, they have some commercial plan patients as they come from Main campus or Brooklyn campus, it could be any Metro doctor that patients see and come to them to fill scripts. Bill said I had to talk to Chuck, Pharmacy Supervisor, about ordering/stocking Butrans.
PPLPMDL0020000001	East Cleveland	OH	44112	1/6/2011	DOC said patients are still unhappy with the reformulation of oxycontin and said he is still switching those that complain. I asked him to try and new patient (oxycontin naive) to a low dose of oxycontin. He said he is trying. Reminded him of the ryzolt patient type and the coverage with BWC. Asked him to from IR tramadol dosed ATC.
PPLPMDL0020000001	Westlake	OH	44145	1/6/2011	Spoke with Amin, we reviewed the Butrans FPI, medication guide, indication. He said he would stock it and they see a lot of pain patients. He said that patients like their vicodin and might not want to try a long acting patch.
PPLPMDL0020000001	Cleveland Hts	OH	44118	1/6/2011	We discussed that opioid naive patients could start with a 5mcg dose. Spoke with Sourabh about the indication and strengths of Butrans. Discussed the application and disposal. Explained the uniqueness of the product and asked him to stock at least one box of the 10mcg. He said he can't stock without a script. Explained the savings card program.
PPLPMDL0020000001	South Euclid	OH	44121	1/6/2011	Spoke to Gary and Kerry about the coming of Butrans, the indication, strengths, application and disposal of the system. I asked if they would order at least one box of the 10mcg as docs will want to know where its stocked. Gary said that they as pharmacists can not order until they get a script. Kerry stated that customers are still complaining about the oxycontin reformulation. I explained the intention of the reformulation and she said she tells customers that its the same medication. She did say she has not noticed any switches necessarily.
PPLPMDL0020000001	Cleveland	OH	44120	1/6/2011	talked to Erol, Pharmacist, about Butrans FPI, black box warning, dosage strengths, medication guide, instructions for use and asked Erol where he felt Butrans would have a place in their patient population? Erol said they see a ton of Percocet written, and most of those scripts come from the internal medicine group right above them in same building, so he would like to see some of that Percocet volume go down and Butrans take the place. I asked who was the patient in his mind for Butrans? Erol said probably more of that moderate pain patient, so we discussed opioid naive and opioid experienced patients for Butrans. We talked about stocking and Erol said all CII opioids are locked in cabinet with CII opioids and Chuck, Pharmacy supervisor handles all ordering/stocking of those medications so talk to him about Butrans orders/stocking, talked about savings cards and Erol said talk to Chuck about Rebate offer as Amerisource is their wholesaler so this would help them.
PPLPMDL0020000001	Cleveland Hts	OH	44118	1/6/2011	Doc asked changes to oxycontin coverage. He said a couple of patients have complained they can not afford it now. I asked him if he recalled which plans and he could not recall. I explained there may have been some recent changes with the beginning of the year but I would need to now specifically which ones. Reminded him of the Medicaid coverage and the coverage with AARP med D plans.
PPLPMDL0020000001	Westlake	OH	44145	1/6/2011	Quick call, reminder about OxyContin managed care and AARP Med D coverage. We discussed the new partners against pain resources and he will take a look. Reminder about Senokot S with opioid scripts.
PPLPMDL0020000001	South Euclid	OH	44121	1/6/2011	Spoke with Jagreet, as Mitchell still was not in. Discussed the Butrans indication and potential patient type. Also discussed the convenience of 7 day wear and how to apply and remove. Asked her to order but she said she was not the pharmacy mgr and they usually don't stock product until they get a scrip.
PPLPMDL0020000001	Cleveland	OH	44120	1/6/2011	talked to Chuck Howard, Pharmacy Supervisor, Wanda Price, Pharmacist, Erol, Pharmacist, William Brown, Pharmacist, Charlene Laster, Pharmacist and pharmacy technicians, about Butrans FPI- we discussed Black box warning, dosage strengths available, medication guide, instructions for use, rebate/stocking info and formulary coverage. Erol and Chuck said they have a ton of Percocet, as they just got an order of 3400 Percocet and that will last 2-3wks so if they could decrease their Percocet volume, they would be happy, to replace that with Butrans stocking. I asked each pharmacist who I should talk to here at the Buckeye site and main campus MetroHealth Medical center? If Erol and Chuck said the internal medicine doctors here need to know about Butrans as they write a lot of Percocet and a little Vicodin and they prescribe high amounts of the medications, pain management and internal medicine and family medicine doctors at main campus. Chuck said to come back 1st week of feb and discuss stocking/ordering
PPLPMDL0020000001	University Heights	OH	44118	1/6/2011	Spoke to Ted about the coming of Butrans. He said he heard a little something about it. Discussed the indication, strengths, application and disposal, commercial coverage. Asked him to stock at a box of the 5 and 10mcg. He said that he could order it when he gets a script. The tech confirmed that they do participate in the relay Health program
PPLPMDL0020000001	Cleveland	OH	44129	1/6/2011	Spoke with Rochele who is a floater pharmacist- a new pharmacist will be starting at this store on 1/10/11. I introduced Butrans and reviewed indication, usage, dosing. She said she liked the idea and convenience of a seven day transdermal system. Rochele said she would leave my card and the Butrans information for the new pharmacist and that I should check back after he/she starts.
PPLPMDL0020000001	Westlake	OH	44145	1/6/2011	Spoke with Chuck, he is floater from N. Royalton. We reviewed the Butrans FPI, indication, medication guide. He said that Deanna would be the one to make the decision to stock.
PPLPMDL0020000001	Parma	OH	44129	1/6/2011	Asked Dr Chagin where OxyContin fits into his practice- he said he uses it some but not very much because he uses it for severe, chronic pain, like cancer pain, low back pain. Presented conversion guide & pointed out seven total tablet strengths. Asked if he was utilizing the interned strengths & he agreed that they allow for individualization of dosing. Asked how long he keeps pts on short-acting before switching them to long acting like OxyContin & he said usually months. I asked him if he would ever consider switching them sooner & he said maybe. I asked him what measures he has in place to help him w approp pt selection & he asked if I have any resources. Discussed importance of pt selection- introduced Partners Against Pain USB & leaver & discussed forms avail. He said he would like to put a pain contract in place. I encouraged him to visit the HCP area of the site.
PPLPMDL0020000001					Asked his experience w Ryzolt. Went over 2-3-1 & value card. Asked if he would try it for an approp pt & he said yes

PPLPMDL0020000001	Cleveland	OH	44103	1/6/2011	talked to dr about her Percocet patients that she believes are ready to be converted to a long-acting opioid and choosing OxyContin 10mg or 15mg,with convenience of q12h dosing.dr said she has started a few patients recently on the 15mg strength and 30mg sometimes,so we talked about all 7 tablet strengths being there for flexible titration and then discussed Medicaid patients paying \$2.00 at pharmacy and Medicare Part D/UHC AARP patients paying lowest branded co-pay so asked her to think of these patients instead of refilling Percocet.dr agreed.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44104	1/6/2011	i talked to dr about his patients taking Percocet q4/6h and perhaps benefiting from convenience of q12h dosing of OxyContin,15mg or 30mg q12h instead of refilling the Percocet.dr said he does convert patients to long-acting,as he prefers long-acting oxycodone but depends on trust level with patients,patients pain worsening if on Percocet and they are ready for a long-acting opioid,then he will go to OxyContin but usually forgets about 15mg and 30mg strengths.so i showed dr OxyContin conversion guide and discussed 7 tablet strengths available to allow for flexibility in titration,dr said he'll consider those intermediate strengths next time.recommended Spoke to Paul about the Butrans indication, strengths, boxed warning, application and disposal. He asked if it would in any way replace or can be substituted for percocet or oxycontin. I discussed the positioning and asked if there were any docs he thought we could focus on. He suggested Drs. Price and Thomas Craig who he feels prescribes too many high doses of both. They do not participate in the relay health program.
PPLPMDL0020000001	Cleveland Hts	OH	44118	1/6/2011	talked to dr about his patients on short-acting combo's,Vicodin and Percocet,dosing q4-6h and potentially benefiting from convenience of q12h dosing of OxyContin 10mg or 15mg,dr said he does start severe pain patients on low doses of OxyContin,but most patients stay on short-acting combo's for awhile unless they are complaining of around the clock dosing regimen and he feels twice daily dosing is easier or if patients pain has worsened even though they are taking short-acting opioids,then he'll consider long-acting opioids.talked to dr about his patients taking tramadol,q4-6h,and perhaps converting them to once daily dosing of Ryzoil and using Ryzoil value card,talked to dr about his commercial plan patients using Ryzoil value card,dr said he has started some patients on Ryzoil,once daily dosing is easier than q4-6h for some patients and value card is easy.recommended Senokot-
PPLPMDL0020000001	Westlake	OH	44145	1/6/2011	I asked Dr if he would convert patients from hydrocodone to OxyContin instead of going to percocet. He said that he would, it just depends on the amount that the patients are taking all day. We reviewed the conversion guide. I asked if a pain agreement might make him feel more comfortable prescribing OxyContin sooner. He said that he has used one but he gives the patients the rules upfront verbally and does not have an issue. He would feel more comfortable sending patients to pain management if he did not trust the patients. Reminder about Senokot 5 and he has samples.
PPLPMDL0020000001	Parma	OH	44129	1/6/2011	Spoke with technician who said that Rick was too busy to speak with me. Reviewed indication, usage, patient types for Butrans and left my card and information for Rick. She said that she would give the information to him and that i could stop back another time to speak with him.
PPLPMDL0020000001	Cleveland	OH	44120	1/6/2011	talked to Chuck,Pharmacy Supervisor,about Butrans FPI,black box warning,dosage strengths available,medication guide,instructions for use,formulary coverage,savings cards and stocking/ordering of Butrans using the rebate form as Amerisource Bergen is their wholesaler.Chuck was happy to hear that this option is finally available to patients,we discussed the indication and chuck said probably the moderate pain patients will benefit most from Butrans with the 5mgc/hour and 10mgc/hour transdermal systems.I asked Chuck if he would order a couple boxes of each strength as shipping starts Jan.10th,to wholesalers and distributors,Chuck said i needed to follow-up with him end of January/February,once i speak with doctors about Butrans and have an idea of who's committed to prescribing and he'll order Butrans at that time.
PPLPMDL0020000001	Cleveland	OH	44120	1/6/2011	i talked to dr about her patients taking Percocet q4/6h that could benefit from convenience of q12h dosing of OxyContin,10mg or 15mg.dr said she usually waits for patients to complain that pain has worsened or if their is a new disease present and vitals are worse,then she'll consider a long-acting opioid and would consider OxyContin at that time.I asked dr to consider OxyContin 10mg or 15mg q12h instead of refilling Percocet.dr agreed to consider this option.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44120	1/6/2011	talked to Charlene about Butrans FPI,black box warning,dosage strengths,medication guide,instructions for use,stocking/ordering of Butrans and patient savings cards. Charlene said Butrans sounds like a great option for those moderate pain patients as the severe pain patients may be on higher doses than the 80mg oral morphine equivalent and could see that the 20mcg/hour Butrans transdermal system may not provide enough pain relief,so i asked her to think of patients opioid naive and opioid experienced and showed Butrans fpi section about initiation of therapy. Charlene said Chuck does all ordering of controlled substances so i should talk to him about
PPLPMDL0020000001	Parma	OH	44129	1/6/2011	Introduced Butrans to Fred, who said that Steve does the ordering. Reviewed indication, dosing/strengths, pt types, abuse potential. Fred asked about use in renally impaired pts & i showed FPI section 8.7. He said he thought it sounded like a good idea. I asked him if he would recommend to Steve that they place an order ASAP so that they can be stocked when we launch. He said he would give Steve the information & will recommend that they place an order.
PPLPMDL0020000001	Cleveland	OH	44113	1/6/2011	talked to dr about his patients on short-acting hydrocodone combo's and when he knows the patient is ready to convert to a long-acting opioid,considering OxyContin 10mg or 15mg q12h.dr said he does write 10mg-40mg OxyContin for severe pain patients but feels tramadol,then Vicodin and other hydrocodone combo's manage patients pain well enough that they dont need to convert to long-acting opioids,but he will prescribe them when necessary.i asked if he could consider Medicaid patients,as they only pay \$2.00 at pharmacy,to be started on OxyContin 10mg or 15mg,with convenience of q12h dosing,instead of re-filling short-acting combo's,dr said he'll consider that option.recommended senokot-5
PPLPMDL0020000001	Cleveland	OH	44120	1/6/2011	i talked to Wanda,Pharmacist,about Butrans FPI,black box warning,dosage strengths available,medication guide,instructions for use,savings cards,formulary coverage and stocking of Butrans.Wanda said a transdermal system is great and thinks there is a place for Butrans here at MetroHealth Medical Center (buckeye site) but i have to speak with internal medicine doctors above pharmacy and once i do that and they see scripts she thinks Chuck,pharmacy supervisor, will order Butrans and stock it,but they'll need to see scripts first.i asked her if they ever have patients come to them and leave their pharmacy if they dont have a medication in stock? Wanda said yes occasionally that does happen but not often,so i emphasized the importance of ordering Butrans and having it in stock,so patients arent turned away in pain and taking their prescriptions somewhere else. Wanda agreed and said talk to Chuck.Wanda said probably moderate pain patients would do best on Butrans so we talked about indication
PPLPMDL0020000001	Westlake	OH	44145	1/6/2011	Spoke with Lisa, we reviewed the Butrans FPI, boxed warning, indication and medication guide. She said she has been turned too many times by reps who've made promises about the medication moving off the shelves and then she gets in trouble for having too much inventory on the shelf. It is her strict policy to not stock until she sees a script.
PPLPMDL0020000001	Cleveland	OH	44103	1/6/2011	talked to dr about his patients taking Percocet,q4/6h,that perhaps could benefit from convenience of q12h dosing of OxyContin and considering converting patients from Percocet to an OxyContin 10mg or 15mg q12h.dr said he does have a lot of patients on short-acting oxycodone and does start them on OxyContin at some point,but usually depends on patients pain severity,new disease presents itself or patients complain of q4/6h dosing and think twice daily dosing of OxyContin would be easier.then he will consider OxyContin q12h.talked about Medicaid patients paying \$2.00 at pharmacy for OxyContin and UHC/AARP Medicare part d patients paying lowest branded co-pay for OxyContin and asked dr to consider these patients to start on OxyContin instead of refilling Percocet.dr said he'll consider that option.recommended Senokot-5
PPLPMDL0020000001	Parma	OH	44129	1/6/2011	Introduced Butrans to Bethany, reviewing indication, usage, patient types, managed care/e-voucher (they do participate), disposal. She said she thinks it is a great idea and thinks it is better than taking multiple pills. She said Dr. Moss may be interested to hear about it at launch. Asked her to place an order so that she will have it in stock at launch and she agreed to place an order for all three strengths. Bethany said that she has a customer who has been on OxyContin for awhile and that since the reformulation, the customer is reporting to her that she is not getting the same amount of pain relief that she was getting with the "OC" version. The customer told Bethany that she thinks that she needs a higher dose now and Bethany told her that she needs to speak with her doctor about that. I gave her the field card and went over bullet points. I encouraged her to call Medical Services to answer any questions that she needed more clarification on.
PPLPMDL0020000001	Parma	OH	44129	1/7/2011	Quick call with Laura in the hallway as she signed for new Ryzoil Value Cards. Reminded her of savings opportunity & Ryzoil managed care. Spoke with Dawn & asked her if she had the chance to look at the Partners Against Pain USB that I had given her at my lunch. She said that they did look at it and thought the resources on it were fantastic. She said it was very helpful & also said that they have used some of the Ryzoil Value Cards lately. She also told me that Jen Hula is a new NP that will be joining them full time, and that Laura will be leaving and going to Grace.
PPLPMDL0020000001	Mayfield Heights	OH	44124	1/7/2011	Discussed the ryzoil indication and patient type. Asked doc if he has had any appropriate patients recently. He said no. I reminded him of the coverage with medical mutual.
PPLPMDL0020000001	Cleveland	OH	44111	1/7/2011	We reviewed OxyContin as a Q12hr dose. She was on her way to the hospital and I asked if she would recommend if they could benefit from convenience of dosing. Barbara has a current patient on Ryzoil and they are doing well and needed a new value card. We reviewed appropriate patients for Ryzoil. I asked if she would think of a patient to convert from short acting tramadol to Ryzoil next week.
PPLPMDL0020000001	Cleveland	OH	44106	1/7/2011	talked to Margie,Pharmacy Manager,about ordering/stocking Butrans and she said that after our lunch discussion on Wednesday,Jan.5th,she ordered 1 box of each dosage strength of Butrans.I talked to Margie about the Rebate program for Butrans and she said that Amerisource was her wholesaler but that was great if she could get a rebate,she would order 2 boxes of each strength to get the maximum rebate,so she ordered that today.i told Margie that after i meet with pain management,internal medicine doctors the last week of January,i will be sure to tell every doctor that Bolwell,out-patient pharmacy here at University Hospitals has Butrans stocked.<font color=blue><b>CHUDAKOB's query on 01/14/2011</b></font>Amy, You cannot refer your physicians prescriptions to one pharmacy. You have to tell them about many that have it stocked. You cannot tell Bolwell has it stocked without telling them others in the area as well.<font color=green><b>BROOKAM's response on 01/21/2011</b></font><font color=blue><b>CHUDAKOB added notes on 01/24/2011</b></font>Thank you!
PPLPMDL0020000001	Cleveland	OH	44106	1/7/2011	i talked to Margie,Pharmacy Manager,she ordered all 3 dosage strengths of Butrans,after our lunch on Wednesday,Jan.5th,we discussed the Rebate offer and Margie said that Amerisource was her wholesaler and this rebate would be great so she ordered 2 boxes of each strength and said she would fill out form today.i told Margie shipping of Butrans will begin next Monday,Jan.10th, to wholesalers and the week of January 24th,i am talking to physicians about Butrans and will tell physicians that Bolwell,out-patient pharmacy at University Hospital has Butrans stocked.
PPLPMDL0020000001	Cleveland	OH	44113	1/7/2011	worked pain management and physical medicine&rehab-see call note on Dr. Shen
PPLPMDL0020000001	Parma	OH	44134	1/7/2011	Introduced myself & Butrans to Mercedes. Reviewed indication, conversion, pt types, dosing & strengths. She then got a phone call that she said she had to take. I asked her if she would place an order so that patients would be able to get it immediately when physicians start writing it upon launch and she said she would.
PPLPMDL0020000001	Mayfield Village	OH	44040	1/7/2011	Spoke to Bridgette (floater) about the Butrans indication, strengths, application and disposal, commercial coverage and savings program. She was not very familiar with the trends of the store. Referred me to talk to Michael, who is the managing pharmacist.
PPLPMDL0020000001	Richmond Heights	OH	44143	1/7/2011	Spoke to ANeesha about the coming of Butrans. Discussed the indication, patient type, strenghts, application and disposal. Explained the importance of stocking the product before promotion to prescribers. She said she was filling in and that i need to talk to Mel, however, they don't usually stock before they get a script.
PPLPMDL0020000001	Fairview	OH	44111	1/7/2011	Spoke with Tom, we reviewed Butrans FPI, indication, dosing and medication guide. He thinks that Dr Lalli would be good to talk to as he has a lot of pain patients. He agreed to order at least the 5 and 10mcg.
PPLPMDL0020000001	Cleveland	OH	44111	1/7/2011	Spoke with Earl, we reviewed Butrans, FPI, indication, dosing, medication guide. He agreed to order. He said Dr Nicols writes the most vicodin and would be best to call on.
PPLPMDL0020000001	Cleveland	OH	44111	1/7/2011	Spoke with Steve tech, pharmacist was floater. We reviewed Butrans FPI, indication, medication guide. He said they don't stock until they get a script because they don't have the room.
PPLPMDL0020000001	Cleveland	OH	44113	1/7/2011	worked Grace Hospital Pharmacy-in patient, 3 Pharmacists were in attendance, pharmacy technicians and medical students-at lunch to discuss Butrans fpi,medication guide,instructions for use,formulary coverage,savings cards and stocking of Butrans
PPLPMDL0020000001	Cleveland	OH	44113	1/7/2011	talked to Mike Shumate,Pharmacy Director,Mike,Pharmacist,Mae,Pharmacist and Clinical Manager who will be handling future in-services for nurses at Lakewood,Fairview and Southpointe hospitals,only 1 floor at each hospital and Grace pharmacy in Tremont is the Main hub for all drugs to be dispensed and delivered-i talked to each Pharmacist and Pharmacy technicians about Butrans fpi,black box warning,medication guide,instructions for use,formulary coverage and savings cards.Amerisource is their wholesaler.All 3 pharmacists said great product,there will be a place for Butrans at Grace,but small because they have majority of Medicare patients,also they said nurses wont remember to write down day/time of Butrans transdermal system and remember to rotate the application sites,so i asked if they could work on documentation with nurses if they start seeing patients on Butrans and dr wants patients on Butrans,they said yes.also discussed REMS for Butrans and Mike,Pharmacist asked what happens if
PPLPMDL0020000001	Mayfield Heights	OH	44124	1/7/2011	Spoke with Warren about the coming of Butrans. He said he heard the name and expected someone to come talking about it. Discussed the indication, application and disposal, contents, strengths. He asked about breakthrough options. Explained that IR analgesics/NSAIDS can be used. He asked if Hillcrest Pain mgmt was aware of the product yet. Explained how we only talking to pharmacist right now to ensure stocking. Asked him to stock at least 1 box of each. He said he could probably do that. He asked if scripts will be written for 1 patch or if they will be packaged individually. Discussed the contents and packaging. Discussed the rebate program which he said he could benefit from. He does participate in the relay health evoucher program. He also wanted to know if the hospital is stocking it. Told him not yet.
PPLPMDL0020000001					

PPLPMDL0020000001	Mayfield Heights	OH	44124	1/7/2011	Spoke to Marsha about the coming of Butrans - the indication, strengths, schedule, application and disposal, contents, and REMS. Explained the importance of stocking now and asked her to stock a box of each. She said she honestly wont likely stock until they get a script. They do participate in the Relay Health program. She didnt want to stock products before a scripts because of the cost.
PPLPMDL0020000001	Cleveland	OH	44109	1/7/2011	WORKED physical medicine and rehabilitation dept-see call notes on Dr.Huang,Dr.Harris,Dr.Malkamaki
PPLPMDL0020000001	Cleveland	OH	44109	1/7/2011	worked geriatric department with Dr.Campbell,Dr.Corrigan and Dr.Baker-left OxyContin fpi,conversion guide,commercial plan grid and Medicaid coverage sheet,left Partners against pain brochures and wepkey for each dr-cant see doctors unless you have lunch so booked a lunch in February with Karen,receptionist for dept,to discuss Butrans
PPLPMDL0020000001	Richmond Heights	OH	44143	1/7/2011	Quick call.....asked doc to try a conversion to ryzolt from IR tramadol taken ATC. He said he knows. Reminded him of the oxycontin patient type and the preferred coverage for those patients with AARP Med D plans. Nothing learned.
PPLPMDL0020000001	Cleveland	OH	44113	1/7/2011	i talked to Mai,Pharmacist,about Butrans FPI,black box warning,dosage strengths available,medication guide,instructions for use,REMS program,formulary coverage and savings cards for Butrans and stocking.Mai said Butrans was a great option for those moderate pain patients that are opioid naive or on low doses of Vicodin or Percocet; discussed the indication again with Mai and said yes,moderate pain patients can start on Butrans and Mai said doctors will love this product because its a CIII and they can call in re-fills for the medication.Mai said i should talk to Dr.Nickels,Dr.Raheja and Dr.Nouraldin as they are all of the out-patient physicians based at Grace Hospital and follow-up with her to keep her posted on doctors feedback.Mai said she is the Clinical Manager and would be interested in Nurse In-Services at Fairview,Lakewood and Southpoint on OxyContin conversions,documentation,etc.in future so follow-up in a few months with her on that topic
PPLPMDL0020000001	Mayfield Heights	OH	44124	1/7/2011	Spoke to Christy about the coming of Butrans - indication, schedule, 7 day, application and disposal. She asked what the recommendation is for a loosened patch.....can tape be applied. Explained that first aid tape can be applied to the edges. Discussed the Relay Health program and she was pleased about that. She agreed to order a box of each.
PPLPMDL0020000001	Cleveland	OH	44113	1/7/2011	i talked to Mike Shumate,Pharmacy Manager,about Butrans FPI,black box warning,dosage strengths available for Butrans,medication guide,instructions for use,formulary coverage,stocking and rebate offer for Butrans and patient savings cards.Mike said he does see a place for Butrans at Grace Hospital,as this is all out-patient and they are the main hub for ordering/distribution of all medications to Lakewood,Fairview and Southpointe Hospitals where they have 1 floor of in-patient patients.challenge is most patients are Medicare and if Butrans isnt covered that will be tough here.However Mike said for commercial plan patients,paying tier 3 co-pay and using Butrans savings card,that will help,asked if Mike would order today,he said wait until i have lunch with Dr.Nickels and Dr.Raheja,get feedback and see him then about ordering as he does see doctors prescribing Butrans and if they end up in Grace Hospital,he'll have to have Butrans in stock at that time,so i'll follow-up Jan.27th
PPLPMDL0020000001	Cleveland	OH	44106	1/7/2011	worked Bolwell Health Center,Out-patient pharmacy,at University Hospitals-see call note on Bolwell and Margie Baron,Pharmacy Manager. Worked Pain management dept-see call notes on Dr.Hayek,Dr.Saghal and Dr.Khalil
PPLPMDL0020000001	Mayfield Heights	OH	44124	1/7/2011	Quick call.....reminded doc of the oxycontin and ryzolt patient types. Both offer more convenient dosing than IR tablets dosed ATC. Discussed oxycontin medicare/medicare coverage.
PPLPMDL0020000001	Cleveland	OH	44130	1/7/2011	Followed up with Dave- he said he had read through the information that I had left on Tuesday. Reviewed Butrans indication, pt types, dosing, conversion/titration. Asked him to place an order for one box of each strength & he asked what we anticipated the most common dose to be. I showed him Table 1 in FPI & explained conversion/titration. I asked if he would stock one box each of the 5mg & 10mg systems and he agreed to place the
PPLPMDL0020000001	Cleveland	OH	44130	1/7/2011	Introduced myself & Butrans to John, pharmacist. Reviewed indication, usage, appropriate pt type, conversion/titration. Asked him his thoughts & he said he thought there was a place for it. He said that he thought it may be particularly useful in elderly patients. Asked him if he would order one box of each strength & he agreed to do so. He said he would also share this information with the other pharmacists who cover that store.
PPLPMDL0020000001	Cleveland	OH	44113	1/7/2011	i talked to Mike,Pharmacist,about Butrans fpi,black box warning,dosage strengths available for Butrans,medication guide,instructions for use,REMS program,formulary coverage as Mike is the Managed Care liaison for Grace Center and we discussed the Butrans savings cards and stocking of Butrans.Mike said he thought this was a great option for patients on low doses of Vicodin or Percocet and saw a benefit to the Butrans transdermal system,dosed once every 7 days,as Mike said thats more convenient than dosing short-acting opioids q4-6h,the only challenge is the Medicare population they see at Grace Center,which is out-patient here,but he thinks if doctors prescribe Butrans and patients end up at Grace Hospital,they will want to have Butrans in stock.Mike asked if patients are on a 10mg Butrans and taking 2 supplemental doses of analgesia initially during titration,what happens if patients need more supplemental? Mike wanted to know if there was any data to support more than 2 doses of
PPLPMDL0020000001	Cleveland	OH	44113	1/7/2011	talked to dr about his Vicodin patients that he feels are ready to convert to a long-acting opioid and would benefit from convenience of q12h dosing of OxyContin.we talked about patients starting on OxyContin 10mg or 15mg q12h,showed convenience of q12h dosing flashcard and conversion guide and talked about Medicaid patients paying \$2.00 at pharmacy and Commercial plan patients paying lowest branded co-pay for
PPLPMDL0020000001	Cleveland	OH	44113	1/7/2011	OxyContin.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44111	1/7/2011	talked to dr about his Vicodin patients dosing q4-6h,that are ready to convert to a long-acting opioid and perhaps considering low doses of OxyContin,10mg or 15mg with convenience of q12h dosing,showed OxyContin q12h flashcard and conversion guide,dr said he would remember that,but usually doesnt start many patients on OxyContin,if so they are usually at a 20mg of OxyContin at that point.talked to dr about opioid naive patients starting on Ryzolt once daily dosing option or patients on short-acting tramadol dosing q4-6h that dr feels would benefit from convenience of q24h dosing of Ryzolt,discuss commercial plan coverage for Ryzolt using Ryzolt value card.recommended Senokot-S
PPLPMDL0020000001	Westlake	OH	44145	1/7/2011	Spoke with Zaid. We reviewed the Butrans FPI, indication, dosing, medication guide. He thinks it will be a good medication. He thinks Dr Nicols, Celeste, and Orra might be good to call on since they prescribe a lot of vicodin. John is in charge of ordering so i would need to ask him and he is on vacation for the next week. He will leave all of the info for John. Reminder about OxyContin as a Q12hr option. Asked to recommend Senokot S.
PPLPMDL0020000001	Westlake	OH	44145	1/7/2011	Dr said he had a patient try to get OxyContin and it was over \$600. I discussed the managed care for OxyContin and using the savings cards and that most patients can get OxyContin for about a \$25 copay. Dr said he has had some patients asking why OxyContin is different. He said that he is telling the patients that the tablet is equivalent, but that they will not feel a "rush" when they take it. I told Dr we have no data to support this or compare the original and reformulated tablets. We reviewed the updates to the OxyContin FPI. I reminded him about Ryzolt as a once a day option and asked him to recommend Senokot S for his patients on opioids. Reported as ROC-Dr informed me that a patient told him that abusers are not getting a "high" off of the reformulated tablet when they melt it down and inject it compared to the original formulation.
PPLPMDL0020000001	Cleveland	OH	44130	1/7/2011	Dr. Fedorko said that the problem with Ryzolt is that "no one wants to pay for it". I reviewed managed care coverage for his top plans (Aetna, Medco, Medicaid) with him & also re-reviewed the Ryzolt Value Cards, explaining how they are used & that they cannot be used for any Medicaid or Medicare plan. He said that the pharmacies call him and want him to do a prior authorization but he doesn't have time to do it. He said he thinks they do this even if it is covered so that they have an excuse to give the patient a generic tramadol instead. Asked him to keep trying with Ryzolt & encouraged him to utilize the value cards. Discussed managed care also with Mindy who said that she doesn't seem to have too many problems with it. Reminded her of savings cards as well.
PPLPMDL0020000001	Westlake	OH	44145	1/7/2011	Spoke with Jen, we reviewed the Butrans FPI, indication, dosing, and medication guide. She thinks it will be a good option for patients who were on darvocet instead of them starting on vicodin. She will talk to Jamie to see if they can stock it. Reminder about OxyContin and Ryzolt as an option. She said that even tramadol medications seem to be abused now and I reviewed the abuse warning for Ryzolt.
PPLPMDL0020000001	Parma	OH	44134	1/7/2011	Spoke with pharmacist Lily who said that all the pharmacists there can place orders for medications. I introduced Butrans, reviewing indication, pt types, dosing/strengths, abuse. I asked Lily to check her system to ensure it was loaded & all three strengths were. I asked her to place an order for one box of each strength. Lily said that with CII & CIII products, all pharmacists and the pharmacy manager have to review the product to decide if they will stock it. I let her know that physicians will want to know where their patients will be able to attain Butrans immediately and that pain patients will not be willing to wait if it is not stocked. She said that she would make sure that they reviewed Butrans quickly so that they could order.
PPLPMDL0020000001	Parma	OH	44134	1/7/2011	Introduced myself & Butrans to Nancy, pharmacist. Discussed indication, pt types, transdermal system application, abuse/addiction potential. She asked what to do if the patch comes off or loose and I showed her FPI 2.1 & she also asked if it was OK to shower with it on. I showed her 5.11 regarding avoiding application of heat. Discussed proper disposal as well. Asked Nancy's thoughts & she said it sounded like a great system. I asked her to place an order for all three strengths. She said that although she does place orders, because it is a CIII, they have to consult with the pharmacy manager Allene first. Nancy said if it was up to her, she would definitely place the order now & I asked her to please relay that to Allene. Nancy said she would & that I should stop back Monday to speak with Allene to make sure she ordered.
PPLPMDL0020000001	Parma	OH	44129	1/7/2011	Presented to Dr. Gigliotti the updated Partners Against Pain for HCP's leaver and described various resources that would be available for him in effort to help him & his office feel more comfortable with treating pain. He said he really appreciated the information and promised to go online to look at the various tools. Dr. Gigliotti said he is "always scared" to treat pain and that this may help him. Discussed importance of proper patient selection.
PPLPMDL0020000001	Cleveland	OH	44109	1/7/2011	talked to dr about his patients taking short-acting opioids,like Vicodin or Percocet,where he feels they are ready to convert to a long-acting opioid and asked dr to consider starting them on OxyContin 10mg or 15mg,with convenience of q12h dosing and showed flashcard with this information.dr said he does prescribe a lot of OxyContin but forgets about 15mg and 30mg so i showed dr OxyContin conversion guide and asked if he would remember next time to start patients on OxyContin,dr said he would,discussed commercial plan coverage and Medicaid patients getting OxyContin.
PPLPMDL0020000001	Cleveland	OH	44106	1/7/2011	i talked to dr about his patients taking Vicodin or Percocet,q4-6h,that he feels are ready to convert to a long-acting opioid,and asked him to consider OxyContin 10mg or 15mg,with convenience of q12h dosing,showed flashcard with this information and dr said he does prescribe all 7dosage strengths of OxyContin for severe pain,but does forget about the 15mg dosage strength but will remember that next time.we talked about Medicaid patients getting OxyContin for lowest branded co-pay and commercial plan patients getting OxyContin for lowest branded co-pay.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	1/7/2011	i talked to dr about her patients taking Vicodin or Percocet,q4-6h,that she feels are ready to convert to a long-acting opioid and asked her to consider low dosage strengths,10mg or 15mg q12h OxyContin.dr said she has some patients,usually her elderly patients as she really trusts them with OxyContin,taking OxyContin now.i asked her to consider patients younger than 65yrs old,that meet OxyContin indication,to start on OxyContin 10mg or 15mg q12h instead of refilling short-acting opioids and dr said she'll consider that option.discussed Medicaid and commercial plan coverage for OxyContin.
PPLPMDL0020000001	Cleveland	OH	44106	1/7/2011	i talked to dr about his patients on Vicodin,dosing q4-6h,that he feels are ready to convert to a single-entity opioid and asked dr to consider OxyContin 20mg,30mg or 40mg,with convenience of q12h dosing of OxyContin and showed flashcard with this information,dr said he doesnt prescribe much OxyContin and if so,the 10mg and 15mg dosage strengths are what he prescribes,so i told dr that is great he is starting patients on lower dosage strengths,but asked if he has any patients who have been on Vicodin for years,still arent controlled and perhaps the dosing around the clock isnt convenient for them? dr said yes and i said well those are some patients who may benefit from OxyContin 20mg,30mg or 40mg q12h and Medicaid patients only pay \$2.00 at pharmacy for OxyContin.recommended Senokot-S<font color=blue>-cb>CHUDAKOB's query on 01/14/2011</b></font>-Amy,can you clarify what strengths of Vicodin you were talking about to convert to the 20,30,40mg strengths of OxyContin?<font color=green>-cb>BROOKAM's response on 01/21/2011</b></font>-we didnt state specific strengths why? he writes short-acting and does convert to OxyContin,but we didnt say Vicodin 5mg, etc...thanks!<font color=blue>-cb>CHUDAKOB's query on 01/24/2011</b></font>-Because if he is converting from a 5mg q6h to OxyContin, none of the strengths you suggested he converts to would be appropriate. Getting specific is very important when discussing conversions.<font color=green>-cb>BROOKAM's response on 01/26/2011</b></font>-ok thanks Barry<font color=blue>-cb>CHUDAKOB added notes on 01/26/2011</b></font>-Thank you!
PPLPMDL0020000001	Cleveland	OH	44109	1/7/2011	talked to dr about his patients taking Percocet,q4-6h,that are ready to convert to a long-acting opioid and considering OxyContin,10mg or 15mg,with convenience of q12h dosing and showed flashcard with this information,showed OxyContin conversion guide and discussed commercial plan coverage and Medicaid coverage for OxyContin,dr said he really doesnt write a lot of OxyContin,more for severe pain patients,so i asked if dr could consider 10mg or 15mg,for those moderate pain patients too,showing OxyContin indication in fpi,and dr said he'll consider that option.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	1/7/2011	i had an impromptu lunch with dr and staff,discussed OxyContin as an option for those patients on Vicodin,q4-6h,that have been on short-acting hydrocodone combo for years and still not controlled and asked dr to consider low dose of OxyContin,10mg or 15mg with convenience of q12h dosing,showed flashcard with this information and asked dr to consider this option earlier in therapy instead of waiting for a long time before ever considering a long-acting opioid,dr said he would consider 10mg or 15mg OxyContin but doesnt prescribe more than 40mg OxyContin.i talked to dr about his Medicaid patients paying \$2.00 at pharmacy for OxyContin and commercial plan patients paying lowest branded co-pay for OxyContin.recommended Senokot-S

PPLPMDL0020000001	Cleveland	OH	44113	1/7/2011	i talked to dr about his patients on short-acting opioids,dosing q4-6h,and when dr decides patients need to convert to a long-acting opioid,dr said he does NOT write long-acting opioids as he wont prescribe CII opioids,doesnt want the hassle of patients having to pick scripts up every month and doesnt like CII medications period.dr said he will prescribe a lot of tramadol,short-acting as patients like to have a medication they can take around the clock for pain.dr said he likes RyzoIt as a once daily dose of tramadol and RyzoIt value card is easy to use,but he has so many patients on ultram and have been on the medication for years that he is only converting a few patients to RyzoIt,if patients complain about dosing regimen of ultram and dr feels RyzoIt potentially could be easier for patients to dose once daily instead of q4-6h.i asked dr to talk to patients,during initial visit,about starting on ultram,but in follow-up converting them to long-acting,such as RyzoIt,dr said he will
PPLPMDL0020000001	Westlake	OH	44145	1/7/2011	Quick call, I reminded Dr of his commitment to go to OxyContin first if methadone does not work for a patient. He said he has done this has a couple of patients on OxyContin. Reminder to recommend Senokot S.
PPLPMDL0020000001	Westlake	OH	44145	1/7/2011	Dr expressed frustration with treating pain patients. I asked how does she determine who is appropriate, she said they use all of the tools that they can such as Oarrs and they just started doing urine drug screen where they can test for therapeutic levels. We discussed the tools in the partners against pain resource. We discussed the convenience of Q12hr dosing for OxyContin instead of short acting around the clock. Remind around RyzoIt as an once a day option and asked to recommend Senokot S with opioids.
PPLPMDL0020000001	Cleveland	OH	44111	1/7/2011	Spoke with Dave, floater. He had questions about the reformulation of OxyContin and we reviewed the field card and the changes in the FPI. We reviewed the Butrans FPI, indication, dosing, mode of action, medication guide. He said to talk to Wael to get it stocked. He said he is part of the West Coast pharmacy association and wanted to have a LELE program at one of their meetings, he will have someone contact me.
PPLPMDL0020000001	Parma	OH	44129	1/7/2011	Dr. Roheny said that he just saw a 19 year old male pt who told him he was addicted to OxyContin & he was buying it "on the streets" for \$60 per 80mg tablet. I stressed that OxyContin is not for everyone & that like all opioids, it carries abuse & addiction potential. Asked Dr Roheny what he typically has his pts on before he would consider switching them to OxyContin & he said he usually doesn't do that. He said most of his pain pts are on ATC Vicoden. He said he may consider converting a Percocet pt to OxyContin but hasn't considered switching a Vicoden pt. Presented conversion guide & showed him pg 7 & asked if the conv ratio for hydrocodone:oxycodone surprised him. He said that it did& then said "This is great information. It really makes me think. I've never thought about this before. I'm impressed. You have impressed me." I then showed pg 8. He said he would read more of the guide later & that he was very interested.Recommended Senokot-S for opioid-induced constipation.
PPLPMDL0020000001	Cleveland	OH	44106	1/7/2011	talked to dr about his Percocet patients dosing around the clock and perhaps dr thinks its time to convert them to a long-acting opioid,so i asked dr to consider OxyContin 10mg or 15mg,with convenience of q12h dosing and showed flashcard with this information and OxyContin conversion guide.dr said he will remember these dosage strengths.I asked about doctors patients on short-acting tramadol and perhaps considering to convert them to RyzoIt once daily dosing option and using RyzoIt value card for them,dr said he started one patient on RyzoIt but that's it as he forgot about it so he needs reminders. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	1/7/2011	talked to dr about her patients on Vicodin or Percocet,that she feels are ready to convert to a long-acting opioid and could benefit from convenience of q12h dosing of OxyContin,showed flashcard with this information and OxyContin conversion guide to consider the 10mg and 15mg OxyContin dosage strengths and not waiting so long to convert them,dr agreed and said she has some patients on OxyContin but usually her elderly patients because she trusts them.i asked if dr can think of patients on short-acting tramadol,dosing q4-6h,that perhaps could benefit from once daily dosing of RyzoIt and discussed RyzoIt Value card program for commercial plan patients. dr said she has recently started a patient on RyzoIt so we'll see how patient tolerates RyzoIt.recommended Senokot-S
PPLPMDL0020000001	Westlake	OH	44145	1/7/2011	Quick call, Dr said again that his residents and students enjoyed the LELE program and would like to bring it back. I reminded him about OxyContin as a convenient Q12hr option. He said that he does have a few patients on OxyContin and he has written more often than he used to.
PPLPMDL0020000001	Parma	OH	44134	1/10/2011	Spoke with Nate & introduced Butrans. Reviewed indication, appropriate patients, dosing/conversion/titration, application, managed care/savings. Asked if he would place an order for one box of each strength. He asked me who in the area I was targeting upon launch. I went over appropriate patient type, let him know that I will be calling on & speaking with multiple specialties, and asked him if there was anyone in particular that I should be targeting. He did not have any specific recommendations. He said he would place the order for one box of each strength through Cardinal.
PPLPMDL0020000001	Parma	OH	44134	1/10/2011	Spoke with Allene & reviewed Butrans indication, dosing/strengths, conversion/titration, appropriate patients. Asked if she would stock one box of each strength. She said she would order one box each of 5mcg & 10mcg and would wait to see more prescriptions before ordering the 20mcg.
PPLPMDL0020000001	Parma	OH	44129	1/10/2011	Introduced myself & Butrans to Linda, pharmacy manager, who had already read about Butrans. Reviewed indication, appropriate patient types, dosing/conversion/titration, abuse/addiction liability. Asked if she would place an order & she said that the 5mcg & 10mcg are being shipped to her in an auto shipment. Reviewed managed care/savings program as well. Asked who in the area I should call on upon launch & she said that she is new to the area. Let Linda know that I would be following up with her to check back on Butrans stocking and to see if she had any questions.
PPLPMDL0020000001	Parma	OH	44129	1/10/2011	Discussed Partners Against Pain & FACETS resource with Dr. Ortega & Cindy as a follow-up to my lunch conversation with them. Dr. Ortega was very happy with the resources & said that it was exactly the kind of information that he wanted for me to bring. Also discussed with Cindy the various resources on Partners Against Pain USB and let her know that I would be following up with her again to see what forms they decided to implement in their practice. Made sure they were stocked on OxyContin savings cards.
PPLPMDL0020000001	Parma	OH	44134	1/10/2011	Discussed RyzoIt 2-3-1 message with Dr. George who said that he had not heard of RyzoIt. Asked him if he uses a lot of tramadol in his practice & he said that he does, especially now that Darvocet is not available. He said that he liked that it is not scheduled & it seems to work. Discussed dosing and the option of giving his patients RyzoIt, with q24h dosing. Also discussed managed care coverage & RyzoIt Value Cards. He said that it sounded like there is a place for RyzoIt in his practice, so i let him know I would be back to follow up with him to get his feedback. Dr. George said that he does not like to use OxyContin in his practice- I asked why & he said that it is due to abuse concerns. Asked if this is a concern only with OxyContin or with all opioids & he said all. Discussed importance of patient selection. He said he does have a few pts on it, who have severe chronic pain.
PPLPMDL0020000001	Beachwood	OH	44122	1/11/2011	Spoke with Shelly (pharmacy manager) & introduced Butrans. Reviewed indication, dosing/strengths, conversion/titration, appropriate patient types & importance of stocking now. She said that she would wait for a prescription before ordering. I let her know that physicians will want to know where their patients can get it right away. Also reviewed managed care and RelayHealth e-voucher (Rite Aid does participate). Asked her if she would consider stocking one box each of the 5mcg & 10mcg boxes since they will be the two starting doses. She agreed to order one of the 5mcg & one of the 10mcg.
PPLPMDL0020000001	Shaker Heights	OH	44122	1/11/2011	Introduced myself & Butrans to Nahla, pharmacy manager. Reviewed indication, dosing/strengths, appropriate patient types, and importance of stocking now. She said that she would not stock it until she sees a prescription. I let her know that physicians would want to know where their patients can get Butrans same-day and that pain patients likely will not wait for her to order it, but will go to a pharmacy that is stocking it. Also reviewed RelayHealth e-voucher. She said she has ordered too many products early & they just sit on her shelf. I asked if she would order just one box of the 5mcg strengths but she said she would not.
PPLPMDL0020000001	Beachwood	OH	44122	1/11/2011	Spoke with Ashley and introduced Butrans. Reviewed indication, appropriate patient type, conversion/titration, dosing/strengths, boxed warning. I asked her thoughts & she said that she hasn't seen any prescriptions for any buprenorphine product, so she probably wouldn't stock Butrans. I re-reviewed the Butrans indication as well as appropriate patient types. She said that she does think there may be a place for it. I asked if she would place an order for one box of each strength, but she said that she cannot do this until she sees a prescription. I asked her if she would be willing to order just the 5mcg or 10mcg since they are the starting doses, but she said that she will order only when physicians start writing it.
PPLPMDL0020000001	Independence	OH	44131	1/11/2011	Spoke with Jim & introduced Butrans. Reviewed indication, appropriate patients, dosing/strengths, transdermal system, CIII. Jim said that they don't fill a lot of pain management prescriptions in general in this area but recommended that I speak with Drs. Rutkowski. I let him know that I have an appointment with them early in the launch. I asked him if he would place an order for one box of each strength so that when I speak with Drs. Rutkowski, I can let them know that this will be one of the pharmacies carrying Butrans immediately. He said that he would place the order. I asked if there was anyone else in the area who I should target. He said that the Rutkowski office is the one they see pain medication prescriptions from most often. Discussed savings and managed care & reminded him to place the order for one box of each strength as committed before I left.
PPLPMDL0020000001	Cleveland	OH	44195	1/11/2011	I asked Kathy to recommend OxyContin to Dr.Mekhal when a long-acting opioid is appropriate,with convenience of q12h dosing and she said she would recommend OxyContin for the appropriate patients.talked to Kathy briefly about patients she is treating that are on tramadol,dosing around the clock and perhaps considering RyzoIt as an option once daily.Kathy said a lot of patients are not compliant with q4-6h dosing and she thinks once daily dosing of RyzoIt is easier for them,so i asked Kathy to consider RyzoIt for commercial plan patients. recommended Senokot-S<font color=blue><b>CHUDAKOB's query on 01/22/2011</b></font>Amy, This is only a reminder that we can no longer discuss convenience as a benefit when discussing our products. This was brought up at the National Sales Meeting. At the time of this call note, it was OK, but this is a reminder to not discuss convenience in the future.<font color=green><b>BROOKAM's response on 01/24/2011</b></font>yea thank you, are we getting a "formal" letter sent to us via a bulletin and destroy all of the q12h convenience dosing flashcards too?<font color=blue><b>CHUDAKOB added notes on 01/25/2011</b></font>Thanks!
PPLPMDL0020000001	Euclid	OH	44123	1/11/2011	Spoke to Sarah about the launch of Butrans - indication, dosing, patient type, application and disposal. Explained the importance of stocking and also explained the voucher program. She said they usually dont stock until they get a script. Melinda is the PIC responsible for ordering.
PPLPMDL0020000001	Cleveland	OH	44135	1/11/2011	Spoke with Ken, we reviewed the Butrans FPI, indication, medication guide. He thinks that it will be a good option instead of hydrocodone around the clock and he agreed to stock. Reminder about OxyContin as an option instead of short acting around the clock and that we will still be discussing RyzoIt and Senokot S with prescribers.
PPLPMDL0020000001	Euclid	OH	44119	1/11/2011	Spoke to Lauren about the launch of Butrans - indication, dosing, patient type, application and disposal. She asked which HCP will we be targeting. I explained both IM and pain mgmt. She thought pain mgmt would be more likely to prescribe and she mentioned Dr. morley and Dr. Saeed. Discussed the voucher program. They do not participate in the relay health program. Asked for commitment to stock at least one strength. No commitment.
PPLPMDL0020000001	Euclid	OH	44132	1/11/2011	Spoke to Tim and Holly about the launch of Butrans. They said they received a packette of info. Discussed the indication, dosing, patient type, application and disposal. Discussed commercial coverage and voucher program. No relay health. Mostly govt funded patients. She asked about most common strenght. Explain the 5 and 10mcg. She suggested that dr levin and Bernie might be good target. No commitment to stock because no room and they have a lot of govt patients.
PPLPMDL0020000001	Richmond Heights	OH	44143	1/11/2011	Window call....reminded doc of the oxycontin indication/patient type. Explained the coverage with AARP Med D plans and that those patients can get the product for the lowest branded co pay.
PPLPMDL0020000001	Euclid	OH	44119	1/11/2011	Discussed the ryzoIt indication and the coverage with medical mutual. Asked doc if he was still giving value cards to patients. He said he was. Reminded him that cards are for new patients and that existing patients should retain cards for monthly use.
PPLPMDL0020000001	Cleveland	OH	44135	1/11/2011	Spoke with Jagreet, floater. We reviewed Butrans FPI. He looked to see if it was in their computer yet to order and she said it is not. She said that it would be Lisa's decision to order and a corporate decision as well based on what moves well in the particular pharmacies.
PPLPMDL0020000001	Euclid	OH	44123	1/11/2011	Spoke to Jeffery about the launch of Butrans. The indication, dosing, patient type, application and disposal. Explained the voucher program and the relay health. Asked him for a commitment to stock. He said he would wait for a script before he stocks 3 boxes of something. I asked him for just one box. He said he would see.
PPLPMDL0020000001	Lakewood	OH	44107	1/11/2011	Quick call, I asked Dr when does he feel OxyContin is appropriate. He said he generally just maintains patients who already come to him on it. No further info gained.
PPLPMDL0020000001	Euclid	OH	44119	1/11/2011	Spoke to David about the launch of Butrans - indication, dosing, patient type, application and disposal, voucher program. He liked the idea of the disposal pouches. He committed to ordering 1 box of all three.
PPLPMDL0020000001	Cleveland	OH	44130	1/11/2011	Dr. Warren said he typically prescribes 20, 30, or 40mg q12h of OxyContin. He said he sometimes will dose it q8h. I showed FPI section 2.6 and asked him if he has considered increasing the total daily dose rather than increasing the dosing interval. Presented conversion/titration guide showing the seven total tablet strengths and asked if he was aware of the 15mg & 60mg intermediate strengths. He said he was not aware of the 15mg dose. He said that maybe he would consider increasing a patient's total daily dose and titrate to the next higher dose instead of trying a q8h schedule. He said he does not use much tramadol in his practice, other than very occasionally for breakthrough pain. Recommended Senokot-S for opioid-induced constipation.
PPLPMDL0020000001	Middleburg Heights	OH	44130	1/11/2011	Dr. Saboori asked for more conversion/titration guides for himself & Jill. He described radiation oncology to me and I asked what strengths OxyContin he finds himself prescribing most often. He said that he usually uses 20mg. Discussed seven tablet strengths and conversion & titration. He said that he and Jill find the guides very useful in helping them treat patients and that they also appreciate Senokot-S samples. Dr. Saboori said that he really likes OxyContin as a long-acting option.

PPLPMDL0020000001	Cleveland	OH	44130	1/11/2011	Asked Dr. Vollweiler what strengths OxyContin she utilizes most frequently & she said that she typically would use a 20mg, 30mg, or 40mg. Discussed the seven available strengths. Presented conversion/titration guide which she said she would be able to use. She said that patients are typically taking Vicoden ATC or Percocet ATC before she initiates treatment on the appropriate dose of OxyContin. She said that they do utilize the savings cards. Recommended Senokot-S for opioid-induced constipation.
PPLPMDL0020000001	Cleveland	OH	44111	1/11/2011	Spoke with Mike Hoying, pharmacy director. Found out he is also the director for Lutheran. We reviewed Butrans FPI, indication, dosing and medication guide. He said he feels that Dr's might go to a patch like this sooner than duragesic, and he thinks that Drs might feel more comfortable with the dosing and molecule vs duragesic. He said there is an issue of patients coming into the hospital with a patch on and the nurses do not know and they will place a second patch or give more pain medication. He said it is more of a national problem than at Fairview but it is something to warn against in hospitals. He said that if the pain management Dr's are behind it, it should not be difficult to get on the Cleveland Clinic formulary and if that is the case they would try to stock. He said space is an issue in the pixis machines, but we can worry about it as Butrans becomes more widely used.
PPLPMDL0020000001	Cleveland	OH	44195	1/11/2011	i talked to dr about his patients taking Vicodin or Percocet,around the clock,and perhaps the q4-6h dosing regimen wasnt convenient for patients and dr thought OxyContin's q12h dosing was more convenient.dr said for some patients who dont like to get up in middle of night to take medication,especially as they are in chronic pain,OxyContin q12h dosing is more convenient in that aspect.i asked dr to consider OxyContin 10mg or 15mg q12h and showed OxyContin conversion guide.
PPLPMDL0020000001	Cleveland	OH	44195	1/11/2011	worked pain management dept-attended lecture-saw 4 attending physicians,4 fellows-left OxyContin fpi,conversion guides and slim jims with all fellows and brief discussions with each asking them to consider OxyContin 10mg and 15mg q12h; dr covington-chairman of chronic back&spine health and director of rehab program wants to set-up meeting with chronic pain and anesth/pain doctors to discuss new product end of January
PPLPMDL0020000001	Cleveland	OH	44195	1/11/2011	i talked to dr about his patients that are on morphine or Percocet,where he feels OxyContin is appropriate,dr said he has a handful of patients on OxyContin for chronic pain and they are doing well.dr said he doesnt like to start a lot of new patients on OxyContin unless pain is really severe and he has to go to OxyContin.dr gave a lecture on "Chronic opioids in Chronic Non-Malignant Pain"today in Pain Management.i asked dr to consider OxyContin 10mg or 15mg,with convenience of q12h dosing and showed flashcard with this information and OxyContin conversion guide and dr said he will remember this option
PPLPMDL0020000001	Cleveland	OH	44195	1/11/2011	i asked Anne to recommend OxyContin as a long-acting opioid option,for Dr.Stanton-Hicks patients she is treating,when a long-acting opioid is appropriate,with convenience of q12 dosing and gave OxyContin conversion guide and Anne said she would recommend OxyContin for severe pain patients. talked to Anne,NP,about patients on short-acting tramadol that could benefit from Ryzolet and Anne said patients seem to like once daily dosing of Ryzolet instead of dosing around the clock with Ultram.Anne said they have started patients on Ryzolet recently because of Darvocet being pulled from the market,so i asked Anne to consider Ryzolet for commercial plan patients and recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44195	1/11/2011	first time meeting doctor, he is in physical medicine&rehab and attended pain management lecture by Dr.Covington this am,so i introduced myself and asked where OxyContin plays a role in his practice? Dr said he writes OxyContin for severe pain patients,but does think there is a place for the medication.i gave dr OxyContin fpi,showed indication and asked about moderate pain patients and what he would treat them with? dr said usually tramadol or Vicodin,but definitely short-acting opioids.i asked dr to consider patients on short-acting opioids, where he deems appropriate to convert to a long-acting opioid,to consider OxyContin 10mg or 15mg with convenience of q12h dosing,showed flashcard with this information and OxyContin conversion guide.dr said he would consider that option
PPLPMDL0020000001	Cleveland	OH	44195	1/11/2011	talked to dr about his patients taking Vicodin or Percocet q4-6h and perhaps considering a long-acting opioid, OxyContin being an option with q12h dosing and showed convenience of q12h dosing flashcard and OxyContin conversion guide,instead of refilling short-acting opioid scripts.dr said he would consider that and i asked him to consider OxyContin 10mg or 15mg q12h and use the 7 tablet strengths to allow for flexibility in dosing.
PPLPMDL0020000001	Broadview Heights	OH	44147	1/12/2011	Spoke with Gail & introduced Butrans. Asked if they had received their auto shipment, but she said that they had not that she is aware of. Reviewed Butrans information with her including indication, usage, dosing/conversion, boxed warning, CIII, and appropriate patients. She asked about managed care so i discussed tier 3 with her and let her know about the savings program.
PPLPMDL0020000001	Broadview Heights	OH	44147	1/12/2011	Spoke with Gail & introduced Butrans. Asked if they had received their auto shipment, but she said that they had not that she is aware of. Reviewed Butrans information with her including indication, usage, dosing/conversion, boxed warning, CIII, and appropriate patients. She asked about managed care so i discussed tier 3 with her and let her know about the savings program.
PPLPMDL0020000001	Bedford	OH	44146	1/12/2011	Introduced myself & Butrans to Ebony. Reviewed indication, appropriate patients, dosing, conversion. She asked who i would be calling on in the area & i asked her who she would recommend. She said Dr. Shin & his group at Southpoint. I let her know that a variety of specialties would be targeted due to the indication including moderate pain. Asked her if she would place an order to get it stocked now but she said she would wait for a prescription. She asked about managed care, so we discussed tier 3 status and the RelayHealth e-voucher, which she said they participate in. Asked if she would order a box of 5mcg & 10mcg strength since they are the two starting doses but she still said no.
PPLPMDL0020000001	Independence	OH	44131	1/12/2011	Introduced myself & Butrans to Allison (?). Reviewed indication, dosage, conversion/titration, transdermal patch system, addiction potential, CIII, and appropriate patients. I asked her if she would place an order so that I can let my physicians know that they are a location that has it in stock. She said that she would have to check with the head pharmacist. She asked about managed care coverage, so I reviewed that with her as well as the RelayHealth e-voucher. She & her tech said that sometimes they have a problem with those, so I let them know that if they would prefer, I can bring the savings cards to them or direct them to where they can print them off. The head pharmacist then came over, looked at the FPI that i had given Allison & adamantly told me that she will absolutely not order a controlled substance without a prescription.
PPLPMDL0020000001	Hudson	OH	44236	1/12/2011	Spoke with Bob & introduced Butrans. Reviewed indication, dosing, titration/conversion, appropriate patients. He asked if an opiate naive patient could use Butrans and i showed him FPI 2.2. I asked if he would place an order now for one box of each strength so that it is in stock already when physicians start writing prescriptions. He said he would be willing to order one box each of 5mcg & 10mcg since they will be the initial doses. Asked who in the area would be interested in hearing more about Butrans when we launch & he suggested the UH group across the street. Let him know i would be back to follow up.
PPLPMDL0020000001	BEDFORD	OH	44146	1/12/2011	Spoke with Marcus and introduced Butrans. Reviewed indication, dosing, conversion/titration, appropriate patients, transdermal system, CIII, abuse potential. He asked about heat application & I reviewed FPI 5.11. He also asked what to do in the event of an adhesion issue & i reviewed FPI 2.1. I asked him if he would place an order for one box of each and he agreed to do so.
PPLPMDL0020000001	Hudson	OH	44236	1/12/2011	Spoke with Beth & introduced Butrans. Reviewed indication, appropriate patients, starting dosing (Table 1), transdermal system, application, disposal, addiction potential/CIII. She said that Dr. McCallum (UH office) maintains a lot of patients on Vicoden & may be interested in hearing more about Butrans. She looked up pricing- reviewed managed care & savings opportunities. I asked if she would order one box of each strength. She said she would wait for a prescription. I let her know that physicians would want to know where their patients could get it immediately, but she said that she will not order until she sees a prescription. Asked if she would consider ordering just one box of 5mcg or 10mcg since they are the starting doses, but she said no.
PPLPMDL0020000001	Stow	OH	44224	1/12/2011	Spoke with Holly and reviewed FPI, indication, boxed warning and appropriate patients. She said she will wait until they see a script to order.
PPLPMDL0020000001	Westlake	OH	44145	1/12/2011	Spoke with Kyle, we reviewed Butrans FPI, indication dosing and medication guide. She said he had seen some information about it. She will not order until a script comes in or if a Dr's office called to ask them to order it for a patient.
PPLPMDL0020000001	Stow	OH	44224	1/12/2011	Quick call, said she didnt have time. Reminded her of managed care coverage with Oxycontin and lowest brand copy on mostly plans. asked if she has written Ryzolet yet and she said no, she doesnt write long acting Tramadol, doesnt see a place
PPLPMDL0020000001	Bedford	OH	44146	1/12/2011	Quick call with Dr. Moufawad. He asked me for OxyContin savings cards which i supplied him with. He said he has a few patients who he wanted to give them to. He signed for new Ryzolet cards & i reviewed them with Amber his MA.
PPLPMDL0020000001	Westlake	OH	44145	1/12/2011	Spoke with Mollie, she will pass the Butrans info along to the Ziad and the other pharmacists. They will be having another health fair in the fall and she will email me with info on having a display.
PPLPMDL0020000001	Cleveland	OH	44115	1/12/2011	I spoke with Jodie,Clinical Manager,Pharm D,about Butrans FPI,black box warning,dosage strengths available,medication guide and instructions for use.Jodie said she see's more acute pain,not chronic pain,in hospital so not sure where Butrans will play a role here. Jodie said maybe if patients come to hospital already on Butrans,she could see a reason for stocking Butrans as patients would need it,if doctor wanted patients to continue her therapy but thinks it would be tough to maintain as patients are on Butrans for 1wk at a time.Jodie asked if patients who are thin, can they be started on Butrans? i told Jodie there wasnt any information in the Butrans FPI,but i had Jodie fill out Medical Education Request form.i did show Jodie the FPI section 11,noting that skin is the only barrier to diffusion from the system.i talked to Ratchana,Pharmacist,about Butrans FPI and a Pharmacy student.
PPLPMDL0020000001	Cleveland	OH	44115	1/12/2011	i talked to Vince,Pharmacy Technician,about Butrans FPI,dosage strengths and stocking and Vince said George Kollias,Pharmacy Manager would order Butrans if he felt there was a place for Butrans.Vince said they have 70%medicare part D and 30% commercial and they dont have evouchers so they would need savings cards for Butrans.Vince they see a lot of Percocet and mostly from the Orthopedic doctors.
PPLPMDL0020000001	Cleveland	OH	44106	1/12/2011	Jack Losher,Assist Director of Pharmacy,referred me to Cynthia Brehun,Pain Medicine&Spine Care Coordinator,to discuss Butrans FPI,black box warning,dosage strengths,medication guide and instructions for use.Pain Management has 75% of patients on non-opioid analgesics.unless patients have been through extensive conservative treatment,then they'll consider opioids.OxyContin and methadone are prescribed for a few patients,usually patients are on tramadol.Cynthia see's a place for Butrans in their patient population and will give the FPI to Dr.Ali Mchaourab,Director of Pain Management.
PPLPMDL0020000001	Stow	OH	44224	1/12/2011	Spoke To Dr while he was shoveling. Reminded Dr of patients where he would write Vicodin ATCa nd are chronic using 10 or 15mg of Oxycontin and patient getting the convenience of q12hr dosing. Reminded of Ryzolets coverage with commercial plans, he said he is not a big Tramadol fan..
PPLPMDL0020000001	Bedford	OH	44146	1/12/2011	Reminded Dr. Haddad of our last conversation about patients liking the "security" of short-acting pain medication because they feel they can control how often they take their medication. Reviewed FPI section 2.6. He said that he does occasionally have patients stay on immediate release oxycodone or a non-opioid analgesic for breakthrough. Reviewed Ryzolet and savings cards & he said he keeps forgetting about it. Recommended Senokot-S for opioid-induced constipation. Spoke with Hailey & followed up on her questions with Senokot-S. I gave her new samples of Senokot-S & Colace & she said that a lot of patients would be very happy.
PPLPMDL0020000001	Cleveland	OH	44106	1/12/2011	talked to dr in hallway at the V.A.Medical center and dr said he was at the barber getting a haircut and the barber and his friends said the new OxyContin doesnt work as well as the other.i told the doctor that there is no "new" OxyContin, just reformulated,but still oxycodone with all the attendant risks involved as before.
PPLPMDL0020000001	Westlake	OH	44145	1/12/2011	Reviewed Butrans information with Katy and gave her information to deliver to the pharmacists and Stephanie. She will pass along the info and contact me if they have further questions.
PPLPMDL0020000001	Stow	OH	44224	1/12/2011	Introduced self, he works along with Dr LABabidi and is always with him. I asked what his experience is with Oxycontin and he said he does not write and I asked why and he said it dose dumps and causes Euphoria. I asked if that is his experience or did he hear that and he said he had to go. I stated that in our FPI it shows the matrix delivery system delivering the medication throughout the 12hrs. He said he has not written Ryzolet but did not have any more time.
PPLPMDL0020000001	Independence	OH	44131	1/12/2011	Spoke with Stella (MA) and presented OxyContin savings cards. Walked her through how they are used and let her know they are for commercial insurance only- non Medicare or Medicaid. Also gave her Senokot-S & Colace samples which she said she had just run out of. Tried to speak with Kathy (OM) to schedule lunch or appointment but she was not in today. Stella said to try back next week
PPLPMDL0020000001	Maple Heights	OH	44137	1/13/2011	Spoke with Jim and introduced Butrans. Reviewed indication, appropriate patients, boxed warning, dosing/conversion, application sites, disposal. I asked him to order a box of each strength & he said that he can get it next day when he sees a prescription. I let him know that many pharmacies are already being auto-shipped and will have it on their shelves immediately when patients come in with a prescription and that physicians always want to know where their patients can get a new drug right away. He asked about managed care coverage. Covered tier 3 status and discussed savings program. Asked if he would order just the 5 or 10mcg strength since they are the two starting doses, but he still said he would wait.
PPLPMDL0020000001	Maple Heights	OH	44137	1/13/2011	Asked Dr. Dale where OxyContin currently fits into his practice. He said that he does prescribe it occasionally, but not very often. Discussed the importance of appropriate patient selection. He said that he usually refers patients to pain management if he feels they will need to be on medication for an extended period of time. Presented conversion/titration guide which he said he found interesting & he also said that he had forgotten about the seven tablet strengths. He agreed that the intermediate strengths allowed for flexibility of dosing and also that some patients who are on an around-the-clock regimen of short-acting opioid analgesics may find the q12h dosing of OxyContin to be convenient. Delivered Ryzolet 2-3-1 message. He asked about insurance coverage. Discussed value cards as a savings opportunity for patients who pay cash or who have commercial insurance coverage. Also recommended Senokot-S for opioid induced constipation.
PPLPMDL0020000001					

	Maple Heights	OH	44137	1/13/2011	Asked Dr. Shenigo where OxyContin currently fits into her practice & she said that she uses it very rarely. She said that she usually reserves it for very extreme pain cases such as pain due to cancer. She said that if she feels that someone needs something as "strong" as OxyContin, she would generally send them to pain management to be evaluated and treated. Discussed the importance of appropriate patient selection. Asked what patients are typically taking before she would consider switching them to an appropriate dose of OxyContin q12h & she said that Percocet is her "go-to". Presented conversion/titration guide & discussed the seven tablet strengths. Dr. Shenigo asked about Ryzoft. Delivered 2-3-1 message & discussed value cards. She said she does use some tramadol in her practice and is willing to try Ryzoft on the appropriate patient. Recommended Senokot-S for opioid- Discussed the oxycontin patient type and reminded doc of the preferred coverage with AARP Med D Plans. Those patients can get oxycontin at the lowest branded co pay. Gave more savings cards and explained the 03/31/11 expiration date.
PPLPMDL0020000001	Cleveland	OH	44124	1/13/2011	
PPLPMDL0020000001	Cleveland	OH	44195	1/13/2011	talked to Mort Goldman, Director of Pharmacotherapy Services and In-patient pharmacy and Mandy Leonard, Pharm D, about Butrans FPI, black box warning, dosage strengths available, medication guide, instructions for use and also if Butrans would play a role in the in-patient setting at the Cleveland Clinic. Mort and Mandy said "they don't think there's a place for Butrans, at least now, for Butrans as its cheaper to give a pill every day, if doctors prescribe in the out-patient setting that's fine, but unless a doctor (or more, no number in particular) fills out drug review form and Mandy and her team review the drug and prepare a monograph for Butrans and present to the Clinic's P&T committee, the drug would not be available in in-patient" I asked if they see a lot of Vicodin, Percocet patients that they feel could benefit from Butrans, in-patient, both of them said "no, there's a lot of acute pain in hospital and this isn't indicated for acute, only chronic" so not right now.
PPLPMDL0020000001	Cleveland	OH	44103	1/13/2011	I talked to Hakeem, Pharmacist and Abdul, Pharmacist, about Butrans FPI, black box warning, dosage strengths, medication guide and instructions for use and stocking of Butrans. Hakeem and Abdul said they will order the max amount of cartons and use the rebate order form I gave them but they asked if Medicaid is covering Butrans as that's 80% of their patient population. I told Hakeem and Abdul that Butrans will be a PA with some criteria that doctors have to look at before putting PA through for approval, so its not locked out, they were both happy to hear that and I asked how much commercial plan business do they have? both of them said about 20-30% commercial plans the rest is Medicare part d. they told me to talk to Dr. Nickels, Dr. Boyd, Dr. Robson, Dr. Katz and Dr. Marshall, Dr. Harris (different territory) and Dr. Vrooman and said they would think of others next time I come in
PPLPMDL0020000001	Richmond Heights	OH	44143	1/13/2011	Window call.... Discussed oxycontin patient type. Reminded him of the preferred coverage with medicare and AARP plans. Nothing learned. Waiting to hear back from Nurse, Nancy to schedule a lunch.
PPLPMDL0020000001	Cleveland	OH	44109	1/13/2011	talked to Samantha, Pharmacist, about Butrans FPI, black box warning, dosage strengths, medication guide, instructions for use and stocking. Samantha said she read about Butrans in the Pharmacy magazine so she knew it was coming and would order 1 carton of Butrans 5mgc/hour and 10mgc/hour. I told Samantha I would follow-up end of month/feb to tell her doctors names that have committed to prescribing.
PPLPMDL0020000001	Euclid	OH	44117	1/13/2011	Asked doc how much of his patient population has commercial insurance. He said not much. I reminded him of the savings cards and potential weekly use and the expiration date. He said patients don't complain about the cost. Let him know that we have them if he thinks of anyone. Also reminded him of the ryzoft patient and BWC coverage.
PPLPMDL0020000001	FAIRVIEW PARK	OH	44126	1/13/2011	Spoke with Tom, we reviewed the Butrans FPI, indication, dosing, medication guide. Tom agreed to order at the starting doses to start. He only keeps two bottles of OxyContin on shelf because it is too expensive to sit, but he can get meds for patients the same day. If they come in the morning he can have it by 3pm. He has not seen scripts for Ryzoft, reminder about Senokot S with opioids.
PPLPMDL0020000001	Cleveland	OH	44109	1/13/2011	I talked to Debbie, Pharmacist, about Butrans FPI, Ron, Pharmacy Manager was out for the day but Debbie said she orders narcotics as well so I talked to her about Butrans black box warning, dosage strengths, medication guide, REMS program, instructions for use and stocking. Debbie said she'll order the 5 and 10mgc/hour Butrans but 80% is Medicaid and about 15-20% is Commercial, just a little Med part d here. Debbie asked if I could follow-up with Ron to discuss Butrans with him too
PPLPMDL0020000001	Cleveland	OH	44102	1/13/2011	I talked to Ed Carter, Director of Pharmacy, about Butrans FPI, black box warning, dosage strengths available, medication guide, REMS program, instructions for use, formulary coverage and stocking. I asked Ed if he really saw a place for Butrans in nursing home, as he told me on the phone he did and Ed said yes, he sees Butrans as an option for those patients on low dose Vicodin or Percocet or patients that can't swallow pills. Ed asked about insurance and said they do have commercial plan patients so we talked about Butrans savings cards that will be available for patients, but Medicare Part D isn't covering Butrans, discussed Medicaid coverage as a PA for Butrans. Gave Ed Butrans Rebate order form and he said he'll order 2boxes of each strength. I asked Ed who are some doctors that you see a lot of their patients? Ed said Dr. Talbot, Dr. Celeste, Dr. Carson, almost all of the doctors at Metro/Brooklyn Geriatric dept send patients to him so I told Ed I have lunch with them 1/11/11
PPLPMDL0020000001	Rocky River	OH	44116	1/13/2011	Spoke with Sheri, we reviewed Butrans FPI, indication, dosing and medication guide. I asked her ideas and he does not know if Drs will prescribe it or not. She will not order unless they get a script.
PPLPMDL0020000001	Garfield Hts	OH	44125	1/13/2011	Spoke with Allene, PharmD and introduced Butrans. Reviewed indication, usage, dosing/conversion/titration, adhesion, disposal, addiction/abuse potential, CII. Asked Allene to order a box of each but she said that it would take approval from their Pharmacy Manager who would not be in until next week. I let her know that other local pharmacies were auto-shipped and have it in stock & recommended they order at least one box of 5mgc & 10mgc so they have it as well.
PPLPMDL0020000001	Garfield Heights	OH	44125	1/13/2011	Spoke at length with Denise regarding the practice of Drs. Solomon, Samuel, & Ningengowda. She said that in general, they try to stay away from prescribing pain medications and reserve OxyContin for severe, chronic pain such as cancer. She said they do procedures whenever possible. Discussed conversion/titration guide and the process of switching a patient from around-the-clock short-acting opioids to an appropriate q12h dose of OxyContin. We also discussed 2-3-1 Ryzoft message and savings cards for OxyContin & Ryzoft. I also recommended Senokot-S for opioid-induced constipation. They do not take any samples, including OTC. <font color=blue>-<b>CHUDAKOB's query on 01/22/2011</b>-</font>Ashleigh. What you have written for your next call objective is something that should have been put in your calendar. Your next call objective is more to help you advance the sales call. <font color=green>-<b>APSEGAS's response on 01/24/2011</b>-</font>That makes sense. I apologize- my next call objective will be: Dr. Samuel, what is your trigger in switching a patient from a short-acting around-the-clock opioid medication to a long-acting medication like OxyContin q12h? When would you prescribe a long-acting opioid? (Also introduce Butrans and find out where Dr. Samuel thinks this will fit into his practice- Would you be more likely to prescribe Butrans for an opioid-naive or opioid-experienced patient?) <font color=blue>-<b>CHUDAKOB added notes on 01/24/2011</b>-</font>Nice job! Much better
PPLPMDL0020000001	Independence	OH	44131	1/13/2011	Followed up with JT to find out if he was able to get Butrans ordered as committed. He said that he had not tried yet today and was planning on submitting the order tonight. He said he would call me if he has any problems at all. Also discussed Butrans savings program in more detail. JT said Discount Drug Mart does not participate in RelayHealth e-voucher so I let him know that we would have savings cards & he that he will be able to go online and print savings cards for customers from his computer.
PPLPMDL0020000001	Cleveland	OH	44113	1/13/2011	I talked to dr about her percocet patients dosing around the clock that he feels are ready to convert to a long-acting opioid and asked dr to consider OxyContin 10mg or 15mg with convenience of q12h dosing and showed flashcard with this information. dr said he has recently started a patient on OxyContin 10mg because patients pain kept worsening and OxyContin was best option for patient. gave OxyContin conversion guide and
PPLPMDL0020000001	Cleveland	OH	44125	1/13/2011	Spoke with Christine & introduced Butrans. Reviewed indication, usage, dosing, transdermal system, application sites, disposal, managed care, savings program, addiction/abuse potential. I asked her to place an order for one box each of the strengths so they can be one of the pharmacies who have it in stock immediately when a patient comes in with a prescription. She said they wait for a prescription to come in before they order. I let her know that it is important to physicians to know who has it in stock upon launch & they send their patients to pharmacies who already have it. Asked her if she would order one box of 5 & 10mgc and she said she would order a box
PPLPMDL0020000001	Maple Heights	OH	44137	1/13/2011	Spoke with Ray & reviewed Butrans indication, dosing, conversion, application, abuse/addiction potential, managed care. Asked her thoughts & she said that she thought there would be a place for it. I asked if she would order a box of each strength and she said she has to discuss it with her partner, Kim before doing so. I explained that many local pharmacies were being auto-shipped & would have it already stocked upon launch & that physicians always want to know who has it on their shelf the same day they write the prescription. I asked if she would recommend to her partner that they order a box of at least the 5mgc & 10mgc strengths and she said
PPLPMDL0020000001	Garfield Heights	OH	44125	1/13/2011	Spoke with Dave & introduced myself and Butrans. Reviewed indication, usage, dosing, abuse/addiction potential, CII, transdermal system & adhesion. Dave said that he finds that patients find that transdermal systems are convenient. Discussed managed care tier 3 status & savings program. I asked him to order one box each strength and he said he will wait for a prescription. I let him know that many pharmacies have been auto shipped and physicians will want to know where their patients can get Butrans same-day when they bring in their prescription. He said that he would wait until launch. Discussed 5mgc & 10mgc as starting doses.
PPLPMDL0020000001	Cleveland	OH	44195	1/13/2011	I talked to dr about her patients taking short-acting opioids, like Percocet, that she feels are ready to convert to a long-acting opioid and considering OxyContin 10mg or 15mg q12h, showed flashcard with this information. dr said she prescribes all 7 dosage strengths of OxyContin, does like q12h dosing for patients as it can be more convenient than dosing Percocet q4-6h for some patients. I gave OxyContin conversion guide and recommended
PPLPMDL0020000001	Independence	OH	44131	1/13/2011	Quick call with Dr. Rob in the hallway. Presented conversion guide and reminded him of seven available tablet strengths as well as the convenience of q12h dosing. Also recommended Senokot-S for opioid-induced
PPLPMDL0020000001	Cleveland	OH	44195	1/13/2011	only got a few minutes with dr in hallway but asked dr to consider OxyContin 10mg or 15mg with convenience of q12h dosing for those patients that are on short-acting opioids, like Percocet, where he feels a long-acting opioid is more appropriate. showed OxyContin flashcard with q12h dosing convenience. recommended Senokot-S
PPLPMDL0020000001	Highland Heights	OH	44143	1/14/2011	Spoke to Debbie about the launch of Butrans - Discussed the indication, Dosing, patient type, CII, estimated conversion from morphine equivalent, application sites and disposal. She asked what happens at day 6 when the analgesia wears off. I explained the acceptable use of supplemental IR opioids. She said she is interested in seeing how well Butrans does as many patients taking IR opioids ATC will find it difficult to adjust to not taking pills. Told her that opioid naive patients may also be an appropriate patient. Committed to stocking the 5mgc.
PPLPMDL0020000001	Sagamore Hills	OH	44067	1/14/2011	Spoke with pharmacist & introduced Butrans. Reviewed indication, usage, dosing, conversion, appropriate patients, application, and abuse/addiction potential. I asked if she would place an order for a box of each strength so that when I start speaking with area physicians I can include them in the list of pharmacies that have Butrans in stock. She said that she would do this. Reviewed managed care tier 3 status & let her know that Butrans will have a Relay Health e-Voucher.
PPLPMDL0020000001	NORTHFIELD	OH	44067	1/14/2011	Spoke with Janelle and introduced Butrans. Reviewed indication, usage, dosing, conversion, appropriate patients, addiction/abuse potential, application, and disposal. Asked her if she would order a box of each strength. She said that she would wait for a prescription. I explained that some local chains had been auto-shipped and that physicians always want to know where their patients can get Butrans same-day. I asked if she would order just a box of the 5mgc or 10mgc strength but she said that they will wait for the script. She said that they usually only stock a product that they see several prescriptions per week for as they like to keep their inventory low.
PPLPMDL0020000001	Twinsburg	OH	44087	1/14/2011	Introduced myself to Nancy (tech) & Lou (pharmacy manager). Reviewed Butrans indication, appropriate patients, dosing, conversion, abuse/addiction potential, managed care. Lou said he really thinks that Butrans could "take off". He said he would recommend me call on the UH group in Hudson. I told him that the group is complete "no access" and he said that he was very close with several of the physicians there and would be happy to contact those physicians to tell them about Butrans. He said that he thinks that Dr. Whittmer will be especially interested. He also mentioned Dr. Moufawad as someone who may be interested. I asked him to order a box of each strength and he happily agreed to do so. He said he really thinks there is a place for Butrans and is excited to see what happens with it. Also told him about e-voucher and savings program. Let him know I would be following up and asked him to keep me informed if he hears anything from any physicians.
PPLPMDL0020000001	Parma	OH	44129	1/14/2011	Spoke with Mary Jo, pharmacist, and introduced Butrans. Reviewed indication, abuse/addiction potential, dosing, conversion, application sites, appropriate patients. She looked in her system and said that it was loaded. I asked her to punch in an order for a box of each strength, but she said they wait for a prescription before ordering. I explained that many local pharmacies have been auto-shipped and that it is important to physicians to know where patients can obtain Butrans immediately. Also let her know that it would have a Relay Health e-Voucher program. Asked if she would order one box of 5mgc or 10mgc since they are the two starting doses, but she said they would hold off until a prescription came through. She did recommend that I call on Laura Stith as she is the largest Vicodin writer in the area.
PPLPMDL0020000001	Cleveland	OH	44129	1/14/2011	Followed up and met the new pharmacist, Marko. Introduced Butrans & reviewed indication, dosing, conversion, appropriate patient type, application, abuse/addiction potential. Asked if he would place an order now for one box of each strength. He said he will wait for a prescription. I explained that physicians will want to know who already has it stocked & will send patients there and also that several local chains have been auto-shipped.
PPLPMDL0020000001	Cleveland	OH	44105	1/14/2011	Marko asked what the most popular doses we anticipate being most common- reviewed Table 1 with him. Asked if he would order a box of 5mgc & 10mgc now and he agreed to do this.
PPLPMDL0020000001	Cleveland	OH	44105	1/14/2011	I talked to Abdul, Pharmacist, about Butrans FPI, dosage strengths, medication guide, instructions for use, formulary coverage as Medicaid is 50% of business here but commercial is 50%- explained Butrans savings cards for those patients and Prior Authorization for Medicaid patients. Abdul said this is a great product for patients who have difficulty swallowing pills, elderly patients, patients on low doses of Vicodin or Percocet. Abdul said to talk to Dr. Tabbaa, Dr. Ryan, Dr. Astley- Pain doctors at Metro, Dr. Harrington- Internal Med/ Geriatric, Dr. El-Gazzar writes a lot of Vicodin (Jawewood dr), Dr. Celeste, Dr. Talbot and Dr. Carson are the biggest one's to be sure I talk to as he fills majority of their scripts. Dr. Nickels, Dr. Raheja, Dr. Nouraldin and Dr. Patel. Gave Butrans rebate form and asked Abdul to order max quantity to get most of the rebate and he agreed to do so immediately.

PPLPMDL0020000001	Cleveland	OH	44102	1/14/2011	i talked to Brian,Pharmacy Technician,about Butrans fpi,black box warning,dosage strengths,medication guide,REMS program,instructions for use,formulary coverage and savings cards for commercial plan patients.Brian said Vince,Pharmacist,wasnt available to talk so he would share all of the information with vince and asked me stop back and talk to Vince about ordering Butrans.
	Cleveland	OH	44114	1/14/2011	Reviewed the indication of ryzolt and the positioning. Asked him to convert those patients taking IR tramadol several times/day. Asked if they needed value cards. None needed.
PPLPMDL0020000001	Berea	OH	44017	1/14/2011	talked to Amy(Amalia),Pharmacy Manager,about Butrans fpi,black box warning,medication guide,instructions for use,formulary coverage as they see 95% Medicaid here and stocking of Butrans.Amy said that Anda,is the Wholesaler for NEW products,so they will ship Butrans and McKesson's wholesaler for all other products.I asked if Amy would order Butrans if she doesnt receive a shipment from Anda and she said yes,she'll order all 3 dosage strengths of Butrans. I asked who are the doctors that write a lot of hydrocodone combo's and Amy said they see a lot of scripts from Dr.Boyd (but more oxycodone-short and long-acting),Dr.Robson,Dr. Talbot,Dr. Celeste so she said talk to all of them and be sure to follow-up with her and provide feedback.Amy said patients who are on vicodin or percocet,could benefit by converting to Butrans and those patients who cant swallow. I explained Medicaid coverage was a Prior Authorization and commercial plan patients can use savings cards for Butrans
PPLPMDL0020000001	CLEVELAND	OH	44109	1/14/2011	Talked to Rod,Pharmacist,about Butrans FPI,black box warning,dosage strengths,medication guide,instructions for use,formulary coverage and savings cards for Butrans.Rod said they were autoshipped Butrans,all strengths,thinks its a good option for patients but they do have a lot of medicaid so if doctors fill out prior authorization and get approval he can see Butrans moving off shelves if not,small percentage is commercial plans so I told him about savings cards for those patients.rod said to follow-up end of month/feb and give feedback from what doctors think of butrans
PPLPMDL0020000001	Parma	OH	44129	1/14/2011	Quick call with Dr. Roheny in hallway. I handed him conversion/titration guide, opened to Pg 7. I asked him if he remembered our last conversation about the conversion ratio table & he said "Yes, it was just last week!". I told him that I was so excited to come back and felt that it was important that I follow up promptly on our conversation. I told him I had one question for him as I turned to the next page with the visual of the Vicodin ATC regimen. I asked him if he would think of just one patient who was taking Vicodin ATC and switch them to an appropriate dose of OxyContin q12h. He said "Absolutely!". I told him I would be returning to hear about it.
PPLPMDL0020000001	Cleveland	OH	44195	1/14/2011	attended lecture-Dr.Stanton-Hicks gave lecture on Sleep and Pain. talking to him,dr.cheng and dr.minzter
PPLPMDL0020000001	Twinsburg	OH	44087	1/14/2011	Spoke with Josh and introduced Butrans. Reviewed indication, dosing, conversion, application, disposal, addiction/abuse potential. He asked about cost. Discussed tier 3 coverage and started to tell him about savings program but he abruptly said he had to go help a customer, so I did not get a chance to ask them to place an order.
PPLPMDL0020000001	Brooklyn	OH	44144	1/14/2011	Dr. Detwiler said that he typically uses OxyContin for patients who are elderly and have a severe chronic pain. He said he's comfortable using OxyContin but only for select patients. I told him that he's doing exactly what he should be doing in being selective & that OxyContin, like all opioids carries abuse/addiction potential so he should be critical when choosing appropriate pts. Uncovered that he does not utilize OARS, so we discussed it & he said he was very interested in enrolling. He said that even though he feels confident that he can "weed out" drug-seekers, OARS will help him feel more secure, especially with new pts. I asked him to think about his patients who were taking ATC Vicodin/Percocet & asked if he thought any of them would find a q12h medication convenient-he said there may be a few. I asked him to consider OxyContin for those pts & he said he would. Discussed mgd care/savings. Ryzolt 2-3-1 msg-He said he finds that tramadol lasts for 12h & doesn't see need for q24h.
PPLPMDL0020000001	North Olmsted	OH	44070	1/14/2011	Spoke with Keith, floater. We reviewed Butrans FPI, indication, dosing and medication guide. He will give the info to the other pharmacists and it will be up to them to order. Reminder about OxyContin as a Q12hr option and asked him to recommend Senokot S.
PPLPMDL0020000001	Cleveland	OH	44113	1/14/2011	I talked to Aaron about Butrans FPI,dosage strengths,medication guide,instructions for use,formulary coverage as he has 80% Medicaid and 20% commercial but he and business partner are going to merge their 2 stores into one,so Exact Care pharmacy will have 50/50 medicaid/commercial plans,so we talked about Medicaid's coverage for Butrans and commercial plan patients using Butrans Savings cards.Aaron said his only concern is for those patients who are obese,sweat a lot,have a lot of folds in skin,he's not sure how well Butrans will be adhesive to their skin,so he said we'll just have to wait and see.Aaron said he would order the 5 and 10mcg/hour Butrans as these are the starting doses,but when I have lunches with offices that commit to starting patients on Butrans,Aaron said to have the nurses/med assistants call him and request the 20mcg/hour or more of the 5 and 10mcg/hour and he'll order them no problem.
PPLPMDL0020000001	Brooklyn	OH	44144	1/14/2011	Dr. Miguel said told me that he had just read an article that brought awareness to the amount of acetaminophen in Vicodin & Percocet. He said that the black box warning on those products now has to be updated and they are limiting the amount of acetaminophen in those products to no more than 325mg per pill. He said that ht article really made him think about his patients who take ATC Vicodin. I asked him what he is going to do with those patients and he said that he is going to switch them to OxyContin since it does not have any acetaminophen in it and is only dosed q12h. I showed him the single entity opioid marketing piece to reinforce his statement & also showed him the conversion guide as reference when switching those pts. Also discussed OARS which he was highly interested in. He said that since he will be switching more patients to OxyContin, being part of OARS will help him feel secure. Also Ryzolt 2-3-1 reminder. TOC with Tiffany & Patricia regarding OARS as well.
PPLPMDL0020000001	Cleveland	OH	44102	1/14/2011	i talked to Deb,Pharmacy Technician,about Butrans FPI,black box warning,dosage strengths,medication guide,instructions for use,formulary coverage for commercial plans and Medicaid patients having a prior authorization,talked about commercial plan patients using Butrans Savings cards. Deb said to stop back in a few weeks and talk to Vicki,Pharmacy Manager as she orders all medications and she is sure she'll order Butrans as this once weekly dosing regimen is more convenient for a lot of their patients that are taking Vicodin and Percocet q4-6h.
PPLPMDL0020000001	Cleveland	OH	44103	1/14/2011	i talked to Tom,Store Manager,and Tim,Pharmacist,about Butrans fpi,medication guide,instructions for use,formulary coverage and savings cards for commercial plan or cash paying patients for Butrans.Both of them said Butrans was autoshipped by Amerisource Bergen,they do have all 3 strengths of Butrans,but both of them said i need to follow-up with Joe,Pharmacy Manager and President of Sheliga Drug,as he may have more questions about the insurance coverage and the full prescribing information.
PPLPMDL0020000001	Cleveland	OH	44130	1/21/2011	Spoke with Dawn & introduced Butrans to her since I had not spoken with her about it yet. She said she had not heard about it. Reviewed indication, black box warning, appropriate patients, single-entity opioid, CIII, 7 days of buprenorphine delivery. She said that she really thinks there is a place for it, especially since Darvocet is no longer available. She also said that with recent news covering warnings about too much acetaminophen, more prescribers may be interested in Butrans. Discussed savings cards with her and told her the website where she can print savings cards, which she said she would do. Let her know that I have started speaking with physicians in the area & that Dr. Kansal said he would prescribe it.
PPLPMDL0020000001	Brooklyn	OH	44144	1/21/2011	Spoke with Rhonda & presented savings program and cards. Let her know that she could print more online. I also told her that I spoke with Dr. Miguel who was interested in prescribing it & recommended she place an order. She said she will wait for the Rx. Reviewed savings card restrictions & reminded her that they could not be used for anyone with any type of government insurance, including Medicare Part D & Medicaid. She agreed that a \$15 co-pay for commercially insured patients was a very reasonable cost for Butrans.
PPLPMDL0020000001	Independence	OH	44131	1/21/2011	Spoke with technician Mary & asked her if they had received Butrans. She had remembered that I had been working with JT to get it stocked ASAP. She said that she did not see it and that JT had just left for the day. She said that he would be in over the weekend & I let her know that I would come back to see him if possible. Reviewed Butrans with her & she said that she would leave information for JT.
PPLPMDL0020000001	Parma	OH	44129	1/21/2011	Introduced Butrans to Dr. Gigliotti & delivered 5 core messages. Also reminded him that bc it is an opioid it can still be abused & discussed importance of appropriate pt selection. I asked him what type of pt he was thinking of- opioid-naive or opioid-experienced & he said he probably would not Rx Butrans for an opioid-naive pt, at least until he got some experience using it. Showed him initiation guide & I asked if Butrans was something he could see himself integrating into his practice & he said he thinks so but needs more time to discuss it with me. He said he was late to an appointment & asked if I could come back next week so that we could discuss more details about Butrans. TOC with Anna to let her know that I would be following up early next week with Dr. Gigliotti regarding Butrans. Left FPI
PPLPMDL0020000001	Cleveland	OH	44130	1/21/2011	Introduced myself & Butrans to Dr. Kansal. Reviewed 5 core messages & box warning & asked his thoughts. He said many pts don't like long-acting pain medications because they like to get "that immediate release of drug" & that the patients think they need "that feeling" to have pain control. Discussed importance of approp pt selection. Asked if he would be more likely to use in opioid-naive or opioid-exper pts & he said he would try it in both. Discussed mgd care cvg & savings but he said he forgets to give cards out-told him about e-voucher. Asked him to think of more "moderate" pain pts & showed him FPI 2.2 & medication guide. Asked if he had one or two pts in mind who have commercial ins & he said he does due to Darvocet being gone & the latest news regarding combination opioids. He said he is concerned now ab using combo products. Reminded him that Butrans is a SEO & asked him when I could follow-up. He said 1 mo. OxyContin indication reminder & Ryzolt savings. Rec Senokot-S.
PPLPMDL0020000001	Brooklyn	OH	44144	1/21/2011	Introduced Butrans to Dr Miguel, delivering 5 core messages & reviewing boxed warning. Asked him his thoughts & he said he liked that it is a single-entity opioid in a transdermal system dosed once per week. I asked him if he is thinking of more an opioid-naive or opioid experienced patient & he said he would prescribe it for either. Went over initiation of treatment with Butrans and asked him to keep his more "moderate" chronic pain pts in mind. He asked if it was like Duragesic. I told him we have no comparative data & that I could only speak to Butrans, & reminded him to keep the more "moderate" chronic pain pts in mind. He asked if it was expensive. I asked him what insurance plans he sees & he said commercial plans & Med D. I reviewed savings program with him & told him that many pharmacies will have automatic savings in place as well. I asked when I could follow up & he said 2 wks. He also said he had Rx'ed OxyContin since our lunch & likes that it is a single-entity opioid. TOC
PPLPMDL0020000001	Independence	OH	44131	1/21/2011	Introduced Butrans to Dr Pal-Delivered 5 core msgs and reviewed black box warning. He said that he had read about buprenorphine. I asked him his thoughts & if he would be more willing to prescribe Butrans for opioid-naive or opioid-experienced pts. He said he would write it for either & likes that it is CIII & q7d. Reviewed FPI 2.2. I asked if he had one or two pts in mind & he said he does, but is concerned about coverage. Reviewed managed care & asked him to primarily think of commercially insured pts & told him about savings. I asked if he could still think of one or two pts & he said that he had actually just seen one this morning. He said he would check to see what insurance the pt had. Asked him if I could follow up with him next week & he asked that I come back in two weeks instead so that he would have time to prescribe it and get feedback. TOC with Jill- let her know about Butrans & the savings cards & let her know that Dr Pal asked me to come back in two weeks to follow up-font color=blue->CHUDAKOB's query on 01/27/2011</b></font>Ashleigh, please refrain from using abbreviations [TOC] in your call notes as other people that read these notes may not know what the abbreviations mean. Thanks!<font color=green->APSEGAS's response on 01/28/2011</b></font>That makes sense. I'm sorry!<font color=blue->CHUDAKOB added notes on 01/28/2011</b></font>Thank you!
PPLPMDL0020000001	Independence	OH	44131	1/21/2011	Introduced Butrans to Dr. Jack & covered 5 core messages. Asked him his thoughts & he said he is surprised & intrigued to know that it is CIII & dosed q7d. Reminded him that Butrans can still be abused & covered box warning. He said he is interested & wants to read the FPI before prescribing it. Discussed initiation of Butrans therapy, application, rotation. He asked what to do if it comes loose & I showed him FPI 2.1. I asked if he had any specific pts in mind & he said not yet. I reviewed indication & asked him to think of moderate chronic pain pts who need an ATC opioid analgesic. He asked me to follow up with him Mon or Tues morning because he wants to read FPI this weekend & will give me his honest feedback. I asked if Butrans was something he could see himself prescribing & he said yes. He said he has mostly commercially insured pts- reviewed savings prgm & he asked for cards-discussed cards w Maria & Penny. Reminder for OxyContin for appropriate pts in seven tablet strengths.
PPLPMDL0020000001	Independence	OH	44131	1/21/2011	Quick call with Dr. Rob but was able to deliver 5 core Butrans messages. He apologized that he did not have time to discuss Butrans with me due to extremely high patient load, but said that he would be happy to review the FPI to see if it was something he could use in his practice. TOC with Maria & Penny. Discussed Butrans 5 core messages & savings program with them. They said they see mostly commercially insured patients. I asked them if they thought Butrans sounded like something that the doctors would prescribe & they said yes.<font color=blue->CHUDAKOB's query on 01/27/2011</b></font>Ashleigh, instead of putting TOC with Maria & Penny, it might be better to write "I spoke with Maria, the nurse and Penny, the receptionist (if that is their titles) Then explain what you spoke about. This way you and others who read this will know exactly who you spoke with.<font color=green->APSEGAS's response on 01/28/2011</b></font>Sounds good. I will start doing this immediately. Thank you.<font color=blue->CHUDAKOB added notes on 01/28/2011</b></font>Thank you!
PPLPMDL0020000001					

PPLPMDL0020000001	Parma	OH	44129	1/24/2011	Followed up with Bethany regarding the questions she had about the OxyContin reformulation. She said that she didn't end up calling Purdue because she explained the reformulation to the patient and they have had no further "issues" with it, so she said unless the question arises again, she doesn't need additional information. Also followed up on Butrans stocking & she said that they do have it in stock now & it is ready to go. I confirmed that they do participate in RelayHealth's e-voucher program & let her know that most commercial insurance patients will only pay \$15 out-of-pocket which she agreed was very reasonable. She said she would keep me posted on what she sees/hears about Butrans
	Parma	OH	44134	1/24/2011	Introduced myself & Butrans to Dr. Loyke. Reviewed 5 core messages & black box warning. He said as a general rule, he really does not prescribe many narcotics. Discussed importance of appropriate pt selection. He said that he did like having "another option" with Butrans. Presented initiation/titration guide and discussed appropriate patients. He asked what the cash cost was. I reviewed managed care coverage & savings cards & he said he was surprised. I asked him if the appropriate patient presented if he would be willing to prescribe Butrans. He said he might & again said he liked having the option. He asked what other products I had. Delivered OxyContin for the appropriate patient reminder & Ryzolt 2-3-1 message.
PPLPMDL0020000001	Berea Cleveland	OH	44017	1/24/2011	Spoke with Tina, they do not do appts with reps. I reviewed Butrans medication guide, she said the Dr will look over the info and will call to make an appointment if they would like further information. I left info for Dr.
		OH	44113	1/24/2011	I asked dr if we could discuss another product that he has available now for pain management and dr said if it was "new" then I had to wait and discuss at lunch as he didnt have a lot of time today,so we talked about patients on short-acting oxycodone where dr feels a long-acting opioid,like OxyContin is an appropriate option and the 7 tablet strengths available to allow for flexibility in dosing OxyContin,discussed Medicaid and commercial plan insurance coverage for OxyContin at the lowest branded co-pay and recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44114	1/24/2011	I talked to Joel,Pharmacy Manager,about Butrans fpi,black box warning,dosage strengths available,medication guide,Butrans REMS program,stocking and formulary coverage for Butrans.Joel said he heard something about Butrans but didnt know much and asked who i called on in this area,as he gets patients from University Hospital,cleveland clinic,metro doctors,which are all of my focus so he said he'll order Butrans when he see's a script.I asked Joel to re-consider and order Butrans 5mcg/hour and 10mcg/hour transdermal systems as patients will be in pain and need medication immediately not the next day,Joel said that was a good point and he would consider ordering this week.Joel also said he thought Butrans was a good option instead of all the Vicodin and Percocet he is seeing being prescribed for patients,he prefers a transdermal system over the pills.recommended
PPLPMDL0020000001	Parma Heights	OH	44129	1/24/2011	Checked in with Al to ensure that he was able to get Butrans on the shelf. He verified that they do have it in stock. Discussed how he can go online to print more Butrans savings cards & went over how they are used & that they cannot be used for patients with any type of government coverage, including Medicare & Medicaid. Asked his thoughts on Butrans & he said he thinks there is a place for it, especially with the number of physicians who maintain pts on low dose hydrocodone around-the-clock. He recommended that I call on Stith, Roheny, & Gigliotti & I let him know that I will be talking to each of them.
PPLPMDL0020000001	Westlake Westlake	OH	44145	1/24/2011	Spoke with Rita MA, she said to leave the info and we will see what the Drs think of Butrans as an option.
PPLPMDL0020000001		OH	44145	1/24/2011	We reviewed the FPI for Butrans, warnings, indication, dosing and conversion guide. Dr said that he had read about it. He agreed to prescribe and thinks that it will be best for opioid experienced patients. We reviewed OxyContin as an option where Butrans may not provide adequate analgesia. Spoke with Joanne MA and reviewed Butrans medication guide and savings cards.
PPLPMDL0020000001	Berea	OH	44017	1/24/2011	Spoke with Nikki, we reviewed Butrans FPI, warnings, dosing and medication guide. She checked and did have 5 and 10mcg Butrans on the shelf. Reminder about OxyContin where Butrans is not enough, and asked to recommend Senokot-5.
PPLPMDL0020000001	Cleveland	OH	44104	1/24/2011	I talked to dr about Butrans FPI,black box warning,dosage strengths available,medication guide,instructions for use,formulary coverage for Medicaid patients being a Prior Authorization and dr said He has to do all Prior Authorizations and he doesnt do them so he just switches patients to other medications.Dr said Butrans sounds like a great option for his patients on low dose Vicodin or Percocet that he could start on Butrans 10mcg/hour transdermal system dr said he only has a small percentage of commercial plan patients where he would try Butrans in these patients first as he doesnt want to do Prior Authorizations for Medicaid patients to get Butrans.I talked to dr about commercial plan patients using Butrans savings cards and asked dr to consider 1-2 patients that had commercial insurance and were taking 15mg-40mg hydrocodone per day and dr said he had a few of those and would talk to them about Butrans and see how the medication works.we discussed Butrans REMS too.I talked to dr
PPLPMDL0020000001	Westlake Westlake Cleveland	OH	44145	1/24/2011	Spoke with Kelly and Suzy nurse, we reviewed the medication guide, managed care and savings program for Butrans.
PPLPMDL0020000001		OH	44145	1/24/2011	Quick call, I introduced her to Butrans. Dr did not have enough time today to get through entire Butrans FPI today.
PPLPMDL0020000001		OH	44103	1/24/2011	talked to Amol,Pharmacist,about Butrans fpi,black box warning,dosage strengths,medication guide,instructions for use,formulary coverage,Butrans patient savings cards and electronic voucher program that Rite Aid has for Butrans so Amol said they have Butrans 5mcg/hour and 10mcg/hour transdermal systems in stock and he thinks there is a place for Butrans in patients taking hydrocodone combo's or oxycodone combo's and said to follow-up in a few weeks to see if anyone gets started on Butrans.We also discussed Butrans REMS.I asked Amol to recommend OxyContin,for those patients that Butrans 20mcg/hour transdermal system doesnt work for,with the flexibility of 7 dosage strengths and gave OxyContin conversion guide and recommended Senokot-5
PPLPMDL0020000001	Independence	OH	44131	1/24/2011	Followed up with Dr. Jack as promised. He apologized & said that while he is very interested in Butrans, he did not have a chance to review the information that I gave him & asked me if I could come back Wednesday or Thursday this week so that we could discuss it. I let him & Maria know that I would be back to follow up & he said he appreciated it & would read the literature so that we could have a good discussion about Butrans.
PPLPMDL0020000001	Parma	OH	44129	1/24/2011	Introduced myself to Judy, one of Dr Salewski's nurses. Asked how I could see Dr Salewski & let Judy know that we just launched a product on Friday that no one has spoken with him about yet. Asked for an appointment. Judy asked "how expensive" Butrans is. Discussed managed care coverage and savings. Judy said that "80%" of his practice is Medicare Part D and that if Medicare doesn't cover it, he will not prescribe it. I asked Judy if I could set up a quick appointment with him to go over the product information since he is a pain management specialist & he may want to at least be aware of the product. She said that she would give me information to his scheduler to get an appointment or lunch.
PPLPMDL0020000001	Berea Westlake Independence	OH	44017	1/24/2011	Spoke with Dawn MA, I reviewed Butrans medication guide, she said the Dr's will need to look over the info and will call to make an appointment if they would like further information. I left info for both Dr's.
PPLPMDL0020000001		OH	44145	1/24/2011	Spoke with Rita MA, she said I can leave info for the Drs and see what they think about Butrans.
PPLPMDL0020000001		OH	44131	1/24/2011	Introduced myself & Butrans to Debbie. Reviewed 5 core messages & boxed warning. Debbie asked what the adverse events were & I showed her FPI 6.1. She said that the rates for application site skin reactions are about what she would expect from a transdermal product. She asked what the half-life was & I showed FPI 12.3. I asked her if she would be more likely to prescribe Butrans for an opioid-naïve or an opioid-experienced pt & she said due to the long half-life, she would probably write it for opioid-experienced pts. Presented initiation guide. She asked if Butrans could be cut & I told her that it could not- Also discussed maximum dose of 20mcg/hr system & let her know that only one Butrans could be used at a time. Went over application & disposal as well as managed care & savings. Debbie & Dr Trickett said they had just seen a patient this morning who "would be perfect" for Butrans- he is currently taking 2 Vicoden/day & both said they would like to have fewer pts on Vicoden ATC
PPLPMDL0020000001	Berea Cleveland	OH	44017	1/24/2011	Spoke with Dawn MA, I reviewed Butrans medication guide, she said the Dr's will need to look over the info and will call to make an appointment if they would like further information. I left info for both Dr's.
PPLPMDL0020000001		OH	44120	1/24/2011	I talked to Stewart,Narcotics Buyer,about Butrans FPI,he hadnt heard anything about Butrans and they didnt have any in stock.We talked about black box warning,dosage strengths available,medication guide,instructions for use,formulary coverage,Butrans savings cards.I asked who was the patient Stewart thought could benefit from Butrans and he said the low dose,Vicodin or Percocet,moderate pain patients,so I told him that was exactly who i was talking to doctors about for Butrans.Stewart said they see a lot of Dr.Hall,Dr.Rosenfield and Dr.Pandit's patients so he wanted to be sure i talk to them about Butrans.I asked if they participated in Relay Health,electronic vouchers and he thought they did but neither him or Shay,Pharmacy tech,could figure out how to pull up voucher so he asked for Butrans Savings cards.I left 2 packs of Butrans Savings cards-#863902,#865594 and told Stewart i would follow-up in a few weeks to see if anyone has prescribed Butrans yet.left initiation/titration guide
PPLPMDL0020000001	Cleveland	OH	44102	1/24/2011	i talked to Vicki,Pharmacist,about Butrans fpi,initiation/titration guide,patient information booklet,formulary coverage and Butrans savings cards.Vicki said Rite aid sent 1 box of Butrans 5mcg/hour and 10mcg/hour to their store,she thinks there is a place for Butrans for these patients in pain that doctors wont treat with hydrocodone combo's.Vicki said some of the Metro physical medicine&rehab doctors send patients to their store,dr talbot,celeste and dr carson also send patients to them too.Vicki said they have Relay health,so the electronic voucher is in system for Butrans and will take co-pay savings off automatically
PPLPMDL0020000001	Cleveland	OH	44106	1/24/2011	i talked to Emily,Pharmacist,about Butrans FPI,black box warning,dosage strengths available,medication guide,instructions for use,formulary coverage for commercial plan patients and the use of the Butrans savings cards.Emily said she did have the Butrans 5 and 10mcg/hour transdermal systems,but she was glad i explained the 7day dosing schedule as she thought it was a once daily dosing transdermal system.Emily said this is a great option for patients on low doses of Vicodin or Percocet or patients that have difficulty swallowing.We talked about Medicaid patients having a Prior Authorization for Butrans,Emily said she see's patients from Cleveland Clinic,University hospitals,Metro hospital and some of the surrounding doctors offices so she asked me to follow-up in a few weeks to see if any scripts have come through for Butrans.I gave Emily the patient information booklet and initiation/titration guide as she wanted one for her reference.discussed Butrans REMS and recommended Senokot-5
PPLPMDL0020000001	Parma	OH	44129	1/24/2011	Introduced Dr Roheny to Butrans & reviewed 5 core messages & box warning. Asked him his initial thoughts & he said that he thought that having a "once a week" option was "interesting". I asked if he would be more likely to prescribe Butrans for an opioid-naïve or an opioid-experienced pt & he said opioid-experienced. Presented initiation guide & reviewed dosing/titration. He asked what side effects are & I reviewed FPI 6.1 with him- he said he felt that the rates were "low". I asked him if he could think of one or two patients for whom he would consider Butrans & he said "maybe". Reviewed managed care coverage & savings cards & asked him to think of commercial pts who would be appropriate for Butrans & let him know I would be back to follow up for further discussion which he said he appreciated. Also asked him about the Vicoden pt he had told me he was going to convert to OxyContin. He told me he hasn't forgotten but he has not seen that particular pt yet but will still do so.
PPLPMDL0020000001	Cleveland Independence	OH	44111	1/24/2011	Spoke with his nurse Margaret, we reviewed the Butrans initiation and titration guide. We will pass the info along to the Dr and they will call if they would like further information. At this point Dr is not doing any
PPLPMDL0020000001		OH	44131	1/24/2011	Introduced Butrans to Dr Trickett, delivering 5 core messages & reviewing boxed warning. Asked if he saw a place for Butrans in her practice & she said she does. I asked her if she was thinking of an opioid-naïve or an opioid-experienced patient & she said she would be more likely to prescribe Butrans for an opioid-experienced pt. Discussed coverage & savings cards & she said she was surprised to hear that pts with commercial coverage could obtain a newer product for such a low co-pay when using the savings cards. Discussed application, initiation of treatment, titration, and adverse events. I asked her if she has one or two pts in mind and she said that she saw one this morning who is a male pt taking 2 Vicoden per day- he has BWC coverage, so she said she would be able to let me know if the Rx goes through. She said she would love to get fewer pts on Vicoden by switching them to Butrans. Let her & Steve know that I would be back within a week to follow-up & get feedback.
PPLPMDL0020000001	Cleveland	OH	44104	1/24/2011	I asked dr if i could discuss a product with him for pain management,as we hadnt talked about this before,and dr said he didnt have sufficient amount of time to talk with me about Butrans and that i would have to wait until my lunch feb 7th,to talk about Butrans.So i asked dr to think about his percocet patients that dr was ready to convert to a long-acting opioid and consider OxyContin 10mg or 15mg q12h,gave OxyContin conversion guide and q12h convenience flashcard dr said he'll remember that option as he does prescribe a lot of OxyContin. recommended Senokot-5
PPLPMDL0020000001	Berea	OH	44017	1/24/2011	Spoke with Adam, we reviewed Butrans FPI, dosing, medication guide. He agreed to order since Dr Kavlich said he would try it. Reminder about OxyContin for patients already taking more than 80mg of oral morphine.
PPLPMDL0020000001	Berea	OH	44017	1/24/2011	We reviewed the FPI for Butrans. He said he is more likely to start an opioid experienced patient and we reviewed how to initiate with 10mcg dose. Dr said that he feels that transdermal systems are less abused than tablets. I discussed that Butrans is a schedule III opioid with the same abuse potential and warnings as other opioids. Dr said that he will give Butrans a try but did not know if he had someone coming in in the next couple of days.
PPLPMDL0020000001					Reminder about OxyContin and Ryzolt as options. I told him I would follow up at the end of the week. I spoke with Diane and reviewed the patient information and savings program. She will also share the info with Shirley who instructs the patients on how to apply. Diane said that most patients go to CVS and Giant Eagle in Berea and we discussed stocking.

PPLPMDL0020000001	Parma	OH	44129	1/24/2011	Dr Ortega said that he had a male pt doing well on OxyContin who just complained to him the "new OxyContin" was making him "sick". Dr Ortega said the pt said he was nauseated & vomiting from it. Presented Dr Ortega with field card & read bullet points. He said no other pts had complained so far. Asked if he wanted additional information but he said no. Introduced Butrans to Dr Ortega & delivered 5 core messages. He said that he is not entirely comfortable with prescribing opioids but does if he feels it is warranted. Went over box warning with him & stressed importance of appropriate pt selection. He said he doesn't have a lot of experience writing "patches" but only has one pt on transdermal fentanyl. Showed dosing & initiation guide & asked Dr Ortega to think more of the "moderate" chronic pain pt considering the strengths avail. Discussed mgd care/savings. He said he appreciated the info but does not think he will use it yet & that he would like to read the FPI-TOC with Cindy.
PPLPMDL0020000001	Parma	OH	44134	1/24/2011	Introduced Dr. George to Butrans & delivered 5 core messages. Also reviewed black box warning & importance of choosing appropriate pts. Asked his thoughts & if he could see himself writing it for opioid-naive or opioid-experienced patients & he said either. Reviewed initiation guide & asked if he had any patients in mind for Butrans & he said he had "a couple". Discussed managed care coverage & savings cards for commercially insured pts. Asked him if he would prescribe it for those appropriate pts and he said he wanted to review the initiation guide. Let him know I would be back to follow up to answer any further questions & to get feedback.
PPLPMDL0020000001	Parma	OH	44134	1/24/2011	Introduced Butrans to Dr. Scanlon & delivered 5 core messages. Also covered black box warning & contraindications. Asked him his initial thoughts & he said it sounded good so far. I asked him if he would be more likely to prescribe Butrans for opioid-naive or opioid-experienced pts & he said opioid-experienced. Presented initiation guide & he asked if pts can continue taking short-acting medications when on Butrans & I reviewed FPI 2.4. Discussed managed care & he said he did not care about coverage at all. He said if his pts want something, they will get it. Delivered brief overview of savings cards & asked if I could follow-up with him in a week to obtain his feedback & answer any questions he may have since it is something he has not written before & he said "absolutely- I really think I can use this." I reminded him of Butrans for appropriate pts & that I would be back in a week to follow up & he agreed again.
PPLPMDL0020000001	Cleveland	OH	44130	1/25/2011	Introduced Dr Fedorko to Butrans & reviewed indication, dosing, & seven days of buprenorphine delivery. He asked about insurance coverage, so I reviewed with him commercial coverage and savings cards. He said he wanted to have more time to talk about a new product & asked me to schedule a lunch (I have one scheduled for March 8). Ryzolt savings card reminder as well. TOC with Mindy.
PPLPMDL0020000001	Lyndhurst	OH	44124	1/25/2011	Introduced Butrans to Sarah. Discussed the indication, dosing, and appropriate patient type. She wanted confirmation on the frequency of the dosing. I confirmed that it is once weekly. Her eyes widened. She asked me to leave more info as she was rushing into a patient room.
PPLPMDL0020000001	Cleveland	OH	44124	1/25/2011	Doc needed oxycontin savings cards. Reminded him that the cards are good until 03/31/11. Asked if he had time to hear about a different treatment option for chronic pain patients. He said not right now. Gave him an butrans FPI.
PPLPMDL0020000001	Westlake	OH	44145	1/25/2011	We reviewed Butrans FPI, dosing, warnings, and medication guide. He thinks it is a great idea and said he would prescribe it for his BWC patients. He said that he would probably start a patient who is opioid experience since it is rare to see a chronic pain patient who is not already on some type of opioid. We reviewed the managed care and savings cards. We discussed OxyContin for patients who are already taking more than 40mg of oral morphine equivalent per day. I reviewed the patient information and managed care with Danielle, MA.
PPLPMDL0020000001	Cleveland	OH	44130	1/25/2011	Introduced Dr Diab to Butrans, reviewing 5 core messages & boxed warning. Asked his initial thoughts & he said he thought it sounded exciting. I asked if he would be more likely to prescribe Butrans for an opioid-naive or opioid-experienced pt & he said opioid-experienced. Presented initiation guide & told him how to initiate treatment depending on oral morphine equivalent the pt is currently on & reviewed appropriate pt types. Let him know that commercial pts can obtain Butrans at \$15-20 co-pay with use of savings card. He said to give cards to Barb & Karen. (TOC with Barb & Karen- Karen said she thinks that Dr Diab has a lot of pts who could use something like Butrans). Asked Dr Diab if he could think of one or two pts who he would prescribe Butrans for & he said yes. Let him know I would be following up to get feedback. OxyContin indication reminder as well.
PPLPMDL0020000001	Westlake	OH	44145	1/25/2011	We reviewed the main points in the Butrans FPI. He asked that I leave him the FPI to read on his own and he will let me know what he thinks.
PPLPMDL0020000001	Lakewood	OH	44107	1/25/2011	Spoke with Jamie MA, we reviewed the Butrans medication guide. Dr. was behind and did not have time to discuss Butrans today.
PPLPMDL0020000001	Lakewood	OH	44107	1/25/2011	Spoke with Sam MA, Dr is not in this week. We discussed the Butrans patient guide.
PPLPMDL0020000001	Richmond Heights	OH	44143	1/25/2011	Quick call.....Introduced Butrans, the indication, patient type, and the once weekly application. He asked what was the medication in it. I told him buprenorphine. He said he was leaving for the day and asked me to come back from Friday morning as he did not want to rush through the info. Told him I would return on Friday.
PPLPMDL0020000001	Lakewood	OH	44107	1/25/2011	Spoke with nurse Jennifer, we reviewed the medication guide for Butrans. She said to stop by Monday morning for best chance of gaining time with Dr.
PPLPMDL0020000001	Lakewood	OH	44107	1/25/2011	I reviewed the 5 key messages for Butrans and she said she would like to look over the information. She did not have the time today to go over the details but asked that I leave the information and we can discuss further at our next appointment.
PPLPMDL0020000001	Lakewood	OH	44107	1/25/2011	Spoke with Dr and Pat, we reviewed the Butrans FPI and titration guide. Dr asked if Butrans can be used for pain associated with fibromyalgia. I reviewed the indication and that Butrans is not indicated for any certain type of pain. He said he has a patient who he just started on three 5mg perccet per day who might be a good candidate for Butrans. I asked if he will prescribe for her and he will think about if she would be a good patient for Butrans. He said he has commercial insurance and we reviewed the insurance coverage and managed care for Butrans. Reminder about OxyContin as an option instead of perccet around the clock.
PPLPMDL0020000001	Cleveland	OH	44106	1/25/2011	I talked to Steve Meeks, Pharmacy Manager, Nate, Pharmacist and Amy, Pharmacist about Butrans FPI, black box warning, dosage strengths available, medication guide, instructions for use, gave initiation/titration guide and patient information booklet, rebate information as Amerisource Bergen is their wholesaler and Steve said he'll order all 3 dosage strengths of Butrans and told me I should work with Pain Management and Chronic pain doctors, especially Dr. Covington as he sees a lot of their scripts. We talked about Butrans formulary coverage and commercial plan patients using Butrans patient savings cards and Steve said they do have electronic vouchers and I should call Sabrina Spikes, Euclid Ave pharmacy, as she is the coordinator and get Butrans entered in the Clinic's system for the electronic voucher access to make it easier for pharmacists. We also discussed Butrans REMS (Puckett) and Dr. Mazanec (secretary-Debbie Limmer) and Anesthesia/Pain management-left card for Dr. Vrooman, Katyal, Shin, Mekhal and Dr. Stanton-Hicks to call me so we can set-up appointment and also spoke with each medical secretary to try and set-up appointments with attendings in APM
PPLPMDL0020000001	Cleveland	OH	44195	1/25/2011	I talked to Dave, Pharmacy Manager, about Butrans FPI, black box warning, dosage strengths available, medication guide, instructions for use, formulary coverage and Butrans savings cards. Dave said he heard about Butrans but didn't read anything about it, so he was happy to hear that this is another option for patients as he has too many patients taking Vicodin and Percocet and asked about Medicaid coverage for Butrans so I explained Prior Authorization process for Medicaid patients in order to get Butrans. We discussed Butrans REM, gave initiation/titration guide and Patient information booklet and Dave said he'll order one box of each strength and said I can follow-up in a few weeks.
PPLPMDL0020000001	Cleveland	OH	44195	1/25/2011	I talked to Joan about Butrans fpi, black box warning, dosage strengths available, medication guide, instructions for use, formulary coverage and Patient Savings cards for commercial plan patients. Joan said she saw a place for Butrans for those low dose opioid patients and more moderate pain patients, as she wasn't thinking the severe pain, high doses of opioid patients would benefit from Butrans 20mcg/hour, so we talked about opioid-naive (they don't have those patients here in chronic pain and rehabilitation) and opioid experienced patients (majority are all opioid experienced) I gave an initiation/titration guide and patient information booklet and Joan said she'll start a few patients on Butrans to get some clinical experience and I can follow-up with her in a week or 2 to see what feedback she gets from patients
PPLPMDL0020000001	Mayfield Hts	OH	44124	1/25/2011	Introduced doc to a different treatment option for chronic pain.....Discussed the Butrans indication, dosing and application, and the savings cards program. I explained the one Butrans, once weekly. Also explained the broad commercial coverage. He did not have more time. Gave FPI and titration guide.
PPLPMDL0020000001	Cleveland	OH	44195	1/25/2011	I talked to dr about Butrans fpi, initiation/titration guide, dosage strengths available, medication guide and instructions for use, also discussed Butrans REMS and Butrans patient savings cards. I asked dr who was the patient he had in mind to initiate Butrans therapy? dr said patients taking a couple tabs of Vicodin or Percocet or maybe low dose OxyContin, 10mg q12h or 15mg q12h, that's where he'll consider Butrans. dr said a once weekly dosing regimen was much easier for some patients than dosing around the clock Vicodin or Percocet or for his patients who have a hard time swallowing pills, he'll try Butrans in them too. I gave dr Butrans Savings cards, patient instructions for use booklet and asked if I could follow-up in next week or so to see if he started any patients and dr agreed.
PPLPMDL0020000001	Cleveland	OH	44195	1/25/2011	I talked to dr about Butrans fpi, black box warning, dosage strengths available, medication guide, instructions for use, formulary coverage, discussed Commercial plan patients using Butrans savings cards. I asked dr who was the patient who could benefit from Butrans in his mind? dr said patients with moderate pain and taking a couple of Vicodin or Percocet daily, that's who he's thinking to start on Butrans. I asked if dr has a few patients in mind to start on Butrans today or tomorrow and he said yes he will and said he likes transdermal systems better than pills so he was happy with Butrans and I could leave Butrans Patient savings cards and patient information booklets with Benita Lee, his medical secretary. All three of his Nurse practitioners were in this meeting, Joan Jersan, NP, Mary, NP and JoAnne Schneider, NP, and excited about Butrans and the fact that they could prescribe as its a CIII. dr said I can follow-up through Benita Lee, or he'll contact me with questions.
PPLPMDL0020000001	Parma	OH	44134	1/25/2011	Introduced Butrans to Dr Hernandez & delivered 5 core messages. Also advised him of standard risks of opioids & being careful in appropriate pt selection. Asked his thoughts & he said he thought it was a great idea. He asked about cost/coverage, so we reviewed commercial coverage & savings cards. He said that sometimes his pts like the taking pills because they feel they have better "control" over managing their pain. Let him know that pts can take short-acting opioid & non-opioid medications. Asked if he was thinking more of his opioid-naive or opioid-experienced pts & he said opioid-experienced but then also said he can see prescribing it for someone who has never had an opioid before. Presented initiation guide. Also recommended OxyContin for appropriate pts who are beyond the dosing of 20mcg/hr Butrans. Dr Hernandez said he will definitely be trying Butrans out. Let him know I would be back to follow up & he asked that I come back in 2 wks to give him a chance to Rx it.
PPLPMDL0020000001	Cleveland	OH	44195	1/25/2011	I talked to JoAnne Schneider, NP, works with Dr. Covington and Dr. Mathews about Butrans fpi, black box warning, dosage strengths available, medication guide, instructions for use, Butrans REMS, Butrans patient savings cards for commercial plan patients and JoAnne said she will start a few patients on Butrans and see what happens, as she likes that it's a once weekly dosing of buprenorphine and likes the molecule buprenorphine so she wants to see how patients do on this medication. I asked JoAnne who was the patient in her mind that could benefit from Butrans? JoAnne said more moderate pain patients, but majority of their patients are all opioid experienced so they would be starting on the 10mcg/hour Butrans transdermal system. I asked if I could follow-up in next week or so to be sure patients are getting started easily and answer any questions she may have and she said that would be interesting. Asked if he would be more likely to prescribe Butrans in an opioid-naive or an opioid-experienced pt & she said opioid-experienced, but then also said she would try it in opioid-naive pts because it seemed "easier" because she would not have to taper the Pt's current opioid. Discussed appropriate pt types further & showed initiation guide. I reviewed managed care coverage & savings cards with Laura & staff. Laura said she is thinking of her Worker's Comp. pts who are opioid-naive when coming to her. Asked if she would Rx Butrans instead of going immediately to Vicoden & she said she would do this. Let her know I would be following up & conducted TOC with Dawn. Also Ryzolt value
PPLPMDL0020000001	Mayfield Heights	OH	44124	1/26/2011	Spoke to Christy to confirm order/auto shipment of Butrans. She had not received it. Provided the NDC is again. Discussed the indication and patient type. Explained the savings cards. She thought of a patient on fentanyl. I discussed the difference between Butans and Butrans. She suggested I call on Hillcrest pain mgmt and Dr. Chaitoff who refers most of his patients to this store.
PPLPMDL0020000001	Solon	OH	44139	1/26/2011	Quick call with Dr Zaid but was able to introduce Butrans & deliver 5 core messages. He asked what receptors buprenorphine effects & I showed FPI 12.1. He said he would be more likely to use in opioid-experienced pts since he usually doesn't get very many who are opioid-naive. Presented initiation guide & went over how to start opioid-experienced pts including taper. He said some pts may not like the tapering. I told him that was our recommendation due to possibility of buprenorphine to precipitate withdrawal in opioid-experienced pts & reviewed appropriate pt types. He said he would look at the initiation guide but wanted more time to discuss it but was too busy with patients. Also expressed interest in attending a speaker program or webinar. Scheduled breakfast for next week to follow up and have further discussion. Also reminder for OxyContin for pts who are beyond the dosing strengths of Butrans.

PPLPMDL0020000001	Woodmere	OH	44122	1/26/2011	Spoke with Angie & introduced Butrans. Reviewed indication, dosing, initiation/titration, application, appropriate patients, and box warning. She said this is a very busy CVS location & she feels that Butrans will have a place, especially with Darvocet being unavailable & more physicians exercising caution in using combination opioids. I let her know that I would be targeting various physicians in the area in multiple specialties & asked if she would proactively place an order now, before a prescription comes in, so that I can add them to the list of pharmacies that have Butrans stocked & ready to go. She agreed to do this today. Let her know I would be back to follow up & for feedback.<font color=blue><b>CHUDAKOB added notes on 02/05/2011</b></font>Very nice job!!!
PPLPMDL0020000001	Cleveland	OH	44125	1/26/2011	Introduced myself & Butrans to Stacy Preston, Clinical Coordinator at the in-patient pharmacy. Reviewed indication, dosing, initiation, appropriate patient types. She said that Dr. Samuel & the other pain management physicians in the hospital would be good physicians to target for Butrans & she said they would be interested. Also reviewed initiation/titration guide & managed care coverage as well as savings cards.
PPLPMDL0020000001	Cleveland	OH	44106	1/26/2011	I talked to dr about Butrans fpi,black box warning,dosage strengths,medication guide,patient information booklet,Butrans REMS,formulary coverage and commercial plan patients using Butrans Savings cards.Dr said he thought this would be a great option for those patients taking a couple tabs of Vicodin or Percocet daily as he liked the once weekly dosing option better and liked that Butrans was a transdermal option.dr said he will try Butrans in a few patients and let me know what happens.told dr i will follow-up next week to see if he started anyone on Butrans.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	1/26/2011	I talked to dr about Butrans fpi,black box warning,dosage strengths,medication guide,Butrans REMS,patient information booklet,Butrans savings cards and asked dr what patients could benefit from Butrans? dr said patients that have moderate pain he would consider for this medication and he liked the once weekly dosing of Butrans and that it is a transdermal application.dr said this would be a great option for those patients taking a couple vicodin or percocet or tramadol as they start a lot of patients on tramadol in the out-patient clinic,so i asked dr to focus on the tramadol patient,who has commercial insurance that can try Butrans and i would follow-up next week,dr agreed to this.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	1/26/2011	dr treats adults in the internal med dept and pediatrics so he was interested in hearing about Butrans for his adult patients,so we talked about Butrans fpi,black box warning,dosage strengths available,medication guide,Butrans REMS,patient instruction booklet,formulary coverage and Butrans patient savings cards.dr said the once weekly dosing of Butrans was a benefit for those patients taking short-acting opioids around the clock and he liked that it was a transdermal system and not a pill,so i asked if dr could think of a few patients to try Butrans in and i would follow-up in a week and dr agreed.recommended Senokot-S
PPLPMDL0020000001	Garfield Hts	OH	44125	1/26/2011	Introduced myself & Butrans to Stacy Preston, Clinical Coordinator at the in-patient pharmacy. Reviewed 5 core messages. Stacy asked if there were any special considerations for patients with renal impairment & I showed her FPI 8.7. Also reviewed 12.2, discussing QTc interval prolongation of 9.2 msec in studies of Butrans 20mcg/hr x 2. Also presented initiation guide and patient information booklet as well as savings cards. She recommended that we get the savings cards put on the Cleveland Clinic's computer voucher system. Let her know that Amy is working on that. Also asked who else I should give the information about Butrans to & she said no one & that she is my contact there. Also asked her thoughts on getting the information to South Pointe Hospital, but she said that Jason, the new director at Marymount & South Pointe typically does not meet with or take any information
PPLPMDL0020000001	Mayfield Heights	OH	44124	1/26/2011	Spoke to Warren about the stocking of Butrans. He thought he had stocked it but it was not in. I advised him that Dr. Reed said that she sends some of her patients to his pharmacy. He ordered the 5mcg and 10mcg. He liked that the savings card is in the relay health program.
PPLPMDL0020000001	Cleveland	OH	44195	1/26/2011	I talked to Kathy,PA,about Butrans fpi,black box warning,dosage strengths available,medication guide,instructions for use,formulary coverage,Butrans savings cards for commercial plan patients and Prior Authorization for Medicaid patients.Kathy is the PA for Dr.Mekhal's patients who are 80%Geriatric,with Medicare and Dr.Mintzer's patients who are more commercial and workers comp.Kathy said the once weekly dosing schedule of Butrans and the fact that its a CII and she can easily prescribe Butrans are both benefits.Kathy said majority of their patients are all "opioid experienced" so they would be looking at the Butrans 10mcg/hour and then go to the 20mcg/hour if needed.Kathy loved the Savings card program for commercial plan patients,liked the disposal units that patients got when getting prescriptions filled for Butrans and said that she would also give this information to Gail Smith and Mai,2 of the Nurse Practitioners in department
PPLPMDL0020000001	Cleveland	OH	44106	1/26/2011	worked internal med dept-met with dr armitage,vice chairman of Internal Medicine dept,had lunch and learn with Internal Medicine residents,worked Bolwell pharmacy and saw Margie Baron,Pharmacy Supervisor,dropped information off for Darrell,Pharm D in Family Medicine,about Butrans discussion and also Dr.Marsh,Family Medicine doctor.
PPLPMDL0020000001	Cleveland	OH	44106	1/26/2011	I talked to dr about Butrans fpi,black box warning,dosage strengths available,medication guide,instructions for use,formulary coverage and Butrans patient savings cards for commercial plan patients.dr said he liked the once weekly dosing of Butrans and that its a transdermal system and not a pill,as he would like to get some patients off Vicodin and put on Butrans.So i showed dr the opioid experienced chart in the initiation/titration guide and asked him to consider patients taking 15-40mg hydrocodone, to convert to 10mcg/hour Butrans,dr said he would consider and will start a few patients on Butrans.we talked about commercial plan patients using Butrans savings cards and Medicaid patients having to get a Prior Authorization filled out first before approval.
PPLPMDL0020000001	Stow	OH	44224	1/26/2011	Introduced Butrans, reviewed FPI, indication, boxed warning, dosing and titration.HE said he thought he could find a spot in his practice, a may be minimal but he thought it would be a good option for low dose chronic Vicodin. Reviewed managed care coverage and savigns card program
PPLPMDL0020000001	Stow	OH	44224	1/26/2011	Introduced Butrans, reviewed indication, boxed warning, dosing and titration. She said it is a nice option for low dose chronic Vicodin, she didnt know if she would have a big place for it. Reviewed managed care and savings
PPLPMDL0020000001	Cleveland	OH	44106	1/26/2011	I talked to Margie,Pharmacy Supervisor,about Butrans stocking and she did get all 3 dosage strengths in and has it stocked,I gave Margie Butrans initiation/titration guide and patient information booklet and she wanted 1 pack of the Butrans savings cards(#863568),as she doesnt have any electronic vouchers in her system.I told Margie that I had lunch with the Internal medicine residents adn met with Dr.Armitage and everyone was interested in Butrans and felt there was a place for it in their patient population thats more moderate pain patients and low doses of Vicodin,Percocet or tramadol which they write a lot of,so i told Margie I would follow-up early next week to provide more feedback from Pain Management and Oncology department physicians on Butrans and asked if there was anyone else i should talk to? Margie said Family Medicine,so i left my business card and Butrans fpi for Darrell,Pharm D for Family Medicine
PPLPMDL0020000001	Cleveland	OH	44195	1/26/2011	worked anesth/pain management dept-saw Kathy Kraus,PA,Anne Crawford,NP and Renattie Martin,NP,to discuss Butrans fpi,initiation/titration guide and patient information booklet and Butrans patient savings cards.see call note on Anne and i set-up meeting today at 3pm with Kathy and Renattie,to discuss Butrans in more depth.worked Physical Medicine and Rehabilitation dept-had to leave my card,Butrans FPI and initiation/titration guide for Dr.Frost,Dr.Schaefer,Dr.Hou,Dr.Jedlicka and Dr.Reddy-per medical secretaries that said doctors will review the information and let secretary know if they want to meet me and get savings cards.
PPLPMDL0020000001	Cleveland	OH	44195	1/26/2011	I talked to Anne,NP,about Butrans fpi,black box warning,dosage strengths available,medication guide,instructions for use,initiation/titration guide,formulary coverage and Butrans savings cards.I asked Anne who was a patient in her mind that could benefit from trying Butrans? Anne said patients who are taking low doses of Vicodin or Percocet and more moderate pain patients,sh'e'll try Butrans in them and see what clinical results she gets.Anne said the once weekly dosing is much easier for a lot of her patients and she see's Dr.Stanton-Hicks patients too so feels like there are a lot of them that could benefit from Butrans.I asked if i could follow-up in 1 week and she said that was fair.recommended Senokot-S
PPLPMDL0020000001	Bedford	OH	44146	1/26/2011	Introduced myself & Butrans to Oleg, pharmacy manager. Reviewed indication, dosing, appropriate pts, initiation, titration, application, QTc interval info, drug interactions, application, managed care. Oleg said he thinks that potentially Dr Moufawad will really take to this product. He said that Dr Moufawad typically likes new products and that Butrans seems like something he will prescribe a lot of. He told me to let him know what Dr Moufawad says about Butrans once I talk to him. Discussed savings/e-voucher & asked Oleg to place an order. He said that he has an inventory audit coming up very soon and therefore isn't ordering anything new right now, but after that is done, he will stock Butrans. He also recommended that I talk to J. Dehlman & Dr Shin as well as Dr Zaidi.
PPLPMDL0020000001	Stow	OH	44224	1/26/2011	Introduced Butrans, reviewed FPI, indication, boxed warning, appropriate patients. I asked if she would use it in opioid naive or opioid experienced patients and she said she would use it in either. Discussed dosing and titration. Reviewed savings cards and managed care coverage. She said she would try it. WE discussed where she uses Oxycontin and she said she has been using Oxycontin for years and likes it in all strneghts. She is aware that it is reformulated. Discussed flexibility and managed care coverage
PPLPMDL0020000001	Beachwood	OH	44122	1/26/2011	Introduced myself & Butrans to Dr Mackel, delivering 5 core messages & reviewing box warning. I asked him, as an orthopedic surgeon, where he saw a place for Butrans in his practice & asked if he manages any chronic pain. He said he does manage some pts with chronic conditions, but as a general rule, prefers not to & also typically avoids using opioids, especially long-acting, when at all possible. But he said he does prescribe them occasionally in pts who he finds to be appropriate. I told him that being cautious was exactly what he should be doing & asked that he be just as cautious with Butrans as he would any other opioid. He asked if they could take other pain meds while on Butrans & I showed him FPI 2.4. Also reviewed application, initiation, titration, & dosing as well appropriate pts/types to consider. Also discussed OxyContin 7 tablet strengths & reminded him of 15, 30, & 60mg availability which he said he was not aware of but agreed that it may be useful in titration.
PPLPMDL0020000001	Cleveland	OH	44127	1/26/2011	I asked if dr had some time to discuss a product for pain management that could be an option for his patients and dr said if it was "new",i had to wait until my lunch fe.2nd,then we could discuss Butrans in more depth.I asked dr to consider his patients taking Vicodin or Percocet,around the clock,that are still in pain and he's considering a long-acting opioid,to think of OxyContin as there are 7 tablet strengths available to allow for flexibility in titration.gave OxyContin conversion guide and formulary coverage updates-Medicaid preferred status for OxyContin and what that means to his patients and him. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	1/26/2011	I talked to dr about Butrans fpi,black box warning,dosage strengths,medication guide,Butrans REMS,patient information booklet,Butrans savings cards and asked dr what patients could benefit from Butrans? dr said she has patients that have moderate pain and are dosing around the clock and she doesnt like this and prefers a long-acting opioid,especially one like Butrans where dosing is every 7 days. I asked dr to think of opioid naive or low dose Vicodin,Percocet or tramadol as dr said she starts a lot of patients on short-acting tramadol dosing q4-6h so Butrans is much easier for her patients. we discussed commercial plan insurance coverage and using Butrans savings cards for them and Prior Authorization for Medicaid patients.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	1/26/2011	I talked to dr about Butrans fpi,black box warning,dosage strengths,medication guide,Butrans REMS,patient information booklet,Butrans savings cards and asked dr what patients could benefit from Butrans? dr said he has patients that have moderate pain and are dosing around the clock an he would prefer a long-acting opioid,especially one like Butrans where dosing is every 7 days. I asked dr to think of opioid naive or low dose Vicodin,Percocet or tramadol as dr said he starts a lot of patients on short-acting tramadol dosing q4-6h so Butrans is much easier for his patients. we discussed commercial plan insurance coverage and using Butrans savings cards for them and Prior Authorization for Medicaid patients. told dr i would follow-up in next week.recommended Senokot-S
PPLPMDL0020000001	Highland Heights	OH	44143	1/26/2011	Spoke to Kristen about the launch of Butrans - indication, dosing, application and disposal, patient type and savings card. She had the boxes of 5 and 10mcg sitting on counter. She asked about the AE(constipation). Discussed AE's,the use of supplemental agents for breakthrough, steady state.
PPLPMDL0020000001	Cleveland	OH	44106	1/26/2011	I talked to dr about Butrans fpi,black box warning,dosage strengths,medication guide,Butrans REMS,patient information booklet,Butrans savings cards and asked dr what patients could benefit from Butrans? dr said he has patients that have moderate pain and are dosing around the clock an he would prefer a long-acting opioid,especially one like Butrans where dosing is every 7 days. I asked dr to think of opioid naive or low dose Vicodin,Percocet or tramadol as dr said she starts a lot of patients on short-acting tramadol dosing q4-6h so Butrans is much easier for his patients. we discussed commercial plan insurance coverage and using Butrans savings cards for them and Prior Authorization for Medicaid patients. told dr i would follow-up in next week.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	1/26/2011	I talked to dr about Butrans fpi,black box warning,dosage strengths,medication guide,Butrans REMS,patient information booklet,Butrans savings cards and asked dr what patients could benefit from Butrans? dr said he has patients that have moderate pain and are dosing around the clock an he would prefer a long-acting opioid,especially one like Butrans where dosing is every 7 days. I asked dr to think of opioid naive or low dose Vicodin,Percocet or tramadol as dr said he starts a lot of patients on short-acting tramadol dosing q4-6h so Butrans is much easier for his patients. we discussed commercial plan insurance coverage and using Butrans savings cards for them and Prior Authorization for Medicaid patients. told dr i would follow-up in next week.recommended Senokot-S
PPLPMDL0020000001	Mayfield Heights	OH	44124	1/26/2011	Discussed the Butrans indication, dosing, application and disposal. Discussed the stuides in opioid naive and opioid experienced patients. He said he would likely use in opioid naive patients. Asked him what questions he had but he said he could not think at the moment because he was busy. I scheduled a breakfast for f/u and further discussion.

PPLPMDL0020000001	Stow	OH	44224	1/26/2011	Introduced Butrans and reviewed FPI, indication, boxed warning, dosing and administration. HE was very confused on the initiation of 10mcg on opioid experienced patients. He said he did not feel comfortable tapering patient down from 40mg of Vicodin and patient being in pain nad he did not understand why you have to taper down the patient but then can use an opioid for breakthrough, why wouldnt it kick that opioid off. HE said he feels that it is an agonist antagonist and I told him it is a partial agonist. HE said he would definitely start an opioid naive patient. I gave him the number to medical seives because he wanted to speak to a clinical pharmacist before he started someone on 10mcg. Reviewed managed care and savings cards. RMEinded of managed care coverage with Oxycontin and flexibility of 7 strengths
PPLPMDL0020000001	Cleveland	OH	44106	1/26/2011	I talked to dr about Butrans fpi,black box warning,dosage strengths,medication guide,Butrans REMS,patient information booklet,Butrans savings cards and asked dr what patients could benefit from Butrans? dr said he has patients that have moderate pain and are dosing around the clock an he would prefer a long-acting opioid,especially one like Butrans where dosing is every 7 days. I asked dr to think of opioid naive or low dose Vicodin,Percoct of tramadol as dr said he starts a lot of patients on short-acting tramadol dosing q4-6h so Butrans is much easier for his patients. we discussed commercial plan insurance coverage and using Butrans savings cards for them and Prior Authorization for Medicaid patients. told dr i would follow-up in next week.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44106	1/26/2011	I talked to dr about Butrans fpi,black box warning,dosage strengths,medication guide,Butrans REMS,patient information booklet,Butrans savings cards and asked dr what patients could benefit from Butrans? dr said he has patients that have moderate pain and are dosing around the clock an he would prefer a long-acting opioid,especially one like Butrans where dosing is every 7 days. I asked dr to think of opioid naive or low dose Vicodin,Percoct of tramadol as dr said he starts a lot of patients on short-acting tramadol dosing q4-6h so Butrans is much easier for his patients. we discussed commercial plan insurance coverage and using Butrans savings cards for them and Prior Authorization for Medicaid patients. told dr i would follow-up in next week.recommended Senokot-5
PPLPMDL0020000001	Lyndhurst	OH	44124	1/26/2011	Spoke to doc and nurse, Nancy, about the launch of Butrans. Discussed indication, dosing, application/disposal, savings cards, coverage. Doc said she would more likely prescribe for opioid experienced patients and she has a patient in mind. Discussed the conversion and initiation dosing. Nancy was concerned about the "Patch" adhering and the coverage. Reviewed the 3 tier status and the savings cards program with Diana as well. They wanted me to come back on Friday to talk to Karen and Patricia.
PPLPMDL0020000001	Cleveland	OH	44106	1/26/2011	I talked to dr about Butrans fpi,black box warning,dosage strengths,medication guide,Butrans REMS,patient information booklet,Butrans savings cards and asked dr what patients could benefit from Butrans? dr said he has patients that have moderate pain and are dosing around the clock an he would prefer a long-acting opioid,especially one like Butrans where dosing is every 7 days. I asked dr to think of opioid naive or low dose Vicodin,Percoct of tramadol as dr said he starts a lot of patients on short-acting tramadol dosing q4-6h so Butrans is much easier for his patients. we discussed commercial plan insurance coverage and using Butrans savings cards for them and Prior Authorization for Medicaid patients. told dr i would follow-up in next week.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44106	1/26/2011	I talked to dr about Butrans fpi,black box warning,dosage strengths,medication guide,Butrans REMS,patient information booklet,Butrans savings cards and asked dr what patients could benefit from Butrans? dr said he has patients that have moderate pain and are dosing around the clock an he would prefer a long-acting opioid,especially one like Butrans where dosing is every 7 days. I asked dr to think of these tramadol patients with commercial plan insurance as they can use the Butrans savings cards and asked if i could follow-up in next week and dr said that was fine. recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44106	1/26/2011	I talked to dr about Butrans fpi,black box warning,dosage strengths,medication guide,Butrans REMS,patient information booklet,Butrans savings cards and asked dr what patients could benefit from Butrans? dr said he has patients that have moderate pain and are dosing tramadol q4-6h and he's more comfortable with long-acting opioids so Butrans would be a great option for these patients and dr said the every 7 days dosing was a benefit to these patients where he knows dosing around the clock with tramadol is an issue so Butrans would be easier. I asked dr to think of these tramadol patients with commercial plan insurance as they can use the Butrans savings cards and asked if i could follow-up in next week and dr said that was fine. recommended Senokot-5
PPLPMDL0020000001	Warrensville Heights	OH	44122	1/27/2011	Introduced myself & Butrans to Renattie, who had spoken with Amy yesterday regarding Butrans. Reviewed 5 core messages & initiation/titration. Also reminded her of Butrans box warning & asked that she be cautious when choosing appropriate pts. She said that because everything they prescribe has to be approved by the Dr's there (ie Dr Shin), she said it is important that the doctors are familiar with Butrans in norder for her & Jennifer to write it. Discussed application, adverse events, & appropriate patients. She said they try to avoid prescribing Vicoden & Percocet now to have fewer pts on "pills" so she does think that Butrans will have a place in their practice, also with Darvocet being removed from the market. Reviewed managed care coverage & savings cards as well as pt medication guides.
PPLPMDL0020000001	Cleveland	OH	44113	1/27/2011	had lunch with Laura,as Dr.Nickels is on vacation this week,so she already knew about Butrans FPI,I discussed 5 core messages again,initiation and appropriate patient selection,as Laura did have a question about tapering opioid experienced patients down to 30mg oral morphine and then being able to give an opioid or non-opioid analgesic during that initial titration of Butrans 10mcg/hour,she didnt think that was approved.I asked Laura who is the patient in her mind for Butrans? Laura said someone who doesnt want to take hydrocodone or oxycodone q4-6h and someone that is responsible to put the transdermal system on once weekly and understand h/she cant put another Butrans transdermal system on the same site one week later.Laura said she can think of a few patients at Grace Hospital that are like this,but i need to share all of this information with Dr.Nickels and see where he thinks Butrans will have a place in their practice.Gave Butrans fpi and initiation guide,recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44111	1/27/2011	Spoke to Barb, MA. We reviewed the Butrans patient medication guide. She will get me in to see Dr next week.
PPLPMDL0020000001	Cleveland	OH	44195	1/27/2011	I talked to Janet,Pharmacy Manager,Brittany,Pharmacy Technician about Butrans FPI,black box warning,dosage strengths available,medication guide,instructions for use,gave patient information booklets and patient savings cards,as both Janet and Brittany said this is a great option for patients as the once weekly dosing is much easier than taking pills around the clock.Janet and Brittany said they dont have any patients come in that are opioid naive,so they arent sure if they will see a lot of the Butrans 5mcg/hour prescribed as majority of their patients are opioid experienced so they think the 10 and 20mcg/hour Butrans transdermal systems will be ordered more frequently.They were both excited to hear that I had an appointment with dr.davis and that he is interested in this medication and see's a place for Butrans in his patient population.we also talked about the Butrans REMS program and I asked if i could follow-up in a week to be sure they got their Butrans stocked and they agreed
PPLPMDL0020000001	Cleveland	OH	44111	1/27/2011	I reviewed Butrans with his PA's Barbara and Scott.
PPLPMDL0020000001	Cleveland Heights	OH	44118	1/27/2011	Spoke to Elliot Liberman about the launch/stocking of Butrans. He was filling in for Allen. I discussed the indication, patient type, dosing, coverage, savings program. He asked about medicaid coverage. I explained the commercial coverage. He also asked about the difference from fentanyl. Explained that the molecules are different plus there are no head to head studies. He was not able to place the order but said he would forward info to Allen.
PPLPMDL0020000001	Cleveland	OH	44111	1/27/2011	Spoke with his PAs Scott and Barbara regarding Butrans.
PPLPMDL0020000001	Brook Park	OH	44142	1/27/2011	Quick call at window, we reviewed the 5 main points of Butrans, we discussed the initiation guide and starting doses. He will take a look at the info. We reviewed the OxyContin savings program. He has a patient who needed a card.
PPLPMDL0020000001	Cleveland Hts	OH	44118	1/27/2011	Discussed the indicaton, patient type, dosing for opioid naive and opioid experienced patient. He said he would probably prescribe for opioid naive patient. He asked about the effect in the elderly. I explained no dosing adjustment required for elderly (monitoring recommended). He asked about coverage. I discussed the commercial coverage and savings cards - most of those patients can get for about 15 dollars. Medicaid and medicare require a prior auth. He said he will use the product more than he could with Ryzoft.
PPLPMDL0020000001	Brookpark	OH	44142	1/27/2011	Spoke with Roman PA, we reviewed Butrans main points and initiation guide.
PPLPMDL0020000001	Cleveland	OH	44111	1/27/2011	We reviewed the Butrans FPI, and medication guide. She will be interested to see what the Drs think of it and thinks it sounds like a good option.
PPLPMDL0020000001	Bedford	OH	44146	1/27/2011	Quick call with Dr Moufawed. He stopped in the hallway & said "Oh! You have that new buprenorphine patch! I really want to talk to you. I'm going to write a lot of that- please come back so we can sit down & talk about it more." I let him know that I have a lunch scheduled with him next Wed & he checked his schedule & put in his Blackberry that I was coming in so that he can be sure to be there. Had time to deliver message on indication & seven days buprenorphine delivery and told him dosing strengths. He told me again that he is going to be prescribing Butrans a lot & that he is very excited to talk about it.
PPLPMDL0020000001	Cleveland	OH	44195	1/27/2011	worked Tausigg Cancer Center - left business card with Butrans fpi and initiation/titration and talked to medical secretaries for each of these physicians:Dr.Lagman,Dr.Gutsgell,Dr.Budd,Dr.Perreboom,Dr.Mekhal,about setting up an appointment with each doctor to discuss Butrans.I had appointment with Dr.Davis and Dr.LeGrand so see call notes
PPLPMDL0020000001	Garfield Hts	OH	44125	1/27/2011	Spoke with Brian Boyle (pharmacist) & introduced Butrans. Reviewed indication, dosing/initiation/titration, appropriate pts. He said he had just read some information about it. I asked if they had it ordered yet & he said they did not. I let him know that I have spoken with both Drs Shin & Samuel & that they both expressed interest in it, & asked if he would go ahead & order it so that I can add them to the list of locations that have Butrans on their shelf & ready for patients when the physicians start writing prescriptions. He asked if he could order it through Cardinal & said he would go ahead and place the order today.
PPLPMDL0020000001	Fairview	OH	44111	1/27/2011	Spoke with Megan tech, Tom was out and the other pharmacist was on the phone. She said that Tom was in the process of ordering Butrans but they did not have it in stock yet. She said to stop back and talk to him since he is the one who places orders. We reviewed the titration guide for Butrans as a reference.
PPLPMDL0020000001	Cleveland	OH	44113	1/27/2011	worked with Dr.Nickels staff and talked to Laura Stith,NP, about Butrans fpi, gave Mike, Pharmacy Manager the Butrans initiation/titration guide and patient information booklet,and told him i would follow-up in a few weeks as i am meeting with Dr.Nickels and Dr.Raheja and Dr.Nouradin about Butrans and these are the physicians he see's most scripts from
PPLPMDL0020000001	Cleveland	OH	44195	1/27/2011	I talked to dr about Butrans fpi,black box warning,dosage strengths,medication guide,instructions for use,Butrans REMS,initiation/titration guide,patient savings cards for commercial plan patients.dr said she doesnt know if she'll prescribe much Butrans as she usually has patients on oral morphine.I asked why? dr said generic long-acting morphine is cheap and there are various routes of administration of it,so she prefers that for her patients.dr said she has a few patients who are taking low doses of Vicodin and Percocet,that she thinks may benefit from Butrans because of the once weekly dosing schedule and the medication being transdermal is better for some patients than taking pills,so I asked dr to focus on 1 or 2 patients,with commercial plan coverage so they can use Butrans patient savings cards,dr agreed.we discussed OxyContin REMS,as dr didnt see this so i gave one to her for OxyContin and Butrans.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44111	1/27/2011	We reviewed Butrans, indication, dosing and titration guide. He said he thinks it will be a great option for some patients and really likes having another option available. We discussed some of the issues with prescribing opioids like OxyContin. He really likes Purdue and the education we provide to help prevent abuse and diversion.
PPLPMDL0020000001					

PPLPMDL0020000001	Independence	OH	44131	1/27/2011	Introduced Butrans to Dr Sundaram & reviewed 5 core messages & black box warning. Presented initiation guide & went through how to initiate Butrans therapy in either opioid-naïve or opioid-experienced pts. He said he had a lot of pts he could think of that would be appropriate for Butrans. He asked about managed care so I covered that with him as well as savings cards. He said he does see a lot of nursing home pts so I asked him to focus on commercial pts for the "path of least resistance", but let him know that others could get Butrans after prior-authorization. He asked how it compared with Duragesic- told him we have no data to compare. Asked him to think of his more "moderate" chronic pain pts and reviewed dosing/titration. Also reminder for OxyContin for pts who are beyond Butrans 20mcg/hr. TOC with June, Terri, & Lisa to discuss savings cards & pt education.
	Cleveland	OH	44109	1/27/2011	I talked to Erin, Pharmacist, about Butrans FPI, black box warning, 5 core messages, medication guide, instructions for use, initiation/titration guide, patient savings cards for commercial plan patients. Erin said this is a great option as she has so many patients on Vicodin and Percocet and they don't always like to take medication around the clock but that's what doctors prescribe so she said once weekly dosing and transdermal are both benefits to her patients. I asked who writes the most Vicodin and Percocet in area? Erin said dr. Nickels is the biggest prescriber and dr. talbot and dr. celeste and dr. carson, metro hospital and lutheran hospital doctors have scripts filled here. Erin wasn't auto-shipped any Butrans but said after talking to me today she would order the Butrans 5mcg/hour and 10mcg/hour and I told her I would follow-up in a few weeks to confirm she got the product and see if any scripts for Butrans have come through, she said that would be great. She asked about Medicaid coverage too.
PPLPMDL0020000001	CLEVELAND	OH	44109	1/27/2011	I talked to Josh, Pharmacist, confirmed they did receive Butrans shipment, gave Butrans fpi, initiation/titration guide and patient information booklet for Butrans. Josh didn't have a lot of time to talk, but said he and other pharmacist think this is a great product as its transdermal and hopefully they will get their Vicodin and Percocet supply down and replace with more Butrans. I asked Josh what else they liked besides Butrans being a transdermal application and he said the once weekly dosing is an easier option for patients than those having to dose short-acting opioids q4-6h around the clock. I told Josh I would follow-up in next few weeks to see if any doctors have prescribed Butrans and he said that was fine.
PPLPMDL0020000001	East Cleveland	OH	44112	1/27/2011	Introduced doc to Butrans, discussing the indication, 7 day application, appropriate type and the studies in opioid-naïve and opioid-experienced patients. He said he could use something like Butrans. Most likely for opioid-naïve but perhaps both. He will be leaving town for about a month. Scheduled an appt for after his return. He did mention that express scripts is giving him problems approving a script for oxycontin 40mg 120tabs/month and wants patient to go to 80mg q12. I suggested that he do a prior auth. He said he would have Maria do it.
PPLPMDL0020000001	Cleveland	OH	44195	1/27/2011	I talked to dr about Butrans fpi, black box warning, dosage strengths available, medication guide, instructions for use and dr loved the patient information booklet for Butrans. dr said he has been prescribing buprenorphine in Europe and the United Kingdom for years and has been waiting for the U.S. to approve this transdermal formulation of buprenorphine. I asked dr who is the patient that he treats that could benefit from Butrans? dr said due to the limited dosage strengths we have, with 20mcg/hour Butrans being the max dose, he is thinking of his patients on low doses of short-acting opioids like Vicodin or Percocet and believes this is a product that a lot of his patients taking oral morphine could benefit from as well, so dr said I can follow-up with him and his nurse, Pam Gamere, to see if they have any questions. We talked about commercial plan patients using Butrans savings cards, stocking in Taussig Cancer center and Medicaid patients needing Prior Authorization for Butrans.
PPLPMDL0020000001	Cleveland	OH	44125	1/27/2011	Quick call- Spoke with Joe & he checked to confirm that they had received Butrans 5mcg/hr & 10mcg/hr & have it in stock. Reviewed e-voucher program and gave him my card if they have any questions regarding Butrans. Let him know that I have been speaking with physicians in the area.
PPLPMDL0020000001	Cleveland Heights	OH	44118	1/27/2011	Discussed the indication, patient type, dosing for opioid-naïve and opioid-experienced patient. He said he would probably prescribe for opioid-naïve patient. He asked how much costs. I discussed the commercial coverage and the savings cards. I discussed application and disposal. I also emphasized that the Butrans is a CII and still has the risks for abuse, addiction, and diversion.
PPLPMDL0020000001	Parma	OH	44129	1/27/2011	Spoke with Jennifer & Fenja and confirmed Butrans stocking. Jennifer said that at first they had a hard time getting it in, but then they tried ordering it from "Ando" (?) instead of McKesson (who was out of it) and were able to get the 5mcg systems in stock. Went over e-voucher with them & let them know who in the area I have been talking to. Asked them to keep me updated and to call me if they had any questions or issues. Also presented initiation guide and discussed how opioid-naïve & opioid-experienced pts would be started on Butrans.
PPLPMDL0020000001	Independence	OH	44131	1/27/2011	Quick call with Dr Jack- Asked him what questions he had regarding Butrans after reviewing the FPI & he apologized once again & said he did not have a chance to review it yet but would this weekend. I asked if there was something in particular that I could answer for him or at least be able to direct him to a specific section of the FPI to get his question answered & also reminded him of the indication & dosing. He said that he hasn't thought of specific questions but promised to read the information this weekend & asked me to come back Monday.
PPLPMDL0020000001	Garfield Heights	OH	44125	1/27/2011	Introduced Butrans to Dr Samuel who was already somewhat familiar with what Butrans was due to reading & conferences. Reviewed 5 core messages & initiation guide, including tapering current opioid which he said would not be an issue. Discussed boxed warning & asked him to be cautious in choosing appropriate pts because Butrans has abuse/addiction potential as it is an opioid. He said that he felt that it would be less abusable than other medications including Duragesic. Told him we have no data to suggest that & told him again of abuse potential. Also showed FPI 11.1 (diagram) of adhesive matrix. Asked Dr Samuel if he can think of patients to start on Butrans & he said he thinks he has many & that Butrans will be very successful. I asked if he would be seeing these pts this week & he said he will see some today & will write Butrans. Also OxyContin reminder for pts who are beyond Butrans. Went over mgd care & savings. TOC w Denise who scheduled me for a follow-up visit for feedback.
PPLPMDL0020000001	Warrensville Heights	OH	44122	1/27/2011	Introduced myself & Butrans to Dr Shin. Delivered 5 core messages & discussed black box warning. He asked what to do if it comes loose, so we reviewed FPI 2.1. Also presented initiation guide & discussed it, including taper. Also covered 5.11 regarding heat. Discussed managed care & did TOC with him & did TOC with all the nurses to cover savings cards. Dr Shin said they will do a PA if necessary & that he really sees a place for this in his practice, although he believes some pts may not like the idea of not taking pills. Reviewed FPI 2.4 regarding supplemental analgesia. He said he will probably prescribe Butrans quite a bit in place of Vicodin/Percocet where appropriate. I asked how soon I could follow up with him & he said to give him 1-2 months to really get a good sample of pts on Butrans. I let him know that I would do that but would also be following up sooner/more frequently with his staff to answer questions in the meantime. Also reminder for OxyContin when pts are beyond Butrans.
PPLPMDL0020000001	Independence	OH	44131	1/27/2011	Spoke with Steve to follow-up after my lunch in which Dr Trickett spoke of a specific pt whom she wanted to try on Butrans. Steve said that she did, in fact, prescribe Butrans for that pt & they have not seen him back or heard from him, so they have no clinical feedback for me yet, but he did say that the pt had BWC coverage & they never got any type of callback about it. Let him know I would return again to get feedback & answer additional questions.
PPLPMDL0020000001	Cleveland Heights	OH	44118	1/27/2011	Quick call....pharmacist, Mukul, was busy but was able to confirm stocking of the 5 and 10mcg Butrans. Briefly reviewed the savings cards and the indication.
PPLPMDL0020000001	Mayfield Heights	OH	44124	1/28/2011	Quick call....Introduced Butrans, the once weekly application, patient type. He said he did not have time to hear about a new product right now. Left Butrans FPI and titration guide.
PPLPMDL0020000001	Cleveland	OH	44130	1/28/2011	Spoke with Barb who said that she did not order Butrans yet but will. Reviewed indication & appropriate patient type. I also gave her savings cards & let her know how she can obtain more by going online to print them. Also discussed who in the area would be most likely to be interested in hearing about Butrans & she mentioned Dr Diab & Dr Kavlich.
PPLPMDL0020000001	Lakewood	OH	44107	1/28/2011	Dr said that he finds treating pain very frustrating. We discussed some of the resources Purdue has to offer to help him pick the appropriate patients for opioids. We reviewed Butrans FPI, indication, warnings, dosing and medication guide. I also reviewed the Butrans medication guide with Ryan and savings cards with Dawn. He asked about Ryzolet and we reviewed the dosing and titration guide. We also reviewed OxyContin as an option and he wanted to keep a conversion and titration guide on hand.
PPLPMDL0020000001	Mayfield Heights	OH	44124	1/28/2011	F/U with doc and discussed the appropriate patients and the indication. Focused him on the patient that is opioid-naïve or on low dose vicodin. Discussed the proper application and disposal, boxed warning, titration and coverage. Emphasized commercial coverage and the savings cards. He said that he could think of at least one appropriate patient. Reminded him of the oxycontin patient type and the preferred covered. Discussed the savings cards and coverage with Lindsey who handles PA calls.
PPLPMDL0020000001	Beachwood	OH	44122	1/28/2011	Spoke with Vickie & discussed Butrans indication, appropriate patients, application, CII, abuse potential, 7 days of buprenorphine delivery in 1 Butrans system, managed care, & savings cards. Vickie asked how it compared with Duragesic- told her we don't have data to compare & reviewed appropriate pt types & showed her initiation guide. She said she thinks Butrans will be great for older patients. Told her that she will more than likely have to do a prior authorization, but she said that for the right patients, they don't mind doing them. Also told her pts on government insurance including Medicaid/Medicare can't use savings cards. She asked me to return Tuesday to ensure Dr Barrett knows about Butrans because she believes Dr Yokiel & Dr Barrett will both be prescribing it a lot. She asked what pharmacies have it- she said many pts go to Hillcrest Atrium Pharmacy. I recommended she call the pharmacist to request they order it & she said she would because she knows both doctors will Rx.
PPLPMDL0020000001	Beachwood	OH	44122	1/28/2011	Spoke with Gabriel (technician) & Marty (floatar pharmacist). Reviewed Butrans indication, appropriate patients, dosing/initiation of treatment, CII, abuse potential. I asked if they had Butrans in stock at all & Gabriel checked their system & said they did not. Marty said he had heard about Butrans when he was working at a different location & they did have it. I let Gabriel know that I had spoken with Dr Yokiel & that he said he would be writing it & asked him to recommend to the ordering pharmacist that they get it in since many of the other local pharmacies do have it in stock. He said he would leave the information & let them know.
PPLPMDL0020000001	Garfield Hts	OH	44125	1/28/2011	Introduced myself & Butrans to Dr Sadowski & reviewed 5 core messages. He immediately said that he does not treat any chronic pain- He said that if someone needs more than NSAID's or Cox-2's, he refers them to pain management. He said he has fears that anything else will cause the person to "escalate" and just continue to need more. He asked about managed care & cost, so I reviewed coverage & savings information. He asked how Butrans compares with fentanyl & I told him I had not data to compare. I asked him to think of the more "moderate" chronic pain pt's & showed initiation guide. Spoke at length with Deena who said that Dr Sadowski does treat a lot of chronic pain & she firmly believes that Butrans is something that he will start using- she said she wasn't sure why he would tell me that he doesn't see that type of pt. Discussed savings cards with her & reviewed indication, dosing, & appropriate patient types- She asked me to not "give up" on Dr Sadowski & I assured her I wouldn't.
PPLPMDL0020000001	Highland Heights	OH	44143	1/28/2011	Discussed the Butrans indication, patient type, dosing, application and disposal. Discussed opioid-naïve and opioid-experienced clinical trials. He said he would use Butrans in both those patients. He asked about the difference from fentanyl. Explained no head to head data, 7 day delivery of Butrans, and different molecule. He also wanted to know about the coverage. Explained the coverage and the savings cards for commercial patients. PA for Medicare/Medicaid. I discussed the conversion dosing and those patients that may not be appropriate for Butrans, per the Boxed warning. He said he would definitely try Butrans. Reminded him of appropriate patient types for oxycontin and ryzolet. He said how could he forget oxycontin.
PPLPMDL0020000001	Sagamore Hills	OH	44067	1/28/2011	Spoke with Dr Scanlon's nurse, Helen as Dr Scanlon was unavailable to speak with me due to his schedule. She said that Dr Scanlon said that he has not used Butrans yet, but does plan to & he thanked me for the follow-up. Discussed savings cards & managed care, appropriate patients, and indication with Helen & Binka and also asked each of them to keep me updated with their Butrans activity so that I can address questions as promptly as possible. They both said they do think Dr Scanlon will start to prescribe Butrans as he has a lot of patients who fit the indication & may be appropriate. Let them know I would return for follow-up.
PPLPMDL0020000001	Lakewood	OH	44107	1/28/2011	I reviewed Butrans FPI, indication, warnings, dosing, medication guide. He said that he did think there would be a niche for OxyContin in his practice but he did not know exactly where yet. He could not think of a specific patient for Butrans right now. We reviewed the savings cards and managed care coverage and I also discussed this with Shelly.
PPLPMDL0020000001	Westlake	OH	44145	1/28/2011	Spoke with Laura and MA, we reviewed the key points of Butrans and the medication guide.
PPLPMDL0020000001	Cleveland	OH	44102	1/28/2011	I talked to Mary, Pharmacy Technician, about Butrans 5 core messages, patient savings cards for commercial plan patients, prior authorization for Medicaid patients and patient information booklet. Mary said that Vince, Pharmacist/Buyer, left for the day so I should come back next Tuesday as that's a good day to see him in the afternoon.
PPLPMDL0020000001	Cleveland	OH	44130	1/28/2011	Quick call with Dr Diab in hallway- I reminded Dr Diab of his commitment to start an appropriate pt on Butrans. He said he has not written it yet, but has not forgotten. He said he is waiting for the right patient to start on it & then walked into a room.
PPLPMDL0020000001	South Euclid	OH	44121	1/28/2011	Spoke to Harry F. about the stocking of Butrans. He confirmed they had all three strengths. He is a fill in pharmacist for Mitch. I explained the indication, patient type and the strengths. Had no time to discuss other details.
PPLPMDL0020000001	Westlake	OH	44145	1/28/2011	We reviewed the FPI, indication, dosing, he said that he will try it for a few patients to see how well it works for them. We reviewed the Butrans managed care and savings cards. Dr wrote for a script for a patient while I was there. He wrote a 5mcg Butrans for a female patient on 3 vicodin per day.
PPLPMDL0020000001	Mayfield Hts	OH	44124	1/28/2011	Spoke to Tina about the stocking of Butrans. They had not ordered/received a shipment. I discussed the patient type and the indication and dosing. She ordered a box of 5 and 10mcg while I was there.

	Mayfield Heights	OH	44124	1/28/2011	Discussed the Butrans indication, opioid naive and opioid experienced, boxed warning, application and contents of the box. He asked about the coverage. I explained the 3rd tier commercial coverage and the specifics of the savings cards. He said there is definitely a place for Butrans ("vs. Ryzolt"). I told him there is still a place for Ryzolt and Oxycontin. He asked that I leave all the info. Went over the product information with Michelle as she handles all the prior auth.
PPLPMDL0020000001	Cleveland	OH	44103	1/28/2011	I talked to dr about Butrans fpi,5 core messages,medication guide,instructions for use,patient information booklet,initiation/titration guide and formulary coverage for Commercial plan patients using Butrans savings cards and Medicaid patients having to go through Prior Authorization process.dr said she loves transdermal systems and prefers that over pills.dr said she only has 3 day dosing of transdermal fentanyl,so 7 day dosing of Butrans is even better.i asked dr to think of more moderate pain patients,taking 3-8 Vicodin or Percocet a day and showed initiation guide with that information and dr said that made sense and she thinks patients will really like Butrans.dr asked where Butrans was stocked? i told dr Rite Aid was autoshipped,Target,Walmart,Walgreens and some CVS pharmacies have stocked Butrans but not all,Church Square Pharmacy-dr said as long as she knows who has it,she'll send patients there as she doesnt want them waiting 24hrs for Butrans.dr said to follow-up next friday
PPLPMDL0020000001	Cleveland	OH	44109	1/28/2011	I talked to Naser,Pharmacist,about Butrans FPI,black box warning,5 core messages,medication guide,instructions for use,formulary coverage,Butrans savings cards for commercial plan patients.i asked Naser what their patient population was taking for short-acting opioids and if he thought Butrans would be an appropriate option? Naser said he has so many patients on enormous amounts of Vicodin,Percocet and tramadol,that could benefit from the 7 day dosing schedule of Butrans and he loved that Butrans was a transdermal system instead of a pill.i asked Naser who are the doctors that send majority of patients here? Naser said Dr.Celeste,Dr.Nickels,Laura Stith(NP),Dr.Shen and Dr.Daoud and a lot of MetroHealth medical center doctors-physical medicine&rehab,oncology,pain management,geriatric and internal medicine doctors.Naser wanted the Butrans patient savings cards and 5 patient information booklets and initiation/titration guide.i told Naser i would follow-up in 2 weeks post some lunches
PPLPMDL0020000001	Lakewood	OH	44107	1/28/2011	Spoke with Kim, Laura and Dr. We reviewed Butrans FPI, indication, warnings, dosing, titration, steady state, medication guide, savings program and managed care coverage. Dr thinks it is great to have another option and liked the fact it is a schedule III and he can call it in. All three of them began to start thinking and naming off patients who they think might be a good Butrans patient. Today is their last day at their Detroit office and will be in their Madison office starting Tuesday.
PPLPMDL0020000001	Cleveland	OH	44109	1/28/2011	worked oncology dept, rheumatology dept and internal medicine dept-had to leave my business card,Butrans fpi and initiation/titration guide for specific doctors in each department.Internal medicine:i have to meet w/Dr.McCreery as she see's rep's first,then will set-up lunch/meeting with Dr.Lindheim,Dr.Harrington and Dr.Falck-Ytter-see next Thursday,Feb3rd.Oncology-have to speak with Diane,to book a lunch&she only books ONE lunch per quarter and i have to call Dr.Snell,Dr.O'Brien and Dr.Hergenroeders medical secretaries to set-up individual appointments.
PPLPMDL0020000001	Cleveland	OH	44103	1/28/2011	I talked to Amy,Pharmacy Manager,about stocking of Butrans and asked Amy what strengths of Butrans did she receive in the autoshipment? Amy said only the Butrans 5mcg/hour,so i told Amy about my lunch with Dr.Boyd and Dr.Robson and showed her the Butrans initiation/titration guide and said the majority of their patients will be started on Butrans 10mcg/hour and 20mcg/hour,so can you order 1 box of each strength?Amy asked me what was the coverage for Medicaid? i told Amy that as long as dr filled out Prior Authorization form and patients met requirements,Butrans will be covered,so Amy said based on that as she has majority of Medicaid patients,she'll order the 10mcg/hr and 20mcg/hr of Butrans.i told Amy i would follow up next week after i see Dr.Robson and Dr.Boyd to see if they started any patients on Butrans,she said that would be good
PPLPMDL0020000001	Beachwood	OH	44122	1/28/2011	Introduced Butrans to Dr Yokiell, delivering 5 core messages. He asked about adhesion & adverse events, so I showed FPI 2.1 & 6.1. He asked how it compares to Duragesic. Told him I had no data to compare & reviewed appropriate pt types & presenting indication/titration guide. Also discussed application & rotation. Asked his thoughts & he said he will be prescribing it. He said he would prescribe it in opioid-naïve & opioid-experienced pts. Dr Yokiell asked about mad care coverage, so we reviewed that as well as savings cards. Also spent time with Vickie (nurse). Reviewed 5 core messages & appropriate pts as well as managed care & savings details. She said he will be writing a lot of it & asked what pharmacies are stocked- she said that many go to Hillcrest Atrium Pharmacy. I recommended that she call a pharmacy to request they order Butrans if he is considering prescribing it & she said she knows he will so she will call. She also asked that I return Tues to discuss this with Dr Barrett
PPLPMDL0020000001	Beachwood	OH	44122	1/28/2011	Spoke with Alan & introduced Butrans since he had not yet heard of it. Discussed indication, appropriate pts, seven days of buprenorphine delivery in one Butrans transdermal system, managed care, and savings program. He said he believes that Butrans is a product that will be prescribed and sees a definite place for it. I let him know that we are now actively promoting it with physicians & asked if he would order it now. He said he has to wait for a prescription, but if it is written, he will keep it stocked. He recommended I speak with Dr Podol. I gave him savings cards & told him how to go online to print additional cards & also gave him an FPI with my Spoke to Mel about the launch of Butrans. Discussed the indication, patient type, dosing, application and disposal. He asked about the onset of action. I explained that onset of action was not studied in clinical trials however detectable amounts are seen after 17 hrs. Discussed supplemental IR opioids as an option for breakthrough. He said there is a definite place for it. He asked about abuse potential. I referenced the boxed warning and reminded him that Butrans is a CII and has the potential for abuse/addiction/diversion like other opioids. I asked him to order the 5 and 10mcg. He told me to sell it and he will order it.
PPLPMDL0020000001	Richmond Heights	OH	44143	1/28/2011	Spoke with Sharon (technician) & confirmed that this location received their auto-ship of Butrans. She said they have the 5mcg & 10mcg strengths. Reviewed indication & dosing. Sharon suggested I speak with Dr Yokiell & I let her know that I had just done that & that he indicated that he will be prescribing it. Left my card and let them know I would be available to answer any questions.
PPLPMDL0020000001	BEACHWOOD	OH	44122	1/28/2011	We reviewed the Butrans FPI, indication, dosing, conversions, renal and hepatic impaired patients. Dr said he is very interested to see how it works. He said that he likes to prescribe long acting opioids and prescribes a lot of Methadone. He is surprised at how low the buprenorphine dose is. We reviewed the conversion guide and the types of patients who might be a good patient for Butrans. He was also concerned with managed care and said about 40% of his patients are Med D. I reviewed the savings cards and managed care. I spoke with Tina, she is the one who does all of the PAs and gets call backs. I reviewed the savings cards and managed care for her. She would like a formulary grid.
PPLPMDL0020000001	Berea	OH	44017	1/28/2011	Quick follow up, I asked Dr if he had any questions or needed additional information to prescribe. He said he has all set. He put some of the savings cards under the skeleton but Shirley thought it would be a good idea to leave some in the sample closet by the flector and lidoderm information as well. I reviewed the patient medication guide and Shirley.
PPLPMDL0020000001	Lyndhurst	OH	44124	1/28/2011	Spoke to Dr. Reed's NPs, Patricia and Karen. Discussed the indication, patient type, dosing, clinical trials in opioid naive and opioid experienced, application and disposal. Patricia asked about side effects compared to other opioids. I reviewed the AE's per the FPI. I explained the conversion from hydrocodone and that patients taking higher doses may not be appropriate for Butrans. Karen asked if the patch could be cut. I told her no and only one patch should be used at a time. Asked them to prescribe Butrans for commercial plans for the best success. Reminded them that patients should receive a savings card and which pharmacies in the area are stocked. Karen said they have already written a script for Butrans.
PPLPMDL0020000001	Lyndhurst	OH	44124	1/28/2011	Doc said she already tried a patient on Butrans. She had a different patient in mind but he turned out to be on too high a dose of percocet and came in the office in crisis. She tried another patient instead. I had no time to find out about what the patient was on but she previously stated that she would prescribe for opioid experienced patients.
PPLPMDL0020000001	Cleveland	OH	44103	1/28/2011	I talked to dr about Butrans fpi,5 core messages,medication guide,instructions for use,initiation guide,patient information booklet,formulary coverage for Medicaid patients.dr said a transdermal,once weekly formulation,is much easier for his patients than dosing around the clock Vicodin or Percocet and he would love to decrease those medications he's prescribing and try Butrans in some patients.biggest concern was insurance coverage for Medicaid patients,we talked about requirements for Prior Authorization process for Medicaid patients so dr said he'll try it in a few patients and see how patients do on medication.I asked dr to think of 2 patients on 3-8 Vicodin or Percocet a day and starting them on Butrans 10mcg/hour,after proper tapering to that 30mg oral morphine equivalent dose,dr agreed.discussed Butrans REMS and told dr when patients are above 80mg oral morphine,OxyContin is an appropriate option and available on Medicaid for \$2.00 and recommended Senokot-S
PPLPMDL0020000001	Lyndhurst	OH	44124	1/28/2011	Spoke to Dr. Reed's NPs, Patricia and Karen. Discussed the indication, patient type, dosing, clinical trials in opioid naive and opioid experienced, application and disposal. Patricia asked about side effects compared to other opioids. I reviewed the AE's per the FPI. I explained the conversion from hydrocodone and that patients taking higher doses may not be appropriate for Butrans. Karen asked if the patch could be cut. I told her no and only one patch should be used at a time. Asked them to prescribe Butrans for commercial plans for the best success. Reminded them that patients should receive a savings card and which pharmacies in the area are stocked. Karen said they have already written a script for Butrans.
PPLPMDL0020000001	Bedford	OH	44146	1/31/2011	Introduced Butrans to Dr Haddad. Reviewed 5 core messages & discussed black box warning. I asked whether he would be more likely to prescribe Butrans for a patient who was opioid-experienced or opioid-naïve & he said he really wasn't sure because he wanted more time to review the information. I asked if there were any questions he had in particular & he asked how it compares with Duragesic. I told him we have not data comparing the two. Told him that Butrans is a transdermal form of buprenorphine- once every seven days. Presented initiation guide & asked him to think of more "moderate" chronic pain pts & showed how to initiate treatment in either opioid-naïve or opioid-experienced pts. He said he needed more time to go over the information because it was so new to him. I asked when I could come in & he said to let Halley & Roberta know that he told me to come in on a Wed around noon to discuss further-Spoke with staff to set this up. Also OxyContin reminder 7 tablet strengths.
PPLPMDL0020000001	Sagamore Hills	OH	44067	1/31/2011	Spoke with Kate & reviewed Butrans core messages, appropriate patients, initiating treatment, dosing. Asked if they had ordered Butrans as committed during my last visit. She said they did not have it in stock. I let her know that we have started speaking with local physicians about Butrans & that they are asking where they can send their patients to get their prescription filled & asked if she could place an order for one box of each strength so that they could be included in that list of locations. She said that because of inventory constraints, they are only ordering medications after a prescription comes in. Discussed e-voucher and patient co-pay.
PPLPMDL0020000001	Maple Heights	OH	44137	1/31/2011	Introduced Butrans to Dr Yager & reviewed 5 core messages & box warning. He said he was thinking of two pts who may be appropriate for Butrans- one older pt which chronic pain & one younger pt who has had multiple surgeries, still has pain, & is taking 400mg tramadol/day. Presented initiation guide & showed him how to determine appropriate starting dose for those pts, including taper. Also showed FPI 2.4 regarding supplemental analgesia. He asked about adverse events so I showed FPI 6.1. He also asked how buprenorphine worked so I showed 12.1. He said he really does not like to prescribe opioids at all, but will if he feels they are truly warranted. Asked him to be just as cautious in prescribing Butrans. Reviewed managed care coverage & savings program. Asked if he would initiate treatment with Butrans in the appropriate pt such as the two he had mentioned & he said he would definitely prescribe it when the appropriate pt comes in. OxyContin reminder 7 tablet strengths.
PPLPMDL0020000001	Cleveland	OH	44109	1/31/2011	I talked to Raban,Pharmacist,about Butrans fpi,5 core messages,Butrans medication guide,patient information booklet,initiation guide and Butrans savings cards and formulary coverage for workers comp and medicaid patients.Raban said the once weekly dosing and transdermal application were both benefits, in his eyes,because they have so many patients just popping pills and Raban thinks a transdermal delivery system will help them get their Vicodin,Percocet supplies down,but I need to follow-up with Ray,Pharmacy manager,to discuss Butrans and stocking of all dosage strengths. I told Raban I would follow-up tomorrow with Ray and discuss Butrans.
PPLPMDL0020000001	Cleveland	OH	44109	1/31/2011	I talked to dr about Butrans fpi,black box warning,5 core messages,medication guide,patient information booklet and formulary coverage.dr asked what medicaid and workers comp coverage was like as thats a majority of their patients with some commercial plan patients-so i addressed each one and showed dr Butrans savings cards for commercial plan patients.dr said once weekly dosing is much easier for patients than taking pills around the clock and transdermal is a great option for her patients.i asked dr if she has 1 or 2 patients taking 3-8 tabs of Vicodin a day? dr said yes she does,so i asked her to think of those 2 patients with commercial insurance or workers comp that she can start on Butrans 10mcg/hour and get some clinical experience.dr agreed and i said that i would follow-up on friday,feb4th,at our lunch to see if she started those 2 patients on Butrans
PPLPMDL0020000001	Cleveland	OH	44109	1/31/2011	worked physical medicine&rehab dept-talked to Dr.Harris,Dr.Huang and Dr.Kermit Fox (was fellow,now attending)about Butrans-see call notes,left business card,Butrans fpi,initiation guide and patient information booklet for Dr.Lindheim (internal med director),Dr.Harrington and Dr.Falck-Ytter as i couldnt see them today in internal med dept.left business card,Butrans fpi,initiation guide for Diane Wolfe,Nurse Supervisor,Oncology out-patient center-so have to follow-up with her too.
PPLPMDL0020000001	Lakewood	OH	44107	1/31/2011	We reviewed the 5 key points about Butrans. He would like to look at the information further on his own to decide if Butrans will have a place in his practice.
PPLPMDL0020000001	Maple Heights	OH	44137	1/31/2011	Spoke with Alan briefly & introduced Butrans. Also verified that they do have it stocked. He checked his shelves & said he has both the 5mcg & 10mcg. He asked who I have spoken with in the area & recommended that I go see Dr. Moufawad, so I let him know that I have an appointment with him this week. Alan then had to go to answer a phone call. Let him know I would check back in.
PPLPMDL0020000001					

	Richmond Heights	OH	44143	1/31/2011	SPoke to Judy and doc about the Butrans indication, patient type - opioid naive and experienced patients(I.e. low back and OA). She first wanted to know about coverage. I explained the 3rd tier plans and how the savings cards work. She wanted confirmation of no required PAs. Explained that aAenta may require. Discussed the 7 day wear, application and disposal, conversion dose from other opioids as thats where she would prescribe. She said she does not have experience using buprenorphine for pain so she would have to read the info.
PPLPMDL0020000001					
PPLPMDL0020000001	Westlake	OH	44145	1/31/2011	We reviewed the Butrans FPI, indication, dosing, conversions. She said that she has a patient on suboxone who she would like to convert to Butrans for chronic pain. She understood that Butrans is only indicated for chronic
	Cleveland	OH	44195	1/31/2011	i talked to dr about Butrans fpi,black box warning,5 core messages,medication guide,instructions for use,patient savings cards and formulary coverage for commercial plan and Medicaid patients. Dr said he knows about buprenorphine as he used to prescribe it in the United Kingdom years ago,so its an old but underutilized opioid medication.Dr said he doesnt see patients in the out-patient center anymore,as he's only in-patient and gives lectures but would be interested in looking through the entire fpi on his own.dr asked how many clinical trials Purdue did for Butrans approval and in what disease states? i showed dr Butrans fpi,section 14,clinical studies and dr said he wasnt sure what place Butrans has in hospital now as it seems to be mainly out-patient needs for patients but perhaps in future there could be a place for Butrans in hospital.i asked dr what clinical benefits he saw in Butrans? dr said once weekly dosing and transdermal were significant benefits for patients.
PPLPMDL0020000001					
PPLPMDL0020000001	Lakewood	OH	44107	1/31/2011	We reviewed the Butrans FPI and 5 key points. She will look further at the info and will also see what Dr Nageeb said of it.
	Cleveland	OH	44195	1/31/2011	worked Physical Medicine&Rehabilitation department-met with Rebecca,medical secretary to Dr.Hou and Dr.Jedlicka and left Butrans fpi,patient information booklet and initiation/titration guide,as Rebecca said she has to give all of the information to doctors for review and they will tell her if they want to meet with me for an appointment. worked Chronic pain&rehabilitation department-left Benita,Medical secretary,butrans patient information booklets for Dr.Covington, Dr.Matthews, Joan,NP,JoAnne,NP and Mary,NP.
PPLPMDL0020000001					
	Cleveland	OH	44195	1/31/2011	worked Tausig Cancer Center - met Ellie Wegerf,med sect,for Dr.Pelley and Dr.Horwitz,i had to leave Butrans fpi,initiation/titration guide,patient information booklet and my business card for each doctor and Ellie will talk to doctors about meeting with me. Met Selina Sledge,med sect,for Dr.Adelstein and Dr.Rodriguez,she took Butrans fpi's,initiation guides and patient information booklets with my card and said that she is sure the doctors will want to meet with me as they have so many patients who call them for short-acting opioids,as they finish chemo/radiation and are still in pain months later so she see's a huge place for Butrans in their patient population.
PPLPMDL0020000001					
	Cleveland	OH	44195	1/31/2011	i talked to dr about Butrans fpi,black box warning and dr said he doesnt feel Butrans has any place for his patients he deals with urological/gynecological cancer pain patients and he has patients on long-acting,sustained release opioids like OxyContin,Morphine and once a year he'll prescribe Duragesic.i asked dr if he was thinking of "severe" pain patients,as i showed him Butrans indication and asked if he had more "moderate" pain patients and showed Butrans initiation/titration guide with "opioid experienced" patients dosage strengths and dr said no not really and he wouldnt taper his patients off long-acting opioids to a 10mcg/hour Butrans,titrating to a 20mcg/hour because eventually they will all have to be on long-acting oxycodone or morphine.dr said this is for specific patients,more moderate pain and someone who likes transdermal applications.i left my business card and thanked dr for his time.
PPLPMDL0020000001					
	Macedonia	OH	44056	1/31/2011	Introduced Butrans & reviewed 5 core messages & discussed box warning. Asked what pt type she was thinking of & she said opioid-experienced, but she would also consider for opioid-naive pts. Went through initiation guide & explained taper for pts taking more than 30mg equivalent oral morphine per day. She said because of this she may at least start out with patients who's daily dose was closer to the 30mg end of the range. Also discussed abuse & addiction potential & CII classification. Went through medication guide & discussed titration, application, rotation, disposal, & adhesion. She asked about managed care-I let her know that Medicaid & Med Part D plans will require prior authorization, but most commercial plans cover Butrans at tier 3. Also went over savings cards & let her know that commercial insurance pts can obtain Butrans for \$15-\$20 co-pay. Asked if she had one or two pts she was thinking of for Butrans & she said she would try it on the next appropriate pt.
PPLPMDL0020000001					
	Solon	OH	44139	1/31/2011	Dr Zaidi remembered our prior conversation about Butrans & asked me if pts can continue other pain medications while on Butrans-I showed FPI 2.4. He asked how they can stay on an opioid, considering buprenorphine's property of binding so tightly- he asked if this could precipitate withdrawal. I told him I had no data about that & suggested we contact Medical Services. He said he did not want to. I asked what type of pt he was thinking of for Butrans & he said opioid-experienced. Presented initiation guide & discussed how to initiate treatment in opioid-experienced pts, including tapering current dose to 30mg morphine equivalent. He asked if doing so would cause withdrawal-I told him that was the recommendation in FPI. He said he believes tapering would cause a pt to be in too much pain so I asked him to think of pts who's current morphine equivalent dose was on the lower side of the 30-80mg range. He said he would try Butrans on opioid-naive pts until his withdrawal question is answered.
PPLPMDL0020000001					
	Cleveland	OH	44195	1/31/2011	i talked to Curt,Pharmacy Manager,about Butrans fpi,black box warning,5 core messages,medication guide,instructions for use in fpi,patient information booklet,formulary coverage for commercial plan patients using Butrans savings cards and Medicaid patients going through Prior Authorization process.Curt was shocked that Butrans is a once weekly transdermal application and that patients using the Butrans savings cards pay \$15 out of pocket,with up to \$40 covered on co-pay,saying this was a great deal for a branded medication. Curt said he would order the max quantity of each Butrans dosage strength today,so left rebate form,patient information booklets and 2 packs of Butrans savings cards as Curt wanted to have some in pharmacy until i can work with Purdue,the vendor and Sabrina,at Cleve Clinic,on the electronic voucher program-left Butrans #863889 and #863862 and told Curt i would follow-up in a few weeks to see if any Butrans scripts have come through his pharmacy.
PPLPMDL0020000001					
	Cleveland	OH	44109	1/31/2011	i talked to dr about Butrans fpi,black box warning,5 core messages,medication guide,instructions for use,patient information booklet and Butrans patient savings cards.dr said once weekly dosing is a great option for patients who he has concerns with them not being compliant with their oral dosing regimen around the clock so this would definitely be more convenient.dr said transdermal is a good option for these patients too and his patients who have a hard time swallowing pills.dr asked about insurance coverage for workers comp and medicaid so we discussed both of those and also commercial plan patients using Butrans savings cards.i asked if dr could think of a patient this week taking 3-8 tablets of Vicodin or Percocet,that he could start on Butrans 10mcg/hour and dr said yes he could and that i can follow up next week as he is out of town this Thursday-Sunday in Florida,so i told him i would work with the nurses to be sure there are enough patient information booklets
PPLPMDL0020000001					
	Independence	OH	44131	1/31/2011	Quick call again with Dr Jack in the hallway. He apologized again for not having reviewed the Butrans information. Reminded him of indication, dosing, & seven days of buprenorphine delivery in one application. He asked me for another FPI which i gave him. He said he would have free time tomorrow & promised he would review the information. Attempted to schedule a lunch or breakfast appointment but Maria said she was too busy to do that
PPLPMDL0020000001					
	Beachwood	OH	44122	2/1/2011	Spoke with Vickie to follow up on the Butrans discussion i had with her & Dr Yokiel. I asked if he had prescribed it yet & she said no. She said that she really wants him to start prescribing it because it seems like something that could really benefit some of their patients. Reminded her of appropriate patient types. She said that she is certain he will start prescribing it, it will just take a little time to "train" him to think of it. Let her know i would return again for follow-up.
PPLPMDL0020000001					
	Maple Heights	OH	44137	2/1/2011	Spoke with Kim to follow up on Butrans conversation. Asked her to confirm that they did receive Butrans & have it stocked. She checked their shelf & said they have one box of 5mcg/hr & one box of 10mcg/hr. I reminded her of the e-voucher & asked what additional questions she had. She said she had none. I reminded her of indication & appropriate patients.
PPLPMDL0020000001					
	Euclid	OH	44132	2/1/2011	Window Call.....introduced doc to Butrans, the indication, positioning, 3 strengths and 7 day application. He thought it sounded like a great product and would like to hear more. Scheduled lunch for 2/15/11. He asked about stocking - I explained that many area pharmacies will have it in stock. Reminded him of the oxycotin and ryzolt patient type and BWC coverage .
PPLPMDL0020000001					
	Cleveland	OH	44113	2/1/2011	worked pain management and physical medicine&rehabilitation dept-see call notes on Dr Shen and Dale Novak,PA
PPLPMDL0020000001					
	Cleveland	OH	44109	2/1/2011	i talked to Ray,Pharmacist,and found out Raban IS the Pharmacy Manager,so it was good i shared all of Butrans fpi with him yesterday.i talked to Ray about Butrans fpi,black box warning, 5 core messages,medication guide,patient instruction booklet and Butrans savings cards and asked if Ray and Raban,Pharmacy Manager,would order Butrans-all 3 dosage strengths and he said yes they would.Ray said once weekly dosing and transdermal application is much better for patients than getting 100 plus tabs a month of Vicodin or Percocet,so he's interested to see who starts prescribing Butrans.we talked about formulary coverage for Butrans and commercial plan patients using Butrans savings cards and i asked if i could follow-up in 2 weeks to see if any scripts have come through yet for Butrans and Ray said that would be fine.
PPLPMDL0020000001					
	Independence	OH	44131	2/1/2011	Spoke with Dr Faيمان's MA & substitute nurse regarding setting up an appointment with Dr Faيمان to discuss Butrans. They said that he sometimes will see some reps, but it has to be cleared & approved through him. I let them know the Butrans indication & they said that he does have patients who fit that indication so he may want to meet with me, especially if he has not heard of Butrans yet. I left my card & they said they would put a note on it to see if he would allow me to schedule a time to come in.
PPLPMDL0020000001					
	LAKEWOOD	OH	44107	2/1/2011	Spoke with Pam, we reviewed the Butrans FPI, indication, dosing, medication guide. She did have the 5 and 10mcg doses in stock. They do see scripts from Dr DSilva, Nageeb, Orra. Reminder about OxyContin as a option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001					
	Westlake	OH	44145	2/1/2011	Dr Kabarra said that he would like to start prescribing Butrans in house and then maintain the patients after. He said that managed care is important at first and he wants it to be very simple for the patients. We reviewed the managed care and pharmacies where it is stocked. He said that he would like to get Butrans on formulary at the hospital.
PPLPMDL0020000001					
	Lakewood	OH	44107	2/1/2011	We reviewed the Butrans 5 key points. We reviewed the FPI and initiation guide. Dr said that he sees a lot of patients on vicodin and we discussed some of the patients who might be appropriate for Butrans. He said he would try Butrans but could not think of a specific patient. We reviewed managed care and the savings program. We discussed OxyContin as an option where Butrans may not provide adequate analgesia. I discussed the Butrans medication guide and savings program with the staff.
PPLPMDL0020000001					
	Westlake	OH	44145	2/1/2011	Spoke with Megan MA and Jenny RN. We reviewed Butrans 5 key points. I followed up with the patient that Dr Raslan wrote a script for on Friday. She said that the patient called yesterday (Monday) and had not yet filled the script but was going to fill it that day. Megan said they would call the patient in a few days to make sure they were able to initiate Butrans properly.
PPLPMDL0020000001					
	Warrensville Heights	OH	44122	2/1/2011	Stopped in and spoke with Jackie & Debbie regarding Butrans follow-up. They said Dr Shin has written Butrans. They said they have not heard any feedback yet, but that they have had no issues so far with coverage or finding it at pharmacies. Asked them to please keep me informed and updated with Butrans & let them know i would return to follow up again.
PPLPMDL0020000001					
	Cleveland	OH	44106	2/1/2011	worked oncology dept-left information for Dr.Silveran,Dr.Dowlati,Dr.Okolie and some other oncologists in dept,was told to try calling frank,Nurse supervisor,to set-up meeting with him and discuss products,patient education tools,etc..
PPLPMDL0020000001					
	Cleveland	OH	44113	2/1/2011	i talked to dr about Butrans fpi,black box warning,5 core messages,medication guide,instructions for use,patient information booklet,patient savings cards for commercial plan patients and Butrans REMS. I asked dr who he thought could benefit from Butrans,in his practice, and dr said he has a lot of patients on Vicodin and Percocet,that are dosing around the clock and more of that moderate pain so he would think of Butrans for them and see what clinical results they get from Butrans.i showed dr Butrans initiation guide,for opioid experienced patients and said 3-8 tabs of Vicodin a day is considered opioid experienced and that would be the patient you could start on Butrans,its that feasible for you to try Butrans in one patient? dr agreed saying that was fair and he would probably start a few patients to see the results.dr asked about medicaid and workers comp patients getting Butrans so we discussed formulary coverage on these plans,told dr i would follow-up next week
PPLPMDL0020000001					
	Bedford	OH	44146	2/1/2011	Spoke with Ebony briefly. She checked her system & shelf & verified that they do have Butrans in stock. She said they have one box each of 5mcg/hr & 10mcg/hr. Reminded her that Butrans is part of the e-voucher program. Let her know i would return for follow-up when she has more time.
PPLPMDL0020000001					
	Cleveland	OH	44113	2/1/2011	i talked to dr about Butrans fpi,5 core messages,medication guide,instructions for use,patient information booklet and patient savings cards.dr said the once weekly dosing and transdermal application were both benefits to patients but she has so many patients taking 3-8 tabs of Vicodin and Percocet that they won't be happy with her if she introduced something new let alone a patch.dr said majority of her patients rely on pills q4-6h and its a mental thing so they would be nervous if this medication would control their pain over course of week.dr asked if patients could take short-acting opioids while on Butrans.i said yes patients can take opioid or non-opioid medications during Butrans therapy and showed Butrans fpi with this information.i asked if dr could think of 1 patient who has workers comp,Anthem or Medco insurance where she felt their 3-8 tabs of Vicodin or Percocet werent working and perhaps Butrans could be an appropriate option? dr said she might
PPLPMDL0020000001					

PPLPMDL0020000001	Cleveland	OH	44114	2/1/2011	i talked to Laura,Pharmacist,about stocking of Butrans and she hadnt ordered any yet,as she was waiting to see a script first.i told Laura i had lunch with Dr.Boyd,Dr.Robson and Dr.Shen and all of them asked me who has this in stock and dont want patients waiting 24hrs to get Butrans,based on this conversation,Laura said she'll order all 3 dosage strengths of Butrans and i told her after my lunch with Dr.Katz,Dr.Marshall and John Stare,Physician Assistant on 2/14/11,i will stop and see her to be sure she has Butrans stocked,she agreed to this.i also gave Laura Butrans initiation/titration guide and patient information booklets.
	Cleveland	OH	44102	2/1/2011	i talked to Vince,Pharmacist,about Butrans fpi,5 core messages,medication guide,instructions for use,patient information booklet,butrans savings cards for commercial plan patients and formulary coverage for workers comp patients and Medicaid patients.Vince said once weekly dosing in a transdermal application is ideal instead of all the Vicodin and Percocet pills he's dispensing monthly to patients so he thinks there's a place for Butrans and we talked about more of the moderate pain patients starting on Butrans.i asked if he had any doctors in the area writing a lot of Vicodin and Percocet that i should talk to and Vince said Dr.Celeste,Dr.Talbot and Dr.Caron are the biggest prescribers but there are a lot of doctors from Metro hospital and Dr.Van Aukun writes a lot of short-acting opioids,so i told Vince i was working with all of them and would be sure they know of Butrans.i gave Vince the Butrans initiation guide and patient information booklet and Vince said i should leave a couple
PPLPMDL0020000001	Cleveland	OH	44113	2/1/2011	i talked to dr about Butrans fpi,black box warning,5 core messages,medication guide,instructions for use,patient information booklet,initiation guide and patient savings cards for commercial plan patients.dr said once weekly dosing and transdermal is a great option for his patients that he has dosing 4q-6h Vicodin or Percocet,as he doesnt like them popping pills all day/night so a transdermal is ideal in his mind. i asked dr if he could think of 2 patients that meet the indication for Butrans and are taking 3-8 tabs of Vicodin or Percocet that he could initiate treatment of Butrans 10mcg/hour? dr agreed saying he has a lot of those patients but will try Butrans in a couple people and let me know what happens.dr asked about Medicaid and workers comp patients so i explained coverage for these plans. i asked dr if i could follow-up in a week and see how things are going with patients getting started on Butrans,dr said that was fine
	BEDFORD	OH	44146	2/1/2011	Quick call- floater pharmacist was in & i was told she was too busy to speak with me. Confirmed with the technician that they do have Butrans in stock. She said they received one box each of 5mcg/hr & 10mcg/hr systems. Discussed e-voucher.
PPLPMDL0020000001	Cleveland	OH	44103	2/1/2011	i talked to dr about Butrans fpi,black box warning,5 core messages,medication guide,instructions for use,patient information booklet,initiation guide and patient savings cards for commercial plan patients.dr asked about workers comp and Medicaid coverage for Butrans so we discussed details for those patients.dr said he likes that Butrans is a once weekly dosing option and is transdermal as he has too many patients taking too many pills,so transdermal is ideal in his eyes. i asked if dr could think of 2 patients who are taking 3-8 tablets of Vicodin or Percocet this week,and taper them to 30mg oral morphine and start them on Butrans 10mcg/hour? dr agreed and i asked if i could follow-up end of week? dr said stop back next week
	Warrensville Heights	OH	44122	2/1/2011	Introduced Butrans to Dr Khalafi, delivering 5 core messages & reviewing box warning. I asked what patient type he would be more likely to prescribe Butrans for. He said he would use Butrans in opioid-naïve or opioid-experienced patients. Presented initiation guide & showed him how to initiate Butrans therapy with either patient type. He said he would prefer his patients be on a Butrans transdermal system than "pills all day". Reminded him that Butrans is not for everyone & reminded him of OxyContin for appropriate pts. He asked what managed care coverage was for Butrans. Discussed prior authorization for Medicare/Medicaid & commercial tier 3 status. Also explained savings cards for commercial insurance & cash pts. He said he would try Butrans on some patients & then walked away to see patients. Spoke with Iuliana & told her Butrans indication, dosing, & savings information. Also gave her initiation guide & let her & Debbie know i would be returning to follow up regarding Butrans.
PPLPMDL0020000001	Cleveland	OH	44113	2/1/2011	i talked to Dale about Butrans fpi,5 core messages,medication guide,instructions for use,patient information booklet,initiation guide and Butrans patient savings cards.Dale said once weekly dosing is much easier than short-acting opioids dosed around the clock and a transdermal application is ideal but the patients he treats for Dr.Shen are a tough patient population as majority of them like and expect to get their pills monthly,90-130 tabs a month of Vicodin or Percocet,so these patients may not want to get off their pills and try a patch.i asked Dale if he had 1 patient in mind who was taking 3-8 tabs of Vicodin or Percocet,that meets the indication,but is interested in a transdermal,once weekly dosing option? Dale said yes maybe 1 or 2 patients he'll have to think about it and we discussed formulary coverage for commercial plan patients,workers comp and Medicaid patients.
	Westlake Independence	OH	44145	2/1/2011	Spoke with Lisa, we reviewed Butrans as an option and she did not have any questions about it. She said that she would not order until a script comes in.
PPLPMDL0020000001	Westlake Independence	OH	44131	2/2/2011	Spoke with JT and followed up on Butrans stocking. He said that he still has them on his shelf. I let him know that i have started promoting Butrans in the area & that their location is one of the pharmacies i have told the offices are stocking Butrans. He asked if i was calling on Drs Jack & Robert Rutkowski- i told him that i am, but have not had enough time with either of them yet to really have a good discussion about Butrans. He said that he thinks if they "get on board", that Butrans will do very well. I let him know that i will continue trying. Initiation reminder for appropriate patients.
		OH	44144	2/2/2011	Dr Miguel was not in as scheduled due to snow/ice storm, so i spoke with MA Stephanie about Butrans indication, appropriate patients, and savings information. She said that she can think of several patients of Dr Miguel's that sound like they may be appropriate patients for Butrans. Also reviewed OxyContin savings cards which she said she had just given to a patient within the last week.
PPLPMDL0020000001	Brooklyn	OH	44144	2/2/2011	Introduced myself & Butrans to Debbie (pharmacist). She verified that they had, in fact, received two boxes of each strength of Butrans. I reviewed with her indication, appropriate patients, dosing, initiation of treatment. I asked what additional questions she had, but she said she had none. I asked who in the area she would recommend me call on or who would be interested in Butrans & she recommended Dr Zaidi. She said he was the only one she could think of. Let her know i would be following up to ensure everything was running smoothly with Butrans transactions.
	Solon	OH	44139	2/2/2011	Introduced myself & Butrans to Eve. She said that she had noticed that they received it, but she wasn't sure what it was. I reviewed with her the indication, appropriate patient types, medication guide & dosing. Also discussed CIII, abuse potential. She said that she thinks it is great to have something to replace Vicodin for the appropriate patients & that she would like to have to carry less of a supply of Vicodin & Percocet. Let her know i would be following up with her to make sure everything was going through smoothly & to see if they had any questions.
PPLPMDL0020000001	Macedonia	OH	44056	2/2/2011	Window call.....asked doc what success he has had with Butrans this week. He said he has not had a chance yet. I reminded him that he prescribe for opioid naïve or those on low dose vicodin. He just said ok. Asked him to give patients a savings card.
		OH	44124	2/2/2011	Introduced Butrans to Ellen- reviewed indication, once every seven day application, CIII, dosing, appropriate patients. I asked if she would place an order so that she has it ready when patients come in with prescriptions but she said she will not order new product without a prescription. Asked if she would order just one box of 5mcg & 10mcg doses since they are the starting doses, but she still said no.
PPLPMDL0020000001	Solon	OH	44139	2/2/2011	Brief call to introduce Butrans. Discussed the indication, positioning, 7 day application, CIII status. She had to leave for the hospital but said she would review the info later. Left FPI and initiation guide.
	Mayfield Heights	OH	44124	2/2/2011	Quick call.....introduced doc to Butrans by discussing the indication, positioning, 7 day application and CIII status. She asked about coverage. I explained commercial status and the savings cards. She asked how it differs from fentanyl. I explained the different molecules and the 7 application of Butrans. She asked me to leave information. Left FPI.
PPLPMDL0020000001	Brooklyn	OH	44144	2/2/2011	Quick call with Dr Detwiler. Butrans indication & seven days of buprenorphine in one application messages. He said he would like to discuss it further at a lunch. He said he was trying to get finished with his patients so that he could get out of the office early today. I reminded him of OxyContin savings cards as well. Also spoke with Tiffany about Butrans indication & OxyContin savings cards.
	Mayfield Heights	OH	44124	2/2/2011	Discussed the Butrans indication, positioning, dosing, trials in opioid naïve and experienced patients, application/disposal. She wanted to know about the cost/coverage. I went over the commercial coverage, 3rd tier and, savings cards program. She was excited and was glad that there are more options. She also liked the idea of 7 day application. She said she definitely has patients that would be appropriate. Reminded her of the ryzolt and oxycontin patient types.
PPLPMDL0020000001	Lakewood	OH	44107	2/2/2011	We reviewed the Butrans FPI, indication, warnings, dosing. He said that will not prescribes more than 4 short acting opioids per day for patients. If patients are still needing more pain relief, he will convert them to a long acting. He thinks that Butrans will be a great option for these patients and he said he would like to try in in the next week. He would be more likely to prescribes Butrans for a patient already on opioids. He said he likes that it is a once a week dose. I reviewed managed care and the Butrans savings program. I also reviewed this with his MA Dawn. We discussed OxyContin for patients when Butrans may not provide adequate analgesia, he said he does have many patients who are past the point of Butrans and would be more appropriate for OxyContin instead.
	Mayfield Heights	OH	44124	2/2/2011	Spoke to Shirsha about the launch and stocking of Butrans. i discussed the patient positioning. Asked her if she received a shipment of butrans. She looked and confirmed the 5 and 10mcg boxes. i explained the savings card program and the participation in Relay health.
PPLPMDL0020000001	Cleveland	OH	44109	2/2/2011	worked oncology dept-left business card,Butrans FPI and initiation/titration guide for Butrans for Dr.Snell,Dr.Wagamon and Dr.Hergenroeder as you have to have an individual appointment with each doctor so i had to leave this information in the out-patient center and Debbie,front desk receptionist,said she'll pass the info to the medical secretaries.Diane Wolfe,Nurse Supervisor in Oncology,wasnt available to see me today but did get Butrans fpi and is going to call me for an appointment.Worked Neurology dept-out-patient center-had to leave business card and Butrans fpi and initiation guide for Dr.Hanna(Chairman of dept) and Dr.Winkelman as Ruth Hassig,medical secretary for Neurology dept said policies havent changed with doctors,no appointments unless they call me,no lunches,etc..Worked Rheumatology dept-left Butrans fpi and initiation guides for Dr.Khan,Dr.Ballou and receptionist said to stop back friday about booking a lunch with attendings and residents
	Bedford	OH	44146	2/2/2011	Reviewed 5 core Butrans messages. He asked how it is dosed & where pts should apply Butrans. Reviewed pt information book & initiation/titration guide. He asked if he could have a pt wear one 5mcg & one 10mcg system at the same time to achieve a 15mcg/hr dose. I told him we have no data studying use like that & that we recommend that only one Butrans be worn at a time. He said he understood. He asked what plasma concentration was over the week, so i reviewed FPI 12.3. He asked if it was a reservoir system-I told him it was not & that it is an adhesive matrix & showed FPI 11. Also reviewed 5.4 regarding QTc interval prolongation incr risk with doses 2 x 20mcg/hr. He said he felt that Butrans is less addictive than other opioids. I insisted Butrans carries all same risks as other opioids with respect to abuse/addiction potential. He asked about managed care coverage- reviewed savings information & prior-auth which Amber said she does. Dr M said he would Rx Butrans instead of Vicoden ATC
PPLPMDL0020000001	Cleveland	OH	44114	2/2/2011	i asked dr if we could talk about a product that is an addition to our pain management portfollo and dr said if its new,i had to wait until lunch as she didnt have sufficient amount of time to talk to me about it today,dr asked what was the name of the product so i told her Butrans and 5 core messages. dr was very interested and said when i have lunch 2/14/11 we can talk about it in depth as she has patients in mind already because so many patients are taking Vicodin and Percocet around the clock and not compliant with dosing regimen and still complain of being in pain.i asked dr to consider OxyContin for those patients on 80mg or more of oral morphine equivalent,with 7 tablet strengths available for dosing flexibility and its available to her commercial plan patients,medicaid and workers comp patients.recommended Senokot-S
	Cleveland	OH	44120	2/2/2011	i talked to dr about Butrans fpi,Score messages,medication guide,instructions for use,patient information booklet and formulary coverage as dr asked about Medicaid coverage for Butrans,biggest patient population here,so i explained Prior Authorization process for those patients to get Butrans.i asked dr what clinical benefits she saw in Butrans? dr said the once weekly dosing and transdermal application is significant as she doesnt like giving so many pills a month of Vicodin and Percocet so this is a good option as long as patients can get it.i asked dr to consider 1 patient,taking 3-8 tabs of Vicodin or Percocet a day to try Butrans in and i will follow-up next week to see how things are going,dr agreed and i recommended OxyContin as an option for patients taking greater than 80mg oral morphine equivalent and gave conversion guide.recommended Senokot-S
PPLPMDL0020000001	Mayfield Hts	OH	44124	2/2/2011	Introduced doc to Butrans - indication, positioning, dosing, boxed warning, application/disposal. He said he heard something about it and he heard from Warren at the Atrium pharmacy. I told him that he ordered Butrans. He asked about AE's, referred to that section of the FPI. He was concerned about coverage. I reviewed the coverage and the savings cards program. He said he would likely use for opioid naïve patients. He asked about the delivery system. I explained it was matrix. He wanted to know about the clinical trials and steady state. I went over the 4 trials and explained the steady state after 72 hrs. He liked the idea of Butrans as there is nothing like it. He wrote a script while i was there....for a medicare patient with supplemental insurance. Reminded him that a PA may be required. He said he would just see if it goes through. Oxycontin and ryzolt patient reminders.

PPLPMDL0020000001	Cleveland	OH	44114	2/2/2011	i talked to dr about Butrans fpi,5 core messages,medication guide,instructions for use,patient information booklet,initiation guide and formulary coverage for workers comp,Medicaid patients and commercial plan patients being able to use the Butrans patient savings cards.dr said transdermal application and once weekly delivery are huge benefits in his eyes as he struggles with giving so much short-acting medication to patients.dr said he has a few patients in mind who cant swallow pills and this would be a great option for them too.i asked dr to focus on more moderate pain patients,taking 3-8 Vicodin or Percocet a day,and starting them on Butrans 10mcg/hour.dr agreed and said to check in with him next week.i asked dr to consider OxyContin,once patients are taking 80mg oral morphine equivalent and with 7 tablet strengths he had flexibility in dosing for patients and we discussed formulary coverage for OxyContin.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44104	2/2/2011	dr didnt have time to discuss a product,like Butrans,as he asked if it was "new"? i told dr we hadnt discussed Butrans in the past as its an addition to Purdue's pain management portfolio,so dr asked if we could talk about it more in depth next week at lunch.i said that was fine.i asked dr to consider OxyContin when patients are at 80mg oral morphine equivalent,as he has 7 tablet strengths of OxyContin to allow for flexibility in dosing and its available at UHC/AAR-Med PartD,at lowest branded co-pay and commercial plan patients can use OxyContin savings cards,dr said he does prescribe a small amount of OxyContin for his elderly patients so he'll remember what i said about insurance coverage.i recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44120	2/2/2011	i talked to dr about Butrans fpi,5 core messages,medication guide,instructions for use,patient information booklet,formulary coverage-Medicaid,workers comp and commercial plan patients that can use Butrans savings cards.i asked dr what he thought the clinical benefits were for his patients when choosing Butrans? dr said he writes a lot of tramadol,so this would be a great option for patients who arent controlled on short-acting tramadol or arent compliant with around the clock dosing of tramadol,he would consider Butrans for them.dr said once weekly dosing and transdermal delivery are ideal in his eye so he would try Butrans in 1 or 2 patients and let me know what happens.we discussed Butrans REMS program too and i recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44114	2/2/2011	i talked to John,PA,about Butrans fpi,5 core messages,medication guide,instructions for use,patient information booklet,Butrans patient savings cards and John said transdermal is ideal in his mind as so many of their patients (he works with Dr.Katz and Dr.Marshall) are taking Vicodin or Percocet every day around the clock and he doesnt think that regimen is managing these patients pain.John said once weekly dosing is also more convenient than patients having to dose q4-6h of short-acting opioids,so he see's a place for Butrans.John asked about workers comp coverage as thats a large population here so we discussed that for Butrans,medicaid requiring a Prior Authorization and commercial plan patients using Butrans savings cards.John said he'll think of a few patients to talk to about Butrans and asked me to follow-up next week and he'll give me feedback.i recommended Senokot-Reminded doc of our lunch last week and asked him where he has used it. He asked me to tell him again where he should prescribe it. I read the indication and discussed the patient positioning. He said ok and that he would find a patient. Reminded him of the oxycontin patient type as well.
PPLPMDL0020000001	Cleveland Heights	OH	44118	2/3/2011	Quick call with Dr Sundaram. He said he had not yet prescribed Butrans but that he had not forgotten it. He pointed out that he still even had the savings cards I gave him on his counter by where he does his notes. He said he is just waiting for the right patient & then he will prescribe it. Spoke with Terri & June who both said that they think that Dr Sundaram has a lot of patients that could benefit from Butrans.
PPLPMDL0020000001	Independence	OH	44131	2/3/2011	Spoke with Mario (PharmD), who manages several of the Marc's Pharmacies in the area. He confirmed that this location is stocked with Butrans & that he actually saw a prescription for Butrans come through at the Marc's located across from Fairview Hospital. Discussed indication, one application delivers seven days of buprenorphine, & appropriate patients. He asked if Butrans can be prescribed by physicians who are not pain specialists. I told him that anyone who treats patients who fit the indication of moderate to severe chronic pain could prescribe Butrans. He thanked me for the information & let him know I would return to follow up with their regular
PPLPMDL0020000001	Parma	OH	44134	2/3/2011	Dr Trickett stated that the patient who she started on Butrans complained of nausea after starting Butrans. She said that she told him to stay on it for a few days to see how he does with it after time. She said that the patient asked her for Opana, but she wanted him to stay on Butrans to see if the nausea subsided. She has not heard back from the patient so far. I asked if that would prevent her from trying Butrans on any other patients & she said it would not, and that this patient has been somewhat difficult for her to treat so far with anything, so she was not alarmed at his complaint. Indication reminder & asked her to try it for another appropriate patient which she said she would.
PPLPMDL0020000001	Parma	OH	44134	2/3/2011	Spoke with Erika who confirmed that they did receive a shipment of Butrans. She said that they may have even filled a prescription but she was not entirely sure. Reviewed with her the indication, appropriate patients, dosing, initiation of treatment, & the medication guide for advising patients. She asked if Butrans could be prescribed for patients in pain due to fibromyalgia. I told her that the full prescribing information only states that Butrans is indicated for moderate to severe chronic pain but does not specify any etiologies. She said she really feels there is a place for Butrans in the marketplace & she also said that she thinks that patients will find a once per week dose of a pain medication "convenient". Let her know I would return to check in.
PPLPMDL0020000001	Beachwood	OH	44122	2/3/2011	Spoke with Shelly (MA) about Dr Tabbaa's interest in Butrans since I left him information. Discussed patient information booklets & walked her through how savings cards work. Also let her know that they are for commercial insurance patients only & that patients with government insurance, including Medicaid & Medicare Part D cannot use the cards. Also gave brief Butrans overview (indication, appropriate patients) & scheduled first available lunch as Dr Tabbaa requested. I also gave her my card & told her to call me if they have any questions or if they run out of savings cards or patient info booklets.
PPLPMDL0020000001	Stow	OH	44224	2/3/2011	Spoke to Cory and he said he has not recieved Butrans in. I reviewed FPI, and dosing and administration card, indication, boxed warning, managed care coverage. I told him that Dr Bressi wanted it stocked because he will be writing. HE said he will get it in.
PPLPMDL0020000001	cleveland	OH	44135	2/3/2011	Spoke with nurse, Jim, Randy and both Drs were in a meeting and could not talk. We reviewed Butrans 5 key points and the medication guide. Cheryl will talk to Drs to see if I can schedule an appointment.
PPLPMDL0020000001	University Hts	OH	44118	2/3/2011	Introduction to Butrans. Its indication, scheduling, patient positioning, and 7 day delivery in one application. He said not right now. Nothing learned. Left Butrans FPI.
PPLPMDL0020000001	Cleveland	OH	44113	2/3/2011	worked pain management dept-see call notes on Dr.Daoud and Dale,Physician assistant,as i had lunch with office today,worked out-patient pharmacy
PPLPMDL0020000001	Brook Park	OH	44142	2/3/2011	Spoke with Ashley, she had no time today and not interested in hearing about Butrans. I left her the information. I spoke with Mike the tech and we reviewed the 5 key points.
PPLPMDL0020000001	Mayfield Heights	OH	44124	2/3/2011	Spoke to Hillary about the recent launch of Butrans and the stocking. I discussed the indication, strengths, 7 day application, CII, and the savings program. She asked if Hillcrest Pain Mgmt knows about it yet. I told her yes and that Dr. Laham has already prescribed it. I asked her to order a box of each. She said she would let Bill know to order it.
PPLPMDL0020000001	Chagrin Falls	OH	44022	2/3/2011	Only got a brief introduction with Dr Hudson who came in to the lunch room to grab food & then left. Had time to introduce myself & Purdue's products. She said that Dr Rood is the only physician who will talk to reps. Dr Rood then told the other physicians in the practice about the products that the reps detail him on. Left information with Sue (nurse) & discussed Butrans savings cards with her.
PPLPMDL0020000001	Cleveland Hts	OH	44118	2/3/2011	Quick call....doc said he has not had an opportunity to prescribe Butrans yet and wanted a reminder of the coverage. Told him about the commercial coverage and the savings along with the savings cards and that BWC is also paying. Gave an initiation guide and discussed the patient type. Offered oxycontin savings cards. None needed.
PPLPMDL0020000001	Berea	OH	44017	2/3/2011	Quick call, Dr said he has a patient in mind and will give Butrans a try. No new info gained.
PPLPMDL0020000001	Brookpark	OH	44142	2/3/2011	We reviewed the Butrans FPI, indication, dosing, and medication guide. We discussed the managed care for Butrans and the savings cards. Dr asked where Butrans fits in vs OxyContin and we reviewed the indications and initiation guide for Butrans. Dr said that he just saw a patient who might have been good to try Butran on but he is not sure when he will see that patient again. He said he will think about it and see if it will fit into his practice. Reminder to recommend Senokot 5 for his patients on opioids.
PPLPMDL0020000001	Mayfield Heights	OH	44124	2/3/2011	Spoke to Marsha about the stocking of Butrans. Reminded her that we talked about Butrans recently. She confirmed that they were auto shipped and that she has 2 boxes of all three strengths. I discussed the indication and positioning, the savings cards program. Also told her that Hillcrest Pain mgmt is on board and they will be prescribing. Offered the FPI and initiation guide but she said she didnt need it.
PPLPMDL0020000001	Cleveland	OH	44113	2/3/2011	i talked to dale,PA,on tuesday,with Dr.Shen,so he heard about Butrans fpi,5 core messages,so i told Dale 5 core messages again and asked Dale if he had thought of Butrans for any patients since tuesday? dale said no he hadnt thought of Butrans,he said dr.shen see's 60patients on average/week,he see's 10-15 of her patients and he only had 1 person in mind that had a hard time swallowing pills,that would be someone he would start on Butrans.i asked dale on average,how many patients ask for a new medication,or change in medication,daily,he said dr.daoud's patients are 15-20 week and maybe only 1/week or every other week ask for medication change,but dr shen has 10-15 patients DAILY that ask for medication change and these are people taking vicodin,percocet,tramadol,codeine,so i asked him to think of 1-2 of those patients to try Butrans and let me know what clinical results they see.dale said that was fair and would do that.recommended Senokot-5
PPLPMDL0020000001	University Heights	OH	44118	2/3/2011	Spoke to Ted about the Butrans stocking. They were not currently stocking it. I explained the indication, positioning, dosing, and the saving cards program. He said he heard a little bit about it and he asked who is writing it. I explained that we just launched about 2 weeks ago but we are targeting primary care and pain mgmt. I explained the 7 day wear and the application and disposal of Butrans. I asked him to order a box of the 5 and 10mcg. He said he would wait to see if he gets a script.
PPLPMDL0020000001	Cleveland	OH	44135	2/3/2011	Spoke with nurse, Jim, Randy and both Drs were in a meeting and could not talk. We reviewed Butrans 5 key points and the medication guide. Cheryl will talk to Drs to see if I can schedule an appointment.
PPLPMDL0020000001	Parma	OH	44134	2/3/2011	Got a quick call with Dr Scanlon at the window. I asked what his experience has been so far with Butrans. He said that he has not prescribed it yet. He said that he still thinks that it is "a great idea" and that he will write it, he just has not had the opportunity to prescribe it yet. He also remembered the savings cards & said that he will be giving them to his patients with commercial insurance. He assured me again that he will be prescribing Butrans.
PPLPMDL0020000001	Brookpark	OH	44142	2/3/2011	Dr was sitting in on my conversation with Dr Keppler regarding Butrans. We reviewed the Butrans FPI, indication, dosing, warnings and medication guide.
PPLPMDL0020000001	Brookpark	OH	44142	2/3/2011	We reviewed the Butrans FPI, indication, dosing, warnings, medications guide, managed care and savings cards. We reviewed OxyContin as an option where Butrans many not provide adequate analgesia. We discussed Senokot 5 for medication induced constipation.
PPLPMDL0020000001	Cleveland	OH	44106	2/3/2011	worked pain management dept-met dr.hayek's new medical assist,Kim and Lisa,Patient care coordinator who takes ALL medication refill requests daily and has been in pain management for 2yrs,i discussed Butrans fpi,medication guide,patient information booklet,Butrans savings cards for commercial plan patients,medicaid patients needing Prior authorization and workers comp patients.i talked to dr.hayek,so see call notes.BOTH Kim and Lisa said Butrans is a great option for patients who are taking Vicodin,Percocet and they have a lot of people on tramadol that they feel could benefit from Butrans,being on that moderate pain level.I booked a lunch in March with dept and they said to follow-up next wednesday as Dr.Khalil and Dr.Saghal are both there with Dr.Hayek, worked pharmacy and met with Wes Busch,PharmD and Cheryl Woods,Narcotics Buyer.
PPLPMDL0020000001	Stow	OH	44224	2/3/2011	Spoke to Micheal and reviewed Butrans, FPI, indication, boxed warning, dosing and administration. HE said he got the 5 and the 10mcg. Said they dont see alot of Oxycontin and never see Ryzolt scripts. Discussed Sen5 for recommendation in opioid induced constipation
PPLPMDL0020000001	Parma	OH	44129	2/3/2011	Re-introduced Butrans to Dr Gigliotti, delivering 5 core messages & discussing box warning. He asked how it compared with Duragesic. I told him we do not have comparative data & presented initiation guide, pointing out pg 6. He asked if it could be used for someone for a short time of time, such as one week. I told him that our indication is for moderate to severe chronic pain & that Butrans should not be used for a pt who was in pain for a short period of time. Discussed appropriate pt types. I asked his thoughts & where he thought he could use Butrans. He said he sees pts who have chronic low back pain who take 3 Vicodin per day that he thinks may be good candidates for Butrans & asked if he could keep initiation guide. Discussed mgd care/savings. He said he just adopted a new policy of no prior-authorizations. I asked if I could follow up for feedback-he said to come back next wk. Also reminder for OxyContin for appropriate pts. Discussed managed care & savings cards with Jazz.
PPLPMDL0020000001	Stow	OH	44224	2/3/2011	Introduced Butrans, reviewed FPI, indication, boxed warning, dosing and titration. Answered questions in FPI regarding use in renal, hepatic, metabolism, excretion, receptor sites. Reviewed managed care coverage and savings cards with him and the staff. HE said he really likes it and thinks it will be a huge part of his practice. HE mentioned the reformulation of Oxycontin and he would like to know more the next time we talk.
PPLPMDL0020000001	Stow	OH	44224	2/3/2011	Introduced Butrans, reviewed FPI, indication, dosing and titration, 5 core messages. HE said he spoke to someone at a convention from Purdue and liked what he saw about Butrans. HE said this is definately something he can write, it needs to be on the NP formulary first. I asked if he can write it under the Drs name and he said yes. Reviewed managed care coverage and savings card program

	Stow	OH	44224	2/3/2011	Introduced Butrans, reviewed FPI, indication, boxed warning, dosing and titration. HE said he really likes it, he asked about coverage and I told him the plans it is covered in and he said it is different as a pharmaceutical company to say thigs are covered than the actual office experience when things are not covered because of individual plans. I told him we get information at a national basis but understand that companies will taylor them. HE said he will try it.
PPLPMDL0020000001	Cleveland	OH	44113	2/3/2011	talked to dr about Butrans fpi,5 core messages,medication guide,patient information booklet,savings cards for commercial plan patients.dr said once weekly delivery of medication is much easier than taking pills every day and transdermal delivery is ideal in his mind.dr said he doesnt prescribe Vicodin or percocet,but does start a lot of patients on tramadol,so i showed dr Butrans initiation/titration guide looking at opioid experienced patients taking 300-400mg tramadol,thats where he can try Butrans in these patients,dr said taht seemed easy and would try it in a few patients and let me know what clinical results he see's from Butrans.we discussed Butrans coverage for commercial plan patients,medicaid needing prior authorization and workers comp patients.told dr patients above 80mg oral morphine equivalent can convert to OxyContin,7 tabs available for flexibility in titration,and Ryzolt is an option if patients are stabilized on tramadol but he wants long-acting tramadol
PPLPMDL0020000001	Cleveland	OH	44113	2/3/2011	i talked to dr about Butrans fpi, 5 core messages,medication guide,patient information booklet and Butrans savings cards.dr asked if Butrans was an agonist/antagonist? i explained that Butrans is a partial agonist at the mu opioid receptors and referred dr to section 12.1 Mechanism of Action.dr was wondering if he had a patient on Butrans and OxyContin or another long-acting if the affinity was stronger or weaker and would Butrans bind so tightly to the receptors that it would knock the OxyContin off the receptor,hence precipitating withdrawal in patients,i showed dr section 2.2.initiation of therapy,Butrans fpi,noting there is potential for buprenorphine to precipitate withdrawal in patients already taking opioids,so dr said ok if i start patients on Butrans then i can give them a short-acting opioid,correct? i told dr yes he can and showed dr section 2.4-maintenance of therapy.dr said he has patients taking Vicodin,tramadol,where he would consider Butrans as an option and some
PPLPMDL0020000001	Brook Park	OH	44142	2/3/2011	Spoke with Doug, we reviewed the FPI and medication guide for Butrans. He is concerned that Butrans may not stick for 7 days since other patches have had problems with adhesion. We reviewed what to do if the edges come up or if the patch falls off per the FPI. they have the 5 and 10mcg doses in stock. they did get a script of Butrans last week, he did not know how wrote it. We discussed OxyContin as a Q12hr dose when Butrans may not provide adequate analgesia. Reminder about Ryzolt as a once a day dose and asked him to recommend Senokot S with opioids.
PPLPMDL0020000001	Brook Park	OH	44142	2/3/2011	We reviewed the Butrans FPI, indication, warnings, dosing, medication guide managed care, savings cards. Roman said he would like to talk to other pain management Drs about Butrans and would be very interested in attending a speaker program if we have any in the future. He is not quite sure where Butrans will fit into his practice yet. Reminder about OxyContin as another long acting option where Butrans may not provide adequate analgesia. We discussed Senokot S for medication induced constipation and he would like samples.
PPLPMDL0020000001	Cleveland	OH	44106	2/3/2011	i talked to dr about Butrans fpi,5 core messages,medication guide,instructions for use,patient information booklet,butrans savings cards for commercial plan patients,workers comp coverage and medicaid patients needing prior authorization-talked to Lisa,who does all prior authorizations and takes all medication refill requests.dr said once weekly dosing and transdermal delivery are ideal for patients and he has so many patients on tramadol and vicodin,that he would like an option like this so he'll try it in a few patients and let me know.i asked dr if i could follow-up next wed,to speak with him and kim,his med assistant,to be sure everything is working smoothly.dr said that was fine.told dr when patients are above 80mg oral morphine equivalent,OxyContin is an option,with 7 tablet strengths and lowest branded co-pay for his commercial plan patients and medicaid patients pay \$2.00 at pharmacy.recommended Senokot-s
PPLPMDL0020000001	Euclid	OH	44119	2/3/2011	Introduced doc to Butrans indication and patient positioning. I explained the 7 application and one Butrans delivers 7 days of Burprenorphine - available in three strenghts. He asked what class it is in. I told him CIII - can be refilled and called in but still has warnings for addiction/abuse/diversion. Scheduled a lunch for further discussion.
PPLPMDL0020000001	Euclid	OH	44117	2/3/2011	Window Call.....introduced doc to Butrans discussing the indication, studies in opioid naive and opioid experienced patients. Talked about the 3 strengths and each butrans delivers 7 days of Buprenorphine. He said, "oh wow" aand asked if it really works for 7 days. I told him that pain scores were improved in clinical trials. He asked if its covered on BWC. I explained that Butrans is being paid for by BWC as is oxycontin and ryzolt. Gave him an FPI and initiation guide. He said he would look at it.
PPLPMDL0020000001	Brook Park	OH	44142	2/3/2011	Spoke with Hassan, we reviewed the Butrans FPI and medication guide. He has already read about Butrans. He had questions about the reformulation of OxyContin and we reviewed the field card and updates in the OxyContin FPI. Reminder about Ryzolt as a once a day option and asked him to recommend Senokot S with opioids.
PPLPMDL0020000001	Parma	OH	44134	2/3/2011	Spoke with Dan (floater pharmacist) & Judy (technician) about Butrans. Asked if they had received their shipment. They checked the shelf & did not have it so I asked them to check their computer to see if they never received it or if it was missing because it had been dispensed. Judy looked in their system & she said they had never received it. I let them know that they should have been auto-shipped & that I would investigate to find out how this can be remedied.
PPLPMDL0020000001	Chagrin Falls	OH	44022	2/3/2011	Dr Rood told me he had two related pts with a rare genetic disease who took OxyContin reformulation, & because of poor metabolism due to their condition, were unable to tolerate the reformulated OxyContin & were in "severe pain" while on it. One of the pts, a 27 year old male, was switched to Duragesic, & died three days later. I told Dr Rood that I needed to report this & he said he already had & that he has already filled out a lot of paperwork about this & would prefer not to be contacted regarding this same issue again. Reviewed reformulation field card & he said he had no further questions. Introduced Butrans & delivered 5 core messages. Reviewed FPI sections 2.1, 2.2, 2.4, 6.1, 8.5, 11, 12.3, medication guide, & box warning in response to him asking about adverse events, layers of the patch, plasma levels over 7 days, use in geriatrics, initiation of treatment, & use of supplemental analgesia. Also covered mgd care/savings. He said he does see a place for Butrans & is interested
PPLPMDL0020000001	Warrensville Heights	OH	44122	2/4/2011	Spoke with MA's Lucy & Kim at length about Butrans. Reviewed with them Butrans indication, appropriate patients, application, rotation, heat warning, adhesion, dosing, & managed care/savings. Kim asked about a patient who has chronic pain due to arthritis and is currently taking 3 Ultram per day. Showed her initiation guide. Told her that because Butrans is an opioid, it does carry the same risks of abuse & addiction that other opioids have. She said that many of the patients that Dr Mader & Dr Gupta see fit the Butrans indication & she feels that they will be interested in hearing more about it.
PPLPMDL0020000001	Rocky River	OH	44116	2/4/2011	Spoke with Leigh Ann, she has not seen any scripts for Butrans and they will not stock until scripts come in. She said that they don't get a ton of pain patients but they will order within a day for any patients. Reminder of the appropriate patients for Butrans and then OxyContin when Butrans may not provide adequate analgesia. Asked to recommend Senokot S with opioids.
PPLPMDL0020000001	Westlake	OH	44145	2/4/2011	Dr had not yet prescribed Butrans, but said he might have a few patients in mind to give it a try. We reviewed the appropriate patients for Butrans and i asked him to just think of 2 patients. Reminder about OxyContin when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Lakewood	OH	44107	2/4/2011	We reviewed Butrans FPI, indication, warnings, dosing, and appropriate patients range. He does think that he can find a few patients to try but did not know of any specific patients. Dr asked about the OxyContin reformulation and we reviewed the field card and the updates in the OxyContin FPI. Reminder about Ryzolt as an option and asked to recommend Senokot S with opioids.
PPLPMDL0020000001	Lyndhurst	OH	44124	2/4/2011	Asked Patricia if she had found an appropriate patient for Butrans in the past week. She said that Karen had prescribed it but she had not. I showed her the initiation guide and the appropriate dosing for opioid naive and opioid experienced patients both. She asked for a REMS packet like the one Dr. Reed received. Provided one to her and Karen Steffey.
PPLPMDL0020000001	Independence	OH	44131	2/4/2011	Quick follow up call with Dr Pal. He said he has only been in the office one and a half days since we last spoke about Butrans. He said he does have several patients in mind to start on it, but he has not seen them yet. Reviewed indication & appropriate patient type. He said he is sure he will write it, it is just a matter of when those patients come to his office.
PPLPMDL0020000001	Beachwood	OH	44122	2/4/2011	Introduced myself & Butrans to Dr Rastogi, delivering 5 core messages & box warning. Dr Rastogi said he has been aware of Butrans for a long time because he has used it in India. He said in addition, his wife works at Cleveland Clinic's main campus and she told him about it being available in the US now. He said he is very familiar with it. He got called to the hospital so we were unable to finish our conversation. Spent time with his MA's (Kim, Tiffany, Lucy, Tammy, & Jacque), discussing indication, appropriate patients, dosing, initiation of treatment, savings program, & managed care. Also spoke with office manager about Butrans. Ruth & Kim said they really think that Dr Rastogi will use Butrans because he has many patients who fit the indication & also he typically likes to use newer medications. Let them know I would return to follow up on feedback regarding Butrans.
PPLPMDL0020000001	Hudson	OH	44236	2/4/2011	Spoke with Beth and confirmed that Butrans was received & is stocked at that location. Discussed savings cards, indication, appropriate patients. She said she does see a place for it, but that we will have to see how the doctors receive it. I let her know that I have appointments with some of the area physicians & am getting info to as many as I can. She did not have any specific recommendations about who may be interested in hearing more about Butrans. Let her know that I would be back to follow up & make sure that everything is going smoothly with prescriptions for Butrans as they come in.
PPLPMDL0020000001	Shaker Heights	OH	44122	2/4/2011	Spoke with Fien (pharmacist) who confirmed that Butrans 5mcg was on their shelf. I reviewed with her Butrans indication, appropriate patients, dosing, one Butrans= seven days of buprenorphine delivery, e-voucher. She said she thought that the once every seven day dosing was "unique" and she said she thinks that patients will like that as an option to treat their pain. I asked who in the area she thinks would be interested in hearing more about Butrans, but she did not have any recommendations. Gave her my card & asked her to call me if they have any questions.
PPLPMDL0020000001	Hudson	OH	44236	2/4/2011	Introduced myself & Butrans to Dr Seiple. Delivered 5 core messages. He asked if it could be used for the treatment of drug addiction. I told him Butrans has no indication for the treatment of drug addiction. Discussed appropriate patients. He asked if it was like Duragesic. I told him we have no comparative data & showed initiation guide pg 6. Walked him through the table for starting both types of patients (opioid-naive & opioid-experienced). He said he liked that it is once every seven days & also that it is a CIII. He said he can see using it in patients who were previously on Darvocet. He asked about managed care coverage/cost. I asked how much commercial insurance he sees & he said "a ton". I presented savings cards & explained how patients with commercial insurance (not government insurances like Medicare & Medicaid) would use the card & obtain Butrans for a \$15-\$20 co-pay. He said he would try Butrans on some patients. Thanked him & let him know I would follow up soon.
PPLPMDL0020000001	Cleveland	OH	44109	2/4/2011	i talked to dr about Butrans fpi,5 core messages,medication guide,patient information booklet and Butrans patient savings cards.dr said he doesnt write a lot of narcotics,maybe some Vicodin and a little Percocet for patients,so he's not sure he has a lot of patients he can start on Butrans that are opioid experienced,so i asked dr if he see's opioid naive patients or patients taking 1-2 tabs Vicodin or Percocet daily? dr said yes.i asked dr to think of Butrans for those patients and just try Butrans in 1-2 patients and let me know how this works for them.dr agreed and asked about insurance coverage for medicaid patients as thats the majority at metro.explained to dr medicaid patients needing prior authorization,workers comp coverage and commercial plan patients using Butrans savings cards,dr said that was fine and he would think of 1-2 patients.recommended Senokot-S
PPLPMDL0020000001	Bedford	OH	44146	2/4/2011	Followed up with Oleg regarding Butrans. I let him know that I had spoken with Dr Moufawad & that he indicated that he will be prescribing Butrans. Oleg asked what I felt the most popular doses would be. I told him that the 5mcg & 10mcg were the two starting doses depending on what type of patient it was. He said he would order 1 or 2 boxes of both the 5 & 10mcg. He actually punched in the order while I was standing there.
PPLPMDL0020000001	MAYfield Heights	OH	44124	2/4/2011	Spoke to Jesse to confirm stocking of Butrans. He checked and confirmed that he received the 5 and 10mcg boxes. I talked about the indication and the appropriate patient types. Told him that the pain mgmt clinic in the area has started to write prescriptions. I also let him know about the savings patients will get through the relay health evoucher program. He asked if the patch stays on for 7 days. I told him it should with a little care and I explained how to secure it if necessary.
PPLPMDL0020000001	Lakewood	OH	44107	2/4/2011	Dr said he had not tried Butrans yet as he just moved to his new office space, but said he will give it a try in some of those patients they were thinking about the last time we spoke. I reviewed the medication guide with Laura and Kim as a reminder. They will help remind the Dr to try Butrans.
PPLPMDL0020000001	Mayfield Hts	OH	44124	2/4/2011	Window call.....asked doc about the patient he just prescribed Butrans for the other day - has he heard anything back? Was the patient able to get Butrans with her medicare/supplemental insurance? He said he had not heard anything back about it yet. He said next week I should check with Denise. Who is not in today. Thanked him and asked him to look for other opioid naive /low dose chronic pain patients for Butrans.
PPLPMDL0020000001	Cleveland	OH	44109	2/4/2011	worked physical medicine&rehab dept-see call notes,worked oncology dept-had to leave information with medical secretaries so i left business card and Butrans fpi and Butrans initiation guide;worked neurology dept-left dr.hannah,dr.winkelman and virginia edwards,NP,Butrans fpi and initiation guide and my business card;worked rheumatology dept-left business card,Butrans fpi,initiation guide-for Dr.Kahn,Dr.Ballou,Dr.Magrey and Dr.Yue and booked a lunch in March with rheumatology dept;worked out-patient pharmacy-talked to Brian,pharmacist,about Butrans fpi,initiation guide and Butrans patient information booklet and savings card and asked if Brian could give all of that information to Rob,Pharmacy Manager,as he was in a meeting

PPLPMDL0020000001	Cleveland	OH	44109	2/4/2011	i talked to dr about Butrans fpi,black box warning,5 core messages,medication guide,patient instruction booklet,initiation guide and Butrans patient savings cards.dr said he doesnt have a lot of experience prescribing narcotics,but he likes that Butrans is once weekly and transdermal.dr said he would think of Butrans for patients who he doesnt want to give Vicodin or Percocet to.i showed dr initiation guide,opioid naive patients trying Butrans 5mcg/hour and if he did have a few patients taking 1-2 tabs of Vicodin or Percocet,he could start them on Butrans 5mcg/hour too.dr said he will consider Butrans for his out-patient center patients as these are the people who have workers comp,medicaid-i explained prior authorization necessary for Medicaid and commercial plan patients using Butrans patient savings cards.recommended Senokot-S
PPLPMDL0020000001	Lakewood	OH	44107	2/4/2011	We reviewed the Butrans FPI, indication, dosing, warnings. She said she would try it, but did not know exactly where it will fit in her practice and she could not think of any specific patients. Dr Khuri asked about the OxyContin reformation and we reviewed the updates in the OxyContin FPI and field card. Reminder about Ryzolt as a once a day option and asked to recommend Senokot S with opioids.
PPLPMDL0020000001	Mayfield Heights	OH	44124	2/4/2011	Spoke to PT pharmacist, Jessica and Tech, Sarah about the stocking of Butrans. I explained that Target was due to be auto-shipped. She said they did receive a shipment but it was returned because they had noheard of it, had no requests for it, and really did not have shelf space for it. I Discussed the indication, positioning, dosing, and the 7 day application delivering Buprenorphine. She stated that she was not the regular pharmacist at this store and had not heard of it at other stores.
PPLPMDL0020000001	Lyndhurst	OH	44124	2/4/2011	She said she tried a patient on 5mcg/hr. The patient wore it for 7 days but called and said it was not working so HCP doubled the dose. I explained that the FPI does not recommend more than one Butrans at a time. She is going to write a script for 10mcg/hr when the patient returns. I asked if patient is tolerating well and was able to get the product. She had not heard any complaints from her about that. I discussed the REMS folder and went over the boxed warning and the limitations of use. Asked her to continue to identify patients.
PPLPMDL0020000001	Cleveland	OH	44109	2/4/2011	i talked to dr about Butrans fpi,black box warning,5 core messages,medication guide,patient instruction booklet,initiation guide and Butrans patient savings cards.dr said he doesnt start many patients on narcotics and works mainly in-patient hospital and these patients are cash paying,so Butrans isnt a realistic option for them.i asked dr if he has ANY patients taking 3 tablets of Vicodin or Percocet?dr said yes he has a few patients on 3-4 tabs of Percocet a day but he would taper them up to OxyContin.i clarified with dr that THAT IS the patient i am talking about,he could start THAT patient on Butrans 10mcg/hour then titrate to Butrans 20mcg/hr,after 72 hrs when steady state is achieved and THEN if pain worsens over time,dr can go from Butrans 20mcg/hr to OxyContin,dr said that was a great point,he didnt think of it like that and would consider 1-2 patients like that for Butrans.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	2/4/2011	i talked to dr about Butrans fpi,black box warning,5 core messages,medication guide,patient instruction booklet,initiation guide and Butrans patient savings cards.dr said he doesnt start many patients on narcotics and works mainly in-patient hospital and these patients are cash paying,so Butrans isnt a realistic option for them.i asked dr if he has ANY patients taking 3 tablets of Vicodin or Percocet?dr said yes he has a few patients on 3-4 tabs of Percocet a day but he would taper them up to OxyContin.i clarified with dr that THAT IS the patient i am talking about,he could start THAT patient on Butrans 10mcg/hour then titrate to Butrans 20mcg/hr,after 72 hrs when steady state is achieved and THEN if pain worsens over time,dr can go from Butrans 20mcg/hr to OxyContin,dr said that was a great point,he didnt think of it like that and would consider 1-2 patients like that for Butrans.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	2/4/2011	i talked to dr about Butrans fpi,black box warning, 5 core messages,medication guide,instructions for use,patient information guide,initiation/titration guide and Butrans savings cards.dr said he likes transdermal over pills,doesnt prescribe a lot of narcotics as he expects his patients to go to physical therapy,exercise,lose weight as he has a lot of obese patients,dr said if patients follow all of his instructions,he will give narcotics as he believes in treating pain but doesnt want them to do nothing and expect to get their pills.i asked dr who he is most likely to start 1-2 patients on Butrans,opioid naive or opioid experienced? dr said opioid experienced as he has patients on low doses of Vicodin,Percocet and some tramadol,so he would start them on the Butrans 10mcg/hour.i asked dr to think of those patients taking 3-8 tabs of Vicodin or percocet or 300-400mg tramadol and start Butrans 10mcg/hour,being sure he tapers patients to 30mg oral morphine equivalent,dr agreed
PPLPMDL0020000001	Cleveland	OH	44113	2/4/2011	talked to dr about Butrans fpi,5 core messages,medication guide,instructions for use,patient information booklet,patient savings cards for commercial plan patients,workers comp patients and medicaid patients needing prior authorization.dr said once weekly dosing and transdermal are two benefits for his patients.i asked dr would he most likely start 1-2 opioid naive or opioid experienced patients? dr said probably opioid experienced,as he has a lot of patients on tramadol around the clock and vicodin q4-6h,so he would like to decrease some of the monthly pills these patients are taking and convert them to Butrans.i asked dr to think of patients taking 300-400mg tramadol or 15-40mg hydrocodone,to start on Butrans 10mcg/hour,dr agreed and i asked if i could follow-up next week to be sure everything was going smoothly,dr agreed.told dr he has OxyContin,7 tabs for flexibility in titration available and medicaid patients pay \$2.00 at pharmacy,recommended senokot-S
PPLPMDL0020000001	Twinsburg	OH	44087	2/4/2011	Presented Sally Butrans FPI and reviewed where it can be prescribed. She asked specifically about how drug is metabolized so we reviewed that section under Pharmacokinetics. She was satisfied with response and didn't complete yellow card. I provided her S's initiation and titration guides and reviewed positioning of Butrans for patients. I also reviewed the formulary coverage for Butrans in Part-D and OxyContin. She is familiar with CCRx and happy for coverage but it's more suited for Consultant Pharmacists. I provided her USB card for PAP websites where she will review it herself as she'll be off work for a few weeks.
PPLPMDL0020000001	Cleveland	OH	44109	2/4/2011	i talked to dr about Butrans fpi,black box warning,5 core messages,medication guide,patient information booklet,butrans savings cards and initiation guide.dr said he thinks once weekly dosing and transdermal delivery are ideal for patients instead of around the clock opioids,but he doesnt give a lot of Vicodin or Percocet to his patients,unless in hospital then he will,in the out-patient setting he'll prescribe a lot of tramadol,so i asked dr to consider 2 patients on 300-400mg tramadol,considered opioid experienced,to start on Butrans 10mcg/hour and give Butrans savings card to them as long as they have commercial plan insurance.dr said he would do that in a few patients,in out-patient setting,biggest challenge in-patient setting is that majority of their patients are cash paying and cant afford Butrans out-of-pocket.i told dr to think of workers comp patients,commercial plan patients or prior authorization for medicaid patients.recommended Senokot-S
PPLPMDL0020000001	Lyndhurst	OH	44124	2/4/2011	Asked for Sid or Steve to discuss stocking of Butrans. Steve is now at a different store. Sid was not available. Spoke to Meagan and went over the Butrans indication, the available strenghts, 7 day application. Asked her to stock just one box of the 5mcg/hr. She said I should speak to Erin and that she would leave the information.
PPLPMDL0020000001	Hudson	OH	44236	2/4/2011	Spoke with Bonnie (pharmacist) & Jennifer (technician) & confirmed that they did order Butrans and currently have it on the shelf. Bonnie said that she thinks that doctors are going to try to use it as an "add on" to other opioids & she said she thinks that will cause withdrawal. I reviewed FPI 2.4 regarding supplemental analgesia. She said they also may put it in the same category of Duragesic. I showed and handed her initiation guide page 6, pointing out the table & the statement that patients on the fentanyl patch were excluded from the study. Let her know that I would return to follow up.
PPLPMDL0020000001	Cleveland	OH	44109	2/4/2011	i talked to dr about Butrans fpi,black box warning,5 core messages,medication guide,patient information booklet,initiation guide,butrans patient savings cards and formulary coverage for medicaid and workers comp patients.dr said he doesnt write any narcotics,like Vicodin or Percocet and maybe has a couple of patients on tramadol,as he is trying NOT to prescribe opioids.dr huang,the attending dr,said he must treat patients pain as he is obliged to do so as a dr and pain is the 5th vital sign,dr daftarri listened to dr huang as she explained that Butrans was a great option for patients being transdermal,once weekly and since its a CIII he could call in re-fills,so dr asked me what was the amount of Butrans for cash paying patients? i explained prices and dr said majority of his patients are in-patient and cash paying so Butrans couldnt work BUT out-patient commercial plan patients he would consider.recommended Senokot-S
PPLPMDL0020000001	Independence	OH	44131	2/4/2011	Introduced myself to Roman and delivered to him the Senokot-S samples that he requested. He said that Andrea had told him about Butrans but he doesn't have all the information he wants yet, so he has not prescribed it. I asked what information he was missing & he said that he either wants me to bring in a pain management specialist to lunch or to have a dinner program so that he can ask a thought leader his questions. He said that he's sure that I'm very knowledgeable, but he's interested in having his "off label" questions answered & he knows that I will not be able to provide him with off label information. I agreed & said that I can only speak to our FPI. I told him that if I have a dinner program I will be sure to invite him, but that I didn't think a speaker would be able to answer either. I told him he could call medical services-he declined. He said that he writes a majority of the Rx's in the office, not Dr Keppeler-He asked me to schedule a lunch in their Independence office
PPLPMDL0020000001	Cleveland	OH	44109	2/4/2011	talked to dr about Butrans 5 core messages and dr said this is a great option for patients who cant swallow pills,patients where she has concerns about giving too many pills.dr said she loves transdermal delivery and pain needs to be treated,so this is a fantastic option.i asked dr if she would consider opioid naive or opioid experienced patients? dr said probably opioid experienced patients,so i asked dr to think of patients taking 3-8 tabs of Vicodin or Percocet or 300-400mg tramadol daily,those are her opioid experienced patients to consider for Butrans therapy.dr said that makes sense and she will start some patients but wanted to know who had Butrans in stock and if Metro out-patient pharmacy had it?i told dr majority of pharmacies locally had Butrans in stock but i was still trying to meet with Rob,Pharmacy Manager,to discuss Butrans and order so i asked if one of the nurses could call pharmacy and ask for Butrans to be ordered and dr said that was a good idea.we discussed
PPLPMDL0020000001	Lyndhurst	OH	44124	2/4/2011	Introduced doc to Butrans. Discussed the indication, dosing, and the patient positioning. He looked at the conversion from hydrocodone to 5mcg. Discussed the CIII status and the studies in opioid naive and opioid experienced patients. I asked him if he would use something Butrans in naive or experienced patients. He went on to talk about about news in the USA Today stating that 35% of military soldiers end up addicted to medication after serving. He said that he wishes all narcotics were banned. He said I would not get anything out of him today. I did not.
PPLPMDL0020000001	Cleveland	OH	44109	2/4/2011	i talked to dr about Butrans fpi,black box warning, 5 core messages,medication guide,patient information booklet,initiation guide,butrans patient savings cards.dr said he loves transdermal delivery,instead of giving patients all of these pills monthly,like vicodin and percocet.dr said once weekly dosing is much easier for patients but he will most likely give patients some short-acting opioid to help for breakthrough pain.i told dr that was his clinical judgment and showed Butrans fpi-initiation of therapy and maintenance of therapy sections with that information noted.i asked dr who he would most likely prescribe Butrans in and dr said opioid experienced.i asked dr to think of patients taking 3-8 tabs of Vicodin or Percocet,to start on Butrans 10mcg/hour after appropriate tapering to 30mg oral morphine,dr said that sounded easy and would try Butrans in a few patients and let me know what he see's and hears from patients.we talked about prior authorization for medicaid patients.
PPLPMDL0020000001	Cleveland	OH	44113	2/4/2011	i talked to dr about Butrans fpi,5 core messages,medication guide,instructions for use,patient information booklet and patient savings cards for commercial plan patients and Prior Authorization for Medicaid patients.i asked dr what clinical benefits he saw in Butrans,dr said once weekly dosing and transdermal are ideal,as he has so many patients dosing short-acting hydrocodone or oxycodone around the clock and this would be a good way for him to decrease some of that amount.dr said the biggest issue is cost,so we talked about commercial plan patients using Butrans savings cards and Medicaid patients needing a Prior Authorization,dr said he would try Butrans in 1 or 2 patients and let me know how they do,i asked dr if he was thinking of opioid naive or opioid experienced and he said probably more experienced patients,so i asked dr to think of patients taking 3-8 tabs of Vicodin a day,those patients could try Butrans 10mcg/hour,once tapered to 30mg oral morphine equivalent,dr agreed
PPLPMDL0020000001	Lyndhurst	OH	44124	2/4/2011	Asked doc what kind of feedback she got from last weeks patient trial on Butrans. She said she had not heard anything back and she thinks that is a good sign. She said the patient was previously taking Vicodin ES. I discussed the initiation dose for opioid naive and opioid experienced and the importance of tapering down. She said she did not need to this patient. Told her that anything over 40mg vicodin/day would be an oxycotin
PPLPMDL0020000001	Cleveland	OH	44109	2/4/2011	i talked to dr about Butrans fpi,black box warning,5 core messages,medication guide,patient information booklet,Butrans patient savings cards and initiation guide.dr said majority of her patients are in-hospital setting and cash paying,so Butrans wouldnt be an option now, but when she is in the out-patient center with attending doctors and treating patients,she would think of patients either opioid naive or patients taking 1-2 tabs Vicodin or Percocet.i asked if dr treats many patients who are opioid experienced,3-8tabs of Vicodin or Percocet,dr said not really as she tries to not prescribe a lot of narcotics.i asked dr to consider that opioid naive patient or patients taking 1-2tabs Vicodin or Percocet,to start on Butrans 5mcg/hour and get some clinical experience with Butrans,she agreed and asked if there was potential for abuse,i said yes and showed black box and section 9 and 10 in Butrans fpi.recommended Senokot-S
PPLPMDL0020000001	Mayfield Hts	OH	44124	2/4/2011	Quick call....reminded doc that we started talking about Butrans - a 7 transdermal system delivering buprenorphine. Asked him if he had a few minutes. He said not really but asked if it is less addictive. I explained that it is still a CIII and has the risks/warnings similar to other opioids. nothing learned.

PPLPMDL0020000001	Brooklyn	OH	44144	2/7/2011	Introduced Butrans to Dr Hilton, delivering 5 core messages & reviewing box warning. Dr Hilton asked how it was better than morphine. I told her we have no comparative data. I showed FPI 12.1 & repeated message of seven days buprenorphine delivery in one application of Butrans transdermal system. She asked if it was less addictive than oxycodone. I told her again that we have no comparative data. I presented initiation guide & showed table on pg 6. She said she doesn't like to prescribe opioids "because then they're on it forever". I told her that Butrans, like all opioids has a risk of abuse/addiction & that it is not for everyone. Also repeated that the indication is for moderate to severe chronic pain & that it is not to be used for acute or mild pain. She asked cost & I covered managed care/savings-asked how much commercial insurance she sees-she said "none". Let her know that Medicare/Medicaid will cover Butrans but that a prior auth would be involved. She asked for an FPI
PPLPMDL0020000001	Cleveland	OH	44144	2/7/2011	Introduced Butrans to Dr Paul, delivering 5 core messages & reviewing box warning. She asked if it was like morphine or if it was less addictive than other opioids. I told her we do not have comparative data & that Butrans contains buprenorphine and is a transdermal system that delivers buprenorphine over seven days. Also that Butrans, like all opioids does carry risk of abuse/addiction so she should be just as cautious when prescribing. She pointed out the risk of seizure-I showed FPI 5.14. I presented initiation guide & she said that it seemed "interesting" & that she does not like prescribing opioids. Told her that Butrans is not for everyone. She said she does have a pt who takes tramadol & ibuprofen who may be a candidate for Butrans but Dr Hilton said she's "afraid of" Butrans & Dr Paul agreed that she would want it to be out for longer before she would prescribe it-she said she would want to see if other physicians were prescribing it. I gave her an FPI-she said she would read
PPLPMDL0020000001	Parma	OH	44129	2/7/2011	Spoke with Cindy- Reminded her about Butrans, including indication & appropriate patient types. She said that she knows that when I introduced it to him he was just getting ready to leave for a trip to the Philippines, so he may not have been as responsive as he normally would be. She said she is certain that Butrans is something that Dr Ortega will see a place for in his practice. I let her know that so far, there has been an overwhelmingly positive response by area physicians & she said to be sure to let Dr Ortega know that because that is important to him. She said that he knows many of the physicians in the area & that if they are positive about Butrans, then Dr Ortega is more likely to be positive as well. Also OxyContin savings reminder. She said he will be back the 21st & recommended that I return the afternoon of the 22nd to discuss Butrans with him again.
PPLPMDL0020000001	Parma	OH	44129	2/7/2011	Introduced myself & Butrans to Dr Paat. Delivered 5 core messages & showed black box warning. He said it sounded interesting. I presented initiation guide, showing pg 6, & walking him through how to initiate treatment in opioid-naïve & opioid-experienced patients. He said he thought he it would be something he would try on some patients but that he wanted to read more about it. We discussed managed care & savings cards. I spoke with Shari & discussed Butrans indication and appropriate patients. Also walked her through savings cards & how patients would use them, letting her know that they are not for patients with government insurance like Medicaid & Medicare. She suggested I schedule a lunch to get more quality time with Dr Paat, so I scheduled first available.
PPLPMDL0020000001	Westlake	OH	44145	2/7/2011	Dr has not yet tried a patient on Butrans. He said he would try it, he just needs to find the right patient. He told me about a patient on OxyContin who he could convert, but they were taking more than 40mg of OxyContin per day and we discussed that Butrans might not provide adequate analgesia. We reviewed the appropriate patients and tapering before initiation of Butrans. He agreed to try it and he would like to gain experience. We reviewed managed care and the savings cards. We discussed OxyContin as an option for patients when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Rocky River	OH	44116	2/7/2011	We reviewed the Butrans FPI, indication, dosing, warnings, and medication guide. Dr asked me if we had any data comparing the efficacy of Butrans with other opioids. I told him we have no head to head data, and he wanted to ask medical services for any further information. Reminder about OxyContin as an option when Butrans may not provide adequate analgesia. Reminder about Ryzolt and asked to recommend Senokot S. He said that constipation is an issue especially for patients on vicodin around the clock.
PPLPMDL0020000001	Cleveland	OH	44103	2/7/2011	I discussed Butrans fpi with dr,black box warning,5 core messages,medication guide,Butrans REMS,initiation guide and Butrans patient savings cards.i asked dr what clinical benefits he saw in Butrans? dr said once weekly dosing and transdermal were two significant benefits in his eyes,versus all of the pills he prescribes for his chronic pain patients.dr asked about medicaid coverage,so we discussed prior authorization for medicaid,workers comp coverage and commercial plan patients using Butrans patient savings cards.i showed dr initiation guide,opioid experienced patients page,and asked if dr would most likely prescribe Butrans for this patient group or opioid naive? dr said maybe a few patients are naive but most are experienced so he would think of patients taking Codeine with Tylenol,Tramadol or Vicodin,where he could try Butrans and see what clinical results he gets with Butrans.i told dr i would follow-up in a week to see if he started anyone.recommended Senokot-S
PPLPMDL0020000001	Olmsted Falls	OH	44138	2/7/2011	Spoke with Kelly and tech Kathy. We reviewed the Butrans FPI and medication guide. They do have the 5 and 10mcg doses in stock. We discussed the managed care coverage for Butrans, the savings cards and e-voucher program. We discussed OxyContin as an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Rocky River	OH	44116	2/7/2011	Spoke with Stan, we reviewed Butrans FPI and initiation guide. He did get the 5 and 10mcg Butrans in stock. He said he did not know which Drs would prescribe it and is wondering if it is going to take off or not.
PPLPMDL0020000001	Bedford	OH	44146	2/7/2011	Quick call with Dr Moufawwad. I asked him to tell me about his experience with Butrans so far & he said that he has not been in the office since our lunch so he has not had the chance to try it yet. He remembered the name & strengths & he said that he really does want to start getting experience with it as he walked into a patient room. Spoke with Amber & reminded her of Butrans savings cards for patients who have commercial insurance. Also let her know I would return in a week for follow-up & feedback.
PPLPMDL0020000001	Cleveland	OH	44113	2/7/2011	I talked to dr about Butrans fpi,black box warning,5 core messages,medication guide,Butrans patient savings cards,Butrans initiation guide and dr said Butrans once weekly dosing and transdermal delivery are both advantages in his eyes versus pills.showed dr initiation guide,opioid experienced patients and asked if he had patients taking 3-8tabs of Vicodin or Percocet daily?dr said Stabs of Vicodin,sometimes 6,is the most he'll prescribe.dr said he starts with plain Vicodin,5mg#4,then#5,then Vicodin ES and Vicodin HP,if that doesnt work he'll give Ultram ER as baseline pain coverage and Vicodin for breakthrough,anything more than that,he refers to pain management.dr said most of practice are opioid experienced and he would prescribe Butrans for the patients where he's pushed the dose to Stabs a day and maybe give Vicodin for breakthrough initially starting Butrans or for some patients as maintenance therapy.discussed managed care,medicaid and workers comp coverage.i told dr when patient
PPLPMDL0020000001	Cleveland	OH	44103	2/7/2011	i talked to Amy,Pharmacy Manager,about ordering Butrans 10mcg and 20mcg,and Amy said she did order these strengths and had it in stock and i asked if anyone had prescribed Butrans yet? Amy said she hasnt seen any scripts yet but she told me to keep working with Dr.Robson and Dr.Boyd and Dr.Celeste as these are the biggest Vicodin writers and Amy said she sometimes see's scripts from Dr.Nickels,so i told Amy i met with Dr.Nickels this am and he is going to be prescribing Butrans,based on our discussion.i told Amy i would follow-up in a week to see if anyone has prescribed Butrans.recommended senokot-S
PPLPMDL0020000001	Rocky River	OH	44116	2/7/2011	Quick call, Dr was on her way to the hospital, we reviewed the Butrans 5 key points. She agreed to look over the information and will let me know if she feels it will fit into her practice.
PPLPMDL0020000001	Parma	OH	44129	2/7/2011	Followed up with Jackie regarding Butrans stocking. She said that she did order & receive one box each of 5mcg & 10mcg strengths. She said she will order the 20mcg once she starts to see any Butrans movement. I let her know that Butrans is a kind of RelayHealth's e-voucher system which she was happy to hear. She said she would keep me updated on any Butrans prescriptions she sees.
PPLPMDL0020000001	Cleveland	OH	44109	2/7/2011	i talked to Erin,Pharmacist,about Butrans stocking and any scripts that have come through yet and Erin said no,none has prescribed Butrans yet but she did order the 5 and 10mcg/hour Butrans strengths.i asked Erin which departments at Metro write a lot of Vicodin and Percocet and she said Pain management and Physical medicine and rehabilitation doctors and also oncology doctors.i asked if Erin could recommend Butrans for those patients that are opioid experienced,taking 3-8 tabs of Vicodin or Percocet daily or 300-400mg tramadol daily,to doctors? Erin agreed and i said i would follow-up end of february to see if any prescriptions have come through pharmacy.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44102	2/7/2011	i talked to Dennis,Pharmacist,about Butrans fpi,black box warning,5 core messages,initiation guide and Butrans patient savings cards.Dennis said once weekly dosing and transdermal delivery were 2 benefits in his eyes for patients he see's all the time coming to get their Vicodin,Percocet,Tramadol and Tylenol with Codeine,so he is happy Butrans is an option.i asked if Dennis ever recommends products to patients and doctors? Dennis said occasionally he will do that,so i asked him to think about patients who are opioid naive or experienced and to recommend Butrans,Dennis agreed and asked about medicaid coverage as thats the biggest patient population here.i told Dennis Medicaid's prior authorization requirements and coverage for workers comp and commercial plan patients using Butrans savings cards.i told dennis i would follow up end of month to see if any prescriptions for Butrans have come through pharmacy,he agreed.recommended Senokot-S<font color=blue><b>CHUDAKOB's query on 02/17/2011</b></font>Amy, when you are asking him to think of patients opioid naive or opioid experienced, that pretty much covers every patient on an opioid. If you are going to discuss this, then you will want to consider being more specific. You cannot ask him for a printed list of physicians.<font color=green><b>BROOKAM's response on 02/20/2011</b></font>Barry,as we discuss the initiation/titration guide for Butrans, thats what we do,so from now on in my call notes i will be stating discussed initiation guide with pharmacist, doctor, etc...hope that makes sense to you,we can discuss this tuesday if you have questions. also if we cant ask for a printed list of physicians writing, how come that was done when you were with me in the field at Lutheran Family Pharmacy. i am confused. thanks<font color=blue><b>CHUDAKOB added notes on 02/23/2011</b></font>He printed the list for you without any patient names. This was not something you asked the pharmacist for. It is best to not get any printed information from your customers.
PPLPMDL0020000001	Rocky River	OH	44116	2/7/2011	We reviewed Butrans FPI, indication, warnings, dosing, adverse events, managed care, savings cards. He said he does have a lot of patients who come in every month for their refill of vicodin or percocet. He said they are usually taking 4 per day and either the 5mg or 7.5mg. He said he would try Butrans on a patient who needs to change medications. He said most patients are happy taking their 4 pill per day and they will not want to change. I asked he to just consider those patients who complain of their medication not working well or who want a different option and he agreed. We reviewed OxyContin and Ryzolt as other long acting options and asked him to recommend Senokot S with opioids.
PPLPMDL0020000001	Cleveland	OH	44104	2/7/2011	i talked to dr about Butrans fpi,black box warning,5 core messages,initiation guide and Butrans patient savings cards for commercial plan patients,dr asked about medicaid and workers comp coverage so we discussed both of those and dr said once weekly dosing is much easier for patients than taking short-acting opioids around the clock.dr said there are patients who arent compliant with q4-6h dosing of Vicodin or Percocet that he's thinking could benefit from Butrans.i asked if dr would start an opioid naive patient on Butrans? dr said yes or if they are only taking 1-2 tabs of Vicodin or Percocet,he would start on lowest dose,Butrans 5mcg/hour.dr said their chronic pain patients are tough to deal with and he gets very frustrated but he knows he has to treat their pain,so this is another option for some of his patients.i asked dr to think of a patient on 1-2 tabs of Vicodin or taking 3-8tabs of Percocet, to try on Butrans and dr agreed.recommended Senokot-S for opioid induced constipation
PPLPMDL0020000001	Berea	OH	44017	2/7/2011	Spoke with Adam and tech Diane who is in charge of inventory. They have not ordered Butrans yet and have not seen scripts. I reviewed the Butrans FPI, and medication guide with Diane. She asked about the Butrans sticking for 7 days as this has been a problem with other transdermals. I let her know that patients can use first aid tape or occlusive bandage. She said she would call me when she gets any feedback from Butrans patients. She said that Dr Kavlich, Choi, and Misja in Parma do a lot of pain management and would be good to call on. Reminder about OxyContin as an option and we reviewed the conversion guide. I reviewed Ryzolt as a once a day option and asked to recommend Senokot S.
PPLPMDL0020000001	Brooklyn	OH	44144	2/7/2011	Spoke with Cheryl & confirmed that they have Butrans 5mcg & 10mcg strengths on the shelf. Let her know that Butrans is part of the RelayHealth e-voucher system, so their customers with commercial insurance who were filling a Butrans prescription would have a \$15-\$20 co-pay. She said she could not have a lengthy discussion today because they were so busy and asked that I try back another day. I let her know that I would return for follow-up & gave her my card if she had any questions.
PPLPMDL0020000001	Berea	OH	44017	2/7/2011	Quick call, Dr said he did not need any other info regarding Butrans and had no concerns. It looked as if 2 of the savings cards have been used. Shirley did not know if he had prescribed.
PPLPMDL0020000001	Rocky River	OH	44116	2/7/2011	Spoke with Kim, she was auto shipped all three strengths of Butrans and was not very happy about it. She said they do not treat a ton of pain patients and she is afraid the product will sit on her shelf. I let her know that I will get it moving. We reviewed the Butrans FPI and medication guide. We discussed OxyContin as an option when Butrans may not provide adequate analgesia. Reminder about Ryzolt as a once a day option instead of tramadol around the clock.
PPLPMDL0020000001	Solon	OH	44139	2/7/2011	Reviewed Oxycontin Announcement Card & discussed points of concern expressed by Kristen in Houston. Kristen said the other Kristen is concerned about the source of the information. Shes not familiar with FTF and wants data points to show where its coming from, in reference to 92% of lives covered for OxyContin. She will speak with her and get back to me. I also provided e-marketing sample sheets for review. Kristen wants to get the Announcement Card approved before she starts the others.
PPLPMDL0020000001					

	Cleveland	OH	44103	2/7/2011	talked to dr about Butrans fpi,black box warning,5 core messages,medication guide,Butrans REMS program,Butrans initiation guide and patient savings cards.i asked dr what clinical benefits he saw in Butrans? dr said once weekly dosing and transdermal delivery were both benefits to his patients.i asked dr if he would consider Butrans as an option for opioid naive or opioid experienced patients? dr said both,as he doesn't start many patients on narcotics.dr said he has more patients on tramadol,so i talked to dr about patients taking 300-400mg tramadol daily,as they could start on Butrans 10mcg/hour.dr said he'll try Butrans in a few patients and let me know what clinical results he gets.discussed Medicaid,workers comp and commercial plans for Butrans.i told dr when patients are taking 80mg oral morphine or equivalent,dr can convert patients to OxyContin,7 tablet strengths available and lowest branded co-pay for commercial plan,medicaid and medicare part d plans.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44130	2/8/2011	Spoke with Ron- let him know that i had spoken with Dave & that he had agreed to order Butrans. Asked if he could check to see if they received it. Ron checked their shelves & said that they do not have it. i reviewed with him the indication & appropriate patient type & left information with my card which Ron said he would leave for Dave. Also let Ron know that we had started promotion with physicians in the area & recommended that they order at least one box of 5mcg & 10mcg. He said he would ask Dave to do this.
PPLPMDL0020000001	Twinsburg	OH	44087	2/8/2011	Spoke with Nancy (technician), confirmed that they did receive Butrans in stock. She said that Lou would be upset that i came on his day off because he has been wanting to talk to me. Nancy told me his schedule for this & next week and asked that if i am in the area i stop in to try to catch him. i also let her know that i we have started promoting Butrans to area physicians.
PPLPMDL0020000001	Mayfield Hts	OH	44094	2/8/2011	Introduced doc to Butrans - indication, patient positioning, and once weekly application. i asked him if a product like Butrans could benefit any of his patients. He said he does not a lot of long acting analgesics. i asked him if he has patients that may be taking 2 or 3 tabs of vicodin daily. No answer. Explained that that might be a good patient. Gave an FPI and initiation guide and asked him to review it.
PPLPMDL0020000001	Cleveland	OH	44130	2/8/2011	Dr Sawhny said he had just received his first complaint about the OxyContin reformulation. He said that the patient complained of headache & GI symptoms & had not had problems with the original formulation. He asked what is different & i presented field card & went over the bullet points with him. i told him that if he wanted more specific information or still had questions, he could call medical services or we could send an information request form. He said he would call medical services as he was curious as to what exactly has changed that would cause side effects not previously experienced on the original formulation. Introduced Butrans, delivering 5 core messages/box warning. He said he would use in either opioid-naive or experienced pts. He asked if they could still take other pain meds while on Butrans. Showed FPI 2.4. Discussed adhesion, application, managed care, savings cards & adverse event rates. He said he would definitely be using Butrans & was excited about it.
PPLPMDL0020000001	Bedford	OH	44146	2/8/2011	Ran into Dr Moufawad at Twinsburg UH Family Practice area, where he practices on Tuesdays. He said that he did not prescribe Butrans yet but he will. i asked him why not, considering he was so excited about it when we discussed all the details of Butrans. He started walking away down the hall into a patient room and said again that he would write it. Also spoke with Amber & reminded her of savings cards for cash paying patients or those with commercial insurance.
PPLPMDL0020000001	Cleveland	OH	44195	2/8/2011	i talked to Kathy,PA for Dr.Minzter and Dr.Mekhails patients,about Butrans being an option for opioid naive and opioid experienced patients.Kathy said once weekly dosing,as a transdermal delivery,is the biggest advantage instead of her patients having to take pills around the clock.i asked Kathy what Dr.Minzter said about Butrans and she said that Dr.Minzter likes once weekly dosing and also transdermal application is better in her eyes for patients as she is trying to prescribe less pills for her patients.i asked if there was any reason Kathy wouldnt prescribe Butrans for patients who were taking 3-8 tabs of Vicodin or Percocet or 300-400mg of tramadol and start them on Butrans 10mcg/hour? Kathy said no,she feels comfortable with who the appropriate patient is for Butrans and how to prescribe,so she will let me know if she needs anything.recommended Senokot-5
PPLPMDL0020000001	Twinsburg	OH	44087	2/8/2011	Introduced myself & Butrans to Dr Leonard, delivering 5 core messages & reviewing box warning. Dr Leonard said she finds Butrans to be an interesting concept. She asked about application sites, so i showed her in medication guide & went over application sites, rotation, area preparation with her. She asked how well it was covered by managed care. i discussed managed care (commercial tier 3 coverage & Medicare/Medicaid prior-authorization requirement) and savings cards. She said she does not have a lot of patients that fit the indication/description of appropriate patient types, but did say that she thought of one patient, but that patient is on Medicare, so she said she wasn't sure she wanted to battle insurance to get it covered. i suggested that each Medicare Part D plan is different & that it may be worth a try to see what type of requirements that pts plan about it with tell me & how he said that he had many patients who he felt would be appropriate for Butrans. He laughed & said he has not yet prescribed it. i reminded him how excited he had been when i discussed all the details about it with him & he put it right next to his computer so that he would see it often as a reminder when i am not there. Also reminded Karen of Butrans & savings cards.
PPLPMDL0020000001	Cleveland	OH	44130	2/8/2011	Asked Dr Diab to tell me all the great feedback he has gathered after starting his patients on Butrans. He laughed & said he has not yet prescribed it. i reminded him how excited he had been when i discussed all the details about it with him & how he said that he had many patients who he felt would be appropriate for Butrans. He laughed & said he has not yet prescribed it. i reminded him how excited he had been when i discussed all the details about it with him & he put it right next to his computer so that he would see it often as a reminder when i am not there. Also reminded Karen of Butrans & savings cards.
PPLPMDL0020000001	Cleveland	OH	44130	2/8/2011	Spoke with Allison, who confirmed that they had received their Butrans shipment & currently have 5mcg & 10mcg strengths on the shelf. She said she had not yet heard of Butrans so i reviewed with her the indication, appropriate patient type, seven days of buprenorphine delivery in one Butrans transdermal system, dosing/strengths, CII & abuse/addiction potential. She said she thought it sounded interesting and like a lot of patients may
PPLPMDL0020000001	Parma	OH	44129	2/8/2011	Spoke with Donna about Dr Laluk & his practice. Introduced myself & Purdue's products & asked if i could see Dr Laluk to introduce Butrans. Shared with her the indication, dosing, appropriate patient types, & CII/abuse/addiction potential. She said that he would not see reps at all unless they have a lunch, even if it is a product that he has not discussed before. i asked what the best way to get information to him was & she said that unless it is only one page, he will not read it. i told her that since it is something that he has not written or discussed before, and because we do not have a one-page information bullet sheet, it would be best for him to read the full prescribing information. She wrote "Butrans" down along with some notes & said she would share it with the doctor.
PPLPMDL0020000001	Cleveland	OH	44105	2/8/2011	i talked to Abdul,Pharmacist,about Butrans stocking and he has all 3 dosage strengths in stock but hasn't seen any prescriptions yet.i gave Abdul the Butrans initiation guide and patient information booklet,so that if 1 patient gets started on Butrans he can hand the patient information booklet to that patient.Abdul said i should be sure to talk to Dr.Tabbaa,Dr.Astley and Dr.Martin,as he see's a lot of their scripts from pain management at MetroHealth Medical Center.Abdul asked if i have talked to Dr.Celeste,Dr.Talbot and Dr.Carson as these are also physicians that send a lot of patients to him,so i told Abdul i met with Dr.Carson yesterday at lunch,Dr.Celeste is Friday,feb.11th and Dr.Talbot on Thursday,feb.17th but that both Dr.Celeste and Dr.Talbot have been given all of the Butrans fpi from Andrea,my westside colleague.i told Abdul i would follow-up next week,post more of my
PPLPMDL0020000001	Cleveland	OH	44195	2/8/2011	worked pain management dept-see call notes on physicians,nurse practitioners and physician assistant,worked chronic pain and rehabilitation department and physical medicine and rehabilitation dept
PPLPMDL0020000001	Cleveland	OH	44195	2/8/2011	i asked dr if he has started any patients on Butrans,since our discussion of the Butrans fpi,initiation guide and Butrans patient savings cards? dr said he has started a few patients and will let me know what clinical results he see's.i asked dr if these were all opioid experienced patients and dr said yes,thats majority of his patients.asked if dr needed anything else from me at this point,to continue starting more patients on Butrans? dr said no and if he needs me,he'll contact me. recommended Senokot-5
PPLPMDL0020000001	Parma	OH	44134	2/8/2011	Quick call with Dr Hernandez. i asked him to tell me about his experience thus-far with Butrans. He said he has prescribed it but he really wanted a list of pharmacies that have it in stock. i told him of the various chains & pharmacies that i have confirmed stocking at. He asked me to come back next week & that he did not need more savings cards now, but will by next week. Also spoke with Valentino regarding pharmacy stocking. He said that this information is very helpful for them.
PPLPMDL0020000001	Cleveland	OH	44195	2/8/2011	i talked to Joan about her opioid experienced patients,patients taking 3-8 tabs of Vicodin daily,that could start on Butrans 10mcg/hour and Joan said she is considering Butrans for those patients as she likes the once weekly dosing and transdermal delivery of Butrans.i asked Joan if there was any reason why she wouldnt prescribe Butrans and she said no,she thinks its a great option and has already started a few patients on Butrans so she's going to wait and see what clinical responses she gets from these patients.i asked Joan if there was anything else she needed and she said no and that i could follow-up in a week or two and she would let me know.recommended
PPLPMDL0020000001	Westlake	OH	44145	2/8/2011	Spoke with Megan. We reviewed the 5 key messages for Butrans. She said she thinks that the Dr will be interested and i can schedule an appointment at this Westlake location.<font color=blue>cb>CHUDAKOB's query on 02/17/2011</b></font>Who is Megan?<font color=green>cb>HOLUBA's response on 02/22/2011</b></font>Megan is an MA.<font color=blue>cb>CHUDAKOB added notes on 02/27/2011</b></font>Ok. Thanks. When you have a non-HCP call, you have to put in the title of the person who you spoke with and you can only have a non-HCP call on as medical person, not a secretary.
PPLPMDL0020000001	Cleveland	OH	44113	2/8/2011	i talked to Justin,new Pharmacist,about Butrans fpi,black box warning,Score messages,medication guide,stocking of Butrans as i asked if Aaron,Pharmacy Manager,ordered Butrans and Justin said no,but after our conversation about the medication and me sharing with him feedback from some physicians such as Dr.Shen,Dr.Daoud,Dr.Nickels,who all send patients to this pharmacy,Justin said he'll order Butrans today.Justin asked about formulary coverage for Medicaid,workers comp and commercial plan patients,so i showed him Butrans savings cards for commercial plan patients and explained prior authorization requirements for Butrans to get approval for Medicaid and workers comp coverage for Butrans.i told Justin i would follow-up on Thursday,as i have a lunch with Dr.Bohl and Dr.Berkowitz and they send a lot of their patients to this pharmacy,so i will check back to be sure he ordered Butrans,Justin agreed saying that sounded good and appreciated information.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44195	2/8/2011	i talked to dr about Butrans and if he started any patients yet? dr said he has started a couple patients, and hasn't heard anything from them yet,so he is thinking the medications working.i asked dr what these patients looked like and dr said patients on Vicodin and Percocet,where he is trying to decrease the amount of pills these patients are taking,thats where he has tried Butrans and will let me know what happens.i asked if dr needed any patient information booklets or savings cards and dr said no,but that i could follow-up in week or so.recommended Senokot-5
PPLPMDL0020000001	Richmond Heights	OH	44143	2/8/2011	Discussed the Butrans indication, studies in opioid naive and opioid experienced, CII, and once weekly application. Asked him if he would use in opioid naive or opioid experienced. He said, "I don't know, I can't think right now". i asked him if he thought Butrans would fit into his practice and benefit any of his patients. He said sure.
PPLPMDL0020000001	Cleveland	OH	44113	2/8/2011	i talked to dr about Butrans fpi,black box warning,5 core messages and Butrans savings cards and asked dr who would he most likely see in his practice,whether it be opioid naive or opioid experienced,where he would feel comfortable prescribing Butrans? dr said he see's both types of patients but more opioid experienced so probably would try Butrans there.dr asked about formulary coverage so we talked about commercial plan patients using Butrans savings cards,medicaid patients needing prior authorization and workers comp coverage.dr said he has to think about specific patients and wanted to talk to me more at lunch about Butrans so he told me to see Marcy,his Office Manager/Nurse,i saw Marcy and booked a lunch for Feb.22nd as Marcy said dr.patel will want me to give an in-service for all of his staff on Butrans
PPLPMDL0020000001	Highland Heights	OH	44143	2/8/2011	Window call.....asked doc what type of patient he prescribed Butrans for. He said he wrote a script for a BWC patient and that it was not covered - required a PA. i explained that commercial patients fitting the indication and positioning will be the best candidates. i reminded him to be sure to give each patient a savings card.
PPLPMDL0020000001	CLEVELAND	OH	44109	2/8/2011	i talked to Rod Shipley,Pharmacy Manager,about Butrans fpi,black box warning, 5 core messages,medication guide,initiation guide,Butrans patient savings cards and formulary coverage for worker comp,medicaid and commercial plan patients.Rod said Josh gave me incorrect information about Butrans stocking as he does NOT have Butrans in stock,never got the autoshipment and he didnt even know what Butrans was,so he will order 1 carton of each strength today as i gave Rod the Butrans retail pharmacy fact sheet.i asked if Rod and Tamara,Pharmacy technician,saw a place for Butrans in the patients that go to Walmart and they both said so many patients get a lot of Vicodin and Percocet monthly and a lot of tramadol,that Butrans being a transdermal application dosed once weekly would be a lot easier for patients and they would be happier to stock Butrans than all of the pills.i told Rod and Tamara i would follow-up end of month to see if any scripts for Butrans have come through.
PPLPMDL0020000001	Cleveland	OH	44195	2/8/2011	i talked to Cynthia,Pharmacist,about Butrans fpi,black box warning,5 core messages,medication guide,Butrans initiation guide and Butrans patient savings cards for commercial plan patients.i asked Cynthia what clinical benefits she saw in Butrans and Cynthia said once weekly dosing and transdermal delivery in one application were the biggest benefits to their patients instead of dosing pills around the clock.i asked Cynthia who orders the narcotics,as this is a CII medication and she said i needed to speak with David,Pharmacy manager,about Butrans and she said to show him the initiation/titration guide and Butrans savings cards and talk to him about rebate offer when ordering Butrans.Cynthia asked about workers comp and medicaid coverage for Butrans so we discussed coverage for these patients and i asked her if i could set-up an in-service with the surgical pharmacy staff? Cynthia said to follow-up thursday with David and ask him.
PPLPMDL0020000001					

PPLPMDL0020000001	Cleveland	OH	44113	2/8/2011	i talked to dr about Butrans fpi,black box warning,5 core messages,medication guide,Butrans REMS,initiation/titration guide and Butrans patient savings cards.dr said he hasnt heard of Butrans but liked that this was a once weekly dosing application and was transdermal.dr said he has so many patients on Vicodin and Percocet,that he feels Butrans would be a great option for so he asked about formulary coverage for Medicare-50%of practice,25% Medicaid and the rest is commercial plans-i told dr Butrans isnt covered on Medicare,Medicaid requires a prior authorization and commercial plan patients can use Butrans savings cards.i asked dr if he was thinking of opioid naive or opioid experienced patients to start on Butrans? dr said both patients,as he has patients on 1-2 tabs of Vicodin and Percocet that he would like to try Butrans 5mcg/hour and those taking 3-5 tabs of Vicodin or Percocet,he will try Butrans there too.i told dr OxyContin is available,in 7 tablet strengths,with wide coverage
PPLPMDL0020000001	Parma	OH	44129	2/8/2011	As soon as he saw me, Dr Roheny said that he just prescribed OxyContin for a patient. I asked him what patient type he chose it for & he said it was an 80 year-old female patient who had been taking Vicoden around-the-clock. I thanked him & asked him to tell me his thoughts about Butrans after reading the information I gave him on my last visit. He pointed to a large stack of patient charts & told me as soon as he gets through all of them, he would read the information. I delivered 5 core messages & box warning to refresh his memory & handed him an initiation/titration guide. Asked him to look at the chart on pg 6 that shows how to initiate treatment in patients depending on their current opioid therapy. He said that he still wants to read more about it since it just came out. I told him that I understand & would provide him with any information he wanted in order to feel comfortable enough with Butrans to start thinking of patients for whom he may consider it.
PPLPMDL0020000001	Cleveland	OH	44195	2/8/2011	i talked to dr about Butrans fpi,black box warning,5 core messages,medication guide,patient information booklet,initiation guide,Butrans REMS and Butrans patient savings cards.dr said once weekly dosing is much easier than pills around the clock as so many of his chronic pain patients arent compliant with q4-6h dosing and transdermal delivery is ideal in his eyes.i asked if dr has opioid naive and opioid experienced patients? dr said rarely does he see an opioid naive patient,but he does have patients taking Vicodin or Percocet 1-2 tabs a day and would consider Butrans there.i told dr that was a perfect place for Butrans as well as those patients who are taking 3-8tabs of Vicodin a day,he could start them on Butrans 10mcg/hour.dr said he'll try Butrans in a few patients and let me know what happens.we discussed managed care coverage for medicaid,workers comp and commercial plan patients.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44195	2/8/2011	i talked to JoAnne,NP,about Butrans being an option for her patients who are opioid experienced,as thats the majority of her patients.JoAnne said she has a lot of patients on tramadol and a few on Vicodin,dosing around the clock and not always compliant with the dosing regimen and complaining of not liking this q4-6h dosing so she's thinking of Butrans for these patients as its a transdermal delivery and once weekly dosing is more convenient for her patients.i asked what else JoAnne needs from me to feel comfortable when prescribing Butrans and JoAnne said nothing at the moment,she'll call if she has questions.she didnt need any savings cards or patient information booklets at this time.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44195	2/8/2011	i talked to Gail,NP,about Butrans fpi,black box warning,5 core messages,medication guide,Butrans initiation guide and savings cards.Gail said once weekly dosing of Butrans is much better for patients than dosing pills q4-6h as so many of her patients arent compliant with this dosing regimen so she feels a transdermal application delivered once weekly will be much easier for her patients. I asked if Gail ever saw opioid naive patients or had patients taking 1-2 tabs of Vicodin or Percocet daily? Gail said she rarely saw an opioid naive patient but did have patients taking 1-2 tabs of Vicodin or Percocet daily so that would be a good place to try Butrans in a couple of patients and see what clinical results she gets. we discussed medicaid,workers comp and commercial plan patients trying Butrans and Butrans patient savings cards being used only by commercial plan patients.recommended Senokot-S
PPLPMDL0020000001	Twinsburg	OH	44087	2/8/2011	Quick call with Dr Witmer. I introduced myself & Purdue's products & he told me that he does not talk to reps during his days. I told him I had exciting information about a product that just became available for moderate to severe chronic pain & he said he would read information if I left it behind for him but he would not speak to me. I spoke with Shalene, his MA and left a FPI, initiation guide, and my card for Dr Witmer.
PPLPMDL0020000001	Cleveland	OH	44130	2/9/2011	Asked Dr Kamsal what his experience has been with starting patients on Butrans as we discussed during our previous conversation. He said he has not yet started anyone on it. He said that it is very difficult to get a patient to agree to stay on a long-acting opioid once they have experienced the "euphoria" of a short-acting because the patient equates that feeling of euphoria to pain relief. He said that because of this & long-acting opioids not giving the "euphoric" feeling, patients "always" tell him that long-acting opioids don't work as well & he said he has tried every long-acting available. I asked him if the patient is getting adequate pain relief from the long-acting, but not the "euphoria", if he felt a patient would object to it. He said they probably still would want "that feeling". I asked him if since he has not yet tried Butrans, if he would consider it, since it is a molecule that he has not used before. He agreed that if the appropriate pt presents, he will try it.
PPLPMDL0020000001	Brooklyn	OH	44144	2/9/2011	Introduced Butrans to Dr Detwiler, delivering 5 core messages & box warning. He asked if Butrans is like fentanyl or morphine. I told him we do not have comparative data. Discussed various appropriate patient types & presented initiation guide pg 6, showing table & statement that fentanyl patients were excluded from studies. He studied the table for a few minutes as he said that he wanted to get a good grasp of it & process the information. I asked him where he would position Butrans in his practice. He said he is generally pretty conservative with new products. He said that he thinks if a patient was on two or three Vicoden a day & not getting adequate pain relief but were not yet candidates for the fentanyl patch, he would consider Butrans there. Told him that sounded like a great place to start. He asked about cost/mgd care, so we discussed coverage & savings card program. OxyContin reminder for appropriate pts beyond Butrans. Also, he told me that he did sign up for OARS.
PPLPMDL0020000001	Cleveland	OH	44106	2/9/2011	i asked dr if he had started any patients on Butrans,post our lunch discussion? dr said no,he has to remember the name Butrans and also needed me to review the initiation guide as he couldnt remember who the appropriate patient was for Butrans.reviewed opioid naive and opioid experienced and dr said he has a lot of patients on tramadol,so he would consider Butrans there and try it in a few patients and let me know what happens.we discussed managed care coverage.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44130	2/9/2011	Quick call with Dr Panigutti. Introduced Butrans & delivered 5 core messages. Dr Panigutti stopped me & said that they do not treat any chronic pain at their practice. He said that Butrans sounded interesting but that since he only treats acute pain, he would not be able to use it. Reminder for OxyContin for the appropriate patients & seven available tablet strengths. Also spoke with Markie & Melissa regarding Butrans & indication and gave them an FPI for their reference.
PPLPMDL0020000001	Brooklyn	OH	44144	2/9/2011	Asked Dr Miguel if he had had any experience with Butrans since our last discussion when I introduced it to him. He said that he had forgotten but that he remembered that he did want to try it on a few patients who were taking around-the-clock Vicoden. I re-delivered the 5 core messages, presented initiation guide, & went over how to initiate treatment in different types of patients. Also went over titration, managed care, and appropriate patient types. He asked about adverse events, so I showed FPI 6.1. He also asked about managed care coverage. I went over commercial tier 3 coverage, savings cards for patients with commercial insurance or cash pay (told him they could not be used for any government insurance like Medicare or Medicaid). Asked him if he could think of some patients who were taking 2-4 Vicoden per day & who had commercial insurance- he said yes. I asked him if he would prescribe Butrans for those patients & he said he would.
PPLPMDL0020000001	Parma	OH	44129	2/9/2011	Spoke with Janet, pharmacist, & introduced Butrans. She checked her shelf & said that they do have the 5mcg. I reviewed with her the indication, dosing, strengths, appropriate patients,, adverse events, application, avoiding direct heat, CIII, & abuse/addiction potential. She said she can definitely see a place for Butrans in the pain management market, especially with Darvocet being removed. She also suggested that I call on Dr Bruce Long (RHU) & his PA Patty Paczos (Lutheran Hospital) who she is a patient of for arthritis. She said they had just had a discussion about needing to have a medication take the place of Darvocet for some patients. Let her know that I would tell Amy. She did not have any other suggestions for who to call on at this time. Gave her my card & asked her to call me with any questions.
PPLPMDL0020000001	Euclid	OH	44119	2/9/2011	Lunch with Doc and Barb Pritchard, PA. Introduced Butrans, indication, dosing, clinical trial, intiationa and conversion dosing, application and disposal. Asked doc where he would prescribe Butrans. He said he would use it in opioid naive patients. He asked about the MOA and wanted to know if Butrans is indicated for addiction also. I explained no and referenced the FPI. He asked if it is an agonist/antagonist. Barb thought Butrans might be good for patients admitted to hospital - they could get Butrans instead of their vicodin. I explained the potential to cause withdrawal and doc agreed. I explained the savings card program and commercial coverage, medicare/medicaid requires PA. Doc said he could think of appropriate patients and he would try it. Patients needing more than 20mcg/hr might be appropriate for Oxycontin patients.
PPLPMDL0020000001	Euclid	OH	44119	2/9/2011	Lunch with Doc and Barb Pritchard, PA. Introduced Butrans, indication, dosing, clinical trial, intiationa and conversion dosing, application and disposal. Asked doc where he would prescribe Butrans. He said he would use it in opioid naive patients. He asked about the MOA and wanted to know if Butrans is indicated for addiction also. I explained no and referenced the FPI. He asked if it is an agonist/antagonist. Barb thought Butrans might be good for patients admitted to hospital - they could get Butrans instead of their vicodin. I explained the potential to cause withdrawal and doc agreed. I explained the savings card program and commercial coverage, medicare/medicaid requires PA. Doc said he could think of appropriate patients and he would try it. Discussed the max dose of 20mcg /hr. Patients above that might be appropriate for low dose oxycontin.
PPLPMDL0020000001	Brooklyn	OH	44130	2/9/2011	Introduced myself & Butrans to Danielle. She said they had just received their shipment & they do have it on the shelf. She said that they have some customers on "the tablet form". I asked if she was referring to tablets that contain buprenorphine & she said yes. I reviewed with her Butrans indication, single-entity opioid, CIII, appropriate patients, doses/strengths. She thanked me for the information & I let her know I would return regularly to make sure that Butrans prescriptions were going through smoothly & to answer any questions.
PPLPMDL0020000001	Cleveland	OH	44104	2/9/2011	i talked to dr about Butrans fpi,black box warning,5 core messages,medication guide,initiation guide,Butrans savings cards and discussed formulary coverage for commercial plans,medicaid and dr asked about medicare coverage for Butrans and i told dr Butrans wasnt covered on Medicare partD plans.dr said once weely dosing is better in his eyes than patients dosing short-acting opioids around the clock as a lot of times they arent compliant with dosing regimen he gives them.dr said transdermal delivery is also a benefit in his opinion to patients.dr asked if Butrans was lipophilic? i told dr yes and asked why he was questioning this? dr said if patients are malnourised or thin and he decides to start them on Butrans,will the drug absorption be variable,based on those patients having thinner skin? i told dr skin is the barrier to diffusion but if he wanted more information i could fill out an electronic medical information request form and ask his question.dr wanted more information about
PPLPMDL0020000001	Akron	OH	44304	2/9/2011	This my first time in the hospital. Briefly met with Dr Smucker and let him know that we had a new product. Dr Smucker was interested in learning about it and had me set up an appointment with his receptionist Maggie. Also, scheduled lunch with Rachelle.
PPLPMDL0020000001	Westlake	OH	44145	2/9/2011	Holly is new NP at the practice. We reviewed Butrans 5 key messages. She thinks that she will be able to prescribe Butrans since it is a CIII. She had to run so no new info gained.
PPLPMDL0020000001	Cleveland	OH	44143	2/9/2011	Quick call....Discussed the Butrans indication and patient positioning. Also told him about the once weekly application. Gave him and FPI and initiation guide and asked if he would look over the information. He said he spoke with Brad, we reviewed the Butrans FPI and medication guide. He said he has not seen it and did not think they were auto shipped. He has not seen any scripts yet, but said that he would order the starting dose.
PPLPMDL0020000001	Cleveland	OH	44135	2/9/2011	Reminder about OxyContin as an option when Butrans may not provide adequate analgesia. I asked him to recommend Senokot S with opioids.
PPLPMDL0020000001	South Euclid	OH	44121	2/9/2011	Window call....introduced doc to Butrans - the indication and patient positioning. Explained the once weekly application and 7 days of burprenorphine delivery. Asked if he sees a place for Butrans for his patients. He said maybe. Nothing learned. Gave Butrans FPI.
PPLPMDL0020000001	Westlake	OH	44145	2/9/2011	Dr said that he has made some calls (talked to Ron?) and is going to get Butrans on formulary at St John Westshore. He said that he would like to gain experience with Butrans in house first where you can keep a good watch on the patients to see how they do and to figure out conversions and dosing. I asked what I can do to help him, he said he will contact me if they need more info but at this point he has done everything that needs to be done to get it on formulary.
PPLPMDL0020000001	Westlake	OH	44145	2/9/2011	Quick call, Dr said he does not like to use pain meds, but wanted to know what Butrans was. We reviewed the 5 key messages and the dosing.
PPLPMDL0020000001	Stow	OH	44224	2/9/2011	Dr said he has not started patient on Butrans yet. I asked him if he ever called the medical services about his question on how does Butrans affect the efficacy of other opioids. I asked if we could fill out a medical request form and they can email him his answer. He liked that, so we filled out MERF. HE said he doesnt think that this will have a huge part in the pain clinic because of the doses his patients come in on. I asked what the typical dose of Vicodin or Percocet patients are on when they get there and he said 8 pills a day. He said he does not see alot of patients who are opioid naive or on low dose. I asked where he was writing Ryzolt and he said he wrote that in conjunction with other opioids.I told him Ryzolt was not studied with other opioids. HE said this would be great in little old ladies. I said he needs keep in mind if they are re on medicare, he will more than likely have to have a prior auth. DISCused his patients and flexibility of Oxyctnoin and 7 strengths.
PPLPMDL0020000001					

	Westlake	OH	44145	2/9/2011	We reviewed the Butrans FPI, indication, dosing, warnings, medication guide. He said he could not think of a specific patient, but he said thinks it would be good for his little old ladies with compression fractures. We discussed managed care for Butrans and the savings program and the fact that patients on Med D may be a prior auth or not covered. He said he will probably not prescribe it for a few months to wait and see which Drs are using it. He also said he thinks that because duragesic is generic, managed care may want them to use it before Butrans. We did go over the initiation guide and the patients who might be appropriate for Butrans. He asked medical services department- if a patient has skin irritation from other transdermal systems, would they be likely to have skin irritation from Butrans. We discussed where OxyContin may be appropriate when Butrans may no longer provide adequate analgesia. I went over Butrans 5 key messages and the medication guide with Claudia.
PPLPMDL0020000001	Euclid	OH	44119	2/9/2011	Butrans discussion with pain mgmt clinic in the hospital. spoke with nurses, PA, and doc. See notes for Dr. Saeed.
PPLPMDL0020000001	University Heights	OH	44121	2/9/2011	Quick call...introduced doc to Butrans, the indication, CII status, and the once weekly application. Ask him if he thought he could use a product like Butrans in his practice. He said maybe and asked how much it costs. Briefly explained the savings card program. He asked about the availability of Oxycontin in pharmacy as some patients stated they were unable to get the product. I explained that we have to knowledge of any outages. Asled him for store specifics but he did not have any.
PPLPMDL0020000001	Euclid	OH	44119	2/9/2011	Spoke to Clarence, fill-in pharmacist, about the stocking of Butrans. He confirmed both the 5 and 10mcg are there but he had not seen or heard about. I discussed the recent launch, indication, positioning, dosing, and application and disposal. He did not know about the relay health program. I explained the savings card program for Butrans.
PPLPMDL0020000001	Fairlawn	OH	44333	2/9/2011	I introduced Butrans to the pharmacist, Jessica, and she informed me that she already had the 5mcg stocked. I asked if she would order the 10 and 20 mcg and she agreed she would.
PPLPMDL0020000001	Westlake	OH	44145	2/9/2011	Quick call, Dr wanted to know what Butrans was, I reviewed the Butrans FPI, indication, dosing, initiation, medication guide. I asked her thoughts and she thought it could be a good long acting option.
PPLPMDL0020000001	Cleveland	OH	44135	2/9/2011	Spoke with Erica, we reviewed Butrans 5 key messages and medication guide. She did not have any thoughts about it and said that she will just have to see what the Drs thinks about it. She said they do have a lot of pain patients who take short acting around the clock.
PPLPMDL0020000001	Akron	OH	44304	2/9/2011	Let Dr. Smucker know that we had a pain product called Butrans that I would like to discuss. he was interested and had me set up an appointment with his receptionist Maggie.
PPLPMDL0020000001	Cleveland	OH	44106	2/9/2011	I talked to dr about Butrans and asked if she has started any patients yet? dr said no she hasnt so I showed dr Butrans initiation guide and asked if she was thinking of an opioid naive,or a patient taking 1-2 tabs of Vicodin,that she could start on Butrans 5mcg/hr or a patient taking 3-8 tabs of Vicodin? dr said they prescribe some Vicodin in out-patient,but rarely,the residents mainly prescribe tramadol as its unscheduled.i asked dr if she had patients on 300-400mg tramadol? dr said yes.i told dr thats the patient to try Butrans 10mcg in or an opioid naive at the 5mcg/hr dose.dr said that made more sense and she would look for 1 patient to try Butrans in dr asked if Butrans was on formulary? i told dr no but that im working on this with pharmacy and pain management doctors to support Butrans and help get this on formulary.dr said that would make it a lot easier to prescribe in hospital.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	2/9/2011	worked pharmacy and pain management
PPLPMDL0020000001	Fairlawn	OH	44333	2/9/2011	I presented Butrans including the FPI and discussed both opioid naive and opioid experienced patients. After I questioned Dr. Domdera I discovered that he felt more comfortable prescribing Butrans for patients who are opioid naive, or currently failing on NSAID's or Cox2's. I asked for commitment for 2 patient starts by next Wednesday and he agreed.
PPLPMDL0020000001	Cleveland	OH	44103	2/9/2011	I talked to dr about Butrans fpi,black box warning,5 core messages, medication guide,Butrans REMS program,initiation/titration guide,Butrans patient savings cards and formulary coverage for workers comp,medicaid and commercial plan patients,dr is the Director of Pain Management at St.Vincent Charity Hospitals and told me if he starts prescribing Butrans,his colleagues(attending physicians)will start to write the drug.i told dr i met with Pharmacy,In-Patient, and dr said Jodie,Clinical Business Manager is the person he works closely with so that was good i shared the information with her.dr asked if Purdue was going to have speakers for Butrans as he would be interested in being a speaker for Butrans. I told dr that Purdue was going to have speaker programs and I would share his interest with my Manager.i told dr he clearly has to start a few patients on Butrans,opioid naive or experienced to get some clinical experience,dr agreed and said he would try Butrans in some patients and let me
PPLPMDL0020000001	Akron	OH	44303	2/9/2011	I introduced Butrans and the FPI to the pharmacist, Rod. I discussed strengths and titration. He told me they currently did not have any stocked but ordered both the 5 and 10 mcgs while I was there.
PPLPMDL0020000001	Cleveland	OH	44106	2/9/2011	I talked to dr about Butrans indication,black box warning and Butrans initiation/titration guide and asked if dr is he going to start 1 patient on Butrans,would that be an opioid naive or experienced patient?dr said he would consider either patient,but majority of his patients have tried at least 1 short-acting opioid.i asked dr to think of patients taking 300-400mg tramadol,opioid experienced,to start on Butrans 10mcg/hour and get some clinical experience with Butrans.dr agreed and asked what was insurance coverage for commercial plans,medicaid and medicare.i discussed each plan with dr and commercial plan patients using Butrans savings cards.i asked Lisa,patient care coordinator,who handles re-fill line and takes/responds to every medication change request daily-Lisa said there are 25-30 patients calling daily requesting a new medication,she pulls charts,talks to Med Assistants and then to doctors about an alternative medication,so i talked to Lisa about Butrans fpi and initiation
PPLPMDL0020000001	Richmond Heights	OH	44143	2/9/2011	Window call...told doc about Butrans - a once weekly application for treating chronic pain. Gave him a titration guide and discussed the appropriate pateint positioning. Nothing learned.
PPLPMDL0020000001	Cleveland	OH	44127	2/9/2011	dr said he knew about Butrans,buprenorphine,once weekly and transdermal application as my partner told him about.it.i asked dr had he started any patients on Butrans yet based on his discussions with Ashleigh?dr said no.i asked why and dr said he didnt think of opioid naive patients,as he would go to short-acting opioids first,then long-acting.i asked if dr had patients taking 1-2 tabs of Vicodin or Percocet daily? dr said yes.i told dr that these are patients that you could initiate Butrans 5mcg/hr and showed initiation/titration guide,dr said that made sense.i asked dr if he would consider opioid experienced patients,taking 3-8 tabs Vicodin or Percocet,to start on Butrans? dr said he has a lot of those patients in this office and yes would consider them,but depends on insurance as he has a lot of medicaid here and some commercial,so we discussed both plans.i asked dr to think of 1-2 patients to try Butrans in and i will follow-up in next week.dr agreed to this.
PPLPMDL0020000001	Cleveland	OH	44104	2/9/2011	i talked to dr about Butrans FPI,black box warning,5 core messages,medication guide,Butrans REMS program,initiation/titration guide,Butrans patient savings cards and formulary coverage for medicaid and commercial plans.dr said he has a lot of patients on Vicodin and Percocet and would think of Butrans for these opioid experienced patients.dr said he wouldnt think of Butrans for opioid naive,as he likes to go from NSAID's to short-acting opioids,1-2 tabs a day,then makes out at #4/day and will only give 60 pills monthly,nothing more than that.if patients are taking 4 pills of short-acting opioids and not getting pain relief,then he'll consider a long-acting opioid.dr said once weekly dosing is much more convenient and easier for patients than dosing q4-6h short-acting opioids and dr said he likes transdermal delivery better than pills.i asked dr to think of 1-2 opioid experienced patients to try Butrans in and get some clinical experience.dr agreed. i recommended Senokot-S
PPLPMDL0020000001	Stow	OH	44224	2/9/2011	Introduced Butrans, reviewed FPI, indication, boxed warning, dosing and titration guide. When I reviewed section on QT prolongation and family history and said that is a very importantnct thing to be discussing with all physicians. I asked where he would be using this in his practice and he said alot of the patients they see areon opioids so probably patients who are on Opioids. I reviewed the initiation of opioid experienced patients. HE said he liked the fact that it was once a week. HE asked if it will stay on that long. Also, asked about coverage. Reviewed coverage. HE said he would try it, Started to discuss Oxycontin and he changed the subject to Ryzoit and asked about it and wanted to discuss it more. I discussed what it is and patient types, managed care coverage. I asked if he has written it and he said no, he doesnt write alot of long acting tramdol
PPLPMDL0020000001	Independence	OH	44131	2/9/2011	Asked Dr Rob his thoughts on Butrans & if he has read any of the information I had given him. He asked me to refresh his memory. I delivered indication, seven days of buprenorphine delivery in one Butrans transdermal system, CII message/box warning. Showed him pg 6 in the initiation guide & told him how Butrans can be used in both opioid-naive & opioid-experienced patients. He asked the dosing, so we went over that & I explained titration to him. I asked if he could see a place for it & he said yes, but then walked away. Spoke with Maria & reminded her of Butrans & indication as well as savings cards.
PPLPMDL0020000001	Cleveland	OH	44106	2/9/2011	i talked to dr about Butrans indication,initiation/titration guide and where dr feels comfortable thinking of patients to start on Butrans.dr said either opioid naive or experienced,he would consider both as he likes transdermal delivery and once weekly dosing.dr said he has so many patients on Percocet and Vicodin,that he feels a lot of times patients dont really take their medication as they are supposed to do,around the clock whether it be q4-6h, and then they come to see him and are smiling,happy,but then say their pain is above 10.dr said its frustrating.i asked if dr could think of an opioid naive patient and someone taking 3-8 tabs Percocet or Vicodin daily and try Butrans in these 2 patients? dr agreed and said he'll prescribe but wanted to know insurance coverage for Medicaid,workers comp and commercial plans-discussed Butrans savings cards for commercial plan
PPLPMDL0020000001	Stow	OH	44224	2/9/2011	Spoke with Holly and she said she has not seen script for Butrans and will when she gets a script. I mentioned that alot of the pharmacies are stocking and have been auto shipped. She said it is their policy. She said it is their policy. She mentioned the reformulation of Oxycontin and patients were looking for OCs but it seemed to have died down. I asked if Drs have switched patients off of Oxycontin and she said no, most are staying on.Reminded of SenS in patients who are opioid induced constipation
PPLPMDL0020000001	Cleveland	OH	44106	2/9/2011	i talked to dr about Butrans fpi,black box warning,5 core messages,medication guide,Butrans initiation guide and Butrans patient savings cards.dr said once weekly dosing is much easier for his patients than around the clock dosing of Vicodin and transdermal delivery is much better in his eyes than pills.i asked dr if he was thinking of opioid naive or opioid experienced patients to try Butrans.dr said both patient types,so we looked at initiation guide and i asked dr to think of patients either opioid naive or taking 1-2 tabs of Vicodin,to start on Butrans 5mcg/hour or patients taking 3-8tabs of Vicodin daily,they could start on Butrans 10mcg/hr after proper tapering of their current opioids.dr said the dosing seemed easy but asked how much it cost? we discussed commercial plan patients using Butrans patient savings cards,medicaid patients needing prior authorization and discussed workers comp coverage.recommended Senokot-S
PPLPMDL0020000001	Westlake	OH	44145	2/9/2011	We reviewed the Butrans FPI, indication, warnings, dosing, initiation guide and medication guide. Dr thinks that his biggest problem with long acting is that patients will not want to come off of their short acting around the clock to try something long acting. We discussed those patients who might be able to try Butrans before going to vicodin around the clock. He said that he would try it and see if it has a place in his practice. We discussed patients when Butrans may not provide adequate analgesia and OxyContin as a Q12hr option.
PPLPMDL0020000001	Westlake	OH	44145	2/9/2011	We reviewed the Butrans FPI, indication, warnings, dosing, initiation, medication guide. The Dr had questions about QTc interval and we reviewed section 12.2 in the FPI. He said that he would try it and did not have any specific patients in mind and did not know where it would fit into his practice at this point. He will try it in a few patients and let me know then. We discussed OxyContin as an option to short acting opioids around the clock.
PPLPMDL0020000001	Independence	OH	44131	2/9/2011	Dr Jack said that he finally did get a chance to start reviewing the Butrans information I gave him. He said that he was reading about the morphine equivalents & showed me in the FPI section 2. He said that that was all the further he has gotten so far but that it has caused him to start thinking of places that he could use Butrans. I asked him what information specifically he needs in order to feel comfortable with prescribing Butrans & he said that by the time he reads all the information, he will have all the facts he needs to find the proper place for it. He asked that I continue to follow up with him & check in to see how he is doing in his information reading. I asked him to think of any specific questions that he might have so that I can address them when I return. Also spent time speaking with Maria about the practice & reminded her of Butrans as well.
PPLPMDL0020000001	Beachwood	OH	44122	2/10/2011	Spoke with Shelly and followed up on Butrans stocking. Asked her if she had received a shipment, but she said they did not. She checked their computer system & the shelves & said that it shows that no Butrans has ever been received. Butrans indication, dosing, appropriate patient reminder. Also let her know we have started promotion with physicians and asked if she would proactively order Butrans. She said she has been "burned" by too many "new" products & that she would wait for a prescription before ordering. I let her know that physicians are asking who has it stocked & that many other chains were auto-shipped.
PPLPMDL0020000001	Parma	OH	44129	2/10/2011	Introduced myself & Butrans to Lucy, a newly practicing nurse practitioner. Delivered 5 core messages & alerted her to black box warning. She said that she avoids prescribing narcotics when at all possible. I told her that she was right in being very cautious in prescribing any type of opioid & told her she should be just as cautious in prescribing Butrans. Presented initiation guide & showed pg 6 for initiating treatment in opioid-naive & opioid-experienced patients. We discussed appropriate patient types, managed care, and savings program. Dr Kushnar asked about the "new" OxyContin. I went over field card bullet points. Lucy asked how OxyContin was different from Percocet. I told her we do not have comparative data & showed Lucy an OxyContin conversion guide & showed her conversion ratio estimates & an example of converting a pt on Percocet around-the-clock to OxyContin. Also discussed OxyContin q12h dosing.
PPLPMDL0020000001					

	Parma	OH	44129	2/10/2011	Asked Dr Gigliotti to share his experience of using Butrans so far. He said that he has not yet prescribed it, but added that he is still excited about it. I asked him what patient type he was thinking of for Butrans & he got out the initiation guide I had given him & flipped through it. I reminded him that he had told me that he thought opioid-experienced pts may be the place to start & he said that he thought that was where he would use it. I told him this was a great starting point. I asked him what else he needed to know to feel comfortable enough to start prescribing Butrans. He did not respond. I let him know that I would return to follow up & that I wanted him to be completely comfortable in prescribing Butrans & that he was right in being cautious in prescribing as he would be with other opioids. He told me that he wishes he did not have a DEA number. I told him I empathized but reminded him that there are still pts who are appropriate & those are the pts we're focusing on
PPLPMDL0020000001	Cleveland	OH	44130	2/10/2011	Quick call with Dr Fedorko. He saw the Ryzolt Value Card in my hand & shook his head- I asked why & he said that insurance is always "giving him trouble". Focused him in on Medco, Medical Mutual & Blue Cross/Blue Shield where Ryzolt has 3T coverage. Reminded him to give the Ryzolt value card with each prescription for those patients with those plans. He then said that he just saw someone who was "hooked" on tramadol. I agreed that tramadol does have abuse/addiction potential & that he should use caution in prescribing any opioid, including Ryzolt, OxyContin, & Butrans. He asked if Butrans was a patch of OxyContin. I told him Butrans is a transdermal system that releases buprenorphine for seven days & reviewed indication with him. He said that was "good" because he would be more likely to prescribe it. He asked me again to set up an appointment so we could go over the details & I let him know that I have one in a few weeks.
PPLPMDL0020000001	Beachwood	OH	44122	2/10/2011	Followed up with Dr Yokiell regarding use of Butrans. I asked him what his experience has been thus far & he said that he has not yet prescribed Butrans & that he had a couple of questions for me. He asked what the recommendation was if a patient was already taking an opioid. I showed him in initiation guide the 2nd bullet point under the tables regarding tapering their current opioid to 30mg morphine equivalent. I asked his thoughts on that & he said it was "no big deal". I asked how long that would take. He said it would depend on what dose they were currently on but said if, for example a pt was on 60mg equivalent of morphine, it would take a few days to taper them. He also asked if a pt was taking Percocet if they could stay on it for breakthrough while on Butrans. I showed FPI 2.4 about supplemental analgesia. I asked if there was any additional information he needed to start prescribing Butrans & he said no & that he is ready to start prescribing now.
PPLPMDL0020000001	Westlake	OH	44145	2/10/2011	Dr has not tried Butrans yet, but said that he would. We reviewed the Butrans initiation guide again and discussed appropriate patients vs those who are taking more than 80mg of oral morphine equivalent. He thinks that he will start trying it for BWC patients who are taking tramadol or 3-4 5mg hydrocodone per day. Reminder that OxyContin is still an option for patients when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Parma	OH	44129	2/10/2011	Spoke with Rick regarding Butrans stocking. He confirmed that they did receive a shipment of 5mg & 10mcg strengths. Reminded him of indication & appropriate patient types. Also addressed application & adhesion (including taping edges with first aid tape if Butrans loosens). Also went over medication guide. I asked what other questions he had & he said he did not have any. Gave him my card & told him I would be available to answer any questions or address any problems should they occur. Also let him know I would return to follow up for feedback.
PPLPMDL0020000001	Parma	OH	44129	2/10/2011	Introduced Butrans to Dr Kushnar & delivered 5 core messages & alerted them to black box warning. Dr Kushnar immediately said, "We don't like narcotics here." I told her that I empathized with them & said that she is right in being cautious when selecting appropriate patients for any opioid. I told her she should be just as cautious with Butrans. I asked her if she treats pts for moderate to severe chronic pain. She said she does- that she starts with NSAID's & Cox-2's & moves to opioids only when absolutely necessary. She asked if Butrans is like Duragesic. I told her we have no comparative data & showed initiation guide pg 6. Asked how often pts she treats for chronic pain complain of inadequate analgesia on their current treatment & request higher dose or switch of medication. She said it happens often. She asked about managed care- I went over commercial tier 3 coverage & savings cards. Also read OxyContin field card in response to her asking about "new" OxyContin.
PPLPMDL0020000001	Mayfield Heights	OH	44124	2/10/2011	Quick call.... Asked doc what feedback she has gotten from recent starts on Butrans. She said she needed more savings cards because she has been writing it. She had not heard back yet but thinks one patient might have had a coverage issue. Gave her more cards and reminded her to do the commercial plan plans. Oxycontin reminder.
PPLPMDL0020000001	Mayfield Heights	OH	44124	2/10/2011	Spoke to WWarren and confirmed stocking of the 5 and 10mcg of Butrans. I told him that Dr. Laham asked if he was carrying Butrans and I was able to tell him that it was ordered. Warren stated they have not dispensed it yet.
PPLPMDL0020000001	Mayfield Heights	OH	44124	2/10/2011	Window call....asked doc what success he has had with Butrans since my last visit. He said he has not had an opportunity to prescribe it yet. I talked about the appropriate positioning - opioid naive and opioid experienced and commercial plans. He said ok/
PPLPMDL0020000001	Mayfield Heights	OH	44124	2/10/2011	Discussed the Butrans indication, positioning, dosing - for naive and opioid experienced, application and disposal of Butrans. She asked about coverage. I explained 3rd tier status for commercial plans and savings cards program. She liked the idea of a 7 day application but was concerned about coverage. She said she would likely use in opioid experienced patients and thought it would be good for former darvocet patients. She asked aboutuse in the elderly. I explained no dosing adjustment required and to use caution in elderly. Oxycontin reminder.
PPLPMDL0020000001	Parma	OH	44129	2/10/2011	Spoke with Karen about patient education & pain diaries. Also tried to get information about Jen Hula, the NP that joined the practice recently. Karen said that she is still waiting to get her DEA number assigned & does not actually even have her NPI# yet. Karen said that Jen filed for each of them awhile ago & she should be hearing back any day now. I reminded Karen of our conversation about Butrans at lunch & asked if she knew if Laura had used it at all yet or if they needed more savings cards. Karen said that she doesn't think any Butrans has been prescribed there so far, but that I would need to check with Laura to be sure. Laura came out of a patient room, said hello & that she needed to get to the other patient in the next room & then walked away. I had to leave to go to lunch, so I confirmed my lunch with them for next Friday with Karen & let her know I would be back to follow up but to call me in the mean time if she ran across any questions.
PPLPMDL0020000001	Parma	OH	44134	2/11/2011	Introduced myself & Butrans to Margarita. Reviewed indication, appropriate patients, dosing, initiation of therapy & application. I told her that I have started promoting in the area & that many pharmacy chains were auto-shipped, but since CVS was not, I asked her if she would order a box of each strength so that I could include their store in the list of pharmacies that have Butrans on the shelf. She agreed to do this. Discussed managed care & e-voucher.
PPLPMDL0020000001	Richmond Heights	OH	44143	2/11/2011	Quick call....introduced doc to Butrans. Explained the indication and patient positioning. He said he would use for opioid naive patients maybe. He asked how it differs from fentanyl. I explained there is no head to head data, butrans is a 7 day system and that a different molecule. He said he would look at the literature. Nothing learned.
PPLPMDL0020000001	Brooklyn	OH	44144	2/11/2011	Spoke with Kristen who said that she didn't think they had any Butrans in stock. I asked her to check because they may have received an auto-shipment. She checked & they did have the 5 & 10mcg strengths in stock. I reviewed with her the indication, dosing, application, & appropriate patients. Also went over savings cards for commercial insurance patients or those who are cash-pay. Gave her my card & let her know I would return to follow up with them.
PPLPMDL0020000001	Cleveland	OH	44113	2/11/2011	I talked to dr about Butrans fpi,black box warning,5 core messages,medication guide,initiation guide and Butrans patient savings cards.dr said he liked once weekly dosing option and transdermal delivery instead of pills around the clock.dr asked about insurance coverage for workers comp and commercial plans,so i showed Butrans savings cards for commercial plan patients.i asked if dr would consider opioid naive or experienced patients to start on Butrans? dr said he would consider both patients,so either Butrans 5mcg/hr or 10mcg/hr.i asked dr to think of a few patients to start on Butrans and i will follow-up with him,dr said he's out of town after today,until March 6th,so he'll think of patients today and then when he returns from vacation.i recommended senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	2/11/2011	worked orthopedic dept-see call notes on Dr.Bohl and Dr.Berkowitz
PPLPMDL0020000001	Cleveland	OH	44109	2/11/2011	i met dr at lunch with dr geho,dr campbell and mary jo slattery,cnp,in the senior health and wellness center,as dr is a 1st year resident and his specialty is gynecology/obstetrics,we discussed Butrans fpi briefly and black box warning. dr asked if he could use Butrans in post-op patients? i told dr no,he can't do that and that is a contraindication,so we discussed each one of those again in Butrans fpi.dr said he probably wouldnt have a place for Butrans in his practice as majority of his patients are pregnant.
PPLPMDL0020000001	Westlake	OH	44145	2/11/2011	Spoke with Amin and tech, they do not have Butrans stocked and have not seen any scripts yet. They will stock when a script comes in. We discussed Butrans medication guide. I asked if they could think of any patients on 3-4 5mg vicodin per day who might benefit. They could not off hand but they will think about it. Reminder about OxyContin as an option when Butrans may not provide adequate analgesia. I asked them to recommend Senokot S with opioid scripts and they do.
PPLPMDL0020000001	Cleveland	OH	44109	2/11/2011	i talked to dr about Butrans fpi,black box warning,5 core messages,initiation guide,Butrans patient savings cards and asked dr where he would feel comfortable trying Butrans? dr said in either opioid naive or experienced patients.i showed dr Butrans initiation guide and asked him to think of 1 patient with commercial insurance to try Butrans,dr agreed.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	2/11/2011	i asked dr if he started 1 patient on Butrans yet? dr said no but he has someone in mind thats coming in to see him next week,with commercial insurance, and patients taking 1-2 tabs Vicodin daily and not happy with taking Vicodin for pain.i told dr that was great,give patient Butrans savings card and patient information booklet and i will follow-up next week.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	2/11/2011	i talked to dr about Butrans's place in the out-patient and in-patient setting at University hospitals,dr said Butrans is a great option for patients who are either opioid naive,as he said he does see some of those patients,and majority of practice is opioid experienced so he'll be prescribing Butrans for them.dr said once weekly dosing,transdermal application are both benefits to his patients and he will support this drug to get on formulary in the hospital. we discussed the drug review form necessary for him to complete and give to pharmacy,for P&T committee review.
PPLPMDL0020000001	Westlake	OH	44145	2/11/2011	Quick call to follow up on getting Butrans on formulary at UH. He said it is all taking care of on his end and he will let me know if they need anything from Purdue.
PPLPMDL0020000001	Akron	OH	44319	2/11/2011	Briefly discussed Butrans with the physician through the window. Went over the indication and the delivery system and the Dr said he wanted to do his own research and asked if I could come back next Friday. Dr.said he is currently writing a lot of hydrocodone.
PPLPMDL0020000001	Akron	OH	44312	2/11/2011	Spoke with the receptionist Diane about scheduling a lunch since I have a product that Dr. Kile is unfamiliar with. As I was presenting what Butrans was, Dr. Kile came to the window and gave me a quick minute to just introduce the indication and the once a week delivery system. Diane is checking with the other physicians about a lunch opportunity.
PPLPMDL0020000001	Parma	OH	44129	2/11/2011	Spoke with Fred & followed up on Butrans stocking. Fred said that they did receive the auto-shipment but that Steve sent it back & was angry that he had been auto-shipped a CIII. Fred said that he even asked Steve to please keep the shipment because he feels there is a definite place for Butrans, but Steve refused. Fred said that Steve prefers to keep as few narcotics in stock as possible. Fred said they would have to have a regular flow of scripts to stock Butrans regularly. I let him know that I would follow up & asked if there were any physicians the area that he has thought of other than Dr Nickles who may be interested & he said that he had not. Asked him to think about this & told him I would be back to see if he thought of anyone. Also discussed OxyContin stocking- Fred said that obviously Steve likes to stock CII's even less than CIII's, so they have very few OxyContin on their shelf & Steve would rather lose business than keep more on hand.
PPLPMDL0020000001	Cleveland	OH	44109	2/11/2011	worked geriatric floor - see call notes on dr campbell, dr geho and mary jo slattery, cnp - discussing Butrans. saw Katie Austen,geriatric fellowship coordinator and talked about dates in April to have lunch with the fellows and discuss Butrans
PPLPMDL0020000001	Cleveland	OH	44109	2/11/2011	I talked to Mary Jo.CNP.about Butrans fpi,black box warning,5 core messages,Butrans initiation guide,Butrans patient savings cards for commercial insured patients and Mary Jo asked about medicare partd coverage for Butrans.i told Mary Jo there was no coverage on medicare part d for Butrans.i asked if she treated any patients less than 65,to be considered opioid naive or experienced where Butrans could be an option? Mary Jo said yes she had a lot of patients less than 65 and some patients she knows dont want to take Vicodin or Percocet so she thinks a transdermal application,once weekly,could be an option for them.i asked Mary Jo to think of 2 patients like that with commercial insurance to try Butrans,she agreed.recommended Senokot-S
PPLPMDL0020000001	Westlake	OH	44145	2/11/2011	I let Vanessa know that there is no patient assistance program for Butrans at this time. She will pass the info along to the Dr.
PPLPMDL0020000001	Cleveland	OH	44106	2/11/2011	worked pain management dept and pharmacy-in patient

PPLPMDL0020000001	Parma	OH	44129	2/11/2011	Introduced Butrans to Dr Rossi, delivered 5 core messages & alerted her to box warning. She said that she is tired of prescribing anything that is addictive. She said that for chronic issues such as low back pain she refers to pain management. She said she was looking forward to getting EMR so that she can look at the pharmacies where patients go to make sure they are not drug seekers. I asked her if she is enrolled in OARS-she said no & was not interested. I asked if there were any chronic pain conditions or patients that she does treat & she said a few. She asked if they could take other pain medications while on Butrans & I showed FPI 2.4. Discussed appropriate pt selection. She said many people will manipulate the patch or put it in their mouth to abuse it. I told her that those would not be patients for whom she should prescribe Butrans or any other opioids & asked her to think only of the patients she trusts & are appropriate when thinking of patients to try on Butrans.
PPLPMDL0020000001	Richmond Heights	OH	44143	2/11/2011	Discussed the core Butrans messages - indication, CII, 7 day Buprenorphine deliver, clinical trials. He asked how long it takes for patients to get analgesic effect. I referenced the FPI and the quantifiable amounts after 17 hrs. I confirmed that supplemental agents could be used for buthe said he prefers not to do that because it complicates patients medications(too many). He looked at the conversion dosing from other IR opioids and thinks the indication should be mild to moderate. I explained the positioning is for opioid naive or low dose IR opioids. He also asked if BWC is the only coverage. I explained the 3rd tier coverage with commercial plans and the saving cards for those patients. He committed to prescribing Butrans, probably for opioid experienced. Oxycontin reminder....appropriate for patients needing more than 20mcg/hr of Butrans.
PPLPMDL0020000001	Cleveland	OH	44109	2/11/2011	I asked dr what his thoughts were on Butrans,post our last discussion last Friday,and where it fit into his practice? dr said he liked once weekly dosing and transdermal delivery,compared to pills q4-6h,but he desnot prescribe a lot of narcotics so he's not sure who the right patient is at this time.I asked if dr would consider Butrans for an opioid naive patient? dr said he might,so I showed dr Butrans initiation/titration guide and looked at opioid naive patient and also told dr patients taking 1-2 tabs Vicodin or Percocet,could also start on Butrans 5mcg/hr.dr said that was easy and he'll try and think of 1 patient to try Butrans in and see what clinical results he gets from Butrans.I asked dr to focus on commercially insured patients to try Butrans and use Butrans savings cards. recommend Senokot-5
PPLPMDL0020000001	Cleveland	OH	44113	2/11/2011	I talked to dr about Butrans fpi,black box warning,5 core messages,medication guide,Butrans initiation guide and Butrans patient savings cards.dr said he likes transdermal delivery and in 1 application,thats much easier for his patients than dosing around the clock Vicodin.I asked dr if he would consider Butrans for opioid naive or opioid experienced patients? dr said probably his opioid experienced patients so I showed dr initiation/titration guide with this information and asked dr to think of patients taking 3-8tabs of Vicodin daily and starting them on Butrans after proper tapering of their current opioids,dr said that sounded easy and would try Butrans and see what clinical results he see's in patients.dr asked about insurance coverage for workers comp,medicaid,medicare and commercial plans,so we discussed each plan's coverage for Butrans.I recommended Senokot-5
PPLPMDL0020000001	Parma	OH	44129	2/11/2011	Introduced myself & Butrans to Dr Gallagher delivering 5 core messages & reviewing box warning. He asked how it compared to Duragesic. I told him we have no comparative data & presented initiation guide pg 6-I asked if that helped him with where to position Butrans & he said it did & that he was glad that it was for the more "moderate" side. He asked about side effects & I showed FPI 6.1. Also discussed titration & steady state in 72 hrs. He said he is the director of palliative care & is intrigued by Butrans & sees a definite place for it. I asked what types of patients he may use it for & he said he would use in both opioid-naive or opioid-experienced pts. Discussed initiation of treatment for both types including taper for those on higher doses of opioids. He asked about cost/mgd care so I reviewed coverage & gave savings cards for cash/commercial insurance. Also went over Butrans & savings cards with Lynn. Dr Gallagher asked me to follow up in a month so he has a chance to use it
PPLPMDL0020000001	Cleveland	OH	44109	2/11/2011	I asked if dr had seen any patients this week,where he considered Butrans as an option? dr said no as he worked mainly in the hospital and saw cash paying patients.I asked if dr could focus on an opioid naive patient or patient taking 1-2 tabs of Vicodin or Percocet,to start on Butrans 5mcg/hr and commercially insured? dr said yes and when he is in clinic,out-patient,next week,he'll remember Butrans as an option.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44109	2/11/2011	I asked if dr considered Butrans as an option for any patient,post our last lunch discussion last Friday? dr said no,he hasn't. I asked dr why? he said he just hasn't thought of Butrans,so I asked if dr needed any more data/information from me to feel comfortable finding that 1 patient to start on Butrans? dr said not clinically but he was concerned about insurance coverage and asked about workers comp coverage as he couldn't remember that,so we talked about workers comp coverage for Butrans and I asked if dr knows a patient is taking 1-2 tabs of Vicodin or Percocet and has workers comp insurance,will dr try Butrans in that patient? dr said he will consider it.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44109	2/11/2011	I talked to dr about Butrans fpi,black box warnings,5 core messages,butrans patient savings cards and formulary coverage.dr said he has some patients that he thinks could benefit from once weekly dosing and transdermal delivery as there are some patients that are afraid to try a stronger opioid like Vicodin or Percocet.so I asked dr to think of opioid naive or experienced patient,showed initiation guide and told him to focus on Commercially insured patient.dr agreed.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44109	2/11/2011	I asked dr if he started any patients on Butrans yet? dr said no,it comes down to insurance coverage and he has so many cash paying patients in the hospital that he cant think of Butrans for them.I asked dr to think of 1 commercially insured patient,in out-patient center,to start on Butrans,whether it be an opioid naive or opioid experienced patient.dr said he does see patients in out-patient center taking 1-2 tabs of Vicodin,so he would consider Butrans there.I told dr that was perfect but focus on commercially insured patient. recommended Senokot-s
PPLPMDL0020000001	Cleveland	OH	44109	2/11/2011	I asked dr if he read through Butrans fpi and had any questions or if he needed more information? dr said he only skimmed through fpi but thought once weekly dosing and transdermal application were 2 advantages for his patients.I showed dr Butrans initiation guide and asked if he would start an opioid naive or experienced patient on Butrans? dr said most of his patients are opioid experienced so he would start there,I asked if dr had patients on tramadol 300-400mg or Vicodin 3-8 tabs daily? dr said yes,I told dr that's where he could initiate Butrans 10mcg/hr after proper tapering of patients current opioids,dr said that was easy and he would start a few patients and let me know what clinical results he see's in patients.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44109	2/11/2011	I asked dr if she started any patients on Butrans per our lunch discussion last Friday? dr said no,but she has patients in mind that are taking tramadol and vicodin around the clock and she would rather have them on a transdermal medication.I asked dr to think of patients taking 3-8 tabs of Vicodin or 300-400mg tramadol to taper appropriately and start on Butrans 10mcg/hr and to focus on commercially insured patients so they can use Butrans savings cards.dr said she will and she also has some Medicaid patients in mind and desnot care if she has to complete a prior authorization form for them. recommended Senokot-5
PPLPMDL0020000001	Westlake	OH	44145	2/11/2011	Dr said that he has not heard back from the Butrans pt he started.He agreed to try more pts and will convert from vicodin or methadone.He said would like to add Butrans into his opioid rotation of hydrocodone and methadone.I asked Dr why OxyContin does not have a place in his practice, he said he does not like to write for any CII because he feels they are more addictive than CIII.I asked if he feels percocet is more addictive than vicodin and he said yes.He told me about a shingles patient he just saw who was supposed to be taking 3 percent per day who told him he was taking 2 mg percocet in the morning and 2 at night.He said he was willing to write for 4 a day for this patient because he was legit and he trusts him.I asked him, why not a 10mg OxyContin instead. He said it all has to do with the name.He said that he does not want the patient to tell anyone else that he is on OxyContin and then the word gets out that he Rx OxyContin. He said it is due to stigma. Reviewed Senokot5
PPLPMDL0020000001	Beachwood	OH	44122	2/11/2011	Spoke with Shelly who attempted to get me back to see Dr Tabbaa. She said that usually Friday at this time (end of day) is a good time to catch him, but he had an unusually difficult day & still had patients so he was not able to talk to me. Discussed Butrans patient information guide, application, rotation, & savings cards for commercial insurance & cash-pay patients. She said that she knows that Dr Tabbaa does want to talk to me about Butrans because he does have questions, but today was just not a good day. Gave her another card & asked her to please keep me in the loop and let me know if any questions about Butrans arise before our scheduled lunch.
PPLPMDL0020000001	Hudson	OH	44236	2/14/2011	Introduced myself & Butrans to Dr Chase-delivered 5 core messages & box warning. He said he is always apprehensive when prescribing opioids. I told him he was wise to be cautious & that he should be just as cautious when prescribing Butrans. Discussed appropriate patient types- pts taking high doses of NSAID's or Cox-2's who are not getting adequate analgesia & pts who are on a low dose of opioid around-the-clock for moderate to severe chronic pain. Presented initiation guide & discussed titration. He asked if they can be on other pain medications at the same time- I showed FPI 2.4. Also discussed application & adhesion as well as avoiding heat. He said he wanted to see if other physicians were prescribing it before he started & he would want Butrans to be out for longer before trying it. Also went over managed care & savings cards for both Butrans & OxyContin & let him know
PPLPMDL0020000001	Hudson	OH	44236	2/14/2011	Introduced myself & Butrans to Dr Russ. He said he had just read about it in a journal. He recalled some of the information & knew that it was a once-a-week transdermal system for pain. Reviewed 5 core messages & alerted him to box warning to ensure he understood that Butrans is still potentially addictive & abusable. Presented initiation guide and discussed titration & dosing. Also reviewed application, adhesion, & avoiding direct heat. He said he thought Butrans sounded like a great idea & that he would like to have fewer patients taking around-the-clock opioids for chronic pain. Discussed appropriate patients & appropriate pt selection. He said they use OARRS & also do urine drug screens at the office & find both to be very helpful. He said he would prescribe Butrans. Discussed managed care coverage & went over savings cards for both Butrans & OxyContin (for commercially insured/cash pay pts & not to be used for any government insurance including Medicare & Medicaid.)
PPLPMDL0020000001	Chagrin Falls South Euclid	OH OH	44022 44121	2/14/2011 2/14/2011	Quick call with Dr Rood. He said he had not prescribed Butrans yet but that he is thinking of it & will write it when the appropriate patient comes along. He said he had not questions at this time but thanked me for the follow-Introduced doc to Butrans - indication, CIII, positioning, dosing, application and disposal, coverage and savings card program. She asked why should she use Butrans over other opioids. I explained there is no head to head data and discussed the 7 days delivery of buprenorphine which is a alternative for patients not wanting to take pills ATC. She asked the difference from Fentanyl. Again, told her no head to head data, they are different molecules and Butrans is not a substitution for Fentanyl. Asked her if she could think of an appropriate patient. She said she would read the literature first. Provided savings cards, REMS, and initiation guide. Gave oxycontin patient type reminder.
PPLPMDL0020000001	Hudson	OH	44236	2/14/2011	Dr Seiple said he had not yet prescribed Butrans but was interested in it still. Reviewed 5 core messages & reminded him of black box warning & abuse/addiction potential. He recalled a majority of the information & actually told Dr Russ some of the key points when he sat down to lunch. He said that he feels that the once a week application was great for patients & that he likes that it is CIII. I reminded him to still be cautious when prescribing because it is an opioid. Also reviewed in detail application, adhesion, avoiding direct heat, titration, and appropriate patients who he could start on Butrans. He said that he would love to have fewer patients on around-the-clock Vicodin or Percocet & that he was looking forward to seeing how well Butrans works. Discussed managed care and savings cards for commercially insured patients & cash-pay as well as OxyContin Savings cards for
PPLPMDL0020000001	Chagrin Falls	OH	44023	2/14/2011	Spoke with Jeff & introduced Butrans. He asked if Cardinal was going to auto-ship them & I told him that at this point, I have not heard of CVS being auto-shipped, but that many other pharmacy chains have been. Reviewed with him indication, dosing, appropriate patients, CIII, abuse/addiction potential. He asked what specialties we would be targeting. I told him that because so many specialties treat patients who fit the indication, I would be targeting a variety of specialties & asked if he had any specific recommendations. He said he did not at this time. He said that Chris is now the pharmacy manager & that he would leave the ordering information, FPI, & my card and would ask Chris to order at least the 5 & 10mcg strengths. I asked him to call me with any questions & let him know I would be back to follow up.
PPLPMDL0020000001	Maple Heights	OH	44137	2/14/2011	Spoke with Dawn who said the pharmacist was unavailable. She verified that they did receive a Butrans auto-shipment & they do have it in stock. Discussed appropriate patients. Also gave OxyContin savings cards, drawing her attention to the expiration date. She said they go through a lot of savings cards there & appreciate them. She said to try back on a Wednesday to speak with the pharmacist.
PPLPMDL0020000001	Chagrin Falls	OH	44023	2/14/2011	Spoke with Anita & confirmed that they had both the 5mcg & 10mcg strengths of Butrans on the shelf. She said she had never heard of it, so she was glad I stopped in. I reviewed with her the indication, appropriate patients, CIII, abuse/addiction potential, application, adhesion (taping edges with first aid tape if necessary), & avoiding direct heat. She said she thought Butrans sounded "interesting" and that there may be a place for it in today's pain management market. Reviewed managed care & discussed savings cards & how she can go online to print. Gave her my card & FPI & asked her to call me if she has any questions & let her know I would follow up.
PPLPMDL0020000001	Akron	OH	44333	2/14/2011	I had the opportunity to discuss Butrans in depth with Dr. Ahmad. He liked the idea of switching patients from hydrocodone to Butrans. I went over the suggested conversions to give him an idea as to where to initiate therapy. He also seemed interested in starting opioid naive patients. He started to mention actual patients that were coming to mind.
PPLPMDL0020000001	akron	OH	44333	2/14/2011	Had the opportunity to ask Dr. Bashor a quick question through the window. I asked how he would feel about treating his moderate to severe chronic pain patients with a once a week transdermal delivery system. He was very interested and scheduled me in for 30 mins next Monday.
PPLPMDL0020000001	Cleveland	OH	44113	2/14/2011	worked pain management dept-dr daoud and pharmacy-out-patient
PPLPMDL0020000001	Cleveland Lakewood	OH OH	44107 44107	2/14/2011 2/14/2011	Spoke with Chuck, we reviewed Butrans FPI, dosing and medication guide. He told me about several Drs who he thought would be good to call on including Dr D'Silva, Rojas, Mansenerus, Neri. We reviewed OxyContin as an option to start acting around the clock. I left him an OxyContin conversion guide and OxyContin savings cards.
PPLPMDL0020000001	Cleveland	OH	44121	2/14/2011	Spoke to NRP about the Butrans indication, dosing, CIII status, patient type, and 7 day delivery. She asked how its different from duragesic. I told her no head to head data, different molecule, and that Butrans is 7 days. She is a diabetes specialist and does not treat chronic pain - acute pain occasionally.

PPLPMDL0020000001	Lakewood	OH	44107	2/14/2011	Dr said he would be more likely to prescribe Butrans for an opioid experienced patients. He said that he would write after a CIV, and thought that vicodin was a CIV. We discussed the fact that this could be used in place of vicodin and we reviewed the initiation guide. We reviewed the managed care for Butrans, and the savings cards. He did say he would give it a try.
	Cleveland	OH	44121	2/14/2011	Introduced doc to Butrans - indication, patient type, CII, 7 day delivery of buprenorphine. He compared it to a long acting vicodin. I said its a different molecule but would probably suit the same patient type. Discussed the clinical trials and asked where he would prescribe. He said for opioid experienced. He asked about the MOA and if Butrans is an agonist/antagonist. I referred to the FPI and read the MOA. He thinks Butrans would be useful for some of his patients. I discussed the commercial coverage and the savings cards. He said he would read the literature. Oxycontin patient type reminder( >20mcg Butrans might be an oxycontin patient)
PPLPMDL0020000001	Westlake	OH	44145	2/14/2011	Dr has not prescribes Butrans yet, he said he is waiting for a chronic pain patient to try it in. He said he thinks it might be good for those construction worker patients who he does not want to be taking vicodin throughout the day. We reviewed the adverse events for Butrans.
	Cleveland	OH	44113	2/14/2011	I talked to Aaron, Pharmacy Manager, and asked if Justin, Pharmacist, ordered Butrans, per our last conversation? Aaron said yes, they had Butrans in stock so I asked him to thank Justin and told Aaron that I spoke with Dr. Bohl and Dr. Berkowitz about Butrans as well as Dr. Shen and Dr. Daoud, so he should be seeing prescriptions for Butrans soon. I asked if Aaron could recommend Butrans, to physicians, for patients who are either opioid naive or experienced and he said he would do that. recommended Senokot-5
PPLPMDL0020000001	Lakewood	OH	44107	2/14/2011	Quick call while talking to Dr El-Gazzar. We reviewed the initiation guide for Butrans. He said that he would try it.
PPLPMDL0020000001	Cleveland	OH	44113	2/14/2011	asked Dale, PA, if he started any patients on Butrans? Dale said he talked to a few patients who were taking tramadol and a few on Vicodin, but none of these patients wanted to get off their oral medications and try Butrans. told Dale it was great he was offering Butrans as an option and to keep considering patients for Butrans therapy who meet indication. discussed initiation guide- opioid experienced patients and told Dale I would follow-up next week to see if he started 1 patient on Butrans. recommended Senokot-5
PPLPMDL0020000001	Fairlawn	OH	44333	2/14/2011	Introduced Butrans BRIEFLY with Dr. Oyakawa. I discussed the indication and the strengths. I asked him where he sees this fitting in and he didn't give me much more time. Amanda was able to fit me in at the beginning of March for a lunch appt.
PPLPMDL0020000001	Richmond Heights	OH	44143	2/14/2011	Spoke to doc and Judy....reminder them of our conversation about Butrans and where she might prescribe it. Asked her if she has reviewed the info I left. She said she had not and did not have to talk today. Advised her I would come back in a few days.
PPLPMDL0020000001	Akron	OH	44333	2/14/2011	Introduced Butrans and the FPI to Dr. Shah. He really liked the concept, the delivery and the fact that it is just once a week. Dr. Shah agreed this is a product he would likely use because many of his patients are on lose dose morphine and hydrocodone. I asked him to focus on just one or two patients who are currently taking low dose hydrocodone and he agreed.
PPLPMDL0020000001	South Euclid	OH	44121	2/14/2011	Discussed the Butrans indication, CII, 7 day delivery of analgesia, opioid naive and experience trials, dosing. He asked if it really stays for 7 days. I told him how to properly apply and care for the Butrans and also dispose of it. He asked about AE's and if it was similar to other opioids. I referred to the FPI and showed the table on AE's. He asked how it compares to fentanyl. I explained the different molecule, no head to head, and Butrans not a substitute for fentanyl. He asked how to write it. Reviewed same. I discussed the commercial coverage and savings cards. He said some patients dont want to take tablets and he is going to try it. Reminded him of the oxycontin patient type.
PPLPMDL0020000001	Fairlawn	OH	44333	2/14/2011	Spoke with Jeanette, who is the pharmacist there. Introduced her to Butrans, which she had not yet heard of. She was rushed and there were patients waiting so I only had a few minutes. She told me that they did not have any Butrans stocked but would stock it if she saw a script.
PPLPMDL0020000001	Cleveland	OH	44102	2/14/2011	dr is in practice with Dr. Kauffman now, so we discussed Butrans fpi, black box warning, medication guide, patient information booklet, Butrans initiation guide and Butrans patient savings cards. I asked dr if she was going to start 1 patient would she consider an opioid naive or experienced patient? dr said probably opioid experienced so we discussed Butrans initiation guide and I asked her to think of 1 patient to try Butrans in and get some clinical experience, dr agreed dr asked if Medicaid covered Butrans? we discussed Medicaid requirements with Prior Authorization for Butrans. recommended Senokot-5
PPLPMDL0020000001	Fairlawn	OH	44333	2/14/2011	I introduced Butrans and the FPI. I asked her if she is currently writing hydrocodone and she said she is. I asked if she would consider starting patients on Butrans over hydrocodone. Because I only had around a minute she was a little hesitant. I told her I had an upcoming lunch and she seemed excited to learn more about it.
PPLPMDL0020000001	Cleveland	OH	44104	2/14/2011	I followup up with dr, post lunch discussion last Monday, on Butrans and asked dr if he started 1 patient on Butrans? dr said not yet, but he does have a few patients in mind to try Butrans. I discussed initiation/titration guide with dr and asked if there was anything preventing him from starting 1 patient on Butrans? dr said no, he has 1 patient in mind and is going to start that person on Butrans next time patient see's him. I told dr I would follow up on 2/28/11 as im out of the field on 2/21/11 for Presidents day, dr said that would be fine. recommended Senokot-5
PPLPMDL0020000001	Westlake	OH	44145	2/14/2011	We reviewed the Butrans FPI, dosing, titration, initiation guide, adverse events. Dr said that he does have some patients who he thinks might be appropriate instead of vicodin around the clock. We discussed managed care and savings cards. We also reviewed the medication guide and initiation with Melany and Maureen.
PPLPMDL0020000001	Cleveland	OH	44114	2/14/2011	I asked Laura, Pharmacy Manager, who her biggest Vicodin and Percocet writers were in the area? Laura said Dr. Katz and Dr. Marshall send a lot of their patients to her, Dr. Patel and Dr. Nickels, Dr. Celeste, Dr. Talbot and Dr. Carson's patients come here too. I asked Laura to recommend Butrans, whether patients are opioid naive or experienced and showed her Butrans initiation/titration guide for reference, she agreed to do this. recommended
PPLPMDL0020000001	Cleveland	OH	44113	2/14/2011	I asked dr if he started any patient on Butrans yet? dr said he talked to 1 patient who was taking Vicodin, a couple tabs a day, and patient refused to get off pills and didnt want Butrans. told dr it was good he thought of Butrans as an option and although it wont work for every patient, I asked if he could think of another patient taking Vicodin, Percocet or tramadol- opioid experienced, that would consider Butrans as an option? dr said he would and showed him Butrans initiation/titration guide. recommended Senokot-5
PPLPMDL0020000001	Fairlawn	OH	44333	2/14/2011	I introduced Butrans to the pharmacist, Amy. There is another pharmacist there named Michael who I did not meet. I discussed Butrans Delivery, titration and application. She said Lababidi would be a good target (I saw him earlier).
PPLPMDL0020000001	Hudson	OH	44236	2/14/2011	Introduced myself & Butrans to Dr Tosino, delivering 5 core messages & box warning. I asked his thoughts & he said it sounded interesting. I asked which type of patient he would be more likely to prescribe it in & he said he was not sure. I asked him what questions he had & he asked how long it took to "work". Showed FPI 12.3. Also showed 2.4 & discussed use of supplemental analgesia. Presented initiation guide & walked through titration with max dose of one 20mcg system. He said it will all come down to coverage. I asked him how much commercial insurance he sees & he said "a majority". Told him that fortunately, with the Butrans savings cards, pts with commercial insurance will pay only \$15-\$20 out-of-pocket. Also discussed Medicare/Medicaid- prior authorization & not able to use savings card. He said that he wants to see how much pain management specialists use Butrans before he really starts to use it. Also discussed OxyContin for appropriate pts & OxyContin savings cards.
PPLPMDL0020000001	Akron	OH	44310	2/14/2011	Spoke with Dr. Blanda, Cara and Roxanne. Dr. Blanda treats little chronic pain. However he thinks he may have a few patients that could benefit from Butrans therapy. Dr. Blanda is difficult to access so my time was limited. I went over the FPI in depth with Cara, who promised to fill in the blanks for Dr. Blanda. I asked if I could come back next Monday to follow up and they agreed.
PPLPMDL0020000001	Cleveland	OH	44111	2/14/2011	Spoke with Jim, he is a floater but may be at this store permanently. We reviewed the 5 key messages for Butrans and the initiation. He said one of the issues with Duragesic is the adhesion. We reviewed the medication guide and applying the transdermal system and what to do about problems with adhesion per the medication guide. He did not see Butrans on the shelf.
PPLPMDL0020000001	BEACHWOOD	OH	44122	2/14/2011	Quick call with Jessica who said Sandy was too busy to speak with me as they were short-staffed. I inquired about Butrans & asked if there had been any activity. Jessica confirmed that they still have the 5mcg & 10mcg strengths in stock. I asked if they needed any more OxyContin savings cards, but she said I would have to ask Sandy. She said that I should stop back on a Wednesday after 2 for a better chance of getting some time with
PPLPMDL0020000001	Cleveland	OH	44114	2/14/2011	I talked to dr about Butrans fpi, black box warning, 5 core messages, medication guide, Butrans initiation guide and Butrans patient savings cards for commercial plan patients. dr asked if workers comp or Medicaid covered Butrans so we discussed both. I asked if dr would consider 1 patient that was opioid naive or experienced to try Butrans in? dr said she wouldnt start an opioid naive patient on a long-acting medication or patients taking 1-2 tabs hydrocodone or oxycodone if these patients were fine taking 1-2 pills a day, dr said she doesnt see a reason to switch therapies. dr said she would start an opioid experienced patient, someone taking 3-5 tabs of Vicodin or Percocet daily, showed dr Butrans initiation guide and discussed proper tapering and initiation of Butrans. dr said she would think of 1 patient to try Butrans in and I told her I would follow-up next week. recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44113	2/14/2011	talked to dr about Butrans fpi, black box warning, 5 core messages, medication guide, Butrans initiation guide, formulary coverage for Medicaid and commercial patients and told dr Butrans patient savings cards can be used by commercial plan patients. discussed initiation guide and dr said he would probably try Butrans in a patient who is opioid experienced so we discussed proper tapering and initiation of Butrans. I asked dr to think of 1 opioid experienced patient with commercial insurance to use Butrans savings card, dr said he would as he thinks once weekly dosing and transdermal delivery are 2 benefits to his patients. recommended Senokot-5
PPLPMDL0020000001	Akron	OH	44333	2/14/2011	Spoke with Dr. Lababidi about where and who would be ideal patients to initiate therapy with Butrans. He had already had a lunch with Kristen and was familiar with Butrans. He was concerned about using it in conjunction with other SAO. When I clarified it sounded like his main concern was because buprenorphine binds so tightly he thought other medications would be ineffective. I told him I understood his concern but we didn't have any studies specifically looking at what he was referring to.
PPLPMDL0020000001	South Euclid	OH	44121	2/14/2011	Doc came to breakfast. He does cardiac testing. Introduced him to Butrans and its indication, CII status, patient type, dosing, 7 day delivery of analgesia. He does not treat much chronic pain but asked about the cost. I explained the commercial coverage and savings cards program. He also wanted to know the MOA- I referenced the FPI and the clinical pharmacology. He wanted to know about the abuse potential. I explained that it is still a CII narcotic and has the same risk potential as other opioids. Reviewed the box warning. He likes hearing about new products and thinks that Butrans will be a good product.
PPLPMDL0020000001	Cleveland	OH	44114	2/14/2011	I talked to John, PA, about Butrans fpi, black box warning, 5 core messages, medication guide, Butrans initiation guide and patient savings cards for commercial plan patients. John said transdermal delivery is ideal in his mind instead of pills every day for his patients and once weekly dosing is more convenient than dosing pills around the clock. I asked if John would try Butrans in an opioid naive or experienced patient? John said he would probably think of someone opioid experienced, so I showed Butrans initiation guide and we discussed that section. John asked about workers comp, Medicaid and commercial plan patients getting coverage for Butrans so we discussed everything. John said he'll try Butrans in a patient and let me know what clinical results he see's. recommended Senokot-5
PPLPMDL0020000001	Beachwood	OH	44122	2/14/2011	Spoke with Donny Wallace, Dr Warren's nurse & introduced Butrans. Delivered 5 core messages & asked Donny his thoughts & if he thought Dr Warren would be interested to hear more about Butrans. He said he felt there was a place for Butrans in Dr Warren's practice based on the patients they see. Donny said they see many patients who take around-the-clock pain medications such as Vicodin & Percocet & he feels that the once every seven days dosing is an option patients would like to have. Donny said that he would speak to Dr Warren & recommend that he speak with me to learn more about Butrans. Donny took my card & Butrans initiation guide & will call me to schedule an appointment with Dr. Warren.
PPLPMDL0020000001	Beachwood	OH	44122	2/15/2011	Introduced Butrans to Dr Bassett & delivered 5 core messages. Also alerted her to black box warning & advised her to use caution in prescribing Butrans, as she would with any other opioid. She said she thought that having a once-a-week option was great for certain patients. Discussed importance of appropriate patient selection. Presented initiation guide & discussed starting doses for different types of patients & for patients taking over 80mg oral morphine equivalent having OxyContin as an option for some patients. Dr Bassett said she doesn't treat a lot of pain, but would consider choosing Butrans for some of her chronic pain patients.
PPLPMDL0020000001	Garfield Heights	OH	44125	2/15/2011	Spoke with Dave who said he had not yet ordered Butrans, nor has he seen any prescriptions. Reviewed indication as well as appropriate patient type with him. He had no specific recommendations of what physicians in the area I should try to speak with. Encouraged Dave to order Butrans before getting a prescription, as other pharmacy chains were auto-shipped, but he still said he would not do so.
PPLPMDL0020000001	Garfield Heights	OH	44125	2/15/2011	Spoke briefly with David who said he had not time to talk to me today, but he did confirm that they received their Butrans auto-shipment & they do have it on their shelf. Butrans indication reminder. Asked a better time to stop in but he did not answer.

	Warrensville Heights	OH	44122	2/15/2011	Introduced Butrans to Dr Bennett & delivered 5 core messages & alerted her to box warning. She said that overall she is "done" prescribing opioids. She said pts take too many & lie about their pain. I agreed that prescribers must be cautious in prescribing all opioids & told her she should be just as cautious with Butrans. I asked if she has any patients at all who she trusted and who were legitimately in need of pain medications around-the-clock for a chronic condition & she agreed that she does have some (ie older cancer patients who she trusts). I asked her to think of those types of patients as we discussed Butrans. She said that was fair. Presented initiation guide pg 6 as well as titration. Also discussed application, adhesion, avoiding direct heat. She asked about managed care, so I reviewed tier 3 coverage & savings cards for pts with commercial insurance or cash pay (no government insurance including Medicare & Medicaid).
PPLPMDL0020000001	Westlake	OH	44145	2/15/2011	Spoke with Jenna, and Terri the tech, Jenna usually works at the Avon Lake Giant Eagle. Terri checked the stocking and they do have the 5 and 10mcg in stock. We reviewed Butrans FPI, and medication guide. We discussed the appropriate patients for Butrans and the initiation guide. We discussed the application of the transdermal system and the demo patch. We discussed OxyContin as an option when Butrans may not provide adequate analgesia and left an OxyContin conversion guide as a reference. She said that Dr Carbone might be good to call on in the Avon area.
PPLPMDL0020000001	Warrensville Heights	OH	44122	2/15/2011	Introduced Butrans to Dr Jackson & delivered 5 core messages, also alerting him to box warning. He said that as a surgeon, he does not treat chronic pain. However, he said that he was very familiar with buprenorphine as he has been using buprenex for years. He said he thinks it is a wonderful medication for pain. Gave him an FPI for his review. Also discussed OxyContin for the appropriate patients and reminded him of seven available tablet
PPLPMDL0020000001	Cleveland	OH	44106	2/15/2011	talked to dr about Butrans being an option for his patients and dr said he has a few patients in mind to discuss Butrans with today,dr said he likes once weekly dosing of Butrans and transdermal delivery instead of pills around the clock,dr said he thought of one patient last week to start on Butrans but the patient was too far down the pain severity scale that she really needed to be on higher doses of long-acting opioid,but he was thinking of Butrans initially..told dr that great he's remembering Butrans is an option for the appropriate patient and we discussed Butrans initiation guide and Butrans savings cards.
PPLPMDL0020000001	Shaker Heights	OH	44122	2/15/2011	Spoke with Michelle who said Dr Agrawal was not in so i could not follow up with him about Butrans. She said he has not written any prescriptions for it. I reminded her that he probably has not been given all the information necessary for him to feel comfortable in prescribing Butrans as neither Charmaine nor I have spent a lot of time reviewing the information with him. She said I should stop back another day, as today was not a good day, and she recommended that I come back in a week or two. Reviewed patient type & indication with her.<font color=blue><b>CHUDAKOB's query on 02/24/2011</b></font>Who is Michelle?<font color=green><b>ASPEGAS's response on 02/27/2011</b></font><b>Michelle is Dr Agrawal's medical assistant.</b><font color=blue><b>CHUDAKOB added notes on 02/28/2011</b></font><b>OK. Thanks. When you make a call on a non HCP, you have to put the title of the person you spoke with in the call note.
PPLPMDL0020000001	Mayfield Heights	OH	44124	2/15/2011	Asked Debbie if she reviewed the Butrans literature I gave last time. She apologized and said no. Gave her another guide and read the indication and discussed the positioning. She promised she would read.
PPLPMDL0020000001	Cleveland	OH	44195	2/15/2011	worked pain management and physical medicine&rehabilitation departments
PPLPMDL0020000001	Cleveland	OH	44106	2/15/2011	talked to dr,who is a fellow and when he finishes in May 2011,he's moving back home to Louisville,KY,about Butrans FPI,initiation guide and Butrans patient savings cards,dr said Dr.Hayek,Chief in Pain management,has discussed Butrans with him and he thinks this is a great option for patients as its a transdermal system and once weekly dosing option.I asked if dr could try Butrans in 2 patients and showed initiation guide,to get some clinical experience,we discussed medication,workers comp and commercial plan coverage for Butrans
PPLPMDL0020000001	Cleveland	OH	44103	2/15/2011	I talked to Dave,Pharmacy manager,briefly about Butrans stocking and Dave said he did order Butrans but didnt have any scripts come through yet,so I assured Dave I was working the downtown territory,hospitals and offices and asked him to recommend Butrans for opioid naive or experienced patients who meet Butrans indication,showed Butrans initiation guide,recommended Senokot-S
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	2/15/2011	Spoke with the pharmacist Christina who was rushed and gave me little time. I introduced Butrans and the FPI. I asked if they had it stocked and she said no but didn't actually check.
PPLPMDL0020000001	Cleveland	OH	44130	2/15/2011	Dr Diab said he has still not prescribed Butrans. He said he did appreciate the reminder. I asked him what he was waiting for & he said he forgot. He asked me what the doses were & I showed back of initiation guide & showed him the 5, 10, & 20mcg/hr systems as well as the prescription example written out. I asked him if he wanted to put an initiation guide in his pocket for a constant reminder. He laughed, declined, & thanked me for the reminder. Butrans reminder with Barb as well.
PPLPMDL0020000001	Westlake	OH	44145	2/15/2011	Quick call with Gail as today was a bad day, I left Butrans information and she said she had read about it.
PPLPMDL0020000001	Euclid	OH	44132	2/15/2011	Spoke to Tim about stock Butrans. Explained that I just talked to Dr. Bernie, in the building, who committed to trying Butrans and wanted to know if Tim's pharmacy was stocking it. Tim ordered the product while I was there and wanted to know what he needs to tell patients. I explained how to appropriately apply Butrans and care for it. He also asked about coverage. Explained the commercial coverage and the savings cards. He does not like savings cards as he does not have the software to process them and requires him to do double work.
PPLPMDL0020000001	Cleveland	OH	44106	2/15/2011	talked to dr about Butrans initiation guide and dr said he is starting to talk to patients about Butrans as he thinks the once weekly dosing option and transdermal delivery are optimal for his patients,instead of his patients taking pills around the clock,i asked dr if i could follow-up on Thursday to see if he started anyone and he said that would be fine,we also discussed the formulary process at University Hospitals main campus to get Butrans reviewed by the P&T Committee next week.
PPLPMDL0020000001	Cleveland	OH	44106	2/15/2011	talked to dr about Butrans FPI,initiation guide and Butrans patient savings cards,dr said some of the physicians in the department told him about Butrans and he likes that this is dosed every 7 days and is transdermal.I asked if dr would consider an opioid naive or experienced patient to start on Butrans? dr said probably opioid experienced,at least initially,so we discussed Butrans initiation guide and discussed Butrans patient savings cards for commercially insured patients and medical requirements for prior authorization for Butrans and workers comp patients,recommended Senokot-S
PPLPMDL0020000001	Euclid	OH	44119	2/15/2011	Quick call....discussed the Butrans indication and positioning. Asked him if he would prescribe it for naive or opioid experienced patients. He said maybe both. Told him about the commercial plans and the use of the savings cards. Ryzolt patient type reminder.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	2/15/2011	Spoke with Pat and introduced Butrans and FPI. Other pharmacist's there include Barry, Mike and Brad. He though Butrans was a great product and that there was a definite need in the market for a product like this. He encouraged me to call on Dr. Pitt.
PPLPMDL0020000001	Cleveland	OH	44195	2/15/2011	talked to dr about Butrans FPI,black box warning,5 core messages,medication guide,initiation guide and Butrans patient savings cards,dr said she liked once weekly dosing and transdermal delivery for her patients,we discussed Butrans initiation guide and savings cards for commercial plan patients,i asked dr if she could think of 2 patients to try Butrans and i will follow-up next week,dr agreed,recommended Senokot-S
PPLPMDL0020000001	Euclid	OH	44117	2/15/2011	Quick call....discussed the Butrans indication and patient type. Explained the 7 day delivery of Burprenorphine. He asked about BWC coverage. I told him that BWC is paying for Butrans. Gave him another initiation guide and REMs packet, nothing learned.
PPLPMDL0020000001	Lakewood	OH	44107	2/15/2011	Dr asked me to leave Butrans savings cards and reminders at this Lakewood office. He sees new patients on Mon and Tues. He committed to prescribing Butrans for a new patient instead of vicodin around the clock
PPLPMDL0020000001	Cleveland	OH	44106	2/15/2011	talked to Amy,Pharmacy Manager,about Butrans initiation guide and i asked if Amy could recommend Butrans when she felt patients were appropriate whether they be opioid naive or opioid experienced,Amy said she does sometimes talk to patients who complain to her about taking pills and dont like that so she would think of Butrans as an option then. we discussed Butrans savings cards and i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44103	2/15/2011	talked to dr about his opioid experienced patients and asked if he started anyone yet? dr said he did talk to a few patients who were taking Vicodin,about Butrans but they didnt want to stop taking their pills,so dr said he has to think of a few other patients who are willing to try Butrans and he would still give them some short-acting opioids for breakthrough pain,we discussed medicaid coverage for Butrans and commercial plan patients using Butrans patient savings cards,recommended Senokot-S
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	2/15/2011	Dr. Saunders chimed in while I was conversing with his partner, Dr. Johnston. He was doing charts as I was talking and came over very interested. He and Dr. Johnston were both interested in converting some of their hydrocodone patients to Butrans. This gave me an opportunity to discuss the conversion guide with them.
PPLPMDL0020000001	Cleveland	OH	44106	2/15/2011	worked pain management dept-see call notes on Dr.Hayek and Dr.Saghal, worked in-patient pharmacy-see call notes on Wes and Ron
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	2/15/2011	Introduced Butrans and FPI to Dr. DiLauro. I asked her where she would see herself using Butrans and she said for both opioid naive patients and low dose hydrocodone. I told her those were the ideal patients.
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	2/15/2011	Introduced Butrans and the FPI. Dr. Azem came up to the window and took a titration guide and I was able to go over the indication and the once a week delivery. I scheduled a lunch for next month.
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	2/15/2011	Spoke to Dr.Cyndi briefly in the hallway. Introduced Butrans and FPI, but had very limited time. After going over the indication and explaining the once a week delivery system Dr seemed interested and took a FPI and titration guide. I told her to take a look at them when she had time and asked if i could follow up next week and she agreed.
PPLPMDL0020000001	Euclid	OH	44132	2/15/2011	Discussed the Butrans indication and the 5 selling messages. Doc said he does not have many opioid naive patients but would likely prescribe Butrans there. He asked about AE's..i referred to the FPI and showed the table on AEs. He asked if the Butrans stays on for 7 days. I explained how to apply, secure, and dispose of butrans as appropriate. His main concern was coverage as he has a lot of BWC. I told him the BWC is paying for Butrans. Also discussed the commercial coverage and the savings with the card. He wanted to know if the downstairs pharmacy has it. Told him if will have them be sure to order it. Oxycontin and ryzolt patient type reminders. Gave REMS and initiation guides.
PPLPMDL0020000001	Cleveland	OH	44103	2/15/2011	asked dr if she started any patients on Butrans? dr said she has asked several patients if they would try butrans and patients are worried that Butrans wont give them pain relief over 7 days and that the transdermal system will fall off. I showed dr the Butrans FPI,noting that Butrans is 7 days of buprenorphine delivery and if dr wants to give short-acting opioids or non-opioids during initiation of therapy or maintenance of therapy she can,dr said she will continue talking to patients about Butrans as she like transdermal delivery and once weekly dosing,we discussed managed care coverage,recommended Senokot-S
PPLPMDL0020000001	Warrensville Heights	OH	44122	2/15/2011	Introduced Butrans to Dr Brookes & delivered 5 core messages. Dr Brookes immediately said that he had heard about Butrans and read about it in a journal & was excited to hear more about it. He said he is very familiar with buprenorphine & thinks it is a fantastic medication. Presented initiation guide & walked through initiating treatment with Butrans in both opioid-naive & opioid-experienced patients. He said he had no problem putting an opioid-naive patient on Butrans. He said he wanted to start prescribing Butrans when he first read about it, but always waits to be detailed before writing & was excited to start prescribing "right away". Discussed managed care coverage & went over savings cards (only for commercial insurance/cash pay & no government insurance). Also discussed likelihood of prior authorization being required for Medicaid/Medicare Part D & he said he has no problem with that as his staff is well-trained in doing the paperwork.
PPLPMDL0020000001	Cleveland	OH	44124	2/15/2011	Discussed the Butrans indication and other 4 selling messages. Gave him an initiation guide and asked if he would prescribe for opioid naive or opioid experienced. he said he does not have many opioid naive. Explained the initiation dosing.
PPLPMDL0020000001	Cleveland	OH	44195	2/15/2011	talked to Anne,NP,about Butrans being an option for her opioid experienced patients as Anne said that usually what she see's every day. Anne said she hasnt talked to any patients yet about Butrans as patients haven't complained of medications not working or requested a change in medication,showed Butrans initiation guide and asked Anne to consider a couple patients to try Butrans in, that meet Butrans indication and are appropriate for therapy,Anne agreed to do so,recommended Senokot-S
PPLPMDL0020000001	Akron	OH	44310	2/15/2011	Introduced Butrans and the FPI to Char. Discussed converting low dose hydrocodone patients to Butrans. Although I was speaking directly to Char, Dr Cremer was right there doing charts. He chimed in to ask about coverage. It sounded like there was definitely a place for Dr. Cremer to use Butrans in his practice.Char took my name and number in case of questions and said she would ask Dr. Cremer about an appt.
PPLPMDL0020000001	Cleveland	OH	44195	2/15/2011	talked to Joan,NP,about how many patients she treats daily that complain of medication not working or request a medication change? Joan said a lot of patients want to switch medications,10-15 daily on average,so she will consider other options if appropriate for patients.i asked Joan to consider Butrans for a couple of these patients if they meet Butrans indication and she feels Butrans is an appropriate option.showed intiation guide and discussed Butrans patient savings cards,recommended Senokot-S
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	2/15/2011	Introduced Butrans and the FPI. Dr. Johnston seemed very interested and immediately started identifying hydrocodone patients as good candidates. In addition, he like that Butrans has been studied in opioid tolerant patients. He mentioned that this gives him a great option when treating pain patients.

	Cleveland	OH	44195	2/15/2011	asked dr how many patients request a medication change,daily,or complain current medication isnt working? dr said a couple a day, as he doesnt have many patients on narcotics.dr said he does a lot of surgeries,injections,blocks,stimulators and is trying to get his patients off narcotics,so he doesnt have a lot of people asking for medication changes.i asked dr to think of 2 patients,opioid experienced that meet Butrans indication and showed dr Butrans initiation guide,to consider initiating Butrans,dr agreed.recommended Senokot-5
PPLPMDL0020000001	Mayfield Hts	OH	44124	2/15/2011	Window call. Discussed the Butrans indication and the selling messages. Asked how his Butrans trial. Nothing learend.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	2/15/2011	Introduced Butrans and the FPI. As Dr. Pitt and I started conversing he told me that there was a small place for this in his practice because most of his patients are on more than the equivalent of 80 mg of morphine. He told me that one a patient fails on Tramadol he will go to codeine (Tylenol 3). He committed for the few patients that are at this point he would consider Butrans.
PPLPMDL0020000001	Parma	OH	44134	2/15/2011	Dr Scanlon apologized for not prescribing Butrans yet. I asked what questions he had & he said he really had none, it was just a matter of him not remembering. I asked him how many of his pts who see him for moderate to severe chronic pain ask for a change in medication or increase in dose. He said "many" of them. I asked him to consider those pts & think of Butrans if they are appropriate. He said that was a good idea. I showed him pg 6 of initiation guide & FPI 2.2, 2.3 & 2.4 and walked him through how to start opioid-naïve as well as opioid-experienced pts on Butrans depending on their current dose of opioid. Discussed tapering to 30mg oral morphine equivalent & supplemental analgesia. I asked if he felt comfortable and confident now in starting one or two of those patients that we talked about on Butrans & he said yes-i told him i would follow up. Gave pt information booklets which he liked Reminded him about Butrans savings cards & OxyContin savings card for appropriate pts
PPLPMDL0020000001	Cleveland	OH	44195	2/15/2011	i talked to JoAnne,NP,and asked how many patients complain of medication not working or request a medication change? JoAnne said almost all of her patients,but probably 10-15 a day request a change in medication.i asked JoAnne to consider Butrans as an option for a couple of these patients,as long as they meet Butrans indication and showed Butrans initiation guide.we discussed Butrans patient savings cards for commercial plan patients.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44195	2/15/2011	talked to Gail,NP,and asked how many patients ask her daily for a medication change and complain of current medication not working? Gail said probably 10 or more patients daily,so i asked her to consider Butrans as an option for a couple of these patients,as long as they meet Butrans indication.showed initiation guide and discussed Butrans patient savings cards for commercial plan patients.recommended Senokot-5
PPLPMDL0020000001	Bedford	OH	44146	2/16/2011	Dr Haddad said he has not had the chance to read the Butrans information I gave him. Reminded him of indication, CIII single-entity opioid, once-a-week application. Asked him to think of Butrans when an appropriate patient presents who he is ready to put on something like hydrocodone or oxycodone. He said he could do that. I discussed dosing & initiating treatment. He asked about managed care coverage so I went over commercial tier 3 coverage & savings cards for appropriate patients. Asked him who in the office would be most likely to hand them out with prescriptions & he said Roberta. Went over savings cards with Roberta before I left.
PPLPMDL0020000001	Cleveland	OH	44125	2/16/2011	Spoke with Betsy who confirmed that they saw their first prescription for Butrans 10mcg. She said that Dr Samuel wrote it for a patient who was taking a low-dose around-the-clock oxycodone. She said she is anxious to hear patient feedback. I told her that I am as well and asked her to please call me with any feedback she receives. She said she does still have some savings cards for Butrans & I reminded her that she can go online to print more.
PPLPMDL0020000001	Cleveland Heights	OH	44118	2/16/2011	Let her know I would return to follow up.
PPLPMDL0020000001	Cleveland Heights	OH	44118	2/16/2011	Met Drs. Grant and Harris in their lab. Asked them what questions and or concerns they had about prescribing Butrans as they both previously expressed interest. Dr. Harris said none, yet. He has not come across the right patient. Dr. Grant said the insurance coverage is going to be a problem and that patients wont be able to afford it. I explained that Butrans is well covered commercially and reminded them both that I previously left savings cards that each patient should get. Also reminded of the oxycotin savings cards and patient type.
PPLPMDL0020000001	Cleveland	OH	44195	2/16/2011	I talked to Kathy about appropriate patients to start on Butrans,showed initiation guide and discussed managed care coverage for commercial plans,medicaid and workers comp.Kathy said Dr.Mekhill usually wont start patients on a medication that he's not seen on the market for at least a few years,so she's not sure he will start many patients,but Dr.Minzter who Kathy works with as well,does like Butrans being a transdermal application and once weekly dosing so she will continue to recommend Butrans for appropriate patient.recommended Senokot-5
PPLPMDL0020000001	University Hts	OH	44118	2/16/2011	Spoke to doc about the Butrans indication, patient type, and other four selling messages. Asked him if he would likely prescribe for opioid naive or opioid experienced. He said opioid naive. I reviewed the 5mcg/hr dose as well as how to titrate. He wanted to know if BWC is covering Butrans. Told him that BWC is currently paying for it. Also discussed the other plans and the savings with the card. Asked him if he could think of appropriate patients. He said maybe. Gave him REMS literature and FPI. Reminded him of the oxycontin patient type
PPLPMDL0020000001	Cleveland	OH	44195	2/16/2011	i talked to Anne about appropriate patients to start on Butrans,showed Butrans initiation/titration guide and asked Anne to think of a few patients to try Butrans in and she agreed. we discussed managed care coverage for Butrans.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44109	2/16/2011	I talked to Naser,Pharmacist,about Butrans stocking and Naser said he got all 3 dosage strengths of Butrans in stock but hasnt seen any scripts yet.i told Naser i have had lunches with Metro doctors and some local physicians we have discussed in the past and that i would continue working with them to identify appropriate patients to start on Butrans.i asked Naser to recommend Butrans,when appropriate to doctors,if patients are complaining of current medication and requesting a change to something else,Naser said he would do that depending on his relationship with doctor.<font color=blue><b>CHUDAKOB added notes on 02/24/2011</b></font>Amy, remember that you should ask for anything in print from your pharmacists due to potential HIPAA violations.
PPLPMDL0020000001	Bedford	OH	44146	2/16/2011	Met with Eric Schmidt, Director of Pharmacy. He said that he had read about Butrans & also just spoke with a nurse yesterday about a prescription for the 10mcg/hr. Eric said Dr A Rosenfield wrote the prescription for a patient taking 60mg morphine equivalent. Discussed taper for patients taking 30-80mg morphine equivalent & reminded him that anyone taking over 80mg morphine equivalent would not be an appropriate Butrans patient. He said that because their patients tend to have more severe pain than what Butrans may control, he does not anticipate Butrans being a commonly used medication in their population. Discussed appropriate patient type.
PPLPMDL0020000001	Macedonia	OH	44056	2/16/2011	Gave him an initiation guide for reference.
PPLPMDL0020000001	Macedonia	OH	44056	2/16/2011	Reviewed with Dr Shenigo initiation of Butrans treatment in both opioid-naïve & opioid-experienced patients, including taper. Asked her to think of Butrans when she has an appropriate patient for whom is getting ready to prescribe Vicoden. She said that this made sense & that she would consider doing this. Reviewed application & box warning, advising her to be just as cautious in prescribing Butrans as she would be in prescribing any opioid. She said she had a specific patient who she thought may be appropriate for Butrans. Discussed managed care coverage & savings cards for appropriate patients.
PPLPMDL0020000001	Macedonia	OH	44056	2/16/2011	Dr Yager asked me to review the Butrans information with him to refresh his memory. Reviewed 5 core messages & alerted him to abuse/addiction potential. Also reviewed FPI 6.1, 12.1, & 8.6-8.7. Discussed dosing & initiation of treatment in different patient types. Asked Dr Yager to use Butrans when he sees an appropriate patient for whom he is ready to prescribe Vicoden. Dr Yager said this made sense & that he could use it there. He thought of a few different patients, one specifically who is on 400mg tramadol/day who is well-controlled but would like an alternative to taking several pills per day. Discussed taper & how to initiate treatment at 10mcg for that patient. Discussed managed care & savings cards for appropriate patients. Dr Yager said he had a male patient several years ago on OxyContin who got "hooked" and started looking for Percocet on the streets. Dr Yager said the patient has come off opioids now & is doing well.
PPLPMDL0020000001	Westlake	OH	44145	2/16/2011	Drs said that he had started his first Butrans patient and he has not heard back yet. He said this patient has had abdominal pain for two years after a surgery. Dr informed me that St John Westshore does not have to follow the formulary for UH and that he is only working to get Butrans on formulary at St John Westshore.
PPLPMDL0020000001	Akron	OH	44320	2/16/2011	spoke with Jerry and left info for him regarding Butrans. After going over the indication there were so many patients that I said I would come back. Left FPI.
PPLPMDL0020000001	Akron	OH	44320	2/16/2011	Introduced Butrans and FPI to Misty, NP. She loved this idea and was already identifying patients as we spoke. She said she would have to wait until it was on her formulary but wanted additional info.<font color=blue><b>CHUDAKOB added notes on 02/25/2011</b></font>Misty can still write Butrans. She just needs the doctors approval to do so until it is on their formulary.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	2/16/2011	Introduced Butrans and the FPI to Dr. Blicak. Focused on opioid naive patients. She was rushed for time since she is a hospitalist. She said she would meet with me next Wednesday at 9 am to discuss Butrans more in depth.
PPLPMDL0020000001	Akron	OH	44320	2/16/2011	Introduced Butrans and FPI to physician. Asked him to focus primarily on patients with commercialized plans since he has a lot of Medicaid. He agreed he would take a second look at patients currently on low dose hydrocodone who have private insurance.
PPLPMDL0020000001	Cleveland	OH	44195	2/16/2011	worked tausseg cancer center - talked to medical secretaries for Dr Dean, Dr.Garcia, Dr.LeGrand,Dr.Pennell and Dr.Davis-the palliative medicine doctors are out of town for a meeting in Vancouver this week,but i gave Butrans fpi,initiation guide and patient information booklet to each secretary for the doctors to set-up appointments to discuss Butrans. I spoke with Crystal,Dr.Davis's secretary,as Dr.Cheng-APM doctor,requestd me to see Dr.Davis and ask him to lead a lecture on Butrans for his APM fellows and if Dr.Davis can not do this, then i will lead the journal club discussion on the Butrans fpi.found out from Crystal that Dr.Davis was on "hospital service" for 2 wks-Jan.29th-Feb.11th,so he only saw 2-3 patients/day and Crystal said thats why he probably hasnt prescribed Butrans yet,but she will talk to dr on Monday,to be sure he starts prescribing Butrans. worked tausseg cancer center
PPLPMDL0020000001	Cleveland	OH	44195	2/16/2011	worked pain management department and tausseg cancer center and tausseg cancer center pharmacy
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	2/16/2011	Introduced Butrans and FPI to Dr. Crawford, I was originally trying to call on Dr. Bedrick who was out sick and Dr. Crawford said he would see me instead. After discussing Butrans indication and FPI he told me that he does not treat any long term pain and is mostly managing sports medicine.
PPLPMDL0020000001	South Euclid	OH	44121	2/16/2011	Spoke to Amanda about the Butrans indication, 3 dosages, 7 day application and patient positioning. Asked her if she has it stocked. She said no and that she wouldnt likely stock it until they get a script. She asked if the Butrans actually stays on for 7 days. I discussed the proper application and disposal. I explained the savings card program and that docs want to know who is stocking it. no commitment.
PPLPMDL0020000001	Akron	OH	44333	2/16/2011	Introduced Butrans and FPI to Dr. Fouad. He has a great patient base to initiate therapy however most of his patients are on state plans. I asked if he would consider it for his patients with private insurance for the time being and he agreed.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	2/16/2011	Introduced Butrans and the FPI. Dr. Peter is currently prescribing a lot of Vicodin and thought this was a great option for his patients who are on low dose vicodin/percocet. He asked about coverage and I explained the copy cards.<font color=blue><b>CHUDAKOB's query on 02/25/2011</b></font>This call is on Dr. Higley. Who is Dr. Peter?<font color=green><b>LAPMACA's response on 03/01/2011</b></font>This was just a simple mistake. I was attempting to see Dr. Peter Laszlo as well as Dr. Higley. This call was made to Dr. Higley, I just had Dr. Peter on my brain! Thanks for catching it.<font color=blue><b>CHUDAKOB added notes on 03/02/2011</b></font>OK. Thanks for the clarification.
PPLPMDL0020000001	Cleveland	OH	44195	2/16/2011	talked to dr about Butrans fpi,black box warning,medication guide,initiation guide and Butrans patient savings cards.dr said transdermal delivery is optimal in his eyes,instead of pills,but since this is new to him he wants to wait a bit before he feels comfortable prescribing Butrans.dr said dosing every 7 days is good for some of his patients but not all,as he does have some patients who like taking their short-acting medications around the clock told dr that is good for those who are fine with their current medication,but to think of patients who arent happy with current medication or request a medication change-showed Butrans initiation guide and asked if dr could think of 1 patient,when he feels comfortable to try Butrans in and get some clinical experience with the medication.dr said he will think about it and appreciated information.discussed managed care coverage for commercial plans,medicaid and workers comp.recommended Senokot-5
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	2/16/2011	Initially started a conversation with Glenn, who is the pharmacist there. While i was in his office Dr. Narouza stopped in and I had the opportunity to discuss Butrans and the FPI with both of them. They both agreed there was a DEFINITE need. I scheduled a lunch so i can follow up and discuss with the other physicians.
PPLPMDL0020000001	C. Falls	OH	44223	2/16/2011	Spoke with pharmacist and introduced Butrans and the FPI. She told me that Narouzes group would be a good group to call on with this product.
PPLPMDL0020000001	Cleveland	OH	44195	2/16/2011	talked to Mei,NP,who treats dr.cheng's patients,about Butrans fpi,black box warning,medication guide,Butrans initiation guide and Butrans patient savings cards for commercial plan patients. Mei said the other Nurse Practitioners in the office shared with her a little bit of information on Butrans and she thinks once weekly dosing of Butrans and transdermal application are 2 benefits to her patients.i asked Mei if she would consider an opioid naive or opioid experienced patient to start on Butrans? Mei said majority of patients here are opioid experienced so that is where she would try Butrans.showed initiation guide and we discussed medicaid and workers comp coverage. recommended Senokot-5
PPLPMDL0020000001					

PPLPMDL0020000001	Cleveland	OH	44195	2/16/2011	only got a minute with dr but told dr there was a product,Butrans,we havent discussed and gave dr Butrans fpi,discussed black box warning and Butrans patient savings cards and dr said he would look through the information and that i should go see his medical secretary,Jessica,to set-up an appointment.dr said he did like that Butrans was a transdermal application and dosed every 7 days as he thinks that may be easier for some of his patients.
	Cleveland	OH	44195	2/16/2011	talked to Janet,Pharmacy manager and Brittany,Pharmacy Technician,about Butrans stocking and they ordered and have Butrans 10mcg and 20mcg but no scripts yet,so i explained that most of the palliative med doctors were out this week in a conference in Vancouver but i would continue talking to the doctors about Butrans and asked Janet and Brittany to recommend Butrans to doctors,for patients they feel who could be appropriate and showed initiation/titration guide.
	Cleveland	OH	44195	2/16/2011	talked to dr about Butrans fpi,black box warning,initiation/titration guide and Butrans patient savings cards.asked dr where he would feel most comfortable trying Butrans in his patients and getting some clinical experience? dr said majority of his patients are opioid experienced so that would be his first place to try Butrans in a few patients.showed initiation guide,dr asked how much it cost for 4 Butrans transdermal systems,so 1 month supply? we discussed managed care-commercial plan patients using Butrans patient savings cards,medicaid requirements of a Prior Authorization and workers comp.dr said i should talk to Mei,his NP,who see's his patients.dr wants to set-up a journal club discussion with his 9 fellows about Butrans.recommended Senokot-s
PPLPMDL0020000001	Cleveland	OH	44195	2/16/2011	only talked to dr for a few minutes,showed Butrans initiation guide and asked dr if he started 1 patient yet? dr said no he hasnt thought about Butrans.i asked if dr would give Butrans to an opioid naive patient and dr said probably not and majority of patients are opioid experienced so he would try Butrans there.we discussed initiation/titration looking at the guide and discussed managed care coverage.recommended Senokot-S
PPLPMDL0020000001	Cleveland Hts	OH	44118	2/16/2011	Spoke to Sourabh again about the recent launch of Butrans. I discussed the 5 selling messages and asked him to order it. He said he has to wait until he gets a prescription. I also discussed the savings cards program for monthly savings. He wanted to know if the cards would come from the doctors office. Confirmed that they would.
	Cleveland Hts	OH	44118	2/16/2011	Met Drs. Grant and Harris in their lab. Asked them what questions and or concerns they had about prescribing Butrans as they both previously expressed interest. Dr. Harris said none, yet. He has not come across the right patient. Dr. Grant said the insurance coverage is going to be a problem and that patients wont be able to afford it. I explained that Butrans is well covered commercially and reminded them both that i previously left savings cards that each patient should get. Also reminded of the oxycontin savings cards and patient type.
PPLPMDL0020000001	Bedford	OH	44146	2/16/2011	Dr Moufawad said he just started a patient on Butrans on Monday. I asked him what type of patient he chose. He said that it was a patient taking 5-6 Vicoden per day & he started him on 10mcg. He said he has not heard back from the patient. I asked if he would start more patients on Butrans & he said that he will & that he does not have to wait for feedback before doing so. [Did not have time to discuss taper- see next call objective]. Spoke with Amber (MA)& gave her more savings cards for Butrans & OxyContin. I asked if there had been any managed care push back for Butrans so far & she said no. I asked her to keep me "in the loop" with Butrans & to give me feedback as much as possible. She said she has my card & will call me.
PPLPMDL0020000001	Westlake	OH	44145	2/16/2011	Spoke with Deanna, she had already read about Butrans. We reviewed the FPI, initiation guide and medication guide. She said she thinks it will be a good option instead of short acting around the clock. Reminder about OxyContin as a Q12hr option and the OxyContin savings cards. Reminder to recommend Senokot S with opioids.
PPLPMDL0020000001	Westlake	OH	44145	2/16/2011	Dr said that she could not find information on a patient assistance program for Butrans and I let her know that we did not have one in place at this time. She said she does have further questions about Butrans but was too behind today to sit and talk. She would like to discuss further with Amy at their next appointment.
PPLPMDL0020000001	Cleveland	OH	44121	2/16/2011	Spoke to Allison about the launch of Butrans. Explained the dosing and the savings cards program and commercial plans. SHe confirmed that they had received a shipment and dispensed a script for 5mcg/hr. SHe confirmed that the script went through without a problem.
PPLPMDL0020000001	Lakewood	OH	44107	2/17/2011	We reviewed Butrans FPI, and medication guide. She thinks that this could be a great option for some patients and she has two patients in mind who might be a good patient to convert to Butrans. One of them is on tramadol and one is on T3. She will try to recommend to their Dr, one was Dr Alan Shen's patient. She asked about generic OxyContin and said that Walgreens still seems to dispense it. She asked about the reformulation of OxyContin and we reviewed the field card. She took an OxyContin conversion guide to keep on hand and we discussed OxyContin as an option instead of short acting around the clock. We reviewed Ryzolt as a once a day option and asked to recommend Senokot S with opioids.-font color=blue>-cb>CHUDAKOB's query on 02/25/2011</b>-</font>When you say short-acting around the clock, this can now mean many things. If they are taking short-acting around the clock 5mg hydrocodone 4 times/day, and not well controlled this may now be a Butrans patients. This now requires getting much more specific when discussing low-dose OxyContin. Your thoughts?<font color=green>-cb>HOLLUBA's response on 02/28/2011</b>-</font>I do understand what you are saying. In this case, I had already discussed Butrans at length and the types of appropriate patients. Some patients are not good candidates for Butrans so we reviewed OxyContin as an option for short acting around the clock of various doses after she already understood where Butrans fits in. I think that the patient you described could be either patient.-font color=blue>-cb>CHUDAKOB added notes on 02/28/2011</b>-</font>O.K. Thanks!
PPLPMDL0020000001	Cleveland	OH	44195	2/17/2011	worked physical medicine&rehab dept-left information for Dr.Schaefer,Dr.Zachary,Dr.Hou,Dr.Jedlicka,on Butrans fpi and initiation guide,left information for Dr.Capulong,Dr.Mazanec and Dr.DeMicco,on Butrans fpi,initiation guide and my business card for each doctor to get an appointment.
PPLPMDL0020000001	Cleveland	OH	44113	2/17/2011	showed dr Butrans initiation guide and talked about Butrans for opioid experienced patients who are complaining to dr about current medication regimen and looking for something different.asked dr to consider Butrans,if appropriate,for these patients.dr said he would remember that and i told dr that he has option of OxyContin, with 7 tablet strengths and majority of commercial plans covering OxyContin at lowest branded co-pay.recommended Senokot-S
PPLPMDL0020000001					Quick call with David- He said that they do have Butrans but that he had not dispensed it yet. Spoke with Angela about savings cards for Butrans & OxyContin which she said they would use.
PPLPMDL0020000001	Independence	OH	44131	2/17/2011	Spoke with John, We reviewed Butrans FPI, initiation guide and medication guide. He said he thinks this will be a good option instead of patients taking vicodin around the clock which they see a ton of. He said that he does know that a few scripts have come through that they have had to order more. He did not know which Drs wrote. They only have the 5 and 10mcg in stock for now. We reviewed the OxyContin savings program. We reviewed Ryzolt as a once a day option and asked him to recommend Senokot S.
PPLPMDL0020000001	Cleveland	OH	44106	2/17/2011	talked to dr about Butrans initiation guide and Butrans patient savings cards and discussed dr filling out drug review form,for pharmacy to review Butrans and present to the P&T Committee. dr said he see's a place for Butrans in hospital,likes transdermal delivery and once weekly dosing of Butrans
PPLPMDL0020000001	Berea	OH	44017	2/17/2011	Quick call,I asked Dr if he had tried Butrans yet and he said he did but has not heard anything from the patient. Shirley did not know if he had written Butrans or not since she has not seen any scripts or discussed it with any patients.
PPLPMDL0020000001	Cleveland	OH	44113	2/17/2011	talked to Dale,PA,about Butrans being an option for patients he feels are opioid experienced,that complain of current medication and want a change.showed initiation guide and discussed managed care coverage.Dale said he hasnt started any patients yet,but will keep Butrans in mind for a few patients.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44102	2/17/2011	talked to dr about Butrans fpi,black box warning, 5 core messages,initiation guide and Butrans patient savings cards.dr said she has a lot of patients on Percocet and would consider Butrans as an option for them as she doesnt like giving so many pills out and likes transdermal application better.dr said once weekly dosing is much easier for a lot of her patients.showed initiation guide and discussed managed care coverage.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	2/17/2011	worked pain management dept-see call note on dr hayek
PPLPMDL0020000001	Independence	OH	44131	2/17/2011	Introduced Butrans to Dr Boose, delivering 5 core messages. Asked him to think of Butrans when he has a patient on higher doses of NSAID's or Cox-2's that he is ready to start on a short-acting around-the-clock opioid. He said that made sense. Showed initiation guide pg 6 for starting both opioid-naive & opioid-experienced patients & reviewed FPI 6.1 & 11. Also alerted him to black box warning. Dr Boose asked about managed care coverage. He said 60-70% of his practice is commercially insured, so I reviewed coverage & savings cards for those patients. Also reviewed titration ability every 3 days. He said he thought Butrans sounded interesting that said he had patients who fit the indication & for whom he could consider it. Reviewed patient information booklet, application, & avoiding direct heat. Spoke with Natalie & gave savings cards & patient information booklets. She said to come in March 1st to schedule another lunch. Asked her to call me for Butrans feedback or questions.
PPLPMDL0020000001	Barberton	OH	44203	2/17/2011	Introduced Butrans and the FPI. Dr. Patel seemed very interested and gave me ample time to discuss where this would best fit. He seemed to be most interested in prescribing for opioid naive patients which he said he sees a lot of. I went over the dosing and reminded him that opioid naive patients must start on 5 mcgs per hour and that he could titrate if needed in 3 days.
PPLPMDL0020000001	Solon	OH	44139	2/17/2011	Dr Zaidi said he has not prescribed Butrans & will not until his question regarding precipitating withdrawal is answered. I asked him if his concern was still that tapering patients would put them into withdrawal. He said yes & that if he has a patient on 200mg equivalent or more of morphine, he cannot taper that patient down to the level we suggest. Told him that a patient on that high a dose would not be a Butrans patient. He said he thought it was for patients on high doses of opioids. Clarified & showed him pg 6 of initiation guide & told him anyone over 80mg morphine equivalent was not a Butrans patient, but rather more of an OxyContin patient. Suggested that he use Butrans in patients taking 3, 4, or 5 hydrocodone or oxycodone per day for chronic pain. He asked about application site skin reactions-showed FPI 6.1. He said he would see if he could find one patient to try Butrans on. I told him that was the perfect place to start.
PPLPMDL0020000001	Barberton	OH	44203	2/17/2011	Spoke with Pharmacist, I believe her name was Cathy. Introduced Butrans and the FPI. She told me that some physicians I should focus on in the area were Dr. Shah and Dr. Patel. I asked her what her thoughts on Butrans were and she agreed that there was a definite need for Butrans in the current market place.
PPLPMDL0020000001	Independence	OH	44131	2/17/2011	Asked Dr Pai if he has had experience using Butrans but he said he has not yet because he has not seen the right patient. I asked him what type of patient he was looking for & he said someone on Vicoden or tramadol. He said NOT someone on Percocet because he feels that people on Percocet are more likely to take more than they need. I asked what dose Vicoden or tramadol the ideal patient in his mind would be on & he said maybe 2-3 Vicoden. I told him that was the perfect place to try Butrans. I also asked him to consider Butrans instead of starting someone on Vicoden & he agreed that this was a good place as well. He mentioned a tramadol patient he had just seen but he was not sure what insurance he had. Discussed commercial tier 3 coverage, savings cards, & prior authorization for patients on Medicare Part D or Medicaid. He said he would continue looking for Butrans
PPLPMDL0020000001	Cleveland	OH	44102	2/17/2011	talked to dr about Butrans fpi,black box warning,initiation guide and Butrans patient savings cards.asked dr if she would consider opioid naive or experienced patients to try Butrans? dr said patients taking opioids is where she would try Butrans,showed initiation guide,dr said 4 tabs daily is max dose of short-acting and it would only take her 1 day to taper patients to 15mg hydrocodone or oxycodone.dr asked what does a normal QTC interval look like? as we were discussing Section 5.4-QTC interval Prolongation in Butrans fpi.i told dr i didnt have that answer but we could fill out electronic medical information request form.i asked dr if she needed any other information in order to feel comfortable in prescribing Butrans? dr said no and said she would try it in a few patients.i told dr i would follow-up with her next Tuesday,told dr when patients are above 80mg oral morphine equivalent,OxyContin is an option and available at lowest branded co-pay for medicaid and commercial planpatient
PPLPMDL0020000001	Cleveland	OH	44109	2/18/2011	showed dr Butrans initiation guide,discussed appropriate patients to start on Butrans and talked about managed care coverage for Butrans.dr said he likes transdermal application and once weekly dosing and thinks Butrans is a great option for his patients taking a couple tablets a day of hydrocodone,percocet or tramadol and will look for a few patients to try Butrans. recommended Senokot-S
PPLPMDL0020000001	Copley	OH	44321	2/18/2011	Introduced Butrans and the FPI. When talking about the appropriate patient type i told him if a patient was taking the equivalent or more than 80 mg of morphine they were past the point of Butrans and an appropriate patient for OxyContin. Dr said he would continue writing OxyContin but was still unsure about Butrans and had to leave.
PPLPMDL0020000001	Beachwood	OH	44122	2/18/2011	Followed up with Dr Yokiel who said he has tried to write Butrans a couple of times but he said he thinks the patients couldn't get it for managed care or cost reasons. I discussed with him managed care coverage for Medicare Part D, Medicaid, BWC, & commercial plans. I also reviewed savings cards with him for cash pay & commercial insurance patients. Encouraged him to try Butrans for appropriate patients with commercial insurance or BWC & to give savings cards to patients with the commercial coverage. He said he would do this & is anxious to hear what his patients think. He told me he likes the idea of Butrans & the seven days of buprenorphine delivery. He said he will keep writing prescriptions for Butrans. Also gave OxyContin savings cards which he said they needed.
PPLPMDL0020000001					talked to dr for only a minute,showed Butrans initiation guide,discussed managed care coverage and asked dr to think of 1 patient to try Butrans and then i will follow-up next week.dr agreed.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	2/18/2011	

	Cleveland	OH	44103	2/18/2011	asked dr if she has seen 2 patients this week,who were complaining of their short-acting opioids,where she considered Butrans as an option? dr said she talked to a few patients about Butrans but hasnt had anyone that wants to take once weekly dosing as a transdermal system.dr said Butrans is a great option,with 7 days of buprenorphine delivery and likes transdermal delivery.dr said she'll continue talking to patients about Butrans.told dr
PPLPMDL0020000001	Cleveland	OH	44125	2/18/2011	OxyContin is available at lowest branded co-pay for medicaid and commercial plan patients,with 7 tablet strengths available. recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44109	2/18/2011	Spoke briefly with floater pharmacist who said that this location does have 5 & 10mcg Butrans in stock but said they had not dispensed any yet. Indication & once-a-week application reminders.
PPLPMDL0020000001	Richmond Heights	OH	44143	2/18/2011	showed dr Butrans initiation guide and we talked about dr considering Butrans for his opioid experienced patients.dr has talked to a few patients about trying Butrans but not had anyone say they want to try,these patients still want to take their short-acting opioids and thats it.I told dr to not think of patients who are happy with their short-acting opioids,but those patients complaining of their current medication and wanting something different,these patients may potentially be interested in Butrans. dr agreed saying that made sense and he would consider that.we discussed Medicaid and commercial insurance coverage.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44114	2/18/2011	Discussed the Butrans indication and positioning. Doc said he did not have time today. I gave him and FPI and advised that I would tryhim again next week. Nothing learned.
PPLPMDL0020000001	Cleveland	OH	44109	2/18/2011	talked to dr about Butrans initiation guide and managed care coverage.i asked dr if he feels most comfortable trying Butrans in opioid experienced or naive patients? dr said he wouldnt give Butrans to opioid naive patients,if they are taking NSAID's,he would go to Vicodin or another short-acting opioid.dr said he would give Butrans to his patients currently taking Vicodin or Percocet.dr likes that this is a transdermal application and once weekly dosing and said he will start some patients on Butrans.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44109	2/18/2011	worked physical medicine and rehabilitation dept-see call notes
PPLPMDL0020000001	Richmond Heights	OH	44143	2/18/2011	Discussed the Butrans indication and the positioning. Doc said he tried a patient on Monday (?) and has not heard anything. I asked him to describe what type of patient he wrote for. He I asked him to try at least one patient next week and reviewed the commercial coverage.
PPLPMDL0020000001	Fairlawn	OH	44333	2/18/2011	Introduced Butrans and the FPI. Dr. Parisi is typically see but because I had a new product he came to the window briefly. After I introduced the indication and the 7 day transdermal delivery system he was so interested in hearing more he canceled a lunch on Tuesday so he could hear about it.
PPLPMDL0020000001	Lyndhurst	OH	44124	2/18/2011	Asked doc for feedback she got from the female patient she tried on 5mcg/hr of Butrans and then went to 10mcg/hr. She said the patient didnt really like itor it didnt work for her but doc said that nothing seems to work for this patient. I discussed the indication and the positioning. She said she would continue to look for patients.
PPLPMDL0020000001	Parma	OH	44134	2/18/2011	Spoke with Marko who said that they finally received their auto-shipment & that he filled a prescription for it last week. I asked him who wrote the prescription & he said that it was Dr Trickett & it was for the 5mcg strength.
PPLPMDL0020000001	Cleveland	OH	44102	2/18/2011	talked to Vicki,Pharmacy Manager,about Butrans initiation guide and asked if she has seen any scripts for Butrans? Vicki said no,but she will recommend Butrans to some physicians where she knows patients are on short-acting opioids and not happy with current medication.we discussed managed care coverage.recommended Senokot-5
PPLPMDL0020000001	Fairlawn	OH	44333	2/18/2011	Spoke with Jessica. She has not yet seen any movement. She agreed she would stock the 10 and 20 mcgs if any scripts come through.
PPLPMDL0020000001	Independence	OH	44131	2/18/2011	Caught Dr Jack in the hallway for a quick Butrans follow-up. He said he read more information & does think it is something he will be able to use. He said he just has to figure out who the right patient is. I asked him to think of Butrans when he sees a patient who he is ready to put on Vicoden 2-4 times per day-to prescribe Butrans instead. Dr Jack said that made sense because he thinks Butrans is "easier" for the patient. He said he would try that. OxyContin savings card reminder as well.
PPLPMDL0020000001	Parma	OH	44129	2/18/2011	Quick call with Heath (Pharmacist). He said they still have the 5 & 10mcg/hr Butrans strengths. He said he has not dispensed any yet. Reviewed indication with Heath.
PPLPMDL0020000001	Mayfield Heights	OH	44124	2/18/2011	Introduced doc to Butrans and the 5 selling messages. He asked how the AE's compared to other opioids. I referred to the AE section of the FPI and the discussed the Nausea, dizziness, Headache. He asked about the molecule and the MOA. I explained the binding to the 3 opioid receptors. I reviewed the dosing and the 20mcg/hr max due to QTC prolongation. He liked the idea of a 7 day patch and said it fits a need. Gave him Butrans
PPLPMDL0020000001	Cleveland	OH	44109	2/18/2011	talked to dr about patients she feels are appropriate for butrans.dr said patients already taking opioids,whether it be tramadol,hydrocodone or oxycodone,she's considering those patients.showed dr Butrans initiation/titration guide and discussed managed care coverage.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44103	2/18/2011	talked to dr about his patients on tramadol,that dr thinks Butrans could be an option for them,showed Butrans initiation/titration guide. asked dr to think of 2 patients on tramadol,that are opioid experienced,and consider starting them on Butrans.dr agreed and asked about Medicaid coverage for Butrans,so we discussed that information.told dr when patients are above 80mg oral morphine equivalent,dr has option of OxyContin,with 7 tablet strengths and available on Medicaid at lowest branded co-pay. recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44109	2/18/2011	talked to Erinne,Pharmacist,about Butrans FPI,black box warning,medication guide,instructions for use,patient information booklet,Butrans initiation/titration guide,Butrans patient savings cards and formulary coverage.Erinne said she didnt see Butrans in stock and never saw this information from the other pharmacist so she appreciated it as she thinks once daily dosing is much easier for patients than taking short-acting opioids daily.Erinne said the transdermal application was interesting to her and she hopes physicians prescribe Butrans as she will order all 3 dosage strengths today of Butrans.we discussed physicians in area that write a lot of Vicodin and Percocet and who I should talk to about Butrans.recommended Senokot-5
PPLPMDL0020000001	Beachwood	OH	44122	2/18/2011	Spoke with Alan who said they had not had any prescriptions for or questions regarding Butrans. I reviewed indication & seven days buprenorphine delivery in one application & asked him what physicians he would recommend me speak with in the area. He said that really the only pain management medications they see prescriptions from are from oncology & family medicine. He said that unfortunately the offices don't see reps. Told him that I have been leaving information for each of the departments & asked him to call me if he gets any inquiries or prescriptions or has any questions.
PPLPMDL0020000001	Cleveland	OH	44103	2/18/2011	asked dr if he started any patients on Butrans? dr said no and that he's talked to a few of his patients taking Vicodin and Percocet that he thought would be interested in trying Butrans but the patients didnt want to stop taking pills.told dr to only think about 2 patients who are complaining of current medication and want something different,thats where he can try Butrans,showed initiation guide and discussed formulary coverage.told dr he has OxyContin,7 tablet strengths available for his patients needing more than 80mg oral morphine equivalent,and available at the lowest branded co-pay for Medicaid and commercial plan patients.recommended Senokot-5
PPLPMDL0020000001	Fairlawn	OH	44333	2/18/2011	Reintroduced Butrans and spoke with him about more specific types of patients. He said he could think of some low dose hydrocodone patients. I asked him to tell me more about that patient? I asked how long they had been on Vicodin. He said he was thinking of a specific patient who was on Vicodin QID. I told him that was the exact type of patient that would be ideal for therapy with Butrans. He committed to trying it.
PPLPMDL0020000001	Cleveland	OH	44109	2/18/2011	showed dr Butrans initiation guide and asked if dr started any patients yet? dr said no,he has looked through full prescribing information but hasnt talked to anyone yet.I asked dr if there was any reason why he wouldnt prescribe Butrans,as long as patients meet Butrans indication? dr said no,he likes once weekly dosing and transdermal application,just has to talk to a few patients on orals that would be interested in trying Butrans. asked dr to think of 2 patients to start on Butrans,dr agreed. told dr to consider OxyContin,as an option when patients are above 80mg oral morphine equivalent,and he has 7 tablet strengths,gave dr OxyContin conversion guide.recommended Senokot-5
PPLPMDL0020000001	Parma	OH	44129	2/18/2011	Jen said that she has not yet prescribed Butrans. She said, like Laura, she has not seen the right patient. Asked her to clarify by telling me what type of patient she was looking for & she said, like Laura, that it would be someone who wanted an alternative to taking oral pain medication for chronic pain. She said that because Butrans is a long-acting opioid, she would only think to use it in patients who have already been on short-acting opioids. She also wants to wait to see if Dr Nickels starts to use it. Discussed managed care- commercial tier 3, BWC, & prior authorization for Medicare & Medicaid. Also reviewed savings cards for cash-pay & commercially insured patients and Ryzolt reminder.
PPLPMDL0020000001	Mayfield Hts	OH	44124	2/18/2011	Doc asked for more Butrans savings cards. He said he and Dr. Dews have been prescribing and Dr. Dews has taken some to her other office. I asked him what feedback he has received and he said he has prescribed a couple of times and so far he hasnt heard of any problems. Reminded him of the positioning and the coverage.
PPLPMDL0020000001	Fairlawn	OH	44333	2/18/2011	I had the opportunity to quickly introduce Butrans and the indication to Dr. Lefkowitz. I was able to get out that it was a 7 day transdermal delivery system. He quickly asked if it was going through on BWC before walking wJaway. I left a FPI and finished going over all the FPI and patient types with the entire office. They took down my name and number in case Dr. Lefkowitz had questions.
PPLPMDL0020000001	Cleveland	OH	44103	2/18/2011	talked to dr about considering patients,to start on Butrans,that are complaining about current medication or asking dr for a medication change.showed initiation guide and discussed medicaid coverage.talked to dr about OxyContin being an option for patients taking more than 80mg oral morphine equivalent,with 7 tablet strengths,and covered at lowest branded co-pay for medicaid patients.recommended Senokot-5
PPLPMDL0020000001	Parma	OH	44129	2/18/2011	Asked Laura if she had gotten to gain any experience with Butrans since my last conversation with her. She said she had not prescribed it yet. She said she is looking for the right patient. I asked her who, in her mind, was the "right" Butrans patient. She said someone who does not want to take pain medication in pill form around-the-clock. I asked if the would ever consider using Butrans in patients who had never been on an opioid before & she said "never". I asked her why & she said that she would never put someone on a long-acting opioid as a first opioid. She said that she feels that it is "safer" to put someone on a short-acting first in case they have some sort of reaction to it. She also said that if someone was doing well on Vicoden around-the-clock, she would not switch them to Butrans. She said she wanted to know how Dr Nickles feels about Butrans before she starts prescribing it. Reminder of commercial insurance & savings cards for those patients.
PPLPMDL0020000001	Parma	OH	44129	2/22/2011	Introduced Butrans to Dr Chagin, delivering 5 core messages & alerting him to box warning. He said Butrans sounded like something his patients could really use & benefit from. He said he likes that it is dosed only once-a-week & that it is not an oral medication. He asked what conditions it could be used to treat-I told him the indication was for moderate to severe chronic pain & does not specify what the etiology of the pain must be. Reviewed initiation guide with him- he said he could see using it in patients who are opioid-naive as well as those who have been taking 2-4 Vicoden or Percocet per day for chronic conditions. Discussed savings cards for commercial insurance/cash pay (no government insurance). Also reminder for OxyContin for appropriate patients beyond available Butrans dosing & Ryzolt 2-3-1 & value card reminder. Also recommended Senokot-5 for opioid-induced constipation. Spoke with Lynn (nurse) & Debbie (MA) about Butrans, savings cards, & patient information booklets.
PPLPMDL0020000001	Independence	OH	44131	2/22/2011	Spoke with Dr Reddy & Kathi- Delivered Butrans 5 core messages and reviewed appropriate patient types. Dr Reddy said Butrans sounds like something he will be able to use with his patient population. He said he does see several patients for chronic pain. He asked what the "cost" was- I reviewed with him & Kathi commercial insurance coverage & savings cards for patients who pay cash or have commercial insurance (no government insurance including Medicare & Medicaid.) Quickly reviewed initiation guide & dosing strengths before Dr Reddy had to go see another patient. Let Kathi know I would return to follow up.<font color=blue>-b>CHUDAKOB's query on 03/04/2011</b></font>-No and none<font color=green>-b>APSEGAS's response on 03/06/2011</b></font>-Dr Reddy, after discussing Butrans during my last visit, you said that you think it is something you will be able to use in your practice for patients with moderate to severe chronic pain. Share with me how you think your patients could benefit from Butrans.<font color=blue>-b>CHUDAKOB added notes on 03/06/2011</b></font>-Oh so much better!!!!
PPLPMDL0020000001	Parma Heights	OH	44129	2/22/2011	Spoke with Al, who said he has still not seen any Butrans activity. Discussed indication, dosing, initiation, & appropriate patients. He had no additional recommendations of who in the area may be interested in hearing more about Butrans. Reminded him that he could print savings cards for Butrans online, so he wrote down the website so that he could print some in advance. Also went over OxyContin savings cards. Al said they have not been seeing any prescriptions for the intermediate strengths, but they still are seeing "plenty" of the other strengths.
PPLPMDL0020000001	Cleveland	OH	44113	2/22/2011	talked to dr about appropriate patients to start on Butrans and dr said he would start patients on Butrans that are opioid naive but the majority of patients he treats have been on opioids so he said he's still trying to figure out who that patient is for Butrans and has to give it a try and talk to some patients.i told dr if he has patients on 3-5 tablets of short-acting opioids and they are complaining of current medication or want a change in their medication,that potentially could be where he thinks about Butrans.dr agreed,said that made sense and he feels because its newer to him he needs to think about who the patients are for this drug and then start some patients and see what clinical results he gets from Butrans.talked to dr about workers comp and medicaid patients being the majority in practice,with a little commercial plan coverage,so we discussed Butrans coverage on Quick call with Fenja, who said they had not filled any Butrans prescriptions so far. She checked their system to see if the other pharmacist had dispensed any, but she had not. Reviewed indication & positioning of Butrans for appropriate patients. Reminded her of e-voucher and checked to see if they needed any more OxyContin savings cards, but she said they still had some.
PPLPMDL0020000001	Parma	OH	44129	2/22/2011	

	Lakewood	OH	44107	2/23/2011	Met the nurses who work with Dr Nageeb in the hospital- Molly Lisa, Janice, Diane. We discussed Butrans FPI, initiation guide and medication guide. We discussed the challenges with pain patients and tools to help pick appropriate patients. I stopped by to see Ann and Dr Riebel in the Med staff office. Ann no longer works there and Mary Ann Tilow-Kmetz is taking over her position for now. Her title is Director of Medical Staff Services. I let her know the resources that Purdue has to offer regarding pain management and that I can do education on the floors with the nurses. She told me if I can't get a hold of Josie to set something up, she will help me. She will keep me posted on anything they are doing in the hospital related to pain management to see if I can partner with them. I left information for Dr Riebel regarding Butrans.
PPLPMDL0020000001	Cleveland	OH	44104	2/23/2011	dr said he started a patient on Butrans.i asked why? dr said patient was a hospice patient, not controlled on oral medications,so he started patient on Butrans.dr said he doesnt prescribe Vicodin, but will prescribe Percocet.talked to dr about patients taking 1-3 tabs a day of Percocet,as being appropriate patients for Butrans.talked to dr about OxyContin being an option once the maximum dose of Butrans no longer controls the pain and discussed OxyContin savings cards.
PPLPMDL0020000001	Cleveland	OH	44130	2/23/2011	Spoke with Diane who confirmed their stocking of all three strengths of Butrans. She said they have not dispensed any yet. Reviewed indication, doing, & appropriate patients with her. Also gave her OxyContin savings cards which she said they would use. Asked her to call me with any Butrans feedback or questions.
PPLPMDL0020000001	Brooklyn	OH	44144	2/23/2011	Quick call with Dr Miguel- Butrans indication & savings card reminder along with OxyContin savings card reminder. He was on his way to see a patient upstairs so he could not stay to talk. I spent time with Stephanie, his MA, going over Butrans. Reviewed indication, dosing, application, rotation, and appropriate patient type/positioning. Also discussed managed care coverage for Butrans and Butrans & OxyContin savings cards for commercial insurance or cash-pay patients.
PPLPMDL0020000001	Westlake	OH	44145	2/23/2011	Quick call to follow up on getting Butrans on formulary. He said he has not heard back yet, but will let me know when it is ordered and in the hospital.
PPLPMDL0020000001	Stow	OH	44224	2/23/2011	Spoke to Church and he said he has not stocked Butrans and only stocks what Dr Bressi and Geigar and Yang write. I discussed if the patient comes down with a script more than likely will go somewhere else for script. he said when he gets a script he will order
PPLPMDL0020000001	Lakewood	OH	44107	2/23/2011	Quick call with Joe, we reviewed the medication guide for Butrans and how to instruct patients on proper application and use. He has not seen scripts yet and does not have Butrans in stock.
PPLPMDL0020000001	Cleveland	OH	44114	2/23/2011	i asked Laura,Pharmacist,if she has seen any Butrans scripts yet, as i just found out that Dr.Katz started two patients last week on Butrans? Laura said no she hasnt seen any scripts and wasnt going to order Butrans until the 1st script came through. i explained to Laura the importance of stocking Butrans so that patients dont have to wait 24 hours and complain to their doctor that the pharmacy didnt have it in stock.Laura said she understood that information but she wasnt going to order Butrans until the first script came through.
PPLPMDL0020000001	Uniontown	OH	44685	2/23/2011	Introduced Butrans and FPI. Focused on patients who were opioid naive since she said that was the patient she would be most likely to initiate therapy.
PPLPMDL0020000001	Uniontown	OH	44685	2/23/2011	Introduced Butrans and the FPI. She typically only talks to reps in a lunch or appointment but gave me a few minutes since this was the first time she had heard about Butrans. i asked where she could see this product fitting in to her practice and she said she would have to learn more about it.
PPLPMDL0020000001	Richmond Heights	OH	44143	2/23/2011	Window call.....Discussed the indication and patient type for butrans. Told doc that its the first once weekly analgesic delivered in one application. He said he does not have time today and he is really behind. Nothing
PPLPMDL0020000001	Uniontown	OH	44685	2/23/2011	Introduced Butrans and the FPI and found out that Dr. Lenz will be leaving his practice in April. He has said because of this he would be unlikely to prescribe it but did agree that there was a definite need for a product like I reviewed the 5 key messages for Butrans. Dr asked why he should use Butrans instead of Duragesic. i told him we have no head to head data to compare the two. We reviewed the initiation guide. Dr asked about managed care coverage and we reviewed the savings cards and managed care for Butrans. Dr had to run to main campus, but was interested in talking more about Butrans. Dr said he had been prescribing more OxyContin lately both in patient and out patient. We reviewed the managed care for OxyContin. Reminder to recommend Senokot S with opioids-<font color=blue>cb>CHUDAKOB's query on 03/04/2011</b></font>Did you ask him the type of patient he prescribes Duragesic for and the strengths he is talking about? This may lead to a discussion that the Butrans patient is probably not the Duragesic patient.<font color=green>cb>HOLUBA's response on 03/07/2011</b></font>Thanks, I am going to see him today so i will ask.<font color=blue>cb>CHUDAKOB added notes on 03/07/2011</b></font>Ok. I hope it goes well.
PPLPMDL0020000001	Lakewood	OH	44107	2/23/2011	Dr said he had all the info he needed regarding Butrans and that he would give it a try. i reviewed the 5 key messages and asked what type of patient he was thinking of. He said he was not sure yet but he would try to find someone to give it a try.
PPLPMDL0020000001	Cleveland	OH	44127	2/23/2011	talked to dr about patients he would consider appropriate to start on Butrans.dr said he's still looking for that right patient,he see's a lot of chronic pain patients daily but so many patients dont like taking a patch and not having their pills.dr said he would start patient on Butrans,after an NSAID or low dose hydrocodone.discussed medicaid and commercially insured patients and coverage for Butrans.Tony,Medical Assitant,said she does all prior authorizations.
PPLPMDL0020000001	Cleveland	OH	44104	2/23/2011	asked dr how Butrans played a role in his practice? dr said his patients are on OxyContin,percocet and ultram.showed dr Butrans initiation guide,asked if he had patients on low dose oxycodone? dr said yes,he gives 1-2 tablets a day up to 4 tabs,60/month,told dr he could start patients like that on Butrans,discussed Butrans coverage for commercial plan patients and Medicaid.
PPLPMDL0020000001	Uniontown	OH	44685	2/23/2011	Spoke with the pharmacist and introduced Butrans and the FPI. He said he thought this was a great product and that there was a definite need for something like this in the current market place.
PPLPMDL0020000001	Lakewood	OH	44107	2/23/2011	We reviewed Butrans FPI, initiation guide and medication guide. Katie said that she is able to prescribe CII medications and she would feel comfortable starting a patient on Butrans. She thinks it will be a good option instead of patients taking vicodin or percocet around the clock and she said that there has been a need for a long acting CII opioid. She said she does try to wait until a last resort to recommend OxyContin or Duragesic for patients and would use Butrans before these options. We discussed managed care and the savings cards. She does see BWC patients. I reviewed OxyContin as an option when Butrans may not provide adequate analgesia. Reminder about Ryzolt as a once a day option and to recommend Senokot S with opioid scripts.
PPLPMDL0020000001	Lakewood	OH	44107	2/23/2011	Dr said that he did have a patient in mind to start on Butrans. He said she was previously on darvocet and is now on 2 vicodin per day but is in chronic pain. I let him know that darvocet does not have the same indication as Butrans, and we reviewed the indication. He said that this patient does have moderate chronic pain and meets the indication. We discussed how to initiate her on 5mcg Butrans and he can titrate after 3 days. i asked what managed care the patient has and he said Medicare. i let him know that Medicare may not approve Butrans but he could try and see. We discussed the managed care plans where Butrans is approved and the savings cards.
PPLPMDL0020000001	Cleveland	OH	44114	2/23/2011	Reminder that OxyContin is an option after patients are asked dr if he started any patients on Butrans? dr said no,he is still looking for the right patient and has to continue reading through the Butrans fpi.asked dr about patients complaining of medication and requesting a change,how often does that happen? dr said daily he hears that complaint from patients.told dr patients taking 1-3 tabs short-acting opioids is where he can start them on Butrans.dr said okay but that he also takes his time with a new medication.discussed initiation/titration guide and asked dr to think of 1 patient like we discussed.
PPLPMDL0020000001	Bedford	OH	44146	2/23/2011	Introduced myself & Purdue's products to Yolanda (technician) who gave me the new pharmacist's card (John Solomon). She said he is the pharmacy director now & is the person I would need to speak with regarding Butrans. Yolanda gave him my card & she said he would contact me to set up an appointment.
PPLPMDL0020000001	Stow	OH	44224	2/23/2011	Spoke with Tom who is the clinical supervisor for Dr Bresl and Dr Geiger. HE said he has not seen any scripts for Butrans and that Dr Bressi is waiting to speak to someone about Butrans like a speaker or medical liaison. HE thought we would be able to sponsor his provider dinner. I told him we are unable to do that but we can have a conference call at breakfast or lunch with medical services and he said he would run it by him. I told him I have also left messages with Lisa several times.Reviewed Butrans with him and patient type where Butrans would work. Rmeinded him of savings cards
PPLPMDL0020000001	Mayfield Village	OH	44143	2/23/2011	Discussed Butrans 5 selling messages. Doc said he would more likely prescribe for opioid experienced patients. He is familiar with buprenorphine as he treats addiction with suboxone. I explained the Butrans only indication for chronic pain and not addiction. Discussed the boxed warning- he was curious about warnings, risks, max dose. Reviewed the warnings and the 20mcg/max due to QTC prolongation. He asked if it stays on for 7 days. I explained the application and disposal process for best results. He asked about the risk for addiction - referred to the boxed warning and the risks similar to other opioids. No age adjustment for elderly. He said it is a good product and he will try to use it after he reads more about it. Gave FPI and REMS. coverage and savings cards discussed.
PPLPMDL0020000001	Stow	OH	44224	2/23/2011	Steve said he has not written Butrans yet, he said he cannot write this because it is not on the NP formulary. I asked if he can write it under the Drs discretion and he said yes. HE said this would be good in patients just coming in. Rmeinded of managed care coverage<font color=blue>cb>CHUDAKOB's query on 03/04/2011</b></font>What kind of a discussion are you going to have with him to "get him to focus on a specific patient where he would right Butrans?<font color=green>cb>THORNTOK's response on 03/06/2011</b></font>by asking him questions of what types of chronic pain patients he sees where he would write 3-4 Vicodin and then get him to focus on Butrans for those patients<font color=blue>cb>CHUDAKOB's query on 03/07/2011</b></font>It sounds like he said this would be good for "patients just coming in" Why would you focus on patients where he would write 3-4 Vicodin/day.<font color=green>cb>THORNTOK's response on 03/10/2011</b></font>I could, but he did not specify if they were opioid naive or experienced, and when I had lunch at their office previously, they had stated that alot of their patients who come in are on Vicodin already. Patients coming in can be experienced or naive and I did not ask because they let me back to see the clinical nurse manager not him, but I ended up talking to him when he popped in the office, i did not want to push my limits in that office.<font color=blue>cb>CHUDAKOB added notes on 03/15/2011</b></font>OK. Perhaps on your next call.
PPLPMDL0020000001	Cleveland	OH	44103	2/23/2011	talked to dr about Butrans initiation guide,dr said he's familiar with buprenorphine and asked about tapering the patients hydrocodone or oxycodone first,before starting Butrans,showed dr Butrans initiation guide,opioid experienced section.dr asked if you can give short-acting opioid with Butrans? i told dr yes and showed Butrans fpi and initiation guide noting this information.
PPLPMDL0020000001	Berea	OH	44017	2/23/2011	Spoke with April, we reviewed the Butrans FPI, indication, dosing, initiation guide and medication guide. She did have the 5 and 10mcg on the shelf. She thinks it will be a good option for some patients instead of vicodin around the clock and she said that she liked the fact that Butrans is a single entity opioid. We discussed OxyContin as a Q12hr option when Butrans may not provide adequate analgesia. Reminder about Ryzolt as a once a day option and asked to recommend Senokot S with opioids.
PPLPMDL0020000001	Uniontown	OH	44685	2/23/2011	Spoke with the pharmacist. Introduced Butrans and the FPI. She told me that Dr. Midian and Lababidi would have the most potential for this product.
PPLPMDL0020000001	Cleveland	OH	44115	2/23/2011	i talked to dr about Butrans 5 core messages and initiation guide.dr said he was very familiar with buprenorphine and prescribes it in the hospital for pain and treatment of addiction.i told dr Butrans is not approved for treatment of addiction,showed dr Butrans fpi section 5.17 and i re-stated the Butrans indication.
PPLPMDL0020000001	Berea	OH	44017	2/23/2011	i asked if he has had any feedback from patients, he said the patient did not fill their Butrans script as he decided the vicodin was enough. He said he has not seen any chronic pain patients since we spoke last. We discussed Butrans initiation and dosing. We discussed managed care and the he was happy to know it is going thru on BWC. I asked Dr what type of patient would he most likely start, he said he wasn't sure yet, but probably a patient who has been on tramadol or vicodin. We discussed tapering the patients down if need be and he said he feels comfortable doing this. We discussed that OxyContin is still an option when Butrans may not provide adequate analgesia. We reviewed Reminder about Ryzolt as a once a day option and asked him to recommend Senokot S with opioids. I also spoke with Diane about Butrans managed care as she is the one who does most of the prior auths, she said she will reminder Dr about Butrans as an option BWC patients.<font color=blue>cb>CHUDAKOB's query on 03/04/2011</b></font>Andrea, here are the potential answers to your next call objective questions.1) No2) NoPretty quick coverage. How might you rephrase these to get the doctor talking more. I realize Khalic's access issues, but a good question not answered well is better than a closed question answered well.<font color=green>cb>HOLUBA's response on 03/07/2011</b></font>Dr, Tell me what type of patient you are thinking would benefit from Butrans?<font color=blue>cb>CHUDAKOB added notes on Window call, he was going in to injections. He said he has not tried Butrans but will try it when he sees the right patient. Gave him new Oxycontin savngs cards and reminded him of managed care coverage
PPLPMDL0020000001	Stow	OH	44224	2/23/2011	Introduced Butrans and the FPI. Dr. Midian seemed very interested and wanted to hear someone speak about it before he was willing to write it.
PPLPMDL0020000001	Uniontown	OH	44685	2/23/2011	Quick call with Dr Diab who unfortunately was running 2 hours behind. He said he is waiting for the right patient for Butrans. I asked him what he was looking for but he did not respond. I suggested that he think of Butrans for an appropriate patient for whom he is ready to prescribe Vicodin or Percocet. I asked him to identify one of those patients & asked him if he agreed that that was a reasonable request. He agreed that it was. Spent time with Barb (nurse) & Karen (MA) reviewing Butrans indication, application, managed care, & savings. They both said Dr Diab sees many patients who fit the Butrans indication and who may be appropriate patients for Butrans.
PPLPMDL0020000001	Cleveland	OH	44130	2/24/2011	Barb took an initiation guide & said she wanted to read more about it because she knows it is something that Dr Diab will start to use. Discussed appropriate patients/positioning for Butrans.

PLPMDL0020000001	Parma	OH	44134	2/24/2011	Spoke with Joe (pharmacist) who had not yet heard about Butrans. Reviewed with him indication, dosing, appropriate patients/positioning, and e-voucher. He checked to make sure they were stocked & confirmed that they still have the 5mcg & 10mcg strengths in stock. Joe said that he is not typically at this location and that he has not yet dispensed any Butrans. Also reviewed OxyContin savings cards with him. Erika said they did not need any additional savings cards at this time.
PLPMDL0020000001	Parma	OH	44134	2/24/2011	Spoke with James (new pharmacist at this location) & introduced Butrans. Reviewed indication, dosing, appropriate patients/positioning, and once-a-week application. James said he had not yet dispensed any Butrans but that he just transferred from a different store. He did not yet have any specific recommendations on what are physicians may have Butrans potential. Discussed OxyContin savings cards which he said they could really use as he only had one left. He said that he likes to be able to give out savings cards whenever possible.
PLPMDL0020000001	Lyndhurst	OH	44124	2/24/2011	Quick call...Spoke to doc about the Butrans patient and asked if she has seen any appropriate patients. She said no and that it may be a small window of opportunity of appropriate patients. Reminded her to choose patients with commercial coverage.
PLPMDL0020000001	Rocky River	OH	44116	2/24/2011	Spoke with Leigh Ann, we reviewed the Butrans medication guide and how to instruct the patient on proper use of Butrans. She has not seen a script yet and said they see mostly short acting pain medication in their pharmacy. They do have a few patients who get refills every month of vicodin and we discussed the indication and appropriate patients for Butrans. Reminder about OxyContin as a Q12hr option and asked her to recommend Dr Gigliotti said that he has still not prescribed Butrans- he said he has not seen the right patient yet as he is not as busy as he used to be & hasn't prescribed a long-acting opioid in awhile. I reminded him that he has shared with me in the past that he does not like his patients to take around-the-clock short-acting opioids as he does not like people to get used to taking pills every few hours. He said that he still thinks that way. I asked him if he would consider using Butrans before putting patients on around-the-clock short-acting opioids if the patient is appropriate and has a chronic condition. He said that he liked that idea. He got out his initiation guide & placed it in front of his computer to remind him. Reviewed managed care & savings cards. Also OxyContin & Ryzolet reminders for appropriate patients & reviewed savings for each. Reminded Dr Gigliotti how to write Butrans 5mcg prescription when the patient we spoke about presents. He said he would do this.
PLPMDL0020000001	Independence	OH	44131	2/24/2011	Dr Trickett said that the patient she told me about in my last visit did end up discontinuing Butrans due to nausea. (Reported nausea last call). She said she will still try Butrans for other patients. I asked if she would consider starting appropriate patients on Butrans instead of or before starting them on around-the-clock short-acting opioids if they have a chronic condition. She agreed this was a good place to position Butrans. She also asked if she could use Butrans for patients who were already on Vicoden in place of it. Showed pg 6 of initiation guide & let her know that was also a great place to start. Also discussed managed care & savings cards for commercial insurance & cash-pay patients.
PLPMDL0020000001	Mayfield Heights	OH	44124	2/24/2011	Discussed the indication and the patient positioning for Butrans. She said she would probably use for patients taking vicodin, tramadol, or those that were on darvocet. I reviewed the initiation dosing. Explained the coverage and the savings card program. She sees it being a benefit for her patients.
PLPMDL0020000001	Richmond Heights	OH	44143	2/24/2011	Window call. Briefly introduced Butrans, the indication, CII, and 7 day delivery of Buprenorphine. He simply said he does not use patches. Nothing more learned.
PLPMDL0020000001	Akron	OH	44313	2/24/2011	Spoke with Sarah who is a new pharmacist. Introduced Butrans and the FPI. She said she would not order Butrans unless a prescription came through. However, she seemed to be receptive to the product.
PLPMDL0020000001	Mayfield Heights	OH	44124	2/24/2011	Spoke to Bill about the stocking of Butrans. They received a couple of scripts and one today from Dr. Dewes office. Patient did not have the savings card and paid \$50 with caremark. I explained the savings card and commercial coverage. He had to re-order Butrans already. Was not sure of relay health evoucher program.
PLPMDL0020000001	Barberton	OH	44203	2/24/2011	Spoke with Cathy, the pharmacist. She said that she would order the 10 mcgs of Butrans and was at her computer as I was leaving. She says she has not seen any movement yet but that Dr. Shah and Patel would be the best
PLPMDL0020000001	Lyndhurst	OH	44124	2/24/2011	Quick call.....reviewed the appropriate Butrans patient type with she and Dr. Reed. They have not had any other patients yet. Explained the coverage with commercial plans and savings cards.
PLPMDL0020000001	Mayfield Heights	OH	44124	2/24/2011	Discussed the Butrans indication and the 4 other selling messages. She asked about MOA - agonists/antagonist. Showed her the MOA in the FPI. She asked about supplemental analgesics. Showed her that they can be used. I discussed the application and disposal process and how to titration. She asked about studies with Butrans and short acting opioids. Told her there were not studies. She said they are writing a lot of it and that Dr. Dewes is switching patients from IR opioids. Explained the savings cards and commercial coverage.
PLPMDL0020000001	Barberton	OH	44203	2/24/2011	I asked him if he had initiated therapy and he said he had not. When I asked him if he would think of Butrans when a low dose hydrocodone patient came in he said he would. I then showed him the titration guide so he would get an idea as to where he should initiate therapy. Closed by showing him an example of what a script would look like on the last page of the titration guide.
PLPMDL0020000001	Cleveland	OH	44130	2/24/2011	Quick call with Dr Fedorko- He said he is trying to remember Ryzolet & the value cards. He said again that insurance gives him push back sometimes when he tries to write it. I reminded him where there is tier 3 coverage & encouraged him to give out value cards to appropriately insured or cash-pay patients. Also Butrans indication & seven days buprenorphine delivery in one application messages. He said that he wishes he didn't ever have to write opioids & that he has started "firing" patients from his practice who ask for opioids. I told him that he is doing as he should in being careful & selective when selecting patients for any opioid & empathized with his struggle. Reminded him that there are patients who are appropriate & for whom opioids may be beneficial for pain relief.
PLPMDL0020000001	Westlake	OH	44145	2/24/2011	I reviewed our last conversation about patients he had in mind for Butrans who work a physical job. He has not tried Butrans in a patient but said that he would give it a try. For the patient he has in mind, I asked what they are currently taking. He said they are on vicodin either 5 or 7.5mg and several per day. I reviewed how to taper a hydrocodone patient and how to initiate Butrans per the initiation guide. He agreed to give it a try.
PLPMDL0020000001	Mayfield Heights	OH	44124	2/24/2011	Spoke with Jenise and other tech about the stocking and movement of Butrans. They confirmed that a couple of Butrans scripts have been filled. They did not recall the prescriber. They have reordered already. Warren was busy. Explained the savings cards program.
PLPMDL0020000001	Mayfield Heights	OH	44124	2/24/2011	Discussed the Butrans indication and the 5 selling messages. Asked him if he see a benefit of Butrans for his patients. He said yes for those that require a long acting for chronic pain. I reminded him of the 5mcg/hr starting dose for most patients. Also reviewed the commercial coverage. He said he will try to use it.
PLPMDL0020000001	Highland Heights	OH	44143	2/24/2011	Discussed the Butrans patient and the 5 selling messages. Doc said he has written several scripts so far and none of them have gone through - they all require PA. I reviewed the commercial plans with him and the nurses explained that Medicaid and Medicare will require a PA. Asked him to prescribe Butrans for commercial patients and give them a savings card. He said he will keep trying because he wants to write it and he likes the product.
PLPMDL0020000001	Mayfield Village	OH	44143	2/24/2011	Introduced Butrans and the 5 selling messages. She asked about how to keep the patch on. I explained the use of first aid tape or tegaderm. Discussed dosing, application and disposal process. Explained that commercial coverage is the best patient type. She said she would prescribe.
PLPMDL0020000001	Twinsburg	OH	44087	2/25/2011	Spoke with Lou who said he has not seen Butrans activity yet. He said he does not understand as he thinks Butrans seems like a fantastic option for many patients. I explained that I had not yet spoken with many of the area physicians due to their no access policies but have been leaving information. He asked me for some initiation guides & said that he can think of many of his customers that he thinks Butrans would be appropriate for and therefore said he would make some phone calls to physicians in effort to educate them on Butrans & to see if the physicians would be willing to switch appropriate patients to Butrans. Reviewed managed care coverage & e-voucher with Lou & Nancy.
PLPMDL0020000001	Woodmere	OH	44122	2/25/2011	Spoke with Angie & followed up on previous Butrans call. She said she left the information for the pharmacy manager, but that he had not yet ordered Butrans. Reviewed indication, application, appropriate patients with Angie & she said that she would once again remind the pharmacy manager & recommend that he order Butrans in. Also discussed OxyContin savings cards.
PLPMDL0020000001	Garfield Heights	OH	44125	2/25/2011	Spoke with Jackie (MA) who said that Dr Gupta left early due to the weather. I reviewed Butrans with her & discussed indication, dosing, appropriate patients/positioning. She said she felt that Butrans sounded like something that Dr Gupta would be very interested in & she worked with me to schedule their first available lunch.
PLPMDL0020000001	Cleveland	OH	44109	2/25/2011	I asked dr if he started 1 patient on Butrans? dr said no he hasn't talked to a patient yet where he feels Butrans is appropriate so we discussed Butrans indication and I showed dr Butrans initiation guide and asked dr to think of 1 patient who's pain isnt controlled and that patient is requesting something else,perhaps Butrans could be an option for this patient. dr agreed to think of Butrans for that type of patient and i said i would follow-up at our lunch on March 7th, 2011. recommended Senokot-5<font color=blue><b>CHUDAKOB's query on 03/04/2011</b></font>By asking him what patient he thinks would be an appropriate patient for Butrans, he might open up. Even if you already asked this, he is not convinced.<font color=green><b>BROOKAM's response on 03/05/2011</b></font>yep agree! I have lunch with him this monday BUT the issue is that he see's majority of patients in hospital where they are cash paying and residents like him said this will absolutely have to be used in the OUT-patient setting,not in-patient at the moment<font color=blue><b>CHUDAKOB's query on 03/07/2011</b></font>So is he the right person to be talking to. How will he help you move prescriptions if he cannot prescribe it due to his seeing patients in the hospital? Just wondering??<font color=green><b>BROOKAM's response on 03/10/2011</b></font>he see's patients in the out-patient center and I am not calling on him, as a Butrans Core(he's not listed as one) but clearly ANY resident in the out-patient facility i talk to and that treats chronic pain, im discussing Butrans as an option with them so that they can consider starting patients in out-patient facility. hope that answers your question:) Thanks!<font
PLPMDL0020000001	NORTHFIELD	OH	44067	2/25/2011	Spoke with Sherry (tech) who said that Janelle was too busy to talk to me today. I reviewed Butrans indication, appropriate patients/positioning, & e-voucher with her. She said she did remember seeing Butrans on the shelf but does not think they have dispensed any. Left FPI and my card for questions & let Sherry know I would return for follow-up.
PLPMDL0020000001	Beachwood	OH	44122	2/25/2011	Introduced Butrans to Dr Hill who said that Dr Tabbaa had already shared his information with him. Reviewed 5 core messages, box warning. He said that he plans to start using it along with Dr Tabbaa as he respects his medical opinions on products. Reviewed application, adhesion, heat warning, CII, patient information booklets. Dr Hill asked about managed care coverage, so I went over commercial tier 3 coverage, savings cards for commercially insured/cash patients, Medicare/Medicaid prior authorization (& unable to use savings cards). He agreed that a \$15 co-pay for Butrans for commercial insurance patients was very reasonable. Also discussed OxyContin for appropriate patients with moderate to severe pain who were beyond Butrans. Seven tablet strength reminder as well.
PLPMDL0020000001	Beachwood	OH	44122	2/25/2011	Dr Tabbaa said he was very excited about Butrans & that he actually just wrote his first prescription for a patient. He asked how long it takes to start working. I showed FPI 12.3 & also 2.4 regarding supplemental analgesia. He said he was very familiar with buprenorphine & has used it in other forms. He asked if there was any indication for Butrans for addiction treatment. I told him there was not & that Butrans is only indicated to treat pain & showed FPI 5.17. He asked if there was a heat warning. I told him yes & discussed box warning. Reviewed 5 core messages, dosing, & appropriate patients/positioning. He said he will be using Butrans a lot & asked about insurance/cost. Discussed starting by using it for appropriate commercial insurance patients due to tier 3 coverage & savings cards. Reminder for OxyContin q12h for appropriate & reviewed savings cards. I would be back for
PLPMDL0020000001	Cuyahoga Falls	OH	44223	2/25/2011	Spoke with pharmacist and introduced Butrans and the FPI. Pharmacist best bet would be to talk to Bressi and Pitt (Bressi not in my geography). Asked if he would consider ordering the 5 mcgs since I had been discussing it with several docs in the area.
PLPMDL0020000001	Cuyahoga Falls	OH	44223	2/25/2011	Spoke again with the pharmacist Christina, although they had still not ordered Butrans she did give me Little more time than my last visit to explain what it was. She had mentioned visiting Dr. Goswami. I have not seen him yet but managed care there will be a definite issue.
PLPMDL0020000001	Westlake	OH	44145	2/25/2011	I asked Dr if he had given any thought to where Butrans might fit in his practice. We reviewed the initiation guide and he thinks he agree to try Butrans in a few patients. He could not think of any specific patient.
PLPMDL0020000001	Lakewood	OH	44107	2/25/2011	Quick follow up, I asked Dr if he thought further about the type of patient he might prescribe Butrans for, he said he would try it for a patient who is needed vicodin around the clock. I reminded him of how to initiate a patient and how to write the Butrans script.
PLPMDL0020000001	Cleveland	OH	44109	2/25/2011	I asked dr if she started any patients on Butrans yet? dr said no but she has a few patients in mind and has talked to some patients about Butrans but they didnt want to stop taking their pills and put a patch on i showed dr Butrans initiation guide and asked if these were opioid experienced patients similar to chart in the initiation guide? dr said yes, they were taking a couple tabs a day of short-acting,so i asked dr to think of patients that are complaining their pain isnt controlled on short-acting opioids and they are requesting a change in medication,these could potentially be patients she can consider to start on Butrans. dr said she'll think about it and try thinking of some other patients like that. recommended Senokot-5
PLPMDL0020000001	Cuyahoga Falls	OH	44223	2/25/2011	Spoke with Pat to see if there has been any movement. He said he had not seen anything yet but had done some additional research on Butrans and really thought it was a good concept with a big need in the market.

PPLPMDL0020000001	Cleveland	OH	44109	2/25/2011	i showed dr Butrans initiation guide and asked if he started any patients on Butrans? dr said no but he thinks its a great option for his patients that dont like taking pills around the clock. dr said transdermal delivery and once weekly dosing are 2 of the biggest benefits in his eyes. i asked dr if he could consider a couple patients,opioid experienced, that are complaining of pain not being controlled with their current short-acting opioids and they are requesting a change in medication,perhaps Butrans could be an option for them? dr said yes that made sense and he would consider Butrans for a few patients and let me know what results he see's in patients.dr asked about Medicaid coverage so we discussed Butrans formulary coverage.recommended Senokot-S<font color=blue><b>CHUDAKOB's query on 03/04/2011</b></font>Good next call objective question!!<font color=green><b>BROOKAM's response on 03/06/2011</b></font>thanks<font color=blue><b>CHUDAKOB added notes on 03/07/2011</b></font>You're welcome!
PPLPMDL0020000001	Cleveland	OH	44109	2/25/2011	worked physical medicine&rehab dept-see call notes
PPLPMDL0020000001	Cleveland	OH	44109	2/25/2011	i asked dr if he has started any patients on Butrans? dr said no, hasnt thought about it and he still wants to review Butrans fpi,more in depth than our discussions. i asked dr how Butrans was a benefit to his patients? dr said transdermal delivery and once weekly dosing were both benefits but this isnt going to work for every patient as some patients are fine taking their short-acting medications. i told dr to consider patients where their pain isnt controlled and they want another option,thats where Butrans could be considered.i showed dr Butrans initiation/titration guide and discussed managed care coverage. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44103	2/25/2011	asked dr if she started any patients on Butrans yet? dr said she is still looking for right patient,so i asked dr who that patient was in her mind for Butrans? dr said patients willing to take a patch and put it on a different site every week as some patients arent responsible enough to do that and want their pills. i asked dr to consider patients that are willing to wear an adhesive that she believes are appropriate for Butrans and showed her the Butrans initiation guide and discussed managed care coverage.
PPLPMDL0020000001	Cleveland	OH	44103	2/25/2011	only got a minute with dr but asked dr if he started any patients on Butrans yet? dr said no he hasnt thought of Butrans for his patients as he's not going to do the Prior authorizations for his medicaid patients and thats majority of his patient population.i told dr i appreciated his honesty and asked if he could consider Butrans as an option for those patients with commercial insurance that he feels are appropriate for Butrans? dr agreed and i gave him Butrans initiation guide and discussed Butrans patient savings cards with dr.i showed dr OxyContin conversion guide and told dr when patients are above 80mg oral morphine or equivalent,he has option of OxyContin with 7 tablet strengths and its available at lowest branded co-pay on Medicaid.recommended Senokot-S<font color=blue><b>CHUDAKOB's query on 03/04/2011</b></font>Amy, he might have a hard time telling how the benefit he sees in Butrans if he has never tried it. If he truly sees a benefit, don't you think he will try it? Just wondering your thoughts?<font color=green><b>BROOKAM's response on 03/05/2011</b></font>i would disagree as many doctors havent tried Butrans,so they have to say in their words how they see Butrans being a benefit...could be various reasons, right? the bottom line is dr robson does NOT want to do the prior authorizations where dr boyd IS willing to do them...<font color=blue><b>CHUDAKOB added notes on 03/07/2011</b></font>OK.
PPLPMDL0020000001	Parma	OH	44134	2/28/2011	Reviewed Butrans indication, dosing, appropriate patient type/positioning, box warning with Alicia (pharmacist). She said she remembers seeing an email about Butrans but has not yet dispensed any. Discussed positioning & opioid-naïve/opioid-experienced patients. Alicia said that she would be very happy if Butrans could take the place of around-the-clock Vicoden or Percocet for some patients. Went over heat warning & adhesion (taping edges with first aid tape or bioadhesive/tegaderm). Also discussed e-voucher & OxyContin savings cards.
PPLPMDL0020000001	Independence	OH	44131	2/28/2011	Quick call with Dr Jack in effort to find out where in his mind he has positioned Butrans. He said he had forgotten Butrans again & asked that i continue to remind him. Asked him to prescribe Butrans for an appropriate patient for whom he would normally prescribe 1-3 Vicoden per day for a chronic condition.
PPLPMDL0020000001	Parma	OH	44129	2/28/2011	Spoke with Sherrie (nurse) who said that Dr Roheny will not be in all week. Reviewed Butrans indication, appropriate patient type, dosing, & application with her & asked what her thoughts were. She said she thought Butrans sounded "interesting" and that she thought several of Dr Roheny's patients may be appropriate for Butrans. She asked that I return next week to catch Dr Roheny.
PPLPMDL0020000001	Parma	OH	44129	2/28/2011	Spoke with Edie - reviewed Butrans indication, dosing, appropriate patient types/positioning, managed care, & savings cards. She said Dr Rossi had not yet prescribed Butrans but thought that it sounded like something some of her patients may benefit from. Also reviewed OxyContin for appropriate patients & seven available tablet strengths.
PPLPMDL0020000001	Parma	OH	44129	2/28/2011	Spoke with Lynn to follow-up on Butrans. She said Dr Gallagher has not yet prescribed it. Reviewed with her indication, appropriate patient types/positioning, patient information booklets, & managed care. Also reminded her of savings cards for patients with commercial insurance or who are cash-pay & reminded her they are not for patients with any type of government insurance, including Medicare/Medicaid.
PPLPMDL0020000001	Independence	OH	44131	2/28/2011	Caught Dr Rob in the hallway for a quick call- Butrans indication & appropriate patient/positioning messages. I asked him to consider Butrans for one appropriate patient for whom he would normally prescribe 1-3 Vicoden per day. He said Butrans seemed "interesting" & then walked away. Butrans indication, dosing, & managed care/savings reminder with Maria & Cameo (MA).
PPLPMDL0020000001	Parma	OH	44129	2/28/2011	Introduced Butrans to Dr Taylor, delivering 5 core messages & box warning. She said she had several patients for whom Butrans may be appropriate. I asked what type of patient she was thinking of & she said she would use it in a patient who wasn't getting enough relief from over-the-counter options, for patients who had previously been on Darvocet, & for some patients who were taking Vicoden around-the-clock for chronic conditions. She asked if patients could take supplemental analgesia-I showed FPI 2.4. She said she thinks Butrans "seems less abuseable". I referred to box warning & told her that like all opioids, Butrans does have abuse/addiction potential & advised that she should be just as cautious in prescribing it as she would any other opioid. She asked about managed care- i reviewed commercial coverage & savings cards for those patients & discussed Medicare/Medicaid prior-authorization. Also OxyContin for appropriate patients beyond Butrans reminder & went over managed care.
PPLPMDL0020000001	Akron	OH	44304	2/28/2011	Introduced Butrans and the FPI at a lunch. It seemed that most of the residents and physicians i spoke with did not feel comfortable treating pain.
PPLPMDL0020000001	Cleveland	OH	44106	2/28/2011	i asked dr if he has started any patients on Butrans yet? dr said no he hasnt seen the right patient yet for Butrans.i asked who was the right patient? dr said someone willing to put a patch on and not have the pills around the clock.i showed dr Butrans fpi,initiating therapy section,noting that he can give Butrans and short-acting opioid or non-opioid during initiation of therapy of Butrans or throughout maintenance of therapy.dr said okay he forgot about that.i asked dr what benefits does he think Butrans offers his patients? dr said Butrans's transdermal delivery and once weekly dosing are both benefits in his eyes, he just needs to talk to some patients about it. we discussed managed care coverage for Butrans. recommended Senokot-S
PPLPMDL0020000001	akron	OH	44333	2/28/2011	Introduced Butrans and FPI with Dr. Bashor and the entire staff. Dr. Bashor really seemed to like the concept of this product and immediately said he was thinking of several patients. when I asked for clarifications and more specifics he mentioned the patients he had in mind were elderly patients.
PPLPMDL0020000001	Mayfield Heights	OH	44124	2/28/2011	Debbie said she is still confused about the MOA and if Butrans is an agonist/antagonist. I read the MOA in the clinical pharmacology section of the FPI. Discussed the other opioid receptors involved. She said that Butrans is not yet on the Cleveland clinic formulary that allows NPs to prescribe. She sees lots of patients that might be good candidates. Reminded her of the maax dose and that above 20mcg might be an oxycotin patient.
PPLPMDL0020000001	Akron	OH	44304	2/28/2011	Introduced Butrans and the FPI. Physician said that he does not prescribe many narcotics and when a patient gets to the point where they need something "stronger" he refers them to Pain Management. I explained that Butrans had been studied in patients who had never been on opioids but when I mentioned it was scheduled it seemed that he became hesitant.
PPLPMDL0020000001	Mayfield Heights	OH	44124	2/28/2011	Doc said she has been prescribing Butrans with mostly positive results. Patients have not complained. Some scripts have required a PA. She could not recall the plans. I explained that medicaid/medicare plans will require a PA and that commercial patients would be the best candidates for success. She asked about the use of supplemental analgesics. I confirmed that they could be used(per FPI). I reviewed the application and disposal process. She thinks there is a lot of potential for Butrans. Oxycontin reminder - patient indication and flexible dosing.
PPLPMDL0020000001	Cleveland	OH	44106	2/28/2011	i talked to dr about how many patients ask him daily for a medication change or complain that their pain isnt controlled? dr said there's a lot of people who are like that but doesnt know how many on a daily basis.i asked if dr could consider Butrans for a couple patients on tramadol,that are complaining of pain not being controlled? dr said he would and asked about medicaid coverage? we discussed all managed care coverage for Butrans. recommended Senokot-S
PPLPMDL0020000001	Akron	OH	44304	2/28/2011	Introduced Butrans and FPI. Doctor did not seem interested and said he rarely treats pain patients.
PPLPMDL0020000001	Cleveland	OH	44114	2/28/2011	dr said she started a few patients on Butrans,but 1 patient had some confusion at pharmacy and couldnt get Butrans so dr put patient on another medication. i asked dr why she chose Butrans and dr said patients were taking a couple tabs of Vicodin and she thought Butrans would be easier with once weekly dosing.i asked dr to continue talking to patients, about Butrans, when they are taking a couple tabs of Vicodin or Percocet and she feels are appropriate. dr said she would do that. we discussed workers comp coverage and commercial plan patients using Butrans patient savings cards. recommended Senokot-S
PPLPMDL0020000001	Fairlawn	OH	44333	2/28/2011	Introduced Butrans and FPI to pharm tech, Tanya and the pharmacist. They were rushed for time and there were patients waiting so I gave a brief overview of the indication and talked about the 7 day delivery system.
PPLPMDL0020000001	Cleveland	OH	44106	2/28/2011	i talked to dr about Butrans fpi,medication guide,patient information booklet,Butrans initiation guide and Butrans patient savings cards.i asked dr where he thinks Butrans plays a role in his practice? dr said he has a lot of patients on tramadol,as thats the only narcotic they will prescribe in the out-patient clinic and he has patients who complain of around the clock dosing and dont like taking pills,so a transdermal delivery and patch would be a good option for these patients.i showed dr Butrans initiation guide and asked him to consider a few of those patients taking tramadol that he feels are appropriate for Butrans and get some clinical experience with the medication dr agreed to do this and we discussed formulary coverage for Butrans. recommended Senokot-S
PPLPMDL0020000001	Akron	OH	44304	2/28/2011	Introduced Butrans and the FPI. Physician seemed hesitant about using Butrans because it was scheduled. She said that she would likely not use this product.
PPLPMDL0020000001	Cleveland	OH	44114	2/28/2011	i talked to John,PA,about patients he feels are appropriate for Butrans and John said either patients who are taking NSAIDs,he would recommend Butrans for them or if they are taking 1-3 tabs of short-acting opioids,he would start these patients on Butrans to John said he likes transdermal delivery and once weekly dosing of Butrans and he just needs to keep recommending to doctors that they start more patients on Butrans.John said he writes the scripts but doctors sign all of them. we discussed Managed care coverage for Butrans. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	2/28/2011	i talked to Erinne,Pharmacist,briefly to confirm stocking of Butrans and Erinne said she ordered Butrans,has it in stock but hasnt seen any scripts yet.i asked Erinne if she would recommend Butrans to doctors,when patients are complaining to her that their short-acting opioids arent working or they are requesting something different? Erinne agreed to do this and said she liked Butrans once every 7days dosing and 4 patches a month were a lot easier for some of her patients.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	2/28/2011	i asked dr who she felt was appropriate for Butrans.dr said she only writes tramadol for chronic pain so she would think of these patients to try Butrans.i showed dr Butrans initiation guide,opioid experienced section looking at tramadol dosing and asked dr to consider a few patients that were taking tramadol but the pain wasnt controlled,to consider Butrans in these few patients. dr said she would do that and asked about medicaid coverage so we discussed managed care coverage for Butrans.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	2/28/2011	worked internal medicine dept-lunch with residents and appointment with Dr.Armitage
PPLPMDL0020000001	Akron	OH	44304	2/28/2011	Introduced Butrans and the FPI. Doctor liked the concept and seemed interested. She stuck around to ask questions and seemed to really start thinking of patients when I mentioned that Butrans had been studied in patients who had never been on opioids.
PPLPMDL0020000001	Cleveland	OH	44104	2/28/2011	showed dr Butrans initiation/titration guide and asked if dr identified 1 patient to start on Butrans and dr said no not yet. i asked dr how Butrans fits into his practice? dr said he likes transdermal delivery and once weekly dosing but he thinks this is for a specific patient who will want to stop taking short-acting opioids and try this.i asked dr to consider patients taking 1-2 tabs of Vicodin or Percocet and instead of increasing short-acting dose,try Butrans there.dr said he will do that but it also comes down to insurance coverage and he has a lot of Medicaid,so we discussed Prior authorization process for Medicaid patients, workers comp coverage and commercially insured patients using Butrans patient savings cards.i told dr when patients are above 80mg oral morphine equivalent,he has option of OxyContin with 7 tablet strengths and OxyContin is available at lowest branded co-pay on Medicaid and commercial plans,recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	2/28/2011	i talked to dr about Butrans fpi,black box warning,5 core messages,medication guide,initiation/titration guide,patient information booklet,Butrans patient savings cards and asked if dr saw a place for Butrans in his practice? dr said all they prescribe in the out-patient clinic is tramadol and there are a lot of patients on tramadol that dont like taking pills around the clock and a lot of these patients arent getting adequate pain control.dr said he see's Butrans being a place for these patients.i showed dr Butrans initiation/titration guide,opioid experienced section noting tramadol dosing and asked dr if he would start a few patients currently taking tramadol and convert them to Butrans? dr said he will think about which patients would be interested in a patch and once weekly dosing and give it a try. we discussed managed care coverage for Butrans and i recommended Senokot-S

PPLPMDL0020000001	Cleveland	OH	44114	2/28/2011	i asked dr whats the difference between the hydrocodone patient and Butrans patient? dr said he starts all of his patients,with chronic pain,on short-acting opioids, giving 1-2 tabs a day and then if pain worsens goes to 3-4 tabs daily,dr said if patients still complain of pain,while taking 4 tabs a day, he will go to long-acting and that is where he will think of Butrans.dr said probably more moderate pain is the hydrocodone patient and severe pain Butrans,so i showed dr Butrans indication again and initiation/titration guide and asked if dr could think of 1 patient with moderate pain that met Butrans indication where he could try Butrans? dr said he'll consider that and we discussed workers comp coverage and commercially insured patients using Butrans patient savings cards.recommended Senokot-S
	Cleveland	OH	44102	2/28/2011	talked to dr about Butrans fpi,5 core messages,initiation/titration guide,Butrans patient savings cards and patient information booklet.dr said once weekly dosing and a patch are two benefits in her eyes,for her patients.i asked dr if she would start a patient on Butrans after an NSAID and dr said no,she would try short-acting opioids like tramadol first and if that doesnt work she'll go to Vicodin for some patients but only a few tablets a day.i asked dr if she had patients taking tramadol where their pain isnt controlled and Butrans could potentially be an option? dr said she has majority of her patients on tramadol and could think of a few that would like a patch instead of pills.dr asked if Medicaid covers Butrans? i explained to dr that Butrans is a Prior Authorization for Medicaid patients but her commercially insured patients can use Butrans patient savings cards,dr said majority of her practice is Medicaid so the Prior authorization could be tough.recommended Senokot-S
PPLPMDL0020000001	Akron	OH	44304	2/28/2011	Introduced Butrans and the FPI. Although the physician seemed interested in Butrans therapy it seemed as though she preferred not to treat chronic pain. She took a titration guide and left.
PPLPMDL0020000001	Cleveland	OH	44106	2/28/2011	i talked to dr about Butrans fpi,5 core messages,Butrans initiation/titration guide,Butrans patient information booklet and Butrans patient savings cards.i asked dr where he felt Butrans had a place in his practice? dr said this is his first year of residency so he hasnt prescribed a lot of narcotics but is seeing more chronic pain patients and they only prescribe tramadol in out-patient clinic.dr said once weekly dosing and a patch are two benefits he see's in Butrans for his patients.i asked dr to think of a patient taking tramadol who's complaining of pain not being controlled and as long as patient meets Butrans indication,consider initiating Butrans,dr agreed and asked about Medicaid coverage for Butrans,so we discussed Prior Authorization requirements and Butrans patient savings cards for commercially insured patients. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44101	2/28/2011	i talked to dr about Butrans fpi,patient information booklet,initiation/titration guide and Butrans patient savings cards.dr said he doesnt prescribe a lot of narcotics but if he does he will only prescribe tramadol.dr said Butrans is interesting as its dosed every 7days and is a patch.dr said these are two benefits in his eyes,for his patients.i showed dr Butrans initiation guide,opioid experienced section looking at tramadol dosing and asked if dr could think of a few patients to try Butrans in that he felt were appropriate and get some clinical experience with the medication? dr agreed saying he will keep it in mind. we discussed managed care coverage for Butrans too. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	2/28/2011	i asked dr how many patients he see's daily,that ask for a medication change or request something different as their pain isnt controlled? dr said a lot of patients, maybe 10-15 daily,complain of current medication.i showed dr Butrans initiation/titration guide and asked if he would consider a few patients taking 1-3 tabs of short-acting opioids,where the pain wasnt being controlled,and try Butrans in them? dr agreed and asked about insurance coverage,so we discussed managed care coverage for Butrans. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44102	2/28/2011	i talked to dr about Butrans fpi,5 core messages,initiation/titration guide,Butrans patient savings cards for commercial plan patients,medicaid coverage requiring a prior authorization for Butrans and Butrans patient information booklet.dr said she has so many patients on Vicodin and Percocet where she is just refilling every month because its easier to do than deal with some of her pain patients.dr said she is very frustrated with treating her pain patients.dr said she likes Butrans once every 7days dosing schedule and likes that Butrans has transdermal delivery.dr said a lot of her patients complain of their short-acting medications not working so she'll think of a few of these patients and give Butrans a try.dr asked about medicaid coverage for Butrans as its almost 50% of her patient population,so i explained prior authorization requirements for Butrans and Medicaid and we talked about commercial plans.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	2/28/2011	i talked to dr about Butrans fpi,black box warning,5 core messages,initiation/titration guide,medication guide,Butrans patient savings cards.dr said he liked once weekly dosing as thats a lot easier for some of his patients that he knows dont like taking pills around the clock,so this could be an option for them.i asked if dr would start a patient on Butrans, right after a NSAID? dr said probably not as he doesnt have any clinical experience with Butrans,so we talked about dr considering patients taking 1-3 tabs daily of short-acting opioids,to consider Butrans.dr said he would do that and asked if Medicaid covered Butrans? i explained Prior Authorization required for Medicaid patients and told dr his commercial plan patients could use Butrans patient savings cards,so dr said to leave some and he would try Butrans in some patients and let me know. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	2/28/2011	i talked to dr about Butrans fpi,5 core messages,medication guide,patient information booklet,patient savings cards and initiation/titration guide.dr said there are some patients on tramadol that dont like taking the medication around the clock to control their pain so Butrans could be an option for them.i asked dr what benefits he saw in Butrans? dr said once every 7days dosing and transdermal delivery are two significant benefits to patients.i showed dr Butrans initiation/titration guide,opioid experienced section looking at tramadol dosing and asked dr to think of a few patients that dr feels are appropriate to start on Butrans.dr said he will think of some patients and let me know what happens we discussed Butrans formulary coverage. recommended Senokot-S
PPLPMDL0020000001	Akron	OH	44304	2/28/2011	Introduced Butrans and the FPI. When i asked how often she was prescribing hydrocodone she said not often but did take a titration guide and said she think of initiating therapy for a small number of patients.
PPLPMDL0020000001	CLEVELAND	OH	44109	2/28/2011	i talked to Eric,Pharmacist,about Butrans fpi,medication guide,5 core messages,initiation/titration guide,patient information booklet and Butrans patient savings cards. Eric said they wont order Butrans until they see a script come in,so i explained to Eric the importance of having Butrans in stock so that patients can get medication filled and not be turned away and told to return in 24hrs.Eric said he understood my position but he wasnt going to order until he saw at least 1 script come in for Butrans. i told Eric i would follow-up in a few weeks to see if any Butrans scripts have come through pharmacy. recommended Senokot-S
PPLPMDL0020000001	Akron	OH	44304	2/28/2011	Introduced Butrans and FPI. Physician gave me little time as she was late for a meeting and took a titration guide after i discussed the indication.
PPLPMDL0020000001	Akron	OH	44333	2/28/2011	Reintroduced Butrans and asked if he had initiated therapy. He had not started anyone at this point but mentioned he had patients coming in and was highly considering Butrans therapy. He wanted to know if he need a special license to prescribe and i told him he did not.
PPLPMDL0020000001	Akron	OH	44304	2/28/2011	Introduced Butrans and FPI. Doctor said that he and the rest of the group write few opioid and once a patient fails on NSAID's that will almost always refer them to Pain Management.
PPLPMDL0020000001	Akron	OH	44304	2/28/2011	Introduced Butrans and the FPI. Physician mentioned she would prefer not to treat pain patients and usually refers them out. i asked what she meant by pain patients and she said that once a patient is failing on a non opioid she refers them out.
PPLPMDL0020000001	Akron	OH	44304	2/28/2011	Introduced Butrans and the FPI. This entire staff seems to be worried about prescribing opioid and Dr. Lee was no different. She listened to what i had to say, thought it was a good concept but seemed like this would not change how she is currently treating pain patients.
PPLPMDL0020000001	Brooklyn	OH	44144	2/28/2011	Quick call with Michelle- She said they have not yet dispensed any Butrans but do have it stocked. Reviewed indication & patient type with her. Also gave her OxyContin savings cards & discussed how they are to be used (commercial insurance or cash-pay only- not for government insurance including Medicare & Medicaid).
PPLPMDL0020000001	Mayfield Heights	OH	44124	2/28/2011	Discussed the Butrans positioning and the 5 selling messages. i reviewed the initiation dosing. He asked about formulary coverage and what is required for those with requiring a PA. Discussed the commercial coverage as the ideal patient and that medicaid will likely require long acting morphine taken for 2 days prior to Butrans approval. Discussed the oxycontin indication and the recent reformulation as he was not aware.
PPLPMDL0020000001	Bedford	OH	44146	3/2/2011	Dr Haddad said that he has written 2 Butrans prescriptions but that neither patient's insurance would cover it-I asked what plans & he said Medicare D & Medicaid. Reviewed coverage & emphasized importance of prescribing for appropriate patients with commercial insurance or BWC. Also reviewed savings cards for commercial insurance patients to bring them down to a \$15 co-pay which he agreed was very reasonable. Dr Haddad said he has a patient on BWC who is on 200mg tramadol per day who he will prescribe Butrans 5mcg/hr for. i told him this sounded like a great place to start. Dr Haddad said he sees a place for Butrans & he intends to keep prescribing it. i also suggested that he remember OxyContin for appropriate patients who were beyond Butrans. He agreed OxyContin is a good option for some patients. Dr Haddad said he had just read a newspaper article about "a few" 18-19 year olds who overdosed on OxyContin & died as a result. Discussed importance of appropriate patient selection.
PPLPMDL0020000001	Bedford	OH	44146	3/2/2011	Only a quick call with Dr Moufawad in the hallway. He said that although he has not started a patient this week on Butrans, he does plan to. i asked him what type of patient & he only said that he would find someone. Spoke with Amber & reminded her of managed care coverage & savings cards.
PPLPMDL0020000001	Cleveland	OH	44111	3/2/2011	Met with Barbara while talking to Dr Daoud, we reviewed the appropriate patient type for Butrans. We discussed the application sites and proper application per the medication guide. We discussed appropriate managed care for Butrans and Ryzolt and also reviewed the savings programs for OxyContin, Butrans and Ryzolt.
PPLPMDL0020000001	Cleveland	OH	44114	3/2/2011	i asked John who was an appropriate patient to start on Butrans and why? John said their patients who are taking short-acting opioids around the clock and still coming to them complaining of pain not being controlled,thats where he would consider Butrans. i asked if John would feel comfortable starting a patient who's taking 1-2 tabs short-acting hydrocodone or oxycodone,complaining of pain not being controlled,and start patient on Butrans 5mcg/hr? John said yes he might do that,but he's thinking more about patients taking 3-4 tabs daily of short-acting opioids to start on Butrans 10mcg/hr.i told John that was a great place to start and get some clinical experience,we discussed workers comp and medicaid coverage for Butrans.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44114	3/2/2011	i asked dr how Butrans benefitted his patients? dr said he is concerned with Butrans falling off because so many patches fall off patients and this is a new medication to him and it takes him awhile to feel comfortable prescribing a newer medication.i asked dr how long is a fair timeframe,to wait,before he prescribes Butrans? dr said i dont know.i asked again how Butrans benefitted his patients? dr said if he has a patient on a couple tabs of vicodin or percocet and they are pushing him for more pills,he might consider Butrans for these patients.i showed dr Butrans initiation guide,we discussed appropriate patients for Butrans,and asked if dr has patients complaining daily of their short-acting opioid not controlling their pain? dr said yes every day.i told dr that is where he can start a patient on Butrans,instead of re-filling patients short-acting opioids.dr asked about side effects and was there itching with Butrans.i showed dr Butrans fpi,section 6.1,and discussed this information
PPLPMDL0020000001	Cleveland	OH	44195	3/2/2011	i asked dr if he started any patients on Butrans? dr said not yet,hasnt remembered Butrans,and asked again about appropriate patients.i showed dr Butrans initiation/titration guide and asked if dr had patients currently taking opioids that complained about their pain not being controlled and request something else? dr said yes all the time. i told dr thats the Butrans patient,looking at initiation guide could he think of someone taking 1-3 hydrocodone a day that he could start on Butrans? dr said yes he would try it in a few patients and let me know what he hears from patients.dr asked about managed care coverage so we discussed commercial insurance and medicaid as these are 2 biggest plans for him.recommended Senokot-S
PPLPMDL0020000001	Maple Heights	OH	44137	3/2/2011	Spoke with Karen (MA) who said Dr Balkovec was too busy with patients to speak with me. Attempted to schedule a lunch or appointment but Karen said that because so many reps have canceled on them recently, they have closed their lunch books temporarily & she said i would need to check back next week to see if they have changed their policy. Discussed Butrans indication & positioning & asked her thoughts. She said both Drs Balkovec see plenty of patients who fit the Butrans indication & she thinks it would be something they may be interested in. Also gave her a managed care overview & discussed savings cards for appropriate patients.
PPLPMDL0020000001	Garfield Heights	OH	44125	3/2/2011	Spoke with Dan who said they had just seen their first Butrans prescription. i asked who wrote the prescription & he said it was Dr Dew. Discussed appropriate patient type/positioning, managed care & dosing. Gave him 3 patient information guides & discussed application. Also reviewed OxyContin savings cards, which Dan said they were out of & would be able to use. Reviewed with him that they can only be used for commercially insured or cash-pay patients & could not be used for any type of government insurance, including Medicare & Medicaid.
PPLPMDL0020000001	Akron	OH	44304	3/2/2011	Introduced Butrans and FPI to Dr. Smucker. See individual call notes.
PPLPMDL0020000001	Akron	OH	44320	3/2/2011	Reintroduced Butrans and focused specifically on patient type. Managed care continues to be an issue. i asked if he would focus on patients with commercial insurance and he agreed he would.
PPLPMDL0020000001	Cleveland	OH	44106	3/2/2011	i talked to Steve,Pharmacy Manager,about Butrans stocking and Steve said he did order Butrans and had it in stock.i told Steve that physicians were starting to prescribe Butrans so it was critical that Butrans was in stock so patients could get medication and not have to wait 24hrs. Steve agreed saying he understood my position and will let me know when he see's a script come through pharmacy. i told Steve i would follow-up next week to see if anyone prescribed Butrans yet?

	Cleveland	OH	44195	3/2/2011	i talked to Curt, Pharmacy Manager, about Butrans stocking and he said that they did order all 3 dosage strengths of Butrans as he was going to use the rebate offer. I told Curt it was important to stock Butrans as doctors are prescribing and I don't want patients being turned away and told to return in 24hrs when they are in pain. Curt said he understood and would confirm that the order was placed. I told Curt I would follow up Friday to be sure they have it in stock as he didn't have time to look and show me the cartons today.
PPLPMDL0020000001	Cleveland	OH	44113	3/2/2011	worked pain management and physical medicine & rehab dept-see notes on dr shen and dale novak, pa
PPLPMDL0020000001	Cleveland	OH	44195	3/2/2011	worked pain management dept-see call notes, worked rheumatology dept-spoke with each secretary for Dr. Calabrese, Dr. Long and Dr. Chatterjee and was told to leave Butrans fpi, initiation guide and my business card with medical secretaries and THEY will give to doctors and IF doctors want to see me, the secretaries will call back and set me up for appointments. worked cleveland clinic pharmacies too-all 3 have Butrans stocked, just waiting for scripts to come through
PPLPMDL0020000001	Cleveland	OH	44111	3/2/2011	Spoke with John, we reviewed the Butrans FPI, and medication guide. We discussed how to instruct patients on proper application of Butrans per the medication guide. They did not have it in stock but said they would once they see scripts. Reminder about Ryzolt and asked to recommend Senokot-S with opioids.
PPLPMDL0020000001	Cleveland	OH	44103	3/2/2011	i asked dr if he started any patients on Butrans? dr said not yet, but he has some patients in mind who are taking a couple Vicodin and tramadol around the clock and knows their pain isn't controlled and he would like to try Butrans in them dr said in a week or two he should have some feedback for me about starting some patients on Butrans. I told dr since he is the Pain Director at St. Vincent's Charity, his colleagues, residents, pharmacy-all look to him, to start patients on Butrans and get some clinical experience with the medication. dr said he knows that physicians will follow his lead if he starts prescribing so he'll keep me posted. recommended Senokot-S
PPLPMDL0020000001	Akron	OH	44312	3/2/2011	Dr. Fouad committed to writing Butrans for a commercially insured patient before next Thursday.
PPLPMDL0020000001	Cleveland	OH	44111	3/2/2011	Spoke with Jim, floater, we reviewed Butrans FPI and medication guide. He saw Butrans information at another store and has read about it. He was not familiar with the Drs in the area, but thought it would be a good option for patients instead of vicodin around the clock. We reviewed how to instruct patients on proper use of Butrans.
PPLPMDL0020000001	Cleveland	OH	44113	3/2/2011	i talked to Aaron, Pharmacy Manager, for a few minutes, after my lunch with Dr. Shen as I told Aaron that Dr. Shen DID prescribe Butrans last week and started 3 patients, so it was critical he had Butrans in stock so that patients could get medication. Aaron said he thought they ordered it but didn't have time today to look and confirm. I asked if I could stop back end of week and follow-up, Aaron said to stop back next week and he will look for me.
PPLPMDL0020000001	Cleveland	OH	44135	3/2/2011	I reviewed the key messages for Butrans, he said he did see the Butrans info, but has not had a chance to read it over. He agreed to take a look at the FPI and that I can come back on Friday to get his thoughts.
PPLPMDL0020000001	Cleveland	OH	44135	3/2/2011	Quick intro, I reviewed the key messages for Butrans. He will take a look at the info and is interested in talking further at an appointment.
PPLPMDL0020000001	Cleveland	OH	44113	3/2/2011	dr said she started 3 patients on Butrans, 1 patient was on 3 tabs of 5mg Percocet and complaining of pain not being controlled and another patient was on 200mg tramadol and pain not controlled so she started patient on Butrans. I asked dr how Butrans benefits her patients? dr said Butrans being a CIII and its the only long-acting opioid in the CIII market are 2 benefits. Dale Novak, PA, said he likes that its a patch and only once a week for patients. Dr said transdermal is better for her gastric bypass surgery patients who can't swallow pills and request patches for pain, so she thinks Butrans is great option for them. dr said her max is 3 tabs a day of Vicodin or Percocet and 60 monthly, if patients need more than 3 tabs a day, she will go to a long-acting opioid. dr asked about Medicaid and workers comp coverage for Butrans so we discussed both. I asked dr when she considers OxyContin as an option, dr said if patients tried short-acting, after 3 tabs, but now she will go to Butrans and then OxyContin
PPLPMDL0020000001	Macedonia	OH	44056	3/2/2011	Quick call with Dr. Shenigo- got in a Butrans positioning reminder & she said that she had not yet seen any patients on Butrans. Indication reminder & recommended Senokot-S for opioid-induced constipation. She said she will keep Butrans in mind for when she does see her next pain patient if they are appropriate.
PPLPMDL0020000001	Akron	OH	44304	3/2/2011	Introduced Butrans and the FPI. Although Dr. Smucker does not see many I asked if he would be opposed to his residents prescribing Butrans. He said that while he doesn't typically write a new product for at least 2 years he would not have an issue if his residents wanted to prescribe it. At the end of the call he admitted that there was a place for Butrans.
PPLPMDL0020000001	Hudson	OH	44236	3/2/2011	Spoke with Angie (MA) who said that no Butrans prescriptions have been written in the office. Reviewed indication with her as well as positioning. She said she would remind the physicians. Also discussed Senokot-S & Colace & gave samples of each. Worked with Angie to schedule breakfasts & lunches in effort to see the physicians more regularly.
PPLPMDL0020000001	Westlake	OH	44145	3/2/2011	Followed up to see if he got his answer from medical services regarding site reactions, he did not think so. I reviewed our last conversation about who he might prescribe Butrans for asked if he had any appropriate older patients who have commercial insurance who he would convert to Butrans. He said he would think about it. I asked him to remember OxyContin as an option when Butrans may not provide adequate analgesia. <font color=
PPLPMDL0020000001	Cleveland	OH	44113	3/2/2011	>blue><b>CHUDAKOB's query on 03/10/2011</b></font>He is clearly hesitant. Why?<font color=green><b>HOLUBA's response on 03/14/2011</b></font>Great question. I am going to ask him this. He told me he thought this would be good for "little old lady with compression fracture or back pain" I'm not sure why he is just niching it in this place. <font color=blue><b>CHUDAKOB added notes on 03/15/2011</b></font><font>Challenge his
PPLPMDL0020000001	Cleveland	OH	44113	3/2/2011	<font>I talked to Jen, NP with Dr. Nickels/Cleveland Back&Pain Management, about Butrans fpi, 5 core messages, initiation/titration guide, patient information booklet and Butrans patient savings cards. Jen said majority of their patients are taking opioids and a lot of them are taking short-acting opioids around the clock. Jen said once weekly dosing and transdermal application of Butrans are both benefits to patients and the fact that Butrans is a CIII so she can prescribe the medication. Jen said she is newer to the practice so will have to talk to Dr. Nickels more and get his thoughts about Butrans and who he thinks are the right patients for Butrans. I told Jen I had a breakfast tomorrow with Dr. Nickels so we can all discuss how Butrans is a benefit to patients in their practice, she said that was fine. recommended Senokot-S
PPLPMDL0020000001	Akron	OH	44320	3/2/2011	Introduced Butrans and FPI. Was able to spend an ample amount of time reviewing the initiation and titration guide so the physician had a clear understanding how to start therapy. When asked about a specific patient she was very broad.
PPLPMDL0020000001	Cleveland	OH	44195	3/2/2011	i asked dr if he started any patients yet on Butrans? dr said he hasn't talked to a patient that's willing to take a patch and stop pills. I told dr he can still administer Butrans and give short-acting opioids and referred him to the Butrans fpi, initiation of therapy and maintenance of therapy sections. dr said okay, he forgot about that, and since this is a new product to him, I need to remind him that information every time. I asked if dr could think of 2 patients with commercial insurance, taking 1-3 tabs short-acting opioids daily, that are complaining of current medication not working and give Butrans a try in these patients? dr said he will consider this when seeing patients. recommended Senokot-S
PPLPMDL0020000001	Garfield Hts	OH	44125	3/2/2011	Spoke with Allene (pharmacist) who said that they do not yet have Butrans on their shelf. I asked her if she knew why & she said that the pharmacy manager has to order it. She said that she left him the information that I had given to her before & recommended that they order, but that he had not done so. Reviewed patient type/positioning. She said she would remind the pharmacy manager to place the order & I asked when he would be in so that I could follow up. She said his hours vary and I would just have to try another day & time. Reviewed OxyContin savings cards with her & she said they had been hoping for more. Reminded her that they are for commercially insured & cash-pay patients, not for those with government insurances.
PPLPMDL0020000001	Cleveland	OH	44111	3/2/2011	Dr said he did try to convert a patient who said his pain was not well controlled on vicodin, but once he suggested a medication change, the patient changed his mind and said he will stay on the dose of vicodin he has. He said that he thinks that Butrans would be a good option for a patient who is taking 4-5 vicodin per day who are not well controlled. I asked what dose of vicodin he writes and he said 5mg and 7.5mg. I reminded him that patient who are taking more than 30mg of oral morphine equivalent may not get adequate analgesia with Butrans and may be better suited for OxyContin as a long acting option. He said he may still use Butrans as an option if the patient needed a different opioid because he does do opioid rotation. Dr asked about adhesion of the patch and we reviewed proper application to skin and what to do with adherence issues per the medication guide. He took a close look at the demo patch. We reviewed the savings program for OxyContin, Butrans and Ryzolt. Spoke w Pam<font color=blue><b>CHUDAKOB's query on 03/10/2011</b></font>Andrea, re-read your call note. You wrote "I reminded him that a patient taking more than 30mg morphine equivalents may not get adequate analgesia with Butrans..." Is this what you meant?<font color=green><b>HOLUBA's response on 03/14/2011</b></font>Thank you for catching this type, I meant that Butrans 20mcg/hour may not provide adequate analgesia for patients requiring greater than 80mg/ day of oral morphine equivalents per the initiation guide. <font color=blue><b>CHUDAKOB added notes on 03/15/2011</b></font>Thanks for the clarification. Please re-read your call notes before submitting them.
PPLPMDL0020000001	Cleveland	OH	44113	3/2/2011	i asked dr if he started any patient on Butrans? dr said no, he hasn't thought about Butrans. I asked how does Butrans benefit his patients? dr said he likes that Butrans is a CIII and he can call in re-fills and the once weekly dosing is more convenient for some of his patients. I asked dr when he starts patients on short-acting opioids, at what point will he consider a long-acting opioid? dr said if patients are taking 4-5 tabs of short-acting opioids but complaining of pain worsening, then he will consider a long-acting opioid. I showed dr Butrans initiation guide and said that for those patients he's talking about, 4-5 tabs of short-acting opioids, that's the Butrans patient so we discussed proper tapering of short-acting opioids and initiation of Butrans. I asked if dr could think of 1 patient, like we discussed, to try Butrans in and get some clinical experience? dr said he would consider that. i
PPLPMDL0020000001	Cleveland	OH	44114	3/2/2011	i asked dr about the patients she started on Butrans, per my conversation with her PA, John, last week and dr said she started 1 patient on Butrans, patient was taking Lortab and pain wasn't being controlled so instead of increasing the short-acting opioid, she started patient on Butrans 10mcg/hour after proper tapering of Lortab and patient got script filled at Walgreens. dr said that was all she had time for today, as we have lunch next week and can talk more then. I thanked dr and asked her to continue thinking of those patients like the 1 she saw who was complaining that the pain wasn't controlled and consider Butrans. dr agreed to do that. recommended
PPLPMDL0020000001	Cleveland	OH	44195	3/2/2011	i asked dr if he has started anyone on Butrans? dr said no and that he usually waits 6 months or so before prescribing a product that's new to him as its not been on the market long. I told dr I appreciated his honesty but asked if he ever has patients complain of short-acting opioids not working or that their pain isn't controlled? dr said yes patients ask him for something different every day. I asked dr to think of 1 patient, like this, who has commercial insurance, and try Butrans and give Butrans patient savings card to patient. dr said he'll consider. recommended Senokot-S<font color=blue><b>CHUDAKOB's query on 03/10/2011</b></font>You might tell him that buprenorphine has been on the market a very long time. This is just a different delivery system for the product than has been currently available. <font color=green><b>BROOKAM's response on 03/13/2011</b></font><b>good idea, I did talk to Kathy Kraus, PA, for his patients and she "warned" me [jokingly though] that he "takes a LONG time to adopt "new" medications, even if buprenorphine has been on market for a long time" but I will say that to him and see what he says. thanks for your thoughts!<font color=blue><b>CHUDAKOB added notes on 03/15/2011</b></font>Let me know what he says. It seems unusual for someone of his stature to wait this long to try something new. After all... he is a thought leader.
PPLPMDL0020000001	Uniontown	OH	44685	3/2/2011	Reintroduced Butrans and asked if he had initiated therapy. He said that he would NOT write this product without listening to someone speak.
PPLPMDL0020000001	Cleveland	OH	44113	3/2/2011	i talked to Dale, PA, for Dr. Shen and Dr. Daoud, who said Dr. Shen started 3 patients last week on Butrans. I asked why? and what were the patients taking? Dale said dr shen likes that Butrans is a CIII, long-acting opioid as there's no other option in CIII market, as a long-acting opioid. Dale said these 3 patients were complaining of their pain worsening and not controlled by short-acting opioids on tramadol, percocet and vicodin. I asked Dale, How does Butrans benefit your patients? Dale said he likes that Butrans is a patch and dosed once a week. Dale said he's concerned with patients taking their short-acting opioids as needed because dr shen writes 1-2 tabs q4 or q6h and if they take too many pills 1 day and nothing the next he thinks they should be on a long-acting opioid like Butrans. I showed Dale Butrans initiation guide, discussing patients either starting on Butrans 5mcg/hr or 10mcg/hr, Dale said he had a patient coming today that he thinks is perfect to start on Butrans. I told Dale that
PPLPMDL0020000001	Cleveland	OH	44104	3/2/2011	i asked dr if he started 1 patient on Butrans? dr said no, he keeps forgetting about Butrans. I asked dr if he has re-filled any patients Vicodin this week? dr said yes, a lot of patients. I showed dr Butrans initiation guide and said if you have patients taking 2-3 tabs of Vicodin, complaining that pain isn't controlled and asking you for a change in their medication, would you consider initiating Butrans instead of re-filling their Vicodin? he said yes, that makes sense. I asked dr to stop and think of Butrans for this type of patient he sees Friday or next week, and try it in a workers comp patient or commercially insured patient. recommended Senokot-S
PPLPMDL0020000001	Fairlawn	OH	44333	3/2/2011	Spoke to Dr. Parisi briefly through the window. I asked him if he had prescribed Butrans and he replied he hadn't. I told him to focus on patients who were either failing on NSAID's or on low dose hydrocodone and he walked away.
PPLPMDL0020000001	Maple Heights	OH	44137	3/2/2011	Spoke with Linda (MA) who said that Dr Yager was done for the day & could not see me. Reminded her of my recent Butrans lunch & asked if she knows if Dr Yager has gotten any experience with it yet. She said she was not sure & suggested I schedule another lunch to speak with him. I did this & discussed positioning for Butrans with her as well as managed care & savings. Left initiation guide for Dr Yager as a reminder for Butrans.
PPLPMDL0020000001	Beachwood	OH	44122	3/2/2011	Spoke with Vickie (nurse) who said that Dr Yokiel prescribed Butrans for a patient last week. She said they have had no feedback so far. Discussed managed care coverage & savings cards for commercial insurance or cash-pay patients. Vickie said she believes Dr Yokiel will prescribe Butrans for many patients.

PPLPMDL0020000001	Cleveland	OH	44130	3/3/2011	Spoke with Shelly (MA & Office Manager) to follow up on Butrans. She said Dr Sawhny had not prescribed it yet. I reviewed indication, dosing, appropriate patients/positioning with her & she asked for my card & any literature I had about Butrans so that she could give it to Dr Sawhny as a reminder. Reminded her of savings cards & reviewed managed care.
	Solon	OH	44139	3/3/2011	Dr Zaidi said he has still not prescribed Butrans as he has not found the right patient for it. I told him that I was anxious to get his feedback as he is a thought leader in the area. He said he was surprised to hear that. I told him that with the number of patients he sees, certainly he must see many for whom Butrans may be appropriate & that this would allow him to gain clinical experience with Butrans. He agreed. He asked about managed care & cost. I went over commercial insurance & BWC & also reviewed savings cards with him & reminded him they are commercially insured or cash-pay patients only & could not be used for any government plans like Medicaid or Medicare. He asked if he could have another initiation guide for dosing instructions & flipped through it. I reminded him of dosing & titration ability after 3 days. He asked me about local pharmacy stocking so I reviewed several stocked locations with him. Also reviewed OxyContin savings cards which he said he needed.
PPLPMDL0020000001	Cleveland	OH	44130	3/3/2011	Quick call--Told Dr Diab that I had only one reasonable request from him: to think of Butrans for the next appropriate patient that he is going to start on Vicoden. He said he would do this. Spoke with Barb & Karen & reminded them of savings cards.
	Cleveland	OH	44106	3/3/2011	I talked to dr about Butrans initiation guide,discussed appropriate patients and asked dr how Butrans benefits his patients? dr said he likes that Butrans is transdermal and once weekly dosing is easier for some patients than dosing short-acting opioids around the clock.dr said they only prescribe tramadol in out-patient clinic and rarely will prescribe hydrocodone combo's for patients as they weren't trained that way. dr said if pain management,dr hayek(the chief) supports Butrans and Butrans gets on formulary in hospital,it will be a lot easier for him to prescribe and then he will have more support from the rest of the residents (he is 1 of 5 Chief Internal Medicine Residents).I told dr Butrans is being reviewed for formulary approval and we'll have an answer next Wednesday,after medication management reviews Butrans,told dr I would follow-up next week
PPLPMDL0020000001	Cleveland	OH	44130	3/3/2011	Introduced Butrans to Dr Lash. He said he had read something about it but has not yet prescribed it. I delivered 5 core messages & alerted him to box warning. I asked his thoughts & he said he felt there was a place for it. I asked him where he was thinking of using Butrans. He said older patients tend to like transdermal systems & that some end up on fentanyl simply because it is transdermal, not because they need "that much" pain control. He said he sees Butrans as being a good option for those patients so that they don't have to be on an opioid that is "so strong" like fentanyl. He said many of the younger chronic pain patients he sees are already on short-acting medications & that it is difficult to change those patients' mindsets once they have taken short-acting pain medications. Discussed dosing & appropriate patients/positioning for the more "moderate" pain side. Reviewed managed care coverage & savings cards with him. Also OxyContin reminder for patients beyond Butrans.
	Cleveland	OH	44102	3/3/2011	I asked dr if she has started any patients on Butrans? dr said no,she hasn't thought about Butrans,so I showed her Butrans initiation guide and we discussed appropriate patients.I asked dr to consider Butrans as an option for her patients taking short-acting oxycodone that are complaining of pain worsening and instead of increasing Percocet dose,dr said she would consider but she has mostly Medicaid.I told dr Butrans is available through a prior authorization and we discussed commercial plan patients too. recommended Senokot-S
PPLPMDL0020000001	Garfield Heights	OH	44125	3/3/2011	Dr Samuel said that the one patient he has prescribed Butrans for had to discontinue treatment due to itching. I asked him to clarify- he said it was not application site itching, but overall body itching. He said this would not detour him from prescribing Butrans for more patients. I asked him what type of patients he is looking for & he said it is difficult to switch patients from a short-acting to a long-acting medication because once patients get used to taking pills around-the-clock, they feel they need that to feel pain relief. He said he wished primary care physicians would think of Butrans before putting patients on Vicoden or Percocet. I asked him if he ever gets patients who aren't already on a short-acting & he said sometimes, but rarely. Asked him to think of Butrans with those patients & he agreed. He said he is still excited about it. Asked him to think of OxyContin for appropriate patients beyond Butrans 20mg/hr & discussed savings cards for Butrans & OxyContin.
PPLPMDL0020000001	Cleveland	OH	44106	3/3/2011	I asked dr if she started any patients on Butrans? dr said not yet because she has so many Medicaid patients and doing a prior authorization for Butrans is not realistic for her at this time. I asked dr if she has any commercially insured patients that could try Butrans using Butrans patient savings card? dr said a small percentage but she has a few patients like that.I showed Butrans initiation guide,we discussed appropriate patients and dr said she'll keep Butrans in mind as an option for some of her patients taking ultram who aren't controlled.
PPLPMDL0020000001	Shaker Heights	OH	44122	3/3/2011	Caught Dr Agrawal for a Butrans introduction. Delivered 5 core messages. He said he has read about it but has not prescribed it. He said that he liked that it is once-a-week & that it is a CII so that he can call in refills. He asked how Butrans compares in efficacy to fentanyl & Duragesic. I told him that we have no comparative data & showed initiation guide pg 6, pointing out that patients on fentanyl were excluded from the study & I asked Dr Agrawal to think of Butrans for the more "moderate" side. He asked how to write the prescription & I showed him the back of the initiation guide. He said he was excited to have something "new" as an option. Discussed savings cards with Michelle (MA).
PPLPMDL0020000001	Cleveland	OH	44106	3/3/2011	I asked dr if he started any patients on Butrans? dr said not yet as he hasn't been in clinic that much but teaching the residents dr said he thinks Butrans is a great option,as its transdermal and once a week dosing.I asked dr how Butrans benefits his patients? dr said Butrans being a CII is much easier for him and the residents as they can call in re-fills for CII's and its the only long-acting opioid in the CII market.I asked dr to think of patients that could be appropriate for Butrans,showing Butrans initiation guide,and thinking of commercial plan patients who can use Butrans savings card or Medicaid patients if he's willing to process Prior Authorization for Butrans.dr said if Butrans gets on formulary at the hospital,it'll be much easier to prescribe.
PPLPMDL0020000001	University Hts	OH	44118	3/3/2011	Quick call.....I discussed the Butrans indication and the first long acting CIII. Asked if he sees a place for Butrans for his patients. He asked again if covered on BWC. I confirmed that its being covered. Asked him to try for one BWC patient.
PPLPMDL0020000001	Westlake	OH	44145	3/3/2011	Dr said he is still waiting to see the right Butrans patient and he hasn't seen any new chronic pain patients recently. He does have a patient who does construction who is on vicodin who he thinks would be appropriate for Butrans but he does not know when he is supposed to see him. He said he will try that patient when he sees him. He said that many of his patients are on OxyContin and are already past the point of Butrans based on their daily opioid dose. Spoke with Joanne, reminder to recommend Senokot S.
PPLPMDL0020000001	Cleveland Heights	OH	44118	3/3/2011	Quick call...Reviewed the Butrans indication, 7 day application, and the positioning. He said he has not used it yet. I asked that he try for a patient taking low dose vicodin. No commitment. Oxycontin reminder.
PPLPMDL0020000001	Cleveland	OH	44104	3/3/2011	I talked to dr about Butrans being an option for his patients taking short-acting oxycodone that come to him complaining of pain worsening or wanting something different,trying Butrans there instead of increasing the tabs of short-acting oxycodone.dr said he'll keep it in mind but comes down to insurance and he has majority of medicaid and he's not willing to do Prior Authorizations for Butrans.I told dr he does have option of OxyContin,with preferred coverage on Medicaid,when he does convert patients to long-acting opioids,dr said he knew that and will continue to start patients on OxyContin and to let him know if Medicaid coverage changes.recommended
PPLPMDL0020000001	Cleveland Hts	OH	44118	3/3/2011	Quick call.....Reminded doc about his previous interest in Butrans. Asked if he has prescribed yet. He said not yet. Reminded him of the opioid naive patient or those on low dose of vicodin.
PPLPMDL0020000001	Cleveland	OH	44113	3/3/2011	I asked Jen if she saw any patients yesterday where she felt Butrans would be an appropriate option? Jen said no and wanted to talk to Dr Nickels,director of this office,about Butrans and got his thoughts.Jen said Butrans's dosing of once every 7 days and transdermal are 2 benefits she see's so she'll talk to Dr Nickels.I showed Jen Butrans initiation guide and asked if she could consider 1 patient,before I see her next week,thats on a couple tabs of short-acting opioid and complaining of pain worsening,to start on Butrans? Jen said that was fair and would keep Butrans in mind.
PPLPMDL0020000001	Cleveland	OH	44130	3/3/2011	Quick call with Barb to follow up on Butrans stocking. She said they still have not ordered any in & have not seen any prescriptions for it. Discussed where Butrans is being positioned as well as dosing strengths. Also discussed savings opportunities for patients & Butrans.com.
PPLPMDL0020000001	Solon	OH	44139	3/3/2011	Spoke with Lydia who said she's not going to AMCP. She said Dan B., Mike S., Lora Wilson, Mike Bukash & Tom Burris are all going Tues night. Deb is the person responsibly for scheduling the meetings and said she has available Wed for lunch, Wed before dinner and Thurs for Breakfast. All the dinner appointments are taken as well as lunch for Thurs. She said to pick a time and she'll book it for me.
PPLPMDL0020000001	Euclid	OH	44117	3/3/2011	Discussed the Butrans indication, CIII, 7 day application. Asked him to give it a try for his BWC patients. He said he would have to hear more and he does not have time right. He asked how much it cost. Told him that it varies from pharmacy to pharmacy.
	Cleveland	OH	44113	3/3/2011	I asked dr how Butrans benefits his patients? dr said its a good baseline for his chronic pain patients.I asked dr if that's the case,who are the patients he thinks could benefit from Butrans? dr said his patients taking 4 tabs of hydrocodone a day,instead of him pushing the dose and adding Ultram ER,he thinks Butrans could be an option right there.dr said he'll get there and will start patients on Butrans,its just taking him some time to start.I asked dr if he could think of just 1 patient,workers comp,medicaid or commercial as he has all 3 plans,just to get some clinical experience with Butrans? dr said yes,he will start some patients and they'll get there.
PPLPMDL0020000001	Barberton	OH	44203	3/3/2011	Met with Dr. Patel and asked if I could sit with him and help him identify the right type of patient for Butrans. We were able to talk about BWC patients but as the call ended he was still uncertain if he would try this on an opioid experienced or opioid naive patient. Scheduled lunch.
	Cleveland	OH	44106	3/3/2011	I talked to dr about Butrans fpi,patient information booklet,initiation guide and Butrans patient savings cards.dr said he doesn't have much experience with chronic pain yet, as he is a 1st year resident.dr said he only treats acute pain now and doesn't prescribe any CIII medications for acute pain.I showed dr the Butrans fpi,with indication,noting this medication is ONLY for chronic pain patients that are considered moderate to severe chronic pain so we talked about the indication and dr said maybe in the future when he treats chronic pain he'll have a place for Butrans.I asked dr what benefits he saw in Butrans,for patients overall? dr said once weekly dosing is nice,much easier than taking pills around the clock and he likes transdermal delivery.
PPLPMDL0020000001	Cleveland	OH	44106	3/3/2011	I asked dr if he started any patients on Butrans? dr said not yet,he forgot about it and just has to remember its available.I showed dr Butrans initiation guide and asked him where he would feel most comfortable starting a patient on Butrans? dr said someone already taking tramadol but not controlled.I showed dosing guidelines for opioid experienced,tramadol dosing,in Butrans initiation guide and asked dr to think of 1 patient who he could start on Butrans.dr agreed,we discussed managed care coverage for medicaid and commercial plans.
PPLPMDL0020000001	Mogadore	OH	44260	3/3/2011	Introduced Butrans and reviewed FPI, indication, dosing and initiation, boxed warning. He said he writes some pain meds but the practice is trying to get away from doing alot of chronic pain management. HE asked if this is like Talwin and I said no. We reviewed managed care and savings card program. Asked if he saw benefit to his practice and he said yes, he likes the trans dermal. Said he would think of a patient
	Cleveland	OH	44106	3/3/2011	I talked to dr about Butrans fpi,initiation guide and Butrans patient savings cards.dr said he likes the molecule buprenorphine,likes that Butrans is a CIII as he can call in re-fills so thats much easier for him and staff and dr said once weekly dosing is easier for some of his patients who dont like taking ultram around the clock.dr said they only prescribe tramadol in the out-patient clinic and he never starts anyone on hydrocodone combo's. I showed dr Butrans initiation guide,tramadol dosing guidelines and asked if he could think of 1 patient to try Butrans in and get some clinical experience? dr said he could but majority of their patients in out-patient clinic are Medicaid with a small percentage of Medicare patients so what was coverage for Butrans? we discussed prior authorization requirements for Medicaid patients to get Butrans and I told dr Butrans isnt covered on Medicare plans.dr said he'll try and think of 1 patient and see how patient responds to Butrans
PPLPMDL0020000001	Cleveland	OH	44106	3/3/2011	he'll try and think of 1 patient and see how patient responds to Butrans worked internal medicine residents-lunch with 17 doctors,worked internal medicine clinic-referred by Resident Coordinator(Barb) to see Terry,Nurse Manager,to talk with her about Butrans and give all info to her and nurses as they work with all Residents who are running out-patient clinic and there are a few attending physicians who are in the out-patient clinic supervising residents-goal is to set-up in-service with nurses,nurse practitioners and physician assistants in this out-patient clinic, worked family medicine-had to leave Butrans fpi,initiation guide and business card with secretaries for Dr.Leonard and Dr.Lane and Dr.Truax. worked rheumatology dept-saw Carmi,Dept manager,left 5 Butrans fpi's,initiation guides and business card for all 5 fellows.
PPLPMDL0020000001	Mogadore	OH	44260	3/3/2011	Introduced Butrans, reviewed FPI, indication, boxed warning, dosing and titration, and 5 core messages. HE said they are starting to shy away from too much pain management and refers but will treat alot of their older patients with OA or chronic back pain. HE said that this would be a good option for Darvocet, I clarified that Darvocet is indicated for mild pain and we are for moderate to severe pain. HE said he knows but the only other option is Vicodin. HE said this would definitely fit into his practice, he can think of some patients, but not sure about the insurance coverage. HE said he wanted more than one pack of savings cards because he said he will write it. We talked about Oxycontin and he said they are not writing it any more for no reason other than they want to get away from the more chronic pain patients.
PPLPMDL0020000001					

	Westlake	OH	44145	3/3/2011	Dr has not heard back from the Butrans patient he started so he hopes no news is good news, he should be seeing him back in the next week or so. He did get a response regarding putting Butrans on formulary. Dr told me that they have 2 concerns that need to be addressed at the next meeting which are 1. the fact that naloxone may not reverse overdose and what to do in that case. 2. the fact that there is a REMS program for Butrans and all nurses and Drs would need to be trained on it. Dr said he is going to come up with a response and still try to get it approved on formulary. He said he thinks maybe they could put a restriction for only pain mgmt Drs to be able to use it in the hospital. I let him know that I am available to do an in services with HCPs on the floors to reviewed the FPI and warnings for Butrans.
PPLPMDL0020000001	Cleveland Heights	OH	44118	3/3/2011	Spoke to Allan about the Butrans indication. I explained the positioning for those taking 3 or 4 tabs of vicodin. He said good luck. He said he will get it in when he gets a script. I reviewed the initiation and titration dosing. Gave FPI and titration guide.
PPLPMDL0020000001	Euclid	OH	44119	3/3/2011	Spoke to Lauren about the launch of Butrans. Confirmed that they were stocking both the 5 and 10mcg bnf Butrans. I explained the application and disposal process abd gave a titration guide and patient info guide. I explained that Dr. Karimpil has just expressed interest in prescribing.
PPLPMDL0020000001	Mogadore	OH	44260	3/3/2011	Introduced Butrans, reviewed FPI, indication, boxed warning, dosing and titration, 5 core messages. HE talked about how the practice is getting away from doing pain management that they have been burned too many times but did not get specific. HE then took the FPI and started fingering through it and was gaining more interest in it. HE asked about managed care and we reviewed that. He asked why this is a schedule 3 and not a schedule 2. I said I did not know that information because the scheduling is done by the FDA according to it potential for abuse. HE said he would think about it sometime. I asked for a specific patient and he couldnt think of anyone yet
PPLPMDL0020000001	Cleveland	OH	44106	3/3/2011	i talked to dr about Butrans fpi,initiation guide,patient information booklet and Butrans patient savings cards.dr said they only prescribe tramadol in out-patient clinic,for chronic pain,so he would think of Butrans for those patients if they are complaining of their current medication not working.i told dr that's perfect,start with 1 patient on tramadol,showed Butrans initiation/titration guide and asked him to think of commercially insured patients to use Butrans patient savings cards.dr said 70-80% of patients in out-patient clinic are Medicaid and the rest are Medicare patients.we discussed Medicaid coverage for Butrans. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	3/3/2011	i talked to dr about Butrans fpi,initiation guide,patient information booklet and Butrans patient savings cards.dr said they only prescribe tramadol in out-patient clinic,for chronic pain,so he would think of Butrans for those patients if they are complaining of their current medication not working.i told dr that's perfect,start with 1 patient on tramadol,showed Butrans initiation/titration guide and asked him to think of commercially insured patients to use Butrans patient savings cards.dr said 70-80% of patients in out-patient clinic are Medicaid and the rest are Medicare patients.we discussed Medicaid coverage for Butrans. recommended Senokot-S

PPLPMDL0020000001	Cleveland	OH	44106	3/3/2011	i talked to dr about Butrans fpi,initiation guide,patient information booklet and Butrans patient savings cards.dr said they only prescribe tramadol in out-patient clinic,for chronic pain,so he would think of Butrans for those patients if they are complaining of their current medication not working.i told dr that's perfect,start with 1 patient on tramadol,showed Butrans initiation/titration guide and asked him to think of commercially insured patients to use Butrans patient savings cards.dr said 70-80% of patients in out-patient clinic are Medicaid and the rest are Medicare patients.we discussed Medicaid coverage for Butrans. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	3/3/2011	i talked to dr about Butrans fpi,initiation guide,patient information booklet and Butrans patient savings cards.dr said she prescribes tramadol,q4,6h,for patients in the out-patient clinic,for chronic pain.dr said if patients complain of their current dose not workin and she's maxed them out,then she thinks Butrans might be a good option there.i showed dr Butrans initiation guide,looking at tramadol dosing section and asked dr to consider 1 patient that she believes could benefit from Butrans.dr said she likes once weekly dosing and that Butrans is an adhesive and not a pill.dr asked about Medicaid coverage for Butrans so we discussed that information.dr said majority of patients are Medicaid and Medicare in out-patient clinic. recommended Senokot-S
PPLPMDL0020000001	Mogadore	OH	44260	3/3/2011	Spoke with Jerry and reviewed Butrans FPI, indication, boxed warning, dosing and initiation and savings card program. HE said he didnt get Butrans in and will order when he gets a script. Discussed Oxycontin and he said alot of patients intially were looking for the OCs but have tapered down and things are normal again. Asked for SenS recommendation in opioid induced constipation
PPLPMDL0020000001	Cleveland	OH	44106	3/3/2011	i talked to dr about Butrans fpi,initiation guide,patient information booklet and Butrans patient savings cards.dr said she prescribes tramadol,q4,6h,for patients in the out-patient clinic,for chronic pain.dr said if patients complain of their current dose not workin and she's maxed them out,then she thinks Butrans might be a good option there.i showed dr Butrans initiation guide,looking at tramadol dosing section and asked dr to consider 1 patient that she believes could benefit from Butrans.dr said she likes once weekly dosing and that Butrans is an adhesive and not a pill.dr asked about Medicaid coverage for Butrans so we discussed that information.dr said majority of patients are Medicaid and Medicare in out-patient clinic. recommended Senokot-S
PPLPMDL0020000001	Euclid	OH	44119	3/3/2011	Discussed the Butrans 5 selling messages. Explained the patient positioning. He asked how many days the patch is good for. Explained the 7 day indication and how to apply and dispose of. He thinks Butrans is a good idea and that he would probably prescribe for opioid naive. He asked about the cost. I explained the coverage and savings cards. He asked about the abuse potential. I read the boxed warning and how Butrans is still a CIII opioid. He said he would try it. Reminded him of the patients for Oxycontin and ryzolt.
PPLPMDL0020000001	Cleveland	OH	44106	3/3/2011	i talked to dr about Butrans fpi,initiation guide,patient information booklet and Butrans patient savings cards.dr said she prescribes tramadol,q4,6h,for patients in the out-patient clinic,for chronic pain.dr said if patients complain of their current dose not workin and she's maxed them out,then she thinks Butrans might be a good option there.i showed dr Butrans initiation guide,looking at tramadol dosing section and asked dr to consider 1 patient that she believes could benefit from Butrans.dr said she likes once weekly dosing and that Butrans is an adhesive and not a pill.dr asked about Medicaid coverage for Butrans so we discussed that information.dr said majority of patients are Medicaid and Medicare in out-patient clinic. recommended Senokot-S
PPLPMDL0020000001	Solon	OH	44139	3/3/2011	We reviewed the MKT piece and discussed the unapproved info points regarding the % of duals and the co-pay amounts. He has sent that info to the actuary people but their computer model that provides that information is down which is why he hasn't recieved it back yet. He will go up to that Department after our appointment. We also discussed the recent article about the Caremark/UA merger which he said was the first step of three that has to be approved before the merger takes place. This step means the SEC has approved the merger allowing it to continue. Mike will check with Lora in pharmacy to see the results of the P&T review for Butrans. He believes it hasn't been reviewed just yet as we didn't launch until January. If it wasn't, it will be in either March or April. Check back with him to see. Finally, he said to check with Tony regarding the estimated payment information needed. He said Tony is currently the only person in Rebate Analytics as someone was just let go so he's busy.
PPLPMDL0020000001	Cleveland	OH	44106	3/3/2011	i talked to dr about Butrans fpi,initiation guide,patient information booklet and Butrans patient savings cards.dr said she prescribes tramadol,q4,6h,for patients in the out-patient clinic,for chronic pain.dr said if patients complain of their current dose not workin and she's maxed them out,then she thinks Butrans might be a good option there.i showed dr Butrans initiation guide,looking at tramadol dosing section and asked dr to consider 1 patient that she believes could benefit from Butrans.dr said she likes once weekly dosing and that Butrans is an adhesive and not a pill.dr asked about Medicaid coverage for Butrans so we discussed that information.dr said majority of patients are Medicaid and Medicare in out-patient clinic. recommended Senokot-S
PPLPMDL0020000001	Garfield Hts	OH	44125	3/3/2011	Reminded Dr Sadowski of our prior Butrans discussion. Also re-delivered 5 core messages. He asked if physicians needed a special license or had to be pain management specialists to prescribe Butrans & I told him no. He said to prescribe "the other forms" one must have a permit. I clarified that Butrans's only indication is for the management of moderate to severe chronic pain & does not have an indication for addiction treatment. Also went over dosing & he said it made more sense to him. Dr Sadowski said he doesn't write a lot of pain medication. I asked him if he has patients who take one to three Vicoden, tramadol, or Percocet per day and he said yes. I asked him to think of these patients & then asked if he felt that any of those patients may benefit from Butrans. He said he thinks that some may like having an option to treat their pain that is not an oral form. He asked about cost. Reviewed managed care coverage & savings cards. Spoke with Deena about Butrans & savings.
PPLPMDL0020000001	Warrensville Heights	OH	44122	3/3/2011	Spoke with Carol (nurse) & discussed Butrans 5 core messages. She said that she remembers Dr Shin being excited about it & writing his first prescription after my breakfast but she has not seen him prescribe it since. She said she did not know why but promised to remind him about it. We discussed importance of proper application & savings cards. She said she felt like Butrans was something they would use a lot in the pain management practice there. I gave her an initiation guide as a reminder for Dr Shin & asked her to call me with any questions. Also went over OxyContin savings cards.
PPLPMDL0020000001	Cleveland	OH	44106	3/3/2011	i talked to dr about Butrans fpi,initiation guide,patient information booklet and Butrans patient savings cards.dr said she prescribes tramadol,q4,6h,for patients in the out-patient clinic,for chronic pain.dr said if patients complain of their current dose not workin and she's maxed them out,then she thinks Butrans might be a good option there.i showed dr Butrans initiation guide,looking at tramadol dosing section and asked dr to consider 1 patient that she believes could benefit from Butrans.dr said she likes once weekly dosing and that Butrans is an adhesive and not a pill.dr asked about Medicaid coverage for Butrans so we discussed that information.dr said majority of patients are Medicaid and Medicare in out-patient clinic. recommended Senokot-S
PPLPMDL0020000001	Beachwood	OH	44122	3/3/2011	Dr Yokiel said that he has written 2-3 Butrans prescriptions but has not yet gotten feedback. He asked what Butrans looks like so I showed him a demo & asked his thoughts. He said he liked how thin & sticky the patch was & asked about adhesion problems. Discussed importance of proper application & told him about taping edges of Butrans with first aid tape, Bioclusive, or Tegaderm. He asked how Butrans is being abused "on the streets". I told him I know of no specifics, but that because Butrans is an opioid, it carries abuse & addiction potential just as other opioids do. He said he believes Butrans is a great idea & that he likes that it is once-a-week & a "different" medication & that he plans to continue to prescribe it. Discussed managed care/savings for Butrans & OxyContin. Spoke with Vickie about patient counseling & gave her patient information booklets which she appreciated.
PPLPMDL0020000001	Parma	OH	44129	3/4/2011	Spoke with Linda (pharmacist) & reminded her about our previous Butrans conversation. Reviewed indication, dosing, titration, & appropriate patient type/positioning. She said she does have the 5mcg stocked but has not seen any prescriptions yet. I asked who in the area, based on the positioning of Butrans, she feels may want to hear more about Butrans. She said that no one stood out in her mind. She said that she sees so many different doctors' names but no one consistently. I asked if they stock OxyContin & she said they do not have any & she said they had no use for the savings cards that I offered because of that. She said the Garfield Heights store is the one that stocks & dispenses OxyContin in the area.
PPLPMDL0020000001	Euclid	OH	44119	3/4/2011	Window call.... Asked doc if he has had any success with Butrans yet. He said not yet and that he has a lot of patients on medicaid. I asked him to try for patient with commercial insurance or BWC. Asked him to be sure to give a savings card.
PPLPMDL0020000001	Lakewood	OH	44107	3/4/2011	Quick follow up. I asked Dr where he sees himself prescribing Butrans and he said he didn't know yet. I reviewed low dose vicodin patients who meet the Butrans indication as a possible appropriate patient and he said he will try to find one patient to start.
PPLPMDL0020000001	Cleveland	OH	44135	3/4/2011	Dr is ortho and specializes in hand surgery. He asked about Butrans and we reviewed the indication and appropriate patients. He does not typically treat chronic pain but thought it was good to know.
PPLPMDL0020000001	Sagamore Hills	OH	44067	3/4/2011	Spoke with Dr Scanlon's nurse, Helen. She said Dr Scanlon has still not prescribed Butrans, but he has been on vacation this week. Reviewed indication, appropriate patients/positioning, managed care & savings cards. Helen said she would remind Dr Scanlon about Butrans as she feels he has many patients who may benefit from Butrans.
PPLPMDL0020000001	Beachwood	OH	44122	3/4/2011	Spoke with Jim (nurse) who said Dr Tabbaa had just left but that he did prescribe Butrans for a patient today. He said that it was for a patient with Medicare Part D, so he did the prior authorization & will let me know if the prescription went through. Reviewed appropriate patient type/positioning and managed care coverage. Jim said he expects Dr Tabbaa to prescribe a lot of Butrans due to his patient population. Also reviewed OxyContin managed care coverage & reviewed formulary grid with him as he does all prior authorizations for the office.

PPLPMDL0020000001	Cleveland	OH	44135	3/4/2011	Dr is a resident. We reviewed the Butrans FPI, initiation guide and medication guide. We reviewed appropriate patients for OxyContin and went over the conversion guide. We reviewed Ryzolt as a once a day option. Reminder to recommend Senokot S with opioid scripts.
PPLPMDL0020000001	Parma	OH	44134	3/4/2011	Spoke with Cheryl (technician) as Nate (pharmacist) was busy counseling some patients. Discussed OxyContin savings cards which Cheryl said they could definitely use. Also reviewed Butrans with her. She said she was not sure if they had it stocked. Reviewed indication, appropriate patients/positioning, & managed care. Cheryl said that she thought Butrans sounded like a great idea to have fewer people taking Vicodin or Percocet around-the-clock. She had no specific recommendations of physicians to call on or target. She said I should stop back another time to catch Nate.
PPLPMDL0020000001	Cleveland	OH	44195	3/4/2011	I asked dr if he started any patients on Butrans? dr said not yet because he has been working in the hospital for past 2weeks where he see's patients and rounds with Fellows and he gives iv buprenorphine to patients and majority of his patients are on 90-130mg oral morphine so they are not appropriate patients for Butrans.I asked dr if he ever see's patients within the 30-80mg oral morphine range where he could consider Butrans as an option? dr said yes he does and he will definitely consider Butrans for those patients.dr said the problem is that by the time patients get to him,they are so far down pain severity scale that they need high doses of morphine, above 80mg,so he thinks the anesthesia/pain management group should be starting patients on Butrans as they are treating non-malignant cancer pain patients and their patients would be more moderate pain than what he is seeing in Taussig Cancer Center. recommended Senokot-S
PPLPMDL0020000001	Parma	OH	44129	3/4/2011	Quick call with Jen- Reminded her of Butrans, indication, appropriate patients. She said that she just recently was assigned her prescribing & DEA numbers, so she can now prescribe medications. She said she would keep Butrans in mind.
PPLPMDL0020000001	Westlake	OH	44145	3/4/2011	We reviewed Butrans FPI, and initiation guide. He asked if this is being used in hospice yet, and thought it would be great for his elderly patients. Most of his patients are Med D patients but he does have some commercial insurance. We reviewed Butrans managed care and savings cards. He didn't know if there would be a big place in his practice for Butrans but would try it instead of increasing vicodin for an appropriate patient. Reminder about OxyContin as a Q12hr option and he said he does not trust any patients to have it, even with Oarrs and urine drug screening and all of the tools he has available. He said he would send them to pain management to make sure they look at all of the options of treatment. Reminder to recommend Senokot S with opioid scripts.
PPLPMDL0020000001	Westlake	OH	44145	3/4/2011	Dr said that he did try a patient on Butrans but insurance did not cover it. He wanted to convert her to Butrans from vicodin. He said that the cost was over \$100. Laura looked up her insurance and she said has Anthem. I reviewed Butrans managed care coverage and the savings cards.
PPLPMDL0020000001	Westlake	OH	44145	3/4/2011	Quick call as Dr had 8 patients waiting. I asked him where he sees himself prescribing Butrans and he said for new chronic pain patients. He said he hasn't seen a lot of chronic pain lately but he will see if he can find a place for Butrans. I asked him to try it on just one patient.
PPLPMDL0020000001	Cleveland	OH	44109	3/4/2011	I asked dr if he considered Butrans as an option for any patients? dr said no,not yet. I asked dr how Butrans benefited his patients? dr said the fact Butrans is a CII and he can call in re-fills thats easier for him but he hates the fact that he has to do a prior authorization for medical patients.i told dr i understand his frustrations with having to process a prior authorization but asked if he had 2 patients with commercial insurance or workers comp that are taking short-acting oxycodone,complaining of pain worsening and instead of dr re-filling short-acting oxycodone,would he be willing to try Butrans? dr said he'll try it in a few people and let me know what he hears from patients.I told dr i had lunch with him monday,march 7th and would follow-up with him then.dr said that was fine.
PPLPMDL0020000001	Cleveland	OH	44109	3/4/2011	I talked to dr about Butrans being an option for her patients when they are taking 1-2 tabs of hydrocodone or oxycodone and complaining of pain worsening,instead of her increasing the tablets per day.dr said it makes sense,she likes Butrans because its a long-acting opioid and a CII which is easy for her to call in re-fills,the only challenge with Butrans is that Medicaid doesnt cover Butrans and she has to get a prior authorization done.dr said she is willing to give Butrans a try in some patients and do the prior authorizations but its more work for her and her nurse so she hasnt really thought of Butrans lately. I showed dr Butrans initiation guide and asked her to think of 1 patient like we discussed with workers comp or commercial insurance as that'll be the easiest for her dr agreed and said she would think of this next time she see's patients on short-acting opioids. I
PPLPMDL0020000001	Lakewood	OH	44107	3/4/2011	We reviewed Butrans FPI and initiation guide. She thought this would be a great option in the nursing homes. We discussed managed care for Butrans, and that most Med D plans would be a Prior Auth, but she could give it a try. We discussed managed care for Butrans and that commercial insurance would be a S15 copay on average with no prior auths.
PPLPMDL0020000001	Fairlawn	OH	44333	3/4/2011	Asked Dr what type of patient he feels he would most likely use Butrans with. Dr said he isn't sure because he hasn't initiated therapy. I asked him to keep in mind patients who are taking low dose hydrocodone ATC.
PPLPMDL0020000001	Westlake	OH	44145	3/4/2011	Dr said he started 3 Butrans patients last week. I asked what benefit does he see for his patients and he said the benefit is that he is getting his patients off of taking pills all day. He said that he it makes him look good when he doesn't write so much short acting around the clock. He did have some insurance issues one they did a prior auth and another patient said the copay was \$60. They were not sure if the patient got the Butrans savings card but they were going to make sure she had one. The patient still paid for it and is having success with Butrans.
PPLPMDL0020000001	C	OH	44195	3/4/2011	I met dr at Pain Champions:Pain management education for nursing-He lectured on patient-controlled analgesia,epidural analgesia and peripheral nerve blocks-I told dr i was the purdue rep,we discussed Butrans initiation guide and OxyContin conversion guide,that was all the time i had with dr.dr said he works in pain management but travels and gives lectures so if i wanted to call his secretary and book an appointment i could.
PPLPMDL0020000001	Fairlawn	OH	44333	3/4/2011	Followed up with Dr. Weidman and asked if she has initiated Butrans therapy for the Medicaid patient we had discussed. She said she tried and has not heard back. I told her to focus on commercial/private insurances so she would have better success.
PPLPMDL0020000001	Akron	OH	44333	3/4/2011	Introduced Butrans and the FPI. Dr. Z said that he does not treat chronic pain and does not have many patients who would be Butrans candidates.
PPLPMDL0020000001	Akron	OH	44333	3/4/2011	Introduced Butrans and the FPI. Dr. Richter said that this would be a product he would most likely not use because he does not like to treat chronic pain. He says he was happy to learn about it but would not use it.<font color=blue><b>CHUDAKOB's query on 03/10/2011</b></font>I think this needs more developing. He sees a lot of fibromyalgia patients. Is he referring his whole patient base to pain management? Perhaps more specific questioning will bring out what he is really thinking.<font color=green><b>LAPMACA's response on 03/14/2011</b></font>Thanks! Will do on my next call<font color=blue><b>CHUDAKOB added notes on 03/15/2011</b></font>I will be interested to hear what he says.
PPLPMDL0020000001	Akron	OH	44308	3/4/2011	Presented Butrans to Julie, BH Case Manager. She was unfamiliar with it so reviewed full FPI. Provided her conversion/titration if her staff has questions regarding it. Also, discussed the upcoming webinar programs by Purdue in May and June. She'd like her group to participate on Tues June 6 and I will bring lunch & pain resource.
PPLPMDL0020000001	Cleveland	OH	44109	3/4/2011	worked oncology dept-left Butrans fpi,initiation guide and business card for Dr.Snell,Dr.O'Brien,Dr.Hergenroeder,Dr.Trey and Dr.Wagamon-with dept secretaries who said they have to give information to doctors and if doctors want to meet me for an appointment,they will call me to set it up. worked physical medicine and rehabilitation dept-see call notes on Dr.Harris and Dr.Huang; worked internal medicine dept-left information for Dr.Harrington,Dr.Falk-Ytter and Dr.Lindheim-Butrans fpi,initiation guide,business card and OxyContin fpi and conversion/titration guide for each doctor in this department
PPLPMDL0020000001	Cleveland	OH	44103	3/4/2011	I asked dr if she started anyone on Butrans yet and dr said no she has the information in front of her and Butrans patient savings cards but hasnt found the right patient.I asked dr who is the right patient,in her mind,to start on Butrans? dr said someone willing to take a patch and stop short-acting opioids.I showed dr Butrans initiation guide and Butrans FPI,noting initiating therapy section that she can start a patient on Butrans and still give short-acting opioid,dr said she keeps forgetting that and because this is a new molecule to her and new medication she will need me to continue reminding her.I asked dr to think of 1 patient,taking short-acting oxycodone thats complaining of pain worsening and instead of refilling medication,start patient on Butrans after appropriate tapering. dr agreed and said she will continue thinking of patients and talk to some next week. we discussed
PPLPMDL0020000001	Cleveland	OH	44195	3/4/2011	medicaid and commercial plan coverage for Butrans.recommended Senokot-S I asked Janet,Pharmacy Manager,if any Butrans scripts have come through? Janet said no,she is waiting for their 1st Butrans script.I told Janet about the physicians i am working with at the clinic and discussions im having about who the appropriate Butrans patient is and Janet said the Oncologists may not be able to start a lot of patients as so many of their patients are above 80mg oral morphine so she said if she comes across any doctors writing hydrocodone or oxycodone that are between 15-40mg she will recommend Butrans to those doctors.I gave Janet the medical education resource catalog for her and Brittany,Pharmacy technician and she appreciated this as she said they are trying to get updated on their CME's.I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44195	3/4/2011	attended Pain Champion-Pain Management Education for Nursing-was invited as only pharma rep allowed to attend this lecture series-listened to Dr.Davis,Oncologist,speak on "Opioid Short Strategy" and met Dr.Ritchey and Dr.Gretter who gave lectures on chronic pain and patient-controlled analgesia.had appointment with dr.davis as well in taussig cancer center
PPLPMDL0020000001	Westlake	OH	44145	3/4/2011	Dr said he thinks that Butrans would be a good option to help cut down on the vicodin, especially in his younger patients. He said his typical dose of vicodin is 7.5 and he will not give more than 5 pills per day. We discussed the initiation guide and how to start a Butrans patient based on what they are already taking. He said he will try to think of someone to try Butrans on. I reminded him about OxyContin as an option when Butrans may not provide adequate analgesia. I asked him to recommend Senokot S with opioid scripts.
PPLPMDL0020000001	Rocky River	OH	44116	3/4/2011	Spoke with Stan, I asked what benefits he sees in Butrans for his patients. He said it would be great to cut down of the amount of vicodin and the number of tablets that are being dispensed. We discussed Butrans medication guide and potential for abuse. Reminder about OxyContin as an option when patients may not get adequate analgesia from Butrans and asked to recommend Senokot S with opioids.
PPLPMDL0020000001	Independence	OH	44131	3/4/2011	Quick call with Roman at the window- He said he has not prescribed Butrans yet & has not thought a lot about it. He said that he probably will not until he is able to attend a program and speak to specialists about it. Delivered OxyContin savings card reminder as well as recommendation of Senokot-S for opioid-induced constipation.
PPLPMDL0020000001	Munroe Falls	OH	44262	3/4/2011	Introduced Butrans and the FPI. Dr. did not provide much feedback other than that she had a lot of patients on low dose hydrocodone.<font color=blue><b>CHUDAKOB's query on 03/10/2011</b></font>What type of questions did you ask her to gain feedback?<font color=green><b>LAPMACA's response on 03/14/2011</b></font>I asked if she had patients on low dose hydrocodone and she said she had a lot. This was a quick call, Dr gave me little time.<font color=blue><b>CHUDAKOB added notes on 03/15/2011</b></font>That's unusual. Next time will hopefully be better.
PPLPMDL0020000001	Cleveland	OH	44135	3/4/2011	Krista is new NP with Dr Ryan's group. We reviewed Butrans FPI, initiation guide and medication guide. She had seen the information and thought it looked interesting. She asked about adhesion of the patch and we reviewed the info per the FPI. She asked about abuse potential and I discussed that this is a CII opioid with potential for abuse. She said he had a patient on OxyContin who's copay went way up and she's had to switch some patients because they can't afford it any longer. I reviewed the managed care for OxyContin and the savings cards to see if we can help the patients copay. I reviewed what Ryzolt is. Reminder to recommend Senokot S with Dr Pai said he had written two Butrans prescriptions. He asked me to remind him of the managed care details. Discussed commercial coverage & savings cards for commercially insured & cash-pay patients. Reminded him that patients with any type of government insurance could not use the savings cards & let him know about prior authorization on Medicare & Medicaid plans. He said one of the patients he had prescribed Butrans for had a Medicare Part D plan. The patient had been taking about 6 tramadol per day & had requested "something different" to control her pain. I asked if Dr Pai had tapered her & he said that he did not. He said he considered it, but that because she did not always take as many as 6, he did not & that he started her on the 5mg dose. He said that he realizes why the taper is recommended, but did not feel in her case it was necessary. He said he would let me know what the results were & what the patient says about it. OxyContin managed care review & formulary grid.
PPLPMDL0020000001	Westlake	OH	44145	3/4/2011	I asked what type of patient she sees herself prescribing Butrans for. She said she has a patient who is on the lowest dose of duragesic and also on percocet who is not tolerating the duragesic very well. She would like to try her on Butrans but the patient is Medicaid. We discussed managed care and the step edit for Medicaid. She may still try to convert the patient. I asked if she could think of any other patients who could benefit from Butrans every 7 days, she said she will think about it. We reviewed OxyContin as a Q12hr option when Butrans may not provide adequate analgesia. Reminder to recommend Senokot S with opioids.
PPLPMDL0020000001	Parma	OH	44129	3/4/2011	Spoke with Dawn who said that Laura found a patient to start on Butrans, but unfortunately the patient had CareSource for insurance & was unable to get Butrans due to lack of coverage on that plan. Dawn said that even though it didn't end up being a "win" for Laura to write Butrans, it shows that she does see a place for it in her practice. Dawn said she will help me remind Laura of other places she can consider it. Reviewed managed care coverage on commercial plans & discussed BWC plan. Dawn said that many worker's comp patients come to them already on Vicodin for a couple of weeks & once they are on that, it is difficult to make the patient change. I suggested to Dawn that they not allow the patients to control them that much & discussed patient counseling & "selling" the idea of a long-acting medication, if appropriate, to patients. Dawn said that was a good point.

PPLPMDL0020000001	Mayfield Heights	OH	44124	3/4/2011	Reminded doc of his previous interest in Butrans. I reviewed the selling messages and asked where he would use Butrans. He said maybe for a vicodin patient. Asked him to try a patient on 5mcg if they are taking 15mg of less. Gave him an initiation guide.
PPLPMDL0020000001	Parma	OH	44129	3/7/2011	Quick call with Kevin (pharmacist). Presented patient information booklets & discussed Butrans patient counseling and adhesion/application. Als gave new OxyContin savings cards & reminded Kevin they can be used only for cash pay or commercially insured patients, not patients with any type of government insurance, including Medicaid & Medicare.
PPLPMDL0020000001	Lakewood	OH	44107	3/7/2011	I asked Dr if he was able to start the patient on Butrans that we discussed last time. He said he has not seen the patient yet. He said Butrans is in the back of his mind, I asked what can I do to bring it the front. He said that he just needs to see the appropriate patient. I asked what the right patient is, he said a patient who has chronic pain and is on lower dose opioids. I asked him to try just one patient this week.
PPLPMDL0020000001	Parma	OH	44129	3/7/2011	Spoke with Debbie (MA)- Butrans indication, appropriate patient/positioning, & managed care/savings reminder with delivered. Debbie said Dr Chagin has prescribed Butrans yet. She agreed that he has many patients who fit the indication & she said she thought Butrans sounded like something patients would like. She said Dr Chagin would not be able to see me today, so I scheduled the next available appointment.
PPLPMDL0020000001	Cleveland	OH	44109	3/7/2011	I asked dr if he started any patients on Butrans? dr said not yet,but he asked me to discuss the appropriate patients with him again as he couldnt remember.i showed dr Butrans initiation guide and asked him if he would try Butrans in an opioid naive or experienced patient? dr said he's thinking of patients currently taking opioids,Vicodin or Percocet.dr wont give more than 4tabs a day,60-90tabs a month.dr said he is getting very strict and stubborn with his patients recently because patients are supposed to take 1 short-acting opioid a day and they are taking 4 a day and calling in for re-fills by day 21.dr said he's refusing to refill patients medication,starts questioning if patients are really in pain and taking medication appropriately.dr said Butrans is a great option as a baseline maintenance for patients with maybe small amounts of short-acting opioid available for break-through pain.dr said the Butrans patch,with once weekly dosing and being a CIII so he can call in re-fills
PPLPMDL0020000001	Lakewood	OH	44107	3/7/2011	Quick call, I asked where do you see yourself prescribing Butrans? He said probably for a patient who is taking vicodin around the clock. I showed the initiation guide and asked him to start just one appropriate patient on Butrans this week. He will try.
PPLPMDL0020000001	Lakewood	OH	44107	3/7/2011	Spoke with Audwa, she has not seen any scripts yet in Lakewood, but did dispense it at another store in Medina. We reviewed the medication guide for Butrans and how to instruct the patient on proper use and application. She agreed to help counsel the patients to make sure they know how to use Butrans. They did not have it in stock at this store, but she said she would order the starting doses. We discussed appropriate patients for OxyContin and as an option when Butrans may not provide adequate analgesia. Reminder about Ryzolt as a once a day option and asked her to recommend Senokot S.
PPLPMDL0020000001	Parma	OH	44129	3/7/2011	Quick call with Dr Taylor to follow-up on Butrans. She said she has not had enough time in the office seeing patients since our initial discussion, but that she is keeping Butrans in mind. Indication & appropriate patients/positioning reminder.
PPLPMDL0020000001	Parma	OH	44134	3/7/2011	Spoke with Stephanie (?), pharmacist & reviewed Butrans indication, dosing, appropriate patients/positioning. She said she has not ordered Butrans yet & has not seen any prescriptions so she does not plan to order it before she gets one. Encouraged her to order now so it will be available right away for that patient, but she said they did not deviate on that policy. Discussed OxyContin savings cards & reminded her they can be used only for commercially insured or cash-pay patients, not for those with any type of government insurance, including Medicare & Medicaid.
PPLPMDL0020000001	Parma	OH	44129	3/7/2011	Dr Ortega said he was "not sure yet" about Butrans. He said again that he has only one patient on the Duragesic patch & a "handful" on the Lidoderm patch or other patches. I asked Dr Ortega to think of Butrans not as a replacement for other patches, but rather as an alternate option for patients who are on NSAID's or Cox-2's & not getting relief, or who are already taking 1-3 Vicoden per day. Also showed initiation guide pg 6 to reinforce positioning, which he said he understood better now. He asked if Butrans is less addictive than Vicoden. I told him we do not have studies or data regarding that & reminded him that Butrans is CIII & can be abused like other opioids. Discussed managed care coverage/savings cards for appropriate patients. I asked if he could think of any patients who he felt could benefit from Butrans. First he said he did not know-then he paused & said that he could see how some patients may prefer a once-a-week option, OxyContin reminder for patients beyond Butrans
PPLPMDL0020000001	Lakewood	OH	44107	3/7/2011	Dr did not seem to understand why he should choose Butrans instead of Duragesic. I asked Dr what type of patient would he usually prescribe Duragesic for, he said for a patient with chronic pain like someone with cancer. We discussed the dosing and initiation guide for Butrans and that patients who need more than 80mg of oral morphine equivalent many not get adequate analgesia from Butrans. I asked what type of patients does he see himself prescribing Butrans for, and he said probably the same type of patient he would think of Duragesic or OxyContin because Butrans is a long acting. He said he does not maintain many chronic pain patients, but he would give this a try in a few patients and try to see where it fits in. We discussed OxyContin as Q12hr option and that an appropriate patient for Butrans may also be appropriate for OxyContin depending on the total daily dose of opioid. We discussed managed care and the Butrans savings program.
PPLPMDL0020000001	Parma	OH	44129	3/7/2011	Introduced Butrans to Dr Tolentino, delivering 5 core messages & alerting her to box warning. Explained appropriate patient type/positioning for Butrans & asked Dr Tolentino if she had commercially insured patients who fit the indication. She said she did- I asked what a once-a-week option to control their pain would mean for them & she said "convenience". Dr Tolentino said she is trying to stay away from prescribing any controlled substances. I agreed that she should be cautious in prescribing any opioids, including Butrans, as they do carry abuse/addiction potential. She asked about managed care, so I explained commercial coverage & savings cards for commercially insured & cash-pay patients. Also reminded her that savings cards cannot be used for patients with Medicaid, Medicare, or any other government insurance. Dr Tolentino said she would try Butrans on some of her chronic pain patients who she trusts. Recommended Senokot-S for opioid-induced constipation.
PPLPMDL0020000001	Akron	OH	44333	3/7/2011	Asked Dr. Ahmad what type of patient he was looking for in an effort to get him to think of Butrans therapy when he sees a specific patient. He told me both opioid naive and low dose hydrocodone.
PPLPMDL0020000001	akron	OH	44333	3/7/2011	Followed up on our last conversation. I asked if had initiated Butrans therapy and he said he was still looking for a patient. I spoke with Gretchen, who is the office manager and asked if she could identify 3 patients who are currently on low dose hydrocodone with commercial insurance. I then asked if she would put a patient education guide in their charts and she agreed.
PPLPMDL0020000001	Cleveland	OH	44109	3/7/2011	i talked to Ray,Pharmacist,about Butrans stocking and he said they havent ordered Butrans yet and wont until they see 1 script come through for Butrans.i told Ray that the goal of stocking Butrans was to make it easier for patients,so that no patients are told to come back in 24 hours.Ray said he understood but he still felt that patients can wait 24hrs and come back to get Butrans.i left Butrans initiation guide and asked Ray to re-consider his decision on ordering if he felt this was an appropriate medication for patients. Ray said he likes that Butrans is once weekly dosing and a patch,but he still wants to see 1st script come through pharmacy,then he'll order Butrans.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	3/7/2011	i talked to Naser,Pharmacist,about Butrans stocking and Naser said they had Butrans in stock but no scripts yet.i told Naser the hospitals i work with and some physicians at MetroHealth Medical center that i work with and do lunches with to discuss Butrans.Naser said most of the short-acting opioids,Vicodin,Percocet and tramadol come from Physical Medicine and Rehabilitation,Pain management,some scripts from internal medicine and family medicine.i asked Naser if he would be willing to recommend Butrans,when talking to doctors about patients on short-acting opioids but maybe still complaining of pain worsening on short-acting? Naser said he could do that with a few doctors as he has a good relationship with some and could recommend Butrans.i recommended Senokot-S
PPLPMDL0020000001	Lakewood	OH	44107	3/7/2011	Introduction to Dr. I reviewed the key messages for Butrans. He will take a look at the information. He said he does see some chronic pain and it looks like an interesting option. I reviewed Butrans patient info with Robin his MA/office mgr.
PPLPMDL0020000001	Fairlawn	OH	44333	3/7/2011	Spoke with the pharmacist to see if there has been any movement with Butrans. She said it has been slow. I explained that I had only been out talking about this product for a short period of time and encouraged her to retain what they had stocked and she agreed.
PPLPMDL0020000001	Lakewood	OH	44107	3/7/2011	Spoke with Meagan, They were auto shipped 2 cartons of each strength of Butrans. She told me it was taking up an entire shelf and she was not happy about it. I let her know that Drs in the area have started prescribing Butrans and it will be moving. We reviewed the medication guide and I gave her extras. I asked for her help in instructing the patient on how to use Butrans. Reminder that we are still discussing OxyContin with prescribes for patients where Butrans may not provide adequate analgesia. Reminder about Ryzolt as a once a day option and asked her to recommend Senokot S with opioids.
PPLPMDL0020000001	C. Falls	OH	44223	3/7/2011	Spoke with pharmacist, Larry. He told me that Dr. Narouze et. al. are slow writers and they see minimal scripts on a day to day basis. He told me that they do a lot of procedures instead of meds. Larry said he would not order any Butrans unless a prescription was written. Discussed Butrans and FPI.
PPLPMDL0020000001	Lakewood	OH	44107	3/7/2011	Quick call at window, Dr asked about managed care for Butrans. We discussed commercial insurance and BWC coverage. He said this might be a good option for some of his BWC patients.
PPLPMDL0020000001	Fairlawn	OH	44333	3/7/2011	I finally had the opportunity to sit down and discuss Butrans with Dr. Oyakawa. He told me that he had a high percentage of patients on low dose hydrocodone and would absolutely try Butrans on a handful of those patients who are commercially insured.
PPLPMDL0020000001	Akron	OH	44333	3/7/2011	Introduced myself and company. Told him what products I carried and he asked me to leave the information behind and left.
PPLPMDL0020000001	Lakewood	OH	44107	3/7/2011	Quick call at window, I asked her how do you see Butrans benefiting your patient? She said it is once a week application and it would probably be good in the nursing homes. I asked her to try it just one patient this week.
PPLPMDL0020000001	Lakewood	OH	44107	3/7/2011	I asked what type of patient she is thinking for Butrans. She said she has a couple of BWC patients in mind. She did not know what they were currently taking, but they have chronic pain and are new to pain management, her guess is they will come in on some type of short acting. She was suppose to see one of these patients, but they canceled. She will try Butrans for them when they come in.
PPLPMDL0020000001	Lakewood	OH	44107	3/7/2011	I asked Dr if he will be seeing any chronic pain patients who might be appropriate for Butrans. He said was seeing one right now and he would try Butrans. The patient has hip pain and is not being controlled on 3 5mg vicodin. Dr wrote 5mcg Butrans for the patient and decided to give percocet as supplemental analgesia. I gave the patient information book and savings card to Pat to give to the patient. She told me he has medical mutual and medco. We discussed titrating the patient after 3 days until analgesic efficacy. I asked Pat about the fibromyalgia patient they told me about last call. They have not seen this patient back yet, but Pat made a note to try Butrans for that patient.
PPLPMDL0020000001	Cleveland	OH	44109	3/7/2011	worked physical medicine&rehabilitation dept-11:30am-2:30pm-see call notes on physicians;2:30-5pm worked orthopedics,surgery,internal medicine,family medicine and oncology-had to leave Butrans fpi's,initiation/titration guides and my business cards for each doctor in every department and medical secretaries said they'll talk to doctors and see if i can get an appointment
PPLPMDL0020000001	Cleveland	OH	44109	3/7/2011	dr asked me how many patients complained in our clinical trials of Butrans falling off? i told dr i wasnt aware of any patients experiencing Butrans transdermal system falling off,in clinical trials and showed dr Butrans fpi,section 14,clinical studies section.i told dr patients can put first aid tape around edges of Butrans or a dressing like Tegaderm or Bioclusive and showed dr Butrans patient information section at end of Butrans fpi.i asked dr if that was his biggest concern with Butrans? dr said yes,he hasnt started any patients on Butrans yet but wondered about that.I asked dr if he see's patients that meet Butrans indication and are taking 1-2 tabs of Vicodin or Percocet? dr said yes,he has a lot of those patients,so i asked dr to think of 1 patient like that who is complaining of pain worsening and wanting something else,to try Butrans there.dr agreed-we discussed insurance coverage for Butrans and i recommended Senokot-S
PPLPMDL0020000001	Parma	OH	44129	3/7/2011	Dr Gigliotti said he has not prescribed Butrans yet but "Is poised to do so". I asked him what type of patient he was thinking of using it for that he has not seen yet. He said he was looking for someone who has been on Vicoden for "awhile". I reminded him that Butrans can be used for patients who are currently on opioids as well as those who have never been on an opioid before. I also reminded him that he has shared with me that he does not like to have patients on around-the-clock oral pain medication. He said this is true. I asked him, if he would then think of Butrans before he initiated treatment with Vicoden so that he is giving the patient Butrans instead of starting them on that short-acting around-the-clock oral pain medication regimen that he has told me so many times that he does not like. He agreed to do this. Also reviewed managed care of OxyContin with formulary grid & discussed savings cards which I gave to Jazz. Recommended Senokot-S for opioid-induced constipation.<font color=blue><b>CHUDAKOB's query on 03/17/2011</b></font>Why does he not like to have patients on around the clock oral pain medications?<font color=green><b>APSEGAS's response on 03/18/2011</b></font>I believe in the past he has said that by doing that, patients get "addicted" to taking their medication. However, I will make sure to ask him to clarify by asking him that question on my next visit with him.<font color=blue><b>CHUDAKOB added notes on 03/18/2011</b></font>Ok. Thanks. That answer seems to lead to a lot of other answered questions such as what does he mean by addicted and if that is the case, why does he prescribe opioids at all. Just some thoughts

PPLPMDL0020000001	Lakewood	OH	44107	3/7/2011	I asked Dr what type of patients does he see himself prescribing Butrans for and he said pretty much any type of moderate chronic pain. He said he is thinking of switching a patient who is on duragesic to Butrans to see if she does better. She is on a 50mcg Duragesic and we discussed how to initiate a patient currently on opioids per the FPI and initiation guide. We discussed that patients on 80mg of oral morphine equivalent may not get adequate analgesia from Butrans. He said he would start some patients on Butrans and thinks it will be a good option for some patients. We reviewed OxyContin as an option when Butrans may not provide adequate analgesia. Reminder about Ryzolt as a once a day option and asked him and Laura to recommend Senokot 5.
PPLPMDL0020000001	Cleveland	OH	44109	3/7/2011	I asked dr how Butrans benefits her patients? dr said she hasnt started anyone on Butrans yet to be able to answer that question and see real world results.i asked dr,clinically speaking,what benefits did she think Butrans provided her patients,without prescribing yet? dr said Butrans being a CIII and her being able to call in re-fills makes it much easier for her and thats really the biggest benefit in her eyes.i asked dr how often she hear's from patients complaining that their current short-acting opioid isnt working and they request something else? dr said she only hears that once every other week as most of her patients are stable on their short-acting opioids and not requesting a medication change.i told dr if patients are doing well,thats great,but if she has 1 patient complain of their current short-acting,would she consider Butrans? dr said yes she would consider Butrans,its just taking her longer to start patients on the medication.we discussed insurance coverage for Butrans
PPLPMDL0020000001	Cleveland	OH	44109	3/7/2011	i talked to dr about Butrans fpi,initiation guide,patient information booklet and Butrans patient savings cards. dr said she doesnt write a lot of narcotics and only treats a few patients for chronic pain.dr said she likes that Butrans is a once weekly dose in a patch.dr asked about insurance coverage so we discussed workers comp,medicaid and commercial plan patients getting coverage for butrans.i asked dr if she had 1 patient who met Butrans indication,who has complained of current short-acting opioids regimen not working and requesting something different? dr said yes she has patients like that.i asked dr to consider 1 patient like that,with commercial insurance to use Butrans patient savings card.dr agreed and i recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44109	3/7/2011	i talked to dr about Butrans fpi,initiation guide,Butrans patient information booklet/dvd and Butrans patient savings cards.i asked dr what benefits she saw in Butrans for her patients? dr said once weekly dosing and in a patch form were the 2 benefits she saw and Butrans being a CIII was easier for her so that she can call in re-fills.i asked if dr would consider an opioid naive or experienced patient to try butrans in? dr said someone currently taking opioids,maybe 1-2 tabs of 5mg oxycodone or hydrocodone.i showed dr Butrans initiation guide,opioid experienced section,asked if she could consider that 1 patient like that who is complaining of current short-acting opioid not working and requesting something else? dr agreed. we discussed insurance coverage for Butrans and i recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44109	3/7/2011	i talked to dr about Butrans fpi,initiation guide,Butrans patient savings cards and Patient information booklet/dvd.dr said he has chronic pain patients that are taking short-acting opioids but doesnt hear a lot of complaints,if anything patients are always asking for re-fills or specific medication brand names and he's trying to wean people off opioids.i asked dr what benefits he see's in Butrans for his patients? dr said he likes that this is transdermal,a patch worn once a week and he likes that Butrans is a CIII so he can call in re-fills.dr said there are studies out now showing that patients on opioids long-term dont have better pain control being on the opioids versus the patients that were taken off the opioids and asking them how their pain is.dr said basically both groups still claimed to have a pain level of 5-10,so he doesnt always believe the opioids work for patients.i asked if dr had 1 patient on Vicodin or Percocet,showing Butrans initiation guide opioid experienced
PPLPMDL0020000001	Akron	OH	44333	3/7/2011	Followed up with Dr. Shah about the initiation of Butrans therapy for his first patient. While a script did show up in the dashboard, Dr. Shah said he had not yet initiated therapy and said that he wanted to hear someone speak on the product so he could learn more about it.
PPLPMDL0020000001	Cleveland	OH	44109	3/7/2011	i talked to dr about Butrans fpi,5 core messages.Patient information booklet,Butrans patient savings cards and Butrans REMS program.dr said he treats mainly acute pain patients but does have some chronic pain patients and doesnt like to prescribe narcotics.dr said he has a few patients on a couple Vicodin or Percocet daily but thats it,otherwise he's trying to wean patients off narcotics and try alternative options like acupuncture,physical therapy,blocks,injections,instead of around the clock opioids.i asked dr how Butrans benefits his patients? dr said the fact Butrans is a CIII,that makes it easier on him so he can call in re-fills and he likes that its a patch worn once a week as thats easier for some patients than taking pills around the clock.i showed dr Butrans initiation guide and asked if he had 1 patient he could try Butran on,thats taking 1-2 tabs of Vicodin or Percocet and still complaining of pain worsening? dr said yes he does have a few of those patients and he would try
PPLPMDL0020000001	Fairlawn	OH	44333	3/7/2011	Dr. Weidman has already initiated Butrans therapy to an elderly Medicare patient. She told me the patient paid \$40 and she has not yet heard back. She says she is likely to continue to use this therapy on some of her elderly patients because it is long acting. I also discussed the abuse potential that is associated with Butrans.<font color=blue>b</b>CHUDAKOB's query on 03/18/2011<b></b><font>Katie. This is a better next call objective. It follows up on what you discussed and attempts to move the whole process forward. Your getting there.<font color=green>b</b>LAPMACA's response on 03/21/2011<b></b><font>Thanks!<font color=blue>b</b>CHUDAKOB added notes on 03/21/2011<b></b><font>You're Welcome!
PPLPMDL0020000001	Parma	OH	44129	3/8/2011	Spoke with Bethany to follow-up on Butrans discussion. She said she has not yet dispensed any but does have 5mcg & 10mcg in stock (2 boxes of each). Discussed appropriate patients/positioning. Also presented patient information booklets which she said would be useful in patient counseling. She said she had recently had a question regarding converting someone from "one narcotic" (she could not remember which one) to Butrans but she said she did not know the conversion. Showed initiation guide page 6 & discussed recommended starting doses including taper. Also made sure she knew that it is not an equianalgesic table or a "conversion" guide, but just a recommended starting guide. Discussed titration ability every 3 days. Also reviewed OxyContin savings cards for appropriate patients.
PPLPMDL0020000001	Twinsburg	OH	44087	3/8/2011	Spoke with Carolyn (MA) as Dr Leonard called in sick this morning & was unable to attend our scheduled breakfast. Reviewed Butrans indication, appropriate patient types/positioning, and dosing. She said she would remind Dr Leonard of Butrans upon her return and said she thought it would be something that Dr Leonard would use in her practice. Also reviewed OxyContin savings cards for appropriate patients.
PPLPMDL0020000001	Cleveland	OH	44130	3/8/2011	Spoke with Marki, Melissa (MA's) & Anne Marie (office manager) who said Dr Panigutti was too busy to speak with me today. Discussed Butrans indication, seven days buprenorphine delivery in one application, CIII, and appropriate patients/positioning. They said that they no longer do lunches & that because of how busy the practice is it is "hit & miss" on getting any time with Dr Panigutti. Asked if they would like new OxyContin savings cards but they said that they do not have any patients at all who take it (although data suggests otherwise.)
PPLPMDL0020000001	Twinsburg	OH	44087	3/8/2011	Introduced Butrans to Dr Friedman, delivering 5 core messages & alerting her to boxed warning. I asked if she treats chronic pain & she said that she is starting to see more and more, including patients with osteoarthritis. She asked if it was similar to Duragesic. I explained that we have no comparative data & showed initiation guide page 6, pointing out that patients on fentanyl were excluded from our studies. I also showed the table and discussed appropriate starting doses for different patient types based on current therapy. She said she liked that Butrans is once-a-week & CIII & said that when she does see a patient who fits the indication, she will think of Butrans. Also discussed OxyContin as an option for appropriate patients who are beyond Butrans 20mcg/hr & presented savings cards.
PPLPMDL0020000001	Cleveland	OH	44130	3/8/2011	Introduced Butrans to Dr Fedorko, delivering 5 core messages & alerting him to black box warning. Discussed proper application, site rotation, heat warning, and appropriate patients. Also presented initiation guide & went over positioning of Butrans. Dr Fedorko agreed that prescribing Butrans for appropriate patients before prescribing Vicoden made sense. He said this would help prevent patients from psychologically "needing" to take a pill every few hours to relieve pain & he said he liked that it is a once-per-week application. He asked about managed care coverage, so I reviewed with him, Mindy, Mary Ellen, & Maryann commercial coverage. Also discussed prior authorization for Medicare & Medicaid. Presented savings cards & reminded them they could only be used for patients with commercial insurance or cash-pay, not any type of government coverage.Dr Fedorko said he has a patient with BWC with spinal stenosis for whom he may try Butrans. Also reminded them of Ryzolt & value cards.
PPLPMDL0020000001	Bedford Heights	OH	44146	3/8/2011	Spoke with Susan (office manager/appointment scheduler) to follow up on information I had left for her & Dr Hochman. Discussed with her Butrans indication, dosing, seven days buprenorphine delivery in one application, CIII, adverse events, & boxed warning. Susan said that she thought that Dr Hochman had had a question about Butrans but could not remember what it was. Also spent some time going over appropriate patients/positioning. She said she would speak to Dr Hochman & try to get an appointment for me to speak with him directly about Butrans as she felt it is something their patients could really benefit from. She asked me to call her on Thursday to set up a firm day & time for the meeting.
PPLPMDL0020000001	Cleveland	OH	44114	3/8/2011	i talked to dr about appropriate patients for Butrans and dr said he just feels since this is a new medication it'll take him a little longer to start as he's always nervous prescribing a new product.i told dr about our 1st talk about Butrans,where dr was excited that this was a transdermal delivery system and once weekly dosing and that he had patients in mind who were taking vicodin and percocet and not controlled so he thought Butrans could be an option.i asked dr what happened to those patients and why hasnt he really prescribed this medication? dr asked what are the side effects of Butrans again? i showed dr Butrans fpi,AE section and we discussed them.i asked dr knowing the side effect profile of Butrans,do you have 1 patient currently taking a short-acting opioid that complains to you or staff that pain is worsening and requesting a medication change? dr said yes,i told dr thats the Butrans patient.we discussed OxyContin after patients are above Butrans 20mcg/hr or above 80mg
PPLPMDL0020000001	Parma	OH	44129	3/8/2011	Dr Roheny told me has not yet seen "the right" patient for Butrans. I asked him if he has written any new Vicoden prescriptions lately & he said that he writes several of them every week. I told him that those were potential Butrans patients. He then told me Butrans was too expensive, so I discussed managed care coverage, focusing on commercially insured patients & also reviewed savings cards for commercial insurance/cash pay patients. He agreed that a \$15 co-pay was very reasonable. Reminded him of seven days of buprenorphine delivery in one application & CIII/boxed warning. He said he didn't realize it was a once-a-week patch. He asked what the doses were so I showed back cover of initiation guide. I asked him if he would choose one commercially insured patient for whom he was ready to start on Vicoden to prescribe Butrans 5mcg for instead & he agreed to do this. Also reminder for OxyContin for appropriate patients beyond Butrans 20mcg/hr.
PPLPMDL0020000001	Cleveland	OH	44130	3/8/2011	Quick call with Sue. She said they do not have Butrans in stock & will start stocking it once they start to see prescriptions. She said they are just too small of a pharmacy to keep products in stock that they have yet to see prescriptions for. Indication & seven days buprenorphine delivery in one application reminders. Also gave new OxyContin savings cards for appropriate patients & reminded her they can be used only for commercially insured or cash-pay patients, not any type of government insurance.
PPLPMDL0020000001	Cleveland	OH	44114	3/8/2011	i talked to John,PA,about appropriate patients for Butrans and who John thought could benefit from Butrans.John said any of their patients taking short-acting opioids like Vicodin or Percocet,around the clock and still complaining of pain worsening or if they are calling into office sooner than they should for refills,thats a sign to him that patients may need a long-acting opioid.i asked if John could continue thinking of those patients that could start on Butrans 5mcg or 10mcg and showed Butrans initiation guide for appropriate patient selection and tapering information.John agreed to do so as he see's patients,chooses medications,writes scripts and Dr.Marshall or Dr.Katz signs scripts. i recommended Senokot-5
PPLPMDL0020000001	Bedford	OH	44146	3/8/2011	Only got a quick call in from Ebony. She said she has still not seen any Butrans activity- reviewed appropriate patient type/positioning. Offered OxyContin savings cards but she said they do not stock it at this location for safety reasons. She said she only has one customer on OxyContin.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	3/8/2011	Introduced Butrans and FPI. Dr. Ali was committed to starting Butrans therapy and identified several patients by name through out the course of our lunch meeting. He had patients who were both opioid naive and experienced. He admitted the biggest challenge would be managed care since they see many state plans.
PPLPMDL0020000001	Cleveland	OH	44124	3/8/2011	Quick call.... discussed the Butrans indication and the positioning. Also explained the 7 delivery delivery of buprenorphine. He asked me to leave literature. Left same. Discussed the enw oxycontin savings cards and new expiration date.
PPLPMDL0020000001	Cleveland	OH	44195	3/8/2011	i talked to Steve,Assistant Pharmacy Manager,about Butrans stocking and he said that he knows they have Butrans in stock as Curt,Pharmacy Manager ordered Butrans.Steve said he hasnt seen any scripts yet but thinks Butrans once weekly dosing and transdermal delivery are two benefits to patients.i asked if Steve would recommend Butrans if a patient was on a short-acting opioid and complaining of pain worsening and requesting a medication change? Steve said they will recommend medications occasionally to physicians,depending on the relationships with physicians and they do provide medication therapy management so he will keep Butrans in mind as an option for some patients.i recommended Senokot-5
PPLPMDL0020000001	Westlake	OH	44145	3/8/2011	Spoke with Angela and Danielle, MAs. Dr is out for the week for CE classes. They said they are reminding the Dr about Butrans and will continue to make a note for patients they think might be appropriate for Butrans. Angela did make a note for one patient, but they have not seen him. He is BWC and they are wondering if he went to another Dr. They said that the Dr will take their recommendations if they remind him about a new medication.

PPLPMDL0020000001	Cleveland	OH	44195	3/8/2011	worked Neurology dept-had to leave business card,Butrans fpi,initiation guide and patient information booklet for Dr.Kriegler,Dr.Mays,Dr.Stillman and Dr.Spears; Worked Center for Spine dept-left same information as above for Dr.Capulong and Dr.Zachary;worked tausig cancer center-left same information for Dr.Gutgsell,Dr.Pennell,Dr.Budd
	Cleveland	OH	44195	3/8/2011	worked pain management and physical medicine and rehabilitation dept-left information:Butrans fpi,initiation guide,patient information booklet,OxyContin fpi,OxyContin conversion guide,business card for each doctor in Pain management-dr.mekhal,dr.katyal,dr.vrooman,dr.cheng,dr.shin-all of them are at Pain Management symposium/conference in Florida until tomorrow;had to leave the same information for PM&R doctors:dr.hou,dr.reddy,dr.jedlicka and dr.schaeffer.
PPLPMDL0020000001	Lyndhurst	OH	44124	3/8/2011	Spoke with Erin Chlanda, pharmacist, about the indication/patient type for Butrans. She confirmed that she had received a script a few weeks ago. She could not recall the prescriber but the doc had written the script wrong (once a day vs. once weekly). She was able to call the office and have it corrected. No other scripts since then. I gave her an FPI and initiation guide and discussed the application and disposal process.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	3/8/2011	Talked to the pharmacist and told her about my lunch with the Pain Clinic. I mentioned that it went well and the doctors had several patients in mind and wanted to begin Butrans therapy. She said she would see if she could order a few of each strength.
	Cleveland	OH	44114	3/8/2011	I talked to Laura,Pharmacist,about what exactly she would tell patients about Butrans when they come to fill their scripts.Laura said she would give patients the Butrans patient information booklet,focusing on application of Butrans,sites where patients can apply Butrans and rotating Butrans every week and of course that this is a once weekly dosing.I asked Laura to remind patients of Butrans log book in back of Butrans patient information booklet,so that patients remember what time,location of Butrans application and then when they remove next week the patients know to apply Butrans to another site.Laura said that makes sense as thats important and she'll do that once she see's some Butrans scripts come through. I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44114	3/8/2011	I talked to Dave,Pharmacist,about Butrans stocking and he said once he see's a Butrans script he will order.we discussed importance of having Butrans in stock so patients dont have to wait 24hrs but dave said thats his policy with new medications,so I told Dave I would follow-up beginning of April as there are physicians in area,Dr.Katz,Dr.Shen that are prescribing Butrans.we discussed Butrans initiation guide and who's appropriate for Butrans,gave Dave Butrans initiation guide and we discussed Butrans patient savings cards.
PPLPMDL0020000001	Cleveland	OH	44114	3/8/2011	I talked to dr about patients she feels could benefit from Butrans,like the 1 patient she started on Butrans.dr said she likes that Butrans is transdermal delivery,a continuous baseline of buprenorphine and not all the up and down she see's with short-acting opioids.dr said she doesnt like percocet and doesnt really prescribe much,so when she has patients on Vicodin and they complain that their pain isnt controlled and are requesting something else,she's not happy to start them on percocet.dr said she likes that Butrans is an option now for her patients that are taking 3-4 Vicodin and she can give Butrans with some Vicodin for break through pain.dr said she will go to OxyContin as a long-acting opioid as she thinks it works and is a good option for some patients.we discussed 7 tablet strengths of OxyContin,insurance coverage and OxyContin patient savings cards.I asked dr to consider 2 new Butrans patients and 2 new OxyContin patients,based on our discussion.dr agreed.recommended
PPLPMDL0020000001	Westlake	OH	44145	3/8/2011	Quick call while talking with Juan his MA, Dr has not prescribed Butrans yet, but they do think it is good option for chronic pain patients before going to other long acting like OxyContin or Duragesic. Dr is leaving for Egypt and will be gone March 10th-29th. We discussed the Butrans savings cards and managed care.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	3/8/2011	Introduced Butrans and the FPI. Got through just the indication before Dr. Narouze left the lunch room.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	3/8/2011	Introduced Butrans and FPI. Dr. Nemeth committed to starting at least 1 patient by the end of the week on Butrans therapy. He identified an elderly patient who is currently not compliant and not taking their current meds
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	3/8/2011	Went back in to follow up with Larry after my lunch at the Pain Clinic. I mentioned that the doctors had identified several patients and were enthusiastic to get started.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	3/8/2011	Introduced Butrans and the FPI. Dr. Sable told me that most of his patients are already on opioids so he would be converting most patients. He was pleased to hear patients could still take break through medication while on Butrans. He committed to trying it on a commercially insured patient.
PPLPMDL0020000001	Highland Heights	OH	44143	3/8/2011	Window call....Reviewed the patient positioning of Butrans with doc. Asked what feedback he has gotten. He said he has been trying it and have not had complaints since the last time. I reminded him that BWC and commercial patients will have the best chance for success.
PPLPMDL0020000001	Cleveland	OH	44103	3/8/2011	I talked to Joe,owner of Shelia drug,about Butrans stocking and he said that yes he had Butrans in stock but hasnt seen any scripts come through.I gave Joe a Butrans fpi,initiation guide and Butrans patient information booklet.we discussed insurance coverage for Butrans when patients have Medicaid,workers comp and commercial plan coverage.
PPLPMDL0020000001	Independence	OH	44131	3/8/2011	Quick call with Dr Sundaram. He said he is still looking for the right patient for Butrans. He said he has not seen anyone for pain. I asked him what he typically prescribes for a patient who needs more than NSAID's or COX-2's to control their pain & he said Percocet or Tylenol with Codeine. I told him those are potential Butrans patients & asked him if he would prescribe Butrans if the patient was appropriate. He said that he will do so. He said he does want to prescribe it & has no reservations, but that he has only seen patients with acute pain (ie tooth ache) recently so he has not been able to use Butrans. I agreed that that would not be a Butrans patient. He assured me that he is thinking of Butrans & will write it as soon as he sees that patient. Gave him Senokot-S samples & recommended for medication-induced constipation. He asked how it is different from Senokot, so I discussed dual MOA & ingredients. He said he never realized that before & thanked me.
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	3/8/2011	Quick window call. Mentioned Butrans once a week and the indication. Left behind the initiation and titration guide and did a total office calls on the girls so they could answer questions if Dr. Azem had them.
PPLPMDL0020000001	Akron	OH	44310	3/8/2011	Spoke with Char about initiating Butrans therapy for low dose hydrocodone patients. As I was discussing the initiation and titration guide with her Dr. Cremer mentioned that most of the patients they treat are past the point of Butrans. Mentioned that for those patients OxyContin would be an option for patients requiring ATC analgesia.
PPLPMDL0020000001	Lyndhurst	OH	44124	3/8/2011	Spoke with doc about the Butrans 5 selling messages. He immediately started talking about the statics on drug abuse in Ohio and in this country. I discussed the positioning for opioid naive patients or those on low dose hydrocodone. He said he does not prescribe for more than 60 tabs/mo. I explained that Butrans can be written instead of starting patients on vicodin. He insisted hee does not treat chronic pain. I asked if he has any/one patient that could benefit from a once weely application of Butrans instead of starting or titrating on vicodin. He did say he could think of a particular patient. I asked him to try for just one patient. I discussed the 5mcg starting dose and that based on his limits that is where he would likely start any of his patients. I gave him an initiation guide to remind him. Also reminded him of the oxycontin positioning after Butrans.
PPLPMDL0020000001	South Euclid	OH	44121	3/8/2011	Spoke to Janet and other tech about the selling messages of Butrans. She asked what it compares to. I explained there is no other exact comparison. Told her it can be considered in place of vicodin. She confirmed that they just got a script yesterday and believes it was a BWC patient and thinks Yokiel was the prescriber. I reviewed the application and disposal process and the savings cards.
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	3/8/2011	Dr. Cyndi continues to "forget" to write Butrans. She has identified many low dose hydrocodone patients and committed to writing this time for those patients.
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	3/8/2011	Spoke with Dr. Roseanne about initiating Butrans therapy in place of hydrocodone. She mentioned she liked the concept but had gotten to write. She also said that she had patients that would be ideal for this product but it was just a matter of remembering to write.
PPLPMDL0020000001	Westlake	OH	44145	3/8/2011	I asked Dr if he could think of any other patients for Butrans other than the one construction worker. He said the problem is that most patients he sees with chronic pain are already on higher doses opioids and many are on OxyContin. I asked if he has patients taking 3 5mg vicodin per day. He does but said some of them are not chronic. I asked him to think of Butrans for the couple patients who are chronic pain and taking low dose vicodin.
PPLPMDL0020000001	Lyndhurst	OH	44124	3/8/2011	Quick call.....I discussed the butrans selling messages and where to position - for opioid naive (NSAIDS, APAP) or low dose hydrocodone. I discussed the 5mcg/hr starting dose. She asked about cost and coverage. I explained the commercial coverage and PA required for medicare/medicaid. Nothing learned.
PPLPMDL0020000001	Mayfield Hts	OH	44124	3/8/2011	Spoke to doc about the Butrans 5 selling messages. he asked if its covered on BWC. Confirmed that it was being covered. He thought it was a daily patch. I confirmed that its a once weekly patch. He asked how it compares to duragesic. I explained there is no head to head data, Butrans can be prescribed for opioid naive patients and is a 7 day system. He said he would prescribe for opioid naive patients. I reviewed the savings card program and the commercial coverage. Reminded him of the oxycontin patient type and formulary grid.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	3/8/2011	Spoke with pharmacist. I let him know that I had spoken with the Pain Clinic across the street and they sounded enthusiast about Butrans. I told him to consider ordering additional strengths since it sounded like most patients from the Pain Clinic would need to be started on the 10 mcg.
PPLPMDL0020000001	Munroe Falls	OH	44262	3/8/2011	Spoke with Dr. Kolacewski about the most ideal patients to initiate Butrans therapy when I asked of the types of patients she was thinking about she mentioned both opioid naive and low dose hydrocodone/percocet patients. I asked if I could come back at the same time next week and she said yes and that this would give her a chance to try it.
PPLPMDL0020000001	Cleveland	OH	44124	3/8/2011	Introduced doc to the Purdue portfolio - Oxycontin, ryzolt, and Butrans indications/patient types. She said she does not treat chronic pain. I asked her if she prescribes hydrocodone. She said rarely. I asked if she has patients taking NSAIDs daily. No answer. I explained the indication and positioning of Butrans. Asked he if she sees a place for a long acting CII. She said she leaves the pain drugs to pain management because abuse and addiction is such a problem. No commitment.
PPLPMDL0020000001	Independence	OH	44131	3/9/2011	Spoke briefly with Regina (pharmacist) who said she still was not going to stock Butrans until she sees a prescription. Reviewed indication & appropriate patients/positioning. Offered OxyContin savings cards, which she accepted. Reminded her they are for patients without insurance or those with commercial insurance plans & cannot be used for patients with any type of government insurance.
PPLPMDL0020000001	Brooklyn	OH	44144	3/9/2011	Dr Detwiler stopped for a quick call before going to a patient room. He said he has not yet prescribed Butrans. I asked him if, for one appropriate patient, he would write Butrans for a patient for whom he would normally prescribe Vicoden around-the-clock for a chronic condition. I reminded him that commercially insured patients who use a savings card (pointed to his stock of them in the sample closet), will pay around \$15 for a month. He said he would keep it in mind & ducked into the patient room.
PPLPMDL0020000001	Maple Heights	OH	44137	3/9/2011	Quick call with Kim to follow up on Butrans discussion. She said she recently did receive a prescription for Butrans but it was for a patient with Medicaid, so they are waiting to find out if the prior authorization will go through. I asked who wrote the prescription & Kim said it was Dr Lin from the Cleveland Clinic. Discussed positioning and appropriate patient type.
PPLPMDL0020000001	Cleveland	OH	44106	3/9/2011	I talked to dr about appropriate patients to start on Butrans,showed Butrans initiation guide,dr said he did have 1 patient in mind but Medicaid wouldnt approve Prior Authorization because patient hadnt tried 2 long-acting opioids.so I asked dr if he had a workers comp or commercial plan patient,to consider starting on Butrans?dr said yes,so we talked about insurance coverage for these plans. I talked to Juan,medical assistant,about Butrans initiation guide,patient information booklet/dvd and Butrans patient savings cards. dr is leaving for Egypt tomorrow and gone 4 two weeks so I asked dr to consider patients this afternoon to start on Butrans and get some clinical experience with the medication.dr agreed. I recommended Senokot-S for opioid induced constipation.
PPLPMDL0020000001	Brooklyn	OH	44144	3/9/2011	Dr Miguel asked if Butrans was "OxyContin in a patch". I told him it was not & then reviewed 5 core messages. He asked what type of patients he could prescribe it for. Discussed appropriate patients & positioning. Asked Dr Miguel if he would prescribe Butrans for a patient for whom he would normally prescribe Vicoden around-the-clock for a chronic condition. He said he liked this idea and now remembers that he really wanted to try Butrans on a patient. He said he liked the idea of possibly avoiding putting patients on Vicoden or Percocet.
PPLPMDL0020000001	Cleveland	OH	44104	3/9/2011	I talked to dr about appropriate patients for Butrans as dr started 1 patient on Butrans,showed initiation guide and asked dr to continue finding patients to start on Butrans,dr agreed and we discussed insurance coverage. I recommended Senokot-S
PPLPMDL0020000001	Independence	OH	44131	3/9/2011	Dr Jack apologized for still not writing Butrans. I asked him if it was reasonable enough for me to ask him to simply choose one of his appropriate patients to start on Butrans for whom he would normally start....(he finished my sentence by saying, "I know, instead of what I usually write.") I clarified by adding, "for a patient who you would normally start on Vicoden or Percocet around-the-clock for a chronic condition." He said he needs to do this & just has a habit of automatically going straight to Vicoden or Percocet. I told him I understand & that I am asking for only one of those patients. He said he does like the idea of getting someone on Butrans before Vicoden or Percocet so that they don't get into the mindset that they "need" a pill every few hours to help their pain. Also spoke with Maria & reminder her of savings cards for commercial insurance or cash-pay patients.

	Cleveland	OH	44106	3/9/2011	i talked to dr about Butrans fpi,initiation guide,patient information booklet and Butrans patient savings cards.dr said he is a fellow and when he finishes this year he'll probably be moving back to the Washington D.C.area but he thinks Butrans once weekly dosing and transdermal delivery are 2 benefits to patients.i showed dr Butrans initiation guide and we talked about patients he feels could benefit from Butrans and i asked dr to consider 1 or 2 patients to get started on Butrans and get some clinical experience.dr agreed and said he would try Butrans and see what patients say about the medication.i recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44106	3/9/2011	i talked to Steve,Pharmacy Manager,about Butrans stocking and he said they did have Butrans in stock.we discussed a few physicians prescribing Butrans and importance of stocking Butrans,Steve agreed and said he did order Butrans and they had it in stock.we talked about doctors at the clinic prescribing a lot of hydrocodone and oxycodone combos's and who i should talk to about Butrans.
PPLPMDL0020000001	Cleveland	OH	44103	3/9/2011	i talked to Dave,Pharmacy Manager,about Butrans stocking and importance of stocking Butrans so patients can get medication and not have to wait 24hrs.Dave didnt have a lot of time to talk but said he hasnt seen any scripts yet for butrans.i explained to Dave what i am telling my physicians about Butrans,showing Butrans initiation guide and discussed Butrans patient savings cards.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	3/9/2011	Introduced Butrans and FPI. Dr has many patients on low dose hydrocodone who have been taking it for 6 plus months. I asked if he would consider converting those patients to Butrans and explained that it was a long acting opioid and he agreed.
PPLPMDL0020000001	Fairlawn	OH	44333	3/9/2011	I have continued to work with Dr. Domdera to identify a specific patient. Although he seems to like the idea of Butrans and seems to understand where to initiate therapy he has still been hesitant to write his first
PPLPMDL0020000001	Cleveland	OH	44103	3/9/2011	i talked to dr about patients who are appropriate for Butrans,showed initiation guide and patient information booklet.dr said he has a few patients in mind that are taking short-acting opioids around the clock and pain isnt controlled,i told dr that was perfect and could he think of 2 patients to start on Butrans? dr said yes,so i told him to let me know how patients respond to Butrans and i would see him next week.i recommended Senokot-5
PPLPMDL0020000001	Fairlawn	OH	44333	3/9/2011	Spoke with pharmacist who gave me a brief moment to review Butrans. Since she was clearly rushed I just went over the indication and once a week dosing. I left some info and said I would stop back in 2 weeks.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	3/9/2011	Reintroduced Butrans and tried to focus on a more specific type of patient. I asked about his hydrocodone patients and he told me most patients are on lower doses. When I said those were the exact types of patients that can benefit from Butrans it seemed to resignate.
PPLPMDL0020000001	Copley	OH	44321	3/9/2011	Dr. Machado said he does not feel comfortable prescribing Butrans because he does not like buprenorphine. He said he will continue to prescribe OxyContin.
PPLPMDL0020000001	Maple Heights	OH	44137	3/9/2011	Spoke with Andy to follow up on Butrans. He said that he has not seen any prescriptions at this location but has recently seen one at the location at Clark & Fulton. He said they are awaiting approval from managed care (he said he thought it was a Medicare Part D plan). Discussed patient counsel & went over patient information booklets. He said he will keep an eye out for more prescription activity and will keep me posted. He mentioned Dr Moufawad again & I let him know I am working with him.
PPLPMDL0020000001	Independence	OH	44131	3/9/2011	Quick call with Dr Rob- he said he has not prescribed Butrans. I asked how many new prescriptions for Vicoden or Percocet he writes for chronic conditions. He said many. I asked him if he would instead prescribe Butrans for one of those patients this week. Reminded him of seven days buprenorphine delivery in one application. He said he would keep it in mind & walked into a patient room.
	Cleveland	OH	44106	3/9/2011	i talked to dr about patients he's started on Butrans recently.dr said he started 1 patient on Butrans that was taking a couple Percocet a day but not as he prescribed and patients pain wasnt controlled so dr thought Butrans would be a good option.another patient he wanted to start on Butrans couldnt get approval through medicaid because patient hadnt tried 2 long-acting opioids first,so that was denied.i asked dr how Butrans was a benefit to his patients? dr said he likes that Butrans is a patch and that is better in his eyes than pills around the clock,for chronic pain patients.i asked dr if Butrans being a CII medication was important? dr said no,he didnt care about patients like the one's he has started recently.dr agreed.i recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44106	3/9/2011	worked pain management dept-see call notes on Dr Ali(fellow).Dr. Sahgal,Dr. Khalil and found out 3 other fellows who i need to add to phoenix and be sure to give all of the Butrans information to them.i found out Dr.Baig,Physical medicine&rehabilitation, is in Hanna House and his medical secretary is Jennifer(same woman who takes care of Dr.Sahgal's schedule)worked pharmacy-in-patient-see call note there.
PPLPMDL0020000001	Cleveland	OH	44106	3/9/2011	i talked to Cheryl Woods,Narcotics Buyer,about Butrans and the medication management committee decision if Butrans will be approved for formulary in the hospital at university hospitals.Cheryl said she missed the meeting this morning but Wes,Clinical Pharmacist,did attend and would know if it was approved or not.i told Cheryl i had lunch with Pain Management today and that Dr.Sahgal has already started a couple patients on Butrans.Cheryl was surprised but said she thinks its a great option for patients with chronic pain and said instead of these patients taking short-acting opioids around the clock and complaining of pain worsening,she thinks Butrans could be used there. Cheryl told me to call Wes and ask about P&T/Medication Management committee decision on Butrans.i gave Cheryl certified medical education catalog and showed pharmacy section that she might find valuable.Cheryl liked that there were a lot of courses to choose from in the catalog.
PPLPMDL0020000001	Westlake	OH	44145	3/9/2011	I gave the Dr the Butrans REMS folder and some extra REMS for him to take to the upcoming formulary meeting. He said he will probably just put a restriction for pain management only to be able to prescribe Butrans in the hospital. He said he has gotten good feedback from both patients on Butrans and he will continue to prescribe. The patient is on 10mcg and was on 75mcg of duragesic before. He will probably titrate this patient to 15mcg of Butrans and then 20mcg if need be. I let him know that it is off label for a patient to wear 2 patches, he said he would prefer to titrate more slowly.
PPLPMDL0020000001	Euclid	OH	44119	3/9/2011	Discussed the 5 selling messages of Butrans. Explained how to initiate and titrate. She was concerned about the coverage - medicare/medicaid. I explained the PA requirement. Also discussed the commercial coverage and savings card program. She stated that govt funded patients would be the more ideal candidates for Butrans.
PPLPMDL0020000001	Bedford	OH	44146	3/9/2011	Met with John Solomon (interim pharmacy manager) & Andy Bragalone (permanent pharmacy manager) to discuss Butrans. Reviewed 5 core messages & black box warning. Andy said he was familiar with buprenorphine in injectable form. John & Andy explained that their formulary is dependent on UH Main Campus's formulary. They said it is "virtually impossible" to get a product on formulary at Bedford if it is not on formulary at Main Campus. They also said that UH's main formulary is largely based on the opinions of Case Western Reserve University physicians & if those physicians recommend a medication, it is likely to get on formulary. I asked how frequently they review medications & he Andy said they review them regularly, approximately once a month. Also reviewed OxyContin hospital unit dosing availability for all seven tablet strengths, including intermediate doses. Andy said they have some doses at the hospital & will likely not add other strengths due to limited space.
PPLPMDL0020000001	Cleveland	OH	44121	3/9/2011	Window call.....reminded doc of the Butrans patient type and 5 selling messages. Asked him to give a savings card with each script. Nothing learned. Oxycontin reminder.
PPLPMDL0020000001	Parma	OH	44134	3/9/2011	Dr Hernandez said he hasn't found the right patient for Butrans yet but that because he's so familiar & fond of the molecule, he really is looking forward to starting someone on it. I asked him specifically the kind of patient he's looking for & he said someone who doesn't like to take oral medication for pain or someone who is not happy with their medication. I asked him if he ever starts a new patient on Vicoden (ie patients who are taking high doses of NSAID's or COX-2's) for a chronic condition & he said yes. I told him those are potential Butrans patients. I asked him his thoughts on starting those patients on Butrans instead of Vicoden. He said he felt this was a good idea so patients didn't get into the mindset that they "need" to take a pill every few hours to control their pain. Discussed managed care, including BWC as well as savings cards for commercially insured patients or cash-pay. Reviewed OxyContin FPI 2.2 & let him know Butrans & OxyContin shouldn't be used together
PPLPMDL0020000001	Bedford	OH	44146	3/9/2011	Dr Moufawad said that he has started 5-6 patients on Butrans during the last two weeks. He said they have been BWC patients & that he is pleased to see that he has not gotten any call-backs with regard to coverage or cost. He said he has not heard feedback from the patients yet about how effective it has been at pain control, but he said he would continue prescribing Butrans in the mean time. He asked how to treat breakthrough pain if they have it so i reviewed FPI 2.4 & told him that in our studies patients were given ibuprofen or acetaminophen for breakthrough. I asked what patient types he has given Butrans to so far & he said patients taking 3-4 Vicoden per day. Reminded him of taper for patients on 30-80mg equivalent morphine per day. I asked him if he would also consider Butrans for patients not yet on an opioid who have chronic conditions causing pain (ie patients taking high doses of NSAID/COX-2 & not getting enough analgesia). He said he would consider this at the 5mcg dose
PPLPMDL0020000001	Euclid	OH	44119	3/9/2011	Discussed the 5 Butrans selling messages. Doc said he would more likely use Butrans for opioid naive or low dose short acting because he would not want to taper patients down. He asked about the abuse potential. I explained that it still has the risks and warnings similar to other opioids. He thinks it would be good for the elderly population. I reviewed the coverage and the savings cards. He asked about the reformulation of oxycodone and if it is now tamper proof. I explained the purpose of the reformulation but there is no evidence of such. Reminded him of the ryzolt indication and patient type.
PPLPMDL0020000001	Shaker Heights	OH	44122	3/9/2011	Spoke with Stephanie (MA) as Dr Zivic was unable to see me today. Introduced Butrans, indication, dosing, seven days buprenorphine delivery in one application, CII. She asked how it compares to fentanyl- I told her we have no comparative data & let her know that patients on fentanyl were excluded from our studies & asked her to think of the more "moderate" side of the scale considering the dosage strengths of Butrans available. She asked me to schedule a lunch to discuss details with Dr Zivic, so i scheduled next available appointment. She said she felt Butrans sounded like something that Dr Zivic would be able to use in his practice for a variety of types of patients as well as in nursing homes because he sees so many patients with chronic pain issues. Discussed managed care & reviewed savings cards for patients with commercial insurance or cash-pay & reminded her they could not be used for Medicaid or Medicare patients.
PPLPMDL0020000001	Solon	OH	44139	3/10/2011	Spoke with Dr Zaidi's nurse, Julie who said that Dr Zaidi has not prescribed Butrans yet as far as she knows. She said that he would not be able to see me today because they are having a busier-than-usual day & are short-staffed. Reminded Julie of managed care & savings cards for Butrans and reviewed appropriate patient type/positioning, indication, & dosing. She asked me to stop back next Tuesday to try to catch Dr Zaidi.
PPLPMDL0020000001	Akron	OH	44333	3/10/2011	Quick window call. Asked Dr Fouad who initiated Butrans therapy to and he said he had not tried it before walking away.
PPLPMDL0020000001	Cleveland	OH	44113	3/10/2011	i talked to dr about appropriate patients for Butrans and after discussing where Butrans fits into doctors practice,dr said he really doesnt have many patients who have NEVER tried an opioid and are only taking a NSAID or COX-II inhibitor so he wants to start majority of his patients that are taking opioids on Butrans.dr said he would much rather prescribe Butrans than re-fill patients Vicodin or Percocet.dr said he likes that this is a transdermal delivery medication and dosed once a week is a benefit to his patients instead of pills around the clock.dr asked about BWC,workers compensation,coverage as he couldnt remember if Butrans was easily getting covered.i told dr Butrans is going through on workers comp.dr asked about commercial plan patients coverage for Butrans so we discussed Butrans patient savings cards again and dr said he liked the patient savings card, thought it was easy for patients and would start a few patients on Butrans.i told dr he has option of OxyContin when
PPLPMDL0020000001	Cleveland	OH	44113	3/10/2011	i talked to dr about appropriate patients he would consider to start on Butrans as dr said he hadnt tried Butrans yet.i asked how Butrans could benefit doctors patients? dr said once weekly dosing and transdermal delivery are two benefits he sees instead of pills around the clock.i asked dr if he had a commercial plan patient thats come to him complaining of pain worsening,while taking short-acting opioid,and requesting a medication change? dr said yes.i told dr thats the Butrans patient and asked him to just try Butrans in 1 patient,dr agreed.we discussed Butrans patient savings cards and i recommended Senokot-5
PPLPMDL0020000001	Parma	OH	44129	3/10/2011	Spoke with Sheila (MA) & reminded her of Butrans. Reviewed indication, dosing, appropriate patient/positioning. She said she doesn't think Dr Kushnar has prescribed Butrans yet. She said she does think that Dr Kushnar has patients who meet the indication. I scheduled a lunch & left my card & an initiation guide for Dr Kushnar.
PPLPMDL0020000001	Cleveland	OH	44113	3/10/2011	worked orthopedic dept-dr bohl and dr berkowitz-see call notes on both of them. worked pain management/physical medicine&rehabilitation dept-saw Dr.Shen and Dale Novak-PA - see call notes
PPLPMDL0020000001	Beachwood	OH	44122	3/10/2011	Spoke with Alan who told me they are now stocking 2 boxes of both the 5mcg & 10mcg strengths of Butrans. He said he has dispensed approximately 5 prescriptions so far. I asked if he has heard anything from any of the patients but he said he has not yet. I asked if he could tell me who wrote the prescriptions, but he said that their system does not allow them to see the doctor who wrote the prescription & that is all done through main campus. He said that it was "local" physicians. I asked if he meant just in that building or in the outside area as well but he did not really clarify. He said he would let me know if he hears feedback or finds anything out about Butrans activity.OxyContin savings card reminder.
PPLPMDL0020000001	Solon	OH	44139	3/10/2011	Spoke briefly with Nate who said they do not have Butrans stocked & will not order it until a prescription comes through. Reviewed indication, positioning, & dosing & encouraged him to order now so that they have it available when a customer comes in with a prescription. Presented new OxyContin savings cards & reminded him they could not be used for any type of government insurance.
PPLPMDL0020000001	Cleveland	OH	44102	3/10/2011	i talked to Brian,Pharmacy Technician and Vince,Pharmacist,about Butrans stocking and Vince said he was waiting for 1st Butrans script to come through pharmacy.we discussed importance of having medication in stock so patients werent in pain and waiting for 24 hours,Vince agreed and said he'll consider that point.we talked about hydrocodone and oxycodone writers in area and discussed Butrans initiation guide and who's appropriate and not appropriate for Butrans.i recommended Senokot-5
PPLPMDL0020000001					

PPLPMDL0020000001	Berea	OH	44017	3/10/2011	Spoke with Adam, he has not seen any Butrans scripts, we discussed the medication guide and how to instruct the patients on proper use and application. We reviewed OxyContin as an option when Butrans may not provide adequate analgesia. Reminder about Ryzolt as a once a day option and asked him to recommend Senokot S with opioids.
PPLPMDL0020000001	Copley	OH	44321	3/10/2011	Quick call through window. Asked Dr. Heim if he has had the opportunity to read over the Butrans info that I had left. He said he looked it over and I was able to quickly go over the indication nd once a week dosing.
PPLPMDL0020000001	Berea	OH	44017	3/10/2011	I asked Dr what type of patient does he see himself prescribing Butrans for and he said he didn't know but he will keep it in mind and then went into a patient room.
	Cleveland	OH	44113	3/10/2011	I talked to dr about patients he has in mind to start on Butrans and dr said he's thinking of patients taking short-acting hydrocodone, 4tabs a day and instead of increasing their pills per day,he wants to try Butrans there as a baseline but he hasn't seen anyone like that this week.I asked dr if 1 patient called today,or he see's today,and asks for a different medication,would he consider Butrans? dr said yes so I told dr i would follow-up next week and see how that discussion went with 1 patient. I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	3/10/2011	I talked to dale,PA,about patients he feels are appropriate to start on Butrans.patients who are currently taking opioids,a couple vicodin or percocet a day and complaining of pain worsening,we looked at Butrans initiation guide and I asked Dale to continue thinking of patients to start on Butrans. we discussed insurance coverage too.I recommended Senokot-S
PPLPMDL0020000001	Westlake	OH	44145	3/10/2011	Quick call, I asked where he sees Butrans fitting into his practice. He said he did not know yet, but agreed again to try Butrans. I asked what type of patient he thinks he will try it in, he said before going to other long acting like duragesic.
PPLPMDL0020000001	Barberton	OH	44203	3/10/2011	Spoke with Dr. Patel over lunch and really had the opportunity to discuss specific patient types. Dr. Patel said he sees at least 20 patients a month who are on low dose hydrocodone. He said he would start converting some of those patients.
PPLPMDL0020000001	Beachwood	OH	44122	3/10/2011	Spoke with Shelly who had called to ask me if a carton of Butrans could be split as Dr Segal wrote a "2 patch" prescription for a patient to try Butrans. She had said that in her system she got a message stating that they are "unbreakable packages" & she wanted to know if that was something set forth by Purdue or Rite Aid. I let her know that it was not a policy of Purdue, so it must be a Rite Aid system add-on. She said she will try to override it or may call the doctor back to see if he would mind changing the Rx to a full carton. She said she would let me know if she was able to override it so that I can pass the information along to other Rite Aid pharmacists if it comes up again.
PPLPMDL0020000001	Akron	OH	44320	3/10/2011	Spoke with pharmacist to see if there have been any Butrans requests. He said he has not heard anything and was going to try and get the 5's ordered.
PPLPMDL0020000001	Cleveland	OH	44113	3/10/2011	I talked to dr about the couple patients she started on Butrans and asked dr to continue thinking of Butrans for her patients currently taking opioids that are complaining of pain worsening and requesting a different medication, dr said thats where she thinks its the easiest to try Butrans and said she's continuing to think of patients for Butrans.I showed Butrans initiation guide, patient information booklet with DVD and we discussed formulary coverage for workers comp and commercial plan patients using Butrans patient savings cards.I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	3/10/2011	I asked dr if he started any patients on Butrans yet? dr said he has a few patients in mind for Butrans but he couldnt remember the insurance coverage for Butrans,so we discussed BWC,workers comp insurance,dr took Butrans initiation guide,we looked at opioid experienced section and I asked dr who were the patients he had in mind for Butrans? dr said these are patients taking Vicodin,3-4 tabs a day,that he feels Butrans would be an appropriate option for dr said 5 tabs a day of Vicodin is his max,after that he sends patients to pain management as he doesnt want to deal with patients at that point.I asked dr to think of a few patients like that with workers comp or commercial insurance and we discussed Butrans patient savings cards for those commercial plan patients. we also discussed Butrans REMS program.I recommended Senokot-S
PPLPMDL0020000001	Brooklyn	OH	44144	3/11/2011	Spoke with David who said he has not seen any Butrans movement yet. Discussed where we are positioning Butrans & he said he thinks that once physicians start writing it & getting out of writing Vicoden and other short-acting medications around-the-clock that Butrans could do very well. Reviewed appropriate patients, dosing, and manged care coverage as well as e-voucher. David was happy to hear that it was part of the e-voucher system & said \$15 is very reasonable. Discussed importance of patients applying system correctly & reviewed the process with him. He asked about disposal, so I reviewed that with him as well & gave him patient information booklets. Also gave him new OxyContin savings cards & reviewed appropriate patients & reminded him they cannot be used for patients with any type of government insurance.
PPLPMDL0020000001	Cleveland	OH	44111	3/11/2011	Quick call with Barbara, Dr Giris is on vacation this week. She did not think that the Drs have prescribes Butrans yet, but she thinks it will be a good option for some patients. I asked what she sees the benefit being, she said patients would be able to get a baseline control of their pain and a CIII is convenient. She agreed to help remind the Drs when they see an appropriate patient.<font color=blue>b<b>CHUDAKOB's query on 03/17/2011</b></font>Who is Barbara?<font color=green>b<b>HOLUBA's response on 03/21/2011</b></font>Barbara Maline, PA<font color=blue>b<b>CHUDAKOB added notes on 03/21/2011</b></font>OK. Thanks!
PPLPMDL0020000001	Cleveland	OH	44103	3/11/2011	dr said she hasnt started anyone on Butrans yet as patients haven't wanted to get off their pills.I told dr those are NOT the patients she wants to talk to about Butrans.dr asked me to explain appropriate patients for Butrans,so we looked at Butrans initiation guide and discussed who she feels could benefit from Butrans.I asked dr to think of a commercial plan patient,as thats the easiest,with no Prior Authorization required,who's asking dr for a medication change and the short-acting opioid is NOT controlling the pain and a long-acting opioid is appropriate,thats the Butrans patient.dr said ok made sense and she would think of patients next week.I recommended
PPLPMDL0020000001	akron	OH	44304	3/11/2011	Introduced Butrans and FPI. Discussed appropriate patient types. Dr. Bullock thought this was a great option for patients who have been on Vicodin and percocet for a long period time. He very much understood what the appropriate patient type for Butrans was.
PPLPMDL0020000001	Parma	OH	44129	3/11/2011	Spoke with Anita (MA) who said that Dr Gallagher canceled office hours today due to being snowed in. She also told me Lynn (nurse & appointment scheduler) would be out until mid-April. I asked how to get a follow-up appointment to continue our Butrans discussion & Anita said she would give my information to Dr Gallagher & they will call me to schedule something. Remind her of Butrans indication, appropriate patients, dosing, & savings cards.
PPLPMDL0020000001	Cleveland	OH	44109	3/11/2011	I talked to dr about appropriate patients to start on Butrans,looking at Butrans initiation guide,dr said he has a lot of patients on Vicodin and when they call in sooner than the 31st day of the month,asking for re-fills,that makes him question if Vicodin is even controlling the pain so he would consider a long-acting opioid for them at that point.I asked if dr could think of 1 patient like that,with commercial insurance to use Butrans patient savings card? dr said he would try and to keep reminding him about Butrans.I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	3/11/2011	I asked dr if he has started any patients on Butrans? dr said no he hasnt thought about it and couldnt remember insurance coverage and asked about workers comp and commercial plan insurance coverage for Butrans. we discussed both plans and I asked dr who is the patient dr is considering to start on Butrans? dr said he's not sure and asked who was the appropriate patient again for Butrans? I showed dr Butrans initiation guide and we discussed patients currently taking opioids,but perhaps telling the dr they arent happy with current medication and want something else.dr said he does hear that from patients who take tramadol and vicodin.I told dr if they are appropriate,looking at Butrans initiation guide,and thats what he's hearing,he has the option of starting them on Butrans. I asked dr if he could think of 1 workers comp or commercial plan patient like this today? dr said he'll keep this in mind as he see's patients and will try Butrans in 1 patient.I told dr I would follow-up monday
PPLPMDL0020000001	Cleveland	OH	44109	3/11/2011	I talked to dr about Butrans initiation guide and appropriate patients he would consider for Butrans.dr said he wont do prior authorizations so its hard as the majority of his patients are Medicaid.I asked dr what patient comes to mind that dr would even consider Butrans? dr said someone taking a couple Vicodin or Percocet a day but complaining of pain worsening and wanting more pills,he would think of Butrans for that patient.I told dr thats the appropriate patient,looking at the opioid experienced dosing section in Butrans initiation guide and asked if he could think of that patient but with workers comp or commercial plan insurance.dr said he does have those patients and he would consider Butrans for them.we discussed Butrans patient savings cards and I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	3/11/2011	I talked to dr about appropriate patients dr would consider to start on Butrans,looking at Butrans initiation guide.dr said patients taking a couple Percocet a day and telling him they take it as needed and not following his directions,thats where he's thinking Butrans could work for some of his patients.I asked dr if he'll see any patients today,with workers comp or commercial plan insurance,that he can start on Butrans? dr said he'll keep Butrans in mind today as he see's a couple patients a day who are like this.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44144	3/11/2011	Reminded Dr Paul of our previous Butrans discussion. She said that she has noticed that she has had to learn more about pain management lately as pain management specialists seem to bounce patients back to their primary care physician for maintenance. Dr Paul asked if Butrans could be used in nursing homes. Reviewed use in geriatrics & discussed managed care. She said she was unlikely to do a prior authorization, especially since tramadol & Percocet require no additional paperwork to get approved. Reviewed appropriate patient type. Dr Paul said she does think Butrans sounds like a good option for some patients. She said she would like to have fewer patients on around-the-clock oral pain medications & that she would consider Butrans for appropriate commercially insured patients. Reviewed savings cards with her.
PPLPMDL0020000001	Macedonia	OH	44056	3/11/2011	Spoke briefly with floater pharmacist. Discussed Butrans indication, dosing, appropriate patients/positioning. She said she had heard of Butrans at a different store but has not dispensed any. She confirmed that this location is still stocked with Butrans.
PPLPMDL0020000001	Brooklyn	OH	44144	3/11/2011	Dr Hilton asked how Butrans compares with Percocet & fentanyl. Both times I reminded her that we had no comparative data. I showed initiation guide pg 6 & let her know that patients on fentanyl were excluded from our studies. Also reviewed recommended initiating doses for Butrans based on current opioid therapy. She asked about cost & coverage. I reviewed managed care, including prior authorization for Medicare Part D & Medicaid plans. Also reviewed savings cards. Also discussed OxyContin as an option for patients taking more than 80mg equivalent of morphine per day. She said several times that she does not like to prescribe narcotics. I told her I understood & that she is right in being cautious. I asked if they use OARRS but she said they do not. I recommended it as a tool to protect her & her practice & to help her access appropriate patients. She was uninterested in Doc said she still has not had an appropriate patient for Butrans before I could ask. I asked her what kind of patient that might be. She said someone with commercial insurance and maybe just taking a couple of tabs of short acting meds. Told her that was the ideal patient type. I reviewed the initiation dose and reminded of savings cards.
PPLPMDL0020000001	Lyndhurst	OH	44124	3/11/2011	Followed up with Dr Tabbaa on our Butrans discussion. He said that he prescribed Butrans for 3-4 more patients just today but was not sure what insurance they had so he said he did not know if they would go through. He also asked what pharmacies are stocked. I reviewed several local pharmacies with confirmed stocking with him. Also reminded him of savings cards for appropriate patients. I asked what types of patients he has been using Butrans for. He said that one was a male patient who is a lawyer who did not want to be on oral pain medication around-the-clock. He said this patient was "afraid" to be on something like Vicoden. Reminded Dr Tabbaa that Butrans is still an opioid & alerted him to box warning. He said he knows that but he felt that Butrans was the best thing for this patient. He said that he carefully assesses each patient & then prescribes for them what he believes they will be most successful on. Discussed taper where appropriate.OxyContin savings cards reminder.
PPLPMDL0020000001	Mayfield Heights	OH	44124	3/11/2011	I reviewed the butrans indication with doc. Asked him if he had any questions on who the appropriate patient would be. He asked if Butrans is CII or CIII. I told him CIII and that scripts can be called in and refilled. He did not have any other questions. I asked him 2 scrips of Butrans. I reminded him of the oxycontin patient type.
PPLPMDL0020000001	Akron	OH	44304	3/11/2011	Had lunch with Dr. Snucker et al. at Akron City Hospital.
PPLPMDL0020000001	Cleveland	OH	44130	3/11/2011	I asked Dr Diab what the difference, in his mind, was between a "Butrans patient" & a "Vicoden patient". Dr Diab said "giving a patient a long acting way to treat their pain." As he started to walk away he paused & added, "with a narcotic." and then walked into a patient room.
PPLPMDL0020000001	Akron	OH	44304	3/11/2011	Introduced Butrans and the FPI. Focused on patient type and 7 day dosing. She said that 95% of her patients are Medicaid but she does see a small percent of patients who have Summa. She promised to keep it in mind for that population of her practice.
PPLPMDL0020000001	Cleveland	OH	44109	3/11/2011	I talked to dr about 1 patient to start on Butrans,looking at Butrans initiation guide,opioid experienced section,as dr said he now has a clearer picture of who the Butrans patient is after our discussion on Monday at lunch.dr said the 1 patient he had in mind thats taking 30mg oral morphine hasnt come to see him yet so he hasnt started anyone this week.I asked dr if he had patients asking,daily,for a medication change? dr said yes they ask him or nurses.I told dr if patients are appropriate,based on Butrans initiation guide,and they have workers comp or commercial plan insurance,thats who he can consider for Butrans.dr said okay and would think of that today.I recommended Senokot-S
PPLPMDL0020000001	akron	OH	44304	3/11/2011	Introduced and discussed Butrans and FPI. Dr. said that he has many patients who could benefit from a LA therapy and liked that it was applied just once a week. He had a large percent of Summa patients which means patients can get it at an affordable cost. He thought the saving cards that I left for the group would be helpful.

PPLPMDL0020000001	Mayfield Hts	OH	44124	3/11/2011	Window call.....I asked doc what success he has had with Butrans. He said he tried it a couple of times and has had no complaints. I asked him for 2 more scripts. He agreed.
PPLPMDL0020000001	Fairlawn	OH	44333	3/11/2011	Dr. came to the window as I was chatting with the girls up front about Butrans therapy. I asked him if had tried it yet and he said no. I thanked him for OxyContin support as he walked away.
PPLPMDL0020000001	Cleveland	OH	44135	3/11/2011	Spoke with Megan, we reviewed Butrans medication guide. We discussed that she may need to help instruct the patients on proper use. Reminder about OxyContin as an option when Butrans may not provide adequate analgesia. She said they have cut way down on the amount of OxyContin they dispense since the reformulation. Reminder about Ryolt as a once a day option and asked her to recommend Senokot S with opioids.
PPLPMDL0020000001	Cleveland	OH	44109	3/11/2011	worked physical medicine&rehabilitation dept-see call notes
PPLPMDL0020000001	Cleveland	OH	44109	3/11/2011	worked geriatric dept-see call notes on two physicians and NP
PPLPMDL0020000001	Lyndhurst	OH	44124	3/11/2011	Quick call.....reviewed the Butrans indication, CIII, dosing, and 7 day delivery. Asked her to prescribe for a commercially insured patient. She said she would try.
PPLPMDL0020000001	Lakewood	OH	44107	3/11/2011	Quick reminder as Dr was on his way out to the hospital. He said he will give Butrans a try.
PPLPMDL0020000001	Westlake	OH	44145	3/11/2011	Quick call at window, I asked if she had had tried Butrans in her pancreatitis patient. She had not yet, but will keep it in mind. I asked her to try just two patients this upcoming week on Butrans.
PPLPMDL0020000001	Valley View	OH	44125	3/11/2011	Introduced myself & Purdue's products to Deb (MA). She said that Ann White (Office Manager) would be the best person for me to talk to about information about scheduling an appointment to see Dr Singer. She also said they have a physician's assistant, Zena Becker. Deb also went through office hours with me (Tues & Thurs are best days) & gave me Ann's phone number so that I could schedule.
PPLPMDL0020000001	Cleveland	OH	44109	3/11/2011	I talked to Mary Jo, NP, about patients who are appropriate for Butrans looking at Butrans initiation guide. Mary Jo said she liked that Butrans was transdermal and dosed once weekly but she forgot about it and has started any patients yet. I asked Mary Jo to consider 2 patients on short-acting opioids that are asking for a medication change and she feels Butrans would be a great option. Mary Jo said she'll do that. we discussed Butrans patient savings cards and commercial plan insurance.
PPLPMDL0020000001	Akron	OH	44304	3/11/2011	Followed up from our last conversation and asked if he had considered writing Butrans before his "2 year" mark. He said that while Butrans seems like it is a good med he will never write a drug unless it has been available for at least 2 years. He also said that he would not discourage the other physicians or residents from writing it.
PPLPMDL0020000001	Lyndhurst	OH	44124	3/11/2011	Quick call.....reminded her of the Butrans indication and the 7 day delivery of Buprenorphine. Gave her an initiation guide and explained most patients will start on the 5mcg. Also reminded of the saving cards
PPLPMDL0020000001	Mayfield Heights	OH	44124	3/11/2011	Spoke to Jessica about the recent launch of Butrans. I discussed the indication and the 7 day delivery in a CIII. She confirmed that they have 5 and 10mcg but she has not seen any scripts for it. She just came from a store in Georgia so she might have missed it. I explained the savings cards, evoucher program and the application/disposal process. Gave FPI and patient information guide.
PPLPMDL0020000001	Akron	OH	44304	3/11/2011	Introduces Butrans and FPI. Discussed titration and patient type. Dr. said he had many patients that would benefit from a LA therapy like Butrans and took a full box of savings cards. Because of his large Medicaid population I reminded him to focus on his SummaCare patients. He agreed.
PPLPMDL0020000001	Mayfield Heights	OH	44124	3/11/2011	Spoke to Giovanni about the stocking of Butrans. He confirmed that they have the 5 and 10mcg but no scripts so far. He asked who was writing for Butrans. I explained that Hillcrest Pain mgmt has prescribed a few scripts. He asked about the most common dose. I told him 5mcg likely and explained the positioning, initiation and titration. He asked about how oxycontin is doing as he has not seen as many scripts lately. Noticeably, Dr. Price has not written as many. Told him that things are steady with oxycontin after some initial transition since the reformulation.
PPLPMDL0020000001	Cleveland	OH	44109	3/11/2011	I asked dr if he started any patients on Butrans yet? dr said no he hasn't thought about Butrans. I showed dr Butrans initiation guide and we discussed patients currently taking opioids that dr thinks Butrans could benefit dr said once weekly dosing and transdermal delivery are 2 benefits in his eyes, but he has a lot of medicare and medicare's not covering Butrans, we discussed commercial plan patients and workers comp patients to try Ryolt. I asked if dr could think of 1 patient with workers comp or commercial insurance that is currently taking a short-acting opioid but asking dr for something different as the current short-acting opioid isnt controlling pain? dr agreed. recommended Senokot-5. font color=blue<b>CHUDAKOB's query on 03/16/2011</b><b>font>Amy, if your physicians has tried Butrans they will usually tell you. By you asking this question, you may be "stealing their thunder". If they have prescribed, they want to tell you. Perhaps thinking of another way to open the call may get you into better conversations. Your thoughts?<font color=green>b>BROOKAM's response on 03/21/2011</b><b>font>maybe, i dont know depends on doctor, he is NOT the friendliest/conversationalist with reps and likes you to be brief&quick so it worked with him. I could say dr what do you re-call about Butrans or our discussion on patients that could benefit from Butrans?<font color=blue>b>CHUDAKOB added notes on 03/21/2011</b><b>font>That sounds much better.
PPLPMDL0020000001	Lakewood	OH	44107	3/11/2011	We discussed the dosing, indication and initiation guide for Butrans. Dr said most of his patients are taking more than 80mg of oral morphine equivalent and are on OxyContin. We discussed his new patients who are taking 4 5mg vicodin per day. He said he does see a benefit of the 7 day dosing. He said he would try Butrans before treating the vicodin. He agreed to try Butrans for that patient on 4 vicodin per day and are not well controlled. We reviewed OxyContin as a Q12hr option when patients are on 80mg of oral morphine equivalent per day. Reminder to recommend Senokot S with opioids.<font color=blue>b>CHUDAKOB's query on 03/17/2011</b><b>font>I am guessing the answer to your next call objective questions is "yes". You have to get much more patient specific before he sees a place for Butrans in his practice.<font color=green>b>HOLUBA's response on 03/21/2011</b><b>font>Thanks I will ask more specific questions. I need to ask for a patient taking 4 5mg vicodin per day and are not well controlled. Ask him to add Butrans instead of increasing the dose of vicodin.<font color=blue>b>CHUDAKOB added notes on 03/21/2011</b><b>font>The more specific the patient type, the better the physician will see where to fit Butrans in his practice.
PPLPMDL0020000001	Akron	OH	44304	3/11/2011	Introduced Butrans and FPI. Focused on patient types. She liked the concept of the 7 day dosing but was concerned about her large Medicaid population. I discussed our coverage on Summa and explained the benefit of the copay cards.
PPLPMDL0020000001	Cleveland	OH	44109	3/11/2011	I asked dr to explain to me what it sounds like when a patient asks for a medication refill. dr explained that conversation to me and said she usually will just tell nurses to refill the script, unless patients pain has increased and she thinks short-acting opioids not working, then she'll consider a long-acting opioid. I asked dr to consider 1 patient like this that she can start on Butrans, workers comp or commercial plan insurance. dr agreed and I said I would follow-up Monday to see if she started anyone today. recommended Senokot-5
PPLPMDL0020000001	FAIRVIEW PARK	OH	44126	3/11/2011	Spoke with Tom, he had not ordered Butrans yet. He agreed to order the 5 and 10mcg doses. We reviewed the rebate program and expiration date, he said he would order right away to get the rebate in on time. I gave him extra medication guides, we discussed applying the Butrans patch. He said he does have a lot of patients on vicodin around the clock. We reviewed the invitation guide for Butrans and that OxyContin would be a long acting option for patients on more than 80mg of oral morphine equivalent. Reminder to recommend Senokot S.
PPLPMDL0020000001	BEDFORD	OH	44146	3/14/2011	Spoke with Mark (floater pharmacist) & introduced Butrans since he had not yet heard of it. Reviewed indication, appropriate patients, CIII. He said he thought a once-a-week option was "interesting" & felt there is a place for it. Also went over OxyContin savings cards which he said he would leave for Marcus. Reminded him they cannot be used for anyone with any type of government insurance, including Medicare & Medicaid.
PPLPMDL0020000001	Cleveland	OH	44104	3/14/2011	I asked dr if he started anyone on Butrans? dr said no not yet and he couldn't remember who was the appropriate patient and asked me to review that information. I showed dr Butrans initiation guide and we discussed appropriate patients that are currently taking opioids who could potentially benefit from starting on Butrans. dr said he has a lot of patients that take Vicodin and Percocet and if they are taking 1-2 pills a day and come into office asking him for more pills, dr looks at MRI results and if they are negative he won't give them more pills. dr said he'll explain to patients that they have chronic pain, will never be pain free and ask patients how they think a pills is going to control their pain? I asked dr if he could think of a few patients like that where he knows he's not going to increase pills per day, so could he consider Butrans as an option at that point? dr said yes he would do that and he likes Butrans is dosed once every 7 days. we discussed insurance coverage for Butrans
PPLPMDL0020000001	Cleveland	OH	44109	3/14/2011	I talked to dr about appropriate patients for Butrans, looking at Butrans initiation guide. dr said he knows patients taking opioids, like Vicodin or Percocet, could benefit from Butrans but majority of his patients are Medicaid and he's not willing to do the prior authorization so that's the toughest thing here. I asked if dr had to process prior authorizations for other medications, for Medicaid patients? dr said yes he has done them but doesn't like to do them so I asked dr if he had any workers comp or commercial plan patients he could consider to start on Butrans? dr said he has some and would think of Butrans for these patients
PPLPMDL0020000001	Cleveland	OH	44105	3/14/2011	I talked to Abdul, Pharmacist, about stocking of Butrans and he confirmed they DO have all 3 dosage strengths but he's concerned as there haven't been any scripts yet. I explained to Abdul what I was saying to doctors and showed Butrans initiation guide again to discuss the appropriate patients and also re-assured Abdul that this is a slow start but I am confident doctors will be prescribing Butrans and he'll see scripts come through his pharmacy. we discussed OxyContin being an appropriate option after Butrans 20mcg/hour isnt working. gave OxyContin conversion/titration guide and OxyContin savings cards. I recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44109	3/14/2011	I showed dr Butrans initiation guide and asked dr to explain to me who he thinks could benefit from Butrans. we discussed patients in doctors practice that are currently taking opioids and where dr thinks Butrans is a better option. dr said he just keeps forgetting who the appropriate patient is so our discussions are helping him remember who is appropriate to start on Butrans. I asked dr to think of 2 patients, with commercial insurance or workers comp, as that's going to be the easiest for him to start with Butrans and get some clinical experience with the medication.
PPLPMDL0020000001	Cleveland	OH	44122	3/14/2011	Spoke with Debbie (nurse) since my scheduled breakfast was canceled due to enforcement of the Cleveland Clinic's policy of no breakfast or lunch appointments. She said they are trying to find away to work around the policy so that reps can still see physicians on occasion. Discussed Butrans indication, appropriate patients/positioning, savings cards. She said she thinks that the physicians there (Shin, Ningegowda) would use Butrans for a lot of patients. Debbie took my card & said she would call me when they reach a resolution on how I can speak with the physicians. OxyContin savings card reminder as well.
PPLPMDL0020000001	Akron	OH	44310	3/14/2011	Followed up to see if Dr. Blanda treats chronic pain and he said he did not. He said he seldom writes anything long term. I told him Butrans may not be appropriate for those patients.
PPLPMDL0020000001	Rocky River	OH	44116	3/14/2011	I asked Dr how often he has a patient complain that their 4 5mg vicodin are not controlling their pain? He said not too often, but sometimes. I told him these are the patients that may be appropriate for Butrans, and I asked if he would start just 2 of these patients. He said he would try.
PPLPMDL0020000001	Bedford	OH	44146	3/14/2011	Spoke with Quareta (technician) & reviewed Butrans (indication, dosing, positioning) as well as new OxyContin savings cards. She said she would leave my information for Oleg (pharmacy manager) as they had a floater in today & she was unavailable. She was not sure if they had dispensed any Butrans yet.
PPLPMDL0020000001	Maple Heights	OH	44137	3/14/2011	Spoke with Dawn (technician) who said she is not aware of any Butrans prescriptions yet. Reviewed positioning and savings information with her & let her know that she could print savings cards at Butrans.com. Also gave more OxyContin savings cards which she said they needed. She said she would let Jim know I was there & would remind him about Butrans.
PPLPMDL0020000001	Cleveland	OH	44109	3/14/2011	I talked to dr about Butrans initiation guide and who he feels is appropriate to start on Butrans. dr said he does have some patients in mind that are currently taking tramadol but not controlled so he is willing to try Butrans in them. I told dr that was great he had some patients in his mind to start on Butrans and we discussed insurance coverage for workers comp and commercial plan patients as that's the easiest right now so dr doesn't have to do prior authorization for Medicaid patients. I recommended Senokot-5
PPLPMDL0020000001	Parma	OH	44134	3/14/2011	Quick call with Dr Hernandez. He said he just wrote his first Butrans prescription but that the patient took the prescription to CVS & they did not have it in stock. Dr Hernandez asked me again to tell him the pharmacies that are stocked, so I reviewed a list of several area chains and locations that have confirmed stocking. Also asked him to request that CVS order Butrans now that they know he is prescribing and he said that he will do this because his patients want their medications same day.
PPLPMDL0020000001	Cleveland	OH	44109	3/14/2011	dr didnt have a lot of time to talk so I asked dr if she started any patients on Butrans, after our discussion on Friday? dr said she did have a few Medicaid patients who she wanted to start on Butrans, but they couldn't get Prior Authorization approved as patients hadn't met Medicaid requirements. I asked dr to think of patients currently taking short-acting opioids, like Vicodin or Percocet, but think of workers comp or commercial plan patients. dr said she would do that
PPLPMDL0020000001	Garfield Hts	OH	44125	3/14/2011	Introduced myself & Purdue's products to Amy (medical assistant). She reviewed office policies & schedule with me & shared with me that they are in the process of joining the Cleveland Clinic & are not scheduling any appointments for reps at this time. She asked that I come back Wednesday to see if Dr Kline has time to see me to review the product information. She said she thinks Butrans sounds like something he may be interested in.
PPLPMDL0020000001	Akron	OH	44333	3/14/2011	Introduced Butrans and FPI, she had already written a Rx based on a conversation I had with Dr. Weidman. It was an opioid naive patient who had previously been on hydrocodone. She initiated therapy at the 5 mcgs.
PPLPMDL0020000001	Fairlawn	OH	44333	3/14/2011	Quick call. Dr. gave me little time but I was able to mention Butrans and let him know it had recently been introduced to the market. He took an initiation guide and left.
PPLPMDL0020000001	Cleveland	OH	44109	3/14/2011	worked physical medicine&rehab dept-see call notes

PPLPMDL0020000001	Fairlawn	OH	44333	3/14/2011	Asked Dr. Oyakawa what type of patient he initiated Butrans therapy on and he admitted he had "forgotten" about it. I asked if he would commit 2 of the 30 patients he mentioned at lunch last week to Butrans therapy and he said he would try to keep it in mind.
PPLPMDL0020000001	Fairlawn	OH	44333	3/14/2011	Spoke with pharmacist, they have seen little movement and are still only stocking the 5 mcg's. I told them that Dr. Shah has been writing and was inquiring about where all strengths were stocked.
PPLPMDL0020000001	Akron	OH	44333	3/14/2011	Dr. Shah has written 3 Butrans Rx's. He said that patients are responding well. While the patients that are already on therapy are opioid experienced, we talked today about putting some patients on Butrans who were opioid naive. He committed to starting some of these patients.
PPLPMDL0020000001	Cleveland	OH	44106	3/14/2011	worked in-patient pharmacy and pain management
PPLPMDL0020000001	Cleveland	OH	44106	3/14/2011	i talked to Wes,Clinical Pharmacist,about Butrans being presented to P&T committee in February and Wes said he did NOT present Butrans in February because he had 5 drugs to present to P&T committee and will present Butrans March 29th and then medication management review team will consider Butrans for formulary in hospital April 13th.Wes said he thinks they could stock all 3 dosage strengths of Butrans and remove some of the Duragesic dosage strengths that are on the Omnicel,which is the cart holding all medications in hospital and the medication management team and P&T Committee members will look to see how much space they have
PPLPMDL0020000001	Cleveland	OH	44106	3/14/2011	i talked to Wes,Clinical Pharmacist,about Butrans being presented to the P&T committee in February and Wes informed me that he wasnt able to prepare the Monograph for Butrans as Dr.Hayek,Chief of Pain/Anesthesia didnt get the drug review form to him until 2 days before the meeting,so it wasnt possible to get prepared.Wes said he's presenting Butrans at the next meeting,March29th and then medication management team will review Butrans April 13th and make final decision on Butrans being approved for formulary
PPLPMDL0020000001	Fairlawn	OH	44333	3/14/2011	Dr. Weidman has still only initiated therapy to the one patient we talked about on the last visit. She didn't"t" give me much time but promised to keep it in mind for future patients.
PPLPMDL0020000001	Cleveland	OH	44106	3/14/2011	i talked to dr about patients he feels are appropriate for Butrans and showed dr Butrans initiation guide.dr said he has a lot of patients on tramadol,that are dosing the medication q4-6h and not controlled,so he thinks Butrans would be a great option for them. i asked dr if he could think of 2 patients,like this,that are workers comp or commercial plan patients to try Butrans.dr agreed.i recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44125	3/14/2011	Spoke briefly with Angie who said that she has not yet had any patient feedback regarding Butrans but that she has dispensed it to patients. She said it was fairly recently that it was dispensed, so it is too soon to have heard anything back from the patient. She said she would let me know if she hears anything. Gave her OxyContin savings cards & reminded her they are for commercially insured or cash-pay patients only & cannot be used for government insurance.
PPLPMDL0020000001	Cleveland	OH	44109	3/14/2011	i talked to Tania,Pharmacist,about Butrans initiation guide and patients currently taking short-acting opioids that could benefit from Butrans.Tania said they havent ordered any Butrans yet and havent seen any scripts for Butrans.Tania said i have to speak with pharmacy manager later in the week about ordering Butrans.i asked Tania what benefits she thought Butrans had for their patients? Tania said once weekly dosing is the best thing for patients instead of dosing short-acting opioids around the clock as some patients take a lot more pills than prescribed by doctor so thats a concern.i told Tania i would follow-up on thursday with pharmacy manager and i recommended Senokot-5
PPLPMDL0020000001	Independence	OH	44131	3/14/2011	Spoke with Kathi (MA) who said Dr Reddy had already left for the day. Reviewed Butrans indication, patient type, once-a-week transdermal system, and managed care with her. She advised that I return on Wednesday morning to try to speak with Dr Reddy so that I can follow up about Butrans as she thinks it is something he would use in his practice based on the kinds of patients he sees. Reminded her of savings cards as well.
PPLPMDL0020000001	Chagrin Falls	OH	44022	3/15/2011	Diane (nurse) said that she did not see Butrans savings cards in their supply so she asked that I leave more. She was not sure whether the ones I had left previously were thrown away or given to patients & was also not sure whether Dr Rood had prescribed it yet. She said she would remind him as he was busy seeing patients & could not see me. Reviewed dosing, appropriate patients/positioning, & reminded her that savings cards could not be used for patients with any type of government insurance.
PPLPMDL0020000001	Cleveland	OH	44195	3/15/2011	dr said he hasnt started any patients on Butrans as he couldnt remember who is the right patient,so we discussed appropriate patients for Butrans and i showed dr Butrans initiation guide.dr said ok he will try it in a few patients and let me know what he hears from patients.we discussed managed care coverage and i recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44195	3/15/2011	i talked to Kathy,PA,about appropriate patients to consider for Butrans looking at Butrans initiation guide and asked if she has thought of any patients yet to start on Butrans? Kathy said there have been a few but they were Medicaid patients and didnt meet Prior Authorization requirements for Medicaid,so we talked about what short-acting opioids those patients were taking that she felt comfortable considering Butrans.we discussed managed care coverage and Butrans patient savings cards.i recommended Senokot-5
PPLPMDL0020000001	Parma	OH	44134	3/15/2011	Spoke with Dan (floater pharmacist) & tried to find out more about the Rite Aid system "unbreakable carton" labeling on Butrans. He said he was not familiar with Butrans so I reminded him by reviewing indication, dosing, and delivery system. He said he has not filled any prescriptions. I asked if he could check the system to see if this was something that pharmacists could override, but he said his system wouldn't show that. Discussed OxyContin savings cards for appropriate patients. He said he would leave them & my card for the regular pharmacist.
PPLPMDL0020000001	Independence	OH	44131	3/15/2011	Quick call with Dr Jack who said he had "forgotten again" about Butrans. I asked him how often he sees patients for a condition causing moderate to severe pain chronically & he said he sees "all kinds of them" very frequently. I told him I was asking him to choose only two of those appropriate patients to prescribe Butrans for to get him started. He agreed to do this & said to keep reminding him.
PPLPMDL0020000001	Solon	OH	44139	3/15/2011	Spoke with Kathy (MA) and introduced Butrans. Reviewed indication, delivery system, dosing, appropriate patients/positioning, and CII. Kathy said Dr Stein does not do lunches or see reps by appointment but said I could leave information & my card for him & he would review it. She said that as a rheumatology practice, they see many patients for whom Butrans may be appropriate.
PPLPMDL0020000001	Independence	OH	44131	3/15/2011	Quick call with Dr Rob in hallway. Got in reminders for both products (Butrans seven days buprenorphine delivery in one application & OxyContin seven tablet strengths). Also spoke with Cameo (MA) about savings cards for both products for appropriate patients.
PPLPMDL0020000001	Solon	OH	44139	3/15/2011	Dr Zaldi said he has not prescribed Butrans yet. I asked him what type of patient he is looking for. He said, "pain patients". I asked him if he could be more specific & he said, "moderate pain patients". Reviewed with him dosing, managed care, savings cards & stocking. OxyContin savings card reminder.
PPLPMDL0020000001	Cleveland	OH	44109	3/15/2011	i talked to dr about Butrans fpi,initiation guide,Butrans REMS program,patient information booklet/dvd and Butrans patient savings cards for commercially insured patients.dr said in his 2yrs of fellowship he has only started ONE patient on an opioid and that was for a patient with severe pain where he prescribed 30 Percocet.dr said he told this patient he would not prescribe more Percocet and if this patient wanted more,she would have to go to another doctor because he wasnt comfortable prescribing narcotics.i thanked dr for being honest and sharing his thoughts,experiences while in residency and fellowship and asked dr what benefits he even saw in Butrans.dr said he did like that Butrans was a patch,not a pill,his patients could dose it once a week,that was easier in his mind than taking pills.i asked dr to consider 1 patient who meets Butrans indication,dr has tried all options and nothing has worked,perhaps Butrans could be an option? dr said he would consider that and i recommended
PPLPMDL0020000001	Euclid	OH	44132	3/15/2011	DOC said he has tried Butrans a couple of times. One patient was unable to get it and the other he has not heard back from. Both patients had workers comp. He did not remember specifics other wise. I explained that state BWC is covering it but employer groups may not. I asked him to write 2 scripts per week. He said he would try.
PPLPMDL0020000001	Cleveland	OH	44103	3/15/2011	i talked to Abdul,Pharmacist,who said he didnt order Butrans yet as he was waiting for the 1st script.Abdul asked me who is prescribing Butrans? we talked about some doctors in the area who are prescribing and i asked Abdul if he would be willing to at least order the 5mcg and 10mcg of Butrans as these are the initiation dosage strengths for Butrans? Abdul said he will order all 3 dosage strengths today and asked me to follow-up in a week.
PPLPMDL0020000001	Cleveland	OH	44195	3/15/2011	worked pain management/anesthesia dept-see call notes,attended 7am lecture and worked physical medicine&rehabilitation dept-had to leave Butrans fpi,patient information booklet and initiation guide for Dr.Jedlicka,Dr.Hou and Dr.Reddy,as Rebecca,the medical secretary said THE DOCTORS have to review the product information and make a decision if they want to meet with me individually
PPLPMDL0020000001	Cleveland	OH	44195	3/15/2011	i talked to Anne,NP,about patients taking short-acting opioids like Vicodin that are asking for more pills or complaining of pain worsening and asked if she would consider Butrans for them? Anne said she would and that she likes once weekly dosing of Butrans,she just hasnt thought of Butrans lately.we looked at Butrans initiation guide and i asked her to start a couple patients like we discussed to get some clinical experience with Butrans.Anne said she would and asked about managed care coverage for Butrans so we discussed workers comp,medicaid and commercial plan patients. recommended Senokot-s
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	3/15/2011	Called on Dr. Richman in Edwin Shaw Hospital.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	3/15/2011	Followed up to see if there has been any movement. They said that they thought they had filled an RX but did not remember from who. They said movement has been slow. I encouraged them to keep it stocked since I had only been talking about Butrans for a short time in the field.
PPLPMDL0020000001	Lyndhurst	OH	44124	3/15/2011	Reminded doc of our lunch and how he admitted he did have a patient in mind for Butrans. I asked him if he has prescribed it yet. He said no. I reminded him that 5mcg/hr would be the starting dose for most patients.
PPLPMDL0020000001	Westlake	OH	44145	3/15/2011	Quick follow up on upcoming formulary meeting. He said he has everything he needs regarding Butrans information and will be prepared. He said he will continue to prescribe Butrans.
PPLPMDL0020000001	Mayfield Hts	OH	44124	3/15/2011	Reminded doc of our lunch last week and asked him if he has identified an appropriate BWC patient to try on Butrans. He said not yet. I asked him to prescribe for those patients that may just be taking tramadol or NSAIDs ATC or on low dose vicodin. Nothing else learned.
PPLPMDL0020000001	Munroe Falls	OH	44262	3/15/2011	Dr. Kolacewski did not have much time and just came up to the counter. I asked if she had initiated therapy and she mentioned that she wanted to review the information that I had left with her. I asked if I could come back next Tuesday and she said she would review it by then.
PPLPMDL0020000001	Cleveland	OH	44143	3/15/2011	Quick call....Discussed the indication and positioning of Butrans. He asked if covered on medicare/medicaid. I told him a prior auth would be needed but commercially Butrans is well covered. He told me to schedule a lunch. Already have one in May. He did not need Ryolt savings cards.
PPLPMDL0020000001	Cleveland	OH	44195	3/15/2011	i asked dr if he started any patients on Butrans? dr said no,Butrans is a new product so it will take him awhile to feel comfortable prescribing Butrans.i asked dr if he had patients taking tramadol or Percocet that werent controlled with the dosing regimen he prescribed? dr said yes a lot of them say they want more pills or they want a different medication.i asked dr to just think of 1 patient who he thinks Butrans could be appropriate,showing Butrans initiation guide,and think of a workers comp patient or commercial plan patient who can use Butrans savings card.dr said he'll think about it. i recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44109	3/15/2011	worked rheumatology dept-see call notes as i had lunch with dept, worked orthopedics dept - collected updated information on the Chief of Orthopedics at Main Campus and Dr.Hoyen who is a Butrans core but will have to be removed 4/1/11 because he is only at Main campus ONE day a week
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	3/15/2011	i continued to help Dr. Pitt identifying a Butrans patient. He argued that he did not have any patients that were appropriate, however right before he left, he mentioned that he can't even get patients to keep their Flector and Lidoderm patches on.
PPLPMDL0020000001	Lakewood	OH	44107	3/15/2011	Quick follow up with Dr and Vicie at Lakewood office. Dr said he wrote another Butrans script and feedback has been good so far. Vicie said she did not know if any managed care issues. She will hand out the Butrans savings cards when he prescribes at this location.
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	3/15/2011	Introduced Butrans and FPI. I explained patient type, how applied and asked if he was currently treating low dose hydrocodone patients, he said he had some patients on low dose percocet/Vicodin. I asked if he would try Butrans on 2 patients and he said he would keep it in mind.
PPLPMDL0020000001	Highland Heights	OH	44143	3/15/2011	Quick call....Discussed the Butrans indication and patient positioning. I asked him if he is having better success with patients being able to get the product. He said he has not had any issues as medicare/medicaid cuts out a lot of patients. I asked him to continue to prescribe.
PPLPMDL0020000001	Cleveland	OH	44195	3/15/2011	i only talked to dr for a few minutes,looking at Butrans initiation guide,discussing who he thinks is appropriate to start on Butrans.dr said he does have patients on Vicodin and Percocet that he thinks could benefit from Butrans so he will keep this in mind.we discussed managed care coverage.

	Euclid	OH	44117	3/15/2011	Discussed the Butrans 5 selling messages. He asked about the side effects. I referred to the FPI and the nausea,dizziness, headache. He said he would not likely start an opioid naive patient on Butrans but rather a patient maybe taking 2-3 tabs. He wanted to know if I had talked to Moufawad as Dr. Moufawad sees about 60% of his chronic pain patients and mostly writes the long acting opioids. I told him that Moufawad is aware of Butrans and I believe he has written. Dr. Morley did say that he would give Butrans a try. Let him know that it is being covered by BWC. He might prescribe Butrans after tramadol.
PPLPMDL0020000001	Independence	OH	44131	3/15/2011	Dr Sundaram said he has still not prescribed Butrans. I asked what types of conditions he treats that are chronic & cause pain. He paused & mentioned osteoarthritis. He said he sees many patients like this in the nursing homes he visits frequently. He said he would like to start using it there & asked if he could use it in those patients. We discussed managed care. I told him that each Medicare Part D formulary has different requirements for their prior authorizations & that the best way to find out about specific coverage is to choose a few patients for whom he finds Butrans appropriate & prescribe it to see what that plan requires. He said that he will try it for a few nursing home patients & that he can think of a couple of office patients as well. OxyContin savings card & Senokot-5 sample reminders.
PPLPMDL0020000001	Cleveland	OH	44109	3/15/2011	I talked to dr about Butrans fpi,initiation guide,Butrans REMS program and patient information booklet/dvd.i asked dr what benefits she thought Butrans could provide her patients? dr said she has a few patients on tramadol that she might consider Butrans for,but she prefers not to start using it there & asked a lot of opioids dr said she treats a lot of rheumatoid arthritis and osteoarthritis patients and prefers to prescribe prednisone and the arthritis medications that are available and not opioids.dr said if her patients are taking 2 tabs of 50mg tramadol,so 100mg a day and they want more pills because thats not working,she will increase to 3 pills sometimes 4 a day,so 200mg a day i her max,after that she sends patients to pain management.i asked dr if she has 2 patients taking tramadol that say the current dosing regimen isnt working or isnt controlling their pain? dr said sometimes she hears that,so i asked her to consider Butrans there,showed dr Butrans initiation guide to re-focus her on those 2
PPLPMDL0020000001	Sagamore Hills	OH	44067	3/15/2011	Dr Scanlon asked me why he hasn't prescribed Butrans yet. I told him that that was a good question & reminded him that in previous conversations he had mentioned that he liked that Butrans was a once-a-week transdermal system. He said he does like those aspects. I asked him what type of patient he is looking for for Butrans & he asked me to remind him where to prescribe it. I mentioned patients who he is ready to put on 1-3 Vicoden or Percocet per day. He said he sees patients like that fairly frequently. I asked him how many of his patients who are on pain medication ask him for an increase in dose or a change in medication & he said "a great many". I told him those were potential Butrans patients as well. Discussed dosing, titration, & savings cards where appropriate. Also showed back of initiation guide to show exactly how to write the prescription. Reminder for OxyContin savings cards as well. Before he left, Dr Scanlon repeated back to me, from memory how to write Butrans.
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	3/15/2011	Discussed Butrans and asked her what therapy she goes to when tramadol fails. She said there wasn't specific med. I asked if she would initiate Butrans therapy for those patients and she said she would keep it in mind. She also asked for Ryzoit co-pay cards.
PPLPMDL0020000001	Cleveland	OH	44109	3/15/2011	I talked to dr about Butrans fpi,initiation guide,Butrans REMS program,patient information booklet/dvd and asked dr what benefits he saw in Butrans for his patients? dr said he hasnt heard of Butrans before but really liked that this was a transdermal delivery medication,dosed once a week instead of his patients taking tramadol q4-6h.dr said he has a few patients he knows dont like taking pills and thinks Butrans would be a great option.dr asked about insurance coverage so we discussed commercial plan patients using Butrans savings card,medicaid requirements for Prior Authorization and workers comp patients.dr said he will try Butrans in a few patients and let me know what he hears from patients once they get started.i recommended Senokot-5
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	3/15/2011	Reintroduced Butrans to Dr. Dilaurio. Time here is always limited so I have had to continue to reinforce the core messages. While I was there she wrote a RX in front of me for a opioid naive patient.
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	3/15/2011	Reintroduced Butrans and focused on our 5 core messages since time with her is very limited. She continues to act enthusiastic about the product but has not yet written.
PPLPMDL0020000001	Cleveland	OH	44195	3/15/2011	I talked to dr briefly about who he feels is appropriate for Butrans.dr said he doesnt have a lot of patients on opioids as he's trying to take patients OFF opioids.i asked dr if these are chronic pain patients that he was taking OFF opioids? dr said yes,they are all chronic pain patients but he believes more in the surgical procedures,injections,stimulators,etc.are better options for patients than opioids.i asked dr if he had 2 patients that were taking Percocet that perhaps are asking him for more pills or saying that they are still in pain,even though they are taking their Percocet? dr said he does get those patients occasionally but not often.i showed dr Butrans initiation guide and asked him to consider Butrans for 2 patients like that,with workers comp or commercial plan insurance as those patients can use the Butrans savings cards.dr said he'll think about it.
PPLPMDL0020000001	Cleveland	OH	44109	3/15/2011	I discussed with dr,Butrans fpi,initiation guide,patient information booklet/dvd,Butrans REMS program and Butrans patient savings cards for commercial plan patients.dr said he has never heard of Butrans and does have some patients on tramadol and percocet that he thinks Butrans could be a better option for I asked dr why he thought that? dr said because Butrans is transdermal and dosed once a week,thats easier for some of his patients than taking short-acting opioids q4-6h.dr said he will try Butrans in a few patients and let me know what happens.we discussed all managed care coverage for Butrans.i recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44109	3/15/2011	I talked to Mike,Pharmacist,about Butrans initiation guide,patient information booklet,stocking and Mike said Rob was in a meeting and i needed to have an appointment with Rob,Out-patient Pharmacy manager there,to discuss Butrans.i explained to Mike that I have left several messages on the phone and also notes asking Rob to call me but i havent heard back from Rob.Mike said to keep trying and said that he would take the Butrans initiation guide and FPI to Rob and told me to try again next week.
PPLPMDL0020000001	Cleveland	OH	44109	3/15/2011	I talked to dr about Butrans fpi,initiation guide,Butrans REMS program,patient information booklet/dvd and Butrans patient savings cards for commercial plan patients.dr said he's an Internal medicine resident,under preceptorship of Dr.Lindheim (IM Director),rotating through rheumatology dept.dr said he has a lot of patients on tramadol that he gives 50mg BID,then patients call and say its not working or pain's increased so he'll increase dosing frequency to TID or four times a day,so usually patients end up taking 200mg tramadol.i showed dr Butrans initiation guide and said that is the patient,before you increase dosage strength of tramadol or dosing frequency,to start on Butrans.dr said that made sense,more moderate pain patients.we discussed medicaid,workers comp and commercial plan coverage for Butrans. I recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44103	3/15/2011	I talked to Bahareh,Pharmacist and Sheria,Pharmacy Technician,about Butrans fpi,initiation guide,Butrans patient savings cards for commercial plan patients,we discussed workers comp and medicaid patients coverage for Butrans and Butrans patient information booklet/dvd.Bahareh and Sheria said Amol,Pharmacist who is usually working here did NOT share any of the Butrans information with them so they were very appreciative of me giving them all of this information.i asked both of them if they were allowed to open the Butrans carton,if a dr prescribed less than 4 Butrans transdermal systems? Bahareh and Sheria said yes,they could open the Butrans carton and this wasnt an issue. I asked if both of them could recommend Butrans,when speaking with patients who arent controlled on short-acting opioids,both of them said yes they would recommend Butrans to patients and
PPLPMDL0020000001	Cleveland	OH	44111	3/16/2011	We reviewed the Butrans FPI and initiation guide. He thinks it seem like an interesting option. He asked about managed care as he has had managed care issues in the past with new drugs. He said as for commercial insurance he sees a lot of super med and Anthem. I reviewed managed care for Butrans and the savings cards. Reminder about OxyContin as an option when Butrans may not provide adequate analgesia. I reviewed the Butrans medication guide and savings cards with Barb. She said would help remind the Dr about Butrans and try to think of some appropriate patients.
PPLPMDL0020000001	Cleveland	OH	44111	3/16/2011	Quick call with Barbara and Dr Daoud. Dr said he wore the demo patch I showed him for about 24 hours on his hand to see what the adhesion was like. He said he thought it stuck pretty well. I asked Barbara to remind the Drs to try Butrans and she agreed.
PPLPMDL0020000001	Garfield Hts	OH	44125	3/16/2011	Introduced myself & Butrans to Dr Kline, delivering 5 core messages & alerting him to black box warning. Went over appropriate patients/positioning. I asked his thoughts & he asked if Butrans is like Duragesic. Showed initiation guide page 6 & pointed out that patients on fentanyl patch were excluded from studies- asked him to think of the more "moderate" pain side. He asked if Butrans was "as effective" as 3 Vicoden per day. I told him we have no comparative data & showed starting dosage chart. He asked how long it takes to start working. Showed FPI 12.3 & 2.4 to support supplemental analgesia if necessary. Discussed cost, coverage, & savings cards. Dr Kline asked if "kids on the streets" could manipulate Butrans for diversion- I told him I know of no specifics, but that because Butrans is an opioid, it does carry abuse/addiction potential as all other opioids do. Reviewed application & rotation. Dr Kline said Butrans sounded much better than "taking pills all day" for pain
PPLPMDL0020000001	Bedford	OH	44146	3/16/2011	Spoke with Lynette (MA) & introduced Butrans. Reviewed indication, dosing, appropriate patient type/positioning. She said she would pass the information along to Dr Mahna and that she thinks he may be interested. She said that because they are in the middle of a busy time at the office, I should return at the middle of next month to set up an appointment to speak with Dr Mahna about Butrans.
PPLPMDL0020000001	Cleveland	OH	44104	3/16/2011	dr said he hasnt started any patients on Butrans yet as he keeps forgetting about it.i asked dr what does he need from me to remember Butrans? dr said just keep stopping in office weekly and leave Butrans initiation guide with him as he thinks thats easy for him to remember who the appropriate patient is for Butrans.i asked dr if he gets calls daily, or see's patients that are on Percocet and they tell him the Percocet's not working? dr said yes,daily,so i told dr to think of those patients to start on Butrans if they are taking 15mg-40mg oxycodone and meet Butrans indication.dr said ok he would do that.i asked dr to start 2 patients on Butrans and i would follow-up next week.dr agreed to do so.i recommended Senokot-5
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	3/16/2011	Dr. Ali said that he prescribed Butrans for a commercially insured opioid naive patient. He said that he has not heard back. I asked him if he had any patients coming in this afternoon that could also benefit from Butrans therapy and he said that insurance was a challenge since he has a large population on Medicaid patients.
PPLPMDL0020000001	Akron	OH	44320	3/16/2011	Reminded Misty that she would be able to write Butrans as long as one of the docs in the practice signed the Rx. She mentioned that they were going to start focusing primarily on pain over the next 6 weeks and this would be a great product. She had 2 patients in mind that she wanted to start on it.
PPLPMDL0020000001	akron	OH	44333	3/16/2011	Reintroduced Butrans to Dr. Bashor. Asked if he had the opportunity to initiate therapy. He said that he had not yet had the opportunity to initiate therapy but committed to starting a patient this week. Followed up with the OM, Gretchen- and had her mark the charts of potential Butrans patients.
PPLPMDL0020000001	Mayfield Village	OH	44143	3/16/2011	Reminded doc of our previous discussion about Butrans and his expressed interest. He said he has not prescribed it. I asked him if he sees a place for a long acting CII for his patients. He did not answer and walked away. Nothing learned.
PPLPMDL0020000001	Cleveland	OH	44111	3/16/2011	Quick call, Dr said he wore the demo patch I showed him for about 24 hours on his hand to see what the adhesion was like. He said he thought it stuck pretty well. I asked if he could find just 2 patients to start on Butrans, he said he would try it.
PPLPMDL0020000001	Mayfield Heights	OH	44124	3/16/2011	Window call....doc said she is trying to prescribe Butrans but even commercial patients are saying its too expensive. I asked if she knew which plans but she didnt remember. I reminded her of the 3rd tier status nationally. I asked her to continue to prescribe and give a savings card.
PPLPMDL0020000001	Independence	OH	44131	3/16/2011	JT said he recently dispensed Butrans 5mcg/hr. I asked who wrote the prescription & he checked his system & confirmed that it was Dr Pai. The patient had Medicare Part D, so they were unable to use the savings card. JT said that I need to get Drs Rutkowski to start writing Butrans. He said that both of them write the majority of Vicoden prescriptions in the area & that they write a lot of prescriptions. I let him know I am working on them both, but they have yet to give me a clinical objection, so it is difficult to figure out what is holding each of them back. JT said he thinks that their patients are simply asking for Vicoden & that they doctors find it easier to just give the patients what they are asking for rather than writing Butrans. He also mentioned Dr Kuschnir in Brunswick as he remembers that he was fond of Buprenex. I told JT that Dr Kuschnir has been very supportive. Offered more OxyContin savings cards but they did not need more yet.
PPLPMDL0020000001	Akron	OH	44320	3/16/2011	Asked Dr. Duggstadt if she had initiated therapy with Butrans. She said she had not because of managed care issues. I asked if she would focus on a patient who was on low dose hydrocodone and had commercial insurance and she said she would.
PPLPMDL0020000001	Cleveland	OH	44113	3/16/2011	dr said he hasnt started any patients on Butrans but he remembered Butrans was for more moderate pain patients,was a transdermal delivery medication but he couldnt remember the dosing schedule and asked about insurance coverage for Medicaid and commercial plan patients and asked me if Butrans was a CII? I told dr Butrans was dosed once every 7 days,showed Butrans initiation guide,that it was a CII so he could call in 5 refills up to 6 months and we discussed Butrans patient savings cards for commercial plan patients and medicaid prior authorization requirements.dr said he likes the fact that Butrans is a patch,instead of pills as he has a lot of patients on Vicodin and Percocet and he feels this would be a better option.i asked dr to start 2 patients on Butrans,based on our discussion looking at Butrans initiation guide and who is appropriate for Butrans,dr said that was fair and he would do that.i told dr i would follow-up next week.i recommended Senokot-5
PPLPMDL0020000001					

PPLPMDL0020000001	Cleveland	OH	44103	3/16/2011	i talked to dr about Butrans initiation guide and who he thinks is appropriate to start on Butrans.dr said he couldnt remember insurance coverage for Butrans so asked me to explain that information to him again.we talked about patients currently taking tramadol,but not controlled,and instead of dr increasing dosage strength of tramadol or dosing frequency,i asked dr to start 2 patients on Butrans.dr said he would consider this option for patients.dr said he had a few patients in mind for Butrans but they had Medicaid insurance and didnt meet prior authorization requirements.
PPLPMDL0020000001	Cleveland	OH	44106	3/16/2011	i talked to dr about starting patients on Butrans,looking at Butrans initiation guide and asked dr if he had patients on tramadol that werent controlled and asking for something different? dr said yes,he does.i told dr thats who he can consider instead of increasing dosing frequency or dosage strength of tramadol.dr said that makes sense and he will consider that when he see's these patients.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	3/16/2011	Dr. Higley came to the window and gave me a little time. I reintroduced Butrans to him and focused on the indication and once a week dosing. He wanted to hear more but was already behind and encouraged me to schedule lunch.
PPLPMDL0020000001	Cleveland	OH	44114	3/16/2011	i asked dr if she has any patients taking tramadol or Vicodin that arent controlled and asking her for something different? dr said she hears that a lot from patients,so i showed dr Butrans initiation guide and asked her to consider those patients with workers comp or commercial insurance to start on Butrans.dr said she started 1 patient,hasnt heard anything negative from patient,so thats a good sign.i told dr that was great she started 1 patient,but could she think of 2 more patients today to start on Butrans? dr said yes she will keep Butrans in mind as an option for patients.i recommended Senokot-S
PPLPMDL0020000001	Mayfield Hts Solon	OH	44124	3/16/2011	Quick call....Reviewed the Butrsn indication and patient type with doc. He said he tried it and had no complaints. I asked him to keep prescribing for appropriate pateints. Ask him for 2 patients per week. No commitment,
PPLPMDL0020000001		OH	44139	3/16/2011	Spoke with Helene (pharmacist) who said that while she did receive the Butrans auto-shipment, she sent it back after not seeing a prescription for 30 days. She said it was too much money to keep on the shelf while not seeing any activity for it. I asked if she would consider getting just one box of the 5 & 10mcg strengths in again, she said she would consider keeping some on hand if she starts to see prescriptions, but otherwise she will wait. Offered OxyContin savings cards but Helene said they do not keep savings cards there. She said "It is easier" if the doctors give them out with the prescription. She said they just end up sitting on her shelf & don't end up getting used. Helene also said that they do not stock OxyContin at that location.
PPLPMDL0020000001	Cleveland	OH	44114	3/16/2011	i asked dr if he started 1 patient on Butrans? dr said not yet,he's going to be slow to start as he's not comfortable prescribing new medications.dr said he is watching what dr.katz(his colleague in office) does with Butrans and he will think of a patient to start on Butrans.we discussed Butrans initiation guide and who's appropriate for Butrans and i asked dr to just think of ONE patient to start on Butrans.dr said he will consider Butrans and said to be patient with him.i recommended Senokot-S
PPLPMDL0020000001	C. Falls	OH	44223	3/16/2011	Spoke with Larry and asked if he has seen any movement from the Pain Clinic he said he had not. I told him I had just come from there and spoke with Glenn and found out Dr. Ali was writing but he was still hesitant to order until a RX comes in.
PPLPMDL0020000001	Cleveland	OH	44111	3/16/2011	Spoke with Wael, we discussed the Butrans FPI, initiation guide and medication guide. He thinks that Drs are really going to love Butrans and he expects it will do well. He said that he liked the fact that it is a CIII long acting.
PPLPMDL0020000001	Cleveland	OH	44104	3/16/2011	We discussed how to instruct the patient on proper application, use and disposal. We reviewed OxyContin as an option when Butrans may not provide adequate analgesia. Reminder to recommend Senokot S with opioids i talked to dr about patients he feels that are appropriate to start on Butrans,showing Butrans initiation guide and we discussed insurance coverage.dr said he doesnt have a lot of patients on opioids but does have some patients on tramadol,vicodin and percocet,and he likes that Butrans is transdermal and dosed once weekly so he will consider this when seeing patients.we discussed Butrans insurance coverage for commercial plan patients and medical patients.i recommended senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	3/16/2011	dr told me he started 2 more patients on Butrans.we discussed why he chose Butrans for these patients and what they were taking for him to consider Butrans as an option.i showed dr Butrans initiation guide and asked him to continue starting more patients on Butrans, who are currently taking short-acting opioids,but not controlled.dr said he would do that and we discussed managed care coverage for Butrans.
PPLPMDL0020000001	Cleveland	OH	44114	3/16/2011	i talked to john,PA,about patients he feels are appropriate for Butrans and john said he's recommending Butrans,to dr katz and dr marshall(all in same practice,for patients on Vicodin or Percocet that are already at 2-3 pills a day and not controlled and asking john for more pills.john said he thinks once weekly dosing is easier for some patients and the fact that Butrans is a patch,he likes that technology being a transdermal delivery.i showed john Butrans initiation guide in the discussion and Butrans patient savings cards.i recommended Senokot-S
PPLPMDL0020000001	Independence	OH	44131	3/16/2011	Dr Trickett said she just recently had a patient for whom she thought of Butrans, but the patient had no insurance, so she said she ended up not prescribing it for him. I reminded her of savings cards. She said she remembers but even with that it was too expensive for that patient. I asked what she liked about Butrans & she said she likes that it is transdermal & that patients only have to apply it once a week. She said she also likes that buprenorphine is a "different" molecule. Reviewed commercial insurance coverage. She said she would continue to look for patients for Butrans because she really does like the idea. Reminded her of OxyContin for patients beyond Butrans 20mcg/hr & gave her new savings cards. Also delivered Ryzolt 2-3-1 reminder and gave savings cards.
PPLPMDL0020000001	Cleveland	OH	44106	3/16/2011	worked pain management dept,left information for family medicine and internal medicine attending physicians.
PPLPMDL0020000001	Beachwood	OH	44122	3/16/2011	Spoke briefly with Vickie (nurse) who said that Dr Yokiel has been prescribing Butrans & she has been giving out the patient information booklets. She asked for more of them, so I provided another stack. She did not know specifics about patient types he has been trying it on & suggested I come back Friday morning to catch Dr Yokiel
PPLPMDL0020000001	Bedford	OH	44146	3/16/2011	Dr Haddad asked me if I was certain that worker's comp was paying for Butrans. I told him that although it is not officially "covered" at this point, that they have been paying for it. He said he prescribed Butrans for a patient who has Medicaid but he prescribed Butrans for a worker's comp issue for the patient for her back pain so the patient tried to fill the prescription using worker's comp. Dr Haddad said they would not cover the Butrans. I asked if I stated why or if it said that the patient had to have failed anything in particular but Roberta said it did not say anything like that, just that Butrans was not covered. I let them know I would look into this. Discussed commercial coverage & reminded him of savings cards. He said he is trying to prescribe Butrans & said he would not give up on it.
PPLPMDL0020000001	Bedford	OH	44146	3/16/2011	Dr Moufawad said he had a patient who was taking 3 Vicoden per day who he started on 10mcg Butrans. He said the patient reported back that he was feeling "woozy" from it, so Dr Moufawad switched him to 5mcg & has not heard any further complaint from the patient. He said he will continue to prescribe Butrans. He also added that he would really like to take part in any type of round-table discussion locally that might occur regarding Butrans. He said that he is interested to find out what other physicians are using as supplemental analgesia for patients as he said that ibuprofen & acetaminophen will likely not work for all patients. I reminded him of the ability to titrate dose upward every 3 days as well. Also spoke with Amber who said she just got a prior authorization for Butrans for a worker's comp patient. She said it was the first one she has gotten but that Dr Moufawad has written for other BWC patients with no problems. She said she would let me know how it turned out
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	3/16/2011	Reintroduced Butrans to Dr. Bicak. She gave me limited time and encouraged me to schedule a lunch. I asked her how many time a week she prescribes low dose Vicodin/Percocet and she said quite a bit.
PPLPMDL0020000001	Fairview	OH	44111	3/16/2011	Spoke with Tom, he did get the 5 and 10mcg doses of Butrans in stock. He has not see any scripts yet. He explained to me that they have recently changed their pharmacy in that they now only serve CCF employees and CCF patients. So he said they are a bit limited in the amount of patients they see. He thinks that once the CCF Main campus Dr get on board he will start seeing it more at Fairview. We reviewed the Butrans patient medication guides and how to instruct patients about proper use and application of Butrans. I reminded him that OxyContin is a long acting option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	3/16/2011	Talked to Dr. Sable briefly through the window as I was speaking with Dr. Ali. I had the opportunity to ask him if he prescribed Butrans yet and he said he had not.
PPLPMDL0020000001	Westlake	OH	44145	3/16/2011	Quick call at window as Dr was way behind. Angela asked the Dr if she had any questions about Butrans. Dr asked if we had a patient assistance program yet for Butrans. I told her we did not. and asked if she had any other patients in mind for Butrans that might have commercial insurance. She said no.
PPLPMDL0020000001	Sagamore Hills	OH	44067	3/17/2011	Introduced Butrans, delivering 5 core messages & alerting him to box warning. He asked about adverse events- I showed FPI section 6. Presented initiation guide which he said was helpful. He said Butrans sounded like something he could use. Discussed importance of appropriate patient selection. He said he does use OARRS & is careful when prescribing opioids so he is comfortable doing so. He asked about supplemental analgesia, so I showed FPI 2.4. Discussed ability to titrate every 3 days. He asked if he could use in fibromyalgia patients. I told him there is no specific etiology that must be present & reviewed indication of moderate to severe chronic pain. Reviewed managed care & savings cards. Recommended OxyContin for patients beyond Butrans 20mcg. He said he does think OxyContin is a good option for some patients.
PPLPMDL0020000001	Independence	OH	44131	3/17/2011	Introduced Butrans to Dr Faiman, delivering 5 core messages & alerting him to box warning. He said he likes to use long-acting pain medications for chronic conditions because "it just makes sense". He said he is always open to trying new medications. He asked if Butrans was similar to Duragesic. I told him we have no comparative data & that patients on fentanyl were excluded from our studies. Presented initiation guide & showed page 6. He said that helped him position Butrans better. He asked about adverse events so I showed FPI section 6. He also asked about managed care, so I reviewed coverage & savings cards for appropriate patients. Dr Faiman said he would try Butrans on some of his patients in chronic pain. I asked if I could follow up in one month & he said yes. Also discussed OxyContin as an option for patients beyond Butrans 20mcg. He said he is comfortable with OxyContin & likes that it is long-acting.
PPLPMDL0020000001	Cleveland	OH	44109	3/17/2011	dr and i discussed appropriate patients to start on Butrans while looking at Butrans initiation guide.dr said she will continue to think of Butrans as an option for patients,she just has to find a commercial plan patient or workers comp patient as thats the easiest.i asked dr what patients say to her when the pills they are taking arent controlling pain? dr said patients just tell nurse or her in exam room that the medication they have isnt working and they want something else.i asked dr to remember Butrans for those patients like that,taking short-acting opioids and showing Butrans initiation guide,that dr can start on Butrans and not increase dosage strength of medication or increase dosing frequency.dr said she will do try that in a couple patients.
PPLPMDL0020000001	Sagamore Hills	OH	44067	3/17/2011	Introduced Butrans to Dr Lenox, delivering 5 core messages & alerting him to box warning. He said that the fact that Butrans is CIII is the most important aspect of it to him. Reminded him that Butrans is still an opioid & therefore does still carry abuse & addiction potential like all other opioids. Discussed appropriate patients & positioning, managed care/cost, savings cards, & disposal. He asked about drug-drug interactions & adverse events so I showed FPI sect 6 & 7. Told him maximum dose is 20mcg/hr & we recommend only one transdermal system at a time. He said it made sense to use two of the 5mcg dose if titration to 10mcg was necessary. I told him this was not recommended as we have no studies to support usage of two systems simultaneously. Dr Lenox said he is interested in attending a dinner program for Butrans when we have them. Recommended OxyContin for patients beyond Butrans 20mcg & Senokot-S for opioid-induced constipation. He said he will be prescribing Butrans.
PPLPMDL0020000001	Cleveland	OH	44103	3/17/2011	dr said she keeps thinking of Butrans as an option for patients but noone has wanted to get off pills and try Butrans.i told dr to NOT think of patients who are doing well on short-acting opioids,but to consider Butrans for patients calling into her office saying the pills are NOT working and they are still in pain,those could be appropriate patients to start on Butrans.i showed dr Butrans initiation guide and we discussed this information again.we discussed medicaid and commercial plan coverage too for Butrans
PPLPMDL0020000001	Cleveland	OH	44107	3/17/2011	Spoke with Nick, we reviewed the Butrans FPI, and medication guide. He had heard about Butrans at another location. He did not think they had it in stock at this store and has not seen any scripts for it yet. We discussed the indication and who the appropriate patients for Butrans are per the FPI. Reminder about OxyContin as a Q12hr option and we reviewed the conversion guide. Reminder to recommend Senokot S.
PPLPMDL0020000001	Sagamore Hills	OH	44067	3/17/2011	Quick call with Dr Gemma. Introduced Butrans. She said he had already spoken with Dr Lenox who had filled her in from our conversation about it. She said she was excited to try it on patients & that she would be using it. She said she liked that it is CIII & is transdermal. Dr Gemma asked about side effects, so I showed FPI section 6. She asked how it can be abused. I told her because it is an opioid it is abusable & potentially addictive, like all opioids. Told her maximum dose is 20mcg & that we only recommend wearing one system at a time. OxyContin savings card reminder for appropriate patients & recommended Senokot-S for opioid-induced constipation.
PPLPMDL0020000001	Brooklyn	OH	44130	3/17/2011	Spoke with Renee' who said they still have Butrans 5 & 10mcg but have not seen any prescriptions yet. Reviewed appropriate patient types/positioning & indication. I asked if Renee' could suggest any particular practitioners who treat patients who fit the indication for Butrans. She mentioned Drs Rutkowski, Dr Nickels, Dr Kavlich, & Dr Thomas Craig. Presented OxyContin savings cards. Renee' said they do stock some there, but not all strengths. Discussed the importance of appropriate patient selection. Renee' said she wishes more physicians would utilize OARRS to help them identify inappropriate patients.
PPLPMDL0020000001	Cleveland	OH	44113	3/17/2011	i talked to dr about Butrans initiation guide again and asked if he started any patient yet on Butrans.dr said not yet but he has a few patients in mind for Butrans and will be seeing them next week so he's going to discuss Butrans with them.i asked what these patients were taking that dr would consider Butrans? dr said vicodin and percocet patients.i told dr that was great and we discussed insurance coverage again for workers comp and commercial plan patients using Butrans savings cards.

PPLPMDL0020000001	University Hts	OH	44118	3/17/2011	Reviewed the Butrans positioning and indication. I asked doc if he had an opportunity to review the initiation guide or prescribe Butrans. He said not yet. I asked him to review the guide and FPI and try Butrans for a BWC
PPLPMDL0020000001	Westlake	OH	44145	3/17/2011	Quick call as Dr was passing by window. He mentioned that he prescribed Butrans for a patient. I did not get the chance to ask him more about this. I asked Laura about the patient, she did not remember what the patient was already on. I asked if the patient got a Butrans savings card and she said yes.
PPLPMDL0020000001	South Euclid	OH	44121	3/17/2011	Spoke to Amanda about the stocking of Butrans. Confirmed the stocking of 5 and 10mcg and that they have seen a script. She looked it up and confirmed that Dr. Laham wrote the script but wrote it incorrectly ("1 Butrans patch"). Patient was able to get Butrans filled through caremark for \$15. I reviewed the application and disposal process. She still had initiation guide as a reference.
PPLPMDL0020000001	Cleveland	OH	44121	3/17/2011	Quick call with Drs. Flagg and Stein. I reminded them of the Butrans indication and for use in opioid naive or for patients on low dose short acting. Stein asked about the dosing and I went over the initiation dosing. Flagg asked about the coverage. I explained the commercial coverage and the savings cards for those patients.
PPLPMDL0020000001	Westlake	OH	44145	3/17/2011	Dr has not yet seen back the one patient he had in mind for Butrans. I asked if he had any other chronic pain patients on low dose vicodin who would be appropriate for Butrans. He said that most of his patients taking vicodin or percocet are taking it with OxyContin or LA morphine as breakthrough medication. I asked if he could think of just 2 patients who would be appropriate for Butrans. I reviewed the formulary grid for OxyContin and reminded him to recommend Senokot 5 with opioids.
PPLPMDL0020000001	Cleveland Hts	OH	44118	3/17/2011	Discussed the indication and positioning of Butrans. I asked doc if he has any patients that could benefit from a once a week CII for their pain. He said sure but patients don't want to give up their pills. I asked him to try Butrans for patients that may be taking non-opioid analgesics instead. Asked him to give a savings card to commercial patients.
PPLPMDL0020000001	Cleveland	OH	44109	3/17/2011	I showed Dr Butrans initiation guide, asked who is the Butrans patient in doctors mind? Dr said he thinks someone taking short-acting opioids around the clock but pain isn't controlled. I told Dr that was a good place, showing initiation guide I asked Dr to think of 2 patients to start on Butrans who are saying pain isn't controlled with short-acting opioids and perhaps requesting a different medication. Dr said he will try that and I asked Dr to consider a workers comp patient and commercial plan patient as that's easiest for doctor.
PPLPMDL0020000001	Cleveland	OH	44113	3/17/2011	I talked to Aaron, Pharmacy Manager, about Butrans stocking and he said he really was waiting until he saw 1 script of Butrans before he ordered the medication. However Aurora, Dr. Bohls med assistant called him after my lunch last Thursday and asked him to order all 3 dosage strengths of Butrans as both doctors were going to prescribe Butrans. I told Aaron I appreciated him doing that as this will make it much easier on the patients, the doctors office staff and him as a pharmacist. We talked about Butrans application dvd/booklet and insurance coverage for Butrans
PPLPMDL0020000001	Northfield	OH	44067	3/17/2011	Quick call- introduced Butrans with 5 core messages. Also alerted her to box warning. She asked about managed care, so I reviewed coverage & savings cards. She said she would use it & is open to trying "new" products. OxyContin savings cards reminder & recommended Senokot-5 for opioid-induced constipation.
PPLPMDL0020000001	Cleveland	OH	44109	3/17/2011	I talked to Dr about patients currently taking opioids and where Butrans was an option. Dr said he had some patients in mind but they couldn't get approval because of Medicaid Prior Authorization requirements. I asked Dr to think about 2 patients we discussed but with commercial insurance or workers comp. Dr agreed to do so. I recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44109	3/17/2011	worked pm&R dept-see call notes, worked neurology and oncology dept-had to leave Butrans fpi, initiation guide, patient information booklet and my business card for each physician within these 2 departments. I also left OxyContin fpi's and conversion guides for doctors.
PPLPMDL0020000001	Cleveland	OH	44113	3/17/2011	I talked to Dr about patients he feels are appropriate to start on Butrans. Dr said he hasn't started anyone yet as he's thinking of patients that are on 4 pills of Vicodin, not controlled and need a baseline opioid. He thinks that's where Butrans is for his patients. I asked Dr does he see those patients often? Dr said not a lot.
PPLPMDL0020000001	Lyndhurst	OH	44124	3/17/2011	Doc said that she shares a patient with Dr. Dewes that has been prescribed Butrans. The patient "loves" Butrans, when she usually does not like most products. I asked doc to prescribe Butrans after patients have been on tramadol. She thought that was a good place. She likes to initiate patients on a short acting before a long acting. Reminded her of the patient types for oxycontin and ryzolt as well.
PPLPMDL0020000001	Mayfield Hts	OH	44124	3/17/2011	Spoke to Sandy about to stocking of Butrans. He said he did get a script for 10mcg about one month ago. He does not recall who the prescriber was but did not recall any issues either. I reviewed the application and disposal process and reminded him that eligible patients can save up to \$40.
PPLPMDL0020000001	South Euclid	OH	44121	3/17/2011	Quick call with Drs. Flagg and Stein. I reminded them of the Butrans indication and for use in opioid naive or for patients on low dose short acting. Stein asked about the dosing and I went over the initiation dosing. Flagg asked about the coverage. I explained the commercial coverage and the savings cards for those patients.
PPLPMDL0020000001	Barberton	OH	44203	3/17/2011	Dr. Patel told me he has initiated Butrans therapy to at least three patients and has been pleased with their feedback so far. He asked about a patient who he was seeing later that day who was on 40 mg of OxyContin daily. I referred to the titration guide and showed him the chart and he noted to start that patient at 10 mcgs.
PPLPMDL0020000001	Westlake	OH	44145	3/17/2011	Dr said he has 2 patients currently on Butrans and they are both doing well. He started them on the 5 mcg dose. I asked about how he will titrate and he said he may titrate one of the patients to 10mcg Butrans. He agreed to start at least one new patient this afternoon on Butrans. I spoke with all of his nurses and MAs and we reviewed the Butrans FPI, initiation guide and medication guide. We discussed opioid induced constipation and Colace and Senokot 5 as options.
PPLPMDL0020000001	Cleveland	OH	44113	3/17/2011	Dr said he started a patient on Butrans. I asked why Butrans? Dr said patient was on tramadol, not controlled and still in pain and asking for something different so Dr tried Butrans 10mcg/hour. I asked Dr what was the opioid patient was taking? Dr said tramadol. I asked Dr what insurance did patient have and Dr said this was a workers comp patient. Dr said he's going to think of Butrans for patients who have never been on an opioid instead of going to short-acting tramadol and those patients he has on tramadol but tell him its not working. I told Dr that was great and I would see him next week
PPLPMDL0020000001	Barberton	OH	44203	3/17/2011	Spoke with Cathy, she said a RX came in from Dr. Patel. I reiterated the importance of the copy cards and explained the savings behind them. <font color=blue><b>CHUDAKOB's query on 03/27/2011</b></font>What type of information would you like your pharmacists to tell their patients regarding Butrans. This might be a good next call objective. What do you think? <font color=green><b>LAPMACA's response on 03/28/2011</b></font>I think that's great! Thanks! <font color=blue><b>CHUDAKOB's query on 03/28/2011</b></font>So what information would you like your pharmacists to tell their patients about Butrans? <font color=green><b>LAPMACA's response on 03/30/2011</b></font>I want them to be able to answer general questions and fluently be able to cover how it is applied and disposed. <font color=blue><b>CHUDAKOB added notes on 04/01/2011</b></font>Great stuff? This is the kind of information we have to make sure nurses/pharmacists are telling their patients.
PPLPMDL0020000001	Parma	OH	44134	3/17/2011	Dr Hernandez asked if he could call in prescriptions & refills for Butrans. I told him he could as it is a CII medication. He said that he has been prescribing it a lot for patients who were taking Vicoden at low doses. I told him this sounded like an ideal patient type to start with. Reviewed application, rotation, heat warning, and adhesion (including taping edges with first aid tape or covering with Bioclusive or Tegaderm). He told me he has been giving out the savings cards where appropriate as well as patient information booklets which his patients like. Gave him more and also discussed DVD option. He asked for a few copies & said he would have some of his patients watch it for instructions. He also asked if we had demo patches, so I showed him one for him to feel and assess. Reminder for OxyContin where appropriate & recommended Senokot-5 for opioid-induced
PPLPMDL0020000001	Cleveland	OH	44111	3/17/2011	Spoke with Weal, he requested samples of Colace and Senokot 5. He said I should talk to the family practice across the street regarding Butrans. He said they prescribe Duragesic and thinks Butrans may be a good option for their vicodin patients. He ordered the 5mcg Butrans and got it in stock today. Reminder about OxyContin as a Q12hr option and he said he will be sure to recommend Senokot and Colace to his patients.
PPLPMDL0020000001	Lyndhurst	OH	44124	3/17/2011	Discussed the indication and positioning of Butrans. I asked her what would be the protocol for therapy after a patient fails on tramadol (LA or SA). She said she might still want to start them on a short acting vicodin. She would not want to give them anymore analgesia than absolutely necessary. I asked her to prescribe for patients after 2-3 tabs of vicodin. She agreed. Reviewed the oxycontin and ryzolt patient types.
PPLPMDL0020000001	Bedford Heights	OH	44146	3/18/2011	Introduced Butrans to Dr Hochman, delivering 5 core messages & discussing box warning. He asked about contraindications, adverse events, QTc prolongation, drug interactions. I showed FPI sections 4, 6, 7, & 12.2. Also discussed use in patients with hepatic impairment. He said that he likes that Butrans is a CII so that he can call it in. He asked if Drs Moufawad, Yokiell, & Tabbaa have used it yet as he follows guidelines of pain management specialists & communicates with them daily. Dr Hochman said he is not a pain management specialist himself & therefore doesn't like to "be the first one" to start writing a medication. Let him know that I work with each of those physicians & each of them has started patients on Butrans. He said Butrans definitely sounds like something he will be prescribing in appropriate patients. Discussed managed care & savings. Also discussed OxyContin as an option for appropriate patients beyond Butrans 20mcg. He agreed it is a good option for some patients
PPLPMDL0020000001	Parma	OH	44129	3/18/2011	Quick call with pharmacy tech who said the pharmacist was busy assisting customers on the phone & could not see me. Reviewed Butrans indication, appropriate patients/positioning, and once-a-week application. She said Steve had sent back their autoshipment & that they have not seen any prescriptions so far. She did not have any recommendations of physicians to discuss Butrans with but said to stop back as Fred or Steve might have
PPLPMDL0020000001	Parma	OH	44129	3/18/2011	Quick call with Jen between patients. She said they have still not had the "right" patient for Butrans due to either insurance or patients wanting to stay on Vicoden. Reviewed appropriate patient type/positioning with Dawn. She said that by the time patients get to them, they are already on 3 5mg Vicoden per day. I told Dawn these may be appropriate Butrans patients. Dawn said the patients don't want to "give up" their Vicoden. I asked her why they allow patients to choose that instead of telling the patient what they need to do. She said that was a good point. Discussed appropriate patients, patient information booklets, & reminded her of savings cards. Also offered Dawn a DVD on application instructions which she said she would keep on hand to watch herself & also to show patients when necessary.
PPLPMDL0020000001	Garfield Hts	OH	44125	3/18/2011	Quick call with Dr Sadowski. He said he remembers me telling him about Butrans but has not thought to prescribe it yet. Discussed appropriate patient type/positioning. I asked how frequently he sees this type of patient, but he did not answer & went into a patient room. Spoke with Deena, reminding her about Butrans. She said she had two different prescriptions for Percocet right in front of her that Dr Sadowski had written for two patients, so she knows he has a lot of patients that could benefit from Butrans. She said it may take him some time, but he will write it at some point.
PPLPMDL0020000001	Parma	OH	44129	3/18/2011	Quick call with Laura between patients. She said she will only be coming to this location on a fill-in basis after April 1st. This is now their official schedule. She said she has not found the right patient for Butrans. She & Dawn said patients with worker's comp come to them already on 3 Vicoden 5mg per day. I asked why not consider Butrans for them if they ask for an increase in dose or change in medication due to inadequate analgesia. They said patients don't want to stop taking Vicoden. Discussed patient counseling & appropriate patient selection. Also reviewed patient information booklets & DVD option with Dawn.
PPLPMDL0020000001	Warrensville Heights	OH	44122	3/18/2011	Re-introduced Dr Khalafi to Butrans. Delivered 5 core messages & discussed box warning. Dr Khalafi asked how Butrans compares to Duragesic. Told him we have no comparative data & presented initiation guide to help with positioning, asking him to think of the more "moderate" side of pain. Went through FPI section 6 on adverse events & 2.4 on supplemental analgesia. I asked what types of patients he thought of & he said he has some on 4 Percocet per day that he would like to convert to Butrans. Discussed initiation. Dr Khalafi said he doesn't like to prescribe pain medications but does treat a number of patients who have chronic conditions causing pain, so he does write for CII & CIII medications where warranted. Discussed importance of appropriate patient selection & let him know he should be just as cautious in prescribing Butrans as he would with other opioids. Discussed using OxyContin where appropriate for patients beyond Butrans. Discussed managed care/savings cards.
PPLPMDL0020000001	Akron	OH	44333	3/18/2011	Introduced Butrans and the FPI. She said that she is writing a lot of OxyContin and certainly has patients that would benefit from Butrans therapy. The biggest challenge for her at this point is building a patient base since she is new to the area.
PPLPMDL0020000001	Lakewood	OH	44107	3/18/2011	Spoke with Floater, Chuck was not in today. I reviewed the key messages for Butrans, and the medication guide. We discussed how to instruct patients on proper use and application of Butrans. Reminder about OxyContin as a long acting option when Butrans may not provide adequate analgesia. Reminder to recommend Senokot 5 with opioids.
PPLPMDL0020000001	Akron	OH	44333	3/18/2011	I asked Dr. Fouad if he has prescribed Butrans and he said he tried it for a patient but he thinks that it was a state plan. He gave me little time but said he would keep it in mind.
PPLPMDL0020000001	Olmsted Falls	OH	44138	3/18/2011	I reviewed the Butrans 5 key messages and asked Drs thoughts. He said he does think this is something that could fit into his practice and said now that darvocet is gone, he has many chronic pain patients who need another option and don't want to take vicodin around the clock. He asked about cost and we reviewed the managed care and savings program.
PPLPMDL0020000001	Berea	OH	44017	3/18/2011	I asked Dr if he has any chronic pain patients who could benefit from the 7 day dosing of Butrans. He said he might but hasn't seen any new chronic pain patients recently. I asked if he would start just one of these patient on Butrans and he said he would.

PPLPMDL0020000001	Rocky River	OH	44116	3/18/2011	Quick call with Kim, we reviewed the medication guide for Butrans and managed care. I asked if she had any patients in mind who could benefit from Butrans. She said there are probably many patients, but the Doctors don't want to hear what the pharmacist think. We reviewed the OxyContin conversion guide and OxyContin as an option when Butrans may not provide adequate analgesia. Reminder to recommend Senokot S.
PPLPMDL0020000001	Lakewood	OH	44107	3/18/2011	I asked Dr where he feels Butrans might fit in, he said he is not sure yet and has not written Butrans yet. He asked about the Butrans dosing and we reviewed the initiation guide. I asked if he would try just two patients and he said he will.
PPLPMDL0020000001	Lakewood	OH	44107	3/18/2011	We reviewed the key messages of Butrans, I asked where he sees it fitting into his practice, he wasn't sure. We reviewed the various places where Butrans may be appropriate. We discussed opioid naive, patients on tramadol and patients who are taking low dose vicodin or percocet. He does see himself prescribing Butrans for a patient who is either opioid naive or when moving up from tramadol instead of going to vicodin around the clock. He said he has a ton of tramadol patients and he used to try darvocet if their pain was not controlled. He said he will try Butrans. I asked if he would start just 2 patients, he said he would find someone to try Butrans. We discussed OxyContin as a long acting option when Butrans may not provide adequate analgesia. Reminder about Ryzolt as a once a day option for patients on tramadol around the clock. I asked them to recommend Senokot S with opioid scripts and left samples.
PPLPMDL0020000001	Shaker Heights	OH	44122	3/18/2011	Spoke with Nhalia (pharmacist) who confirmed that they did have Butrans 5mcg still in stock. She said she has not seen any activity for Butrans yet & was unaware of any "unbreakable carton" message. Reviewed patient type/positioning for Butrans. She did not have any specific recommendations as to what area practitioners may be interested in hearing more about it. Gave her new OxyContin savings cards which she said they could use.
PPLPMDL0020000001	Beachwood	OH	44122	3/18/2011	Spoke with Elsa (floater pharmacist) who said she was aware of the situation I had been working with Shelly on regarding Rite Aid's system calling Butrans an "unbreakable carton". I asked what the resolution was & she said that the doctor in this case authorized them to dispense all 4 instead of the 2 he had originally written for. Elsa said she was not sure if they could have done an override since the physician in this case authorized dispensing the full carton. She said they would have to see what happens the next time this occurs. Gave her new OxyContin savings cards which she said she would leave for Shelly.
PPLPMDL0020000001	Lakewood	OH	44107	3/18/2011	Quick call, I asked her if she's been able to start a few BWC patients on Butrans. She has not, but said that she will prescribe Butrans and does have a few patients in mind. I asked her to try at least 2 patients and she agreed.
PPLPMDL0020000001	Akron	OH	44333	3/18/2011	Asked Dr. Griffin is she has prescribed Butrans yet and she said she had not. I asked what her hesitations were and she said she was busy but just hadn't seen the right patient and walked away.
PPLPMDL0020000001	Copley	OH	44321	3/18/2011	Had seconds with Dr. Heim as he came up to the counter to talk with a patient. I reminded him that I was carrying Butrans, told him it was once a week and explained what the ideal patient would look like. I focused on low dose hydrocodone since the nurse Jen had told me he is still writing quite a bit.
PPLPMDL0020000001	Copley	OH	44321	3/18/2011	Dr. Machado continues to show hesitation with the molecule Buprenorphine. He has limited clinical experience and lacks confidence despite my numerous presentations. He has told me that he will continue to support me with OxyContin.
PPLPMDL0020000001	Solon	OH	44139	3/18/2011	Met with MH and had conference call with Travis (Contracting Purdue) and Kim (Rebate MH) to discuss the client list and the breakout of plans for MH. Mike and Tony explained the breakout of lives in a new report that Travis thought would work for Purdue. Travis then asked them to provide a bill or invoice for what we own them per plan breaking out the lives with the 60% qualifier. Mike said to speak with Deb Sands about the location of our appointment for AMCP in Minneapolis. We reviewed the MKT pieces for which MH said they can't provide co-pay amounts as most of the lives pay co-insurance and this changes per region. He also said the % of duals vary per region per state as well as change monthly.
PPLPMDL0020000001	Akron	OH	44333	3/18/2011	Quickly reiterated what the ideal patient looked like. I asked him if he felt comfortable identifying a Butrans patient and he said he did before walking away.
PPLPMDL0020000001	Beachwood	OH	44122	3/18/2011	Quick call with Dr. Yokiel. He said he has not heard any patient feedback regarding Butrans yet. He said he has written 3 prescriptions for it. I asked him if he was holding off on prescribing Butrans for more patients until he hears feedback but he said that he will continue to prescribe in the meantime. He said that with his patients, if they had anything negative to report, he would have already heard it, as they are quick to tell him if something is not working or if insurance isn't covering it.
PPLPMDL0020000001	Solon	OH	44139	3/21/2011	Dr. Zaidi said he had not yet prescribed Butrans, so I asked him why. He said that he hasn't seen the right patient. I reminded him that he has said that he likes the once-a-week option for patients. He agreed. I asked him what patient type he was looking for. I asked if there was a specific condition or current medication regimen that he was looking for. He said not really. I asked him if the taper was still a cause of concern for him. He said no & that he would simply just not put his patients on high doses of opioids on Butrans, but would use it for patients on lower doses. He added that he does get some new patients who have never been on opioids before & that is where he will use Butrans. I asked when he expects to see one of those patients. He said he is confident that by my next visit he will have seen 1 or 2 to give me feedback on. Reviewed managed care/savings. Discussed OxyContin for appropriate patients & went over savings cards with him & Julie.
PPLPMDL0020000001	Cleveland	OH	44113	3/21/2011	I said to dr, based on our conversation last week about Butrans, dr what benefits do you even see in Butrans for your patients? dr said he likes that Butrans is transdermal, once weekly dosing and a CIII opioid. dr said I have 1 patient in mind, on 4-5 tabs of Vicodin and he's not happy taking pills so I think Butrans would be a great option. Pam, Doctors nurse, said this patient needs education on Butrans so he's coming soon to see them and Pam is going to go through Butrans patient information booklet. I showed Pam and dr Butrans patient application dtd/patient information booklet and asked if this would be valuable as an educational tool for this patient? Pam and dr said that would be great and I asked dr to consider another patient, so trying Butrans in 2 patients, that are taking short-acting opioids and not happy with current medication or saying their pain is worsening, give Butrans a try there, dr said he will start 1 patient and see what happens, then consider another patient.
PPLPMDL0020000001	Chagrin Falls	OH	44023	3/21/2011	Spoke with Ben (pharmacist) who said they had not yet seen any Butrans prescriptions, but they do have the 5 & 10mcg in stock. Reviewed appropriate patient type/positioning. Also gave him new OxyContin savings cards & reviewed usage, reminding him they cannot be used for any type of government insurance, including Medicare & Medicaid. He was extremely appreciative for the savings cards & said he always welcomes savings opportunities for his customers.
PPLPMDL0020000001	BEACHWOOD	OH	44122	3/21/2011	Spoke with Marc (floater pharmacist) who verified that Butrans 5mcg & 10mcg are both stocked at this location. Reviewed indication, dosing, appropriate patient type/position with him. Also gave new OxyContin savings cards & explained how they are used. Also reminded him they cannot be used for patients with any type of government insurance, including Medicare & Medicaid. Marc said he would leave my information for Sandy.
PPLPMDL0020000001	Parma	OH	44129	3/21/2011	Quick call with Dr Taylor through the window. She said she doesn't think she has worked since my last visit to her. Butrans appropriate patient/positioning reminder. Also spoke with Mary about savings cards & managed care & scheduled next available lunch.
PPLPMDL0020000001	Parma	OH	44129	3/21/2011	Dr Roeheny saw me and said "Butrans", right? I asked him if that meant he had prescribed it. He said no, but that I should be happy that he remembered the name because that is the first step. He then said "Dosing: 5mcg" & asked how often. Reminded him it is a once-a-week transdermal system. Also reviewed other strengths & titration ability every 3 days to a max of 20mcg. Reminded him that in our previous discussion, he had said that he starts many new patients on Vicoden per week & that those are potential Butrans patients, if appropriate. He said that he remembers that & that I have "done everything right" & that now he "just has to write it". Saw the Butrans savings cards on a table in his office & pointed them out to him, reminding him of \$15 copay for commercial insurance patients. Also reminder for OxyContin for appropriate patients.
PPLPMDL0020000001	N Royalton	OH	44133	3/21/2011	Quick call with Rosie (technician) who said the pharmacist was too busy to see me today. Reviewed Butrans indication, seven days buprenorphine delivery in one application, delivery system, appropriate patients, & CIII. Also reviewed new OxyContin savings cards & reminded her they cannot be used for patients with any type of government insurance.
PPLPMDL0020000001	Akron	OH	44333	3/21/2011	Introduced Butrans and FPI. Like the other physicians here, Dr. Bacha prefers to refer his patients that require an ATC LAO out to pain management. He was happy to hear about Butrans but there is not a significant place for it at his practice.
PPLPMDL0020000001	Cleveland	OH	44106	3/21/2011	I talked to Margie, Pharmacy Supervisor, about Butrans stocking and margie said she does have all 3 dosage strengths of Butrans yet no scripts and asked me who was writing Butrans? I discussed with her some physicians who are prescribing and told her to please be patient as I appreciate her ordering and stocking Butrans immediately as Margie thinks Butrans can benefit patients. I gave Margie the Medical Education catalogs and we discussed pharmacy section. I asked if Margie is recommending a laxative to patients, when they are taking an opioid? Margie said yes and she recommends Senokot-S, so I gave Margie Senokot-S protocol pad and 2 laminated protocol pads for pharmacy to hang for reference. I asked Margie who are big vicodin writers here at UH? Margie said usually oncology, pain management and family medicine doctors so we discussed specific doctors in each department that she thinks I should talk to about Butrans. I asked Margie to continue recommending Senokot-S.
PPLPMDL0020000001	Cleveland	OH	44113	3/21/2011	worked pain management dept-see call note on dr daoud
PPLPMDL0020000001	Chagrin Falls	OH	44023	3/21/2011	Spoke with Jeff & asked if they had ordered Butrans since our last discussion. He checked his shelves but he said he did not see it. He said he thought he had ordered it after he talked to me, so he was confused why it wasn't there. He said it is possible that someone who didn't know what it was unpacked the order & sent it back. He asked for NDC numbers & wrote them on his order sheet & said he would have them tomorrow. Gave Jeff new OxyContin savings cards & reviewed usage, including that they cannot be used for anyone with any type of government insurance, including Medicare & Medicaid.
PPLPMDL0020000001	Lakewood	OH	44107	3/21/2011	Quick call, Dr has not started anyone on Butrans yet, I asked about those patients he named the last time we talked and he said he has not seen them yet, but he said he will prescribe it. I asked if he would try just 2 new patients this week and he said he would try. I also spoke with Laura and Kim, they agreed to help remind the Dr about Butrans for those patients they had thought of. <font color=blue><b>CHUDAKOB's query on 03/30/2011</b></font>Andrea, is there a better question to ask on a quick call other than asking if the Dr. has prescribed Butrans?<font color=green><b>HOLUBA's response on 04/01/2011</b></font>Dr told me that he had not started anyone on Butrans without me even asking. I try not to open calls in that way.<font color=blue><b>CHUDAKOB added notes on 04/01/2011</b></font>You might want to indicate that in the note. Thanks for the clarification.
PPLPMDL0020000001	Cleveland	OH	44106	3/21/2011	dr gave me a little time to tell her what Butrans was, we discussed Butrans 5 core messages, Butrans initiation guide, patient information booklet and dr asked if Medicaid covered this medication. we discussed Medicaid and commercial plan coverage for Butrans. dr said she has a lot of patients on tramadol that she thinks this would be a better option for, as some patients don't like taking pills around the clock and would prefer a patch. dr said she liked that Butrans was a CIII as that's easier for her to call in refills. dr said she'll talk to me more at my lunch. I recommended Senokot-S.
PPLPMDL0020000001	Akron	OH	44333	3/21/2011	Dr. Richter requested OxyContin saving cards. This was a great segway to talk about when he is prescribing LAO's. I asked him what he is currently prescribing for his patients suffering from fibromialgia and he said he prescribes SAO's when it get to the point where they need something LA he refers them to Pain Management. He said even with OxyContin, he has very few patients.
PPLPMDL0020000001	Akron	OH	44333	3/21/2011	Dr. Shah has initiated several patients on Butrans therapy now. This is a med that really fits into the way he treats chronic pain because he has a very conservative approach, making most his patients Butrans patients. I asked how he felt about continuing to covert patients from low dose hydrocodone to Butrans and he seemed hesitant. Continuing to build his confidence with this product will help gain future commitments.
PPLPMDL0020000001	Cleveland	OH	44106	3/21/2011	worked pain management-see call note on Dr.Hayek, worked Bolwell pharmacy-see call note on Margie, Pharmacy Supervisor and left information for Family Medicine doctors-Butrans fpi, initiation guide, OxyContin fpi, conversion guide and custom formulary grid
PPLPMDL0020000001	Akron	OH	44333	3/21/2011	Followed up briefly on our last Butrans conversation, just as the other docs stated, he refers out over prescribing a LAO. I asked him if he has ANY patients on LA meds and he said he has a handful of patients that he maintains but rather than starting a patient on a LAO he will refer to Pain Management.
PPLPMDL0020000001	Cleveland	OH	44104	3/21/2011	I asked dr, based on our conversation at lunch last Monday, what benefits did he see in a medication like Butrans, for his patients? dr said he likes that Butrans is transdermal, dosed once a week and is a CIII so he can have his medical assistant call in the re-fills which is much easier in his eyes than a CII. I asked dr who's the patient that he believes could benefit from Butrans? dr said he knows that some of his patients on a couple pills a day, that have a negative MRI, still asking him for pills, aren't going to get a re-fill from him so he feels those patients could possibly be started on Butrans. I asked dr to consider 2 patients, showing dr Butrans initiation guide, to get some clinical experience with Butrans. dr said he would think of some patients this week. I recommended Senokot-S.

	Cleveland	OH	44120	3/21/2011	i talked to Stewart,Narcotics Buyer and Pharmacist,about stocking of Butrans and he showed me the 10 and 20mcg Butrans cartons and Shay,Pharmacy Technician and Stewart told me they got their 1st Butrans script and it was from Dr. Rosenfield last week and was for the 10mcg/hour.We talked about doctors in area prescribing a lot of Vicodin and Percocet who might be interested in hearing about Butrans and i left 4 patient information booklets/dvds as Stewart said that was a great idea for the pharmacy staff to partner with patients and hand those out when dispensing Butrans,if patients didnt get it from doctor.I asked Stewart if he had any cash paying patients for OxyContin or commercial plan patients with high co-pays? Stewart said yes.i asked if he would give OxyContin savings cards to those types of patients? Stewart said yes and wanted 1 pack of OxyContin savings cards.i left Senokot-S protocol pad,laminated protocol pad for pharmacy and recommended Senokot-S
PPLPMDL0020000001	Fairlawn	OH	44333	3/21/2011	Dr. Domdera has still not prescribed his first Butrans patient. He said he is hesitant because it is such a new drug. I left him a large FPI and explained that all the safety information and risks associated with Butrans therapy were disclosed in it and encouraged him to read through it before next Monday. He agreed.
PPLPMDL0020000001	Parma	OH	44129	3/21/2011	Quick call with Dr Gigliotti who said he was overwhelmingly busy this afternoon & "not handling it well". He said he has not written Butrans yet & apologized, saying that I have "sold" him on it but that he just hasn't seen any patients fitting the indication since my visits. I reminded him that any patient for whom he is thinking of starting on Vicoden may be an appropriate Butrans patient. He said he remembers. I let him know i would return another day for a more detailed discussion- he agreed.
PPLPMDL0020000001	Cleveland	OH	44106	3/21/2011	dr said he hasn't started anyone on Butrans but remembered it's a CIII,transdermal,patients who are virgins and never tried opioids can try the lowest dose of 5mcg/hour or his patients taking short-acting opioids can start on the 10mcg/hour.dr said can patients still take their short-acting opioids while on Butrans or do they have to be stopped completely? i showed dr Butrans fpi,noting initiation of therapy and maintenance of therapy sections and told dr that up to him and we discussed proper tapering of short-acting opioids before starting on Butrans.dr told me he remembers the 3 dosage strengths are 5,10 and 20mcg/hour and said he has a lot of patients on tramadol and will definitely try Butrans.dr said he has been traveling and in/out of office so much this month he hasnt started any patients but will start some and let me know.dr is going out of town this wednesday for a week,so i told him i would follow-up next week and see how many patients he started.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	3/21/2011	dale said dr.shen has started 3-4 more patients on Butrans,per his recommendation and Yasmin,Dr Shen's medical assistant,has recommended that patients get started on Butrans as their short-acting opioids arent working to control their pain and some of the patients just dont like or want to take pills around the clock for their chronic pain.Dale said he talks to Dr.Shen and Dr.Daoud about every patients medication,any changes,etc,he will make recommendations,write the scripts and doctors sign the scripts.I asked what patients Dale and Yasmin are recommending to be started on Butrans? Dale explained that they are all on short-acting opioids:tramadol,vicodin and percocet.i showed Dale Butrans initiation guide and we discussed proper tapering and initiation of Butrans.we discussed Butrans coverage for medicaid and workers comp patients.
PPLPMDL0020000001	Parma	OH	44129	3/21/2011	The Butrans FPI was sitting on top Dr Ortega's desk when i walked in. He told me my timing was perfect & that he had a question for me. He said he has a patient who has had multiple surgeries for various conditions. She is currently taking 20mg q12h OxyContin. Dr Ortega said his main goal in this patient is to gradually get her down to lower doses of pain medication. He asked me if he could prescribe Butrans for this patient. Showed initiation guide pg 6, walked him through table, & explained taper. I asked if he felt the taper would be an issue & he said no. Let him know max dose of Butrans is one 20mcg/hr system & that patients taking over 80mg equivalent morphine may not get adequate analgesia from Butrans. He said he does not like patients to be on over 20mg q12h OxyContin. He also said he likes OxyContin because it is q12h instead of q4h or q6h. He said he feels with q4-q6h, patients "think about their pain" too frequently so he likes long-acting medications as they avoid this.
PPLPMDL0020000001	Fairlawn	OH	44333	3/21/2011	Spoke with Jessica, she said she doesn't believe that she has seen any prescriptions come in yet. I told her the message I was focusing on with my physicians and what an ideal Butrans patient looks like. She was confident it would start moving soon.
PPLPMDL0020000001	Euclid	OH	44119	3/21/2011	I reviewed the Butrans indication, CIII status, 7 day application. He said he has not written it yet but he will. He reminded me that he said he would write for opioid naive. The problem, he said, is that he has a lot of medicare and medicaid. I asked him to try Butrans in a commercial or BWC patient this week. Also reviewed the oxycontin patient type.
PPLPMDL0020000001	Cleveland	OH	44130	3/22/2011	Dr Fedorko said he forgot about Butrans. I asked how he could forget after he had been so excited about it- He said he is old & forgets things. I reminded him of the patient he had mentioned to me during my lunch. He said that she is now in the hospital & on fentanyl. I reminded him that patients on fentanyl may not be appropriate for Butrans. He said he would like to get her on "less" opioid. Showed initiation guide pg 6 & asked about how many patients he starts on Vicoden. He said he does this more than he would like to because he does not like to prescribe pain medications. I told him those were potential Butrans patients & that he could initiate Butrans treatment at 5mcg/hr dose. He said that either today or tomorrow, whenever he sees patients in pain who are appropriate, he will prescribe Butrans because he is anxious to see how it works. Dosing, savings cards, & application site reminders as well. He said to keep coming back to keep reminding him so he doesn't forget again.
PPLPMDL0020000001	Cleveland	OH	44130	3/22/2011	Introduced myself & Purdue's products to Kim (MA). Reviewed Butrans indication, dosing, appropriate patient type/positioning, & delivery system. She said she would leave my information for Dr Berglund along with a request for a lunch or appointment to meet with her. Kim said Dr Berglund will accept information & vouchers but that she rarely meets with reps. Let her know that Butrans was a product that Dr Berglund had not been detailed on yet as it just became available in January. Kim said she would let Dr Berglund know.
PPLPMDL0020000001	Cleveland	OH	44195	3/22/2011	i talked to Curt,Pharmacy Manager,about Butrans stocking,if he has seen any scripts for Butrans and we discussed Butrans application dvd/booklet.Curt asked if i could leave a few booklets/dvd's for pharmacy to give to patients when they get their Butrans prescriptions. I told Curt i could leave 2 Butrans application dvd/booklets today and follow-up in a week,if gone i will leave 2 more if not he can keep those.i asked Curt to recommend Butrans,when talking to doctors,if patients are telling Curt about their pain worsening or not being controlled on short-acting opioids and showed Curt Butrans initiation guide and discussed appropriate patients to start on Butrans.Curt said he will see what he can do and took initiation guide.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44130	3/22/2011	Spoke with Fran & Terry (MA's) and introduced Butrans. Reviewed indication, appropriate patient type/positioning, dosing, CIII/box warning, & savings cards. They said they would pass along the information to Dr Plecha.
PPLPMDL0020000001	Cleveland	OH	44130	3/22/2011	Discussed how savings cards for each product worked & worked with them to schedule a lunch to speak with Dr Plecha.
PPLPMDL0020000001	Cleveland	OH	44130	3/22/2011	Introduced Butrans to Dr Rogers, delivering 5 core messages & reviewing box warning. I asked him, with him being a vascular surgeon, where he typically uses long-acting pain medications. He said he uses them in patients with painful leg ulcers & amputees. He said any time he feels the patient will need to be on a pain medication for an extended period of time, he will prescribe long-acting instead of short-acting. He said he finds that when patients take short-acting medications multiple times per day, they often wait until they feel pain before taking the medication. He said he liked that Butrans keeps the plasma concentration level relatively constant for days. He also said he liked that it is CIII so he can call in refills. He said he had a working patient who he thinks he may try Butrans for & asked if patients could work while taking it. Reviewed FPI 5.3 & 6. Reminder of OxyContin for appropriate patients beyond Butrans & gave savings cards.
PPLPMDL0020000001	Solon	OH	44139	3/22/2011	met with Denny Yanosick to plan call on Ron Wheeler at DDM. Discussed trying to get Sen-S 60's added to planogram and putting Sen-S 10's on RX end display.
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	3/22/2011	Focused on the total office call since the access here is difficult. Dr. Azem came to the window while I was talking with the staff and I asked her if she has had the opportunity to initiate Butrans therapy and she said she had not. However, Lori told me that they have many patients on low dose hydrocodone the Dr. Azem only maintains so she may be interested in converting.
PPLPMDL0020000001	Cleveland	OH	44195	3/22/2011	i talked to dr about Butrans initiation guide and who he feels is appropriate to start on Butrans.dr said he hasn't thought about Butrans and forgot about it and the insurance coverage.dr asked if workers comp covered Butrans? i discussed workers comp,commercial and medicaid coverage for Butrans.i asked dr if he has patients on short-acting opioids,looking at initiation guide,that arent controlled would he consider Butrans? dr said yes he will.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44195	3/22/2011	worked walker bldg:pain,chronic pain and pm&r dept-see call notes and left information for all doctors that i didnt see-Butrans fpi,initiation guide and my business card
PPLPMDL0020000001	Cleveland	OH	44195	3/22/2011	i talked to dr briefly about the couple patients he started on Butrans and showed Butrans initiation guide.dr said the 2 patients he started on Butrans were patients taking Percocet around the clock and their pain wasn't controlled with the short-acting opioids so he wanted to try Butrans and see if it would work.i asked dr to consider starting 2 more patients that are like that and not re-fill their short-acting opioids,dr said he will.i left Butrans application dvd/booklet as dr wanted 2 of them.i recommended Senokot-S
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	3/22/2011	Spoke with Erika the pharm tech. Herman the pharmacist was on the phone. I followed up from my last presentation and asked if she had seen any movement and she said she had not. I asked if she would consider ordering at least the 5 mcg and she said they would not until a Rx came in.
PPLPMDL0020000001	Cleveland	OH	44130	3/22/2011	Spoke with Karen & Barb (MA & nurse) who said that Dr Diab is on vacation this week. Reminder of Butrans indication, dosing, delivery system, & savings cards. They both said they do not know why Dr Diab has not prescribed Butrans yet as they agreed that he has many patients who would be appropriate for Butrans. Karen said it may just take some time with him & recommended i come back next Tuesday.
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	3/22/2011	Dr. Dilauro said she has written her first Rx of Butrans for an opioid naive patient and has not heard back and assumes they are doing well. I asked if she would continue to think of Butrans for other patients where she would typically write hydrocodone and she said agreed.
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	3/22/2011	Told Dr. Dilauro that i wanted to help her identify a specific patient type to start on Butrans. i discussed starting a patient in a case where she would typically write Vicodin 5 mg 2-3 times a day. She said she would consider it for a patient that was coming in later today who had a similar profile.
PPLPMDL0020000001	Cleveland	OH	44130	3/22/2011	Quick call with Colleen (pharmacist). She said they have not dispensed any Butrans yet. Reviewed indication & dosing and reminded her about automatic savings through e-voucher. Also gave her new OxyContin savings cards & discussed usage. Reminded her that patients with government insurance are not eligible for savings cards.
PPLPMDL0020000001	Cleveland	OH	44113	3/22/2011	i talked to dr about Butrans 5 core messages,fpi,initiation guide,application dvd/booklet,Butrans patient savings cards for commercially insured patients.dr asked if Butrans is covered by Medicaid or medicare? we discussed both plans as it relates to Butrans coverage.i asked dr if he had 2 patients,taking tramadol or vicodin that arent controlled and have asked him or his staff for something different? dr said yes that happens a lot.i asked dr to consider Butrans for these patients and give Butrans a fair clinical trial.dr said he will consider it,it comes down to insurance.i recommended senokot-S
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	3/22/2011	Spoke with Pat and the tech Mike. They said they have not yet seen any movement from Butrans but were hopeful it would pick up soon. They promised to keep the Butrans they had stocked.
PPLPMDL0020000001	Cleveland	OH	44195	3/22/2011	i talked to dr about Butrans fpi,5 core messages,initiation guide, application dvd/booklet and Butrans patient savings cards for commercially insured patients.i asked dr if he had patients taking short-acting opioids that werent controlled and ever asking him for something different or a change in medication? dr said yes that does happen,so i asked dr to think of 2 patients to start on Butrans,based on our discussion and looking at Butrans initiation guide-opioid experienced patients? dr said yes he will give Butrans a try and let me know what happens.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44130	3/22/2011	Spoke with John who confirmed that they received their autoshipment of 2 boxes of each strength of Butrans. He said he has not filled any prescriptions for it yet but has it ready. Reminded him of e-voucher savings. Also gave him new OxyContin savings cards & reviewed usage, reminding him that they cannot be used for patients with any type of government insurance, including Medicare & Medicaid.
PPLPMDL0020000001	Brooklyn	OH	44144	3/22/2011	Spoke with Michelle who said she has dispensed Butrans 5mcg "a couple" times. I asked who wrote the prescriptions but she said she did not have that information. I asked if she knew if it was anyone local, but she again said she did not remember. Asked who in the area she thought, based on the appropriate Butrans patient type & positioning, may be interested in hearing more about Butrans & she said Dr Deeb. She said he is the only one who comes to mind when thinking of "a lot" of patients on Vicoden chronically. Also gave her new OxyContin savings cards & reminded her that patients with any type of government coverage are ineligible for usage of the card.
PPLPMDL0020000001	Cleveland	OH	44195	3/22/2011	i only got a few minutes with dr after lecture and i asked dr what his thoughts were on Butrans and who were the patients in his mind that could benefit from Butrans? dr said he hasn't started anyone on Butrans but does like that it's a transdermal medication and likes that its dosed once a week.i asked dr if he had any patients on tramadol or percocet that werent controlled and request another medication? dr said yes every day he hears that.i told dr that could be where he considers Butrans,showed dr Butrans initiation guide and asked him to think of 2 patients to start on Butrans.dr said he'll think about it.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	3/22/2011	worked senior health and wellness center-see call notes on MaryJo Slattery,NP and Dr.Campbell,Director of wellness center;met with Karen Gallagher,administrator who books lunches and she told me ALL lunches have been cancelled with pharmaceutical reps,Karen said to talk to MaryJo and see if i can get a lunch 1x/month or quarterly as Butrans is newer to doctors and staff and that would be valuable to hear about at a lunch

PPLPMDL0020000001	Cleveland	OH	44195	3/22/2011	i talked to dr about Butrans fpi,initiation guide,application dvd/booklet,Butrans patient savings cards for commercially insured patients,workers comp and medicaid coverage for Butrans.dr said she has some patients on tramadol and percocet that arent happy taking pills around the clock for their chronic pain so Butrans could be an option for them.i asked dr if she could just think of 2 patients,looking at Butrans initiation guide who are appropriate for butrans, and give Butrans a fair trial? dr said she will try Butrans and let me know.i recommended Senokot-S
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	3/22/2011	Introduced Butrans and the FPI. This was a quick window call so i was only able to go over the indication and the once a week dosing.
	Cleveland	OH	44109	3/22/2011	i talked to Ron,Pharmacy Manager,about Butrans fpi,5 core messages,initiation guide,application dvd/booklet,Butrans patient savings cards.Ron said he saw some information from Debbie,the other Full-time pharmacist,but she didnt give him all of the Butrans information so he wasnt completely sure about how often this medication is dosed and he hasnt opened the Butrans 5mcg carton.i asked Ron if anyone has prescribed Butrans yet? Ron said not yet,no scripts,but asked me to come back in a few weeks and check back as he see's so many short-acting opioid scripts from the Metro Senior Wellness Center:dr campbell,dr baker,dr geho,mary jo slattery(np) and Metro Main Campus doctors:physical medicine and rehabilitation,oncology,internal medicine and family medicine physicians so we discussed them and who i was working with to discuss Butrans.we discussed insurance coverage for Butrans and Ron said he does have commercial plans here,but majority medicaid and some workers comp.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44195	3/22/2011	i talked to JoAnne,NP,about patients she feels that are appropriate to start on Butrans and showed Butrans initiation guide.JoAnne said Dr.Covington started a few patients but she hasnt yet so she will keep Butrans in mind for her patients.i asked JoAnne to think of 2 patients,taking short-acting opioids,that arent controlled and are asking her for a different medication.JoAnne said she'll consider that when she see's patients and we discussed insurance coverage for medicaid,workers comp and commercially insured patients. i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	3/22/2011	i talked to MaryJo,NP,about patients she feels can benefit from Butrans.MaryJo said she has patients on tramadol and vicodin that she knows dont like taking a pill around the clock for their pain,so Butrans is a great option being transdermal and dosed once weekly is much easier for some of her patients.i asked MaryJo if she can just think of 2 patients to give Butrans a fair trial in? MaryJo said she will but she has mainly medicare part d patients and Butrans isnt covered on med part d plans,per our last discussion.i asked MaryJo to consider 2 patients with commercial plan insurance where they can use Butrans patient savings cards. MaryJo said she'll think of a few patients like that and see what happens and let me know.we also discussed the fact that Metro has cancelled all lunches within the department,so MaryJo is going to see if they can book a lunch for me as Butrans is a newer product to them and they value the education i provide the office staff.
PPLPMDL0020000001	Cleveland	OH	44195	3/22/2011	i talked to Gail,NP,about Butrans fpi,5 core messages,initiation guide,Butrans patient savings cards for commercially insured patients,application dvd/booklet and workers comp and medicaid coverage for Butrans.Gail said she likes the once weekly dosing,likes that Butrans is transdermal and thinks a patch is much easier for her patients than pills around the clock.i asked if Gail has seen anyone prescribe Butrans yet? Gail said only Dr.Shin has written Butrans,that she knows of,so i asked if Gail could think of 2 patients SHE treats as this is a CII,she can prescribe this medication,if patients are taking short-acting opioids around the clock and not controlled,could she try Butrans in 2 patients? Gail said she will remember Butrans,just hasnt thought about it.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44195	3/22/2011	i only got a few minutes with dr to discuss Butrans and where dr thinks there's a place for Butrans in his practice.dr said he does have patients on Percocet that arent controlled and when they are taking 4-5 pills a day and not controlled,he thinks Butrans could be an appropriate option.i showed dr Butrans initiation guide and asked him to consider Butrans for 2 percocet patients and try Butrans to get some clinical experience,dr said he will do that.we briefly discussed managed care coverage for Butrans.
PPLPMDL0020000001	Mayfield Heights	OH	44124	3/22/2011	NP said she has been wanting to prescribe a lot of Butrans particularly for elderly patients but insurances are not covering it. i asked her to focus on those with commercial plans. She makes a point to ask patients what kind of insurance they have. She also asked if Butrans is covered on Cleveland Clinic Formulary, Anters(?) i told her i would find out and let her know. She asked about the out of pocket cost for Butrans. i explained that it will vary and is dose dependent. Savings cards can be used for cash paying patients.
PPLPMDL0020000001	Cleveland	OH	44109	3/22/2011	i talked to dr about Butrans initiation guide and asked him who is the patient that he feels could benefit from Butrans? dr said patients on short-acting opioids not controlled and asking him for something different.i told dr that was great and asked if he could think of 2 patients to start on Butrans,like that whether it be tramadol,vicodin or percocet that patients are taking but not controlled? dr said he will consider it,but asked about medicare coverage as he has a lot of medicare part d patients.we discussed commercial plan patients using Butrans patient savings cards,medicaid patients have to meet prior authorization requirements and medicare part d plans arent covering Butrans.i told dr to focus on 2 patients with commercial plan insurance.dr said he will do that and let me know how it goes with patients.i told dr OxyContin is an appropriate option,when patients are above 80mg oral morphine equivalent,wide coverage and OxyContin savings cards for cash paying or commercial
PPLPMDL0020000001	Cleveland	OH	44114	3/22/2011	i talked to Joel,Pharmacy Manager,about Butrans stocking and Joel said he hasnt seen any Butrans scripts so he's waiting to order Butrans.Joel said he doesnt like any of the narcotics and even though this is a patch,it's still a narcotic,so he's not happy with any of them.i told Joel he was right as Butrans is a CII,single entity opioid so the potential for abuse,misuse,overdose are still there as other opioids.i asked if Joel ever counsels patients on their medication management and recommends another medication if short-acting opioids arent controlling patients pain? Joel said he doesnt do a lot of medication management therapy but will talk to patients who are taking Vicodin,Percocet or tramadol and if they arent controlled on their pills,he'll occasionally talk to doctors and recommend a long-acting opioid option.i asked Joel to recommend Butrans for 2 patients,that he trusts and knows arent happy with current short-acting opioid regimen,he said he'll think about it.
PPLPMDL0020000001	Cleveland	OH	44195	3/22/2011	i talked to Joan,NP,about patients she treats that Butrans could be an appropriate option for.Joan said she has some patients on Vicodin,that arent controlled and she thinks a long-acting opioid like Butrans would be a good option.i asked what benefits Butrans offers her patients? Joan said once weekly dosing is easy for a lot of patients,but she has to think of a few patients who are trustworthy to rotate the patches every week and not re-apply to the same skin site.Joan said the fact that Butrans is a CII and she can call in re-fills is easier than a CII.i asked Joan to consider 2 patients to start on Butrans and give it a fair try,she said she'll think of a few patients.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44195	3/22/2011	i asked dr what he says to patients who tell him in their appointment that their short-acting opioids arent controlling their pain? dr said he will either increase the dosage strength of the short-acting opioid or increase the dosing frequency.i asked dr once he does that,whats next? dr said he will consider a long-acting opioid only if patients pain is severe and not being controlled by short-acting opioids and patient isnt a candidate for surgery,injections,etc.i asked if dr could consider 2 patients who arent controlled on short-acting opioids and instead of re-filling short-acting opioids,start them on Butrans? dr said he will think about it. i asked dr to just give Butrans a fair trial and start with 2 patients.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44195	3/22/2011	i talked to Kathy,PA,about patients she feels that can benefit from Butrans,showed Butrans initiation guide and application dvd/patient information booklet.Kathy said patients on short-acting opioids that are telling her the pain's not controlled with the q4-6h dosing regimen,she's recommending Butrans to the doctors.Kathy said the challenge is that Dr.Mekhill hasnt started anyone on Butrans,as he doesnt like to prescribe new medications and he doesnt think Butrans has been on market long enough.Dr.Minzter,who kathy see's her patients too,said she thinks Butrans is a great option as a transdermal medication and once weekly dosing is great but hasnt started anyone yet.Kathy said she thinks they just forget about it and are so busy that Butrans hasnt been in their minds.i asked kathy if she would recommend butrans to both physicians or when she's seeing their patients,Kathy said she would and we discussed insurance coverage for Butrans.
PPLPMDL0020000001	Mayfield Hts	OH	44124	3/22/2011	Doc said he has been trying to prescribe Butrans but he is having trouble getting it covered (for commercial coverage). He likes the product and the molecule and wants to precribe it but he can't get it covered even with a PA. I told him patients with commercial insurance will have the best chance for success. Reminded him to give patients a savings card.
PPLPMDL0020000001	Cleveland	OH	44109	3/22/2011	i talked to Paul,Pharmacy Manager,about Butrans scripts that they are seeing from Dr.Shen as 1 patient who had BWC couldnt get Butrans approved.I asked Paul if this was a state BWC patient or employer paid BWC? Paul said it was a self-insured BWC patient so we discussed Butrans and BWC,medicaid patients getting Butrans through Prior Authorization requirements and commercially insured patients being able to use Butrans patient savings cards.Paul said they only have Butrans 5mcg in stock,as these are the only scripts he's seeing from doctors.we discussed importance of ordering Butrans 10mcg,as thats an initiation dose too,Paul said he would order Butrans 10mcg.we discussed Butrans fpi,5 core messages,initiation guide,application dvd/booklet.i told Paul patients can also go to OxyContin,when above 80mg oral morphine equivalent,with 7tablet strengths,gave Paul OxyContin conversion guide and discussed managed care coverage for OxyContin.recommended Senokot-S
PPLPMDL0020000001	Waterford	OH	45786	3/23/2011	W - Likes transdermal systems to avoid patients relying on taking oral meds all the time. Great option for patients when something stronger is needed than a short acting but before a CII would be needed. I - Butrans introduction 7 days of therapy in 1 application with a scheduling of CIII. Use of the FPI to introduce the indication, contraindications and warnings. Butrans introduction of the initiation guide to discuss appropriate patient selection - opioid naive/experienced and proper starting doses. Formulary coverage - BWC, commercial plans with 3T status and medicaid which requires a prior authorization. Savings Card program eligibility.
PPLPMDL0020000001	Waterford	OH	45786	3/23/2011	W - She said that it's always nice to have another option and likes that she will be able to prescribe it. Would like to further review the FPI. I - Butrans introduction 7 days of therapy in 1 application with a scheduling of CIII. Use of the FPI to introduce the indication, contraindications and warnings. Butrans introduction of the initiation guide to discuss appropriate patient selection - opioid naive/experienced and proper starting doses. Formulary coverage - BWC, commercial plans with 3T status and medicaid which requires a prior authorization. Savings Card program eligibility.
PPLPMDL0020000001	Mayfield Hts	OH	44124	3/23/2011	Quick call....asked doc if he foub an appropriate patient to try on Butrans. He said not yet. i asked him to prescribe for a patient taking low doses of vicodin - like 15mg or less. Reminded him to give commercial patients a savings card.
PPLPMDL0020000001	Hudson	OH	44236	3/23/2011	Dr Tosino said he has not prescribed Butrans yet because he forgot about it. i reminded him of appropriate patient types/positioning & that he had been excited about Butrans because he said he would love to have fewer patients on around-the-clock Vicoden. He said that was still true & that he likes the idea of a transdermal system. i asked why not start an appropriate patient on Butrans instead of starting them on Vicoden. Dr Tosino said this makes sense. He asked for literature as he lost the copies that i had originally given him. Gave him FPI & initiation guide & showed page 6, walking him through how to start the patient we talked about on 5mcg/hr. Also showed back of guide to show exactly how to write the prescription. Reminded him of savings cards for commercial insurance to bring them down to a \$15 copay. He said he wants to prescribe Butrans & will do so.
PPLPMDL0020000001	Waterford	OH	45786	3/23/2011	W - Waters said that Butrans is a product that he can definitely see himself prescribing especially when he is hesitant to go to a CII. I - Butrans introduction 7 days of therapy in 1 application with a scheduling of CIII. Use of the FPI to introduce the indication, contraindications and warnings. Butrans introduction of the initiation guide to discuss appropriate patient selection - opioid naive/experienced and proper starting doses. Formulary coverage - BWC, commercial plans with 3T status and medicaid which requires a prior authorization. Savings Card program eligibility.
PPLPMDL0020000001	akron	OH	44333	3/23/2011	Dr. Bashor has not initiated Butrans therapy truly because he has not seen the appropriate patients. i asked him if he has prescribed any low dose hydrocodone ATC and he said he had not. i discussed converting elderly patients who have been taking low dose hydrocodone ATC and he agreed he would. Potential here is limited.
PPLPMDL0020000001	Hudson	OH	44236	3/23/2011	Spoke with Angie (pharmacist) who confirmed that they have 5 & 10mcg strengths of Butrans in stock. She said she has not yet filled a prescription for it. i reviewed indication, appropriate patients/positioning, & dosing with her. She said they do not have a lot of patients on Suboxone. i clarified by telling her Butrans does not have an indication for the treatment of drug addiction & that moderate to severe chronic pain is the only indication. Also gave her new OxyContin savings cards & reviewed how they are used. She said they would definitely be able to utilize them for customers on OxyContin.
PPLPMDL0020000001	Hudson	OH	44236	3/23/2011	Spoke with Beth who confirmed receipt of their autoshipment of Butrans, although she said they have not dispensed any yet. Reviewed appropriate patient type/positioning with her. She said she thinks Butrans is a great idea & that she has some customers who come to mind that she does not think should be on Vicoden around-the-clock. She recommended i speak with Dr Brese & the other physicians at pain management at the Akron General Wellness Center in Stow. Let her know that was out of my territory but that a colleague does call on them. She also suggested Dr McCallum but then remembered that they are a "no access" group. Gave Beth new OxyContin savings cards. She was very appreciative & said she did not know savings cards for OxyContin existed. She said she has a couple of customers with cancer who take OxyContin & have higher co-pays. Reminded her that savings cards cannot be used for patients with any type of government insurance. She asked for my card in case she had questions.
PPLPMDL0020000001					

	Parma	OH	44134	3/23/2011	Dr Hernandez said that he continues to prescribe Butrans & has written 5-6 prescriptions since our last discussion. I asked if he has had feedback from patients yet & he said he has not. He said that if they had anything negative to say he probably would have heard it by now, so he is going on the assumption that they are doing well. He said he is prescribing Butrans mostly for patients who are referred to him by a chiropractor because they tend to be the types of patients who do not want to take oral pain medications. He said he has been giving out patient instruction booklets & savings cards to eligible patients & showed me that he has one empty package of Butrans savings cards. Spoke with Val regarding managed care. She said she has had not push-back from managed care for Butrans.
PPLPMDL0020000001					
	Akron	OH	44320	3/23/2011	Misty said that when Dr. Bonyo returns from Kenya the practice is going to become more focused on treating chronic pain. Misty said that Butrans will have a significant role and likes that is both a LAO and scheduled 3.
PPLPMDL0020000001	Cleveland	OH	44113	3/23/2011	dr said he hasn't started anyone on Butrans yet, but he has patients in mind that are taking Vicodin and Percocet that complain about their pain not being controlled, so he thinks Butrans could help these patients. I asked dr to consider 2 patients like this, with workers comp or commercial insurance, to start on Butrans and showed Butrans initiation guide. dr said he will start some patients and get some experience with the medication. I recommended Senokot-5 <font color=blue><b>CHUDAKOB's query on 03/30/2011</b></font>What other question could you have asked rather than who he has started on Butrans that would help you move the call forward?<font color=green><b>BROOKAM's response on 04/01/2011</b></font>dr started the conversation with that, I simply was in conversation with him, but I have lunch with him next week and am going to say dr you told me xyz benefits you saw in Butrans in our first conversation at lunch regarding Butrans, now it's been a few weeks, how do you think Butrans is a benefit to your patients or help me understand where Butrans fits into your practice?<font color=blue><b>CHUDAKOB added notes on 04/01/2011</b></font>OK. Thanks for the clarification.
PPLPMDL0020000001					
	Cleveland	OH	44102	3/23/2011	I talked to Amonte, Pharmacist, about Butrans stocking and scripts and he hasn't seen any Butrans yet. I asked Amonte what benefits he sees in Butrans for the patients that fill scripts here? Amonte said once weekly dosing is much easier for some patients than having to take a pill around the clock. Amonte said he thinks a lot of doctors who prescribe tramadol, vicodin and percocet will want to prescribe Butrans and decrease the amount of short-acting opioids they are prescribing monthly, which he thinks is a good move in the right direction. We discussed managed care coverage and I recommended Senokot-5 <font color=blue><b>CHUDAKOB's query on 03/30/2011</b></font>What type of information can you provide him that will help him educate his patients on Butrans and how can you sell him to do this? Once you do this, you will begin to have an advocate. <font color=green><b>BROOKAM's response on 04/01/2011</b></font>the patient information booklet, he does like Butrans, thinks it's a good option but majority of patients are Medicaid so come's down to PA being done by doctors. <font color=blue><b>CHUDAKOB added notes on 04/01/2011</b></font>Not just the patient information book, but the contents in the book and how he will verbalize this to the patients.
PPLPMDL0020000001					
	Akron	OH	44320	3/23/2011	Quick call. Asked Dr. Dupstadt what was holding her back. Why hasn't she written her first Butrans Rx. She said that the main issue was insurance and I reminded her of the benefits of the savings cards.
PPLPMDL0020000001	South Euclid	OH	44121	3/23/2011	Window call...Reviewed the patient types for oxycontin and Butrans. Explained that both are covered on BWC and savings cards available for commercial patients. Gave him an FPI and initiation guide. He said he would look
PPLPMDL0020000001	Cleveland	OH	44113	3/23/2011	worked anesth dept- dr. nickels and Laura Stith, NP- see call notes
PPLPMDL0020000001	Lyndhurst	OH	44124	3/23/2011	Quick call...reviewed the Butrans indication and patient type. I reminded him that most patient will start on the 5mcg/hr dose. Asked him to give commercial patients savings cards. Nothing learned.
	Cleveland	OH	44114	3/23/2011	I talked to dr about the 1 patient she started on Butrans, dr said patients doing well so she's happy. I asked dr if she could think of 2 more patients that are on short-acting opioids like that patient was, and pain isn't controlled so Butrans could be an appropriate option and showed dr Butrans initiation guide. dr said she will think about it and when she sees the patients today she'll keep Butrans in mind. We discussed Medicaid and workers comp coverage for Butrans. I recommended Senokot-5
PPLPMDL0020000001					
	Cleveland	OH	44114	3/23/2011	dr said he hasn't started anyone on Butrans yet, but he has a few patients in mind to start on Butrans. I asked dr who he was thinking of and why is he waiting so long to try Butrans in 1 patient? dr said he thinks a few patients taking Vicodin or percocet, that ask him for more pills, he might consider Butrans for them. I showed dr Butrans initiation guide, and said if patients aren't controlled on short-acting opioids and they are asking for something different, a different medication, then yes consider Butrans for those patients. I asked dr to consider 2 patients to start on Butrans. dr said he will do his best to think of 2 patients and try Butrans in them and let me know what happens. I recommended Senokot-5
PPLPMDL0020000001					
	Bedford	OH	44146	3/23/2011	Dr Moufawad said he has been starting a few patients on Butrans every week. I asked him how the patient we spoke about last week is doing & he said now that he is on the 5mcg strength he is doing well. Dr Moufawad said he is still gauging what each strength of Butrans is "equivalent" to. He also said he has not put anyone on Butrans plus another opioid medication because he wants to become more familiar with Butrans alone before adding other opioids on top if appropriate. Asked Amber what the result of the worker's comp prior authorization was & she said she has not heard back from them. She said that it could be that they are not going to put up much of a fight & that sometimes managed care companies do that just to delay things. She said she would let me know if she hears anything back.
PPLPMDL0020000001					
	Fairlawn	OH	44333	3/23/2011	Dr. Parisi has initiated therapy for 2 patients. I asked him who he started therapy on and he said he didn't know of the top of his head. I asked if the patients had any issues finding Butrans or insurance issues and he happily said they did not. Did a total office call and explained to Justina the value of the savings cards.
PPLPMDL0020000001					
	University Heights	OH	44121	3/23/2011	Asked doc if he has patients that could benefit from a long acting CII delivery 7 days of analgesia in one dose. He said his patients like taking their meds every 4 hours. I asked him to try Butrans for appropriate patients before they starting taking tablets q4h.
PPLPMDL0020000001					
	Akron	OH	44313	3/23/2011	Spoke with pharmacist. Introduced Butrans and the FPI. Asked him if he would consider stocking Butrans and he would need to see a Rx first. Left some patient medication guides.
PPLPMDL0020000001	Hudson	OH	44236	3/23/2011	Dr Seiple said he has not yet prescribed Butrans. I reminded him that he was excited about it when we spoke about it at lunch & asked why he hadn't written yet. He said it was a matter of not seeing the right patient. He said it is difficult to convince some patients to be on something long-acting and/or transdermal. He said patients who have been on other transdermal systems & didn't like them can't be persuaded to try another. I asked if he sees a lot of patients like that & he said no. I asked what types of chronic conditions he sees that cause pain. He mentioned lumbar/spinal stenosis & osteoarthritis. He said he likes that Butrans is buprenorphine because he does not consider it as addictive as other opioids/full agonists. I reminded him that Butrans is CII & does carry abuse & addiction potential. He said he also likes that it is once-a-week as it avoids getting patients on the "vicious cycle" of taking around-the-clock oral meds. Reminder of savings cards & Senokot-5.
PPLPMDL0020000001					
	Shaker Heights	OH	44122	3/23/2011	Quick call- Introduced Butrans to Dr Zivic, delivering 5 core messages. He said that he did treat patients who fit that indication & mentioned patients with osteoarthritis. Presented initiation guide & showed pg 6 to help Dr Zivic in positioning Butrans. He said it seemed "interesting". Discussed savings cards for commercial insurance patients & let him know I have a lunch coming up so we can discuss Butrans further.
PPLPMDL0020000001					
	Beachwood	OH	44122	3/23/2011	Quick call with Dr Tabbaa between patients- reminder for savings cards for Butrans & OxyContin. Spoke with Jim (nurse) who said they were actually just trying to call a patient who Dr Tabbaa had started on Butrans to see how they were responding to it. He said Dr Tabbaa has been prescribing it. Discussed savings cards for Butrans- we checked stock & they still have some left. Also gave him new OxyContin savings cards to replace old cards. He said I could follow up next week to see if I could get more time with Dr Tabbaa since today was too busy of a day.
PPLPMDL0020000001					
	Warrensville Heights	OH	44122	3/23/2011	Dr Brooks said he has started 3 patients on Butrans & has had great results. I asked him to tell me about the patients he chose for Butrans & he described each of them. He said one patient who had walked with a limp because of their pain no longer has an altered gait & is very happy with her results with Butrans. He said all 3 patients he started on Butrans had been opioid-naïve & that he started them at the 5mcg dose. He said he has titrated one of the patients to the 10mcg but has not needed to do so for the others. He also said he offered Butrans as a treatment option to a patient who he suspected of "doctor shopping" & that the patient did not want to be prescribed Butrans after Dr Brooks told him about it. Dr Brooks said he likes that Butrans is transdermal & he considers it a "less strong" opioid. Reminded him that Butrans is CII & like all opioids, does carry abuse & addiction potential. He said he plans to continue to prescribe Butrans where appropriate. Senokot-5 reminder.
PPLPMDL0020000001					
	Cleveland	OH	44113	3/23/2011	dr said he started 6 patients on Butrans and needed more Butrans patient savings cards. dr has been starting patients that are taking tramadol and not controlled and instead of increasing pills, he's converting them to Butrans. dr said patients like the Butrans application dvd/booklet so he wanted more of those. I told dr it was great that he's been considering Butrans as an option for patients and gave dr Butrans initiation guide and asked him to continue thinking of patients to start on Butrans. dr said he will do that and asked that I follow-up next week to see if they need more dvd/booklets or savings cards. I recommended Senokot-5 <font color=blue><b>CHUDAKOB added notes on 03/30/2011</b></font>Amy, great job of selling Dr. Bohl and very good next call objective on how is he explaining Butrans. Keep up the good work!
PPLPMDL0020000001					
	Bedford	OH	44146	3/23/2011	Spoke with Roberta (MA) to follow up on the Butrans prior authorization she & Dr Haddad had told me about last week. She said they ended up switching the patients medication because for that patient worker's comp was saying Butrans was not covered. I asked if she knew any other details regarding what medications they required but she did not & she did not have the paperwork to reference. I asked if any other managed care issues with Butrans have occurred & she said she had not had any, however, Halley also handles them & she was not in for me to speak with. Roberta said it is possible that worker's comp didn't cover it because the patient also had Medicaid. She said I could come in next Wednesday evening to see if I could catch Dr Haddad.
PPLPMDL0020000001					
	Cleveland	OH	44120	3/23/2011	I talked to dr about Butrans 5 core messages, initiation guide and Butrans patient savings cards. dr said she forgot about Butrans and wanted to know what the insurance coverage was for Medicaid. We discussed Medicaid, workers comp and commercially insured patients being able to use Butrans patient savings cards. dr said she has some patients on Vicodin and Percocet that do ask her for something else as their pain isn't controlled with the short-acting opioids. I told dr that's where she can consider Butrans and showed Butrans initiation guide, opioid experienced section and we discussed proper tapering of opioids and initiation of Butrans. I asked dr to think of 2 patients, like we discussed, to start on Butrans and get some clinical experience. I recommended Senokot-5
PPLPMDL0020000001					
	Cleveland	OH	44113	3/23/2011	dr said he hasn't started anyone on Butrans yet but has talked to some of his colleagues and his only concern was that Butrans was an agonist/antagonist. I explained the Mechanism of Action of Butrans and showed Butrans FPI, section 12.1. dr asked if he could get information from Purdue about using short-acting opioids, like Vicodin, with Butrans, as he wanted to be sure his patients wouldn't be going through withdrawal. I showed dr Sections 2.2 and 2.4, Butrans fpi, with information on his question but dr still wanted me to fill out medical information request form, so I did that electronically. dr said he's thinking of patients on 10mg Vicodin, 4x/day so at 40mg/day, I told dr he could think of Butrans there but would have to taper that patient properly and showed dr Butrans initiation guide with this information. I asked if dr had patients taking 5mg Vicodin, 3x/day, dr said yes a lot of patients are on that dosing schedule. I told dr he could think of that 15mg Vicodin patient too. dr said he will try
PPLPMDL0020000001					
	Cleveland	OH	44104	3/23/2011	I talked to dr about patients he feels are appropriate for Butrans, showed Butrans initiation guide and dr said he has patients on Vicodin that aren't controlled and call office asking for something different so instead of going to Percocet dr said he will consider Butrans for a few of these patients. We discussed proper tapering and initiation of Butrans for those patients currently taking short-acting opioids. I asked dr to start 2 patients on Butrans and get some clinical experience with the medication. dr said he will try it. We discussed Medicaid and commercial plan coverage for Butrans. I recommended Senokot-5
PPLPMDL0020000001					
	Cleveland	OH	44104	3/23/2011	dr said he started another patient on Butrans but patient was a dual eligible-Medicaid/Medicare Part D and they wanted a Prior authorization for this patient and he's not sure if the patient has to pay cash for Butrans 10mcg or will fall under Medicaid's co-pay amount. dr said this patient was taking percocet, not controlled and didn't want to take more pills and wanted a different solution so he thought Butrans would be a great option. I told dr that was great he's started 2 patients on Butrans and asked if he could think of 2 more patients with Medicaid or commercial plan coverage as patients with commercial insurance can use the Butrans patient savings cards. I recommended Senokot-5 <font color=blue><b>CHUDAKOB's query on 03/30/2011</b></font>Amy, this is what you wrote in your call note "...and asked if he could think of 2 more patients with Medicaid or commercial plan coverage" Why Medicaid? <font color=green><b>BROOKAM's response on 04/01/2011</b></font>because that's the MAJORITY in their practice, not a lot of commercial and a LOT of Medicare Part D. <font color=blue><b>CHUDAKOB's query on 04/01/2011</b></font>Asking him to look for Medicaid patients is asking him to fail. While I know you have a few scripts from him, this is not going to gain you much business. <font color=green><b>BROOKAM's response on 04/05/2011</b></font>thanks for your opinion Barry <font color=blue><b>CHUDAKOB added notes on 04/06/2011</b></font>We'll see where he goes from here.
PPLPMDL0020000001					
	Cleveland	OH	44114	3/23/2011	I talked to John, PA, about patients he feels are appropriate to start on Butrans and showed Butrans initiation guide. John said these patients on Vicodin or percocet that are taking 3-4 pills a day and wanting more pills is where he feels Butrans would be a better option. I talked to John about recommending Butrans for those patients that call in and tell the staff that their short-acting opioids not working and asking for something else to control their pain. John said he will recommend Butrans for more patients as Dr. Katz only has 1 patient on Butrans and Dr. Marshall hasn't started anyone. I recommended Senokot-5
PPLPMDL0020000001					

PPLPMDL0020000001	Cleveland	OH	44113	3/23/2011	i talked to Laura,NP,with Dr.Nickels and asked Laura what she remembered about Butrans? Laura said honestly nothing.i told Laura Butrans 5 core messages,discussed Butrans initiation guide and Butrans patient savings cards.Laura said Butrans being a transdermal medication,as a patch dosed once a week is for a specific patient.I asked her what that meant? Laura said a patient who she trusts will rotate the patch every week and know how to apply properly.i showed Laura Butrans application dvd/booklet and said this is an educational tool to assist you in that discussion with that particular patient.Laura loved that and said that would help as they dont have time to spend 15minutes or more explaining this patch to the patient.I asked Laura if she treated patients daily that were taking Vicodin,Lortab or Norco and not controlled,so telling her that their short-acting opioids arent working? Laura said yes,i referred Laura to the Butrans initiation guide and said thats where you can think of-font color=blue><b>CHUDAKOB's query on 03/30/2011</b></font>And your next call objective is...?<font color=green><b>BROOKAM's response on 04/01/2011</b></font>i thought i did sorry!! haha yea my next call objective is that she will START patients!! haha when i see her next Thursday, we'll see what she says to me. (if she started a patient on Butrans, seeing she remembered NOTHING about Butrans!!) SO im only going to say, Laura,BUTRANS, what are the benefits you see in Butrans for your patients?<font color=blue><b>CHUDAKOB added notes on 04/01/2011</b></font>Even if she sees benefits, will she write without Nichols approval? Looks like you will have to sell her on making up her own mind on this.
PPLPMDL0020000001	Independence	OH	44131	3/24/2011	Asked Dr Jack what is holding him back fro prescribing Butrans. He said he really doesn't know & that he just needs to think of it. I reminded him that I have been visiting him almost weekly since January in effort to remind him & asked how often he sees patients who he starts on Vicoden for a chronic issue. He said he sees them daily. I reminded him that those are potential Butrans patients. He looked at the initiation guide & read through some of the pages. He said he likes that it is a transdermal & is once-a-week & that it could potentially avoid getting patients on an around-the-clock short-acting medication. I told him those were all reasons to think of it when he sees the appropriate patient. I asked him how many patients he felt would be a fair trial of Butrans so he could get clinical experience. He committed would prescribe Butrans for one patient a day for the next month & added that when he says he will write, he does. OxyContin savings card reminder.
PPLPMDL0020000001	Brooklyn	OH	44144	3/24/2011	Spoke with Audrey (MA) who said Dr Deeb was not seeing any reps today. Discussed Butrans (indication, delivery system, once-a-week application, & appropriate patient type/positioning). She said it sounded like something Dr Deeb would be interested in hearing about & suggested I try back next week (Mon, Tues, or Thurs) in the morning to see if he could see me.
PPLPMDL0020000001	Euclid	OH	44119	3/24/2011	Spoke with doc about the Butrans indication and positioning. Reminded him that he previously said he would prescribe Butrans. I asked him what benefits he sees in Butrans. He asked again about the dosing frequency. I confirmed that it is once a week application. I asked him to start appropriate patients at 5mcg/hr for commercial patients and give a savings card. He said ok. Reminded doc of the Ryzolt savings cards as well.
PPLPMDL0020000001	Independence	OH	44131	3/24/2011	Quick call with Dr Rob. Got reminder for Butrans once-a-week application with seven days buprenorphine delivery & also reminded him of appropriate patient type, asking him to prescribe Butrans instead of starting someone with a chronically painful issue on Vicoden around-the-clock at low doses. Also spent time with Maria going over Butrans, managed care, & savings cards for both Butrans & OxyContin.
PPLPMDL0020000001	Warrensville Heights	OH	44122	3/24/2011	Spoke with Debbie (nurse). She said they are still working out how to address the rep policy so that we can access physicians. Debbie said they do not need any more Butrans patient education information or savings cards for now. She did not know if Dr Shin has been prescribing it. Reviewed appropriate patient type/positioning. She said she would remind him.
PPLPMDL0020000001	Fairlawn	OH	44333	3/24/2011	Spoke with Dr. Lefkovitz briefly through the window. I asked him if a titration guide would help him to better understand what the appropriate patient type for Butrans looked like. He told me to leave it and walked away.
PPLPMDL0020000001	Cleveland	OH	44102	3/24/2011	I talked to Gurjeet Bar,Pharmacist,about Butrans fpi,5 core messages,initiation guide and Butrans patient savings cards.Gurjeet hasnt seen any scripts for Butrans,but we discussed appropriate patients and Gurjeet said he's a newer staff pharmacist so asked me to follow-up with Vicki,the other Pharmacist tomorrow.discussed OxyContin as an option for those patients needing more than 80mg oral morphine equivalent,with 7 tablet strengths and we discussed managed care coverage for OxyContin and OxyContin savings cards.i recommended Senokot-S
PPLPMDL0020000001	Stow	OH	44224	3/24/2011	Introduced Butrans, reviewed FPI, indication, dosing and initiation, appropriate patients, 5 core messages, bowed warning. HE asked how often is it dosed again and does it stay on and I reviewed dosing and showed clinical studies saying that they did not experience falling off and how to tape it if it is starting to lift on the edges with first aid tape. SHOWED application. Reviewed managed care and savings cards and BWC coverage. I asked if this is something he can see himself writing and he said yes.
PPLPMDL0020000001	Stow	OH	44224	3/24/2011	Spoke to Jeff and he said they are not stocking Butrans they are waiting for Dr Bressi to write a script. I told him that he was asking if they were stocking and that he is going to write. I told him 5 and 10mcg are the starting doses and that we have a savings card program and participate in relay health voucher.
PPLPMDL0020000001	Akron	OH	44333	3/24/2011	At this point Dr. Brown is still trying to gain support from PCP in an effort to build her practice. She has already committed to writing Butrans for both opioid naive and experienced patients.
PPLPMDL0020000001	Westlake	OH	44145	3/24/2011	Dr said that he is trying to wean all of his vicodin and percocet patients down. I told him that some of these patients could be appropriate for Butrans. We discussed his patients who he is weaning down to about 3 5mg vicodin per day and that these are the patients where he can initiate Butrans.
PPLPMDL0020000001	Cleveland	OH	44195	3/24/2011	worked neurology dept-met medical secretaries and had to leave Butrans fpi,initiation guide and my business card for Dr mays,dr kriegler,dr spears and dr stillman;worked physical medicine&rehabilitation dept-had to leave Butrans fpi,initiation guide and my business card for Dr.Hou,Dr.Reddy,Dr.Jedlicka and Dr.Schaefer with medical secretaries
PPLPMDL0020000001	Highland Heights	OH	44143	3/24/2011	Spoke to Kristen about the stocking and movement of Butrans. She confirmed that they have the 5 and 10mcg/hr but she has not seen any scripts. She asked how Butrans is doing and if it is being prescribed. I explained that the Hillcrest Pain Mgmtt is prescribing Butrans. They do see some scripts from Dr. Laham. I explained the contents of box and application and disposal of the Butrans. We asked her if she would dispense a script for 2 Butrans (breaking a box of 4). She said not typically because it would be too difficult to sell the opened box. She likes transdermal medications. Kristen and Rachel both said that customers are still calling asking for the "old" oxycontin. They are stocking all but the 15, 30, 60mg tablets.
PPLPMDL0020000001	Euclid	OH	44119	3/24/2011	Spoke to Erin, the fill in pharmacist, about the stocking of Butrans. SHe confirmed that they had both the 5 and 10mcg/hr Butrans. She was not aware of any prescriptions as she was just filling in. I discussed the contents of the box and explained the application and disposal of Butrans and the voucher program. Left FPI for staff pharmacists.
PPLPMDL0020000001	Cleveland	OH	44125	3/24/2011	Spoke with Christine who said she had not yet dispensed Butrans. She said it depends on the customer on whether or not she counsels them when filling a transdermal product prescription. Also gave her new OxyContin savings cards. Reviewed with her how they are used & reminded her that patients with any type of government insurance are not eligible to use the cards. She said she has one customer in particular who can really benefit from the copay reduction.
PPLPMDL0020000001	Cleveland	OH	44113	3/24/2011	had lunch with Dr.Raheja
PPLPMDL0020000001	Cleveland	OH	44113	3/24/2011	i talked to Mike,Pharmacy manager,about doctors prescribing Butrans and gave Butrans initiation guide and showed Mike Butrans Patient information booklet/dvd and told Mike i would follow-up with him once Dr.Nickels and Dr.Raheja start writing Butrans.
PPLPMDL0020000001	Westlake	OH	44145	3/24/2011	Dr said that Butrans is not on formulary yet, but he is still meeting with P&T and is hopefully. He said that he has received very good feedback regarding Butrans. He said that the patient said that Butrans lasted the full 7 days whereas he used to have to prescribe Duragesic every two days. I reminded him we have no head to head data with Duragesic. The Dr said he would continue to prescribe Butrans.
PPLPMDL0020000001	Cleveland	OH	44102	3/24/2011	i talked to dr about Butrans 5 core messages,initiation guide and Butrans patient savings cards.dr said she hasnt had any patients come to mind yet to start on Butrans.i asked dr if she see's patients daily that ask her for something different,if their short-acting opioids like Percocet or Vicodin,arent working? dr said yes patients will complain to her that they need more pills or what they have isnt controlling their pain.i told dr thats where Butrans could be an appropriate option,showed Butrans initiation guide and asked dr if she could think of 2 patients to start on Butrans? dr said she will think about it.i told her Butrans patient savings cards are for commercially insured patients and medicaid patients have to have a prior authorization done,we discussed those requirements.i recommended Senokot-S
PPLPMDL0020000001	Fairlawn	OH	44333	3/24/2011	I have continued to try and identify a specific patient type for Dr. Oyakawa to initiate Butrans therapy. He committed to writing a Rx today, however left before giving me detailed information about for who.
PPLPMDL0020000001	Stow	OH	44224	3/24/2011	Dr came back and asked what he needs to do to start writing Butrans and I said just write a prescription, it is stocked at most pharmacies. HE asked about dosing and initiation again, he said he has alot of patients who would fit the profile. HE asked how it is staying on and I said in our studies it does not show it falling off. We reviewed managed care and savings cards. I asked if he recieved a letter on speaker training and he said it sounds familiar. I informed him of the date and he said that he likes to write the product first before speaking on it and I said this is just a training. HE said he will start writing it today.
PPLPMDL0020000001	Parma	OH	44134	3/24/2011	Quick check-in call with Dr Hernandez- He said he was having some trouble with a patient being able to get a prescription for Butrans filled because he wrote it for one patch so the patient could try it out. He said it was a Rite Aid & gave me the phone number for the pharmacist there, Paul. Paul told the patient that Butrans comes up as an "unbreakable carton" in his system & also said it was a parameter put in place by "the manufacturer". I told Dr Hernandez that I would look into this but also that this is not something that our company sets & that it is an issue with Rite Aid's system. I let him know I would find out how we can remedy this from happening further & would report back to him. Dr Hernandez was appreciative & said this is so far the only issue he has had with Butrans.
PPLPMDL0020000001	Fairlawn	OH	44333	3/24/2011	Quick call. Asked Dr. Meil if a titration guide would help him identify a Butrans patient. He took it and walked away.
PPLPMDL0020000001	Stow	OH	44224	3/24/2011	Steve said he has not written yet. I asked if he sees this as a benefit and what type of patient would he write it in. HE said he definately sees it as a benfit and would write it in a patient who is opioid experienced just coming in. HE asked how to initiate patient who is coming in on opioids. WE reviewed 10mcg and tapering process. We reviewed dosing and savings cards
PPLPMDL0020000001	Richmond Heights	OH	44143	3/24/2011	SPoke to Mel about the stocking and movement of Butrans. Confirmed that he has both 5 and 10mcg/hr. He could not recall the prescriber. We discussed the positioning and he asked if it it used to get patients off of oxycontin. Explained the indication is only for the treatment of pain. Discussed the application of the patch and how to keep it on. He asked if Purdue is reimbursing for those that fall off. Told him no and that proper application if key. He said he has not had any problems with them falling off.
PPLPMDL0020000001	Cleveland	OH	44113	3/24/2011	i talked to Justin,Pharmacist,about doctors who are writing Butrans.Justin said Dr Bohl and Dr Shen have started a few patients so they have Butrans in stock and will be sure to have all 3 dosage strengths in stock for patients.i showed Justin the Butrans patient application dvd/booklet and he thought it would help to have a couple of these in pharmacy,in case the dr forgets to give it to the patients.i gave Justin 2 Butrans application dvd/booklets and told him i would follow-up next week to see if they need more.
PPLPMDL0020000001	Akron	OH	44333	3/24/2011	Asked Becky if she has had another opportunity to prescribe Butrans. She said she had not since she rarely treats chronic pain but said she believed it was the best option for patients who had moderate pain that require ATC analgesia.
PPLPMDL0020000001	Solon	OH	44139	3/24/2011	Coordinated conference call with Dan and Mike because Dan wanted to express his disappointment with Purdue about one section of the contract. Dan said he interpreted the contract to mean that Purdue will pay MH the highest rebate based on the total % of duals/US in their total population versus on a per plan basis. He feels we are nickel and diming him with this and felt it was misrepresented. He agreed the total amount to be paid will not be impacted too much, however, it's still a big deal to him. Dan Doucette expressed our view that we are surprised this was not addressed in the negotiations as many other sections of the contract were. Dan Best said he understands what the contract reads but still feels it was misrepresented. They will work to get it their data so we can make the payment to MH as soon as possible.
PPLPMDL0020000001	Cleveland	OH	44113	3/24/2011	i talked to dr about Butrans 5 core messages,initiation guide,Butrans REMs and Butrans patient savings cards.dr said he has patients on tramadol that do complain about their short-acting tramadol not working and Butrans could be a great option dr likes that Butrans is dosed once weekly and is transdermal and he said he'll try Butrans in a few patients.dr was leaving today for florida so he said it will be next week before he can start anyone on Spoke with Jessica, one of the pharmacists. Left patient education guides so when patients get Butrans prescription filled she would have the opportunity to explain where and how to apply-<font color=blue><b>CHUDAKOB's query on 03/30/2011</b></font>What did you speak with Jessica about and how did she respond? This is what should be in your call notes.<font color=green><b>LAPMACA's response on 04/01/2011</b></font>She was busy but responsive. I went over the patient education guide with her and left some behind she could educate patients on application and disposal.<font color=blue><b>CHUDAKOB added notes on 04/01/2011</b></font><b>Ok.
PPLPMDL0020000001	Fairlawn	OH	44333	3/24/2011	

	Cleveland	OH	44102	3/24/2011	dr said she hasnt tried Butrans in anyone as she was waiting for a patient assistance program for the 1 patient she has in mind to start on Butrans.i told dr i empathized with her and that patient but Purdue doesnt have this type of program for Butrans at this time.i asked dr if she had patients in her practice,taking Vicodin or Percocet,that ask her for more pills or say that their current medication isnt controlling their pain? dr said yes a lot of patients will ask for something else,but most are stabilized on their short-acting opioids.i asked dr if she had 2 patients on Vicodin or Percocet,workers comp or commercial insurance,that she felt Butrans would be an appropriate option? dr said yes and asked about initiating Butrans as she thought Vicodin could only be used for 24hrs once Butrans was started.i showed dr Butrans FPI,initiating therapy and maintenance of therapy sections,discussed tapering short-acting opioids and initiating Butrans.dr said she'll give Butrans a fair trial
PPLPMDL0020000001	Brooklyn	OH	44144	3/25/2011	Spoke with Kristen who said that she has not personally dispensed Butrans but she knows they did need to order a box, so the other pharmacist has dispensed it. She did not know who wrote the prescription. Reviewed appropriate patient type/positioning. She did not have any recommendations for practitioners who may be good to call on for Butrans as she said they get so many from so many different places. Gave her new OxyContin & Ryzolt savings cards & reviewed how they are used. Reminded her they cannot be used for government insurance including Medicare & Medicaid.
PPLPMDL0020000001	Mayfield Village	OH	44143	3/25/2011	Window call...Gave doc a titration guide and reminded him of the appropriate patient type for Butrans. Asked him to try for a commercial patient and give a savings card.
PPLPMDL0020000001	Cleveland	OH	44102	3/25/2011	i talked to dr at window as the office was very busy.dr said he just saw Andrea and did discuss some patients he could start on Butrans.we discussed appropriate patients to start on Butrans,gave Butrans initiation guide and discussed workers comp and commercial plan patients trying Butrans.dr said he will start a few patients.i recommended Senokot-S
PPLPMDL0020000001	Garfield Heights	OH	44125	3/25/2011	Introduced Butrans to Dr Gupta. Delivered 5 core messages & reviewed black box warning. Dr Gupta asked if Butrans is like Duragesic. Reviewed appropriate patient type, presenting initiation guide & explaining that patients on fentanyl were excluded from our studies. He asked about coverage & cost. Discussed managed care & presented savings cards. Offered OxyContin savings cards but Dr Gupta said he has not patients on it at all. Reminded him that savings cards are for cash-pay & commercial insurance patients & cannot be used for patients with any type of government insurance. He then walked out & went into a patient room.
PPLPMDL0020000001	Beachwood	OH	44122	3/25/2011	Introduced Butrans to Dr Warren, delivering 5 core messages & reviewing boxed warning. He said that as a rheumatologist, he sees many patients who have chronic pain. Presented initiation guide & used page 6 to show appropriate patient types/positioning. Dr Warren asked if Butrans was "easier to get". I asked him to clarify-he asked about managed care coverage. Reviewed coverage, emphasizing commercial insurance & gave him savings cards, explaining \$15 co-pay. He asked if patients could suck on the patches "like the other one". Showed FPI section 11 & explained adhesive matrix. He said he liked the idea of potentially avoiding around-the-clock regimens of short-acting opioids for his patients & also said he likes to have a "new option". Recommended OxyContin for appropriate patients beyond Butrans & presented savings cards.Reviewed savings cards & Butrans application & patient booklets with Donny (nurse) & asked him to call me if any questions about Butrans arise- he agreed.<font color=blue><b>CHUDAKOB's query on 03/30/2011</b></font>Did you give him the fair balance of Butrans regarding its abuse potential after he discussed sucking on the opioids?<font color=green><b>APSEGAS's response on 03/31/2011</b></font>Yes. I reminded him that because Butrans is an opioid, it does carry abuse & addiction potential & is a CII. I'm sorry for not adding that to the note.<font color=blue><b>CHUDAKOB added notes on 04/01/2011</b></font>Ok. When you have the opportunity to correct the physician, be sure to include that in your call notes. Thanks!
PPLPMDL0020000001	cleveland	OH	44135	3/25/2011	Quick call, I reviewed the 5 key messages of Butrans and asked his thoughts. He said that it looks like it would be a good option for some patients and he'll take a look at the info. I let him know I would follow up next week to get his thoughts.
PPLPMDL0020000001	Cleveland	OH	44109	3/25/2011	i talked to Raban,Pharmacy manager,about Butrans stocking as they havent ordered Butrans yet.Raban said once he starts seeing scripts for Butrans,he'll order the dosage strengths.we discussed importance of stocking before the 1st script so patients dont have to be turned away and wait 24hrs.we discussed Butrans initiation guide and Butrans patient savings cards.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	3/25/2011	i talked to Masoud,Pharmacist,about Butrans stocking and Masoud said they have seen a couple Butrans scripts here and we discussed who's prescribing Butrans in area.we discussed Butrans initiation guide and i asked Masoud if he would recommend Butrans to any patients that tell him their short-acting opioids arent controlling their pain? Masoud said he would do that as he thinks Butrans is a great option being transdermal and the dosing of once a week is much easier for some patients.i recommended Senokot-S
PPLPMDL0020000001	Brooklyn	OH	44144	3/25/2011	Asked Dr Detwiler if we could continue discussion about Butrans. He told me that it is "very unlikely that I will ever prescribe that medication." He went on to tell me that his patients will not pay for a branded medication when there are generic alternatives. He said that they end up changing doctors to find one who will prescribe them generics. I reminded him of the savings cards & that commercial insurance patients pay only \$15. He said that even when there is a savings card, he gets letters from the insurance companies saying that they are not covering the medication. He said just because there is a savings card doesn't mean he will ever prescribe something. Dr Detwiler said he realizes I am just doing my job but said again that it is "highly unlikely" that he will ever prescribe. He did not give me the opportunity to respond & walked into a room.<font color=blue><b>CHUDAKOB added notes on 03/30/2011</b></font>Looks like you had a tough call. Nice job hanging in there. Keep trying to bring him value. I know you can sell him on the appropriate patient type.
PPLPMDL0020000001	MAYfield Heights	OH	44124	3/25/2011	Spoke to Jesse about the stocking of Butrans. He confirmed that they are stocking 5 and 10mcg and have dispensed it a couple of times. He does not recall who prescribed it. I explained how the script should be written as it is a 7 day application. Discussed the contents of the box, application and disposal. There have been no issues with coverage.
PPLPMDL0020000001	Cleveland	OH	44109	3/25/2011	dr said he hasnt tried Butran in any patient yet and really hasnt thought much about Butrans.i asked dr what benefits he saw in Butrans? dr said once weekly dosing was easier for some patients and he liked that Butrans was a transdermal formulation.i asked if dr had 2 patients,taking Vicodin or Percocet,but pain still not controlled and patients are asking for something different? dr said yes he hears that complaint from patients.i showed dr Butrans initiation guide and told him thats where he can initiate Butrans and we discussed workers comp and commercial plan insurance coverage for Butrans.dr said he'll think about Butrans for a few patients.i
PPLPMDL0020000001	Cleveland	OH	44109	3/25/2011	i talked to dr about patients she feels are appropriate for Butrans,showed dr Butrans initiation guide and discussed Butrans patient savings cards for commercial plan patients.dr said she just hasnt thought of Butrans but did have a couple patients in mind that are taking vicodin and percocet and pain's not controlled so Butrans could be an option but she needs to talk to these patients. i asked dr to think of 2 patients that she can start on Butrans to give it a fair trial.dr agreed.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44130	3/25/2011	Quick call through the window- Butrans once-a-week application & indication messages & reminder of savings cards for Butrans & OxyContin. Also recommended Senokot-S for opioid-induced constipation.
PPLPMDL0020000001	Richmond Heights	OH	44143	3/25/2011	Quick call.....discussed the Butrans indication and positioning. He said he really wants to hear more about Butrans but he had to leave for the hospital. He asked me to come back next week or to see him in Mentor. I told him I would come to Mentor.
PPLPMDL0020000001	Cleveland	OH	44143	3/25/2011	Quick call.....asked doc if he see a benefit in a long acting CII for his patients. He said maybe and asked about the cost. Told him commercial patients can get Butrans for about \$15 with a savings card. He said great. Nothing else learned.
PPLPMDL0020000001	Cleveland	OH	44109	3/25/2011	worked internal medicine dept:had to leave Butrans fpi,initiation guide and patient information booklet and my business card for Dr.Lindheim,Dr.Harrington,Dr.Falck-Ytter and Dr.McCreery. Left each one of them Oxycontin fpi,managed care/formulary sheet and OxyContin conversion guides.worked physical medicine&rehabilitation departments - see call notes on PM&R doctors
PPLPMDL0020000001	Richmond Heights	OH	44143	3/25/2011	Doc said he has written Butrans several times already. His issue is figuring out the exact conversion from vicodin/percocet to Butrans as our "conversion guide" does not seem exact.
PPLPMDL0020000001	Independence	OH	44131	3/25/2011	Quick call with Dr Pai. He said he has not heard any feedback yet from the patient that he prescribed it for, but will continue to look for other patients to start on Butrans in the meantime. Discussed managed care & prior authorization with Jill.<font color=blue><b>CHUDAKOB's query on 03/30/2011</b></font>Ashleigh, look at your next call objective. If he has feedback he will tell you. Maybe get him to discuss why he chose Butrans for the patients he did and sell him on prescribing for others based on the same decision. What do you think?<font color=green><b>APSEGAS's response on 03/31/2011</b></font>I agree- that is a better objective.<font color=blue><b>CHUDAKOB added notes on 04/01/2011</b></font>Ok. I will be interested to hear how it works!
PPLPMDL0020000001	Westlake	OH	44145	3/25/2011	Dr told me that he had started another new patient on Butrans. The patient was on vicodin and he thought he started with the 5mg dose. I asked what made him think to use Butrans in this patient, he said that the patient wanted to take more tablets and he thought they might do better on a long acting. I discussed managed care with the staff and there have not been any major issues. Reminded them to recommend Senokot S for their patients on opioids.
PPLPMDL0020000001	Cleveland	OH	44103	3/25/2011	i talked to Amy,Pharmacy Manager,about Butrans stocking and Amy said they have 1 carton of Butrans 5mcg,she got 1 script from Dr.Shagal at University hospitals but she couldnt fill the script because she can not open the Butrans carton and dispense anything less than 4 Butrans.Amy said Rite Aid has it locked in their computers to only dispense 4 Butrans,so the doctor was upset and so was the patient but she couldnt change anything in computer.i explained to Amy that i have heard this from another Rite Aid pharmacy and i have spoken with my District Manager already on this issue and he's contacted Purdue corporate for more direction on this issue.Amy wanted OxyContin savings cards as she said Dr.Boyd,Dr Robson,Dr.Celeste and Dr.Talbot all send patients to them and she dispenses OxyContin and a lot of these patients need the savings cards.we discussed Butrans initiation guide,patient application dvd,OxyContin managed care coverage and i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44135	3/25/2011	Quick call, I asked Dr if he had any thoughts about where Butrans would fit into his practice. He said he thinks there is a place, but had not tried Butrans yet. I asked what other info he needs to prescribe a medication for the first time. He took the FPI again to review. I let him know I would try to follow up next week.
PPLPMDL0020000001	Cleveland	OH	44109	3/25/2011	i talked to Erin,Pharmacist,who only had a few minutes but said she hasnt gotten any scripts for Butrans yet,we talked about physicians in area who are prescribing and who i am talking to about Butrans.Erin said once she see's their 1st script she will order Butrans.i explained importance of ordering Butrans now so patients arent turned away and told to wait 24hrs for their medication but Erin said thats her policy.Erin said she does get a lot of Dr.Nickels and Dr.Raheja's patients so if they start prescribing Butrans,she'll definitely order.i recommended Senokot-S
PPLPMDL0020000001	CLEVELAND	OH	44109	3/25/2011	i talked to Rod,Pharmacist,about Butrans stocking and Rod said until he see's scripts for Butrans he's not ordering the medication.we discussed importance of having Butrans stocked so that patients arent turned away and have to wait 24hrs for the medication to be back in pharmacy.Rod said he understood my point but he still wont order Butrans until he see's his 1st script come.we discussed Butrans initiation guide and Butrans patient savings cards.i recommended Senokot-S
PPLPMDL0020000001	Parma	OH	44134	3/25/2011	Allene said she has dispensed at least two Butrans prescriptions. I asked who wrote the prescriptions & she said one was from a physician with the Visiting Nurse Association & she could not remember who wrote the other. She said she does remember that it was for only one system. I asked if there was any problem opening the package & she said they have no issue with that. She said she will dispense whatever number of systems a physician writes for. Gave her new OxyContin savings cards & reviewed usage. She said they do not dispense a lot of OxyContin there, but they do have a few patients who will be able to benefit from the cards.
PPLPMDL0020000001	Copley	OH	44321	3/25/2011	Dr. Machado said that he did not like Buprenorphine because he thought it was too addicting. I went over the abuse potential. He said he would continue to support me with OxyContin but felt unsure about Butrans. I scheduled a lunch.
PPLPMDL0020000001	Parma	OH	44134	3/25/2011	Spoke with James who said he has not filled any Butrans prescriptions at this location that he remembers. He said he did receive the autoshipment of 2 boxes of each strength & has not needed to order more, so he hypothesizes that he has not filled any. Reviewed patient type/positioning. Gave him new OxyContin savings cards & reminded him they are for patients with commercial insurance or cash-pay only.
PPLPMDL0020000001	Cleveland	OH	44103	3/25/2011	dr said he hasnt started any patients on Butrans yet due to the fact he doesnt want to do the prior authorization for his medicaid patients.i asked dr what benefits he see's in Butrans for his patients? dr said he likes that Butrans is transdermal and dosed once a week.i asked dr if there were other medications he prescribes that he believes are beneficial to his Medicaid patients but require a prior authorization? dr said yes he will have Valerie,Medical Assistant,do prior authorizations.i asked dr if that was the case,why not Butrans? dr said i dont know this is a new medication to him and he needs to get more comfortable with it before he starts having Valerie do the prior authorizations.i asked dr to think of 2 patients with commercial insurance or workers comp,that are taking short-acting opioids and not controlled,to start on Butrans.i showed dr Butrans initiation guide and dr said he will think about it.we discussed OxyContin as an appropriate option and managed care coverage
PPLPMDL0020000001	Lakewood	OH	44107	3/28/2011	Dr said that the one patient is doing well and said he was getting good pain relief. He is on the 5mcg dose of Butrans. We reviewed the dosing and how to titrate if necessary. He also tried another patient, but he had Medicare and Pam was not able to get it approved. They still want to try Butrans for the fibromyalgia patient we discussed last time but she has not been back yet. I asked Pam and Dr to continue to gain experience with Butrans and they agreed to start appropriate patients. Reminder that OxyContin is still a long acting option when Butrans may not be appropriate.
PPLPMDL0020000001					

PPLPMDL0020000001	Independence	OH	44131	3/28/2011	Debbie asked about the most common adverse events with Butrans. I showed FPI section 6. She asked if the side effects were greater in the elderly population. Showed FPI 8.5. Reviewed appropriate patient type, dosing, titration, & black box warning. Also discussed application & adhesion (including taping edges with first aid tape if necessary or covering with Bioclusive or Tegaderm). Debbie said she rarely prescribes pain medications but that Butrans seemed interesting. She said she liked that Butrans is a transdermal system & only has to be applied every week.
PPLPMDL0020000001	Parma Heights	OH	44129	3/28/2011	Spoke with Larissa (pharmacist) who said she saw a prescription for Butrans "a couple weeks ago" but that it required prior authorization & ended up being denied. I asked what plan but she did not know. She said they do have it stocked, but she has not dispensed it. Reviewed indication, appropriate patient type, dosing & managed care coverage. Offered more OxyContin savings cards but she said they still have enough.
PPLPMDL0020000001	Brook Park	OH	44142	3/28/2011	Spoke with Doug, he said he thinks they have one patient on Butrans but couldn't remember who's prescribing. We reviewed the medication guide for Butrans and how to instruct patients on proper use and application. He agreed to help educate the patients. We reviewed the initiation guide and appropriate patients. We reviewed OxyContin when Butrans may not provide adequate analgesia. Reminder to recommend Senokot S with opioid
PPLPMDL0020000001	Lakewood	OH	44107	3/28/2011	Dr said that he has not seen an appropriate patient for Butrans, I told him I was getting the sense that it was something else. Dr said to be honest he forgot how to write Butrans and asked me to go over the information again. He said that Drs just get stuck in their routine and it is hard to remember something new. We reviewed the 5 key messages, and the initiation guide. I asked what benefits he sees and he said it would reduce the amount of short acting meds the patients are taking. He said that he will try it and he really does think it will fit into his practice. We reviewed OxyContin as an option when Butrans might not provide adequate analgesia. We also reviewed Ryzolt as a once a day option instead of tramadol around the clock. Asked him to recommend Senokot S with opioids.
PPLPMDL0020000001	Independence	OH	44131	3/28/2011	Quick call at the window- Reminded Dr Reddy of our previous conversation about Butrans & that he had said that he had some patients who he thought may be appropriate for it. Also reminded him of seven days buprenorphine delivery in one application & reviewed appropriate patient type/positioning. Gave him an initiation/titration guide. He said he would use it. Spoke with Kathi (MA)& reviewed Butrans - (indication, appropriate patients, dosing, once-a-week application).
PPLPMDL0020000001	Akron	OH	44333	3/28/2011	I asked Dr. Ahmad why he has not had the opportunity to prescribe Butrans when he clearly has had many patients in mind. He said he has not seen the appropriate patient yet. I reminded him of the ideal patients and asked if he would see any of those patients this week. He said he may and would keep Butrans in mind if so.
PPLPMDL0020000001	Lakewood	OH	44107	3/28/2011	Dr said she hasn't tried Butrans yet, she just keeps forgetting to think of it. We reviewed the Butrans initiation guide and discussed appropriate patient. I asked how many patients she will see this week who are taking 3-4 5mg vicodin per day who complain that it is not controlling their chronic pain. She said she will probably see several of these types of patients. I asked if she would start just a few of these patients on Butrans and she agreed. Reminder about OxyContin as an option when Butrans may not provide adequate analgesia. Reminder about Ryzolt as a once a day option and asked her to recommend Senokot S with opioids.
PPLPMDL0020000001	Parma Heights	OH	44130	3/28/2011	Spoke with Melody (MA) who shared with me that because they are under new management, Dr Saghafi rarely, if ever sees reps. I presented Butrans (indication, dosing, appropriate patient type/positioning) to her & gave her FPI & initiation guide for her to share with Dr Saghafi. She said she feels it is an unfortunate policy, especially for new reps or for those with a product that he has never heard of before. Also left my card if questions arise when Dr Saghafi reviews the FPI & initiation guide. She said she would call me if they ever change the policy.
PPLPMDL0020000001	Independence	OH	44131	3/28/2011	Dr Sundaram said he is sorry to say that he has still not prescribed Butrans. He said that he "feels bad" that I have spoken to him so many times & that he still hasn't written it. I told him not to prescribe out of feeling bad for me & reminded him of the features of Butrans that he has said he liked (once-a-week application, transdermal system). I asked if he felt these aspects of Butrans would benefit any of his patients. He said yes & he promised to look specifically for a Butrans patient this week. Reviewed savings cards for eligible patients.
PPLPMDL0020000001	Lakewood	OH	44107	3/28/2011	Dr said he has not prescribed Butrans and he has not seen the med D patient back in his office yet. He said that he will give it a try. He told me that cymbalta now has an indication for pain and the reps have been pushing him to use it. We reviewed the indication for Butrans and I asked him what benefits he sees in Butrans. He said the 7 day dose and the fact it is a low dose opioid. Dr committed to finding a patient to start on Butrans. We discussed the managed care and savings program. Reminder that OxyContin is still an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Cleveland	OH	44104	3/28/2011	talked to dr at window and asked what did he recall about our last conversation on Butrans and the benefits of Butrans to his patients? dr said he knows Butrans is dosed once a week and is transdermal but couldn't remember insurance coverage. we discussed workers comp and commercial plan patients being able to use Butrans patient savings cards. dr said he'll remember that but had to go.
PPLPMDL0020000001	Cleveland	OH	44195	3/28/2011	worked neurology/pain management and rheumatology departments-had to leave Butrans FPI,initiation guide,OxyContin fpi,conversion guide and formulary grid for every doctor in each department as the medical secretaries said doctors will review information and if they are interested they will call for an appointment
PPLPMDL0020000001	Cleveland	OH	44103	3/28/2011	talked to dr briefly about Butrans and what benefits he saw in Butrans for his patients? dr said once weekly dosing was easier for some of his patients instead of taking pills around the clock but he does feel like Butrans is for a specific patient who will remember to take patch off and rotate patch every week. we discussed patient information booklet/application dvd and dr liked that this was an educational piece he could give to his patients. I asked if dr could think of 2 patients taking Vicodin or Percocet that aren't controlled, for their chronic pain and consider Butrans? dr said he would do that and asked about medicaid coverage? we discussed medicaid and commercial plan patients. I recommended Senokot-S
PPLPMDL0020000001	Lakewood	OH	44107	3/28/2011	Spoke with Bob, we reviewed the Butrans 5 key messages and medication guide. We discussed how to instruct the patient on proper use and application for Butrans. He asked about managed care and we reviewed the formulary coverage and savings program. Reminder about OxyContin as a long acting option and asked to recommend Senokot S with opioid scripts.
PPLPMDL0020000001	Lakewood	OH	44107	3/28/2011	Dr said that he is trying to find the right patient for Butrans, I asked what type of patient he has in mind. He said he is having a hard time finding a patient on 2-3 vicodin per day who are willing to give up their short acting. We reviewed the initiation guide and the fact that patients can continue to take their short acting until efficacy is achieved with Butrans. We discussed the FPI regarding the use of short acting supplemental analgesia. He said that this information has helped him re-think the patient he was looking for and he would like to try Butrans in some patients.
PPLPMDL0020000001	Cleveland	OH	44104	3/28/2011	i talked to dr about benefits he saw in Butrans for his patients. dr said Butrans once weekly dosing is easy, he likes that Butrans is a patch but because Medicaid isn't covering Butrans and he isn't willing to do the prior authorization for medicaid patients to try and get approval for Butrans, he said right now he only has 1 patient in mind that has commercial insurance that he feels could benefit from Butrans. we discussed patients taking Percocet, looking at Butrans initiation guide, and focused on commercial plan patients that dr could try 1-2 patients on Butrans and get some clinical experience. dr said he'll think of 1 patient and see what happens
PPLPMDL0020000001	Cleveland	OH	44109	3/28/2011	worked internal medicine, family medicine and rheumatology departments-had to leave Butrans fpi,initiation guide,business card and OxyContin fpi,conversion guide and formulary coverage sheet for each doctor in each department-follow-up with Linda, rheumatology dept., to book lunch with them and see Dr. Ballou
PPLPMDL0020000001	Akron	OH	44333	3/28/2011	Asked Dr. Shah what types of patients he was prescribing Butrans for and he said all patients who were opioid experienced. I covered information on opioid naive patients and he asked many buying signals including how to initiate therapy for those patients. He asked again if Butrans was scheduled 3.
PPLPMDL0020000001	Cleveland	OH	44103	3/28/2011	i talked to dr about Butrans fpi, 5 core messages, initiation guide, Butrans patient savings cards and Butrans REMS. dr said he does have patients on short-acting opioids that complain about their medication not controlling their pain and always asking for more pills. dr said he thinks the once a week application is easy for some patients and will be tough for others, so a very specific patient for Butrans. I asked if dr had 2 commercial plan patients that are taking tramadol around the clock for their chronic pain but not controlled? dr said yes. I asked him to think of Butrans for those 2 patients and showed Butrans initiation guide. dr said he'll look over all of the information and will consider it for a few patients. I recommended Senokot-S
PPLPMDL0020000001	Independence	OH	44131	3/28/2011	Dr Trickett asked if Butrans can be used in the elderly. Showed FPI 8.5. She also asked how to take patients off of Butrans if she feels they no longer need an opioid due to an improvement in their condition. Showed initiation guide pg 8. I asked her if she sees more chronic or acute pain. She said it really is a "50/50" mixture. I asked what types of chronically painful conditions she sees most often & she said osteoarthritis. She said she really doesn't have a specific reason to not have written Butrans for more patients & has no clinical objection to it. We discussed dose titration for patients if necessary up to a maximum of 20mcg/hr. Also discussed adverse events & showed FPI section 6. Reminded her that Butrans is a CIII & can be abused like other opioids. She asked if they could "suck the liquid" out of Butrans. Showed FPI section 11 & explained adhesive matrix. I gave her a demo patch-she stuck it on her hand & said it would help her remember Butrans. OxyContin savings reminder
PPLPMDL0020000001	Parma	OH	44129	3/28/2011	I asked Dr Ortega if he had started the patient we had talked about on Butrans. He said he has not yet seen that patient but is planning to start him when he sees him. Reminded him about tapering his current opioid dose to 30mg morphine equivalent before initiating Butrans & showed him initiation guide pg 6. He said he has another patient who he is also thinking of starting on Butrans who currently takes 2 Vicodin ES per day. Discussed initiation of Butrans and dose titration if necessary. Also reviewed managed care & urged him to focus on patients with commercial insurance. Dr Ortega asked why the patient's current opioid therapy should be tapered. I told him that is how we conducted our studies because of buprenorphine's potential to precipitate withdrawal in patients already on opioids. I asked him if this concerned him. He said not really, but said it was good to know as he was unaware of that property of buprenorphine. <font color=blue><b>CHUDAKOB added notes on 04/07/2011</b></font>Great question on asking the physician if the tapering issue concerned him? This is the type of questions we want to ask the physician who gives us an objection.
PPLPMDL0020000001	Lakewood	OH	44107	3/28/2011	Katie said that Dr Nageeb started a patient on Butrans. Dr Nageeb is on vacation this week. She said the patient was previously on embeda. She said they started her on the 5mcg dose. We reviewed the dosing and how to titrate Butrans. Katie said they may need to titrate, but they have not yet heard back from the patient so they think she must be doing well. I asked Katie if she would prescribe just 2 patients on Butrans to gain some experience herself and she said she will. Sally said there has not heard of any managed care issues. Reminder about OxyContin as an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Akron	OH	44333	3/28/2011	Spoke with the pharmacist and asked if there had been any movement he said that he did not believe so. I explained that Dr. Shah has recently started writing and encouraged him to keep what they had stocked. He agreed.
PPLPMDL0020000001	Parma	OH	44129	3/28/2011	Spoke with Jackie who said she had not yet seen a prescription for Butrans but they still have it in stock. Let her know that I have been working with area physicians & asked if there was anyone in particular she thought I should speak with. She said not that she could think of. I asked her if there would be any problem in opening a package of Butrans if a physician prescribes fewer than 4 patches. She said this would not be an issue. Reviewed new OxyContin savings cards. She said she has one customer in particular that could benefit from this & said she was excited to give him the card.
PPLPMDL0020000001	Cleveland	OH	44102	3/29/2011	I talked to Vince, Pharmacist, about Butrans stocking and he hasn't ordered Butrans yet as he wants to wait for his 1st script. we discussed importance of stocking Butrans ahead of time so that patients aren't turned away and told to return in 24 hours but Vince said he feels that waiting until 1st script comes in pharmacy is the best thing right now. I showed Vince Butrans initiation guide and we discussed appropriate patients for Butrans and discussed managed care coverage for Butrans. I recommended Senokot-S
PPLPMDL0020000001	Warrensville Heights	OH	44122	3/29/2011	Spoke with Michelle (MA) who said Dr Gupta will be keeping both his office locations & is no longer planning on closing the Garfield Heights office (for now). I reviewed Butrans indication, dosing, and appropriate patient type with her. Also gave her new OxyContin savings cards & reviewed usage for eligible patients.
PPLPMDL0020000001	Cleveland	OH	44113	3/29/2011	i talked to dr about Butrans initiation guide, appropriate patients he would consider starting on Butrans. dr said he does prescribe tramadol and vicodin for his chronic pain patients but it really comes down to cost. we discussed medicaid prior authorization requirements as that's a big plan here and commercial insurance coverage. dr said he will try and think of 1 or 2 patients with commercial insurance to start on Butrans. I asked dr to think of 2 patients on short-acting opioids that are complaining to him that pain isn't controlled and if appropriate, start them on Butrans after proper tapering of short-acting opioids. dr agreed. I recommended Senokot-S
PPLPMDL0020000001	Akron	OH	44333	3/29/2011	Asked Dr. Brown how many patients she was starting to see each day. She mentioned things were still slow but were beginning to pick up. I reminded her of the patient profiles that would best benefit from Butrans. I asked her since things were slow if she would consider trying it on just one patient and she agreed.
PPLPMDL0020000001	Cleveland	OH	44113	3/29/2011	worked pain management dept-see call note on Dr. Shen and Dale Novak
PPLPMDL0020000001	Cleveland	OH	44195	3/29/2011	worked tsauss cancer institute-left Butrans fpi,initiation guide,patient information booklet and my business card for Dr.Dreicer,Dr.Pennell,Dr.Rini,Dr.Budd,Dr.Davis,Dr.LeGrand,Dr.Gutsgell,Dr.Dean-all oncologists in center and also left an OxyContin fpi,conversion guide and OxyContin formulary coverage sheet for each doctor with medical secretaries
PPLPMDL0020000001	Akron	OH	44310	3/29/2011	Had the opportunity to discuss Butrans with Dr. Cremer at length at an appointment today. I went through the FPI and focused on patient profiling. He identified several patients that he thought could benefit from a LAO. He told me that he has a lot of BWC and was pleased to hear that it was going through. I closed using the co pay cards.

PPLPMDL0020000001	Cleveland	OH	44109	3/29/2011	I talked to Nate Pharmacist,about Butrans fpi initiation guide,Butrans patient savings cards and Butrans REMS.Nate said he heard about Butrans from other pharmacists but hasn't seen any scripts for it yet we discussed importance of Butrans stocking and Nick said he'll talk with other pharmacists about ordering Butrans 5mgc and 10mcg.we discussed managed care coverage too for Butrans.i recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44130	3/29/2011	Quick call with Dr Fedorko - I noticed that one of the Butrans savings cards was gone so I asked him if this meant he started a patient. He said he did start a patient on Butrans last week. He added that he is already thinking of another specific patient & said he will keep his eye out for additional patients who may be appropriate.
PPLPMDL0020000001	Akron	OH	44310	3/29/2011	Introduced Butrans and the FPI. Focused on identifying patients that would be in this week currently on low dose hydrocodone. He told me he had around 20 patients who would benefit from Butrans simply because it is a LAO. I asked if he would be willing to start several of those patients and evaluate their therapy. He agreed.
PPLPMDL0020000001	Mayfield Heights	OH	44124	3/29/2011	Quick call.....introduced Butrans, indication, postioning,coverage and savings cards. She was glad to hear about it because she can prescribe it as a NP. I explained that commercial patients can save up to \$40/mo until the end of 2011 with the savings card.
PPLPMDL0020000001	Mayfield Hts	OH	44124	3/29/2011	Window call.....reminded doc of the coverage and savings cards of Butrans. Explained that commercial patients will have the best chance for success. Nothing learned.
PPLPMDL0020000001	Mayfield Hts	OH	44094	3/29/2011	Saw doc at window. Asked doc if he saw a benefit in a long acting CII for patients in continuous pain. He said maybe, what is it. I explained the indication and positioning of Butrans and that it is a once weekly transdermal system. He said he does not have time to hear about a new product. Left my card for Monica to call me back to schedule a lunch.
PPLPMDL0020000001	Cleveland	OH	44113	3/29/2011	I talked to Dale,PA,for Dr.Shen today about patients taking tramadol,vicodin or percocet around the clock that are telling him their pain isnt controlled with the short-acting opioids.Dale said he hears that all day long and more so from Dr.Shen's patients than Dr.Daoud as Dr.Shen see's and starts more patients on short-acting opioids than Dr.Daoud does.i asked if Dale could continue recommending Butrans for these types of patients we discussed and showed Butrans initiation guide.Dale said he would as he feels better with Butrans being issued once weekly in 1 application versus his patients telling him they take 1-2 pills of their short-acting one day and then more the next day and they all have chronic pain,so its a liability for them as health care professionals if their patients arent taking their short-acting opioids as prescribed. we discussed managed care coverage for workers comp,medicaid and commercial plan patients. i recommended Senokot-5
PPLPMDL0020000001	Parma	OH	44129	3/29/2011	Spoke with Marian (pharmacist) & Sarah (tech) who said they have not seen any Butrans prescriptions yet. They had no specific recommendations of who in the area treats the target patient type. Reviewed indication & dosing & let them know I was working with area physicians. Presented new OxyContin savings cards. Marian said she had just noticed that the other cards were getting ready to expire so she was happy to have replacements.
PPLPMDL0020000001	Fairlawn	OH	44333	3/29/2011	Asked if they have seen any movement with Butrans. She said that she didn't recall filling any Rx's but another pharmacist may have. I let her know that Dr. Shah has been prescribing and may see some Rx's in the future.
PPLPMDL0020000001	Akron	OH	44129	3/29/2011	Quick call with Dr Roheeny- He said he did prescribe Butrans for a patient since our last discussion last week. He walked into a patient room before I could ask him to elaborate.
PPLPMDL0020000001	Akron	OH	44310	3/29/2011	Introduced Butrans and FPI. Focused on patient profiling and probed to find out if Butrans would benefit patients at Dr. Schukay's practice. He said he had several patients in mind, both opioid naive and experienced. I went over the conversion/initiation guide and asked if I could follow up with his new starts next week. He agreed.
PPLPMDL0020000001	Cleveland	OH	44113	3/29/2011	I talked to dr about Butrans she has on Butrans and how they are doing and dr said no complaints,patients are doing well and she only had 1 issue with a workers comp patient not being able to get Butrans,so we discussed that issue.i showed dr Butrans initiation guide and asked if she can continue to think of Butrans as an option for those patients taking short-acting opioids around the clock for their chronic pain but not controlled,dr said she will do that.we discussed Butrans patient savings cards for her commercial plan patients.i recommended Senokot-5
PPLPMDL0020000001	Parma	OH	44129	3/29/2011	Re-introduced Butrans to Dr Paat, delivering 5 core messages & box warning. He asked if he could use Butrans instead of fentanyl. I told him we have no comparative data & showed initiation guide pg 6, explaining that patients on fentanyl were excluded from studies. He asked if Butrans causes constipation, so I showed FPI section 6. He asked if he could use Butrans in renally or hepatically impaired patients- showed FPI 8.6-8.7. Also discussed application, rotation, & supplemental analgesia (2.4). I asked Dr Paat if he would use Butrans in opioid naive patients & he said yes. He said he liked the idea of a once-a-week option. I asked what types of chronic conditions that cause pain he sees most often- he said arthritis & low back pain. Reviewed managed care & savings cards & asked him to focus on commercially insured patients to get the least amount of managed care push-back. He said he would start prescribing Butrans & that it seemed like a "good drug".
PPLPMDL0020000001	Parma	OH	44129	3/29/2011	Re-introduced Butrans to Dr Tolentino, reminding her of 5 core messages. She asked if Butrans is like Duragesic. I explained that we have no comparative data & let her know patients on fentanyl were excluded from our studies. Gave her initiation guide & showed page 6. She asked about adverse events- I showed FPI section 6. I asked if she could see a place for Butrans in her practice. She said yes so I asked if she would use it in someone who has never been on an opioid before. She said she would. She said she thought applying a patch once every week was "better" than taking pills around-the-clock. I asked what types of chronic conditions she treats most often that cause pain. She said she'd use Butrans in low back pain, shoulder pain, arthritis & for pain from cancer because she would know they needed something for pain for a long duration. She asked about cost- Discussed managed care & savings cards & asked that the thing of commercially insured patients.
PPLPMDL0020000001	Shaker Heights	OH	44122	3/29/2011	Spoke with Stephanie & Michelle (MA) who said because Dr Agrawal is covering for three physicians this week, he was too busy & could not speak with me. They recommended I come back next week. Reminded them of Butrans as well as savings cards for both Butrans & Ryzolet.
PPLPMDL0020000001	Cleveland	OH	44130	3/29/2011	Spoke with Ron who checked his shelves & said he did not see any Butrans, so Dave must not have ordered it. He said he was not sure why it was not ordered, but will ask Dave about it. Asked about OxyContin stocking- he checked the safe & confirmed that they have 10, 20, 30, & 40mg strengths stocked. Reviewed & presented new savings cards.
PPLPMDL0020000001	Maple Heights	OH	44137	3/29/2011	Spoke with Kim (pharmacist) who said she has not seen Butrans activity other than the prescription she saw from a Dr Lin (or Len) at Cleveland Clinic (main campus- she was not sure of specialty). She said it was for a Medicaid patient & they never heard back from the doctor on the prior authorization. Reviewed managed care coverage with her. Also offered OxyContin savings cards but Kim said they no longer stock OxyContin for safety reasons due to the area they are located in.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	3/29/2011	I asked Dr.Pitt if he would consider writing Butrans when his patients are failing on NSAID's. He said that he probably would not write Butrans but would continue to support me with OxyContin. I thanked him for his OxyContin support.<font color=blue><b>CHUDAKOB's query on 04/07/2011</b></font>it doesn't look like you had much of a discussion with Dr. Pitt? Is this the only question you asked him?<font color=green><b>LAPMACA's response on 04/10/2011</b></font><b>Yes. We did not have much of a discussion. He has told me multiple times he will not write Butrans</b> so I am really focusing on maintaining my OxyContin business with him and hopefully at some point he will write Butrans.<font color=blue><b>CHUDAKOB added notes on 04/13/2011</b></font><b>We can discuss this more on our ride session.
PPLPMDL0020000001	Cleveland	OH	44113	3/29/2011	dr told me in hall she went eat lunch from pharmaceutical sales reps but i could leave her information.i gave dr Butran fpi,initiation guide and patient information booklet and told dr since i was newer to her,my goal was to understand how i can partner with her and provide answers to any product questions, provide patient education tools and pain management education tools.dr said that was fine and to leave information for her to review
PPLPMDL0020000001	Cleveland	OH	44111	3/30/2011	I asked where Dr where he see Butrans fitting into his practice. He said that he would probably try it for patients before going to other long acting medications. We reviewed the initiation guide and I asked if he would start just one new patients on Butrans who is taking 3-4 5mg vicodin per day. Also, spoke with Barb and she will remind the Dr about Butrans as an option and look for appropriate patients.
PPLPMDL0020000001	Cleveland	OH	44111	3/30/2011	I reviewed the conversations we had with Dr last time and asked if he would start just one new patient this week to gain experience with Butrans. He said he would and that he has a patient in mind on vicodin.
PPLPMDL0020000001	Cleveland	OH	44106	3/30/2011	I talked to dr briefly about patients that he's starting on Butrans and dr said majority of these patients are taking percocet,some taking Vicodin,around the clock for their chronic pain, and are telling him these medications aren't controlling their pain and they want more pills.dr isnt giving them more pills,he's starting them on Butrans.i showed dr Butrans initiation guide and we discussed proper tapering and initiation of Butrans.We discussed managed care coverage and commercial plan patients using Butrans patient savings cards and discussed Medicaid prior authorization requirements for Butrans.i recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44122	3/30/2011	Introduced Butrans to Dr Barret, delivering 5 core messages & reviewing box warning. Reviewed appropriate patient type & positioning as well as managed care & savings cards for eligible patients.OxyContin reminder for appropriate patients who are beyond Butrans.
PPLPMDL0020000001	Cleveland	OH	44106	3/30/2011	I talked to dr about Butrans and appropriate patients to consider for Butrans by showing Butrans initiation guide.dr didnt remember much about Butrans so discussed 5 core messages, initiation guide, Butrans REMS and Butrans patient savings cards with dr.dr said he has patients on tramadol that do complain about their pain being persistent and not controlled so he could think of Butrans there.i told dr that was perfect to taper patients appropriately and then consider Butrans.dr said he would remember Butrans.
PPLPMDL0020000001	Cleveland	OH	44106	3/30/2011	I talked to dr about Butrans and appropriate patients to consider for Butrans by showing Butrans initiation guide.dr didnt remember much about Butrans so discussed 5 core messages, initiation guide, Butrans REMS and Butrans patient savings cards with dr.dr said she has patients on tramadol,q4-6h, and she doesnt like her patients having to take a short-acting opioid like that around the clock for chronic pain as many of her patients complain that its inconvenient to have that dosing regimen.dr said she likes once weekly dosing of Butrans and that its transdermal.I talked to dr about Butrans patient application dvd/booklet and asked if that would assist her in educating patients on Butrans? dr said yes.i asked dr to think of 2 patients taking tramadol,with commercial insurance or workers comp,and start them on Butrans.dr asked about Medicaid coverage for Butrans? we discussed Prior Authorization requirements for medicaid patients to try and get approval of Butrans.dr said he will try it
PPLPMDL0020000001	Cleveland	OH	44106	3/30/2011	I talked to dr about Butrans and appropriate patients to consider for Butrans by showing Butrans initiation guide.dr didnt remember much about Butrans so discussed 5 core messages, initiation guide, Butrans REMS and Butrans patient savings cards with dr.dr said he has patients on tramadol that do complain about their pain being persistent and not controlled so he could think of Butrans there.i told dr that was perfect to taper patients appropriately and then consider Butrans.dr said he would remember Butrans.
PPLPMDL0020000001	Cleveland	OH	44106	3/30/2011	I talked to dr about Butrans and appropriate patients to consider for Butrans by showing Butrans initiation guide.dr didnt remember much about Butrans so discussed 5 core messages, initiation guide, Butrans REMS and Butrans patient savings cards with dr.dr said he has patients on tramadol that do complain about their pain being persistent and not controlled so he could think of Butrans there.i told dr that was perfect to taper patients appropriately and then consider Butrans.dr said he would remember Butrans.
PPLPMDL0020000001	Parma	OH	44134	3/30/2011	Asked Alicia what practitioners in the area may be interested in Butrans based on the appropriate patient type & indication. She paused & said no one in particular comes to mind. She said they see prescriptions from a wide variety of physicians & specialties. Presented & patient information booklet. She said she does anticipate customers asking questions about Butrans since it is transdermal & not a lot of patients are used to using such products. She said she would utilize the guide in patient counsel.
PPLPMDL0020000001	Warrensville Heights	OH	44122	3/30/2011	Dr Kessler came prepared to my lunch already having researched Butrans. He said he had been looking forward to talking about it. He said his one concern is that he has heard that patients are starting on it but then are not able to afford to stay on it due to lack of insurance coverage & then go into withdrawal after discontinuing treatment. Discussed managed care, asking him to focus on commercial insurance patients & reviewed savings cards. Also told him that like any opioid, patients should be tapered gradually when discontinuing Butrans therapy to avoid withdrawal. He said he understands it being an opioid class effect. He asked about adverse events/allergies, half-life, & supplemental analgesia. Showed FPI sections 6, 12, & 2.4 to answer his questions. Presented initiation guide & reviewed starting doses for patients depending on their opioid experience level & discussed max dose of 20mcg/hr. Reminder for OxyContin for appropriate patients.
PPLPMDL0020000001	Cleveland	OH	44106	3/30/2011	I talked to dr about Butrans and appropriate patients to consider for Butrans by showing Butrans initiation guide.dr didnt remember much about Butrans so discussed 5 core messages, initiation guide, Butrans REMS and Butrans patient savings cards with dr.dr said he has patients on tramadol that do complain about their pain being persistent and not controlled so he could think of Butrans there.i told dr that was perfect to taper patients appropriately and then consider Butrans.dr said he would remember Butrans.
PPLPMDL0020000001					

PPLPMDL0020000001	Cleveland	OH	44106	3/30/2011	i talked to dr about Butrans and appropriate patients to consider for Butrans by showing Butrans initiation guide.dr didnt remember much about Butrans so discussed 5 core messages, initiation guide, Butrans REMS and Butrans patient savings cards with dr.dr said he has patients on tramadol that do complain about their pain being persistent and not controlled so he could think of Butrans there.i told dr that was perfect to taper patients appropriately and then consider Butrans.dr said he would remember Butrans.
PPLPMDL0020000001	Cleveland	OH	44106	3/30/2011	i talked to dr about Butrans and appropriate patients to consider for Butrans by showing Butrans initiation guide.dr didnt remember much about Butrans so discussed 5 core messages, initiation guide, Butrans REMS and Butrans patient savings cards with dr.dr said he has patients on tramadol that do complain about their pain being persistent and not controlled so he could think of Butrans there.i told dr that was perfect to taper patients appropriately and then consider Butrans.dr said he would remember Butrans.
PPLPMDL0020000001	Cleveland	OH	44106	3/30/2011	i talked to dr about Butrans and appropriate patients to consider for Butrans by showing Butrans initiation guide.dr didnt remember much about Butrans so discussed 5 core messages, initiation guide, Butrans REMS and Butrans patient savings cards with dr.dr said he has patients on tramadol that do complain about their pain being persistent and not controlled so he could think of Butrans there.i told dr that was perfect to taper patients appropriately and then consider Butrans.dr said he would remember Butrans.
PPLPMDL0020000001	Cleveland	OH	44106	3/30/2011	i talked to dr about Butrans and appropriate patients to consider for Butrans by showing Butrans initiation guide.dr didnt remember much about Butrans so discussed 5 core messages, initiation guide, Butrans REMS and Butrans patient savings cards with dr.dr said he has patients on tramadol that do complain about their pain being persistent and not controlled so he could think of Butrans there.i told dr that was perfect to taper patients appropriately and then consider Butrans.dr said he would remember Butrans.
PPLPMDL0020000001	Cleveland	OH	44114	3/30/2011	i talked to John,PA,about appropriate patients to start on Butrans and showed Butrans initiation guide. John said he has been recommending Butrans to Dr.Katz and Dr.Marshall but only Dr.Katz has started a couple patients.John said he likes that Butrans is dosed once a week and is transdermal instead of patients having to take a short-acting opioid around the clock for their chronic pain when that regimen,q4-6h usually doesnt control their pain over time. i asked John to continue recommending and start 2 patients himself on Butrans,John agreed and said he would do that and let me know next week at lunch if he started anyone on Butrans.i recommended
PPLPMDL0020000001	Cleveland	OH	44106	3/30/2011	i talked to dr about Butrans and appropriate patients to consider for Butrans by showing Butrans initiation guide.dr didnt remember much about Butrans so discussed 5 core messages, initiation guide, Butrans REMS and Butrans patient savings cards with dr.dr said he has patients on tramadol that do complain about their pain being persistent and not controlled so he could think of Butrans there.i told dr that was perfect to taper patients appropriately and then consider Butrans.dr said he would remember Butrans.
PPLPMDL0020000001	Cleveland	OH	44113	3/30/2011	i talked to dr about patients he's starting on Butrans.dr said he has patients who are only taking NSAIDs and instead of starting them on tramadol he's starting them on Butrans.dr said he likes the once weekly dosing and transdermal delivery of Butrans so he's happy and no complaints from patients.we discussed dr continuing to start new patients,opioid naive,and also those patients currently taking tramadol but their pain isnt controlled,considering Butrans for them too.dr said he's started some patients like that too and Butrans patient savings cards are easy to use for his commercially insured patients.we discussed workers comp coverage and the Butrans patient application dvd/booklet.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	3/30/2011	worked orthopedic dept-see call notes on Dr.Bohl and Dr.Berkowitz
PPLPMDL0020000001	Cleveland	OH	44106	3/30/2011	i talked to dr about Butrans fpi, 5 core messages, initiation guide, Butrans REMS, patient application dvd/booklet and Butrans patient savings cards for commercial plan patients.dr said he didnt have a lot of time to talk but would read through the material and talk to me at next lunch.i showed dr Butrans initiation guide and asked him to just consider 2 patients on tramadol that arent controlled where Butrans could be an appropriate option,dr said he will look it over and let me know.
PPLPMDL0020000001	Mayfield Village	OH	44040	3/30/2011	Spoke with Tom and Danielle. Tech about the stocking of Butrans. They confirmed that they just got it in and had a script for it a few days ago. Just the one patient so far and they could not recall the prescriber. I explained the indication and dosing options, the contents of the box and how to dispose of the Butrans. He said patient only paid about \$20. I explained the savings card program. I asked if they have seen any difference in oxycontin scripts. Tom said he does not have many patients on it so nothing unusual lately.
PPLPMDL0020000001	Cleveland	OH	44106	3/30/2011	dr said he hasnt started any patients on Butrans and couldnt remember insurance coverage for Medicaid patients.we discussed insurance coverage for medicaid,commercial and workers comp patients. i asked dr if he had patients on tramadol that complained of their pain not being controlled on the short-acting opioid? dr said yes every day he hears that from patients.i asked dr to consider Butrans for those patients and showed Butrans initiation guide and asked dr to think of 2 patients he can start on Butrans. dr said he would do that.
PPLPMDL0020000001	Cleveland	OH	44114	3/30/2011	dr said he hasnt started any patients on Butrans yet and i need to be patient with him as he is slow to start any new medication.i asked dr what benefits he even saw in Butrans for his patients? dr said he likes once weekly dosing instead of around the clock vicodin or percocet but he doesnt think every one of his patients will put a patch on and remember to rotate patches every week.i told dr Butrans is not for every patient,but for someone currently taking opioids around the clock who meets the Butrans indication and that person is asking dr for something different as the short-acting opioids like Vicodin or Percocet arent controlling the pain. dr said okay that made sense.i asked dr if he could think of 2 patients like that with workers comp insurance that he could start on Butrans and get some clinical experience? dr said yes he does.i told dr i would follow-up next wednesday,april6th,at lunch to see how it went with these 2 patients he's going to start on Butrans.
PPLPMDL0020000001	Warrensville	OH	44122	3/30/2011	Quick call with Dr Rakowski- Introduced Butrans, delivering 5 core messages & alerting her to box warning. She said she is focusing on prescribing fewer opioids & walked away.
PPLPMDL0020000001	Westlake	OH	44145	3/30/2011	i asked Dr to think of just one med mutual patient or BWC who is taking 3-4 5mg vicodin per day who is not well controlled. We reviewed the initiation guide and Dr said she would try to think of Butrans for these patients.
PPLPMDL0020000001	Cleveland	OH	44106	3/30/2011	Angela MA said she would flag patients and help remind the Dr about Butrans.
PPLPMDL0020000001	Cleveland	OH	44106	3/30/2011	worked internal medicine dept-lunch with residents, see call notes; worked pain management dept-see call notes on dr.hayek and dr.sahgal
PPLPMDL0020000001	Cleveland	OH	44106	3/30/2011	i talked to dr about Butrans fpi,Score messages,initiation guide,patient application dvd/booklet, Butrans REMS and Butrans patient savings cards for commercial plan patients.dr said he hasnt heard of Butrans,would need to think about who is appropriate and if he would consider prescribing Butrans.dr asked if it was on formulary in hospital,i told dr it was being reviewed by the P&T committee now and we will know in April if its a yes/no for the hospital formulary.i asked dr to consider 2 patients on short-acting opioids,looking at Butrans initiation guide,that arent controlled and asking for something else and start them on Butrans.dr said he will consider that option.
PPLPMDL0020000001	Cleveland	OH	44106	3/30/2011	i asked dr what she remembered about Butrans? dr said not much other than it was a transdermal medication.i discussed 5 core messages with dr,we discussed Butrans initiation guide and i asked dr to think of 2 patients taking tramadol that meet Butrans indication and instead of refilling the tramadol,start that patient on Butrans after proper tapering of tramadol.dr said it comes down to insurance coverage and asked if Medicaid covered Butrans? we discussed Butrans coverage for Medicaid patients with a prior authorization and the requirements that Medicaid has to see before they review any patients for approval of Butrans.dr said she'll think of a couple patients and try it and let me know what happens.i asked dr what she liked about Butrans,that she would even consider it for a few patients? dr said she likes that Butrans is transdermal and dosed once a week and being in a patch she thinks this will be better for some of her patients that dont like taking pills around the clock.
PPLPMDL0020000001	Bedford	OH	44146	3/30/2011	Dr Haddad said he has prescribed Butrans for 2 or 3 more patients since our last discussion, despite the fact that he had managed care pushback on the first prescription he wrote for a worker's comp patient. He said that he has not heard anything back from any of those patients nor from their insurance, so he is considering that a good sign. I asked what types of patients he is choosing- patients who are opioid-naive or opioid-experienced. He said he is using it right now on patients who have failed non-steroidals. Told him this was a great place to start. I also reminded him of ability to titrate every 3 days up to a max dose of 20mcg/hr. He said that was good to know & that he would continue to look for patients for Butrans & that he would let me know when he gets feedback from patients.
PPLPMDL0020000001	Bedford	OH	44146	3/30/2011	Dr Moufawad said he is starting to "figure out" what to give his patients who are on Butrans for breakthrough. He said he has been giving tramadol or Nucynta. I asked him if he has tried titrating the dose for patients who have breakthrough. He said he has done this for one patient who he has not heard back from yet. I asked if he is still starting new patients. He said he is not starting opioid-naive patients on Butrans. I asked him why not- He said he sees few patients like that but then paused & asked if Butrans can be used in opioid-naive patients. I told him they can be started on the 5mcg/hr dose. He said that made him think. He said he is in the process of evaluating his practice & he is trying to really analyze patients to assess their "need" for opioids as well as evaluating "ceiling doses" of opioids. He added that he sees a big place for Butrans for the future of his practice & that he is gaining clinical experience slowly & cautiously.
PPLPMDL0020000001	Cleveland	OH	44106	3/30/2011	i talked to dr about Butrans fpi, 5 core messages, initiation guide,Butrans REMS,patient savings cards for commercially insured patients,dr asked about Medicaid coverage as thats the majority seen at UH/out-patient center,so we discussed Prior Authorization requirements for medicaid patients to try and get approval for Butrans.i showed dr Butrans initiation guide and asked him to consider 2 patients taking tramadol for their chronic pain but not controlled and asking him for something else,to start them on Butrans.dr said he will consider Butrans but has to read everything over and let me know if he has any further questions.
PPLPMDL0020000001	Warrensville Heights	OH	44122	3/30/2011	Introduced Butrans to Dr Barlatt, reviewing 5 core messages & alerting him to box warning. He said he liked learning about different options & medications to treat pain & that they see it commonly in the practice, although they are all trying to prescribe fewer & fewer opioids. Told him i understood & that like all other opioids, Butrans does have abuse/addiction potential & therefore he should be just as cautious in prescribing Butrans as he would any other opioid.
PPLPMDL0020000001	Cleveland	OH	44113	3/30/2011	i talked to dr about patients he feels are appropriate to start on Butrans.dr said he has a lot of patients on Vicodin and a few on Percocet that are always asking for more pills as their pain isnt controlled so he thinks this is the ideal place for Butrans.we discussed proper tapering and initiation of Butrans therapy for those patients currently taking opioids and i showed dr Butrans initiation guide.i asked dr to think of 2 patients like we discussed that he feels would be appropriate for Butrans,dr said he will and i told dr i would follow-up next Thursday at lunch and look forward to hearing about the 2 patients he started on Butrans.we discussed workers comp and commercial plan coverage for Butrans and i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	3/30/2011	i talked to dr about Butrans fpi, 5 core messages, initiation guide,Butrans REMS,patient application dvd/booklet and Butrans patient savings cards.dr said he hasnt heard of Butrans and wanted to know if Medicaid covered Butrans? we discussed medicaid,workers comp and commercial plan coverage for Butrans.i showed dr Butrans initiation guide and asked him to think of 2 patients taking tramadol for their chronic pain but not controlled and perhaps asking dr for something different,think of Butrans there for those patients if appropriate.dr said he would and needed to look through all of the Butrans information and will let me know if he has any further dr said he hadnt started anyone yet on Butrans as he's been gone for the past week but he has patients on tramadol that he knows can benefit from Butrans,so we discussed proper tapering of tramadol and then initiation of Butrans 10mcg for those patients currently taking tramadol.i showed dr Butrans initiation guide and asked him to think of his Medco and Anthem patients that he could start on Butrans first,as thats the easiest with the Butrans patient savings cards.dr asked about Medicaid coverage for Butrans,so we discussed prior authorization requirements and dr said Lisa,patient care coordinator,processes all of them anyways so she would be looking at charts for those requirements.i asked dr to start a few patients on Butrans so he can get some clinical experience,dr said he will do that.i recommended Senokot-S
PPLPMDL0020000001	Parma	OH	44134	3/30/2011	Dr Hernandez said that he has been prescribing Butrans a lot over the last few weeks & requested more patient information guides. I asked what types of patients he has been choosing. He said patients who are taking 3-4 Vicoden or Percocet per day. He said he has been using Butrans to "get patients off the cycle" of taking oral pain medications around-the-clock. He has been asking patients to call him after 2 days if they have any issues with Butrans & has received no phone calls. He said he would like to call Purdue & speak with the researchers of Butrans to ask some questions that I may not be able to answer due to them being off-label. I gave him the number to medical services & he said he would call them. Dr Hernandez said he would like to ask about using Butrans for breakthrough pain & in conjunction with various other pain medications. I also let him know i would follow up with him as soon as i received clarification on Rite Aid's unbreakable carton rule. OxyContin reminder
PPLPMDL0020000001	Cleveland	OH	44114	3/30/2011	dr said she started another patient on Butrans 10mcg as the patient was taking vicodin around the clock and still in pain so dr wanted to try Butrans and see if this helps patient,we discussed appropriate tapering of short-acting opioids first,i showed dr Butrans initiation guide and we discussed workers comp patients starting on Butrans.we also discussed Butrans patient savings cards for commercial plan patients.i asked dr to think of 2 patients today and next week before i see her on Wednesday,april 6th,for lunch, that she feels can benefit from Butrans,dr said she will continue to think of patients to start on Butrans as she's not heard any complaints from patients so it must be working,i recommended Senokot-S

PPLPMDL0020000001	Cleveland	OH	44120	3/30/2011	i talked to dr briefly about patients she feels are appropriate for Butrans,showed dr Butrans initiation guide and dr asked about insurance coverage for Butrans so we discussed 3rd party insurance and the use of the Butrans patient savings cards and medicaid prior authorization requirements for Butrans.dr said she does have patients on short-acting opioids,especially her percoct patients,who complain to her or the nurse that their pain isnt controlled and they want more pills.i asked dr to stop and consider Butrans at that point for those patients instead of increasing pills or increasing percoct dosing interval.dr said she will think about it and see what patients will consider taking a patch once a week.i asked dr to only think of 2 patients who are telling her that the percoct isnt working,not controlling their pain and try Butrans there after appropriate tapering of Percocet.dr said she will do that.i recommended Senokot-S
PPLPMDL0020000001	Richmond Heights	OH	44143	3/30/2011	Spoke to Doc and Brandy about the Butrans 5 selling messages. Doc asked why it is a CII and not a CII. I could not answer that. I just explained the MOA and the risks/warnings similiar to other opioids. I discussed the positioning which he liked because he gets a lot of patients that are opioid naive or on low doses. Brandy asked about the use in the elderly. I explained that there is no dose adjustment required but respiratory depression is a concern. Doc likes the idea of Butrans better than oxycontin and Ryzolt because he does like prescribing lots of tablets. He said he will definitely prescribe Butrans. He asked if Butrans stays on for 7 days. I discussed the proper application to ensure success.
PPLPMDL0020000001	Cleveland	OH	44106	3/30/2011	i talked to dr about Butrans fpi,5 core messages, initiation guide,Butrans REMS,Butrans patient savings cards for commercially insured patients.dr asked if Butrans was on hospital formulary and i told dr that Butrans was being reviewed by the P&T committee for formulary approval and i would know in April what that answer is,dr said okay but i asked dr if he could think of his out-patient patients that have commercial or medicaid insurance that Butrans could be an option for. i showed dr Butrans initiation guide and we discussed appropriate tapering of short-acting opioids before starting therapy with Butrans.dr said he'll try it in a patient and let me know what i talked to dr about Butrans fpi,5 core messages,initiation guide,Butrans REMS and Butrans patient savings cards.i asked dr to consider 2 patients on tramadol that are asking him for something different,to consider Butrans if appropriate and showed dr Butrans initiation guide with instructions on tapering and initiating the appropriate dose of Butrans.dr said he'll look over all the information and will try to think of 1 or 2 patients to try on Butrans.dr asked if Medicaid covered Butrans? we discussed Medicaid's prior authorization requirements for Butrans and commercial plan patients using Butrans patient savings cards.
PPLPMDL0020000001	Cleveland	OH	44106	3/30/2011	Introduced Butrans to Dr Mueller. He asked about contraindications, adverse events, & drug interactions. I showed FPI section 6, 4, & 7. He said they are all trying to prescribe fewer controlled substances. I told him Butrans, like all opioids, does carry abuse & addiction potential & advised him to be just as cautious in prescribing Butrans as he would any other opioid medication. He asked if the "chronic pain" had to be from any particular source. I told him there is no specific etiology mentioned. He asked about cost- reviewed managed care coverage & savings cards for eligible patients. He asked about cash price. I asked if that comprises a large part of his practice. He said it did not but he was curious. I told him it would vary depending on pharmacy & told him cash patients can use savings cards as well.
PPLPMDL0020000001	Independence	OH	44131	3/31/2011	Dr Jack saw me & said he had just been thinking of me. I asked him if it was because he had been starting appropriate patients on Butrans. He said he has not prescribed it yet. I reminded him that he had committed to prescribing Butrans for one appropriate patient per day for the next month, which would have been 5 patients by today. He said, "Oh yeah, I did say that, didn't I?" I reminded him that he said that he liked that Butrans is transdermal & once-a-week & that he had told me he sees benefits in it for his patients. He apologized & said he really doesn't have a problem with the drug, it is just "remembering" it.
PPLPMDL0020000001	Solon	OH	44139	3/31/2011	Spoke with Julie (nurse) who said Dr Zaidi is out this week. I asked if he has prescribed Butrans yet. She said he went out of town shortly after our discussion, but that he was planning to start prescribing next week when he returns. Julie recommended I return in two weeks to check in with him. Reviewed savings cards for eligible patients.
PPLPMDL0020000001	Mayfield Heights	OH	44124	3/31/2011	Window call.... Reminded doc of the Butrans indication and patient type. He said he has not tried it yet. I gave him an initiation guide and asked him for one patient start and give them a savings card.
PPLPMDL0020000001	Barberton	OH	44203	3/31/2011	I asked Dr. Patel what he thought so far of his patients who had been started on Butran's therapy, he told me he was very pleased. He was still uncertain and asked about titration. I explained that he could titrate patients upward after 3 days. He was relieved since he thought it was 7 days. I asked him if he had additional patients in mind and closed utilizing the co-pay cards.
PPLPMDL0020000001	Cleveland	OH	44135	3/31/2011	Spoke with Ken, we reviewed the medication guide for Butrans and he agreed to help educate the patients on the proper use and application of Butrans. We reviewed the appropriate patients and Ken thinks that many patients can benefit. I let him know I was unable to talk to Dr Lali and he was not interested in even looking at the info for Butrans. Reminder about OxyContin as a long acting option as well and asked him to recommend Dr said that he does not have a lot of patient on chronic opioid therapy. We discussed appropriate patients for Butrans and that Butrans can be used for patients who are opioid naive and fit the indication. He said he will keep it in mind, but he tends to refer to pain management if patients need something around the clock. We discussed Ryzolt as an option as a once a day tramadol. Dr said he thinks Ryzolt would be a great option but has found that managed care coverage has been difficult for tramadol products due to generics. We reviewed the managed care for Ryzolt and the savings program.
PPLPMDL0020000001	Westlake	OH	44145	3/31/2011	Spoke with Wayne & introduced Butrans. Reviewed indication, dosing, CII, abuse/addiction potential, & appropriate patient type. Also went over managed care & let him know he could go online to print savings cards. I asked him what managed care makeup this location sees. He said mostly Medicare & Medicaid but he does see some commercial plans. He said he sees an increasing amount of government plans & also that there are a lot of auto worker retirees in the area. I asked who in the area he would recommend I speak with about Butrans. He said Dr Salewski is the only pain management doctor he really trusts prescriptions from. Wayne said he is cautious in filling prescriptions for all pain medications & that they no longer stock OxyContin. He did agree that it is a good option for appropriate patients & also said he sees a significant place for Butrans in the market.
PPLPMDL0020000001	Parma	OH	44134	3/31/2011	Reviewed patient information booklet & discussed application.
PPLPMDL0020000001	Cleveland Heights	OH	44118	3/31/2011	I reviewed the Butrans indication and positioning with doc. I reminded him that he previously expressed interest in prescribing Butrans. I asked if he see a benefit in a 7 day CII analgesic. He said yeah, yeah, yeah. He wants to write it. He asked me to keep reminding him because he forgets. I asked him to try for a commercially insured patient and give a savings card. REMinded him of the oxycontin savings cards for appropriate patients.
PPLPMDL0020000001	Independence	OH	44131	3/31/2011	Dr Keppler said he did not recall much about Butrans. He asked if it was transdermal & I said yes. He said he "wasn't sure" about transdermal products but that he wanted to know more about Butrans. Discussed indication, appropriate patients, abuse/addiction potential, CII, & dosing. Also reviewed chart on pg 6 of initiation guide. Reviewed adhesive matrix structure. He said he does like long-acting medications & that he tries to avoid maintaining patients on pain medications but he does find himself doing so occasionally. He asked how it compared to fentanyl & added that he "will never" use fentanyl. I explained that we have no comparative data. I told him fentanyl patients were excluded from our studies & asked him to think of the more "moderate" pain side. He asked about cost- reviewed managed care & asked him to focus on commercially insured patients & went over savings cards where applicable. He said he will look for a patient to try on it. Also gave new OxyContin savings cards.
PPLPMDL0020000001	Independence	OH	44131	3/31/2011	Quick call- Asked Dr Rob if he had started any of his patients like the ones we have talked about on Butrans. He did not answer. Reviewed indication, dosing, initiation guide pg 6, & appropriate patient type. He said he thinks it sounds like a great option & that he would "definitely put it to use".
PPLPMDL0020000001	Cleveland	OH	44106	3/31/2011	i talked to dr about Butrans fpi,5 core messages,initiation guide,Butrans REMS,Butrans application dvd/booklet and Butrans patient savings cards.dr said he has patients on tramadol that arent always happy taking pills around the clock and might be interested in a patch dosed once a week.i asked dr to think of 2 patients like that and showed dr Butrans initiation guide and asked him to start 2 patients who arent controlled on tramadol and give Butrans a try.dr said he would.we discussed managed care coverage for Butrans.
PPLPMDL0020000001	cleveland	OH	44135	3/31/2011	Dr said that he thinks Butrans will be a good option for patients instead of increasing their short acting dose. He asked about insurance coverage and we reviewed the managed care and savings cards for Butrans. He said he would try it on a patient today if they came in with the right insurance.
PPLPMDL0020000001	Cleveland	OH	44124	3/31/2011	Reviewed the Butrans indication and positioning with doc. I asked her if she has patients that could benefit from Butrans. She said of course but She has a lot of medicare, elderly patients. I explained that medicaid does require a PA but commercial patients can expect to pay about \$20/mo with savings card. She said she would think about it.<font color=blue><b>CHUDAKOB's query on 04/07/2011</b></font>Why does every pronoun in this call note refer to a woman? Initially you said you reviewed the indication and positioning with the doc. I am sure Ronald is a male. I am thoroughly confused? Please clarify this for me?<font color=green><b>SIMERTOC's response on 04/18/2011</b></font>I think I entered the wrong call. My guess is that i though I was entering a call on maybe dr. chteingardt but forgot whose name I selected.<font color=blue><b>CHUDAKOB added notes on 04/19/2011</b></font>Please take the time to review your call notes before submitting them. This can be lookd at many different ways and none of them are good. Thanks for the clarification.
PPLPMDL0020000001	Cleveland	OH	44195	3/31/2011	i talked to Anne.NP,about patients she feels could benefit from initiation of Butrans therapy.Anne said she has a lot of patients that come to see her on tramadol,vicodin or percoct and if their pain isnt controlled on short-acting opioids,she'll consider Butrans.Anne said she really just hasn't given much thought to Butrans but knows who the patient is,we looked at Butrans initiation guide and discussed managed care coverage and commercially insured patients using Butrans patient savings cards.i recommended Senokot-S
PPLPMDL0020000001	Lyndhurst	OH	44124	3/31/2011	Spoke to Tom about the stocking of Butrans. He confirmed that they have it stocked and the Dr. Laham wrote a script but patient did not pick up the script. It has been there a week. I asked if he knew what coverage/cost the person had. He said the name was scratched out so he could not tell. Tom did not know why the patient did not pick it up.
PPLPMDL0020000001	Cleveland Heights	OH	44118	3/31/2011	Spoke to Allan about the stocking of Butrans. He said he still does not have it and has not received any scripts for it. I explained the indication and the positioning we are discussing with doc. Gave him an initiation guide and explained the proper application and disposal.
PPLPMDL0020000001	Mayfield Heights	OH	44124	3/31/2011	Reminded doc of the Butrans coverage with commercial plans and BWC....medicaid/medicare require PA. She said they have still been trying to write Butrans and get it to go through. She also said the patients feedback has been good. Nothing more learned.
PPLPMDL0020000001	Cleveland	OH	44111	3/31/2011	Spoke with Jim, he has been filling in at this store a lot and may be here for good. We reviewed the medication guide for Butrans and gave him some extra copies. He was not sure who wrote for Butrans but thought there might have been a script. We reviewed the initiation guide for Butrans and OxyContin as an option when Butrans may not provide adequate analgesia. Asked to recommend Senokot S with opioids.
PPLPMDL0020000001	Cleveland Hts	OH	44118	3/31/2011	Quick call.....I discussed the Butrans indication and positioning. I asked him if he sees any advantages of Butrans. He said he likes that it is a patch. I asked him to try 2 commercially insured patients. He asked about medicare. I explained that it requires a PA.
PPLPMDL0020000001	Cleveland	OH	44109	3/31/2011	worked oncology dept-met with nurse manager,Diane,discussing Butrans fpi,5 core messages and initiation guide and trying to set-up lecture with Fellows and attending physicians in dept, worked internal medicine and family medicine-left information for each doctor in these 2 departments on Butrans and OxyContin and Senokot-S
PPLPMDL0020000001	Cleveland	OH	44135	3/31/2011	Krista said she is not able to prescribe Butrans yet until their department gives her the ok to do so. She does think Butrans will be a good option for patients and she sees herself prescribing for a patient who is wanting to increase their dose of vicodin. She said she will talk to the Drs further about it and wait for them to gain some experience first with Butrans. We discussed when OxyContin may be an appropriate option where Butrans may not provide adequate analgesia and she said he will recommend it.
PPLPMDL0020000001	Akron	OH	44320	3/31/2011	Talked to the pharmacist and told him that I had a lunch with Dr. Machado and he committed to writing Butran's. He told me that he sees a lot of patients from his practice.
PPLPMDL0020000001	Westlake	OH	44145	3/31/2011	Dr said she does not typically treat chronic pain but would like the info regarding Butrans to know if they come in on it. We reviewed the key messages for Butrans. She performs stress tests and also does interventions,
PPLPMDL0020000001	Cleveland	OH	44135	3/31/2011	Quick call in between procedures, he has not yet prescribe Butrans and said he will try it and let me know his thoughts.
PPLPMDL0020000001	Independence	OH	44131	3/31/2011	Introduced Butrans to Lisa, a new physician assistant. She said she remembers Andrea telling them about it when she was student at the office. Reviewed 5 core messages. She said she still has the initiation guide that Andrea had given her. OxyContin savings card reminder for eligible patients & recommended Senokot-S for opioid-induced constipation.
PPLPMDL0020000001	Cleveland	OH	44106	3/31/2011	worked rheumatology dept
PPLPMDL0020000001	Cleveland Heights	OH	44118	3/31/2011	Spoke to Mukul about the stocking of Butrans. I said they have it but there have been no scripts that he has seen. He asked if it covered on medicaid as they get a lot of medicaid. I explained that medicaid requires a PA and but Butrans is well covered commercially. I gave him a patient info guide and explained the proper application and disposal of Butrans.

	Cleveland	OH	44105	3/31/2011	i talked to Abdul,Pharmacist,about Butrans initiation guide and who he feels could benefit from Butrans.Abdul said there are so many patients he see's that have been on Vicodin or Percocet for 10-15years that it will be tough to get them off the pills and start on a patch.we discussed that these are probably not the best patients for my doctors to discuss Butrans with,as they are probably happy with their pills.i told Abdul i am talking to doctors about patients that are taking short-acting opioids like Vicodin or Percocet but complaining that their pain isnt controlled and possibly Butrans being an option for them.Abdul said that made sense and we discussed OxyContin as an option for those patients taking 80mg oral morphine equivalent a day or more that OxyContin is available and has 7 tablet strengths to allow for flexibility in titration.Abdul said he needed more OxyContin savings cards as they expired today,so i left 3 packs
PPLPMDL0020000001	Highland Heights	OH	44143	3/31/2011	Ask doc what issues he may be having with Butrans. He said he wants to write it and he has been trying it but nobody is covering - He asked about medicare. I told him that medicare/medicaid require a PA but commercial plans and BWC are covering Butrans. He said he just wrote a script last week for a patient that was taking about 6 percocet/day so he initiated the patient on 20mcg/he. I explained that 20mcg is only a titration dose. I reviewed the Proper initiation and the potential for withdrawal symptoms if patients are not tapered down. He said he has not had any feedback from any Butrans trials. I asked him to continue to try Butrans for commercial or BWC patients. I reminded him of the oxycontin patient indication and the 7 flexible dosing options.
PPLPMDL0020000001	Cleveland	OH	44102	3/31/2011	i talked to Nagla,PA,about Butrans fpi, 5 core messages,initiation guide,Butrans REMS and Butrans patient savings cards.Nagla works with Dr.Talbot,Dr.Celeste and Dr.Carson in this office and she said they treat so many chronic pain patients who have been taking vicodin and percocet for years that she doesn't think they will want a patch as these patients tend to not believe that a patch will control their pain.Nagla said most of these patients like their short-acting opioids as they believe it controls their pain better and they are in control of taking their pills.Nagla said its mainly in the patients minds.Nagla said from a clinical perspective,Butrans makes sense being transdermal,a patch and dosed once weekly.i asked Nagla if she ever had patients calling in for a higher dosage strength or telling her the BID regimen isnt working and she's considering to go to a TID regimen? Nagla said every day,so i told her thats where Butrans could be an option and we looked at Butrans initiation
PPLPMDL0020000001	Independence	OH	44131	3/31/2011	Roman said he will not use Butrans until he "knows more about it". He said that he wants to know things that i won't be able to tell him because they are off label. I asked if he had a specific question & told him we could submit it to medical services & that they would answer it. He declined. He said he wants to go to a dinner & speak with a specialist about it. I asked what specialists in the area he refers to for pain management & he said Dr Nickels & Dawoud. He said he has worked with Buprenex for addiction & asked if Butrans was "the same as that". Reminded him that Butrans only has an indication for moderate to severe chronic pain & does not have an indication for addiction treatment. Reviewed transdermal system. I asked him if he would at least try it on label before considering any other use but he said he wouldn't prescribe until a dinner program with a specialist. Gave new OxyContin savings cards & recommended Senokot-S for medication-induced constipation.
PPLPMDL0020000001	Cleveland	OH	44195	3/31/2011	i talked to Kathy,PA for Dr.Mintzer and Dr.Mekhaill's patients in pain management department,about patients she feels are appropriate for Butrans.Kathy said she see's a lot of patients on tramadol,vicodin and some on percocet and she's recommending Butrans as an option when patients come in to office complaining of short-acting opioids not controlling their pain.we discussed proper tapering and initiation of Butrans and discussed commercial plan,medicaid and workers comp coverage of Butrans.i recommended Senokot-S
PPLPMDL0020000001	Copley	OH	44321	3/31/2011	Introduced Butrans again and asked him what he thought of the molecule Buprenorphine. He again told me that he felt like it had a high abuse potential. I explained that it was an opioid and did have an abuse potential similar to other opioids. I went over the dosing and when he was able to understand that this was for a more moderate patient he became much more comfortable. He said he would try it on 2 patients this week.
PPLPMDL0020000001	Beachwood	OH	44122	3/31/2011	Spoke with Shelly & asked if she had heard anything on her end regarding the Butrans "unbreakable carton" issue. She checked her system & said that on 3/15 she was able to run a prescription for 2 patches through without problem. I told her i have still been hearing reports of prescriptions for 1 or 2 patches not getting filled because of the system lockout, including one in a Burton, OH Rite Aid location. While i was there, she ran one "test script" for one patch & one for two patches, both of which went through. She said she would call the Burton store to talk to them about it & would also call her district manager to alert them to this issue as she said she is afraid they are going to lose business as patients will take their prescriptions to other pharmacies willing to fill it for fewer than 4 patches. She said she would let me know what the resolution is once she finds out.
PPLPMDL0020000001	Cleveland	OH	44102	3/31/2011	i talked to dr about patients she feels could benefit from Butrans,dr said she thinks patients taking 40mg[10mg vicodin] a day could be beneficial to her patients, to try Butrans there. we discussed when patients call in,that she just started on 5mg or 7.5mg Vicodin,to not increase dosage strength or dosing interval of short-acting opioids but to consider Butrans at that point.dr said okay that made sense as she wasn't really thinking of that patient,she was thinking more of the 40mg a day patient whether it be vicodin or percocet.dr said a lot of patients think the short-acting opioids control control their pain better than a long-acting opioid because its in their mind that the pills q4-6h will control that pain.dr said she likes that Butrans is transdermal and dosed once weekly and will think of a few patients to try Butrans in and see what results she gets from Butrans.i asked dr to consider 2 patients with commercial plan insurance so that they can use Butrans patient savings cards
PPLPMDL0020000001	Highland Heights	OH	44143	3/31/2011	Debbie was at Dr. Salama's office for lunch. I discussed the Butrans positioning and the 5 selling messages. She just wanted clarification on the scheduling. I confirmed that its a CIII.
PPLPMDL0020000001	Cleveland	OH	44195	3/31/2011	i talked to dr about patients he feels could benefit from starting on Butrans and i showed dr Butrans initiation guide.i asked dr what benefits he saw in Butrans for his patients? dr said he likes once weekly dosing and transdermal delivery of Butrans.i asked dr if he had patients on vicodin or percocet that ask him for something different as their pain isnt controlled with short-acting opioids? dr said yes every day patients say this to him or nurses.i asked if dr could consider Butrans for 2 patients,that are like this and appropriate for Butrans,and properly taper their short-acting opioids and then start Butrans? dr said he will consider that when he's with patients that he feels are appropriate.i recommended Senokot-S
PPLPMDL0020000001	Strongsville	OH	44136	4/1/2011	Introduced myself & Butrans to Megan (pharmacist). She said they do not have it (although they appear to have ordered 2 boxes of 5mcg per stocking data). Reviewed indication, dosing, appropriate patients/positioning. Also gave her new OxyContin savings cards & reviewed usage for eligible patients.
PPLPMDL0020000001	Twinsburg	OH	44087	4/1/2011	Spoke with Christina (floater) & reviewed Butrans indication, dosing, appropriate patient type. Also gave new OxyContin savings cards & reviewed eligibility requirements. She said she would leave everything for Lou.
PPLPMDL0020000001	Parma	OH	44129	4/1/2011	Quick call- Jen is now the only practitioner in the Parma office as Laura is now officially in their other location full time. Jen said she is overwhelmed & hasn't thought of Butrans. Reviewed indication, dosing, & appropriate patient with her before she went into a room. Also spoke with Dawn & Butrans appropriate patient type, managed care coverage & savings cards for Butrans & Ryzolt.
PPLPMDL0020000001	Warrensville Heights	OH	44122	4/1/2011	Spoke with Iuliana (nurse) & Kelli (MA) who said Dr Khalafi is out all week & will return next Tuesday. Showed her initiation guide & reviewed indication, dosing, appropriate patient type, CIII, & savings cards for eligible patients. Iuliana said she remembers me talking about Butrans & that she would leave the initiation guide on Dr Khalafi's desk for when he returns. She said he has a lot of patients who fit the indication that may like a
PPLPMDL0020000001	Garfield Hts	OH	44125	4/1/2011	Spoke with Amy (MA) who said Dr Kline was in a training today & therefore was unable to see me. Reviewed Butrans indication, dosing & appropriate patient/positioning with her. She said she would remind Dr Kline. She was not sure if he had prescribed Butrans yet. Also reminded her of savings cards for eligible patients.
PPLPMDL0020000001	Brooklyn	OH	44144	4/1/2011	Quick call- Dr Miguel said he did not have time to talk today. Butrans dosing & appropriate patient reminder. Also spoke with Tiffanie (MA) & reviewed new OxyContin savings cards for eligible patients.
PPLPMDL0020000001	Lyndhurst	OH	44124	4/1/2011	Quick call....reminded doc of Butrans - a 7 transdermal system delivering buprenorphine. I asked if he has identified appropriate patients. He said not really. I explained the positioning and the indication. I also explained that it is still a CIII and has the risks/warnings similar to other opioids.
PPLPMDL0020000001	Beachwood	OH	44122	4/1/2011	Spoke with Tara & Yvonne (MA) who said Dr Tabbaa & Jim had just left for the day. Reviewed Butrans indication, dosing & savings cards with them & asked if they knew if he had been prescribing at all. They said that it sounded familiar & that they think he has been, but they were not sure. The tried to check savings card inventory but could not locate the key to the sample/coupon cabinet. They said to come back next Friday at the end of the day to try to catch Dr Tabbaa.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	4/1/2011	Followed up with Dr. Ali based on information he had shared with me last call when he told me he had initiated Butrans therapy. I asked him how the patient was doing and if they were having success and he said that the patient was unable to get the Rx filled because they had Medicaid. I reiterated how important it was to initially start therapy on patients who had either BWC or commercial insurance since those patients would be able to take full advantage of the patients saving cards i had left. He agreed he would focus on a commercially insured patient.
PPLPMDL0020000001	Cleveland	OH	44195	4/1/2011	worked pain management dept,chronic pain and pm&r - had to leave information for all doctors with medical secretaries,so left information on Butrans,OxyContin and Ryzolt and my business card
PPLPMDL0020000001	Westlake	OH	44145	4/1/2011	I asked Dr about the patient he started on Butrans. He said that it was a patient who was on vicodin 7.5 4 times per day. He said he gave the patient the instructions on how to ween down to 2 tablets per day and then to start Butrans. The patient said that Butrans was too expensive and would be about \$150. I asked which insurance and Laura said it was Anthem. I reviewed the managed care for Butrans and the savings program and that most commercial patients can get Butrans for around \$15. I asked the Dr if he would think of another similar patient on vicodin around the clock to try Butrans and he agreed.
PPLPMDL0020000001	Lakewood	OH	44107	4/1/2011	I reviewed our last conversation about patients who are taking 3-4 5mg vicodin per day whose pain is not well controlled. I asked if he would be seeing a patient like this today and would be start them on Butrans instead of increasing their short acting. Dr said he will keep it in mind.
PPLPMDL0020000001	Lakewood	OH	44107	4/1/2011	I asked Dr if he could think of just one patient who he could start on Butrans today. He said that he thinks he has a previously darvocet patient coming in next week where Butrans may be appropriate. We discussed the indication for Butrans and he said the patient does have chronic pain. We reviewed how to initiate Butrans in an opioid naive patient and he said he will give it a try. I spoke with Kim said she would pull the patient's chart and make a note to remind the Dr. She could not remember the patients managed care off the top of her head.
PPLPMDL0020000001	Akron	OH	44312	4/1/2011	Window call. Dr. Hill came to the window and gave me a quick minute since he had not yet heard of Butrans. I was able to go over the indication and once daily dosing. I also explained that it was a single entity opioid, LA and a schedule 3. He seemed surprised it was schedule 3. I asked him if he had many patients who were on low dose hydrocodone and he said he had several but prefers not to treat chronic pain. I asked him if he would consider using Butrans for patients currently on low dose hydrocodone and he said he would be more interested to learn more about it and asked if i had a lunch.
PPLPMDL0020000001	Cleveland	OH	44109	4/1/2011	i talked to dr about patients he see's taking tramadol around the clock for their chronic pain,yet telling dr their pain isnt controlled with the short-acting opioid and thats the place where Butrans could be an option,showed dr Butrans initiation guide for the discussion and dr said he'll think of a few patients to try Butrans in and see what happens.i recommended Senokot-S
PPLPMDL0020000001	Mayfield Hts	OH	44124	4/1/2011	I reviewed the Butrans indication and positioning and asked him if he could commit to trying one patient on Butrans next week. He said he would try. I asked him to try for a patient with private insurance and be sure to give them a savings card.
PPLPMDL0020000001	Cleveland	OH	44109	4/1/2011	worked rheumatology dept-see call notes, need to follow-up with Linda,RN,on Monday, April4th,about booking a lunch with rheumatology dept
PPLPMDL0020000001	Lakewood	OH	44107	4/1/2011	I asked if we could continue our discussion about Butrans and Dr said he didn't have a lot of time today. He said that he does want to try it and committed to prescribing.
PPLPMDL0020000001	C. Falls	OH	44223	4/1/2011	Spoke to the pharmacist Larry, I let him know that i had to spoke to Dr. Ali and he had committed to starting 2 patients on Butrans who had commercial insurance. I went over the patient education guide so he would be able to educate patients on how to properly apply and dispose the patch.
PPLPMDL0020000001	Lakewood	OH	44107	4/1/2011	I reviewed our conversation about prescribing Butrans before going to vicodin. He said he does have patients where tramadol is not enough. I asked him to try Butrans after tramadol in just one person today he said he would. Reminded the staff to recommend Senokot S with opioid scripts.
PPLPMDL0020000001	Garfield Hts	OH	44125	4/1/2011	Spoke with Dina (MA) who said i just missed Dr Sadowski. Spoke with her about his patient population. She said he does see a lot of patients who fit the Butrans indication. She said she thinks many of them would appreciate a once-a-week transdermal option to treat their pain. Dina said she has placed Butrans savings cards in two exam rooms in effort to keep branding in front of him. She said to stop back next week to catch Dr Sadowski.
PPLPMDL0020000001	Akron	OH	44312	4/1/2011	Dr. Smith gave me a minute through the window. I left a booklet FPI and explained that this product had recently been introduced to the market. I went over the indication and explained that it was a LA, single entity opioid. He asked me to schedule an appointment.

	Richmond Heights	OH	44143	4/1/2011	Discussed the Butrans 5 selling messages, the positioning and the CIII status. Doc said he definitely has patients that fit into that category. He asked if special licensing required to prescribe Butrans. I told him no and that Butrans is buprenorphine at a much lower dose than suboxone which he compared it to. He asked about the conversion rates from Morphine. I explained the approx equivalents. He wanted to know where 20mcg would be used. I explained that it is just a titration dose and the potential for withdrawal symptoms. He said he is definitely interested in prescribing Butrans but he would like to read more about it. He asked for journals articles on clinical trials/medical letter. He said he and a lot of other docs think highly of medical letters. Told him I would provide more info as soon as I get it. Reminded him of the oxycontin indication, dosing, and preferred
PPLPMDL0020000001	Cleveland	OH	44109	4/1/2011	i talked to dr about patients he feels are appropriate for Butrans, showed dr Butrans initiation guide and dr said he has some patients on tramadol that he knows could benefit from Butrans but he needs to talk to them about Butrans being a patch, we discussed proper tapering and initiation of Butrans, we discussed Butrans patient savings cards and formulary coverage and i asked dr to start 2 patients on Butrans that are taking tramadol around the clock for their chronic pain but are asking him for something different dr said he would start a few patients on Butrans and let me know what results he gets. i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44104	4/1/2011	i talked to dr about Butrans fpi, 5 core messages, initiation guide, Butrans REMS program and Butrans patient savings cards and patient information booklet/application dvd. dr said she heard of Butrans being a buprenorphine transdermal delivery but that is, so we discussed who was and wasn't appropriate for Butrans and i asked dr where Butrans fit in her practice? dr said she has patients with chronic pain that are always asking for more pills and their short-acting opioids never seem to control their pain. i asked dr if she could think of 2 patients like this, showed Butrans initiation guide and after proper tapering, start 2 patients on Butrans? dr agreed. i recommended
PPLPMDL0020000001	Cleveland	OH	44104	4/1/2011	i discussed Butrans fpi, 5 core messages, initiation guide, application dvd/booklet, Butrans REMS and Butrans patient savings cards. dr said she has so many patients with chronic pain that are taking short-acting opioids like tramadol, vicodin and percocet and she feels Butrans once weekly dosing and transdermal delivery are both benefits to her patients. i asked if dr could think of 2 patients that are taking their short-acting opioids around the clock and telling her that their pain isn't controlled, and start these 2 patients on Butrans after proper tapering? Dr said yes, she will start a few patients and get some clinical experience with Butrans. i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44130	4/1/2011	i told Dr Diab that it had seemed as though he was excited about Butrans when i first told him about it but that it seems his excitement has dissipated & asked him why. He said he did not know. I reminded him that he had said in the past that he liked the idea of a once-a-week transdermal system to treat pain. He said he still thinks it is a good option. He said he thinks cost will be an issue & added that he has written 3 prescriptions for Butrans & had one rejected. Reminded him of commercial coverage & savings cards & let him know that Medicare D & Medicaid plans would require prior authorization & a potentially higher co-pay. He said he would continue to
PPLPMDL0020000001	Copley	OH	44321	4/1/2011	Followed up with Dr. Machado. He said he did not like Buprenorphine because it was once an addictive nasal spray. I let him know that that was not Buprenorphine and it has never been available in a nasal spray. He looked it up and validated that it was NOT ever a nasal spray. He was appreciative that I had come in to clarify and he was confident to write Butran's.
PPLPMDL0020000001	Akron	OH	44312	4/1/2011	Introduced Butrans and FPI to Dr. Manning briefly as I was explaining therapy to the RN Diane. Dr. McRoberts asked me again about the once a week dosing after hearing me say it one. This was a big selling point to him since he has [patients who have been taking hydrocodone several times a day for a long period of time. He said that he tries not to treat a ton of pain but has several patients this may benefit.
PPLPMDL0020000001	Akron	OH	44312	4/1/2011	Introduced Butrans and FPI. Started the conversation speaking with one of the RN's Diane and Dr. McRoberts became engaged when he came out of a patient room and overheard our conversation. I was able to go over the indication and 7 day dosing. He asked me to schedule a lunch so he could learn more.
PPLPMDL0020000001	Cleveland	OH	44104	4/1/2011	dr and i talked about who he feels could benefit from Butrans and dr said out of all the patients he starts on Butrans, only 20 patients are in the office, all the rest are in the hospitals where he gives short-acting opioids like tramadol, codeine and percocet. i asked dr if those 20 patients he has in the office are ever saying to him that the 5mg percocet isn't controlling pain, so he increases dosing interval to BID, so now patients taking 10mg percocet? dr said yes, he'll start with 1-5mg percocet, then 2-5mg percocet, so i told dr he could start Butrans there, instead of increasing dosage strength and dosing interval. we discussed Butrans coverage for medicaid and commercial plan patients. i asked dr if he could think of 2 patients to start like this and i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44104	4/1/2011	dr said he just came back from Geriatrics conference in Tampa, FL and Purdue had a speaker there on Butrans so he was able to attend this lecture and did learn a lot from speaker. i asked dr what benefits he saw in Butrans, as he has started a few patients, dr said he has started 2 hospice patients and 1 was discharged and is home doing fine on Butrans, another patient was in his office but he thinks commercial insurance was expensive, \$200 for Butrans, so we discussed Butrans patient savings cards for commercially insured patients and i asked dr where he thought Butrans would best fit into his patient population in office? dr said patients taking 40mg hydrocodone or oxycodone a day. i asked dr if he could consider Butrans earlier, 15-40mg opioid experienced patients, dr said he would and his only question was about starting patients who were older, 65 and older, thin patients, on
PPLPMDL0020000001	Macedonia	OH	44056	4/1/2011	Butrans? i showed dr Butrans fpi, geriatric use section, but dr wanted medical information request form filled out. Quick call- Spoke with Eve (pharmacist). She said she has not seen any Butrans activity yet & did not have any suggestions on what area practitioners may be interested. Asked if she stocked OxyContin. She said she does stock some strengths. Gave her savings cards for eligible patients. She said to come back another time when they are not so busy.
PPLPMDL0020000001	Cleveland	OH	44104	4/4/2011	dr and i discussed appropriate patients for Butrans, looking at Butrans initiation guide as he said he could remember who the right patient was. dr asked about insurance coverage for Butrans so we talked about doctors workers comp and commercial plan patients trying Butrans and dr said he will think of 1 or 2 patients he can start on Butrans.
PPLPMDL0020000001	Cleveland	OH	44103	4/4/2011	i talked to Sonia, Pharmacy Technician and Baharah, Pharmacist, about Butrans stocking and any scripts that they have seen. They both said they haven't gotten any scripts since dr sahgal sent 1 patient there. we discussed Butrans initiation guide, patient savings cards and i asked each of them to recommend Butrans for appropriate patients, they both agreed
PPLPMDL0020000001	akron	OH	44333	4/4/2011	i asked Dr. Bashor if he could think of one patient to initiate Butrans therapy to and he said that he was thinking of some of his elderly population. I reminded him that Butrans requires PA for state plans and told him that it would be easier to initiate therapy to a commercially insured patient. He said he would keep it in mind.
PPLPMDL0020000001	Akron	OH	44333	4/4/2011	Dr. Browns practice is starting to get busier and she has already committed to starting both opioid naive patients and opioid experienced patients on Butrans. I asked her why she thought Butrans would benefit her practice and she said she liked that it was a LAO and that it is a schedule 3.
PPLPMDL0020000001	Garfield Heights	OH	44125	4/4/2011	Introduced Butrans to Dr Geeta, delivering 5 core messages & alerting her to box warning. She said she does not treat chronic pain & refers to pain management if a patient needs an opioid. Asked her how long she waits to refer & she said she usually writes a prescription for 1 month, 2 at the most before she would refer to South Pointe pain management group. She said as a general rule, their practice does not prescribe opioids because these patients are complicated & pain management specialists are better equipped to handle those issues. She said she likes to have information about new products but likely does not have a place for Butrans in her practice. Recommended Senokot-S for medication-induced constipation.
PPLPMDL0020000001	Copley	OH	44321	4/4/2011	i asked Dr. Heim if he would feel comfortable converting 2 patients from low dose hydrocodone to Butrans and he said he would. I went over the initiation guide so he would understand what dose would be most appropriate depending on how much Vicodin they were currently taking.
PPLPMDL0020000001	Akron	OH	44333	4/4/2011	i asked Becky if she had thought any more about initiating Butrans therapy to patients who have been on low dose hydrocodone. She said that she wants to try it and would keep it in mind.
PPLPMDL0020000001	Cleveland	OH	44109	4/4/2011	worked internal medicine department-had to leave Butrans fpi, initiation guide, patient information booklet and business card for Dr. Lindheim, Dr. Falck-Ytter and Dr. Harrington and worked out-patient pharmacy
PPLPMDL0020000001	Akron	OH	44333	4/4/2011	Dr. Shah has initiated therapy to several patients, all who are opioid experienced. I asked him about starting Butrans therapy instead of prescribing hydrocodone to an opioid naive patient and I went over the AE's listed in the
PPLPMDL0020000001	Fairlawn	OH	44333	4/4/2011	i asked if there has been any movement and d she said she thought there had been a script or two but couldn't remember from who. I went over the patient education guide and explained application and disposal.
PPLPMDL0020000001	Cleveland	OH	44106	4/4/2011	worked pain management dept-dr hayek was still in lecture so couldnt see him today, worked total office call for Butrans, internal medicine-talked to internal medicine resident coordinator, Barb, who said to stop back tuesday and leave Butrans fpi, initiation guide and my business card for each Chief Resident(5) and she will set-up appointments with each one for me; worked pm&r department-Dr. Baig was out so jennifer, medical secretary, said to stop back tomorrow and discuss Butrans with doctor
PPLPMDL0020000001	Cleveland	OH	44106	4/4/2011	i talked to Cheryl, Narcotics Buyer, as Wes, Clinical Pharmacist who is team leader for new drugs being presented to P&T committee was in hospital making rounds. Cheryl said all she knows is Butrans was presented, got good feedback from P&T committee members but she's not sure what decision was, yes/no for hospital formulary. Cheryl said to follow-up with Wes tomorrow when i stop back at UH
PPLPMDL0020000001	Mogadore	OH	44260	4/4/2011	Introduced Butrans, reviewed FPI, indication, dosing and titration, boxed warning and 5 core messages. She said she does not treat pain much. I asked if she writes Tramadol and Vicodin and she said yes, I asked if any are on around the clock and chronic and she said yes. I said this is where Butrans would fit. She said she can see it filling there in her practice, maybe not alot because she is not treating as much pain. Discussed managed care and savings cards.
PPLPMDL0020000001	Warrensville Heights	OH	44122	4/4/2011	Re-introduced Butrans to Dr Gupta, reminding him of dosing, delivery system, & indication. He asked if Butrans is only for chronic pain. I told him there is no specification of etiology that must cause the pain as long as it is considered moderate to severe chronic pain. He said he usually refers to pain management for more chronic issues but may be able to use Butrans in nursing home patients. I mentioned prior authorization likelihood with those patients & asked him to think of commercially insured patients. He asked if it gives constant delivery over 7 days & adverse events. Showed FPI section 12.3 & 6. He asked how it compares to fentanyl & Percocet. Told him we have no comparative data & showed FPI 2.2. Discussed starting dosing & ability to titrate every 3 days. He asked about contraindications- showed FPI section 4. Also discussed CIII & box warning. He said it is an option
PPLPMDL0020000001	Mogadore	OH	44260	4/4/2011	Dr came in and said he has not written Butrans yet and he asked why again would he write this and I said for him to tell me and he said honestly he has forgotten. We reviewed Butrans appropriate patients and dosing and then i asked him how he sees this as a benefit to his practice and he said he sees this as a huge benefit the fact that it is once a week, there are no pills and it is transdermal, he thinks there is more control and compliance. He asked about cost and we reviewed that. HE said it would be ideal if this is covered on Medicare. HE said he just needs to write a script and he would remember. I told him the best way to do that it to think of specific patient and he said he is and they are on medicaid. HE said this would be good in his Darvocet patients, rmeinded we are indicated for moderate pain I said if the patient is on medicaid or medicaid he can go to low dose Oxycontin
PPLPMDL0020000001	Mogadore	OH	44260	4/4/2011	HE said he has a couple of patients on Oxycontin and asked about savings cards so i left him a pack
PPLPMDL0020000001	Mogadore	OH	44260	4/4/2011	Joe said he has not written Butrans. I asked how he thought Butrans could be a benefit to his practice and he said he thinks it is great because it is giving him a long acting options and he likes the fact that it is transdermal and not pills so it would be less potential for abuse. I told him that it is schedule 3 and there is the same potential for abuse as any other schedule 3 and he said he knows he meant to say there is more compliance with transdermal. I asked if he has a patient who is on Tramadol what is his next step if they are in pain around the clock and he said he would keep a patient on tramadol as long as possible because it is not scheduled. I said what if it is not working and he said this would be good there. I asked when he considers a patient chronic and he said a combination of disease state and how long they have been taking medicine. HE said usually around 3-4 months. HE asked about cost and we discussed savings cards.
PPLPMDL0020000001	Warrensville Heights	OH	44122	4/4/2011	Introduced Butrans to Dr Gulati. He said he had just seen an advertisement about Butrans. Reviewed indication, delivery system, dosing, CIII & abuse/addiction potential. He said their practice does not prescribe opioids & that they refer to South Pointe pain management for that.
PPLPMDL0020000001	Cleveland	OH	44109	4/4/2011	i talked to Chris, pharmacist, about stocking of Butrans and Chris said Rob, Pharmacy manager was gone for day but i can follow-up on Friday to talk with him about Butrans as they dont have it stocked and havent ordered Butrans. i asked Chris what benefits he saw in Butrans for his patients? Chris said the fact that Butrans is a patch, dosed once a week, is much easier for some patients that dont like taking pills around the clock for their chronic pain or their pain isnt controlled with the short-acting opioids. Chris said the problem is insurance coverage as they have many patients paying cash for their medications and medicaid so Butrans would have to be available to these groups of patients we discussed managed care coverage for Butrans, specifically commercial plan coverage and the Butrans patient savings cards, medicaid prior authorization requirements and workers comp
PPLPMDL0020000001	Parma	OH	44129	4/4/2011	Told Dr Ortega that I had thought about our last conversation & that it had seemed that he was uneasy about the tapering discussion we had before. I told him I wanted to be sure that he felt comfortable in initiating Butrans therapy in his patients who he selected & asked him if he had any further questions or issues with this. He said that he does not & that he feels comfortable with tapering patients if necessary.
PPLPMDL0020000001	Fairlawn	OH	44333	4/4/2011	i asked Dr. Oyakawa what was the most important thing he needed to know before prescribing a new product. He said safety concerns.
PPLPMDL0020000001	Fairlawn	OH	44333	4/4/2011	i asked Dr. Weidman if she had additional patients like the ones she had tried Butrans therapy on. She said that she liked the idea of the LA therapy but could not think of any other patients to try it on at the moment. I reminded her what the ideal patient looked like and asked if she had any coming in this week. She said she would keep it in mind.

PPLPMDL0020000001	Westlake	OH	44145	4/5/2011	Spoke with Amin, we reviewed the Butrans medication guide and how to instruct patients on the proper use and application. He asked about the adhesive and we reviewed what to do if the patch comes off or the edges come up per the medication guide. I reviewed OxyContin as an option when Butrans may not provide adequate analgesia. Reminder to recommend Senokot S.
	Cleveland	OH	44106	4/5/2011	I talked to Matthew, Pharmacist, as Steve, Pharmacy Manager was out today, about Butrans stocking and scripts they have seen. Matthew said he thinks 1 or 2 scripts have come from pain management but wasn't sure. I showed Matthew Butrans initiation guide and we discussed appropriate patients for Butrans. Matthew said he likes that Butrans is once weekly dosing, transdermal and is a patch. I asked if Matthew would recommend Butrans to patients on short-acting opioids that are complaining to them in pharmacy about their pain not being controlled on short-acting opioids, so perhaps Butrans could be an option. Matthew said he would do that and told me to follow-up with Steve, Pharmacy manager in next week or so.
PPLPMDL0020000001	Parma	OH	44134	4/5/2011	Dr Hernandez said he has been telling patients not to fill their Butrans prescriptions at Rite Aid until the "unbreakable carton" issue is resolved. He said he likes to write for one patch, see how the patient tolerates the dose before writing for a full month's supply. Asked what types of patients he has been choosing for Butrans & he said he usually uses it in patients who are already taking a few Vicoden per day. He said that he likes that he can use Butrans in place of Vicoden for appropriate patients. He also added that when he does get an opioid-naïve patient, he tries them on Butrans as well. He said he has never been happier with a drug than he is with Butrans & will continue to prescribe.
PPLPMDL0020000001	Cleveland	OH	44130	4/5/2011	Re-introduced Butrans to Dr Sawmhy. Reviewed indication & asked if he treats chronic pain in his practice- he said yes, a lot. He said he does procedures (implants, pumps) & also manages patients' oral pain medications. He said he likes a once-a-week dosing option & likes long-acting medications. Reviewed initiation guide & showed pg 6 for positioning. He asked if the levels of drug stay constant. Showed FPI section 12.3. He asked how Butrans compares to fentanyl. Told him we have no comparative data & asked him to think of more "moderate" side of pain. Reviewed managed care coverage & asked him to focus on commercial insurance so that patients could utilize savings cards. He asked about worker's comp coverage- told him as of now it is being paid for. He committed to prescribing Butrans for appropriate patients with worker's comp coverage. OxyContin reminder for appropriate patients & gave savings cards. Reviewed savings cards & initiation guide with Shelley (office manager).
PPLPMDL0020000001	Akron	OH	44310	4/5/2011	I asked Dr. Janolo if he saw the value that Butrans therapy could bring to his practice he said he liked it and that there was a definite need for a product like this. I asked him what type of patient specifically he may try it on and he said a patient who was currently on hydrocodone. I proceeded to go over the titration brochure so he had a clear understanding of the appropriate patient. <font color=blue><b>CHUDAKOB added notes on 04/15/2011</b></font>This csll note is one of your better ones. It talks mostly about what the doctor said based on your questions.
PPLPMDL0020000001	Parma	OH	44129	4/5/2011	Dr Gigliotti said he has not prescribed Butrans yet. He said he has not seen a patient who fits the indication who he trusts. I asked him if trusting patients was an issue in his practice & he said it was more that he hasn't seen someone who "isn't already on something". I asked him if those patients who he sees who are on something already for their pain ever ask for an increase in their dose from 2-3 Vicoden. He said this does happen frequently. Told him those are the patients, if they have commercial insurance, that he should think of for Butrans. Dr Gigliotti said he would continue to look for the appropriate patients for Butrans. Gave him an initiation guide as a
PPLPMDL0020000001	Mayfield Heights	OH	44124	4/5/2011	Debbie thanked me for the f/u on Butrans coverage on Cleveland clinic formulary. She said that they have not had any issues with coverage since focusing on commercial patients. Patients have had good results/feedback with Butrans and no complaints about the patch falling off. She asked if Purdue offer any solutions for those instances. I explained the acceptable use of first aid tape or tegaderm. Reminded her of the preferred coverage of
PPLPMDL0020000001	Westlake	OH	44145	4/5/2011	Met Dr while on the way to Dr Khalil's office. He asked about Butrans and I reviewed the key messages about Butrans. He said that he is a neurologist, treats a lot of pain and that he would like me to leave all of the information on Butrans at his office. He said that he likes transdermal systems and prescribes Duragesic often. I left the Butrans info with Elizabeth and she will call to set up an appointment if the Dr would like to talk further. Elizabeth is the Prior auths for the office. I reviewed the managed care for Butrans and the savings cards. Don usually works the front desk.
PPLPMDL0020000001	Cleveland	OH	44124	4/5/2011	Quick call.... doc did not need savings cards. I reviewed the Butrans indication and positioning. Also reminded him of the preferred coverage for oxycontin. Nothing learned.
PPLPMDL0020000001	Cleveland	OH	44195	4/5/2011	I talked to Steve, Assistant Pharmacy Manager, as Curt, pharmacy manager wasn't available to talk, we discussed Butrans stocking and scripts they are seeing. Steve said he thinks a couple from the Anesthesia/Pain management and Chronic pain department have come through pharmacy. I asked Steve if he will recommend Butrans to those patients who are taking short-acting opioids around the clock, for their chronic pain, and not controlled? Steve said he will but it depends on relationship with doctor, so he'll keep it in mind and took Butrans initiation guide. I recommended Senokot-S and left Senokot-S protocol pad
PPLPMDL0020000001	Cleveland	OH	44195	4/5/2011	worked anesthesia/pain management dept-attended lecture, talked to some HCP's and left information for Dr. All as he wasn't available to talk to me and the receptionists said he will look at my information (Butrans fpi, initiation guide and Butrans patient information booklet and my business card) and if he's interested in meeting me, he will contact me for an appointment. I left information for a few PM&R doctors: Dr. Hou, Dr. Reddy and Dr. Jedlicka on Butrans- I left Butrans fpi, initiation guide and Butrans patient information booklet and my business card and asked secretaries to talk with doctors about setting up an appointment with me.
PPLPMDL0020000001	Akron	OH	44310	4/5/2011	I asked Dr. Cremer if he had initiated therapy to the patients we had discussed on my last visit. He said he had tried it on the two patients, both which were on low dose hydrocodone. He said he would see how those patients responded and go from there.
PPLPMDL0020000001	Mayfield Heights	OH	44124	4/5/2011	Spoke to Dana about the stocking and movement of Butrans. She said they have been getting a few scripts from Dr. Dew's office. I asked if there have been any issues with cost/coverage. She said no. She had not noticed customers coming in with savings cards. She could not recall how much patients are paying. Gave her patient info and my card if she needs savings cards.
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	4/5/2011	Dr. DiLauro has started 5 patients on Butrans, which h as been a combination of both opioid naïve and opioid experienced patients. She said she would continue to use Butrans therapy since she has gotten positive feedback.
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	4/5/2011	Had a discussion with Dr. Roseanne and Dr. Cyndi together that allowed Dr. Cyndi to explain to Dr. Roseanne what type of patients she is initiating Butrans therapy to. Dr. Roseanne felt more confident when she heard Dr. Cyndi had already been prescribing it and agreed to try 2 patients.
PPLPMDL0020000001	Westlake	OH	44145	4/5/2011	Spoke with Darrel, we reviewed the key messages for Butrans and the medication guide for patients. I asked his thoughts about Butrans as an option and he said that he thinks that many of their patients could benefit from Butrans instead of taking tablets around the clock. Reminder to recommend Senokot S with opioid scripts.
PPLPMDL0020000001	Cleveland	OH	44106	4/5/2011	dr said he hasn't started anyone on Butrans yet and apologized because he thinks this is a good medication being transdermal and dosed once a week. dr asked me about patients he could start on Butrans and the initiating dosage strengths? I showed dr Butrans initiation guide and asked him to start a few patients, that are currently taking tramadol around the clock for their chronic pain, on Butrans so that he can get some clinical experience. I told dr to think of patients that are telling him or Kim, Medical Assistant, that their pain isn't controlled and they want something else. dr said he will consider Butrans for a few patients as he's in clinic today and tomorrow and then in procedures all Thursday and going out of town for a week, so he won't see me again until April 19th at our lunch. I told dr I am looking to him, for his clinical expertise and feedback as he's the chief of anesthesia/pain at
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	4/5/2011	I asked Dr. Higley how many times a week he was currently prescribing low dose hydrocodone for chronic pain. He said a couple times. I asked if he would consider trying Butrans on just one of those patients so we could discuss their success at my upcoming lunch and he said he would keep it in mind.
PPLPMDL0020000001	Mayfield Heights	OH	44124	4/5/2011	Spoke to Warren about the stocking and movement of Butrans. He said he still has it and has been seeing a couple of scripts per week - mostly coming from . I asked if he has had any issues. He said no and that customers come in with their savings card. I gave him an initiation guide and reviewed the application and disposal for patient information.
PPLPMDL0020000001	Westlake	OH	44145	4/5/2011	Quick call as Dr walked by, he said there is no new news to report with Butrans and he is still continuing to prescribe with good feedback so far. I spoke with Kelly and Tina, there has not been any call backs or managed care issues that they know of with Butrans.
PPLPMDL0020000001	Westlake	OH	44145	4/5/2011	I asked Dr where he sees Butrans fitting into his practice. He asked that I review the main points to refresh his memory as he just got back from Egypt for 4 weeks. We reviewed the key messages about Butrans. I asked what benefit it sees in Butrans and he said that he likes the mechanism of action of buprenorphine and that it is a partial agonist. We discussed appropriate patients for Butrans and the initiation guide. Dr said he had a methadone patient in mind to convert to Butrans but he said he will have think about how to initiate this patient since he feels that the conversion from methadone can be tricky based on how long the patient has been on it due to the long half life. I told him to use discretion and that our initiation guide is not a conversion guide. Dr asked if I had any education regarding neuopathic pain. I asked if he sees a lot of these types of patients, he said no but he is giving a talk on the subject. I referred him to our med ed catalog. Spoke with Juan re Butrans
PPLPMDL0020000001	Lakewood	OH	44107	4/5/2011	Quick call when Dr walked by, he said to just keep reminding him about Butrans and he will start writing. I asked him to start one patient today while it's fresh in his mind.
PPLPMDL0020000001	Lakewood	OH	44107	4/5/2011	I asked Dr how many patients are coming in today who will complain their short acting vicodin or percocet is not enough. She said she wasn't sure but she has those patients. I asked if she would start a few of them on Butrans and she agreed.
PPLPMDL0020000001	Cleveland	OH	44106	4/5/2011	dr said he has been starting patients on Butrans and most patients are doing well, no complaints, but 1 patient is sweating a lot during day as she's a construction worker and is always hot/sweaty so Butrans is starting to not adhere as well. dr asked if this patient could apply Butrans to another application site, not the 4 application sites that Butrans is approved for? I told dr I only have information on the 4 application sites we have discussed and showed dr the Butrans initiation guide, Butrans fpi and the Butrans patient information booklet showing and discussing all 4 application sites. dr asked me what would happen if his patient applied Butrans to her thigh, hip, buttocks? I told dr I didn't know and didn't have any information on that but we could fill out medical information request form and have answer sent to him, dr said that would be great as this patient likes Butrans and is doing really well on the medication, pain is controlled with only Butrans, no short-acting opioids
PPLPMDL0020000001	Akron	OH	44310	4/5/2011	I asked Dr. Schukay what additional information he needed that would make him feel confident enough to prescribe his first Butrans Rx. He said that since he was just learning about the product he wanted additional info but did not have time today. He asked me to schedule a lunch.
PPLPMDL0020000001	Cleveland	OH	44195	4/5/2011	I talked to Gail, NP, about Butrans 5 core messages as she told me she didn't remember much about Butrans other than the name itself. we looked at Butrans initiation guide and I asked Gail what benefits she saw in Butrans for her patients? Gail said the once weekly dosing was much easier for some patients that complain to her about taking pills around the clock for their chronic pain. Gail said she also likes that Butrans is a patch and not a pill. I asked if Gail could think of 2 patients with Commercial insurance, that are telling her their pain isn't controlled with short-acting opioids and requesting something different? Gail said she will consider this option and thanked me for the information.
PPLPMDL0020000001	Cleveland	OH	44106	4/5/2011	worked pain management dept-see call note on Dr. Hayek, worked internal medicine and family medicine departments-had to leave information for each doctor within the departments on Butrans fpi, initiation guide and Butrans patient information booklet.
PPLPMDL0020000001	Westlake	OH	44145	4/5/2011	First thing Dr said was that he started a couple of Butrans patients. He said they are workers comp. One was on 5mg percocet only taking 2 per day, I let him know this is the perfect time to initiate Butrans for chronic pain. The other patient was on 40mg OxyContin and he is trying to taper the OxyContin and convert to Butrans instead. I reviewed the initiation guide and when Butrans may not be appropriate for patient taking more than 40mg of oxycodone per day. He said he forgot but he would be seeing the patient back in 2 weeks and he'll see what happens. He said he prescribed the 5mg. We discussed how to taper patients down to initiate Butrans and that buprenorphine may cause withdrawal in patients on higher doses of opioids. He said he understands now. He asked about titrating Butrans to 15mcg by using 2 patches. I let him know that this is not recommended and would be off label and that only one patch should be used at a time. We discussed how to taper the dose of OxyContin gradually per FPI
PPLPMDL0020000001	Westlake	OH	44145	4/5/2011	Dr is a anesthesiology resident with Dr Khalil. We reviewed Butrans key messages and the initiating guide. We discussed OxyContin as a Q12hr option and we reviewed the OxyContin conversion guide. We reviewed some of the educational resources that Purdue offers to help with pain management.
PPLPMDL0020000001	Cleveland	OH	44195	4/5/2011	I talked to Anne, NP, about her moderate to severe chronic pain patients that she treats with short-acting opioids and how does Butrans fit into that algorithm? Anne said she sees all of Dr. Stanton-Hicks patients and hasn't really thought of Butrans lately. Anne said she likes that Butrans is dosed once a week and is transdermal but so many patients she sees don't want to get off pills. I discussed proper tapering of short-acting opioids and initiation of Butrans by showing Butrans initiation guide and discussed Anne using short-acting opioids in the maintenance of therapy as well as the initiation and showed Anne Butrans fpi. Anne said ok she forgot about that and we discussed patients who are telling her that their short-acting opioids are NOT controlling their pain therefore they are requesting something different. I told Anne that could potentially be the place for Butrans, if patients meet Butrans indication.
PPLPMDL0020000001					

PPLPMDL0020000001	Mayfield Heights	OH	44124	4/5/2011	I reviewed the 5 Butrans selling messages. Doc said she is still happy with Butrans. Patients are liking it and she has been refilling it. He only issue is that her "ideal" patients (elderly with medicare) can't get it. She said that even some commercial patients have issues with cost (she confirmed a high amount of aetna patients). I asked She and Dr. Laham if they see a place for Butrans in a hospital setting. She did not think so because of the chronic indication. Medical assistant, Marianne, said Dr. Dews wrote about 9 scripts yesterday. I reminded doc of the coverage of Butrans with commercial plans and BWC. I also reviewed the preferred oxycontin coverage.
	Cleveland	OH	44195	4/5/2011	I talked to Kathy briefly about Butrans and the patients she feels can benefit from Butrans. Kathy said the problem she's having is Dr. Mekhail doesn't want to prescribe a medication that's "new" to him as he likes to wait awhile before he will start prescribing and she see's a lot of his patients. Kathy said she has suggested Butrans for a few patients on tramadol and vicodin that are complaining of their pain not being controlled with their short-acting opioids but Dr. Mekhail won't convert them to Butrans. I asked Kathy if she could ask Dr. Mekhail what benefits he even see's in Butrans, if any, for his patients? and how long will it take dr before he considers prescribing Butrans? I asked if Dr. Minzter has considered Butrans for any of her patients as Kathy treats these patients too? Kathy said no she hasn't started anyone on Butrans as Dr. Minzter is trying to get her patients off opioids. Kathy said she does believe in treating chronic pain but doesn't like opioids. I asked Kathy to share
PPLPMDL0020000001	Mayfield Heights	OH	44124	4/5/2011	I discussed the Butrans selling messages and dosing. Described the positioning. She asked if it could be used in opioid naive patient....I confirmed that it could. She asked about AE's, specifically, skin sensitivity to the adhesion. I reviewed the AE section of the FPI. I asked her if she sees a place for Butrans in the hospital. She suggested I talk to Dr. Laham as he sits on the P&T committee. I reviewed the oxycontin indication and preferred formulary coverage.
	Mayfield Hts	OH	44124	4/5/2011	Discussed the Butrans selling messages and asked doc what feedback he has had from his Butrans trials. He said he has not heard anything. I asked him if he wrote for refills. He did not recall but Dr. Dews said that she refilled a script for his patient. He said he really wants to write Butrans for elderly patients but its not covered on medicare. I asked doc if he sees a place for Butrans in the hospital. He said he was not sure but the P & T committee must now follow the main campus formulary so there is little autonomy. Doc said he will keep trying to prescribe Butrans. Oxycontin indication and coverage reminder.
PPLPMDL0020000001	Cleveland	OH	44113	4/5/2011	I had lunch with dr and we discussed doctors concern that because this is a newer medication to him he wanted to know if other physicians were prescribing Butrans so he could talk to them and see what they think and what his colleagues are doing because its real world. we discussed Butrans initiation guide, proper tapering of short-acting opioids and initiation of Butrans 10mcg as dr said that he would only consider patients taking opioids to start on Butrans, not opioid naive. dr asked me how he would write the prescription of Butrans? I showed dr back page of Butrans initiation guide and dr said that seemed easy and he asked about any educational information for patients as he likes to give them something to read on a new medication. I showed dr Butrans application dvd/patient information booklet and dr said that would be very helpful to have a couple so that when he starts a patient he can give this to that person. I asked dr to try Butrans in 2 patients on short-acting opioids
PPLPMDL0020000001	Cleveland	OH	44195	4/5/2011	I introduced myself to dr at 7am lecture for the anesthesia/pain management department as he was the speaker. we discussed Purdue's products for pain management and patient education tools, dr said he has seen information for Butrans that I have left him but not really looked at it. I talked to dr about 5 core messages for Butrans, showed dr Butrans initiation guide and asked if I could set-up an appointment with him to discuss managed care coverage and Butrans patient savings cards as he didn't have more time? dr said yes and thanked me for the information.
PPLPMDL0020000001	Parma	OH	44129	4/6/2011	Spoke with Ellie, Dr Salewski's Charge Nurse & introduced Butrans. She asked about managed care (she said cost is VERY important to Dr Salewski), adverse events, & structure of the patches. I reviewed insurance coverage with her & showed FPI sections 6 & 11. She asked if Butrans could be detected in urine drug screens. I told her to talk to her lab about details of this. Also discussed Butrans as a CII & let her know it does carry abuse/addiction potential. She said Dr Salewski is extremely cautious in his prescribing & they are an all RN staff with each of the nurses being very involved in the medications their patients take. She said Dr Salewski is "very demanding" & that if he does like Butrans, he will want me to be in contact with him and his staff to work with them. I told her I want to partner with them & have various tools that Purdue can offer that may assist them in their efforts to care for appropriate patients. She asked me to call her in 2 weeks to follow up.
PPLPMDL0020000001	Cleveland	OH	44106	4/6/2011	dr told me he has 6 or 7 patients on Butrans, all were taking vicodin or percocet around the clock for their chronic pain and dr thought Butrans would be a better option, seeing that Butrans is dosed once a week and is in a patch which these patients liked. dr said 1 patient is having skin irritation/rash under the Butrans transdermal system. I reported the adverse event details below, but dr said this woman works in a job where she tends to sweat a lot, so he's not sure if the irritation is due to excessive sweating or if the patient cleaned skin with alcohol or another irritant, so he's going to follow-up with her and check on that. dr asked me if I had any recommendations for patients taking Butrans that also sweat a lot in their jobs? I showed dr Butrans fpi section on application of Butrans and needing a clean, dry site, no alcohol, creams or lotions before applying Butrans, just water and dry skin. dr said ok and I asked if he will continue finding patients that can benefit from Butrans and
PPLPMDL0020000001	Independence	OH	44131	4/6/2011	Spoke with Stephanie (tech) who said the pharmacist was too busy today. Reviewed Butrans (dosing, delivery system, appropriate patient) & let her know that Butrans is part of Relay Health's e-voucher program. She said she would pass the information along to the pharmacist.
PPLPMDL0020000001	Cleveland	OH	44106	4/6/2011	dr said he saw Andrea yesterday and they discussed appropriate patients for Butrans and he understands who is the right patient for Butrans. dr said he'll try it in a few patients and see what happens but he was too busy today to talk more as he's been out for the past 4 weeks. I told dr I understood and would follow up in 2 weeks, to hear about the couple patients he starts on Butrans and why he chose Butrans.
PPLPMDL0020000001	Cleveland	OH	44114	4/6/2011	dr said he talked to a few patients about Butrans but they didn't want to stop their short-acting opioids. I asked dr why he thought of Butrans for these couple patients and what were they taking? dr said these patients were taking Vicodin and percocet and asking for more pills, saying their pain wasn't controlled, so he thought Butrans could be a good option. I asked dr why it would have been a good option for these patients? dr said he likes that Butrans is transdermal and once weekly dosing, but majority of his patients don't want to get off the pills. we discussed appropriate patients to start on Butrans, showed dr Butrans initiation guide, that dr believes would be willing to try Butrans and I told dr if he wants to prescribe short-acting opioids initially or throughout maintenance of Butrans therapy he can, dr said ok, he thought patients had to stop short-acting opioids completely when Butrans was started. I asked him to think of 1 patient to try Butrans and get clinical experience.
PPLPMDL0020000001	Akron	OH	44333	4/6/2011	Introduced Butrans and the FPI. He was not familiar with the molecule Buprenorphine which I went over with him using the FPI. He asked many buying questions including coverage. However when I asked if he would use Butrans for the appropriate patient he seemed hesitant and told me he wanted to discuss it more at our lunch in 2 weeks.
PPLPMDL0020000001	Cleveland	OH	44195	4/6/2011	worked neurology dept-left Butrans fpi, initiation guide, patient information booklet and business card for Dr. Spears, Dr. Stillman, Dr. Krieger and Dr. Mays, with medical secretaries who said the doctors will look over the information and if interested, they will call me.
PPLPMDL0020000001	Berea	OH	44017	4/6/2011	Spoke with Joe, he works the overnight shift and was very interested in reading more about Butrans as he has not heard of it yet. We reviewed the key messages and initiation guide for Butrans. We reviewed the medication guide and I left him extra copies to hand out to patients. I reviewed OxyContin as an option when Butrans may not provide adequate analgesia and he is going to take a look at the OxyContin conversion guide. He said he has lots of time to read at 3-4am. I let him know about Ryzolt as a once a day option.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	4/6/2011	Quick call. Asked Dr. Dinsmore if he has had the opportunity to prescribe Butrans to the patients we had discussed in the past. He said he had not. I asked if he has written any low dose hydrocodone since our visit he said he thinks he had. I reminded him that those patients are potential Butrans patients.
PPLPMDL0020000001	Akron	OH	44320	4/6/2011	Dr. Duppsandt compared Butrans to Duragesic and I explained the patient type Butrans was most appropriate for. I explained that often times when a patient is using Duragesic they are probably not a good candidate for Butrans therapy.
PPLPMDL0020000001	Bedford	OH	44146	4/6/2011	Dr Haddad said he tried to prescribe Butrans for another patient but the insurance would not pay for it. He did not remember the plan. I asked if it could have been a Medicare Part D plan & he said it might have been. Asked him to think more of his commercially insured patients & those with state worker's comp coverage for Butrans so that prescriptions will get processed instead of rejected. I told him this would help him gain clinical experience. He said he would try to remember that when looking for Butrans patients.
PPLPMDL0020000001	Berea	OH	44017	4/6/2011	Dr said that his practice has been slow the last few weeks and he has not seen any new chronic pain patients. I asked if he has patients coming in on low dose vicodin or percocet who's pain is not well controlled. He said he does and he agreed to think of Butrans for those patients. He said that he definitely will try Butrans. He said that he is starting to get patients from other Drs who are no longer practicing for various reasons such as Dr Allan, Dr Zanon, and Dr Lundune. He said that if any of these patients need a medication change for their chronic pain meds he will prescribe Butrans. We reviewed when OxyContin may be an appropriate option if Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	4/6/2011	Checked in with Pat and asked if there has been any movement. Went over the patient education guides so he would be able to explain to patients how to apply and dispose the patch.
PPLPMDL0020000001	Solon	OH	44139	4/6/2011	MH provided letter they received from OIG regarding products that are negotiated and added to their formulary after the June submission date. The OIG sent a response because this impacts the premiums members pay when additional costs could be saved if contracts are negotiated by the June date. CMS does not have an issue with it but the OIG does because they say CMS benefits from it financially as do the plans. MH asked us to provide this to our internal folks and consider committing to them to sign for next year before the end date of October (per the contract). We also discussed the missing pieces from the plan list that we need in order to process the rebate. Lastly, P&T is meeting on Thurs, however, Butrans is not on that list which means it will be reviewed in June. We re-discussed Butrans with the FPI in order for them to reconsider the current PA criteria. Dan said I should email Jackie Raskind to request a clinical presentation.
PPLPMDL0020000001	C. Falls	OH	44223	4/6/2011	Spoke with Larry the pharmacist. I let him know that I had a lunch with Dr. Bick and asked if he would consider ordering just the 5 mcgs. He continues to say he can not until an Rx is written. I went over the patient education guides so he could explain application and disposal.
PPLPMDL0020000001	Cleveland	OH	44127	4/6/2011	dr was swamped and couldn't talk long, he gave me 1 minute and said he started 1 patient on Butrans, hasn't heard from patient so doesn't have any feedback. I told dr I was actually wondering why he started that patient on Butrans? dr said he didn't have time to talk today and come back another time. Tony, Doctors nurse, said she only knows of the 1 patient he started but hasn't seen anything else, but still a lot of scripts for short-acting opioids. I talked to Tony, Nurse, about appropriate Butrans patients and asked her to recommend Butrans to doctor, when she gets calls from patients telling her that their short-acting opioids aren't controlling their pain and they meet Butrans indication. Tony said she will do that as patients call every day for medication re-fills and sometimes are asking for something different. we discussed managed care coverage for Butrans.
PPLPMDL0020000001	Independence	OH	44131	4/6/2011	Dr Jack apologized yet again for not having prescribed Butrans. I asked him if there was something that I had not told him that he needed to know in order to put pen to paper. He said no & that he just hasn't done it yet. He said he has the initiation guide on his desk & looked through it. I asked what he was waiting for & he said he didn't know & that he would prescribe it & that he just needs to get it in his head. I asked what I could do to get Butrans into his "brain formulary" & he said he wasn't sure. He then went into a patient room but turned around, peeked his head out & said "Don't get discouraged, I will write." Spoke with Maria who said it takes Dr Jack "forever" to remember things. Reviewed Butrans & savings cards for eligible patients with her.
PPLPMDL0020000001	Cleveland	OH	44114	4/6/2011	I talked to John, PA, about patients taking Vicodin or Percocet less than 15mg, to consider Butrans 5mcg. If these patients are telling John that their pain isn't controlled with their short-acting opioids, John said he is recommending Butrans to both doctors. Dr. Katz has started a few patients but Dr. Marshall is still hesitant as it's a newer medication to him. I asked John if he could continue recommending Butrans to both doctors and if he see's benefits in Butrans, can he explain them to both doctors? John said he will do that as he likes that Butrans is transdermal, is in a patch and is dosed once a week which is more convenient in his opinion for some patients.
PPLPMDL0020000001	Cleveland	OH	44106	4/6/2011	worked in-patient pharmacy and pain management dept
PPLPMDL0020000001	Cleveland	OH	44106	4/6/2011	I talked to Wes, Pharm D and manager of pharmacy team for all new drugs that have to be presented to p&t committee. Wes presented Butrans to his pharmacy team on 3/29/11 and the feedback was positive, that Butrans is a good medication for moderate chronic pain, but not really a place for severe pain, but the 3 dosage strengths available. Wes said through his research he found out that Butrans's onset is 17 hours and this could be an issue for patients in the hospital who are in pain and need relief immediately so they would still be giving patients short-acting opioids and the majority of patients in hospital are acute pain or post-op surgical patients and Butrans doesn't have an indication for these 2 areas, so seeing that this is for chronic pain Wes said this may have to be out-patient for awhile until they see more Butrans prescribed and more patients come in to hospital on Butrans, P&T members may re-consider at that time

	Parma	OH	44129	4/6/2011	Re-introduced Butrans to Dr Chagin & reminded him of indication. Asked what types of chronic pain he treats- he said a variety from osteoarthritis to low-back pain. Reminded him of once-a-week application with 7 days buprenorphine delivery in transdermal system. I used initiation guide to show positioning & asked if he would use Butrans in opioid-naïve patients. He said "absolutely" & said that he frequently prescribes Vicoden to opioid-naïve patients. Reminded him that Butrans is still CIII & does carry abuse/addiction potential. Discussed application sites & reviewed patient information booklet. He asked how to write the prescription-I showed back of initiation guide. Discussed managed care & asked him to think of commercially insured patients who could utilize savings cards. He said he was looking forward to getting experience with Butrans & that he could think of many patients who could benefit from this. OxyContin & Ryzolt savings card reminder & recommended Senokot-S
PPLPMDL0020000001	Akron	OH	44320	4/6/2011	Misty asked about a patient who was currently on 15 mg of Vicodin a day and wanted to know where they should start on Butrans. I went over the titration chart and Misty expressed that Butrans would become significant to their practice when Dr. Bonyo returned from Kenya.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	4/6/2011	Introduced Butrans and FPI. Discussed what type of patients would be most appropriate by using the titration guide. She committed to initiating therapy on 2 patients and promised to follow up with me in 2 weeks.
PPLPMDL0020000001	Cleveland	OH	44106	4/6/2011	I talked to Dr briefly about patients she feels are appropriate for Butrans and dr said she has a lot of patients on tramadol that she thinks may benefit from Butrans once weekly dosing and she likes that Butrans is a transdermal delivery.dr said her biggest concern is insurance as she has predominantly medicaid here.we discussed medicaid prior authorization requirements for Butrans and dr said she'll see what happens when she talks to a few patients on tramadol,if they would be willing to try Butrans.i showed dr Butrans initiation guide and we discussed proper tapering and initiation of Butrans.
PPLPMDL0020000001	Cleveland	OH	44120	4/6/2011	I talked to dr about patients she feels that can benefit the most from Butrans.dr said she has patients on percocet that will tell her the 1 or 2 pills arent controlling their pain,so she's thinking maybe try Butrans there.i showed dr Butrans initiation guide and said thats great if dr considers Butrans for those patients telling her the short-acting opioids arent controlling their pain,we discussed proper tapering and initiation of Butrans for patients currently taking opioids.dr asked about medicaid coverage for Butrans? we discussed medicaid coverage and commercial plans as dr as a little bit of that in her practice.
PPLPMDL0020000001	Bedford	OH	44146	4/6/2011	Dr Moufawad said everything with Butrans is going well. He said he is prescribing Ultram or Nucynta for breakthrough. He said he has had a couple of patients take Vicoden for breakthrough if they have left-over from a prescription, but he is not prescribing Vicoden for breakthrough. He said he has received no negative feedback. He also asked if there would be any dinner programs on Butrans & said he would like to be a speaker. I told him I would submit his name.
PPLPMDL0020000001	Maple Heights	OH	44137	4/6/2011	Spoke with Nicolene (pharmacist) & introduced Butrans. She said she has not filled any prescriptions for it yet. Reviewed indication, dosing, positioning, & delivery system. Reviewed patient information booklet with her & discussed application, rotation & taping edges with first aid tape or covering with Bioclusive/Tegaderm if patient has adhesion issues. She said it would be helpful for them when they get questions about Butrans.
PPLPMDL0020000001	Independence	OH	44131	4/6/2011	Quick call- Dr Rob said he did not have time today for a talk. Butrans indication & dosing reminder & asked him to consider Butrans for patients taking 2-3 Vicoden per day who come to him asking for an increase in dose or change in medication.
PPLPMDL0020000001	Cleveland	OH	44115	4/6/2011	I talked to dr about Butrans 5 core messages,initiation guide and dr said she has majority of acute pain so she's not sure if she'll have any place for Butrans as the indication is for chronic pain.i discussed Butrans indication with dr and told her that was correct,if she only treats acute pain,this is not the medication for her patients.I asked if dr she has ANY chronic pain patients,taking tramadol around the clock,that ask her for more pills as their pain isnt always controlled with their short-acting opioid? dr said yes she does have a few patients like that.I told dr that is where Butrans could be an option as long as patients meet Butrans indication.dr said she will read the Butrans fpi and let me know if she has more questions at our lunch next monday,as she didnt have time today to go through the entire fpi and this was our first discussion.
PPLPMDL0020000001	Shaker Heights	OH	44122	4/6/2011	Re-introduced Butrans to Dr Zivic, reminding him of indication. I asked if he treats patients who fit the indication & he said yes. I asked what types of chronic conditions causing pain he treated most frequently & he said "many different kinds". Reviewed once-a-week application & showed FPI 12.3 when he questioned if it "really works" for a week. He asked how Butrans compares to fentanyl. I told him we have no comparative data & showed initiation guide pg 6 to help with positioning. Discussed how Butrans is CIII & still carries abuse/addiction potential. He asked about adverse event rates-showed FPI section 6. He said patients usually "like" taking short acting medications. I asked what he meant. He said they like to have the option to take another pill if they have more pain. Reviewed FPI 2.4 & discussed supplemental analgesia for breakthrough if necessary. He said he would look for Butrans patients. Reviewed managed care & savings. OxyContin & Ryzolt reminders & recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	4/7/2011	I talked to Justin,pharmacist and Aaron,Pharmacist,about Butrans and they said they are seeing more scripts for Butrans so they are happy.we discussed doctors prescribing Butrans and the Butrans patient savings cards and both pharmacists said some patients are workers comp and Butrans is being covered and medicaid patients are getting Butrans if the doctor has filled out the Prior Authorization for Butrans approval. I asked both pharmacists to recommend Senokot-S for opioid induced constipation
PPLPMDL0020000001	East Cleveland	OH	44112	4/7/2011	Discussed the Butrans 5 selling messages and the positioning (in place of vicodin) for appropriate patients. He asked about the difference from suboxone. I explained the much lower dose of butrans and that Butrans is not indication for addiction. He said the thing about drugs like butrans is that he doesn't know the appropriate patient until he sees him/her. I just asked him to think of patients taking less than 15mg of IR opioids/day. He asked about BWC coverage. I confirmed BWC coverage and with commercial plans. Explained the savings cards for commercial patients. Oxycontin and ryzolt coverage reminders.
PPLPMDL0020000001	Cleveland	OH	44113	4/7/2011	dr said he hasnt started any patients on Butrans but he does know who the appropriate patients are and asked me to be patient as he will get started and start some patients as he knows that;'s what it will take, is for him to get some real world clinical experience with Butrans. we looked at Butrans initiation guide and I asked dr to think of 2 patients to start on Butrans,once patients short-acting opioids are properly tapered.dr said he would do
PPLPMDL0020000001	Brooklyn	OH	44130	4/7/2011	Spoke with Danielle (pharmacist) & reviewed Butrans patient information booklet. She said it would be helpful for when patients ask questions. Discussed application, adhesion, & appropriate patient type. She said she does think she has one or two customers on Butrans now but couldn't tell me specifics as she had closed down her computer because she was heading out for lunch. She said to check back another time & thanked me for the worked chronic pain&rehabilitation department-had to leave Butrans fpi,initiation guide and patient information booklet for Joan,NP and JoAnne,NP, as they werent available to talk with me today.i talked to Benita Lee,Dr.Covington's medical secretary,as Dr.Covington was seeing patients and couldnt meet with me.Benita said Dr.Covington has started a couple patients on Butrans and they are doing well,she said they have enough Butrans patient information booklets and savings cards.
PPLPMDL0020000001	Brooklyn	OH	44144	4/7/2011	Quick call- Caught Dr Deeb up at the window. Introduced myself & Purdue's products. I told him I had exciting information to share with him about Butrans, the latest addition to our product portfolio. He asked what Butrans is. I started to tell him that Butrans is a transdermal system of buprenorphine that the patient only has to apply every 7 days. He interrupted & said he is not interested. He said that any time he tries to add a medication that is branded, his patients tell him they cannot afford it, no matter what insurance they have. He said his patients have multiple issues they are being treated for & take so many medications daily that he is not going to add another. Then he walked away.
PPLPMDL0020000001	Cleveland	OH	44130	4/7/2011	Quick call- Told him I wanted him to have the most success possible with Butrans, so as he continues to look for patients who may benefit from it, to think only of commercially insured patients who can use the savings card, bringing them down to around a \$15 co-pay. He said he would try to remember. Also showed him new OxyContin savings cards. Spoke with Barb & reviewed both savings cards with her, although she said Dr Diab is the one who is supposed to give them out.
PPLPMDL0020000001	Cleveland	OH	44130	4/7/2011	Dr Fedorko said he has started "a few" patients on Butrans so far & has another in mind that he wants to try on it. I asked what types of patients he has chosen for Butrans but he did not answer. He said he has not received any feedback clinically so far but will keep trying patients on it. Ryzolt value card reminder & gave Senokot-S & Colace samples. Spoke with Mindy & Maryellen & asked if they had received any managed care pushback for Butrans. They said no & in fact, Maryellen said Dr Fedorko just wrote a prescription for her husband who has Anthem insurance. She said he filled the prescription & paid only \$19 for the month's supply, which she said she was very happy about. She also said he wrote a prescription for a patient who is picking up the prescription today but that she has Medicare Part D. I let them know that they will have to do a prior authorization & that even if it goes through the first month, they may get hassle afterward.
PPLPMDL0020000001	Barberton	OH	44203	4/7/2011	Spoke with the pharmacist and explained that Dr. Shah had been writing Butrans which I discussed via the FPI. He said he was not sure if any Rx's had come through but seemed receptive and said there was a lot of value to a product like Butrans.
PPLPMDL0020000001	Cleveland Hts	OH	44118	4/7/2011	I reviewed the Butrans indication and positioning. Do said he was out of the office a couple of days since my last visit and has not had an opportunity to prescribe. He asked me again the starting dose. I explained the 5mcg for those taking low dose of IR opioids or opioid naïve. I asked him try a patient this week. no commitment. Oxycontin preferred coverage reminder.
PPLPMDL0020000001	Olmsted Falls	OH	44138	4/7/2011	Dr said he is still waiting for the right pain patient to come in to try on Butrans. He said most of his pain patients are Medicaid and we reviewed managed care for Butrans. I asked if he would try a patient this week on Butrans with commercial insurance and he said he will if he sees them.
PPLPMDL0020000001	Euclid	OH	44119	4/7/2011	Quick call.....reminded doc of the coverage and savings cards of Butrans. Explained that commercial patients will have the best chance for success. I also asked about his patients on ryzolt. He said they doing ok but no new patients recently. Reminded him of the savings cards for ryzolt and Butrans.
PPLPMDL0020000001	Barberton	OH	44203	4/7/2011	I asked Dr. Patel about the patients he started on Butrans therapy. He told me they were responding well and said he liked having Butrans as an option and would continue to prescribe.
PPLPMDL0020000001	Akron	OH	44302	4/7/2011	Dr. Rehmsu not typically see sales reps. She came back in the lunch room to ask Dr. Okeke a question and I explained I had a product that had recently been introduced to the market. I was able to go over the indication and she asked me to leave some material behind and talk to her nurse, which I did.
PPLPMDL0020000001	University Heights	OH	44118	4/7/2011	Spoke to Eburn about the stocking of Butrans. She said they do not have it and she has not seen any scripts for it. She said that they are a pretty low volume store therefore did not receive a shipment. I explained the indication and positioning as well as the savings card program.
PPLPMDL0020000001	Highland Heights	OH	44143	4/7/2011	Window call.....reminded doc of the Butrans positioning and the coverage with commercial plans and the importance of the savings card. REminided him the medicare/medicaid will require a PA.
PPLPMDL0020000001	Independence	OH	44131	4/7/2011	Dr Sundaram said he has not seen any patients that fit Butrans's indication yet. I asked him if he had seen any patients with moderate to severe chronic pain. He said that the only chronic pain patients he has seen have been patients taking around-the-clock Percocet. I told Dr Sundaram that those are potential Butrans patients. I asked him if those patients ever ask for an increase in dosage of Percocet & he said yes. I asked him if he would, instead of prescribing more Percocet, switch those patients, if appropriate, to Butrans. Dr Sundaram said he had not thought of this & agreed.
PPLPMDL0020000001	Olmsted Falls	OH	44138	4/7/2011	Met Carmen, she is a NP and Dr Velez's wife. She said she used to treat a lot of chronic pain and now works in the hospital. She was very interested in Butrans and we reviewed the FPI, initiation guide, and dosing.
PPLPMDL0020000001	Olmsted Falls	OH	44138	4/7/2011	We discussed the key messages for Butrans. Dr said that he really does not treat chronic pain with opioids. He prefers to refer to pain management.
PPLPMDL0020000001	Cleveland	OH	44113	4/7/2011	We discussed the key messages for Butrans. Dr said that he really does not treat chronic pain with opioids. He prefers to refer to pain management.
PPLPMDL0020000001					dr said he hasnt started any patients on Butrans because the majority of his chronic pain patients taking Vicodin or Percocet are happy with their pills and not complaining to him about wanting something else. dr said he has a lot of acute pain patients,so Butrans wouldnt work for them.dr asked how much vicodin would a patient have to be taking before he could start them on Butrans? and who gets the Butrans 5mcg or 10mcg? I showed dr Butrans initiation guide,opioid naive section and dr said he wouldnt have any of those patients but we talked about patients currently taking opioids,Vicodin and Percocet,less than 15mg,they could start on Butrans 5mcg and if patients are taking 15-40mg hydrocodone or oxycodone,patients would have to be tapered to 15mg,then started on Butrans 10mcg,dr wrote notes on Butrans initiation guide and said he's going to think of a few patients to try Butrans in and let me know what happens.
PPLPMDL0020000001	Cleveland	OH	44113	4/7/2011	dr said he has 4 or 5 patients on Butrans that are doing well,except 1 patient he had to stop Butrans because she had a severe allergic reaction,rash,all over her body once she started Butrans and she was taking Vicodin previously so I reported all Adverse event details below.dr wanted to see the Adverse event rates again,in Butrans fpi,so I showed him and talked about the opioid experienced patients clinical trial results as dr said thats who he's starting on Butrans.dr said he rarely see's patients that are opioid naive,occasionally it happens and he'll consider Butrans for them,but majority of his chronic pain patients have been on tramadol or vicodin and now that Butrans is available,when he hears patients saying their vicodin isnt strong enough,he's trying Butrans we discussed proper tapering of short-acting opioids and initiation of Butrans therapy. we discussed workers comp,as thats the biggest payer here and commercial plans and patients using Butrans patient savings cards.
PPLPMDL0020000001					

	Cleveland	OH	44103	4/7/2011	i talked to dr about patients she is considering to start on Butrans,as she likes that Butrans is a long-acting opioid and dosed once a week. Dr said a lot of her patients taking percocet are happy with their pills and dont want to try a patch but she is talking to a few patients who are on percocet that are calling in to her office sooner than they should saying they need a refill and some patients who are saying their percocet is lasting long enough,she's considering Butrans.i showed dr Butrans initiation guide and we discussed proper tapering of percocet before initiation of Butrans and we discussed Medicaid coverage as thats the majority of doctors patients. we talked about Oxycontin being an appropriate option for those patients after 80mg or more of oral morphine equivalent isnt working for patients,she can go to OxyContin,discussed 7 tablet strengths,conversion guide and formulary coverage.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44122	4/7/2011	Met with Pam who had Jonas Birch and Jackie Straub on the phone to discuss Purdue resources for Pain Management. We reviewed all of the resources in the slide non-branded deck and also discussed programs we've conducted with the Case Managers. During the call, there were a couple of requests: Send the flyer for the upcoming webinars to Pam & send ASAP modules to Pam for review to consider program for CMs this year. Jackie is very interested in the Safeguardsmymeds brochure and How to Protect Your Meds at Home. Pam agreed to send the flyers to those in the Dayton office via internal mail.
PPLPMDL0020000001	Cleveland Hts	OH	44118	4/7/2011	Spoke to Christine and Tech, Sophia about the stocking of Butrans. They are not stocking and no scripts received. Sophia asked about the difference between suboxone as they do see scrips for that. I explained the indication and positioning and the dosing options. Advised them that Butrans is not indicated for the treatment of addiction.
PPLPMDL0020000001	Barberton	OH	44203	4/7/2011	Spoke with the pharmacist Cathy and explained that Dr. Patel had recently started initiating Butrans therapy. I covered the patient education guides with her and she said she felt comfortable explaining application and disposal if patients had any questions.
	Cleveland	OH	44113	4/7/2011	i talked to dr about Butrans fpi,5 core messages,initiation guide,Butrans REMS program and Butrans patient savings cards.dr said she hadnt heard of Butrans and does have patients on tramadol and vicodin that will complain to her that the short-acting medications arent strong enough or not controlling their pain.i asked dr what she does when patients state that information to her? dr said she will usually increase dosage strength of short-acting opioids or keep same dosage strength but increase dosing interval.i showed dr Butrans initiation guide,opioid experienced section,and we discussed proper tapering of short-acting opioids and intiation of Butrans when patients call her and state these things to her.dr said it makes sense to have a long-acting opioid at some point but she doesnt write a lot of long-acting opioids.we discussed managed care coverage for her commercial plan patients and medicaid patients as these are her two biggest plans.
PPLPMDL0020000001	Cleveland	OH	44113	4/7/2011	i talked to dr about Butrans fpi,5 core messages,initiation guide,Butrans REMS program and Butrans patient savings cards for commercially insured patients.dr said once weekly dosing is good as she has patients on tramadol that will sometimes tell her that their pain isnt controlled with the short-acting so Butrans could be an option for them.i showed dr the opioid experienced page in Butrans initiation guide and discussed proper tapering of the short-acting opioids and initiation of Butrans. I asked dr if she could think of 2 patients, with commercial insurance, to try Butrans in and get some clinical experience? dr agreed to do that
PPLPMDL0020000001	Brooklyn	OH	44144	4/7/2011	Spoke with Mark (floater pharmacist) who I have seen at Giant Eagle in Beachwood as well. He said he has not personally filled any Butrans prescriptions & was not sure if this location's pharmacists had dispensed any. Reviewed patient information booklet, application & addressing adhesion issues. I asked if they would be able to utilize the booklet & he said they could use it in patient counsel. He said patients seem to call their pharmacist when they have questions about their medications. He said he would leave the information for the regular pharmacist.
	Cleveland	OH	44104	4/7/2011	i talked to dr about patients taking percocet around the clock for their chronic pain and telling him the medication isnt lasting long enough and perhaps they are asking for something different.i asked if dr would consider Butrans for these patients? dr said majority of his patients love taking pills and are controlled on percocet otherwise he converts them to OxyContin.i asked dr if Butrans would be an option for any of these patients,looking at Butrans initiation guide opioid experienced patients taking oxycontin? dr said probably not at this point because he has to do all of the Prior Authorizations and seeing that Medicaid is his biggest patient population,he doesnt want to have to do a Prior Authorization for Butrans. dr said he might have 1 patient mayb 2 in his entire practice that have commercial insurance where Butrans might be an option.we discussed OxyContin formulary coverage and 7 tablet strengths available and gave dr OxyContin conversion guide.i recommended Senokot-S
PPLPMDL0020000001	Euclid	OH	44117	4/7/2011	I discussed the Butrans indication and other selling messages. I asked doc if he ever consulted with Dr. Moufawad like he said he would. He said he was supposed to meet with him and have a discussion. He tried to call Moufawad right then but he was unavailable. Doc said he is definitely going to prescribe butrans but he wants to find out how Moufawad is using it. He asked me to check back next week. Gave him an oxycontin formulary
PPLPMDL0020000001	Akron	OH	44307	4/7/2011	Introduced Butrans and FPI. Dr. Okeke is an oncologist but has a very conservative approach to treating chronic pain. She said that all her patients were opioid experienced and had many patients on low dose hydrocodone. She also mentioned starting patients who were failing on tramadol. I closed using the co-pay cards.
PPLPMDL0020000001	Cleveland	OH	44103	4/7/2011	i talked to Amy,Pharmacy Manager,about Butrans stocking and if any scripts for Butrans have come through pharmacy? Amy said no, but she has Butrans in stock and is just waiting we discussed doctors prescribing Butrans and the Butrans initiation guide discussing proper tapering of short-acting opioids before starting Butrans and we discussed medicaid coverage as thats a lot of the patients Amy see's here in this pharmacy and commercial plan coverage and those patients being able to use Butrans patient savings cards.i recommended Senokot-S
PPLPMDL0020000001	Olmsted Falls	OH	44138	4/7/2011	Dr said he had heard about Butrans and has a lot of questions. We reviewed the key messages, the invitation guide and FPI. Dr said he had a patient on low dose duragic who he thinks may be appropriate for Butrans. We discussed how to initiate patients who are already on opioids.
PPLPMDL0020000001	akron	OH	44333	4/8/2011	I talked with Dr. Bashor about starting a patient on Butrans who had commercial or private insurance. He told me that he is thinking about his elderly population as Butrans patients, I explained that those patients may not be able to get Butrans covered and asked if he would focus on patients with private insurance and he agreed.
PPLPMDL0020000001	Chagrin Falls	OH	44022	4/8/2011	Dr Rood said he started a patient on Butrans. I asked him to tell me a little about the patient. He said she had been on fentanyl, but because of a rare disorder, was getting a "dose dump" of drug, causing her to feel ill. It also wasn't adhering to the 3 day dosing interval. He said he chose Butrans for her because he didn't have any other options. He said he actually didn't consider her an ideal candidate because of her pain severity, but tried her on Butrans 10mcg/hr. He said after the first week he increased her to 20mcg/hr & she has done well so far. He said she likes that it is just once/week & that it is actually adhering & controlling her pain. I asked if he had tapered her fentanyl before starting Butrans & he said he did not. He said it did result in "mild" withdrawal symptoms for the patient but that she "rode it out" & is doing well. I asked if he would consider Butrans for more patients, like those on around-the-clock Vicoden & he said absolutely. Savings card reminders.
PPLPMDL0020000001	South Russell	OH	44022	4/8/2011	Quick call- Introduced myself & Purdue's products to Dr Kale. Discussed Butrans indication & appropriate patient type. She said reps only detail Dr Rood, even at lunches, & he shares the information with her & Dr Hudson. Dr Kale did say she likes Colace & Senokot-S.
	Cleveland	OH	44109	4/8/2011	i asked dr what he remembered about Butrans? dr said honestly nothing.i told dr that was great he was honest so i talked to dr about Butrans 5 core messages,we discussed initiation guide,dr said he has an idea of who the appropriate patient is now and thats low dose short-acting opioids and more moderate chronic pain,i told dr that was right.dr asked about BWC and commercial plan insurance so we discussed both plans and dr said he will try Butrans in a few patients and get some clinical experience with Butrans and let me know.i recommended Senokot-S
PPLPMDL0020000001	Hudson	OH	44236	4/8/2011	Spoke with Melissa (MA) who said they did not need savings cards for Butrans, OxyContin, or Ryzolt. Reviewed Butrans indication & appropriate patient type as well as delivery system & dosing. Melissa said she does not think Drs Tosino, Seiple, or Russ have prescribed Butrans for any patients yet. Scheduled first available breakfast to discuss products with the physicians.
PPLPMDL0020000001	Parma	OH	44129	4/8/2011	Spoke briefly with Bianca (technician) who said Rick (pharmacist) was on the phone & was addressing a computer issue they were having so he could not speak with me today. Reviewed Butrans patient information booklet with her & discussed appropriate patient types. She said she would pass the information on to Rick & that I could come back another day to speak with him.
PPLPMDL0020000001	Cleveland	OH	44113	4/8/2011	worked pain management/physical medicine and rehabilitation dept - see call note on dr shen
PPLPMDL0020000001	Cleveland	OH	44105	4/8/2011	i talked to Abdul,Pharmacist,about Butrans stocking and we discussed doctors prescribing Butrans now and also doctors that Abdul said i should be talking to about Butrans.we talked about OxyContin formulary coverage and OxyContin savings cards.
	Cleveland	OH	44109	4/8/2011	i asked dr what he remembered about Butrans? dr said he remembered Butrans was a patch and dosed once or twice a week and that was all he could remember.i told dr that Butrans was a transdermal system,patch technology,but dosed ONCE weekly,a CIII and gave the Butrans indication to dr again.dr said he remembered Butrans was for low dose short-acting opioid patients,moderate pain,not severe pain OxyContin or Duragasic patients.i told dr that was great he remembered that information,showed dr Butrans initiation guide and we discussed opioid experienced patients as dr said he has chronic pain patients on tramadol and some patients are taking vicodin,but he said that he wouldnt start an opioid naive patient on a long-acting opioid like Butrans.dr said these patients can take 1-2 pills of the short-acting opioids because some days are good and other days are more severe pain for the patient,or they have incident pain so they need some short-acting medication.i asked dr if patients are taking
PPLPMDL0020000001	Cleveland	OH	44109	4/8/2011	dr said he hasnt started any patients on Butrans but wanted to know how this compares to Duragasic and is this the same patient for Butrans? i told dr there are no head to head studies with Duragasic,so i can't make any comparative claims.we discussed the molecule buprenorphine,the delivery system,the 7 day dosing interval for his chronic pain patients.dr asked if Butrans was covered on metro hospitals apple program,which is a program for indigent patients? i told dr,Butrans was not covered on that program,however does he have any workers comp or commercial plans in his practice? dr said yes he has a lot of both.we discussed Butrans coverage for workers comp and commercial plan patients using Butrans savings cards.dr said he will start a few patients and get some real world clinical experience and let me know.we discussed OxyContin being available on the commercial plans at lowest branded co-pay and using OxyContin savings cards.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	4/8/2011	worked physical medicine&rehabilitation dept and out-patient pharmacy-see call notes
PPLPMDL0020000001	Cleveland	OH	44104	4/8/2011	i talked to dr about his patients,in the office,that are chronic pain and meet Butrans indication and dr said really only has 20 chronic pain patients that are taking short-acting opioids so he's not sure if he'll have a lot of patients to discuss Butrans with.i asked dr if he ever has patients on a NSAID or COX-II inhibitor where patients tell him their pain has worsened and they need something stronger? dr said yes he has some of those patients but would typically go to a short-acting opioid, not a long-acting opioid.i asked dr if he would ever consider Butrans for those types of patients,knowing Butrans is a long-acting opioid.dr said probably not,he would try short-acting opioids first and if that didnt work,then he would convert patients to a long-acting opioid.i asked dr to think of 2 patients who are only taking 1-2 tabs of hydrocodone or oxycodone,less than 15mg,as he could start them on Butrans 5mcg.dr said he will consider Butrans,just hasnt had any patients to try it in.
PPLPMDL0020000001	Fairlawn	OH	44333	4/8/2011	Dr. Parisi talked me that he started two patients on Butrans and is having success with both. I asked Dr. Parisi if he would start additional patients with similar profiles and he said he would. I closed using the co-pay cards.
PPLPMDL0020000001	Cleveland	OH	44104	4/8/2011	i talked to dr about patients he's considering to start on Butrans and showed Butrans initiation guide and we discussed managed care coverage for Butrans.i recommended Senokot-S
PPLPMDL0020000001	Garfield Hts	OH	44125	4/8/2011	Dr Sadowski said he did not think he had any patients that would be appropriate for Butrans. I asked him what he meant. He said he does not like opioids & does not like to have patients on them. I told him i understood & that he is doing the right thing by being cautious when prescribing opioids & should be just as cautious with Butrans. He said he has only 3 patients on fentanyl. I asked him to think of the more "moderate" pain side & let him know that patients on fentanyl were excluded from our studies. I asked him if he treats any patients for chronically painful conditions who are taking around-the-clock Percocet or Vicoden as i showed initiation guide pg 6. He paused & looked at the table. He said maybe he does have "a handful" of patients that might be appropriate. He said he would keep it in mind & then walked into a patient room. Spoke with Deena who said she will help Dr Sadowski find patients for Butrans as she is often the one that reminds him of newer medications.
PPLPMDL0020000001	Fairlawn	OH	44333	4/8/2011	Introduced Butrans and FPI. Dr. Lefton said that he has a fair amount of patients on pain meds and treats chronic pain occasionally. I explained that Butrans was a LAO and a schedule 3. He really liked this option for patients and committed to trying it on one patient. I went over the titration guide with him so he had an idea on when to start patients in relation to their current therapy.
PPLPMDL0020000001	Beachwood	OH	44122	4/8/2011	I asked Dr Tabbaa & Jim what type of feedback they have been getting about Butrans. Dr Tabbaa said that he has not received a lot of feedback yet, although what he has noticed is that he is having to titrate the dose upward for patients to 10 or 20mcg/hr. Discussed supplemental analgesia as an option & showed FPI 2.4. Jim added that sometimes they give the patient a prescription for Butrans & one for Vicoden or Percocet at the same time for breakthrough if necessary. Reviewed managed care for OxyContin & Butrans as well as savings cards for eligible patients. Jim said he has not had any Butrans push-back from managed care companies so far. I reminded them to focus on commercially insured patients for Butrans or those with state worker's comp.
PPLPMDL0020000001					

PPLPMDL0020000001	Cleveland	OH	44104	4/8/2011	i talked to dr about her patients taking percocet around the clock for their chronic pain that arent controlled with that short-acting opioid and considering Butrans.dr said she hasnt seen any patients since our lunch last Friday that she felt would be appropriate for Butrans but is going to try Butrans in a few patients.dr said she has patients who call in sooner than they should for refills and also those patients that say the percocet isnt strong enough or they want more pills,so she thinks Butrans could be an option for them.we discussed proper tapering and initiation of Butrans while looking at the Butrans initiation guide.i asked dr to think of 2 commercially insured patients that can try Butrans and use the Butrans patient savings cards.dr agreed.i recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44104	4/8/2011	dr said she hasnt started anyone on Butrans since our lunch last week but she has a few patients in mind to start on Butrans.i asked dr what patients come to mind? dr said her patients on percocet that arent controlled and complaining of pain worsening and pills not lasting long enough.i showed dr Butrans initiation guide and asked her to consider starting 2 patients on Butrans with commercial insurance so that they can use Butrans patient savings cards.dr agreed. i recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44109	4/8/2011	i met dr for the 1st time as he is an attending physician,at MetroHealth Medical Center,Physical Medicine&Rehabilitation department.dr said he completed his residency here at Metro,moved to PA,and recently moved back to Cleveland,OH and is now here in this department.dr didnt know anything about Butrans so we discussed Butrans 5 core messages,FPI,initiation guide and Butrans patient savings cards for commercial plan patients.dr said he only has 2 chronic pain patients now as he's building his practice but he likes that Butrans is a long-acting opioid as he doesnt think patients should wait so long to be on a long-acting opioid.dr said he was trained to start patients on short-acting,max out the short-acting opioids and as a last resort,go to a long-acting opioid.dr said the thinking is that doctors somehow failed to control their patients pain levels if they have to go to a long-acting opioid like OxyContin.dr said he prefers to start someone on long-acting opioids,like Butrans and he
PPLPMDL0020000001	Cleveland	OH	44109	4/8/2011	i talked to dr about her patients taking tramadol around the clock for their chronic pain and asked dr where Butrans fit into her algorithm? dr said she hasnt really thought of Butrans but does think its a good baseline of continuous medication,her concern is that patients wont want to get off short-acting opioids.dr said majority of her patients are stable and doing well on the pills.i told dr i appreciated her sharing that with me,thats great if patients are stable and doing well but those arent the patients for Butrans anyways.i showed dr Butrans initiation guide,opioid experienced page,discussed these patients who are telling dr or nurse that their pain isnt controlled or medication isnt lasting long enough,with the short-acting opioids,perhaps thats where Butrans could be an option.dr said okay that made sense and asked about Medicaid coverage as she said she has a lot of Medicaid.i talked to dr about this coverage and commercial plan coverage.
PPLPMDL0020000001	Cleveland	OH	44114	4/8/2011	dr said he started 2 patients on Butrans today.i asked dr why did he choose Butrans? dr said both patients were taking Embeda and since that was pulled from the market,these patients cant get their medication anymore,so he started them on Butrans today.i told dr that was great and asked what dosage strength he started them on? dr said he thinks both of them were started on the Butrans 10mcg.i showed dr Butrans initiation guide,discussed proper tapering of any short-acting opioids prior to starting Butrans and showed dr the Butrans prescription example to be sure he knew how to write Butrans.dr said that was good to see because he thought he prescribed Butrans6,not5,so i explained that 4 Butrans transdermal systems are in a carton at pharmacy,dr said okay that made sense and he appreciated the information.
PPLPMDL0020000001	Cleveland	OH	44109	4/8/2011	i talked to Mike,Pharmacist and Chris,Pharmacist,about Butrans stocking and they said Rob,Pharmacy manager orders all medications and he's out for the day.i asked Mike and Chris,what clinical benefits did they see in Butrans for their patients? both of the pharmacists stated that Butrans being in a patch,dosed once a week and a CII,were all benefits in their eyes.we talked about doctors i am working with at Metro and doctors they recommended i speak with about Butrans.Chris and Mike said to try back again next week,thursday or Friday and try to catch Rob and see Rob in person to confirm if he's ordered Butrans because they didnt see Butrans ordered in their system or in stock.
PPLPMDL0020000001	Lyndhurst	OH	44124	4/8/2011	Spoke with Patricia and Karen about the indication and positioning of Butrans. Patricia forgot that Butrans is a CII. i thought it was a CII. i advised that Butrans still has similar risks/warnings to other opioids. i reviewed commercial coverage of Butrans and how to initiate dosing. Gave senokot s samples and reminded them of the oxycontin and ryzolt patient types/savings cards.
PPLPMDL0020000001	Lyndhurst	OH	44124	4/8/2011	Doc said wrote 2 scripts of Butrans this week. She said patients were taking darvocet and were switched to tramadol but the tramadol did not work for them. So far, she has not heard of any issues or had any call backs. i reviewed the covered plans and gave more savings cards. Reminded her of the savings cards for oxycontin and ryzolt.
PPLPMDL0020000001	Parma	OH	44129	4/8/2011	Quick call-I asked Dr Roeheny what type of patients he chose for Butrans. He said he has only put one person on it. I asked if that patient was already on an opioid or if they were opioid-naive. He said she had been on fentanyl about 3 years ago but was no longer on it when he prescribed Butrans. I asked if he had received clinical feedback & he said no. He said that the patient must be happy with it because he had asked her to call him if she had any problems with it.
PPLPMDL0020000001	Cleveland	OH	44113	4/8/2011	i talked to dr about patients she has started on Butrans and dr said the patients seem to be doing well as they havent called back to complain so thats a good thing.i asked why dr has been choosing Butrans for patients? dr said these are patients taking vicodin and percocet and asking for more pills because they are complaining that their short-acting medications not lasting long enough so she thinks a long-acting opioid is more appropriate.i showed dr Butrans initiation guide and asked dr continue starting patients on Butrans,dr said she will and we talked about BWC,commercial plan coverage and those patients using Butrans patient savings cards and then Medicaid coverage for Butrans with a Prior Authorization as thats a big population of doctors.i recommended Senokot-5
PPLPMDL0020000001	Lyndhurst	OH	44124	4/8/2011	Spoke with Patricia and Karen about the indication and positioning of Butrans. Patricia forgot that Butrans is a CII. i thought it was a CII. i advised that Butrans still has similar risks/warnings to other opioids. i reviewed commercial coverage of Butrans and how to initiate dosing. Gave senokot s samples and reminded them of the oxycontin and ryzolt patient types/savings cards.
PPLPMDL0020000001	Parma	OH	44134	4/11/2011	Spoke with Cheryl (technician) as Nate was unavailable. Reviewed Butrans patient type. Cheryl said she does not think they have seen any prescriptions for it but was not certain. Reviewed delivery system & dosing as well as e-voucher. OxyContin savings card reminder. She said there is a customer or two who will appreciate them.
PPLPMDL0020000001	Parma	OH	44129	4/11/2011	Introduced Butrans to pharmacist (floater). She said she had not yet dispensed any but did see 5mcg on the shelf at this location. Reviewed appropriate patient type/positioning & dosing. She said she thought it was a "good idea" & said it would be interesting to see where physicians prescribe it.
PPLPMDL0020000001	Cleveland	OH	44115	4/11/2011	i asked dr,based on our last conversation about Butrans last week you shared with me that you have only acute pain patients,is that correct? dr said well i do have chronic pain patients but when they get too severe,i send them to pain management specialists.i asked dr if she has chronic pain patients that take tramadol around the clock for their pain? dr said yes she has a lot of them.dr asked where does Butrans fit in and who is the appropriate patient? we looked at Butrans initiation guide,discussing patients currently taking opioids like doctors tramadol patients that could potentially benefit from once weekly dosing of Butrans.dr said she likes the fact that Butrans is transdermal and forgot that Butrans is a 7 day application.dr asked about insurance coverage for commercial plan patients and Medicaid so we discussed both of these plans and i asked dr to think of 2 patients to try Butrans in and i will follow-up to hear the results.dr agreed to find 2 patients.
PPLPMDL0020000001	Fairlawn	OH	44333	4/11/2011	i asked Dr. Weidman if she has had similar patients like the one she initiated Butrans on for the first time. She said that she has few patients on opioids but would continue to keep it mind for the appropriate patient.
PPLPMDL0020000001	Cleveland	OH	44106	4/11/2011	i talked to dr briefly about Butrans fpi-black box warning,5 core messages,Butrans initiation guide and Butrans patient savings cards for commercial plan patients. dr said she rarely prescribes narcotics,but if she has to treat chronic pain they will only give tramadol.i asked dr what her thoughts were of Butrans and any clinical benefits she saw in Butrans? dr said transdermal technology,a patch and dosing once a week are all benefits in her eyes for her patients but she's not sure patients will want to stop taking their pills.we discussed appropriate patients,looking at Butrans initiation guide and i asked dr to consider patients taking tramadol but telling her their pain isnt controlled with their short-acting medication and if patients have commercial insurance they can use Butrans patient savings cards.dr said majority of patients at UH are cash paying or Medicaid and she wanted to know what was Butrans's coverage on Medicaid? we discussed the details of Medicaid coverage.
PPLPMDL0020000001	Cleveland	OH	44115	4/11/2011	Roman,PA for dr.Kepler,said that someone just told him about Butrans a week ago but he was confused on who the appropriate patient was for Butrans.i showed Roman the Butrans initiation guide,patients currently taking opioids and we discussed who would start on the Butrans 5mcg and Butrans 10mcg.Roman said that made sense to think of patients with more moderate pain,low dose short-acting opioids but Roman said someone taking 40mg a day of hydrocodone or oxycodone is pretty severe pain in his opinion.Roman said he's not sure if Butrans could help that kind of patient.i showed the Butrans initiation guide again and discussed proper tapering of the short-acting opioid if patients are taking 40mg of hydrocodone or oxycodone a day,before initiating Butrans.Roman asked if Butrans would work for a patient taking 40mg OxyContin a day Dr.Kepler was sitting there and responded NO,that patient is too severe pain and Butrans wouldnt be appropriate,think moderate pain,low doses of short-acting
PPLPMDL0020000001	Olmsted Falls	OH	44138	4/11/2011	i asked Dr his thoughts about where Butrans might fit into his practice. He said he does have some patients in mind that would be appropriate, but they are Med D or Medicaid patients. He said it seems that Medicaid patients are the ones who always come to him with some type of chronic pain requiring opioids around the clock. He really does not like seeing these types of patients, but he is trying to grow his practice so they will add another Dr to his office. We discussed the managed care for Butrans and the savings program. He said he may have a BWC patient who might be appropriate. For his younger patients, he is trying to get them off of opioids. He does still have a few patients on OxyContin, they are older (70's) and he feels comfortable maintaining older patients, but does not want younger patients to be on opioids for the rest of their lives. We discussed some of the tools to help him pick appropriate patients and he does use Orrs. Reminder a out Ryzolt and Senokot.
PPLPMDL0020000001	Cleveland	OH	44106	4/11/2011	i talked to dr about patients he feels that can benefit from Butrans,showed dr Butrans initiation guide and dr said patients that are taking tramadol around the clock,as thats all they prescribe in out-patient clinic,that are complaining of tramadol not lasting long enough,perhaps Butrans could be used right there.i asked dr if he could think of 2 patients with commercial insurance and use Butrans patient savings cards,based on our discussion of appropriate patients? dr said majority of patients are caresource/Medicaid or cash paying,so we discussed prior authorization requirements for Medicaid patients and dr said he'll think about it as he's not sure he wants to do Prior Authorizations for all of his Medicaid patients.i asked if dr could focus on 2 patients who are telling him tramadol isnt working and consider Butrans,dr agreed.
PPLPMDL0020000001	Parma	OH	44129	4/11/2011	i asked Dr Rossi what her thoughts were on prescribing a long-acting transdermal system like Butrans for appropriate moderate to severe chronic pain patients instead of prescribing short-acting around-the-clock opioids. She asked if prescribing Butrans would eliminate the need for short-acting opioids in those patients. Reviewed FPI 2.4 & told her patients could take supplemental analgesia in opioid or non-opioid form. Also let her know that patients in studies were given ibuprofen or acetaminophen for breakthrough. She said she liked the idea of a once-a-week transdermal system instead of short-acting around-the-clock oral pain medication. Discussed importance of appropriate patient selection & reviewed CIII & abuse/addiction potential. Reviewed FPI section 6, discussing adverse events. She asked about cost- discussed managed care & asked her to focus on commercially insured patients who could use savings card, bringing them down to around \$15 for co-pay.
PPLPMDL0020000001	Parma	OH	44129	4/11/2011	Dr Tolentino said she has not prescribed Butrans yet. Reviewed appropriate patient type, showing initiation guide page 6 & reviewing indication. She said she is also concerned that Butrans will cost too much for patients. Reviewed managed care coverage, asking her to focus only on commercially insured patients who can take advantage of the savings program, bringing them down to around a \$15 co-pay. She said "If it would only be \$, I will prescribe it." Asked her to prescribe for a patient on low dose of Vicoden or Percocet or a patient for whom she is ready to prescribe an opiate who has commercial insurance. Reminded her Butrans is CIII & does have i asked his thoughts on where he feels Butrans can benefit his practice. He said he sees it as an option instead of increasing the number of vicodin tablets. Dr told me that he will no longer be seeing reps until June as he is taking a pharmacy rep break. I asked if he would start a few new Butrans patients during this time so that he will have experience with it when we talk next. He said he will try.
PPLPMDL0020000001	Lakewood	OH	44107	4/11/2011	Pharmacist told me that they she thinks they have filled a couple of Butrans Rx's. I asked who they came from and he said that he was not sure. I went over the patient education guide so she could talk to patients about application and disposal.
PPLPMDL0020000001	Akron	OH	44333	4/11/2011	Pharmacist told me that they she thinks they have filled a couple of Butrans Rx's. I asked who they came from and he said that he was not sure. I went over the patient education guide so she could talk to patients about application and disposal.
PPLPMDL0020000001	Cleveland	OH	44106	4/11/2011	i talked to dr about Butrans fpi,5 core messages,initiation guide,Butrans patient application dvd/patient information booklet and Butrans REMS program.dr said he has patients on Vicodin that are taking 1 tab a day,5mg,that still say they are in pain and the short-acting medication isnt controlling their pain.dr said he thinks Butrans could be a good option for them as a baseline for their pain.dr asked if he could still give patients short-acting opioids for break through pain while on Butrans? i showed dr Butrans fpi,section 2.2 Initiation of therapy and section 2.4 Maintenance of therapy.dr asked about insurance coverage and i asked dr what plans he see's in his office?dr said there is a good mix of commercial,Medicare and Medicaid.we discussed commercial plan patients using Butrans patient savings cards and Medicaid patients having to get a prior authorization done first for Butrans approval.dr said he'll try Butrans in 1 or 2 patients and let me know what results he gets

PPLPMDL0020000001	Fairlawn	OH	44333	4/11/2011	I asked Dr. Domdera why he was hesitant to start a patient on Butrans therapy since we have established several times that he has many patients who would benefit from therapy. He said that he liked the concept and that it made sense to convert some of his hydrocodone patients to Butrans but said he was a slow adopter and was hesitant simply because it is new to the market.
PPLPMDL0020000001	Westlake	OH	44145	4/11/2011	Quick call as Dr just returned from India. We reviewed the dosing for Butrans who is on NSAIDs or celebrex. I asked if he would convert them to Butrans 5mcg. He said he will if he knows they have chronic pain.
PPLPMDL0020000001	Cleveland	OH	44106	4/11/2011	discussed with dr Butrans fpi,5 core messages,initiation guide and Butrans patient savings cards.dr said he only prescribes tramadol for his chronic pain patients and if patients need more narcotics,he refers them to pain management.dr said he'll look over Butrans information as it sounds good with once weekly dosing but doesn't have time now to talk with me about everything.dr asked if Butrans was covered on Medicaid? I explained the prior authorization requirements necessary for Butrans approval and dr said thank you and he appreciated information
PPLPMDL0020000001	LAKEWOOD	OH	44107	4/11/2011	Spoke with Ronnie, tech, I asked him to check stocking of Butrans, they still have it stocked but he did not know if anyone has written scripts. We reviewed the managed are and savings cards for Butrans. He said he does think they participate in relay health because he has seen other drugs discounted at the register. Reminder about the OxyContin savings cards and that Senokot S is an option for opioid induced constipation.
PPLPMDL0020000001	Cleveland	OH	44114	4/11/2011	I talked to dr about patients she's considering to start on Butrans.dr said she has 2 patients on Butrans,they were both taking short-acting opioids and pain wasn't controlled so she thinks Butrans is a great long-acting opioid option.we discussed Butrans initiation guide and I asked dr to continue choosing Butrans for her patients,but perhaps thinking of Butrans earlier in therapy,when patients are only on 1 or 2 5mg hydrocodone or oxycodone combo's,dr said she will keep that in mind.
PPLPMDL0020000001	Fairlawn	OH	44333	4/11/2011	Talked to Dr. Lefkowitz for a brief moment through the window. I asked him if he has had the opportunity to review any information on Butrans he replied he had and walked away. I thanked him for his OxyContin support.
PPLPMDL0020000001	Lakewood	OH	44107	4/11/2011	I reviewed the patients we talked about last time on low dose vicodin whose pain is not well controlled. I asked if he would try a few of those patients this week to gain some experience with Butrans and he agreed.
PPLPMDL0020000001	Fairlawn	OH	44333	4/11/2011	I asked Dr. Oyakawa why he has been hesitant to initiate Butrans. He said he was not sure and said he would try it. I reminded him of the benefit the co-pay cards provide for commercially insured patients and showed them where they were located in the sample closet.
PPLPMDL0020000001	Cleveland	OH	44106	4/11/2011	dr said he hasn't started any patients on Butrans yet as its not on hospital formulary and that's what he really needs to see as he's primarily in hospital.I asked dr if he see's patients in out-patient clinic where there could be commercially insured patients? dr said majority, 90% are all caresource/medicaid with some medicare,its rare that he see's a commercial plan patient. we discussed Butrans coverage for Medicaid and if dr would be willing to do Prior Authorization for patients dr said he might do them.I asked dr to consider Butrans for 2 patients,that are medicaid or if he has any workers comp,and showed dr Butrans initiation guide. dr said he will do his best.
PPLPMDL0020000001	Akron	OH	44333	4/11/2011	Dr. Shah continues to start patient on Butrans therapy who are opioid experienced. This was a quick call where I was able to thank him for his support and remind him of the benefit the co-pay cards offer to patient's with commercial insurance.
PPLPMDL0020000001	Cleveland	OH	44115	4/11/2011	I talked to Lisa,PA,briefly about Butrans fpi,5 core messages,initiation guide and Butrans patient savings cards.we talked about her patients currently taking opioids that could benefit from a once weekly dosing schedule with Butrans and Lisa said she likes Butrans is transdermal delivery and in a patch.Lisa asked about insurance coverage so we discussed commercial plans and medicaid as that's what she see's at st.vincent charity hospital.I asked Lisa to think of 2 patients to try Butrans in and let me know what results she see's and she agreed
PPLPMDL0020000001	Cleveland	OH	44106	4/11/2011	I talked to dr about patients he thinks are appropriate for Butrans and dr said unless its on the hospital formulary it will be unlikely that he'll prescribe Butrans as the out-patient clinic is mainly Caresource/medicaid patients and he isn't going to do a prior authorization for patients to get Butrans.I told dr I would keep him posted on Butrans's formulary status and asked if he could think of 2 patients,in the out-patient clinic,that have workers comp or commercial insurance and we discussed those two plans,dr said he would consider that if he see's those patients but its not often
PPLPMDL0020000001	Independence	OH	44131	4/11/2011	Dr Trickett said the Butrans demo patch was comfortable enough to wear that she had forgotten she stuck it to her hand during my last lunch. She said the adhesive was strong & that once it was removed it would not stick back on. Discussed application, removal/disposal, & reviewed patient information booklet. I asked if she had identified any Butrans patients since our last discussion & she said she had not but she does want to try it on more patients because she likes the idea of it. Reviewed managed care coverage & asked that she think of her patients who are either already on a low dose of Vicoden or who she is ready to start on an opioid who have commercial insurance coverage or state worker's comp. She thanked me for reminding her & said again that she does want to try more patients on Butrans.
PPLPMDL0020000001	Cleveland	OH	44106	4/11/2011	worked internal medicine resident department - lunch with 25 residents (including vice chairman of dept-dr armitage)
PPLPMDL0020000001	Cleveland	OH	44106	4/11/2011	worked physical medicine&rehabilitation dept-see call notes on Dr.Baig and Dr.Krupnik; worked neurology dept-dr buczek
PPLPMDL0020000001	Lakewood	OH	44107	4/11/2011	I asked Katie where she sees herself prescribing Butrans, she said most likely for patients who need more than a couple of vicodin per day for chronic pain. She said she does have a patient who called asking for more vicodin who she feels would be appropriate to convert to Butrans. She said they are BWC but they have not come back to the office in a while. I asked if she would try Butrans in other patients like this and she said she will.
PPLPMDL0020000001	Cleveland	OH	44106	4/11/2011	I talked to dr about Butrans initiation guide and patient information booklet/dvd as dr couldn't remember anything about Butrans other than it was a transdermal medication. dr said once weekly dosing was an advantage for some patients who don't like taking tramadol q4-6h and Butrans being a patch is an advantage as some patients don't like taking pills around the clock for their pain to be controlled.I asked dr to consider 2 patients with commercial insurance,workers comp or medicaid if the Prior Authorization is completed.dr agreed to try Butrans in a couple patients and let me know what happens
PPLPMDL0020000001	Cleveland	OH	44106	4/11/2011	I talked to dr about Butrans initiation guide and patient information booklet/dvd as dr couldn't remember anything about Butrans other than it was a transdermal medication. dr said once weekly dosing was an advantage for some patients who don't like taking tramadol q4-6h and Butrans being a patch is an advantage as some patients don't like taking pills around the clock for their pain to be controlled.I asked dr to consider 2 patients with commercial insurance,workers comp or medicaid if the Prior Authorization is completed.dr agreed to try Butrans in a couple patients and let me know what happens
PPLPMDL0020000001	Cleveland	OH	44106	4/11/2011	I talked to dr about Butrans initiation guide and patient information booklet/dvd as dr couldn't remember anything about Butrans other than it was a transdermal medication. dr said once weekly dosing was an advantage for some patients who don't like taking tramadol q4-6h and Butrans being a patch is an advantage as some patients don't like taking pills around the clock for their pain to be controlled.I asked dr to consider 2 patients with commercial insurance,workers comp or medicaid if the Prior Authorization is completed.dr agreed to try Butrans in a couple patients and let me know what happens
PPLPMDL0020000001	Cleveland	OH	44106	4/11/2011	I talked to dr about patients he see's taking tramadol around the clock for their chronic pain and perhaps them telling him they want something different because the tramadol isn't lasting long enough or once weekly dosing would be easier.dr said Butrans once weekly dosing is easier for some patients but he has to trust that patients will rotate patches weekly and not apply to same skin site.I showed dr Butrans application dvd/booklet and asked if this educational item would assist in educating his patients? dr said yes and wanted a few.I asked dr to consider starting 2 patients like we discussed with commercial insurance so they can use Butrans patient savings
PPLPMDL0020000001	Cleveland	OH	44106	4/11/2011	I talked to dr about Butrans initiation guide and patient information booklet/dvd as dr couldn't remember anything about Butrans other than it was a transdermal medication. dr said once weekly dosing was an advantage for some patients who don't like taking tramadol q4-6h and Butrans being a patch is an advantage as some patients don't like taking pills around the clock for their pain to be controlled.I asked dr to consider 2 patients with commercial insurance,workers comp or medicaid if the Prior Authorization is completed.dr agreed to try Butrans in a couple patients and let me know what happens
PPLPMDL0020000001	Cleveland	OH	44106	4/11/2011	dr couldn't remember much about Butrans other than it was buprenorphine,so we discussed Butrans 5 core messages,initiation guide and Butrans patient savings cards for commercial plan patients.dr said her biggest challenge is that Butrans isn't on formulary in the hospital so we discussed that and in the out-patient clinic.dr said majority of patients are cash paying or caresource/medicaid so she wanted to know Butrans coverage for medicaid so we discussed that too.I asked dr if she would be willing to do a prior authorization for 2 medicaid patients who were taking tramadol around the clock for their chronic pain but telling her their pain isn't controlled with the short-acting opioid? dr said she might be willing to do that and would think about that option.
PPLPMDL0020000001	Cleveland	OH	44195	4/11/2011	worked anesthesia/pain management dept-couldnt see dr.shin or renette,NP,for Dr.Shin's patients as they were both too busy,so I left Butrans fpi,initiation guide and patient information booklet for each of them and my business card.I left information for Dr.Vrooman and Dr.Katyal and Dr.Mintzer and Dr.Mekhal. worked chronic pain&rehabilitation dept-left my business card,Butrans initiation guide and patient information booklet for Dr.Covington,JoAnne,NP and Joan,NP,as they were all busy seeing patients.Worked PM&R-had to leave Butrans fpi,initiation guide,patient information booklet and my business card for Dr.Schaeffer,Dr.Hou,Dr.Reddy and Dr.Jedlicka as none of them see rep's unless the doctors call me for an appointment.
PPLPMDL0020000001	Cleveland	OH	44106	4/11/2011	I talked to dr about Butrans initiation guide and patient information booklet/dvd as dr couldn't remember anything about Butrans other than it was a transdermal medication. dr said once weekly dosing was an advantage for some patients who don't like taking tramadol q4-6h and Butrans being a patch is an advantage as some patients don't like taking pills around the clock for their pain to be controlled.I asked dr to consider 2 patients with commercial insurance,workers comp or medicaid if the Prior Authorization is completed.dr agreed to try Butrans in a couple patients and let me know what happens
PPLPMDL0020000001	Cleveland	OH	44106	4/11/2011	I talked to dr about Butrans initiation guide and patient information booklet/dvd as dr couldn't remember anything about Butrans other than it was a transdermal medication. dr said once weekly dosing was an advantage for some patients who don't like taking tramadol q4-6h and Butrans being a patch is an advantage as some patients don't like taking pills around the clock for their pain to be controlled.I asked dr to consider 2 patients with commercial insurance,workers comp or medicaid if the Prior Authorization is completed.dr agreed to try Butrans in a couple patients and let me know what happens
PPLPMDL0020000001	Lakewood	OH	44107	4/11/2011	Quick call with Rick, we reviewed the medication guide for Butrans and I asked him if he would help us make sure the patients know about the proper use and application of Butrans. He said he will. We discussed that Butrans reaches steady state in 3 days. We discussed OxyContin as an option when Butrans may not provide adequate analgesia. Reminder to recommend Senokot S.
PPLPMDL0020000001	Cleveland	OH	44106	4/11/2011	I talked to dr about Butrans initiation guide and patient information booklet/dvd as dr couldn't remember anything about Butrans other than it was a transdermal medication. dr said once weekly dosing was an advantage for some patients who don't like taking tramadol q4-6h and Butrans being a patch is an advantage as some patients don't like taking pills around the clock for their pain to be controlled.I asked dr to consider 2 patients with commercial insurance,workers comp or medicaid if the Prior Authorization is completed.dr agreed to try Butrans in a couple patients and let me know what happens
PPLPMDL0020000001	Cleveland	OH	44106	4/11/2011	I discussed Butrans fpi,initiation guide,patient information booklet/dvd, Butrans patient savings cards and Butrans REMS program with dr.dr hasn't heard of Butrans but said she only prescribes tramadol for her patients with chronic pain.I asked dr what clinical benefits she saw in Butrans for her patients? dr said once weekly dosing is easy for many patients but she has to trust them that they will rotate application sites and she's not sure if her patients would do that and so many patients like taking their short-acting medication because they think they have more control over pain.we discussed doctors tramadol patients looking at Butrans initiation guide and I asked if dr could think of 2 patients to try Butrans in and get some clinical experience? dr said she will think about it but asked what was the medicaid coverage for Butrans? we discussed this plan and I asked dr to focus on 2 patients to try Butrans in and I will follow-up.dr agreed.
PPLPMDL0020000001	Cleveland	OH	44106	4/11/2011	I talked to dr about Butrans initiation guide and patient information booklet/dvd as dr couldn't remember anything about Butrans other than it was a transdermal medication. dr said once weekly dosing was an advantage for some patients who don't like taking tramadol q4-6h and Butrans being a patch is an advantage as some patients don't like taking pills around the clock for their pain to be controlled.I asked dr to consider 2 patients with commercial insurance,workers comp or medicaid if the Prior Authorization is completed.dr agreed to try Butrans in a couple patients and let me know what happens
PPLPMDL0020000001	Cleveland	OH	44106	4/11/2011	I talked to dr about Butrans fpi,5 core messages, initiation guide,patient information booklet/dvd and Butrans patient savings cards.dr said she only has a few chronic pain patients and not a lot of experience with treating pain.I asked dr what does she give patients now for their chronic pain.dr said she only prescribes tramadol but some patients don't like taking tramadol q4-6h so a once weekly dosing option could be appealing to some patients.dr said it comes down to insurance and asked about Medicaid and medicare coverage for Butrans.I told dr Medicare doesn't cover Butrans and Medicaid requires a prior authorization for Butrans.I asked if dr could think of 2 patients to try Butrans in and dr said she'll have to think about it and not sure if she wants to do prior authorization for medicaid patients.
PPLPMDL0020000001	Cleveland	OH	44106	4/11/2011	I talked to dr about Butrans 5 core messages,fpi,initiation guide, patient information booklet/dvd and asked dr what clinical benefits he saw in Butrans? dr said once weekly dosing is easier for some patients than taking pills around the clock and dr said Butrans being a patch is a nice option.we discussed doctors patients taking tramadol,q4-6h,and how to taper appropriately and initiate Butrans therapy.dr asked about Medicaid coverage so we discussed that and I asked dr to think of 2 patients to start on Butrans.dr said he'll see if he has a few patients that would be willing to go on a once weekly patch.
PPLPMDL0020000001					

	Parma	OH	44129	4/11/2011	Quick call- Asked Jen if she had identified a Butrans patient yet, but she said no. She said she is still getting her bearings with being new but will try to find someone who may be appropriate. Spoke with Dawn who said that she believes that once Dr Nickels & Laura start prescribing, Jen will too. She said Jen is more comfortable keeping patients on their current medications. Dawn said the "key" might be to get them all to a dinner program. Also discussed their patient population, who Dawn said is already on 3 or more Vicoden per day by the time they see them. I told Dawn those are potential Butrans patients. Reviewed managed care & also discussed Rylozt coverage as she said Jen has been writing it more & Dawn received 2 rejections from worker's comp last week. I asked if it was state worker's comp & Dawn said she does not know, but it is possible. She said she would let me know if she notices this happening more.
PPLPMDL0020000001	Cleveland	OH	44115	4/11/2011	dr said he just had someone in his other office talk to him about Butrans.i asked dr where he saw Butrans playing a role in his practice,based on the information he was given last week? dr said he remembers that this is a patch,once weekly dosing and low dose short-acting opioids,moderate pain patients.i showed dr Butrans initiation guide and we discussed patients currently taking opioids,low doses,to consider starting on Butrans.dr said he is more likely to prescribe a patch like Butrans as he likes long-acting opioids and will not prescribe Duragesic.we discussed the fact that the Duragesic patient is probably more severe pain anyways,and this is more moderate pain that we are talking about for doctors patients to be considered appropriate for Butrans therapy. doctors physician assistant,Roman Hancy,zwas at the lunch and said that he would like to hear a speaker and hear real world clinical experience not just paper from us,the representatives.i told dr and Roman,PA,that there was a
PPLPMDL0020000001	Cleveland	OH	44106	4/11/2011	i talked to dr about Butrans fpi,5 core messages,initiation guide and Butrans patient savings cards.dr asked how this compared to Suboxone as Butrans is buprenorphine and works on different receptors like Suboxone.i told dr i didnt have any head to head data to make any comparative claims but showed dr Butrans fpi section 5.17 noting Butrans is not indicated for treatment of addiction.dr said he doesnt prescribe narcotics for his chronic pain patients and will put a cocktail of other medications together for patients but avoids narcotics.dr asked how Butrans compared to Duragesic.i told dr i didnt have any comparative studies so i couldnt make any comparisons,we discussed duragesic being fentanyl and butrans being buprenorphine so 2 different molecules and discussed indication for Butrans again.dr asked how much Butrans costs for cash paying patients? i told dr he should focus on commercial plan patients and dr still wanted to know how much Butrans cost out-of pocket so we briefly
PPLPMDL0020000001	Cleveland	OH	44106	4/11/2011	i talked to dr about Butrans initiation guide and patient information booklet/dvd as dr couldnt remember anything about Butrans other than it was a transdermal medication. dr said once weekly dosing was an advantage for some patients who dont like taking tramadol q4-6h and Butrans being a patch is an advantage as some patients dont like taking pills around the clock for their pain to be controlled.i asked dr to consider 2 patients with commercial insurance,workers comp or medicaid if the Prior Authorization is completed.dr agreed to try Butrans in a couple patients and let me know what happens
PPLPMDL0020000001	Cleveland	OH	44106	4/11/2011	i talked to dr about Butrans initiation guide and patient information booklet/dvd as dr couldnt remember anything about Butrans other than it was a transdermal medication. dr said once weekly dosing was an advantage for some patients who dont like taking tramadol q4-6h and Butrans being a patch is an advantage as some patients dont like taking pills around the clock for their pain to be controlled.i asked dr to consider 2 patients with commercial insurance,workers comp or medicaid if the Prior Authorization is completed.dr agreed to try Butrans in a couple patients and let me know what happens
PPLPMDL0020000001	Cleveland	OH	44106	4/11/2011	i talked to dr about Butrans 5 core messages, fpi,initiation guide,application dvd/booklet and Butrans patient savings cards.dr said she see's chronic pain patients and only gives tramadol q4-6h.dr starts with 50mg,qd,then if that doesnt work increases dosing interval to bid or tid and if patients still are in pain she will increase dosage strength to 100mg.i asked dr if she could consider Butrans for her patients,right after that 50mg qd dosing interval,snt working and start patients on Butrans,showed dr Butrans initiation guide and dr asked about medicaid coverage as thats majority of their patient population.we discussed medicaid coverage and prior authorization needed for medicaid and i asked dr to consider 2 patients like we discussed to start on Butrans and dr said she'll consider that option.
PPLPMDL0020000001	Lakewood	OH	44107	4/11/2011	Dr said that he had switched a patient from embeda to Butrans. He does not remember which dose of Embeda, but he thinks he started her on the 10mcg Butrans. She is a BWC patient and he has not heard back from her so he is hoping that there has not been any issues and it is working well. He said he will see what the feedback is and let me know. I asked if he has any other patients in mind to start Butrans and he said he probably does and will continue to keep Butrans in mind. Sally his nurse has questions about the different schedules of drugs and we reviewed the providing relief preventing abuse brochure.
PPLPMDL0020000001	Cleveland	OH	44106	4/11/2011	i talked to dr about Butrans initiation guide and patient information booklet/dvd as dr couldnt remember anything about Butrans other than it was a transdermal medication. dr said once weekly dosing was an advantage for some patients who dont like taking tramadol q4-6h and Butrans being a patch is an advantage as some patients dont like taking pills around the clock for their pain to be controlled.i asked dr to consider 2 patients with commercial insurance,workers comp or medicaid if the Prior Authorization is completed.dr agreed to try Butrans in a couple patients and let me know what happens
PPLPMDL0020000001	Cleveland	OH	44106	4/11/2011	i talked to dr about Butrans initiation guide and patient information booklet/dvd as dr couldnt remember anything about Butrans other than it was a transdermal medication. dr said once weekly dosing was an advantage for some patients who dont like taking tramadol q4-6h and Butrans being a patch is an advantage as some patients dont like taking pills around the clock for their pain to be controlled.i asked dr to consider 2 patients with commercial insurance,workers comp or medicaid if the Prior Authorization is completed.dr agreed to try Butrans in a couple patients and let me know what happens
PPLPMDL0020000001	Cleveland	OH	44106	4/11/2011	i talked to dr about Butrans initiation guide and patient information booklet/dvd as dr couldnt remember anything about Butrans other than it was a transdermal medication. dr said once weekly dosing was an advantage for some patients who dont like taking tramadol q4-6h and Butrans being a patch is an advantage as some patients dont like taking pills around the clock for their pain to be controlled.i asked dr to consider 2 patients with commercial insurance,workers comp or medicaid if the Prior Authorization is completed.dr agreed to try Butrans in a couple patients and let me know what happens
PPLPMDL0020000001	Parma	OH	44129	4/11/2011	Spoke with Dawn (nurse & office manager) who said that she had spoken with Laura & that Laura said that she is not willing to taper a patient for Butrans. Laura told Dawn that she is concerned that this would cause a patient to go into withdrawl & she is not willing to do that. She also said that there is a concern that patients will not "be happy" with being switched from their current medication. I asked Dawn if they have patients on 3 Vicoden per day & she said yes, that is about the lowest dose they ever see. I asked if they ask for increases in doses & she said it happens frequently. I also discussed usage of supplemental analgesia but Dawn said that in their pain contract, it states that patients cannot be on two pain medications concurrently, so they would not be able to write Butrans + a short-acting for breakthrough. Dawn said the "key" might be to get Laura & Dr Nickels to a program & said Laura would be likely to prescribe it even if Dr Nickels does not.
PPLPMDL0020000001	Cleveland	OH	44106	4/11/2011	i talked to dr about Butrans initiation guide and patient information booklet/dvd as dr couldnt remember anything about Butrans other than it was a transdermal medication. dr said once weekly dosing was an advantage for some patients who dont like taking tramadol q4-6h and Butrans being a patch is an advantage as some patients dont like taking pills around the clock for their pain to be controlled.i asked dr to consider 2 patients with commercial insurance,workers comp or medicaid if the Prior Authorization is completed.dr agreed to try Butrans in a couple patients and let me know what happens
PPLPMDL0020000001	Cleveland	OH	44124	4/14/2011	Quick call....gave doc an updated oxycontin formulary grid and explained same. I told him there were some small recent changes. He said that he has not had any recent coverage issues with oxycontin. Gave him a butrans formulary grid also and explained the appropriate patient type. No savings cards needed.
PPLPMDL0020000001	Sagamore Hills	OH	44067	4/14/2011	Quick call- Dr Gemma said she remembers Butrans & that it is transdermal. Discussed dosing & appropriate patient type & reviewed managed care grid for Butrans. Also recommended Senokot-S for opioid-induced
PPLPMDL0020000001	Cleveland	OH	44195	4/14/2011	dr said he hasnt started any patients on Butrans yet as he forgot who the appropriate patient was.dr remembered Butrans once weekly dosing and that it was transdermal delivery.i asked dr if those were even benefits he saw in Butrans? dr said once weekly dosing is beneficial for some patients who dont like taking pills around the clock for their chronic pain.i showed dr Butrans initiation guide and asked if he could focus on 2 patients,currenty taking opioids,properly taper them and initiate Butrans if their short-acting opioids arent controlling their pain and if dr believes a long-acting opioid may be more appropriate? dr said he will consider that option. we discussed OxyContin,7 tablet strengths,as an option when patients are on 80mg or more of oral morphine equivalent,dr said he prescribes OxyContin and thanked me for information.Gave dr formulary grids for Butrans and OxyContin and recommended Senokot-S
PPLPMDL0020000001	CLEVELAND	OH	44109	4/14/2011	i talked to Rod,Pharmacist,about Butrans stocking and Rod said he's not seen any scripts for Butrans yet so he's not ordering.we discussed importance of stocking all 3 dosage strengths of Butrans so patients arent turned away and told to return in 24hrs but Rod said he wont order any strength of Butrans until he see's the first script.i showed Rod Butrans initiation guide and asked who he thought could benefit from Butrans? Rod said majority of patients are taking 2-3 tabs of Vicodin or Percocet a day so he would think that would be the place for Butrans and only those patients complaining about their short-acting medications not lasting long enough as so many patients like taking their pills. i asked Rod to consider recommending Butrans to any doctors when he hears patients complaining to him that their short-acting opioids arent lasting long enough and perhaps patients could be considered for Butrans if appropriate.we discussed OxyContin stocking and appropriate patients&insurance
PPLPMDL0020000001	Cleveland	OH	44103	4/14/2011	i talked to dr about Butrans and who he felt could be appropriate in his practice,dr said there a lot of patients who could probably do well on Butrans but he's not doing the PA for Medicaid patients and thats majority of his patients so he didnt want to discuss it anymore until Butrans gets on formulary for Medicaid. we talked about OxyContin being an appropriate option for patients above 40mg oxycodone or hydrocodone and perhaps benefitting from a long-acting opioid,dr agreed saying he likes OxyContin and knows its available on medicaid.i showed dr formulary grids for both products but he took OxyContin formulary grid.
PPLPMDL0020000001	Cleveland	OH	44102	4/14/2011	i restated my last conversation with dr,see previous call note,and asked if she started 2 patients as she agreed to do on Butrans? dr said no,she likes Butrans,its a good medication but hasnt started anyone yet.i asked dr what information does she need to feel comfortable prescribing Butrans and find 2 patients to try Butrans in? dr said she doesnt need any information,she feels comfortable and understands who the patient type is,but insurance is her issue.i asked dr what insurance type is she referencing? dr said Medicaid as she doesnt remember what the coverage is for Butrans? we discussed dr trying Butrans in 2 commercial plan patients first,as thats the easiest and give 2 patients Butrans patient savings cards.dr said thats fine but she has a lot of medicaid,so we talked about prior authorization requirements for Medicaid patients to try and get approval of Butrans.i showed dr again Butrans initiation guide,1-3 tabs 5mg short-acting opioid patient,dr said ok made sense
PPLPMDL0020000001	Cleveland	OH	44103	4/14/2011	i talked to dr about the couple of patients she's started on Butrans and dr said both patients were taking short-acting opioids and complaining that their medication was wearing off sooner than it should so dr thought she would try Butrans and both patients seem to be doing well. we discussed more patients,like that, who are currently taking opioids but either the once weekly dosing is an appealing option of Butrans or patients are telling dr that their pain isnt controlled with short-acting opioids. dr and i discussed commercial plan insurance and use of Butrans patient savings cards and medicaid patients needing a prior authorization for Butrans.i asked dr to focus on patients we discussed and starting 2 more patients,dr agreed. we discussed OxyContin as an appropriate option after Butrans and insurance coverage for Medicaid and Medicare and i recommended Senokot-S worked pain management and chronic pain dept-see call notes; worked rheumatology dept-left Butrans fpi,initiation guide and patient information booklet with my business card-receptionist said i have to leave the information,the medical secretaries will take the information and share with doctors and if they are interested in meeting with me,they will contact me:left all of this information for Patty,PA,Dr.Long,Dr.Calabrese,Dr.Chatterjee and Dr.Mazanec and Betsy,NP; worked neurology dept-left Butrans fpi,initiation guide and patient information booklet for Dr.Spears,Dr.Stillman,Dr.Kriegler and Dr.Mays,with medical secretaries who said they will give information to doctors and doctors will tell them if they want an appointment with me.
PPLPMDL0020000001	Lyndhurst	OH	44124	4/14/2011	Spoke to Megan about the stocking and movement of Butrans. She said that they have had a few scripts but she does not know the prescriber. No scripts recently. I asked if she recalled the customer using a savings card. She said no. I reviewed the savings card program. Gave her a flyer for the REMS webinar for pharmacist.
PPLPMDL0020000001	Olmsted Falls	OH	44138	4/14/2011	Spoke with Kelly, we reviewed the Butrans medication guide. I let her know that we will need her help with teaching the patients about proper use and application of Butrans and she agreed. We discussed OxyContin as an option when Butrans may not be appropriate. Reminder about Senokot S as an option.
PPLPMDL0020000001	Cleveland	OH	44102	4/14/2011	Nagla,PA,said she hasnt started any patients on Butrans as the follows Dr.Talbot's lead and Dr hasnt started any patients on Butrans yet. I asked Nagl,PA,what benefits she saw in Butrans for her patients? Nagla said once weekly dosing is a benefit for those patients who are complaining to her that their short-acting opioids are wearing off sooner than they should and she's thinking a long-acting opioid would be more appropriate.i asked Nagla if she would consider 1 patient,with commercial insurance,taking 1-3 tabs of the 5mg hydrocodone or oxycodone that could be started on Butrans and showed Nagla Butrans initiation guide for this discussion.Nagla said she would do that but will feel better once she see's dr talbot starting patients on Butrans.
PPLPMDL0020000001	Cleveland	OH	44130	4/14/2011	Reviewed Butrans managed care grid & savings cards with Dr Fedorko. He said he has a patient in the hospital who he is planning on sending home with Butrans. I started to ask him when he moves a patient to a long-acting medication but he wandered back into a room before i could finish. Spoke with Maryellen & reviewed managed care/savings for Butrans.Dr Fedorko came back out of the room & told me he was looking for samples for a patient with constipation. I showed him the Senokot-S & Colace samples I had left for him on my last visit & also gave Rylozt value card reminder.
PPLPMDL0020000001					

PPLPMDL0020000001	Akron	OH	44333	4/14/2011	I asked Dr. Fouad why he has not prescribed Butrans yet> He told me he had not had the opportunity and when I explained the patient type...again he simply said he would try it on two patients that afternoon.<font color=blue><b>CHUDAKOB's query on 04/24/2011</b></font>Rather than explaining the patient type, ask him what opportunity he is waiting for or what patient type he is looking for. You will gain a lot more information by asking instead of telling.<font color=green><b>LAPMACA's response on 04/25/2011</b></font>Thanks. I'll try it!<font color=blue><b>CHUDAKOB added notes on 04/27/2011</b></font>Great. I can't wait to see how it works when we are together in the field. Thanks!
PPLPMDL0020000001	Berea	OH	44017	4/14/2011	Quick call with April, we reviewed the Butrans patient medication guide. I let her know that it will be important for her to help us instruct the patients on the proper use and application of Butrans. I reviewed OxyContin as an option when patients are taking more than 40mg of hydrocodone per day. I reminder her to recommend Senokot S.
PPLPMDL0020000001	Copley	OH	44321	4/14/2011	Quick call. Asked Dr. Heim if he was going to see any patients on low dose hydrocodone and he said he wasn't sure. I helped him identify the appropriate Butran's patient and reminded him of coverage.
PPLPMDL0020000001	Olmsted Falls	OH	44138	4/14/2011	I asked Dr what Benefits he sees in Butrans. He said the 7 day doses and patients not having to take pills around the clock. I asked if he would start the next appropriate chronic pain patient on Butrans. He said that he would and he will just have to wait for one who is not Medicaid. I reviewed the managed care and savings cards. I asked him to think of OxyContin for those appropriate Medicaid patients.
PPLPMDL0020000001	Westlake	OH	44145	4/14/2011	I asked Dr about the progress of getting Butrans on SJWS formulary. He said he has not heard any news yet. He said he is still a big fan of Butrans and is working to be able to use it in-patient. I asked if he would come to our upcoming peer group. He will let me know. I asked Kelly about Dr Nair joining UH and she said she will be with the neurology group. She said they are building their new department and pain management and neurology will be next to each other.
PPLPMDL0020000001	Berea	OH	44017	4/14/2011	I asked Dr if he would start the next chronic pain patient he sees who is appropriate for Butrans today. He agreed.
PPLPMDL0020000001	Sagamore Hills	OH	44067	4/14/2011	Quick call- Dr Lenox said he has not prescribed Butrans yet but did remember it is CII, once-a-week, & transdermal. He said he would prescribe it when he sees "the right patient", but then he left.Spoke with nurses and positioned Butrans for patients who are taking NSAID's or COX-2s & not getting relief or for those taking a low dose of Vicoden around-the-clock who ask for an increase in dose. Also reviewed managed care coverage.
PPLPMDL0020000001	Sagamore Hills	OH	44067	4/14/2011	Introduced myself & Purdue's products to Dr Maguire. Delivered 5 Butrans core messages. He said he really does not treat a lot of "chronic pain". I told him that there is no specific etiology of pain that a patient must have to fit the indication, just that the patient has a chronic condition that causes them to be in pain. He said he does not prescribe many opioids at all. Reviewed CII & agreed that he should be just as cautious in prescribing Butrans as with any other opioid. He asked about adverse events-showed FPI section 6. He said he would keep Butrans in mind if he ever decided to treat a patient for a condition causing pain chronically.
PPLPMDL0020000001	Cleveland	OH	44109	4/14/2011	worked internal medicine clinic(out-patient)-had to leave Butrans fpi/initiation guide and patient information booklet with my business card for Dr.Lindheim,Dr.Harrington,Dr.Falck-Ytter and Dr.Ricanati; worked family medicine dept(in-patient)-left same information on Butrans for Dr.Forde,Dr.Papadakis and Dr.Liu
PPLPMDL0020000001	Akron	OH	44333	4/14/2011	Introduced Butrans and FPI. I asked Dr. Pinkowski if he treated chronic pain and he said he did not. I explained that Butrans may not be appropriate for his patients. He was happy that I took the time to go over Butrans and the FPI in case any of his patients came in on it he would know what it was.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	4/14/2011	I asked Dr. Pitt if he thought he would ever trial Butrans on just one patient. He said probably not. I asked him why he didn't see a benefit and he said that he doesn't really like patch technology and that most of patients are beyond the point of Butrans.
PPLPMDL0020000001	Highland Heights	OH	44143	4/14/2011	Window call....I asked doc what was one of his larger commercial prescription plans. He said medical mutual. I gave him a formulary grid showing that Butrans is covered. I asked him to prescribe for appropriate medical mutual patients and give a savings card.
PPLPMDL0020000001	Highland Heights	OH	44143	4/14/2011	QUICK call....I reviewed the Butrans indication and positioning. Gave her an initiation guide and reminded her that commercial patients should get a savings card. Nothing learned.
PPLPMDL0020000001	Sagamore Hills	OH	44067	4/14/2011	Dr Sevier said because he does not see a lot of chronic pain patients, he has not prescribed Butrans yet. He added that he only has one patient on Duragesic. Reminded him that fentanyl patients were excluded from studies & asked him to think of more "moderate" pain. Showed initiation guide pg 6 & positioned Butrans for patients for whom he is ready to prescribe an opioid. I asked if he would consider Butrans for patients with a chronically painful condition who is not getting relief from NSAID's or COX-2's. He said he would & that he likes the idea of putting a patient on Butrans once-a-week instead of around-the-clock oral medications. I asked what specific patient type he was thinking of & he said an older patient with osteoarthritis who would be on Vicoden around-the-clock. Told him that clinically, that is an ideal patient, however, with current Medicare Part D coverage, he should think of commercially insured patients-He agreed. OxyContin & Senokot-S reminders.
PPLPMDL0020000001	Cleveland	OH	44195	4/14/2011	I talked to dr in hallways,as dr said he didnt have time to go in office and speak with me but we discussed doctors patients he has started on Butrans and dr said these are all patients who have been taking Vicodin and Percocet for years and their pain wasnt controlled so he thought Butrans would be a better option being long-acting and the patients seem to be doing well,dr said no complaints or calls from patients is a good sign. we discussed titration of Butrans,if patients need to be titrated after 3days when steady state plasma levels are achieved,dr said he knew that and would let me know if he has any other questions and he didnt need any Butrans patient savings cards.<font color=blue><b>CHUDAKOB added notes on 04/24/2011</b></font>Nice job getting to see this very difficult physician!
PPLPMDL0020000001	Copley	OH	44321	4/14/2011	I clarified that Dr. Machado understood the molecule Buprenorphine since he was unclear on my last visit. He said he understood but then said if he writes Butrans he will not be able to write as much OxyContin. I showed him the titration guide and explained where he should be using Butrans and told him for patients that may not be appropriate for Butrans he could prescribe OxyContin.<font color=blue><b>CHUDAKOB's query on 04/24/2011</b></font>This could have been an opportunity to put it back on the physicians by asking him what he sees as the difference in the two patient types.<font color=green><b>LAPMACA's response on 04/25/2011</b></font>I'll do that next call! Thanks!<font color=blue><b>CHUDAKOB added notes on 04/27/2011</b></font>Keep that type of concept in mind when you are asked a question. You may end up learning about why the question was asked in the first place.
PPLPMDL0020000001	Garfield Heights	OH	44125	4/14/2011	Dr Samuel asked if it was "common" to have a patient complain of itching from Butrans. He told me the patient he had started on Butrans had been off her Percocet for one week before starting Butrans. When she started taking Butrans, she experienced itching (reported last call). Reviewed FPI section 6 & also reviewed initiation/titration guide. Went over page 6, discussing recommended taper procedure on pg 6. We discussed how to properly initiate treatment in different patient types, depending on their current opioid therapy. He said that because short-acting medications are sometimes so inexpensive, patients prefer them & they also like the "control" of short-acting opioids. Reviewed managed care & savings & asked him to focus on commercially insured patients as he said cost is important. Dr Samuel said he feels more comfortable with Butrans now & wants to start prescribing more of it because he "loves" long-acting medications. He said he will be using it more.<font color=blue><b>CHUDAKOB's query on 04/24/2011</b></font>Ashleigh, you have to report an AE everytime you hear it, even if it the same one and it was already reported. Please call this in.<font color=green><b>APSEGAS's response on 04/25/2011</b></font>OK. I apologize- I have taken care of it now by calling it in.<font color=blue><b>CHUDAKOB added notes on 04/27/2011</b></font>Thank you!
PPLPMDL0020000001	Akron	OH	44333	4/14/2011	Dr. Steurer told me that he has many patients who are on low dose SAO's and have been on them for a long time. He also told me that most all of his patients have commercial insurance or BWC. I explained that Butrans was affordable for his patients and went over the co-pay cards and showed him the titration guide so he would understand what dose to initiate therapy at. He liked the concept but seemed hesitant and said that he would like to see an actual clinical study outside of the FPI.
PPLPMDL0020000001	Cleveland	OH	44195	4/14/2011	I asked Anne,NP,if she has considered Butrans for any of her patients yet and Anne said no she hasnt. Anne said she see's all of Dr.Stanton-Hicks's patients and he hasnt started anyone on Butrans yet. I asked Anne if she even saw any benefits in Butrans for their patients? Anne said once weekly dosing is easy for some patients but rotating the patches can be difficult for some patients to remember and she doesnt trust all of them to rotate the application sites and put a new patch on every week.I asked Anne to think of 2 patients,that she trusts,that she is taking short-acting tramadol or vicodin around the clock but telling her its not working long enough or perhaps she's thinking a long-acting opioid could be more appropriate and to give these 2 patients a Butrans patient savings card. Anne said she would do that and i told her i would follow-up next week.
PPLPMDL0020000001	Garfield Hts	OH	44125	4/14/2011	Spoke with technician who said the pharmacist was too busy today for a visit. I asked if they had gotten Butrans in stock, but she said they have not that she is aware of. Reviewed indication & dosing with her & left Butrans FPI with my card & asked her to give it to the pharmacy manager & she agreed to do this.
PPLPMDL0020000001	Cleveland	OH	44130	4/14/2011	I asked Dr Diab what caused him to prescribe Butrans for the patient he had told me about. He told me the patient could not get Butrans because of too high a cost. I showed him the formulary grid & asked that he think of commercially insured patients who can utilize the savings cards. He asked me to put the formulary grid on his desk & then went into a room. I checked his savings card supply & did notice that one was missing.<font color=blue><b>CHUDAKOB added notes on 04/24/2011</b></font>Nice job going back to the same objective since it was not resolved.
PPLPMDL0020000001	Parma	OH	44134	4/14/2011	Dr Hernandez said that he had a patient who experienced nausea & vomiting while on the 5mcg dose of Butrans. He said the patient said they were getting good pain relief but that they discontinued treatment with Butrans due to the nausea & vomiting. Dr Hernandez said he is getting good clinical feedback fro his Butrans patients & was happy to hear that the Rite Aid "unbreakable carton" issue had been resolved; however he said he just had a patient who tried to fill a prescription at a Discount Drug Mart & had the same problem of the pharmacist not filling the prescription for one patch. He did not know which location this occurred at. I let Dr Hernandez know that I would work with the area pharmacists to get this resolved. He said he likes to write for one patch for a first prescription so that he can make sure the patient is on the correct dose before prescribing a full carton. He requested more savings cards- also reminded him of OxyContin savings cards for eligible patients.
PPLPMDL0020000001	Cleveland	OH	44195	4/14/2011	dr said he's not prescribed Butrans yet,as he's trying to get majority of his patients OFF opioids. I asked dr if he saw any benefits in Butrans for his patients? dr said once weekly dosing and putting medication in a patch was beneficial for some patients but he doesnt have a lot of patients on short-acting opioids that he can think of that would be interested in taking a patch,his patients are stable on their pills. I asked dr to consider just 1 patient,who tells him that their short-acting opioids are NOT controlling their pain and perhaps Butrans could be an option and showed dr Butrans initiation guide to discuss proper tapering and initiating of Butrans.
PPLPMDL0020000001	Cleveland	OH	44195	4/14/2011	I talked to Kathy about doctors prescribing Butrans in department.Kathy said she knows Dr.Shin and Dr.Syed have prescribed but noone else.Kathy said because she see's all of Dr.Minzter and Dr.Mekhal's patients,they need to believe in Butrans as an option for their patients.Kathy and I talked about me setting up more individual appointments with both of these physicians to find out if doctors need more information from me regarding Butrans,especially Dr.Mekhal as Kathy said he never prescribes new medications and Butrans is new to him,for a while and that could be a year or so.I asked if Kathy could share the Butrans initiation guide and patient savings card program with both doctors and see if they tell her anything that concerns them so i can address any issues/questions.Kathy agreed to do that.
PPLPMDL0020000001	Cleveland	OH	44195	4/14/2011	I talked to dr about her tramadol patients and asked if she ever has patients tell her they are still in pain even though they are taking short-acting tramadol? dr said yes so we looked at Butrans initiation guide and discussed proper tapering and initiation of Butrans. dr asked about insurance coverage so we talked about her commercial plan patients and I asked dr to try Butrans in 2 patients to get some clinical experience,dr agreed
PPLPMDL0020000001	Akron	OH	44302	4/14/2011	Introduced Butrans and FPI. Went over the ideal patient type and asked him if he treated chronic pain. He told me that he only treats pain PRN so I told him that Butrans may not be the appropriate therapy for his patients. He asked if I would leave some literature behind in case any of his patients come in on Butrans.
PPLPMDL0020000001	Cleveland	OH	44109	4/15/2011	I talked to dr about appropriate patients for Butrans and dr said he knows that the patients for Butrans are low dose,short-acting opioids and not controlled on that dosing regimen and a long-acting opioid like Butrans could be an option.I told dr that was right and asked if he had seen any patients like that in the past week since we had lunch? dr said no,he has patients exercise,do physical therapy,acupuncture,more alternative options first and then if that doesnt work he'll prescribe tramadol and then vicodin but he doesnt have a lot of patients on these opioids,dr said he will try Butrans in 1 or 2 patients once he see's them.dr asked about BWC and commercial plan insurance coverage for Butrans so we discussed both of them.I recommended Senokot-S
PPLPMDL0020000001	Beachwood	OH	44122	4/15/2011	I asked Dr Yokiel what types of patients he had tried Butrans on so far. He said patients who were having chronic pain & who were taking Vicoden or Percocet around-the-clock. He said it makes sense to have a patient on a long-acting medication if they have a chronic issue. He said he also allows them to keep a lower supply of their short-acting medication in case they need supplemental analgesia. He said he does not see patients on lower doses of opioids or opioid-naive patients very often. He also said he has not had any negative feedback on Butrans & he plans to continue prescribing it. Reviewed managed care grids & savings cards for Butrans & OxyContin. He said he is a supporter of OxyContin for appropriate patients & will continue to use it in these patients.
PPLPMDL0020000001					

	Beachwood	OH	44122	4/15/2011	Introduced Butrans to Jennifer, the new NP at Dr Yokiel's office. She said she had wanted to hear about Butrans because when she was working at South Pointe, she missed the day I was there for the initial presentation. Delivered 5 core messages & alerted her to black box warning. She asked what types of patients she could use it in. Reviewed appropriate patient types & discussed patients taking short-acting medications like Vicoden or Percocet around-the-clock for chronic conditions. She said that Butrans sounded like something she will be able to use & liked that it is CIII. Reminded her that because it is an opioid, Butrans does carry abuse & addiction potential. She asked if they could take supplemental analgesia. I showed FPI 2.4 & told her patients can take immediate release opioid & non-opioid medications while taking Butrans. She asked about insurance coverage, so I showed formulary grid & reviewed savings cards, asking her to focus on commercially insured patients or BWC.
PPLPMDL0020000001	Independence	OH	44131	4/15/2011	I asked Dr Pai what had caused him to choose Butrans for the patient who he prescribed it for. He said it was an 84 year old woman who had been taking Vicoden around-the-clock & then asked for an increase in dose. He said he didn't want to up her dose or adding on, so he put her on Butrans. He said the patient had a condition that caused her to be hospitalized two weeks after she started on Butrans & the patient was taken off Butrans at St Vincent's since they do not have it for inpatients there. He said that he has not seen her since but may put her back on the Butrans. Told Dr Pai that she sounds like an ideal patient clinically but managed care may be an issue. Reviewed coverage & asked him to focus on commercial patients. I asked him if he would prescribe Butrans for an opioid naive patient- he said he is reluctant to write opioids for those patients, especially if they are younger. I asked if he would use it in place of tramadol for appropriate patients-he said "definitely".
PPLPMDL0020000001	South Euclid	OH	44121	4/15/2011	I asked doc if he has considered Butrans for any appropriate patients - opioid naive or on low dose opioids. He said he forgets and asked about coverage. Told him no medicaid/medicare; gave him a formulary grid showing the commercial plans. He said he wants to try butrans.
PPLPMDL0020000001	Akron	OH	44304	4/15/2011	Introduced Butrans and FPI. Asked him how often he was prescribing low dose hydrocodone. He said many times each week. I told him that for patients who were chronic Butrans could be used in place of SAO's. This was a quick window call.
PPLPMDL0020000001	Akron	OH	44313	4/15/2011	Spoke to the pharmacist and introduced Butrans and the FPI. She was rushed for time so I quickly went over the patient education guides.
PPLPMDL0020000001	Akron	OH	44333	4/15/2011	I asked Dr. Bashor if he has been able to identify one patient who has commercial insurance that would be appropriate to start on Butrans therapy. he said that he has not and will continue to keep it in mind for that patient.
PPLPMDL0020000001	Cleveland	OH	44113	4/15/2011	worked pain management&pm&r dept-dr shen call note
PPLPMDL0020000001	Euclid	OH	44119	4/15/2011	Spoke to lauren about the stocking and movement of Butrans. She confirmed stocking but said that she might have seen only one script for Butrans and does not recall the prescriber. I explained the savings and the voucher program. Gave her a flyer for pharmacist about the REMS. She asked if it was for CE credits. I told her I was not sure.
PPLPMDL0020000001	Cleveland	OH	44121	4/15/2011	Window call....I discussed the Butrans indication and positioning, CII status and coverage. Gave him a formulary grid and explained the savings card program. Nothing learned.
PPLPMDL0020000001	Cleveland	OH	44109	4/15/2011	I talked to dr about patients he has seen this week,with chronic pain,that dr felt would be appropriate for Butrans.dr said he knows that Butrans is for patients taking low dose short-acting opioids where pain isnt controlled and perhaps Butrans being a long-acting opioid could be an appropriate option,but he hasnt seen anyone that he feels is telling him their pain isnt controlled.dr said he only has a few patients on opioids as he is a new attending here,so give him time as he will continue to consider Butrans as an option.we talked about Butrans managed care coverage for commercial,medicaid and BWC plans. I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	4/15/2011	dr said he hasnt started anyone on Butrans,but does like that Butrans is a patch and is dosed once a week.dr asked about BWC and commercial insurance,we discussed both and Butrans patient savings cards and dr said he didnt have more time to talk but would eventually start a couple of patients on Butrans see what happens.
PPLPMDL0020000001	Cleveland	OH	44109	4/15/2011	I talked to dr about patients he thinks can benefit from Butrans and showed Butrans initiation guide.dr said he only has 1 or 2 patients in mind that would be interested in a patch once a week,as most patients like taking their short-acting opioids because they think they have more control over their pain levels with the short-acting medications.dr said he likes once weekly dosing instead of relying on patients to take their medications around the clock because sometimes they do this and sometime they dont.we discussed managed care coverage and use of Butrans savings cards and I asked dr to consider 2 patients to try Butrans in,based on our discussion.dr agreed.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44130	4/15/2011	Quick call- Caught Dr Kansal at the window. I asked when he would use a long-acting opioid vs a short-acting around-the-clock regimen. Dorothy said he did not have time to talk today & he walked away. Reminders for savings cards for Butrans, OxyContin, & Ryzolet. Dorothy said she thought she needed some Ryzolet savings cards & also requested more Senokot-S & Colace samples. She said Dr Kansal has not had as much time to talk to reps lately because he has cut his hours temporarily. She said to stop back in a couple weeks around 2pm & she would try to get me some time with him. Also scheduled lunch.
PPLPMDL0020000001	Akron	OH	44333	4/15/2011	I have continued to probe to try and uncover if Dr. Richter is treating any chronic pain. Although he treats fibromialgia, he told me that he uses SAO and when anything becomes chronic he refers them out.
PPLPMDL0020000001	Cleveland	OH	44102	4/15/2011	I talked to Vicky,Pharmacist,about Butrans stocking and she confirmed that the Butrans 5mcg is in stock but she hasnt seen any scripts for Butrans we talked about doctors im working with,the 5 core messages,initiation guide and Butrans patient savings cards.i asked if Vicky saw benefits in Butrans and if she would recommend Butrans for those patients appropriate? Vicky said once weekly dosing option and medication in a patch is beneficial to patients,especially the chronic pain patients who dont like taking pills and would prefer a patch and recommending Butrans depends on her relationship with doctor but she would do that for some patients she knows arent controlled on short-acting opioids.
PPLPMDL0020000001	Parma	OH	44129	4/15/2011	Quick call- Gave Dr Roheny Butrans REMS information packet. Spent time with Kathy & Lorraine & reviewed Butrans savings cards & managed care coverage.
PPLPMDL0020000001	Akron	OH	44333	4/15/2011	I asked Dr. Z: if he would be willing to try Butrans therapy on at least 2 patients that he would typically refer to Pain Management. He said that he does not really feel comfortable prescribing LAO's and treating chronic pain but would consider it.
PPLPMDL0020000001	Cleveland	OH	44114	4/15/2011	dr said he's started a couple more patients on Butrans,thinks he has 4 or 5 patients now on Butrans that he took off Kadian,as he wants to take patients on 30-80mg oral morphine that are complaining to him their pain isnt controlled,and tapering them appropriately and starting them on Butrans.we talked about appropriate initiating dosage strengths,Butrans 5mcg or 10mcg and titration for these patients and I asked dr if he knew how to write Butrans prescription,showed him the back of initiation guide and we talked about that.dr said BWC is their biggest plan and that seems to be working for patients getting Butrans.
PPLPMDL0020000001	Cleveland	OH	44109	4/15/2011	dr said he hasnt started anyone on Butrans yet but has a few patients in mind that HE thinks will benefit from Butrans.dr said these are patients taking tramadol and he thinks a once weekly dosing option in a patch would be more beneficial than short-acting tramadol dosed q4-6h.i showed dr Butrans initiation guide and we discussed proper tapering of tramadol and initiation of Butrans.dr asked about commercial plan insurance coverage and medicaid coverage for Butrans as thats the majority of his patients,we discussed both plans for Butrans and use of Butrans patient savings cards only for commercial plan patients. I asked dr to think of 2 patients where Butrans could be an appropriate option,dr agreed.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44102	4/15/2011	I talked to Brian,Pharmacy Technician,as Vince,Pharmacist,was too busy to talk today.we talked about Vince ordering Butrans and importance of stocking all 3 dosage strengths as they havent ordered Butrans yet.Brian said he hasnt seen any scripts for Butrans and asked what Butrans was again as he forgot.i talked to Brian about the 5 core messages of Butrans,showed initiation guide and patient information booklet and asked Brian to share all of this information with Vince and see if Vince will order at least Butrans 5mcg and 10mcg,the 2 initiating dosage strengths of Butrans,Vince said he would do that and I asked Vince to recommend Senokot-S for their patients taking opioids to treat opioid induced constipation
PPLPMDL0020000001	Independence	OH	44131	4/15/2011	I asked JT if he would fill a Butrans prescription written for one patch. He said he would not break a carton to do this. He said it is too risky for him to do from a business standpoint & that the remainder of the open box would not be returnable if it didn't "move". He added that because he has seen only one Butrans prescription, he does not see that this would benefit him. I let him know that some practitioners are prescribing it that way to ensure proper dosage. I asked if, when he does start to see more Butrans activity, he would reconsider this. He said he might, but it is more likely that he will never do this.
PPLPMDL0020000001	Parma Heights	OH	44129	4/15/2011	Spoke with Larissa & asked her if they have a problem dispensing a single patch for Butrans if they get a prescription written that way. She said she is not sure how that would be handled. She suggested I come back to speak with Al about it as he is the manager. She said that she has not dispensed any Butrans yet, so her concern would be that they would not be able to "get rid of" the remaining patches from that box. Let her know that some physicians are writing prescriptions that way to ensure the correct starting dose. Also offered more OxyContin savings cards but she said they have plenty.
PPLPMDL0020000001	Cleveland	OH	44109	4/15/2011	I asked dr if there was any reason why she hasnt prescribed Butrans yet? dr said no,she thinks Butrans is a good medication,likes once weekly dosing but hasnt had any patients complain to her that their short-acting opioids arent working.i asked dr if she has patients calling in to office sooner,requesting medication refills? dr said yes,every day that happens.i told dr she could consider Butrans for those patients,if patients short-acting opioids arent lasting long enough to control pain,that could be a sign patients need a long-acting opioid.dr said thats a good point and would remember that next time.i asked dr to think of 2 patients to start on Butrans like this and use the Butrans patient savings cards.dr asked about medicaid coverage and BWC so we discussed those 2 plans.i recommended Senokot-S
PPLPMDL0020000001	Euclid	OH	44119	4/15/2011	I asked doc what he does for patients when they fail on tramadol for chronic pain. He said, "Butrans". I asked him to seriously consider trying Butrans after tramadol (or Ryzolet). I discussed the Butrans 7 day delivery and the CII status. Showed him the initiation guide and how to dose. I also showed the formulary grid. He bawked at the 3rd tier status but I explained the \$40 off with the savings cards.
PPLPMDL0020000001	Cleveland	OH	44109	4/15/2011	I talked to dr about benefits he see's in Butrans for his patients,dr said the once weekly dosing of Butrans is easier for some patients that dont like taking pills around the clock or the patients complaining to him that their short-acting opioids are wearing off sooner than they should.dr said he only has a few patients on chronic opioid therapy so he hasnt seen anyone yet that he thinks Butrans could be an option for, but he'll keep it in mind.i asked dr to think of 2 patients,like we discussed,showing the Butrans initiation guide noting tapering and initiation of Butrans,to start on Butrans.dr said he will keep it in mind and asked me what the insurance coverage was like for commercial plans and medicaid? we discussed both plans i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	4/15/2011	dr said he has talked to a few patients about Butrans but these patients didnt want to get off their short-acting opioids,so we talked about dr discussing Butrans with patients who aren't controlled on their short-acting opioids and asking for something different.i showed dr Butrans initiation guide and asked him to find 2 patients to start on Butrans,looking at opioid experienced page with tapering and initiation discussion,and give Butrans patient savings card.dr agreed. I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44102	4/15/2011	dr said she didnt remember anything about Butrans,so we discussed Butrans fpi,5 core messages,initiation guide and patient information booklet/dvd.dr said she likes that Butrans is a patch and dosed once a week because she has patients taking vicodin and percocet that call the office earlier than they should requesting a refill so she knows that their short-acting opioids arent lasting long enough.dr said her pain patients come back to see her every 4 weeks for a visit,if they have chronic pain,as she wont refill over phone for vicodin or percocet.we talked about dr considering 2 patients,with commercial plan insurance,that are taking 1-3 tabs of the 5mg vicodin or percocet dosage strength,that dr could consider starting on Butrans,if they are complaining to her that their short-acting opioids arent lasting long enough,dr said that was fair and would think of some patients to try Butrans
PPLPMDL0020000001	Euclid	OH	44117	4/15/2011	in and let me know what happens.i recommended Senokot-S
PPLPMDL0020000001	Euclid	OH	44117	4/15/2011	Window call....asked doc if he spoke to Dr. Moutafawad and got the endorsement for Butrans that he was looking for. He said he had not spoken to him yet. I asked him to think of Butrans for patients failing on tramadol instead of going directly to vicodin. He said ok. Gave him an initiation guide.
PPLPMDL0020000001	Cleveland	OH	44102	4/15/2011	I talked to dr at lunch today and dr said she didnt remember anything about Butrans.dr said she has a handful of pain patients that are taking vicodin and a lot of patients taking percocet.dr said Butrans once weekly dosing and transdermal delivery are the 2 benefits she see's for her patients, but she doesnt think a lot of her patients would be willing to stop their short-acting opioids and start Butrans.i showed dr Butrans fpi,initiation of therapy and maintenance of therapy sections and we discussed dr starting patients on Butrans,after proper tapering of vicodin or percocet,then initiating Butrans and if patients need to take their short-acting opioids they can,dr said she felt better knowing that as she thought patients had to stop their short-acting opioids completely if they were being started on Butrans.we discussed Butrans patient information booklet and dvd and dr said she will take 2 of them and think of 1 or 2 patients that would be willing to try Butrans.i told dr to think
PPLPMDL0020000001	Cleveland	OH	44113	4/15/2011	I talked to dr about patients she's started on Butrans recently and dr said these are all vicodin and percocet patients that were telling her their pain wasnt controlled with their short-acting medications so they wanted more pills and some have said they wanted to try something different,so dr started them on Butrans.i showed dr Butrans initiation guide,discussed proper tapering and initiation of Butrans 5mcg or 10mcg and asked dr to continue choosing Butrans as an option for patients she feels are appropriate,as discussed today.
PPLPMDL0020000001					

PPLPMDL0020000001	Cleveland	OH	44114	4/15/2011	i talked to John,PA,about recommending Butrans to dr katz and dr marshall,as John has told me he likes Butrans being a transdermal medication and dosed once a week.we talked about patients he feels are appropriate,low dose vicodin or percocet and John said dr marshall is starting patients that were on oral morphine,kadian,and tapering them down and starting on appropriate Butrans dose.i showed John Butrans initiation guide and how script should be written and John said yes thats how they are prescribing Butrans.i asked him to continue recommending Butrans and consider patients who are only taking 1 or 2 5mg vicodin or percocet and not waiting so long to consider Butrans as an option,John said okay
PPLPMDL0020000001	Parma	OH	44129	4/15/2011	Spoke with Heath & asked if they would be willing to fill a prescription for Butrans for fewer than 4 patches if they received a prescription written that way. He said that they do that frequently with Duragesic, so he sees no problem with being able to do that with anything else. He said he has not yet dispensed any Butrans, but thinks it seems like something physicians would prescribe. I told him that some physicians are writing for fewer than 4 to gauge that patient's proper starting dose so he may see prescriptions written that way. Also reminded him of e-voucher & OxyContin savings cards.
PPLPMDL0020000001	Parma	OH	44134	4/18/2011	Dr Scanlon said he has not prescribed Butrans yet & that he "has no excuse" as to why other than he "just has to remember it". I asked him how I could help him remember & showed him a demo patch so he could see & feel what Butrans is like. He said he liked the way it felt & that he was surprised how flexible the material is. I asked him how often he sees patients like the ones we have been talking about (ie taking around-the-clock Vicoden, Percocet, or tramadol for chronic pain) & he said he sees them "all the time". I asked what benefits he saw with Butrans. He said he likes that he could prescribe Butrans & could possibly avoid the patient getting "used" to taking a pill every few hours for pain. He said he will prescribe Butrans for a patient today. Reviewed managed care & savings cards & gave him OxyContin savings cards, reminding him of OxyContin for appropriate patients beyond Butrans 20mcg/hr. He repeated that he will prescribe Butrans today.
PPLPMDL0020000001	Fairlawn	OH	44333	4/18/2011	I asked Dr. Weidman why she had not written since the first patient she had tried on Butrans therapy. She had mentioned that she generally does not like to prescribe anything chronically but if the appropriate patient came in she would keep Butrans in mind.
PPLPMDL0020000001	Parma	OH	44134	4/18/2011	Re-introduced Dr George to Butrans. He said the patient he just saw came in wearing a Butrans from pain management! I asked what clinical feedback he got from her. He said she said she is having "zero pain" now & that she is very happy with her results. He said that patient had had multiple surgeries & as a result had a lot f pain. Reviewed appropriate patient type, dosing, CIII, & abuse/addiction potential. He asked about adverse events & if the patch could be manipulated for abuse. Reviewed FPI sections 6 & 11 & explained adhesive matrix, showing him a demo. Also reminded him that because Butrans is an opioid, there is abuse & addiction potential & he should be just as cautious in prescribing it as he is with other opioids. He asked how to write the prescription & I showed him the picture on the back of the sales aid. Reviewed managed care/savings cards. Dr George stopped Dr Scanlon in the hall to tell him about his patient who was having success with Butrans.
PPLPMDL0020000001	Mayfield Heights	OH	44124	4/18/2011	Window call....doc said patients are still liking Butrans and she has been focusing on those with private insurance. Thanked her for her support and gave her a Butrans formulary grid. She asked me to leave one with Denise as well. Provided same.
PPLPMDL0020000001	Fairlawn	OH	44333	4/18/2011	Reintroduced Butrans and asked what additional information I could provide to him that would make him feel confident enough to write his first Rx. He said it was just a matter of becoming confident enough to make the leap and prescribe his first Rx. He said that he likes the concept of Butrans and will continue to evaluate patients and their potential throughout the week.
PPLPMDL0020000001	Akron	OH	44333	4/18/2011	Asked Dr. Shah if he had tried Butrans for any opioid naive patients and he said he had. He asked about what he should do if a patient complains of Butrans not sticking and I explained that the patient could tape the edges with first aid tape. He told me he really likes Butrans therapy and patients are satisfied. I reminded him to focus on BWC patients and patients who have private insurance. He agreed.
PPLPMDL0020000001	Akron	OH	44313	4/18/2011	Introduced Butrans and FPI.
PPLPMDL0020000001	Parma Heights	OH	44129	4/18/2011	Spoke with Al & asked him if he would be willing to dispense fewer than 4 Butrans patches if he received a prescription written that day. He said he was not sure. I told him some area physicians are prescribing one single patch initially to ensure proper dosing for that patient before prescribing an entire month's supply. He agreed to do this. He asked if opening the box would compromise the integrity of the product at all. I told him that Purdue has no restrictions on opening a box to dispense fewer than 4 patches. I asked Al if he has dispense Butrans- He said he has once. I asked who wrote the prescription. He said he was not sure but that he would start keeping a list so that he could tell me at future visits. Also gave him online education for pharmacists flier. He said he has printed Butrans savings cards & still has some OxyContin cards.
PPLPMDL0020000001	Parma	OH	44129	4/18/2011	Quick call- Dr Gigliotti apologized & said he was running "way" behind & could not stop to talk today. I told him I would return another time to talk to him more about Butrans & went over the Butrans formulary grid with Jazz. She said she does reference formulary grids when Dr Gigliotti prescribes medications.
PPLPMDL0020000001	Akron	OH	44303	4/18/2011	Went over the FPI. Asked about movement and told Rod about the benefit of the co-pay cards.
PPLPMDL0020000001	Fairlawn	OH	44333	4/18/2011	Mentioned Butrans quickly through the window to Dr. Lefkowitz. Nothing new learned.
PPLPMDL0020000001	Mayfield Heights	OH	44124	4/18/2011	Spoke to Christy about the stocking and movement of Butrans. She did confirm stocking but she has not seen many scripts. She did fill a couple at the willoughby store. She asked about preferred application sites so I reveiued the proper application and sites. I also reveiued the indication and the positioning of Butrans.
PPLPMDL0020000001	Fairlawn	OH	44333	4/18/2011	I asked Dr. Oyakawa how often patients call in and ask to be titrated up or moved to higher doses on their Vicodin/ Percocet. He said it happens a couple times a week. I explained that patients who are calling in with those issues and are on lower doses of hydrocodone/percocet can be converted over to Butrans rather than moving them to a higher dose. He agreed to keep it in mind.
PPLPMDL0020000001	Parma	OH	44134	4/18/2011	Spoke with Allene & reviewed patient information booklet. I asked her how much patient counseling they do when a customer is filling a transdermal prescription for the first time. She said it depends on the person. She said usually the person will wait until they get home & then they call her on the phone to ask questions. I asked her if the booklet seemed like something she would be able to use for reference or to give out to patients & she said it did seem like a good tool to have on hand. Reviewed proper application, & discussed taping edges with first aid tape if it starts to loosen. Also gave her online education for pharmacists information.
PPLPMDL0020000001	Fairlawn	OH	44333	4/18/2011	Followed up with Dr. Lefton from a lunch I completed last week. I asked him if he had seen any potential Butrans patients or if he would see any patients this week that have been on SAO's for a long period of time. He said it was only Monday, suggesting he would see many patients throughout the week. I explained that patients on Low dose hydrocodone/percocet were ideal patients and reminded him of the benefit the co-pay cards have for patients with commercial insurance.
PPLPMDL0020000001	Akron	OH	44333	4/18/2011	I asked Becky if she had patients coming in this week that had a similar profile to the first patient she had initiated Butrans therapy to. She said that she would most likely see patients who were on low dose hydrocodone like the first Butrans patient was. I reminded her that this is the ideal type of patient to initiate therapy to and reminded her of the savings cards.
PPLPMDL0020000001	Bedford	OH	44146	4/18/2011	Dr Moufawad said he was running too far behind & was too busy to talk today. He said that "everything with Butrans is fine." I invited him to the upcoming dinner program in Cleveland. He said he was disappointed to see that an internist was the speaker because he wants to speak with "experts" in pain management. He checked his phone calendar & said he already has something that night so he will be unable to attend & then walked into a patient room.
PPLPMDL0020000001	Mayfield Hts	OH	44094	4/18/2011	Spoke with doc about the Butrans positioning and the 5 selling messages. He asked about the MOA. I read the MOA from the FPI. He said he read about Butrans and its seems to have a lot of warnings and risks. I showed him the AE's reported in the FPI. I explained that Butrans is still a CIII and has warnings similar to other opioids. He said he would not write this product because his patients mostly take meds PRN and he does not treat chronic pain. He would not use a patch. I asked him about Oxycontin and asked if he uses oxycontin as it is a LA. He said he prescribes oxycontin only in the hospitals. Gave him Butrans savings cards as the other doc in the office (podiatrist) expressed interest in it.
PPLPMDL0020000001	Parma	OH	44129	4/18/2011	Dr Ortega said that the two patients for whom he was thinking of switching to Butrans did not end up working out. He said the good thing about it was that thinking of Butrans & looking for patients to start on it has caused him to ask his patients more questions about how they are taking their current pain medication. He said he found out that one patient who he was going to put on Butrans was only taking his pain medications every few days. I agreed that this may not have been a Butrans patient. He said he continues to look for patients for whom it would be appropriate. I invited him to the Cleveland dinner program in May as he has been inquiring about Butrans programs. He confirmed with his calendar that he will be able to attend. He said he is excited to go to the program & to speak to other physicians about Butrans. Spoke with Cindy who said she is reminding Dr Ortega of Butrans & told him she thinks patients would be more compliant with their pain medication if it is transdermal.
PPLPMDL0020000001	Euclid	OH	44119	4/18/2011	I asked doc what concerns he has about prescribing Butrans for appropriate patients. He said he does not have any problems with it. He just has a lot of medicaid/medicare patients that cant get it. I asked him to try for patients with private insurance and give them a savings card.
PPLPMDL0020000001	Parma	OH	44129	4/18/2011	Spoke with Mary (MA) who said Dr Taylor was too busy to see me today. She said she does not think Dr Taylor has put anyone on "that patch". I asked her if she was the person to take phone calls from patients who are asking for an increase in their dose of medications like Vicoden, Percocet, or tramadol or calling too soon for a refill. Mary said she does take those calls. Reviewed managed care information, positioning, & savings cards. She said she would try to remind Dr Taylor.
PPLPMDL0020000001	Garfield Heights	OH	44125	4/19/2011	Dr Solomon said he remembers Andrea telling him about Butrans but he has not found the right patient so he has not written it yet. I asked him who, in his mind, was the ideal Butrans patient. He said an older patient with osteoarthritis. Reviewed the indication & told him that the patient he is thinking of sounds ideal clinically, but that managed care may be prohibitive for prescribing in patients with Medicare Part D. I asked him to think of commercially insured patients who are eligible for the savings cards. He agreed. Discussed positioning & appropriate patients. He said he was excited about Butrans when he first heard about it but then just forgot, so he is excited to be reminded & plans to use it, especially while in the Marymount office as he said he has more commercially insured patients there. Reviewed OxyContin for appropriate patients beyond Butrans 20mcg.
PPLPMDL0020000001	Solon	OH	44139	4/19/2011	Spoke with Julie, Dr Zaidi's nurse. She said that they have been scheduling more & more new patients & Oxy procedures, so they have changed their rep policy to only being able to see Dr Zaidi at scheduled lunches. She said she does not think that Dr Zaidi has prescribed Butrans yet. Reviewed indication & appropriate patient type/positioning. She agreed that he does have a lot of patients who fit the indication & profile. I mentioned the May dinner program in Cleveland & asked if I could speak to Dr Zaidi to invite him. She said he never goes to dinner programs but said I could leave information about it. I told her that because attendance is limited to only 20 physicians in all of Cleveland, I would not leave the information if he would not attend. Julie said she would write down the details & ask Dr Zaidi if he would go. She said she would call me if he is interested. She said they do not need any more OxyContin savings cards.
PPLPMDL0020000001	Independence	OH	44131	4/19/2011	I asked Dr Rob if he had seen any patients with a chronically painful condition so far this week & he said yes. I asked if he had considered Butrans & he said he had not thought of it. Reviewed appropriate patient type & asked if he would be interested in attending a dinner program. He said it is very difficult for him to make it to those. I told him I understood but that this program is limited to only 20 physicians in the entire Cleveland area & that it would be a good opportunity to learn more about Butrans from a physician & to speak with colleagues about it. He asked if he could have the invitation, so I gave him one. He handed it to Maria & asked her to see if he had anything scheduled that night. Maria said she would look later & I let her know I would follow up to see if he is available to attend.
PPLPMDL0020000001	Cleveland	OH	44103	4/19/2011	I talked to Hakeem,Pharmacist,about Butrans stocking and any scripts that have come in and Hakeem said he had 1 script of Butrans,doesn't remember doctor,but it was for a Medicaid patient and didnt get approved.we discussed Medicaid prior authorization requirements and commercial plan patients using Butrans patient savings cards.Hakeem said Dr Nickels patient called and was asking for the prices of all 3 dosage strengths for Butrans because Dr Nickels sat down with a group of patients and talked about Butrans with them and starting them on it,so Hakeem told this patient the prices of each one we discussed the fact that Butrans is probably not the best option for cash paying patients due to the cost of the dosage strengths,Hakeem agreed.we talked about OxyContin savings cards,as Hakeem wanted 2 packs,and i asked have the scripts increased/decreased? Hakeem said patients are taking more Opana Er,thats grown,since OxyContin reformulation,but he's still getting a lot of scripts.
PPLPMDL0020000001					

	Brooklyn	OH	44144	4/19/2011	Introduced Butrans to Dr Deeb delivering 5 core messages & discussing black box warning. Also reviewed appropriate patients/positioning & asked him to think of Butrans after an appropriate patient is no longer being well-controlled on NSAID's or COX-2's. I asked what his thoughts were on using a long-acting opioid for these patients in place of a short-acting around-the-clock oral opioid. He said he likes the idea of long-acting medications & that he would use it in these patients. Reviewed managed care & savings cards with him. Also discussed adverse events, supplemental analgesia & application. Presented initiation/titration guide & reviewed initiation of treatment in patients for whom Butrans is the first opioid & also those already taking opioids. Invited Dr Deeb to the program but he was unable to give me an answer. Positioned OxyContin as single-entity opioid for appropriate patients beyond Butrans 20mcg. Dr Deeb repeated Butrans dosing to me as I left, saying again he will Rx
PPLPMDL0020000001	Garfield Heights	OH	44125	4/19/2011	Introduced Butrans to Dalbir, the new physicians assistant in the pain management group at Marymount. He said he had read about Butrans but he did not remember a lot of the details & has not seen any patients on it so far. Reviewed 5 core messages & discussed CII & abuse/addiction potential. Discussed dosing, appropriate patients, & titration. Also reviewed managed care & savings cards. Spoke with Denise (Nurse, office manager) who said Dalbir just joined their practice & is now there 5 days per week. She said Dr Solomon will be leaving in July to move to Phoenix.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	4/19/2011	Quick call through the window. I asked Dr. Bick where she was specifically thinking about prescribing Butrans and she said she was considering it in place of hydrocodone. I reminded her that an opioid naive patient would need to start at 5 mcg.
PPLPMDL0020000001	Akron	OH	44310	4/19/2011	I spoke with Char and asked her what type of patients Dr. Cremer was initiating Butrans therapy to. She replied that they most patients were opioid experienced. Dr. Cremer came out and asked about coverage at which point I discussed the saving cards and coverage on BWC.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	4/19/2011	I asked the pharmacist if they had considering stocking Butrans yet? I explained that it is starting to move now that I had been out talking about it. They said they do not generally stock products until a Rx comes through. I went over the patient education guide.
PPLPMDL0020000001	Woodmere	OH	44122	4/19/2011	Spoke with pharmacist, Marc who said they have not ordered Butrans yet & have not seen a prescription yet. He said they probably won't order it until they start seeing prescriptions. Discussed e-voucher & OxyContin savings cards & reviewed patient information booklet for Butrans patient counsel.
PPLPMDL0020000001	Akron	OH	44310	4/19/2011	I asked Dr. Janolo if he thought there was a benefit to offering his patients Butrans therapy and he said he thought there was but still has not seen "the right patient" I asked what type of patient he thought he would prescribe Butrans for and he said a patient on low dose hydrocodone. I asked if he had any patients coming in this week and he said he would keep it in mind if so.
PPLPMDL0020000001	Garfield Heights	OH	44125	4/19/2011	Spoke with Heather (pharmacist) who said they do have one customer on Butrans. Reviewed savings program & let her know that she could go online to Butrans.com to print savings cards for patients. She made a note & said she would post it for the other pharmacists to see as well. Also gave her online pharmacist education flier.
PPLPMDL0020000001	Mayfield Hts	OH	44124	4/19/2011	Window call....Reviewed the Butrans patient positioning. Gave doc a formulary grid and a sell sheet on the savings cards. He agreed that he has anthem, medical mutual, etc. I asked him to prescribe for commercial patients and give them a savings card. He said ok and that he is trying to write Butrans.
PPLPMDL0020000001	C. Falls	OH	44223	4/19/2011	Larry ordered all 3 strengths of Butrans. Spoke with both Cindy and Larry who told me that Dr. Sable has written. I went over the patient application guides with them and explained application and disposal.
PPLPMDL0020000001	Cleveland	OH	44106	4/19/2011	I talked to Mana, Floater Pharmacist, he is at W. 25th/Clark normally, about Butrans stocking, Butrans 5mcg and 10mcg are here, Mana has only been here today and couldn't look up who is writing Butrans. Mana said the issue at Rite Aid is that they are getting scripts for Butrans but cant open the cartons to dispense anything less than 4 Butrans, because of a corporate Rite Aid Policy. Mana said he and the 2 other pharmacists at W. 25th/Clark shared this information with their district manager Tim and they haven't heard any updates. I told Mana that I gave this information to my manager and he shared it with our corporate office and we are still waiting for any updates too. I gave Mana Butrans patient information booklets, medication guides and initiation guide.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	4/19/2011	Had just seconds as he walked by. I thanked him for writing Butrans and asked what his thoughts were on the therapy so far. Nothing new learned.
PPLPMDL0020000001	Cleveland	OH	44106	4/19/2011	I talked to Ron Cowan, Pharmacy Manager Drug Services for In-Patient at hospital about Butrans being considered for hospital formulary. Ron said the patient population is mainly acute pain, except for ambulatory, so Butrans being indicated for chronic pain would work in the hospital. Ron said this is an office based medication. I asked Ron if he would value any certified medical education and he said yes just to bring in a catalog and he will look
PPLPMDL0020000001	Lyndhurst	OH	44124	4/19/2011	Doc said that she tried Butrans for 2 male patients at 5mcg and the 5mcg was worthless and did not work. She has titrated them to 10mcg and they seem to like that. I asked what they were on prior to Butrans. She said they were on vicodin ES - about six tabs/day. I explained that the recommendation is to taper those patients down then initiate at the 10mcg. I explained that 5mcg is more for opioid naive or low dose short acting patients. I reviewed the formulary grid for Butrans and oxycontin. Provided more savings cards.
PPLPMDL0020000001	Cleveland	OH	44106	4/19/2011	I talked to dr about patients he's started on Butrans and why he's chosen Butrans. dr talked about 1 patient who's had chronic pain for years, has tried every opioid and nothing has worked, dr tried Butrans and patients having success with Butrans. dr said he thinks Butrans is a good option for patients taking too much Percocet, exceeding tylenol limit. we discussed initiation and titration of Butrans, showed Butrans initiation guide, discussed managed care coverage and invited dr to Butrans speaker program in May 2011.
PPLPMDL0020000001	Cleveland	OH	44106	4/19/2011	I talked to dr about what he told me he liked about Butrans: once weekly dosing and transdermal delivery and Butrans being a CII and I asked dr what the disconnect was or what information did he need from me as he stated that he hasn't started anyone on Butrans? dr asked what was the insurance coverage because he has a lot of Medicaid? we discussed insurance coverage for medicaid and commercial plan patients that can use Butrans patient savings cards. dr asked if he could start patients on Butrans but also give tramadol? I told dr yes he can and showed Butrans initiation guide, discussed proper tapering of short-acting opioids and initiation of Butrans. dr said ok he would try Butrans in some patients and told me to talk to Lisa, Patient care coordinator, about prior authorization requirements for medicaid patients.
PPLPMDL0020000001	Cleveland	OH	44113	4/19/2011	I talked to Justin, Pharmacist, about Butrans stocking and they have all 3 dosage strengths of Butrans but have only seen 2 scripts from Dr. Bohl and Dr. Shen. we talked about Butrans patient savings cards for commercial plan patients and gave Butrans formulary grid. I asked Justin if patients had any questions about Butrans application when they got scripts filled? Justin said no. I asked Justin if Butrans patient information booklets would be an educational tool that he would value? Justin said yes and I left 3 booklets. Justin asked for more OxyContin savings cards, left 1 pack.
PPLPMDL0020000001	Independence	OH	44131	4/19/2011	Dr Jack stopped in the hallway & apologized again, saying that he had not thought of Butrans still. I asked him if he would be interested in seeing what Butrans looked like & he said he was. I showed him a demo patch & discussed adhesive matrix, dosing, & application once-a-week. He spent a few moments feeling the demo & said he liked how it felt & that seeing it may be what he needed to help him remember Butrans for patients. I told him he may even have a potential appropriate Butrans patient in an exam room or waiting room right now.
PPLPMDL0020000001	Akron	OH	44310	4/19/2011	When I walked in Dr. Schukay informed me that he had not yet initiated Butrans therapy. I asked him what and he said that he is still interested in learning more about it. I asked him what additional questions he had that I could answer to make him feel more confident and he said he wanted to read through the material on his own. I asked if he would read it and if I could follow up next Tuesday and he agreed.
PPLPMDL0020000001	Lyndhurst	OH	44124	4/19/2011	Karen asked about which dose to initiate Butrans at. I explained that the recommendation is to taper those patients down from higher doses of short acting opioids then initiate at the 10mcg. I explained that 5mcg is more for opioid naive or low dose short acting patients. I reviewed the formulary grid for Butrans and oxycontin. <font color=blue><b>CHUDAKOB's query on 04/28/2011</b></font>Did you ask her which group of patients she is most likely to prescribe Butrans for? When she responds, that should be the patient type you focus on. The goal is to keep it simple. <font color=green><b>SIMERTOC's response on 05/06/2011</b></font><b>I knew from previous conversations she would use for opioid experienced</b><font color=blue><b>CHUDAKOB added notes on 05/08/2011</b></font><b>Jst because she said it previous, does not mean it should not be reinforced.</b>
PPLPMDL0020000001	Independence	OH	44131	4/19/2011	Dr Sundaram was standing with a resident who was working with him when I came in. Dr Sundaram asked me to tell the resident about Butrans, so I reviewed with him indication, dosing, positioning, CII, & abuse/addiction potential. Dr Sundaram said that one "problem" is that patients don't want to "give up" their Percocet. I told him that is why we would ideally like him to think of Butrans before prescribing Percocet & added that Butrans is still an opioid & therefore is still potentially addictive/abusable. The resident asked Dr Sundaram if Butrans is like fentanyl. Dr Sundaram said that fentanyl is "stronger" than Butrans. I told the resident that we do not have comparative data, that fentanyl patients were excluded from our studies & that we would like physicians to keep the more "moderate" side of pain in mind for Butrans patients. Dr Sundaram said that he has thought of specific patients but has not seen them yet but added that he is now thinking of additional patients to start
PPLPMDL0020000001	Akron	OH	44319	4/19/2011	Introduced Butrans and FPI. Dr gave me ample time and asked a lot of buying questions including where to dose Butrans. I asked him about his chronic pain patients and most of them are already on SAO's. I went over the initiation guide and explained coverage.
PPLPMDL0020000001	Garfield Hts	OH	44125	4/20/2011	Spoke with MA Amy who said that due to their transition to electronic medical records this month, they are not seeing any pharmaceutical reps in the month of April. She said I could try back again some time in May.
PPLPMDL0020000001	Brooklyn	OH	44144	4/20/2011	Reminded her of Butrans dosing & appropriate patient type & asked her to give Dr Kline an initiation guide as a reminder- she agreed to do this.
PPLPMDL0020000001	Brooklyn	OH	44144	4/20/2011	Spoke with Matthew (pharmacist) & reviewed Butrans REMS packet with him. He said he has dispensed one Butrans prescription. I asked who wrote it & he said he had no idea. Reviewed indication & appropriate patient type as well as e-voucher/savings program. Also gave him pharmacist online education flier which he said he really appreciated.
PPLPMDL0020000001	Bedford	OH	44146	4/20/2011	Quick call- Showed Dr Miguel the Butrans formulary grid & hung it in his sample closet for reference. Also Butrans appropriate patient & OxyContin savings cards reminders.
PPLPMDL0020000001				4/20/2011	Dr Haddad said he still has not had any patient feedback regarding Butrans. I asked him if he is still considering it for appropriate patients & he said he is. I asked if he would use it after NSAID's or COX-2's are no longer controlling pain & he said he will as long as the patient has the right insurance. Reminder of commercial coverage. He said he is using it now in BWC patients. Invited him to May dinner program & let him know attendance was limited to 20 physicians. He said he thinks he can go. Told him I need a firm answer so he said to stop back to check with him as he must consult his calendar & his kids' schedules. He said he would be interested in discussing using Butrans with experts & other physicians. Also reminder for OxyContin as an option for appropriate patients beyond Butrans 20mcg.
PPLPMDL0020000001	Akron	OH	44320	4/20/2011	Dr. Bonyo just returned from Kenya and gave me a quick minute to re-introduce Butrans. Went over Butrans via the FPI and asked him if he saw a benefit in a LAO that provides 7 day analgesia. He said he would keep it in
PPLPMDL0020000001	Cleveland	OH	44113	4/20/2011	worked pain management dept-dale novak, pa and dr shen, see call notes
PPLPMDL0020000001	Parma	OH	44129	4/20/2011	Spoke with Debbie (MA) who said Dr Chagin could not talk today as he was already very behind. Discussed Butrans & managed care with her & reviewed savings cards/eligibility. She said she has not seen him prescribe it yet, but may have just forgotten. I asked her to give him an initiation guide as a reminder which she said she would do. Also worked with her to schedule first available lunch appointment.
PPLPMDL0020000001	Parma	OH	44134	4/20/2011	Spoke with Stephanie & asked if they had Butrans in stock. She said that they have not ordered it yet, but she has fielded several phone calls from patients & offices asking if they carry it. I asked her what it will take for them to order it, considering they are getting phone calls requesting it, which indicates that physicians are prescribing it & they may be losing out on business to pharmacies who have it on their shelves. She said they have to see an actual prescription before ordering it. Reviewed savings program & also gave her online education information for pharmacists.
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	4/20/2011	I asked Dr. DiLauro is she feels confident initiating therapy for patients who are opioid naive, so instead of prescribing Vicodin would she prescribe Butrans? She said she would in chronic circumstances. She said that the patients she has on Butrans are responding well.
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	4/20/2011	I helped Dr. DiLauro identify a patient to initiate Butrans therapy to. She said that she would try it on 2 patients and would focus on both opioid naive and opioid experienced patients. I reminded her of the saving cards benefit and told her I would come back for follow up next week.
PPLPMDL0020000001	Cleveland	OH	44113	4/20/2011	I asked dr what he re-called about Butrans? dr said not much and asked me to explain what Butrans was again, so we discussed 5 core Butrans messages, showed Butrans initiation guide and dr said he writes a lot of tramadol and would consider Butrans but I need to continue talking to him about it so he remembers. dr asked me to share more information with him at lunch next week, on Butrans and we can talk longer about it. dr asked about Ryzolt and wanted more savings cards and said he likes the once daily dosing option of Ryzolt and will continue to prescribe Ryzolt for patients.
PPLPMDL0020000001	Cleveland	OH	44113	4/20/2011	I talked to dr about considering Butrans as an option for those patients taking tramadol, instead of increasing tramadol dose or dosing interval, and showed dr Butrans initiation guide. dr said that was a good point and she hadn't thought about her tramadol patients, to convert them to Butrans, but will consider that option. dr said patients are doing well on Butrans that she's started and no insurance issues with BWC or commercial plans.

PPLPMDL0020000001	Cleveland	OH	44113	4/20/2011	i talked to Laura,NP,about any patients she has considered to start on Butrans and Laura said she doesnt have the time to talk to patients about a new medication,she expressed her frustration about having too many patients booked and said she is sticking with the tried and true and said she was just being honest with me.Laura said i should talk to Dr.Nickels as she doesnt know if he has any patients in mind but she thinks he is doing something with Butrans.
PPLPMDL0020000001	Cleveland	OH	44102	4/20/2011	i talked to dr about Butrans being an option for his patients that he feels are ready to be converted from Vicodin or Percocet, to Butrans,instead of increasing Vicodin.we discussed proper tapering of short-acting opioids and initiation of Butrans and i showed dr Butrans initiation guide.dr said he's trying to taper all of his patients down on their current dose of opiates.invited dr to dinner program in May 2011 and dr said he'll think about it as he normally doesnt attend these dinners.
PPLPMDL0020000001	Brooklyn	OH	44144	4/20/2011	Quick call- Dr Detwiler said he was way behind & had no time at all to talk to me & asked what i "had" for him today. I told him that I knew he was concerned with managed care & keeping out-of-pocket expenses for patients at a minimum so I wanted to share with him our Butrans formulary grid, showing access for commercial patients & that I had also brought a demo patch of Butrans to show him because I thought he might be interested to see it. He stopped & reviewed the formulary grid & I reminded him that commercially insured patients who use the savings cards in his closet will pay only \$15 for a co-pay. He said that sounded reasonable. I also pointed out the OxyContin savings cards. I showed him the Butrans demo patch & he felt it & said that it seemed "nice" & "thin" & that the adhesive seemed "effective" then he walked into his patient room.
PPLPMDL0020000001	Parma	OH	44134	4/20/2011	Dr Hernandez said he continues to gain experience with Butrans & is very happy with the results his patients are getting. He also said he is very interested to speak with other physicians who are prescribing Butrans to talk to them about how he is using it & how they are using it. I invited him to the May dinner program. He said he may not attend since his wife & son (who both work in his office) cannot attend. I explained the limited space/attendance & policy but also told him that this would be a great opportunity for him to speak with other physicians who are prescribing Butrans-He said he might consider. He said he would like to speak to someone using Butrans + Suboxone in patients. I told him this has not been studied & is not recommended. He requested to be a Butrans speaker again & I told him his name has been submitted. Discussed OxyContin for patients beyond Butrans 20mcg.Recommended Senokot-S for opioid-induced constipation.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	4/20/2011	Spoke with Brad, Barry and Pat. Reviewed the patient education guide and went over application and disposal. Reminded them that steady state was not reached for 72 hours. Brad checked and said that Dr. DiLauro was writing. He also said the pharmacy participates in relay health so patients can get the benefit of the savings cards without having a coupon.
PPLPMDL0020000001	Cleveland	OH	44113	4/20/2011	I asked Dale,PA,if he would ever consider Butrans as an option for those patients taking tramadol,but arent controlled and are requesting something else? Dale said he hadnt thought about that,but that made sense to try Butrans in those patients.we talked about Butrans being an option earlier in therapy, so right after tramadol isnt working for patients,instead of prescribing Vicodin.Dale said he would consider that and i showed Dale Butrans initiation guide and we discussed proper tapering and initiation of Butrans.we discussed BWC and commercial plan coverage for Butrans and Dale said they havent had any issues and all is working out with the insurance and patients getting Butrans.
PPLPMDL0020000001	Parma	OH	44134	4/20/2011	Spoke with another floater pharmacist at this location. She said she did not think that they could "break" a carton of any product to dispense fewer than the whole container. I let her know that it is not a Purdue policy & that some physicians are prescribing one patch initially for a patient to determine correct starting dose & then will prescribe for a month once the proper dose is determined. She said they cannot dispense it this way to her knowledge. Reminder of e-voucher & OxyContin savings cards & also gave her online pharmacist education information & asked her to post for the other pharmacists as well.
PPLPMDL0020000001	Shaker Heights	OH	44122	4/21/2011	Quick call- Reviewed Butrans REMS packet with Dr Agarwal & also showed him a demo patch. He said he had forgotten about Butrans. Positioned Butrans for appropriate patients fitting the indication for whom he may typically prescribe tramadol around-the-clock.
PPLPMDL0020000001	Cleveland	OH	44130	4/21/2011	Spoke with Kim & Jen (MA's) & discussed Butrans indication, dosing, & appropriate patient type. They said Dr Lash only meets with reps on Thursday 1PM appointments & is booked until December. I asked if I could do a breakfast or lunch sooner since I have only spoken with him about Butrans one time, so they took my information back to Dr Lash to request this. Worked with them to schedule breakfast so I could access Dr Lash as soon as possible. They said Butrans sounded like something he would be interested given his patient population & types of pain medications he prescribes now.
PPLPMDL0020000001	Akron	OH	44333	4/21/2011	Completely re-introduced Butrans. She was sold on the concept and committed to writing for all appropriate patients who were asking to be titrated on their current SAO's. Reminded her that when patients were past the point of Butrans that OxyContin is an option for her patients.
PPLPMDL0020000001	Cleveland	OH	44195	4/21/2011	I talked to Janet,Pharmacy Manager,briefly about Butrans stocking and she said that they have Butrans 10mcg and 20mcg but arent seeing any scripts. I talked to Janet about the physicians i am working with on Butrans and showed her the Butrans initiation guide to discuss where Butrans is appropriate and my focus being more moderate pain so that could be why she's not seeing any scripts yet,being that many of the cancer pain patients are in severe pain and already taking other long-acting opioids.Janet said she appreciated me sharing the information and asked me to follow-up next month
PPLPMDL0020000001	Cleveland	OH	44195	4/21/2011	worked pain management, chronic pain dept's and pharmacies
PPLPMDL0020000001	Cleveland	OH	44130	4/21/2011	Stopped Dr Diab from walking past me in the hallway by asking him how he felt about attending a Butrans dinner discussion next month. He asked me to put the invitation on his desk & that he would "think about it".
PPLPMDL0020000001	Cleveland	OH	44130	4/21/2011	Reminded him of \$15 co-pay for commercially insured patients using the savings cards i had given him.Also spoke with Dina (MA) to discuss commercial insurance coverage & posted formulary grid near savings cards.
PPLPMDL0020000001	Cleveland	OH	44130	4/21/2011	Dr Fedorko said he has "a few" patients that he has prescribed Butrans for. I asked him what types of patients he has prescribed it for. He said one of them is in the hospital for leukemia now & is not getting his Butrans. He said he thought he had a few more but could not think of them. I asked Dr Fedorko his thoughts on prescribing Butrans once weekly for patients who fit the indication taking Vicodin around-the-clock. He said he likes that idea & asked about insurance coverage/cost. Reviewed formulary grid & stressed commercially insured patients & the savings cards for eligible patients so they would have a \$15 co-pay. He said that was a good price & he would look for more patients for Butrans. Also recommended Senokot-S for opioid-induced constipation.
PPLPMDL0020000001	Cleveland	OH	44113	4/21/2011	i asked dr if she would consider Butrans right after her tramadol patients complained to her,after that first dose,that it wasnt working? dr said probably not,she would increase dosage strength,then go to vicodin and start with 5mg,i asked why? dr said thats how she was trained and has been doing this for years.i asked dr if she saw benefits in Butrans for her patients? dr said yes,some patients dont like taking pills so a patch would be a good option and there are some patients who tell her they want to try something different,after tramadol isnt working anymore,so i asked dr if she could consider Butrans for a couple of those patients? dr said yes,she will do that,i showed Butrans initiation guide for the discussion and we talked about Tricare,BWC and commercial plan coverage for Butrans.
PPLPMDL0020000001	Cleveland	OH	44113	4/21/2011	i talked to dr about her patients taking tramadol that are telling her their pain isnt controlled and asked if he would consider a long-acting opioid right after that first dose of tramadol doesnt work? dr said usually not but she likes once weekly dosing option of Butrans and the fact that Butrans is transdermal and a CII,dr said the fact Butrans is a CII makes it easier on her staff so they can call in refills.i asked dr to consider patients taking less than 300mg of tramadol to start on Butrans 5mcg,showed dr Butrans initiation guide for the discussion,discussed Butrans application dvd/patient information booklet.we discussed formulary coverage for commercial plans and
PPLPMDL0020000001	Barberton	OH	44203	4/21/2011	I asked Dr. Patel if his patients on Butrans were satisfied with their current therapy and he said they were. I asked him if he had additional patients coming in this week that had similar profiles and he said maybe. I reminded him were to start patients according to the initiation guide since he started all his patients on 5 mcgs.
PPLPMDL0020000001	Akron	OH	44333	4/21/2011	Re-introduced Butrans and the FPI. I went over patient types and he told me that almost all his patients are already on opioids so I explained the initiation guide so he would understand where it is best appropriate to start
PPLPMDL0020000001	Cleveland	OH	44195	4/21/2011	i talked to Cynthia,Pharmacist,about Butrans stocking and if she's seen any scripts.Cynthia said she didnt have any Butrans in stock here and i needed to talk to David,Pharmacy Manager,about Butrans and show him Butrans initiation guide but he wasnt in today.Cynthia hasnt seen any scripts for Butrans but said she thinks Butrans being transdermal and once weekly dosing is a great option for those patients who arent controlled on their short-acting opioids.we talked about insurance coverage for Butrans,commercially insured patients using Butrans patient savings cards and BWC coverage for Butrans.we talked about OxyContin formulary coverage on Medicaid,Medicare and commercial plans and OxyContin 7 tablets available for flexibility in titration.
PPLPMDL0020000001	Cleveland	OH	44195	4/21/2011	i talked to dr about the patients he's starting on Butrans and asked dr why he's choosing Butrans? dr said the couple of patients he's started are taking Vicodin or Percocet but not controlled as they are calling in to office earlier every month and telling him their short-acting opioids arent lasting long enough so dr said he thought Butrans would be a good option to see if Butrans could work for them.dr said he's not heard any complaints and patients seem to be doing well so he's happy.we talked about Butrans patient information booklet and application dvd and dr said to leave a few more with him and we discussed commercially insured patients using the Butrans patient savings cards.we talked about OxyContin being an option,after Butrans 20mcg,as there are 7 tablet strengths to allow for flexibility in titration and we talked about the formulary coverage of OxyContin for Medicaid,medicare and commercial plans.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44195	4/21/2011	i talked to dr about why he hasnt started any patients on Butrans yet and dr said he just hasnt thought about Butrans for his patients.i asked dr what benefits he saw in Butrans for his patients? dr said he likes that Butrans is transdermal and once weekly dosing,but isnt sure patients will want to stop taking their short-acting opioids.we talked about dr considering Butrans for those patients taking percocet that are calling in sooner for refills so proper a long-acting opioid would be appropriate or they are telling him in their appointments that their percocet isnt lasting long enough and asking for something different.we looked at Butrans initiation guide,discussed proper tapering and initiation of Butrans and dr said he'll think of a few patients to try Butrans in and let me know.we talked about OxyContin being an option for those patients,that are taking 80mg or more of oral morphine equivalent,7 tablet strengths for flexibility in titration and formulary coverage discussion
PPLPMDL0020000001	Cleveland	OH	44195	4/21/2011	i talked to Anne,NP,about considering Butrans right after patients initial dose of tramadol isnt working.Anne said she hadnt thought of Butrans there as she was thinking of patients taking 4 tabs of Vicodin or percocet,so more on the higher end of dosing.we talked about her tramadol patients taking less than 300mg a day and considering Butrans there for those patients,looking at Butrans initiation guide. Anne said she'll think about some patients and see if patients would be willing to try Butrans. I recommended Senokot-S
PPLPMDL0020000001	Independence	OH	44131	4/21/2011	Roman said he did actually try Butrans 5mcg on a patient & the patient said he "didn't like it because it didn't work". Roman said this is why he wants to talk to other practitioners & experts about how to use Butrans properly. He said that the information that I, as a representative, can give him is limited due to needing to stay on label. I agreed that the information I have is on-label & that I still may be able to answer questions he may have if he specifies what he needs to know. I gave him the dinner invitation for the May program & explained the format, including that this would be an on-label discussion amongst practitioners. He asked if the others in attendance will be people who have experience prescribing Butrans & I told him that many of them will be. He asked me to register him for the program & said he would definitely be there & that once he is comfortable with Butrans, he may be prescribing it for a lot of patients, just as he does with OxyContin.
PPLPMDL0020000001	Westlake	OH	44145	4/21/2011	The Dr asked me about who the speaker was for the upcoming peer last time we spoke and I gave him the speaker bio info. He still is not sure if he will be able to come to the dinner but will let me know. He still has not heard anything back from P&T for Butrans and he will keep me posted. I presented the managed care info for Butrans and he said that Tina would find it helpful. He asked for more Butrans savigns cards and said that patients have really been liking it.
PPLPMDL0020000001	Cleveland	OH	44195	4/21/2011	dr and i talked about Butrans as an option for those patients where dr has decided he's not going to give them more pills,if patients are telling him their short-acting opioids arent lasting long enough.dr said he really is trying to get his patients off opioids but could see Butrans as an option for a couple patients.dr said he'll take Butrans initiation guide and will think about it and said he appreciated the information.i told dr to think of commercial plan patients for Butrans so they can use Butrans patient savings cards.
PPLPMDL0020000001	Independence	OH	44131	4/21/2011	Spoke with Diana (MA) who said Dr Keppler was unavailable to speak with me as he was busy seeing patients. Discussed Butrans indication, dosing, & positioning. She said she was not sure if he had started anyone on it yet or not but she remembers me talking to him at lunch. She said she would give him my information & remind him about Butrans as an option & said she would put me on a lunch cancellation list to try to get me in to see Dr Keppler before my next lunch.
PPLPMDL0020000001					

PPLPMDL0020000001	Cleveland	OH	44195	4/21/2011	i talked to Kathy,PA,about Butrans being an option for those patients taking tramadol around the clock,that perhaps are telling her that their short-acting tramadol isnt lasting long enough or they are calling in sooner every month for refills.Kathy said that was a good idea and she hasnt thought about those patients,she's only been thinking of patients taking Vicodin or Percocet and patients taking 4 tabs a day of short-acting medication.we talked about patients taking less than 300mg of tramadol and the starting dose of Butrans being 5mcg.i told Kathy if she has patients taking 300-400mg of tramadol and wants to start them on Butrans,she can but she has to be sure to taper the dose to 300mg tramadol and then she can initiate Butrans 10mcg.Kathy said she'll think of a few patients to talk to about Butrans. i recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44195	4/21/2011	i talked to dr about her patients taking tramadol that arent controlled and calling in sooner each month for refills or telling her that their short-acting tramadol isnt lasting long enough and considering Butrans as an option,showed dr Butrans initiation guide and dr said that makes sense and she would consider that option. we talked about Butrans patient savings cards for commercial insurance and BWC patients. we talked about OxyContin being an option for patients when they are at 80mg or more of oral morphine equivalent,with 7 tablet strengths and we discussed managed care coverage for OxyContin.dr said she rarely prescribes OxyContin but appreciated information.i recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44130	4/21/2011	Spoke with Dawn (pharmacist) & asked if she had Butrans in stock. She said that she has not ordered it yet, but that she has received phone calls inquiring if they have it. I asked her if she would order based on the interest in Butrans given the phone calls requesting it. She said she would wait until she receives an actual prescription & that she can get it next day. I told her that next day is standard in pharmacies & that usually patients will not wait, but rather will just go to a pharmacy who has it in stock. She said she will wait but does think Butrans will "catch on" as she believes it is a good concept & would be ideal for some patients. Reviewed patient information booklet & offered OxyContin savings cards but she said she did not need any. Also gave her online pharmacist education flier which she said she appreciated.
PPLPMDL0020000001	Chagrin Falls	OH	44023	4/22/2011	Spoke briefly with Ben & reviewed Butrans dosing & appropriate patient type. Discussed titration every 3 days up to a maximum of 20mcg/hr system if necessary. Also discussed the ability to visit Butrans.com to print savings cards & offered OxyContin savings cards but he said they have enough.
PPLPMDL0020000001	Beachwood	OH	44122	4/22/2011	Dr Warren said he has not prescribed Butrans yet. Reviewed indication, dosing, & appropriate patient type with him. He said he has never been a prescriber of Duragesic. Presented initiation/titration guide to help show positioning & reminded him that patients on fentanyl were excluded from our studies. Showed him pg 6 of guide & discussed appropriate patient type. I asked him if this helped make better sense of where he would position it & he said yes. I pointed to the table on pg 6 & asked him which range more of his patients fell in (<30mg morphine, 30-80mg, or >80mg) & he said he likes to keep them on the lowest end possible. He said he thought Butrans sounded like a good option to help get patients off around-the-clock oral opioids-reminded him that Butrans is an opioid & carries abuse/addiction potential. He said he would try some patients on it who ask for refills of Vicodin too soon. Reviewed managed care & savings cards with him & Donnie (nurse) & reviewed OxyContin savings
PPLPMDL0020000001	Parma	OH	44129	4/22/2011	Quick call- Showed Jen Butrans demo in hopes to get her to stop before going into a room. She said she was trying to hurry as she is getting ready to leave for vacation & didn't have time to talk. Quick reminder for Ryzolt Value Cards. Spent time with Dawn & Karen, reviewing Butrans appropriate patient type & also reviewed Ryzolt Value Cards. Dawn said Jen has been prescribing Ryzolt more frequently but because they see mostly Worker's Comp patients, they do not need more cards yet. I asked Dawn if she had had any additional Ryzolt managed care pushback since our last discussion. She said she has not had any more troubles with it & that the ones that had been denied were probably from BWC Self-pay.
PPLPMDL0020000001	Akron	OH	44333	4/22/2011	I reintroduced Butrans to Dr. Ahmad and had a chance to cover most of the FPI with him. I asked him which type of patients he would Butrans in and he said most likely an opioid naive patient, so I went over the 5 mcg dosing. I also mentioned that if had patients who were coming from PCP and had been on SAO's for a long period of time Butrans may be an appropriate option for those patients. He said he had many of these patients which prompted me to cover dosing in these patients as well. He committed to starting 2 patients in the following week.
PPLPMDL0020000001	cleveland	OH	44135	4/22/2011	Quick call. Dr was on his way downstairs for procedures. He said that he would like to write Butrans more often, but so many of his patients are Medicaid and med D. I reviewed the formulary grid and asked him to concentrate on commercial insurance for Butrans and give a savings card. I reminded him that OxyContin has coverage for Medicare and Medicaid patients.
PPLPMDL0020000001	Beachwood	OH	44122	4/22/2011	Spoke with Alan who said he has seen a few more Butrans prescriptions since my last visit. He said he has still not heard any patient feedback, positive nor negative, which he says is a good sign because people typically call to complain if they do not like something. Discussed patient counsel & gave him patient information booklet. Also reviewed OxyContin savings cards & gave him online pharmacist education flier.
PPLPMDL0020000001	Cleveland	OH	44135	4/22/2011	Quick call, I asked Dr where Butrans was fitting into his practice. He said he doesn't know yet, but will give it a try. I reviewed the managed care info for Butrans with Randy, his nurse.
PPLPMDL0020000001	Parma	OH	44129	4/22/2011	Spoke with Laurie (pharmacist) who said they have not yet dispensed any Butrans. Discussed opening a carton if they get a prescription for fewer than 4 patches. I let her know that some physicians are doing this & that Jackie (pharmacy manager) agreed to open boxes if they see a script like this. Also reviewed patient counsel information & booklet & discussed application/rotation. Reminder for OxyContin savings cards for eligible customers & gave Laurie online pharmacist education flier.
PPLPMDL0020000001	Beachwood	OH	44122	4/22/2011	Quick call- Dr Tabbaa said he continues to try patients on Butrans. He mentioned that he has had to titrate a patient from 5mcg to 10mcg. Reviewed titration every 3 days to a maximum of 20mcg/hr. Also reminded him to keep commercially insured patients in mind for the least managed care resistance & so that eligible patients could take advantage of savings cards & pay \$15 co-pay. Reminder for OxyContin for patients beyond Butrans 20mcg/hr. Also invited him to May program- Jim said to check back to see if Dr Tabbaa will be able to go. Spent time with Jim reviewing managed care, savings cards, & dosing. Jim said they just prescribed Butrans for a
PPLPMDL0020000001	Cleveland	OH	44125	4/22/2011	Spoke with Christopher (pharmacist) & asked his thoughts on opening a box of Butrans to dispense fewer than 4 patches in the event they get a prescription written that way. He said he was not certain how this would be handled, but did not think it would be a problem. He said they always try to accommodate whatever the physician thinks is best for the patient. I explained that some physicians are prescribing one or two patches initially for a patient to ensure correct dosing. Christopher said this makes sense. Offered more OxyContin savings cards but he said they have enough for now. Also gave him online pharmacist education flier.
PPLPMDL0020000001	Garfield Hts	OH	44125	4/22/2011	Quick call- Butrans positioning message with Dr Sadowski in the hallway. Dina said he has been rushing around to get done with his office obligations as quickly as possible today. She said she will do her best to continue to remind Dr Sadowski about Butrans when she sees an opportunity for it. She said that the lunch I have with Dr Sadowski next week will give me more time to speak with him about how Butrans will fit into his practice.
PPLPMDL0020000001	Akron	OH	44333	4/25/2011	Dr. Griffiths said that she prescribed Butrans for 2 patients but said she was not sure if she was prescribing to the right patients. She told me both patients were moderate and on low dose hydrocodone and doing well. I explained that was the appropriate patients to start on Butrans therapy.
PPLPMDL0020000001	Lakewood	OH	44107	4/25/2011	I asked if he would prescribe Butrans for the next appropriate patient who 3-4 5mg vicodin is not controlling their pain. He said he would, but just forgot. We reviewed the dosing and initiation guide. I reminded him about OxyContin as an option when Butrans may not provide adequate analgesia. He said many of his patients fall into this category.
PPLPMDL0020000001	Parma	OH	44129	4/25/2011	Dr Roheny said he has not received any feedback from the patient who he prescribed Butrans for. I handed him a program invitation & asked if he would like to attend, but he said probably not. Also showed him a demo patch. He spent some time feeling the system & checking the adhesive. He said he liked the way it felt & that it seemed like it would stick for the full 7 days. Reviewed appropriate patient type & managed care/savings cards. Dr Roheny agreed that \$15 co-pay for many patients was reasonable. He asked Kathy to call the patient who he had put on Butrans to solicit her feedback. I let him know I would return promptly to follow-up on the patient's response. Also reminded Dr Roheny of seven available OxyContin tablet strengths.
PPLPMDL0020000001	Parma	OH	44129	4/25/2011	Showed Dr Gigliotti a Butrans demo patch & asked him what his thoughts were. He examined the system said that the adhesive was effective. He asked if it would really stick for a week & asked if it could get wet. I told him patients could practice normal bathing/showering & swimming but also reminded him of heat warning. I asked him if this made sense & he said yes. Discussed Butrans appropriate patient type & I positioned Butrans for patients taking 3 Vicoden per day around-the-clock for a chronic condition who were asking for refills too soon or asking for an increased dose. He said he does want to try Butrans on patients & asked about insurance coverage. Reviewed formulary grid, asking him to keep commercially insured patients who could utilize the savings cards in mind. Also discussed OxyContin as an option for patients who are beyond Butrans 20mcg. Dr Gigliotti told me again that he does want to try Butrans & is excited about it.
PPLPMDL0020000001	Bedford	OH	44146	4/25/2011	Spoke with Sandy (MA) who said that Dr Moufawad is on vacation this whole week. Discussed Butrans appropriate patient type, dosing, & titration. She said she knows Dr Moufawad has some patients on Butrans but was unsure of specifics. Reviewed savings cards for eligible patients.
PPLPMDL0020000001	Cleveland	OH	44102	4/25/2011	i talked to Vince,Pharmacist and Brian,Pharmacy Technician,about Butrans stocking and Vince said until he see's 1 script for Butrans,he's not ordering the medication.we discussed importance of Butrans stocking but Vince said thats his policy.i showed Vince and Brian the Butrans initiation guide and patient information booklet and asked if they thought some of their patients would be appropriate to start on Butrans? Brian and Vince both said yes,they have patients who dont like taking pills around the clock for their chronic pain,so the fact that Butrans is a patch is a benefit for those patients and the patients who complain to them about their short-acting opioids not lasting long enough,Butrans could be an option for them too.i asked Vince if he would ever recommend Butrans,for appropriate patients,to doctors? Vince said depends on his relationship with the doctors,but he might do it as he see's Butrans having a few benefits over the short-acting opioids.discussed OxyContin,insurance
PPLPMDL0020000001	BEDFORD	OH	44146	4/25/2011	Spoke with Marcus (pharmacist) & asked him if he would be willing to open a carton of Butrans to dispense fewer than 4 patches if he were to receive a prescription written that way. He said it would not be a problem because it is CIII. He said they can't do this for CII's but there would not be an issue doing it for Butrans. Reviewed dosing, appropriate patient type, & e-voucher. Also reviewed OxyContin savings cards/eligibility & gave him online pharmacist education flier.
PPLPMDL0020000001	Cleveland	OH	44195	4/25/2011	i talked to dr briefly about considering his patients who take tramadol around the clock for their chronic pain,that are telling him the short-acting opioid is not controlling their pain,not lasting long enough,so perhaps Butrans being a long-acting opioid could be an option for these patients,if appropriate patients? dr said that is a good point and i know how he feels about having patients on opioids overall, but he will consider Butrans as an option for those patients if he doesnt want to start them on Vicodin. i showed dr Butrans initiation guide and patient information booklet and dr took 1 booklet saying if he started 1 patient,he would give the booklet as its a good educational piece. i recommended Senokot-5
PPLPMDL0020000001	Independence	OH	44131	4/25/2011	Spoke with Kelly (MA) who said that she would give my card to Kathy to request a lunch & would give Dr Sustersic the Butrans FPI I left for him. Reviewed Butrans indication, dosing, appropriate patient type/positioning, CIII & savings cards with her & asked if she thought that Butrans sounded like something Dr Sustersic might be interested in. She said she was not sure but that they do see a lot of patients who fit the indication. She said Kathy would contact me to set up an appointment to speak with the doctors.
PPLPMDL0020000001	Parma	OH	44129	4/25/2011	Spoke with Kelly (MA) who said that she would give my card to Kathy to request a lunch & would give Dr Sustersic the Butrans FPI I left for him. Reviewed Butrans indication, dosing, appropriate patient type/positioning, CIII & savings cards with her & asked if she thought that Butrans sounded like something Dr Sustersic might be interested in. She said she was not sure but that they do see a lot of patients who fit the indication. She said Kathy would contact me to set up an appointment to speak with the doctors.
PPLPMDL0020000001	Cleveland	OH	44104	4/25/2011	i talked to dr about considering Butrans as an option for his patients who are taking tramadol around the clock for their chronic pain,but telling him their dosing regimen,dosage strength, isnt controlling their pain and they are asking him for something else.dr said he hears that every day from all these pain patients regardless of which opioid they are taking.i asked if he would consider Butrans, right after that first dosage strength,50mg,of tramadol,wasnt controlling pain,instead of going to vicodin? dr said he might do that but it comes down to insurance and asked about BWC and medicaid patients getting Butrans? we discussed both plans and i asked dr to focus on commercial plan patients too because they can use Butrans patient savings cards,dr said he will consider that as an option for some patients.i recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44113	4/25/2011	worked pain management dept-see call note on dr daoud
PPLPMDL0020000001	Cleveland	OH	44195	4/25/2011	worked anesthesia/pain management department-see call notes; worked chronic pain and rehabilitation-left dinner program invitations for 5/24th peer group program for Dr.Covington and Dr.Mathews as i couldn't see either physician and i also left Butrans initiation guides and 1 demo patch/disposal unit for Dr.Covington as his medical secretary called asking for one saying Dr.Covington has started a couple of patients on Butrans and wanted the demo patch to show patients.worked rheumatology dept-left Butrans fpi,initiation guide and patient information booklet for Dr.Zachary,Patty Paczos,PA,Dr.Calabrese,Dr.Long,Dr.Chatterjee and Betsy Kirschner-NP as i couldnt see any of these physicians.worked neurology dept-left Butrans initiation guide,FPI and patient information booklet for Dr.Kriegler,Dr.Mays,Dr.Spears and Dr.Stillman-medical secretaries stated that dr has to contact me if he/she wants to set-up appointment to discuss our products,so had to leave information with them
PPLPMDL0020000001					

PPLPMDL0020000001	Bedford	OH	44146	4/25/2011	Quentaline (pharmacist) said that they do not have Butrans. She said that Oleg is in charge of ordering & he can be reached on Tuesdays. Reviewed dosing, indication, & e-voucher with her. She said she would leave information for Oleg & give him a reminder. Also discussed OxyContin savings cards for eligible patients.
PPLPMDL0020000001	Barberton	OH	44203	4/25/2011	Introduced Butrans and FPI. Dr. Minich agreed she had potential for Butrans but wanted to learn more about it. She told me that she has many patients on low doses of Vicodin.
PPLPMDL0020000001	Westlake	OH	44145	4/25/2011	Dr has been out of the office for several weeks. I spoke with Vice about the managed care for Butrans, she said she has been doing PA's and having success with most of them. We discussed commercial patients and using the savings cards. She said the Dr has about 7 patients on Butrans so far and he is liking it. She said that he does not use many patches but when he does he has been prescribing Butrans.
PPLPMDL0020000001	Akron	OH	44333	4/25/2011	I thanked Dr. Shah for his business and asked what he feels the most significant benefit of Butrans is so I can relay information to PCP's in the area. He said that he really liked that it was a LAO, a schedule 3 and 7 day delivery.
PPLPMDL0020000001	Barberton	OH	44203	4/25/2011	I asked Dr. Patel about his success with Butrans. He told me that the patients he had started were already on opioids and he started them on 5 mcgs. I explained that if depending on where the patient was previously 10 may be appropriate. I explained that titration can be done in as soon as 3 days if patients are not getting adequate pain relief.
PPLPMDL0020000001	Westlake	OH	44145	4/25/2011	Dr told me that Butrans is not loaded into the premier e-prescribing database. He said that it is more difficult to prescribe when it is not in there. I spoke with Laura and she said that she had made several calls to get it updated and she will check again to see if it has happened. She did check and it is now showing up so all Premier Drs should not be able to prescribe Butrans easily. I asked Dr what types of patients he is thinking of for Butrans and he said patients who are on higher doses of vicodin or percocet. He said he does not have a problem tapering these patients down and wants to try to get them off of so many short acting. We discussed that some patients may be better suited for OxyContin as a long acting option since 20mcg Butrans may not provide adequate analgesia for patients taking more than 80mg of oral morphine equivalent per the FPI. He agreed to continue to try Butrans when managed care allows. Reminder about Colace and Senokot laxative lines.
PPLPMDL0020000001	Cleveland	OH	44195	4/25/2011	I talked to Anne, NP, for Dr. Stanton-Hicks patients, about considering Butrans as an option for those patients taking short-acting tramadol around the clock for their chronic pain, but telling her that their medication isnt lasting long enough or just asking for something different. Anne said she follows what Dr. Stanton-Hicks prescribes and treats his patients so they are always discussing their patients and she hasnt seen him prescribe Butrans, so I asked Anne if she could share the Butrans fpi, initiation guide and patient information booklet with Dr. Stanton-Hicks again, as I havent seen him in awhile, Anne said she would do that and I asked her to talk to him about considering patients taking tramadol, that arent controlled, if appropriate, to consider starting them on Butrans, Anne said she will keep that in mind. Anne said she needed more OxyContin savings cards for their patients, so we talked about formulary coverage for OxyContin and 7 tablet strengths of OxyContin.
PPLPMDL0020000001	Cleveland	OH	44109	4/25/2011	I talked to Naser, Pharmacist, about Butrans stocking and who is writing Butrans in the area, I showed Naser Butrans initiation guide and we discussed proper tapering of short-acting opioids, initiation of appropriate Butrans dosage strength, 5mcg or 10mcg and the Butrans application dvd/booklet. I asked Naser if he would recommend Butrans to doctors that have patients on short-acting opioids but are complaining to the pharmacy about their medication not lasting long enough so perhaps a long-acting opioid could be an option, Naser said he could do that with a few physicians and would remember that. I talked to Naser about OxyContin being an option after Butrans 20mcg, showed Butrans conversion guide and formulary grid and discussed managed care coverage for OxyContin. I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	4/25/2011	I talked to Dr about considering Butrans for his tramadol patients that are asking for something else, instead of converting them to vicodin, showed Butrans initiation guide, discussed proper tapering of short-acting tramadol if above 300mg tramadol a day and initiation of Butrans 5mcg or 10mcg, we discussed managed care coverage and Butrans patient information booklet
PPLPMDL0020000001	Lakewood	OH	44107	4/25/2011	I asked Dr how many patients does he think could benefit from once a week Butrans. He said he probably has a lot but he just forgets, he has so much going on and is in such a rush that he will do his best to remember, he said he does want to start some patients and gain some experience. I asked him to try just one patient this week instead of increasing the amount of vicodin. He agreed. I reviewed that OxyContin is still a Q12hr option.
PPLPMDL0020000001	Cleveland	OH	44195	4/25/2011	I talked to Kathy about Butrans being an appropriate option for patients taking tramadol that are telling her the medication's not lasting long enough, so perhaps Butrans being a long-acting opioid could be an option, Kathy agreed saying she hadnt really been thinking of her tramadol patients, so that made sense and she would think about who is asking for something different that she could talk to about Butrans, we discussed tapering and initiation of Butrans, showed Kathy Butrans initiation guide for this discussion, discussed managed care coverage and then we discussed OxyContin being an appropriate option after Butrans 20mcg or when patients are taking more than 80mg oral morphine equivalent a day, we discussed managed care coverage, savings cards and conversion guide for OxyContin. I asked Kathy to recommend Butrans and then OxyContin when appropriate to dr. minzter and dr. mekhail as she see's both of their patients, she agreed to do that and I recommended Senokot-S
PPLPMDL0020000001	Lakewood	OH	44107	4/25/2011	I asked Dr what types of patients does he feel could benefit from Butrans, he said that every single patient is different and it will just depend on what patients are already on and what they have tried in the past for him to decide if Butrans will be appropriate. I asked him to prescribe Butrans when 3-4 5mg vicodin are no longer controlling his patients pain and he agreed. Reminder about OxyContin as a Q12hr option.
PPLPMDL0020000001	Parma	OH	44129	4/25/2011	Spoke with Cindy (MA) who said that Dr Ortega was out of the office today & will return tomorrow. Discussed Butrans patient type & dosing with her as well as reviewing managed care coverage & savings cards/eligibility. She said she has been trying to remind Dr Ortega of Butrans & that she was just telling him that she thinks the transdermal dosing is ideal because it can help with compliance with medication. Reviewed CIII & abuse/addiction potential.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	4/25/2011	Asked Dr. Pitt if saw a benefit to the 7 day delivery system that Butrans offers patients. He did not give me a straight answer and went on to say his patients are past the point of Butrans. I asked him about NSAID failures and he said those patients are already on some type of opioid past the point on Butrans as well. I thanked him for his OxyContin business.
PPLPMDL0020000001	Parma	OH	44129	4/25/2011	Dr Taylor asked for a "refresher" on the details of Butrans because she has forgotten. Reviewed indication, dosing, & positioning. I asked what her thoughts were on using something long acting in place of an around-the-clock short-acting regimen. She said she does not have any problem with doing that, but she is concerned that the adhesive will not last the full week or that the analgesia will not continue the entire 7 days. I told her that while I had not yet heard of the adhesive not working, if it started to loosen, the edges can be taped with first aid tape. Also reviewed FPI 12.3. Discussed managed care/savings & asked that she think of patients with commercial insurance who can utilize savings cards or BWC. Dr Taylor took notes on her initiation guide & said she wants to try Butrans- she mentioned to Mary that a patient they saw earlier today would have been a good candidate.
PPLPMDL0020000001	Lakewood	OH	44107	4/25/2011	Also discussed OxyContin as a long-acting option for patient beyond Butrans 20mcg/hr
PPLPMDL0020000001	Cleveland	OH	44113	4/26/2011	Quick call with Katie, she said she does think that Butrans is a good option for those patients on low dose vicodin and before going to other long acting meds. I reviewed the managed care and asked if she would try Butrans for BWC or commercial patients. We reviewed OxyContin as a Q12hr option and she said that she does recommend it in the hospital.
PPLPMDL0020000001	University Heights	OH	44121	4/26/2011	I asked Dr what he remembered about Butrans? Dr said not much, other than this was a transdermal formulation of buprenorphine. dr asked me what receptors Butrans binded to as he couldnt remember? we talked about Butrans receptor action, showing Butrans visual aid and dr said okay as long as he knows that if patients are on Butrans and they still take Vicodin, the Butrans isnt knocked off receptor. dr said he has a few patients in mind but has to look at Butrans fpi and initiation guide in more detail as he hasnt really listened to much of what I said until today, as we had lunch together and more time to talk. I asked dr what he likes about Butrans that he feels his patients could benefit from Butrans? dr said he likes the once weekly dosing, patch technology instead of 180-240 short-acting opioids a month and Butrans being a CIII is much easier in his eyes so that he can have his staff call in refills. dr asked about Medicaid coverage as thats big plan, we talked about Prior authorization and
PPLPMDL0020000001	Warrensville Heights	OH	44122	4/26/2011	Discussed the Butrans positioning and the 5 selling messages. I asked doc if he would prescribe for opioid naive or opioid experience. He said Naive. I discussed the initiation dosing. He asked if the patch stays on for 7 days. I explained the proper application and how to dispose of the patch. He also asked how Butrans differs from fentanyl. I explained that there is no head to head data and that Butrans may not be a substitution for fentanyl. He asked about coverage and PA required. Explained that medicare/medicaid will require a PA. He does have medical mutual and BWC. I explained the savings card program. He said he will maybe give Butrans a try. I reminded him of the indication and savings cards for oxycontin and that after Butrans 20mcg a low dose of oxycontin might be appropriate.
PPLPMDL0020000001	Fairlawn	OH	44333	4/26/2011	Spoke with Debbie (head nurse) who said that both nurse practitioners (Jennifer Dehlman & Rennattie Martin) have permanently left the practice. She said that many changes are being made & many employees are unhappy. She said that between people quitting & people being let go, she is down to only 8 people on staff & she used to have 20. Discussed Butrans with her & reviewed indication, dosing, appropriate patient type & managed care grid. She said she does not know why Dr Shin has not prescribed it since his initial prescription for a patient in January. Debbie said that she is trying to come up with a way for me to see Dr Shin & that they are only allowed to let reps see Dr Shin if they have a new product. Explained that Butrans just launched in January & that I have only spoken to him one time & asked if she would request that I get to see him to discuss Butrans & his experience with it. She promised to do this. I also gave her information on webcast & reviewed OxyContin savings cards
PPLPMDL0020000001	Cleveland	OH	44103	4/26/2011	I asked Dr. Weidman about her success with Butrans. She said she had tried another patient on it and had not heard back from them and would continue to initiate therapy for the appropriate patient types.
PPLPMDL0020000001	Cleveland	OH	44103	4/26/2011	I talked to Dr about any patients he has taking tramadol, that call office saying their medication isnt lasting long enough or they want something different, dr has option of Butrans and dr said he has predominantly medical aid patients and wont do prior authorization for them to get Butrans. I asked dr if he has a few commercial patients that he feels could benefit from Butrans, dr said maybe, so we talked about Butrans patient savings cards for these patients. We discussed OxyContin formulary coverage for medical aid and medicare patients and OxyContin savings cards and who is the appropriate patient for OxyContin. dr said he likes oxycodone and prefers long-acting opioids and has written OxyContin for years so he's comfortable with the medication and its available on medical so its easy for him and his staff. I recommended Senokot-S
PPLPMDL0020000001	Westlake	OH	44145	4/26/2011	I talked to Dave, Pharmacy Manager, about Butrans initiation guide, proper tapering of short-acting opioids and initiation of Butrans 5mcg or 10mcg and titration of Butrans, Dave said he hasnt seen any scripts for Butrans yet but thinks Butrans once weekly dosing is a great benefit to those patients who are always complaining that their short-acting opioids arent lasting long enough. I asked if Dave would recommend Butrans, to doctors he has good relationships with, if patients are complaining to him about their short-acting opioids not controlling pain? Dave said he might do that with a few doctors, but not many. we discussed Butrans formulary coverage and savings cards. we talked about OxyContin, appropriate patient flashcard, formulary coverage and OxyContin savings cards. I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	4/26/2011	Spoke with Deanna, we reviewed the Butrans medication guide and the importance of instructing the patients. We discussed steady state and patients need to wait 72 hours before titration. We discussed OxyContin as an option for appropriate patients when Butrans may not be adequate analgesia. Reminder about Ryzolt and asked to recommend Senokot S.
PPLPMDL0020000001	Parma	OH	44129	4/26/2011	I talked to Dr about her patients taking tramadol around the clock, that may be telling her their short-acting tramadol isnt lasting long enough, so perhaps a long-acting opioid like Butrans could be an option. I showed Butrans initiation guide and patient information booklet/dvd for our discussion, discussed proper tapering of short-acting tramadol if patients are above 300mg and initiation of Butrans 5mcg or 10mcg, dr asked me about medical coverage as thats her biggest plan and I explained the Prior Authorization requirements for Butrans approval for medical aid patients. dr said she'll think of a few patients to try Butrans and let me know what feedback she gets. I talked to Dr about OxyContin appropriate patients, showed flashcard with appropriate patient information and discussed formulary coverage as OxyContin is preferred on Medicaid. I recommended Senokot-S
PPLPMDL0020000001	Garfield Hts	OH	44125	4/26/2011	Dr Ortega said he just wrote his first Butrans prescription. I asked him what patient type he had chosen. He said it was a patient who he had been thinking about for awhile, going back and forth on whether or not he would be a good Butrans candidate. He said that he ended up writing the prescription incorrectly & the pharmacy called him to clarify. He said he wrote "5mg" instead of 5mcg. Reviewed how to write the prescription & also reviewed this with his MA, Cindy. Also discussed appropriate patient type (including patients beyond Butrans 20mcg as potential appropriate OxyContin patients), CIII, & abuse/addiction potential. Dr Ortega asked what to do if the patch starts to loosen or come off as the patient said he gets sweaty. Reviewed taping the edges with first aid tape or covering the patch with Tegaderm/Bloclosure. Also reviewed this with Cindy. I asked Dr Sadowski what he does for patients with a chronically painful condition who complain that NSAID/COX-2's aren't controlling their pain- He said he refers them to pain management if he knows they will need to be on "a lot" of pain medication. He added that he will maintain them if they are on "one Vicodin per day". I pointed to pg 6 in initiation guide at table & asked him what range of medication he would say the majority of his moderate to severe chronic pain patients would fall into & he said the <15mg hydrocodone category. I told him that those were potential Butrans patients. I asked his thoughts on putting someone on a long-acting CIII instead of a short-acting around-the-clock medication & he said he liked the idea of transdermal. Told him that Butrans does carry abuse/addiction potential. Discussed buprenorphine & reminded him Butrans has no indication for treatment of addiction. Reviewed managed care/savings & discussed OxyContin for appropriate patients. OTC reminder

PPLPMDL0020000001	Sagamore Hills	OH	44067	4/26/2011	Only saw Dr Scanlon briefly through the window. Butrans dosing & delivery system reminder. Spent time with his nurse, Helen, discussing appropriate patient type, CII, abuse/addiction potential, dosing, delivery system, & savings cards/eligibility. I let her know that I had spoken with Dr Scanlon last week in the Parma office & that he expressed a lot of interest in Butrans. Helen agreed that Butrans sounded like something that he will be prescribing a lot of, based on his patient population. She asked for more savings cards to ensure they have enough.
PPLPMDL0020000001	Hudson	OH	44236	4/26/2011	Spoke with Stephanie (MA) who said that none of the doctors there have prescribed Butrans yet. Reviewed Butrans indication, dosing & appropriate patient type. She said it is possible that they have forgotten about Butrans since they get so busy. Reviewed savings cards for both Butrans & OxyContin- she said they have plenty of both.
PPLPMDL0020000001	Solon	OH	44139	4/26/2011	met with Chuck Calalesina to plan for call on Marc's and then made call to Carrie Jenne. with him. See call notes on Marc's. We planned on trying to get Colace 10's and Peri-Colace 10's in, but they price based on Walmart per tablet basis, so we weren't able to meet that price.
PPLPMDL0020000001	Cleveland	OH	44109	4/26/2011	i asked dr what he remembered about Butrans and how Butrans was a benefit to his patients? dr said he remembered Butrans was transdermal and once weekly dosing but couldnt remember if it was a CII or III and insurance coverage for Medicaid.i told dr Butrans was a CII and asked if that was important to him? dr said yes,he liked that Butrans was a CII because his staff can call in refills and its much easier than a CII which he doesnt write much of.i told dr Medicaid requires a Prior Authorization for Butrans and explained the requirements and dr said ok he would think of 1-2 patients to try Butrans in and let me know what he hears from patients.i showed dr Butrans initiation guide for the discussion and patient information booklet/application dvd.i recommended Senokot-S
PPLPMDL0020000001	Westlake	OH	44145	4/26/2011	Quick call to follow up with Dr regarding peer group program. He was not sure yet, but will let me know if he can make it. He said that patients are still doing well on Butrans and he did not need anything at this time.
PPLPMDL0020000001	Parma	OH	44134	4/26/2011	Quick call with James. He said he has not dispensed Butrans yet. Reviewed savings program & eligibility and also reviewed OxyContin savings cards for eligible customers. James said he has enough cards for now but that he does try to give them out whenever possible. He then got called away for a customer question.
PPLPMDL0020000001	Cleveland	OH	44109	4/26/2011	worked rheumatology dept-see call notes on Dr.Ballou and Dr.Magrey
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	4/26/2011	Dr. pitt called for OxyContin co-pay cards. i reminded him about the benefits Butrans could offer his patient since it was a LAO, which he likes an dis used to using and a schedule 3. He said he would continue to prescribe OxyContin.
PPLPMDL0020000001	Independence	OH	44131	4/26/2011	Quick call- Dr Reddy said he had forgotten what Butrans is. Reviewed indication, dosing, & CII. Also handed him invitation for web conference. Spoke with Kathi, reminding her of Butrans managed care coverage & savings
PPLPMDL0020000001	Fairlawn	OH	44333	4/26/2011	Went over the patient education guides and application and disposal. She said that they had seen movement from Dr. Shah and they had it stocked. I left patient education guides for them to hand out to patients.
PPLPMDL0020000001	Independence	OH	44131	4/26/2011	Quick call- Dr Jack saw me & said, "Butrans is here". He then said he has still not prescribed it but that he will. Then he walked into a patient room. Spoke with Cameo (MA) & went over managed care & savings cards for eligible patients.
PPLPMDL0020000001	Akron	OH	44310	4/26/2011	I asked Dr. Schukay if he had studied up on Butrans like he had promised. He said that he had the opportunity to review some information but had not yet tried it. He asked about patient type and I covered both opioid naive and experienced patients. I went over the initiation guide with him and he seemed to understand where it was most appropriate.
PPLPMDL0020000001	Cleveland	OH	44109	4/26/2011	i asked dr what she remembered about Butrans? dr said not much and asked me to review Butrans with her again,we discussed Butrans 5 core messages,showed dr Butrans initiation guide and asked dr if she would consider Butrans,a long-acting opioid after patients try short-acting tramadol for the first time and it doesnt work or doesnt last long enough and her patients come to her asking for something else? dr said she would have to think about it because if patients are taking 50mg tramadol,2-3 times a day,she would increase dose to 2pills,2-3 times a day and increase dosage strength and dosing interval slowly,dr said she doesnt prescribe many long-acting opioids.i asked dr if she even saw any clinical benefits in Butrans,being a long-acting opioid? dr said Butrans being once weekly dosing and in a patch are two benefits she see's for patients.i recommended Senokot-S
PPLPMDL0020000001	Akron	OH	44333	4/26/2011	Becky said she has started some new patients who were all hydrocodone patients and she initiated therapy with butrans instead. I explained that these patients were most likely ideal candidates for Butrans. She said she started therapy at 5 mcs; i explained that steady state took 3 days and that she could also titrate in a little as 3 days if she needs to.
PPLPMDL0020000001	Euclid	OH	44132	4/26/2011	Discussed the Butrans selling messages and the positioning. He said he tried it a couple of times and he has not heard back from them. He asked about BWC coverage and medicaid and medicare. Confirmed coverage with BWC. Showed him the formulary grid and how commercial patients can expect to pay about \$15. I asked him to prescribe Butrans after tramadol failures. He said he would try as he likes to reduce the number of tablets taken anyway. Explained the proper initiation dosing and application.
PPLPMDL0020000001	Akron	OH	44310	4/26/2011	I asked Dr. Cremer how his patients were doing on Butrans. He mentioned that most of the patients are doing well and are very satisfied with the therapy. He said he is using it on many BWC patients and I reminded him of our great coverage on the commercial plans as well.<font color=blue><b>CHUDAKOB's query on 05/05/2011</b></font>Even though I see you reported the AE through the system, you should also include it in your call notes and how you responded to it.<font color=green><b>LAPMACA's response on 05/08/2011</b></font>Patient complained to the physician of nausea and dizziness. I let the dr know I would report this AE.<font color=blue><b>CHUDAKOB added notes on 05/12/2011</b></font>OK. Thanks!
PPLPMDL0020000001	Euclid	OH	44132	4/26/2011	Spoke to Tim about the stocking and movement of Butrans. He said he had a couple of script. One BWC script that went through with no problem. Dr. Marshall (amy's doc) wrote the script. One physician came in with a script but his insurance (Merck Medco) was too high of a co-pay. I reviewed the covered formulary plans. He asked why the drugs are priced high and then have a savings card. Barry explained the insurance company regulations. Tim stated that he had to turn away a few 80mg oxycontin scripts in the past several weeks because he is not getting reimbursed as much as he is paying for it.
PPLPMDL0020000001	Westlake	OH	44145	4/26/2011	I asked the Dr what his hesitation is in prescribing Butrans, he said he is still looking for the right patient who is taking low dose vicodin. We discussed patients that maybe taking celebrex or tramadol and that Butrans could be the next step for chronic pain instead of vicodin. He said he does want to give it a try. I reviewed the managed care info and savings cards with his MAs. Reminder about OxyContin as a Q12 hr option and he said that he is continuing to prescribes a lot of OxyContin and in fact many patients are already on higher doses of opioids and need to convert to OxyContin instead of Butrans.
PPLPMDL0020000001	Westlake	OH	44145	4/26/2011	Spoke with Jamie, We reviewed the Butrans medication guide and the importance of teaching patients about the proper application and use of Butrans. We discussed OxyContin as a Q12hr option for those patients when Butrans may not provide adequate analgesia. Reminder about Ryzolt and asked him to recommend Senokot S.
PPLPMDL0020000001	Cleveland	OH	44130	4/26/2011	met with Carrie Jenne along with Chuck Calalesina (Acosta). We presented Colace 10's and Peri-Colace 10's. Marc's matches tablet for tablet price with Walmart. She would not be able to do that as she would have to sell it for less than she paid for it basing her price off the Colace 100mg 60's. She was also concerned how much we would sell with the generic also available. We talked of the advantages of stocking both. We will need to focus on Senokot-To-Go 4's. They have trial section. Also possible to put on shelf or on self talkers throughout the store. Walmart is primary competition. They will also look at Giant Eagle, DDM, Target, and other mass stores.
PPLPMDL0020000001	Fairlawn	OH	44333	4/26/2011	Dr. Oyakawa still has not written his first Rx he says because of a confidence issue. He told me there are several things he likes about Butrans therapy including the 7 day delivery system. I asked him if he knew the patient type to initiate therapy on and he said either an opioid naive or low dose hydrocodone patient. I agreed that these are the most ideal patients.
PPLPMDL0020000001	Independence	OH	44131	4/26/2011	Quick call- Since Maria told me Dr Rob would probably not be able to attend the dinner program next month, I invited Dr Rob to do a Butrans webcast. He said he would try to get online for it as webcasts are easier for him to attend with his schedule. Handed him OxyContin savings cards for appropriate eligible patients. Spoke with Cameo & reviewed managed care coverage for both products as well as savings cards/eligibility.
PPLPMDL0020000001	Cleveland	OH	44102	4/26/2011	i talked to dr about Butrans being an option for her patients taking short-acting tramadol that arent controlled and asking her for something different,dr said she was thinking of patients taking vicodin and percocet and more towards the 40mg range,but it made sense to think of patients taking tramadol too we talked about tapering of short-acting opioids and initiation of Butrans 5mcg or 10mcg,by looking at Butrans initiation guide,we discussed OxyContin being available and showed OxyContin formulary grid.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44111	4/27/2011	I asked Dr what benefits he sees in Butrans for his patients. He said that he has not prescribes yet and will let me know it fits into his practice. He said he just forgot. I reviewed the managed care with Barb and she is going to help remind him when appropriate patients come in. I reviewed the managed care and savings cards for OxyContin for patients when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Cleveland	OH	44114	4/27/2011	dr said he started 4-5 patients on Butrans but couldnt get approval through Caresource and 1 patient was BWC.we talked about dr considering patients with commercial plan insurance of state BWC to try Butrans in and make it easier than trying to start medicaid patients on Butrans.i asked dr what were the patients taking,that dr thought of Butrans as an option? dr said patients on OxyContin,Morphine.i talked to dr about patients with moderate pain,more on the low dose vicodin or percocet range,and not OxyContin or anything above 80mg oral morphine,to consider starting on Butrans.dr said he has started a few patients who were taking short-acting opioids,like Vicodin and percocet.
PPLPMDL0020000001	Cleveland	OH	44114	4/27/2011	i asked Dave,Pharmacy Manager,if he has seen any Butrans scripts yet and Dave said 1 script from Dr.Marshall but patient was on OxyContin 60mg and Dr.Marshall started this patient on Butrans 10mcg,so Dave's not sure if Butrans will work for this patient.we discussed appropriate patients for Butrans,showed Butrans initiation guide and i told Dave my message to doctors is more moderate chronic pain,low dose hydrocodone,oxycodeone or tramadol or opioid naive patient.Dave said he thinks Butrans is a good option,instead of 90 plus short-acting opiates a month,but thinks Butrans will be transient for patients.Dave said Dr.nickels and Dr.Patel's patients fill scripts here and he see's a lot of Vicodin from these doctors but mainly medicaid and workers comp patients. we discussed Butrans patient savings card,discussed OxyContin savings cards and Dave said he has all medicaid patients for OxyContin so he didnt need OxyContin savings cards.left Butrans patient information booklets for him too
PPLPMDL0020000001	Northfield Center	OH	44067	4/27/2011	Spoke with Sunni (pharmacist) who said that they have not yet ordered Butrans but she will order when she gets a prescription. Reviewed appropriate patient type/positioning, dosing, indication, & e-voucher. Encouraged her to order now so that she has it available when she gets a prescription. Also inquired about OxyContin stocking & asked if she wanted savings cards, but she said they really do not keep OxyContin on hand. Gave her online pharmacist education information which she said she really needed.
PPLPMDL0020000001	Bedford	OH	44146	4/27/2011	Spoke with Ieasha, MA, who said that Dr Mahna was working on a court case & could not see me today. I asked her the best way to have a discussion with him & introduced Purdue's products. She said she would give my card to the office manager, Mrs Mahna, who would be the one to contact me for an appointment. I reviewed Butrans indication, dosing, & appropriate patient type with Ieasha & asked her if she thought that Butrans sounded like something he may be interested in hearing about & she said yes. She said she would give the information to Mrs Mahna & would request an appointment for me.
PPLPMDL0020000001	Macedonia	OH	44056	4/27/2011	Spoke with Linda (nurse) who said that Dr Yager had already left for the day. She said she did not think that he has prescribed Butrans for anyone yet. Discussed indication, dosing, appropriate patient type & delivery system with Linda & worked with her to schedule first available lunch with Dr Yager. She said Butrans does sound like something that he would be able to use with his patients. Reviewed savings cards & eligibility. She said she would give my information to Dr Yager & remind him about Butrans.
PPLPMDL0020000001	Parma	OH	44134	4/27/2011	Dr Hernandez said that he had a patient who was on Butrans 10mcg & the patient said they were not getting quite enough analgesia, so he titrated her to 20mcg. She was "doing great" for the first two days of 20mcg, but then called complaining of severe nausea, headache, & fatigue. She removed the Butrans due to these adverse events. He said that Purdue should make a 15mcg/hr dose so that this does not happen to more patients. He said that other than that, he is very happy with the results that his patients get from Butrans. He said that he is switching patients from Vicodin to Butrans. Reminded him that Butrans does still have abuse/addiction potential as it is an opioid. He said he knows. Discussed OxyContin as a possible option for appropriate patients beyond Butrans 20mcg. He said that when patients need a "stronger" medication than Butrans he will continue to consider OxyContin. Also gave him new OxyContin savings cards.
PPLPMDL0020000001	Bedford	OH	44146	4/27/2011	Spoke with Kevin (pharmacist) who said this was his first day working at that location. He checked the shelf & confirmed that they do have Butrans. Discussed indication, dosing, CII, abuse/addiction potential, & appropriate patient type. Also gave him REMS packet. I asked him if he knows if there would be any problem with opening a carton to dispense one patch if they received a prescription written that way & he said he does not think that would be an issue. Also discussed OxyContin savings cards & gave him information on pharmacist education.

	Warrensville Heights	OH	44122	4/27/2011	Spoke with MA Adrienne who said that Dr Zivic was at Hillcrest & would not be in the office as planned this afternoon. Reviewed with her Butrans indication, dosing, delivery system, managed care, & savings cards. She said she does not think he has prescribed it yet. Also discussed appropriate patient type/positioning. I asked her if she is the person who takes the phone calls from patients requesting refills or switches in medication & she said that she, Stephanie, & Michelle all take them. I asked if patients on pain medications frequently call requesting early refills, increases in doses, or switches in medications. She said she does take many phone calls like this. She said she would remind Dr Zivic & would leave my information for him. Also offered OxyContin savings cards but she said she has enough for now.
PPLPMDL0020000001	Akron	OH	44320	4/27/2011	I asked Dr. Bonyo if he saw a benefit to Butrans therapy. He said he liked that it was a 7 day delivery and would keep it mind.
PPLPMDL0020000001	Akron	OH	44333	4/27/2011	Dr. Brown told me that had initiated Butrans therapy to her first patient. She said it was a patient who had called and wanted more hydrocodone and she instead converted to Butrans just like we discussed. She said she had 2 more patients this afternoon that she would initiate therapy to.
PPLPMDL0020000001	Cleveland	OH	44122	4/27/2011	As requested, and as follow-up to a meeting between Pam Tropano and Kendra Prince on 4/14/11, emailed a copy of the ASAP program (as slide handout/PDF) for Pam's review.
PPLPMDL0020000001	Cleveland	OH	44111	4/27/2011	I asked Dr to prescribe Butrans instead of increasing the dose of vicodin or percocet. He agreed. I reviewed the managed care and checked Butrans and OxyContin savings cards with Pam.
PPLPMDL0020000001	Akron	OH	44312	4/27/2011	Quick call through the window where I reminded Dr. Fouad of ALL his previous commitments to initiate Butrans therapy. He said he would keep it in mind.
PPLPMDL0020000001	Cleveland	OH	44111	4/27/2011	Spoke with John, we reviewed the Butrans medication guide and how to instruct patients on how to use Butrans. We discussed OxyContin as an option when Butrans may not provide adequate analgesia. Reminder to recommend Senokot S with opioids.
PPLPMDL0020000001	Cleveland	OH	44111	4/27/2011	Quick intro at window. I reviewed the Butrans 5 key messages. He will take a look and let me know if there might be a place in his practice for Butrans.
PPLPMDL0020000001	Cleveland	OH	44106	4/27/2011	dr said he hasn't started any patients on Butrans yet and knows he has to put Butrans in his mind. I asked dr if he would consider starting patients on Butrans after tramadol? dr said he has other options and isn't sure about Butrans and thinks a journal club discussion would be helpful so he can have more information on Butrans.
PPLPMDL0020000001	Cleveland	OH	44143	4/27/2011	Quick call.....I asked doc about his patients that are taking tramadol ATC for persistent pain. He said he would send them to pain mgmt. I asked him if he would consider Butrans - a CIII, 7 day delivery system in place of vicodin. He asked if its covered on medicare. I explained no coverage on medicare/medicaid but is well covered commercially. Gave him a formulary grid. Nothing learned.
PPLPMDL0020000001	Cleveland	OH	44111	4/27/2011	Quick call with nurse Margaret. She does not think Dr has tried Butrans yet and he has not said anything. We reviewed the managed care and savings cards for Butrans and OxyContin. She will pass along the info to the Dr.
PPLPMDL0020000001	Cleveland	OH	44114	4/27/2011	I asked John,PA,who are the patients you are starting on Butrans? John said patients who are in chronic pain,taking morphine,OxyContin and they are going to be in pain for the rest of their lives and their insurance pays for their medications.I asked John if he is considering Butrans for any patients taking vicodin or percocet,that are asking for something different or saying their short-acting opioids aren't controlling their pain? John said no,only the long-acting opiate patients.
PPLPMDL0020000001	Akron	OH	44320	4/27/2011	I asked Misty if she has had a chance to prescribe Butrans for at least one patient and she said that although she had not she was starting to feel comfortable about exactly who she should prescribe Butrans to. I went over the initiation guide and explained steady state titration.
PPLPMDL0020000001	Cleveland	OH	44114	4/27/2011	dr said she has some patients on Butrans and they are doing well,especially one patient who she had to titrate from Butrans 5mg to 10mgc and dr didnt want to increase Butrans dose to the Butrans 20mgc so she told patient to wear a Butrans 5mgc and 10mgc. I told dr that was not approved for Butrans, we discussed only 1 Butrans transdermal system is to be applied at a time,as I didnt have data to support anything more than that.dr said her clinical judgement was that this was the smartest thing to do for this patient so she is happy with her decision.
PPLPMDL0020000001	Parma	OH	44129	4/27/2011	Spoke with Fien (pharmacist) & reviewed Butrans dosing, titration, & e-voucher. Also reviewed OxyContin savings cards. Asked if she would fill a Butrans prescription for fewer than 4 patches if she gets a prescription written that way. She said that she personally has no problem opening a box, but that each location's pharmacy manager will have to make that decision for their location individually. Gave her online pharmacist education information. She said she was interested in the courses because the topic is pain management & she, as a pharmacist, encounters difficult situations with pain patients frequently. She said that she always has to "be on the lookout" for patients & is careful not to fill prescriptions for patients who she suspects are abusing the medication. She said she goes to various locations of Rite Aid & that it is a problem everywhere she goes.
PPLPMDL0020000001	Chagrin Falls	OH	44022	4/27/2011	Quick call- caught Dr Rood up at the window. He said he has not heard feedback from his Butrans patient since he titrated her dose & will keep Butrans in mind for other patients. Spoke with Sherry (MA) & reviewed managed care coverage & savings cards as well as eligibility for savings cards. Also scheduled another appointment with Dr Rood to discuss Butrans in more depth.
PPLPMDL0020000001	Cleveland	OH	44111	4/27/2011	Spoke with John, he said he thought they might have seen a script but he did not know which Dr. He did not have it in stock but thought he saw it ordered. We reviewed how to instruct patients about the proper use of Butrans. Reminder about OxyContin as a Q12hr option and asked him to recommend Senokot S.
PPLPMDL0020000001	Cleveland	OH	44106	4/27/2011	dr said he started a patient on Butrans because patient was taking methadone and he thought Butrans would be a good option for this patients chronic pain.dr said he couldnt find any tapering or equivalency information regarding methadone and Butrans in the Butrans fpi or initiation guide. I told dr there wasn't any recommendation for that conversion and discussed with dr patients that are more on the moderate side of chronic pain and taking a couple pills of tramadol or vicodin,to consider Butrans there.dr said ok and that he has Butrans in his mind. We discussed commercial plan coverage and Butrans patient savings cards and I gave all of this information to Juan,doctors MA,gave formulary grid and showed Juan Butrans patient information booklet/application dvd and Juan said that was helpful because patients usually dont listen to him and end up calling him once they get home and have questions.
PPLPMDL0020000001	Parma	OH	44129	4/27/2011	Reviewed Butrans dosing, indication, CIII & abuse/addiction potential with Dr Kushnar. I told her that I realize that she does not like to prescribe opioids in general, but asked her, if she did have a patient who she was comfortable putting on opioids or who was already on opioids asking for an increase in dose, if she would consider Butrans for those patients. She said she would. She added that she has thought of two patients for whom she would like to start on Butrans. She then asked me if Caresource was covering it. Discussed managed care & asked that she think of commercially insured patients for whom Butrans will be more accessible. She said that the other patient who she thought of has commercial insurance so she plans to prescribe Butrans for him when she sees him next. She asked if it has a street value-told her I do not know but that it is abusable. Also discussed OxyContin as an option for patients beyond Butrans 20mgc & recommended Senokot-S for opioid-induced constipation.
PPLPMDL0020000001	Solon	OH	44139	4/27/2011	Lynn, Todd, Alan, Mary and I with MH at AMCP. We discussed transition to CVS Caremark and time line. Their business closes on 4/29/11 but UA will operate independently until 12/31/12. Dan discussed the letter they received from the OIG which resulted in their request to amend the contract. MH is requesting a response to renew by June 1 versus Oct.1, 2011.
PPLPMDL0020000001	Cleveland	OH	44113	4/27/2011	I asked Laura if patients taking vicodin ever ask her for something different or call the medication refill request line,saying their vicodin isnt lasting long enough or not working? Laura said no,she doesnt hear about patients calling into office asking that and when she see's them,if patients are saying they want something more,if its too much,they refer out to specialists.otherwise they are maintaining patients.Laura said she only has 5 minutes,per patient,doesnt have time to explain new drug and isnt going to do it.I told Laura I appreciated her honesty.Laura said she thinks dr nickels,her colleague,has started a few patients on Butrans so she'll see how those patients do on Butrans and if they have success with Butrans,maybe she'll look at Butrans then.
PPLPMDL0020000001	Independence	OH	44131	4/28/2011	Dr Sundaram said that he prescribed Butrans for a patient last week. I asked him to describe the patient he chose. He said it was a male patient with chronic back pain who had been on "a lot" of narcotics years ago but had weaned himself off them since then. Dr Sundaram said that the patient had been experiencing pain despite using NSAID's to help control it. He said he had not yet received feedback but would let me know when he does. I invited him to the May dinner but he declined. I asked if he would consider a webcast instead & he said he would like more information on them as that may be more reasonable for him to do. Also discussed OxyContin as an option for patients beyond Butrans 20mgc dose.<font color=blue><b>CHUDAKOB added notes on 05/05/2011</b></font>Great question asking to describe the patient he chose? You got some good information!
PPLPMDL0020000001	Bedford Heights	OH	44146	4/28/2011	Followed up with Susan (Office Manager/appointment scheduler) as Dr Hochman had asked in effort to schedule a follow-up appointment with him to discuss Butrans. Reviewed Butrans indication, dosing, CIII, abuse/addiction potential, & managed care with her. She said she remembers my last meeting with him & said she would give Dr Hochman my information, remind him about Butrans, & request a follow-up appointment.
PPLPMDL0020000001	Cleveland	OH	44130	4/28/2011	Dr Diab said that he will not be able to attend the May Butrans program because he works until 8PM on Tuesdays. I showed him a demo patch & asked how he thought his chronic pain patients would feel about applying one of them every week as an option vs taking around-the-clock oral pain medication. He said the patch was "very nice". Positioned Butrans as a CIII, long-acting option for appropriate patients after NSAID's/COX-2's. He said he would keep Butrans in mind for those patients. Also reminded him commercially insured patients who use the savings cards would pay only \$15 out-of-pocket & showed him OxyContin savings cards as well.
PPLPMDL0020000001	Independence	OH	44131	4/28/2011	Dr Faiman said he was having a hard time "fitting in" where to use Butrans. Discussed positioning & appropriate patient type. I presented initiation/titration guide pg 6 & asked what his thoughts were on trying Butrans on patients who have a chronic condition causing moderate pain who are no longer getting relief from NSAID's or COX-2's (ie patients for whom he would typically prescribe Vicodin, Percocet, or tramadol around-the-clock). He said he had not considered these patients before but would definitely think of those patients now that he knows where to position Butrans. Reviewed managed care/savings cards. He asked about OxyContin Medicare Part D coverage. Reviewed formulary grid. He also said an "alert" went out throughout The Clinic making docs aware that Opana ER can be more easily manipulated for abuse than OxyContin so to be cautious giving Opana ER to patients requesting it. Told him we have no data to suggest that. He said he knows that but it is something The Clinic says-font color=blue><b>CHUDAKOB added notes on 05/05/2011</b></font>Very good call note! You captured the essence of the call. Keep focusing on his opioid naive patients. Sounds like that is where he might prescribe it.
PPLPMDL0020000001	Parma	OH	44129	4/28/2011	Spoke with Dawn (Nurse & office manager) as Jen was out of the office today. Discussed Butrans- appropriate patient type, dosing, titration, application, CIII, & abuse/addiction potential. Dawn said that she thinks that Jen will start using Butrans if/when Dr Nickels starts prescribing it more. She said she does not think Jen would prescribe it if Dr Nickels didn't since she is more quiet, reserved, & more of a "follower". Dawn said that she can think of a few different patient types that Jen sees that Butrans could be a good option for. Showed Dawn the demo patch & discussed the webcasts with her. Dawn said she thought those might be something that Jen would do & said she would give her the information when she returns to the office. Also discussed Ryzolt, which Dawn claims Jen is writing a lot of.
PPLPMDL0020000001	Cleveland	OH	44113	4/28/2011	dr said he's stopped prescribing Butrans as 3-4 patients he started got systemic rashes on body.I asked dr if patients applied alcohol to application site so perhaps that could have caused rash? dr said no,these were not application site rashes,they were all systemic rashes on body and he's confused because there's no report of this being systemic in Butrans fpi.I talked to dr about Butrans fpi,noting severe application site rashes,but dr said he's at a standstill now with this occurring.
PPLPMDL0020000001	Stow	OH	44224	4/28/2011	Dr popped in breakfast and said he had to get started, but has not startede Butrans patient. Reminded of 10mgc start in his opioid experienced patients and saigns card program.Gave him invite to Butrans program in worked orthopedic dept - dr bohl and dr berkowitz.
PPLPMDL0020000001	Cleveland	OH	44113	4/28/2011	Spoke with Katrina, we reviewed the Butrans medication guide and I asked for her assistance in instructing the patients on proper use and application. We reviewed OxyContin as an option when Butrans may not provide adequate analgesia. Reminder to recommend Senokot S.
PPLPMDL0020000001	Rocky River	OH	44116	4/28/2011	
PPLPMDL0020000001	South Euclid	OH	44121	4/28/2011	Spoke to Melinda about the stocking of Butrans. She is new to this store she was unsure. Tech, Janet confirmed that they have it but they have not seen anymore scripts since the last time I was in. I reviewed the indication, dosing, and the proper application. I explained the savings card and the relay health program which was also unaware of. Gave them a REMS webinar for pharmacist.
PPLPMDL0020000001	Mayfield Heights	OH	44124	4/28/2011	Window call....I discussed the Butrans patient type and explained the upcoming program. I asked if she would be available to come. She said she can't commit right now but she is interested. Told her I would check back.
PPLPMDL0020000001	Cleveland	OH	44130	4/28/2011	Spoke briefly with Allison (pharmacist) who said that she has not dispensed Butrans yet. Reviewed patient information guide. She said she would keep one on the shelf for patient counsel & would let me know if she wanted to keep more on hand to give to customers. Reviewed application & disposal as well as e-voucher for Butrans & savings cards for OxyContin for eligible patients.
PPLPMDL0020000001	Cleveland	OH	44130	4/28/2011	Spoke with Diane who said they had still not dispensed Butrans yet. I asked if she had any recommendations of prescribers who I may want to contact based on the patient type, but she did not have any suggestions.
PPLPMDL0020000001					Reviewed patient information booklet & discussed savings opportunities for eligible Butrans & OxyContin patients.

PPLPMDL0020000001	Parma	OH	44129	4/28/2011	Spoke with MA, Shari, who said that Dr Paat had to go to the hospital to see a patient unexpectedly, so he was not in as scheduled. Discussed Butrans dosing, patient type, & savings cards/eligibility with her. She said she does not think Dr Paat has prescribed Butrans yet & that he may have forgotten. She said she would remind him & would give him the information I left. Also gave her formulary grids for Butrans & OxyContin. She said sometimes Dr Paat does ask her about coverage, so she would be able to use them.
PPLPMDL0020000001	Cleveland	OH	44109	4/28/2011	i talked to Alan,Pharmacist,about Butrans stocking,scripts from doctors-Alan said Dr.Tabbaa,Dr.Ryan,Dr.Shen and Dr.Hernandez have written Butrans,i asked Alan if he did any patient counseling on Butrans application? Alan said a little,its like any other patch so he tells patients to rotate Butrans patch.i showed Alan Butrans patient information booklet and he said they had some in pharmacy.i asked about insurance plans here and Alan said Medicaid and BWC are two biggest plans.we talked about OxyContin savings cards but Alan said he doesnt need them same as medicaid patients cant use them and they are the one's mainly getting OxyContin.i asked Alan if he recommends senokot-S,to patients taking opioids? Alan said he does recommend a laxative but usually generic brands as Senokot-S is expensive.i gave Senokot-S protocol pad to Alan.
PPLPMDL0020000001	Mayfield Heights	OH	44124	4/28/2011	Quick call.....i reviewed the Butrans patient type and asked him to think of prescribing butrans before going to hydrocodone ATC. I gave him an invitation to the Butrans peer group program. He said he would try. Gave formulary grid.
PPLPMDL0020000001	Cleveland	OH	44113	4/28/2011	dr said he started 3-4 patients on Butrans.i asked what triggered dr to think of Butrans for these patients? dr said 1 patient was taking Vicodin and it wasnt working anymore so he wanted to try Butrans and then another patient was newer to his practice,not been on opioids,so he wanted to try Butrans in that patient.i asked dr about the patients who have been taking opioids,that he started on Butrans,if they need to be titrated will dr bring them back in office or call in refill? dr said if he just saw the patient,he'll call in the refill but if it was awhile ago,then he will bring the patient back in to office for an exam and increase dose at that time.i asked dr if he needed Butrans patient information booklets and he said no they had plenty in exam rooms.we discussed BWC and commercial plan patients starting on Butrans and dr said he's not worried about insurance and will do Prior Authorization for medicaid patients if they need it done.
PPLPMDL0020000001	Stow	OH	44224	4/28/2011	Steve said he almost prescribed Butrans the other day. HE said he had a pateint who was coming in who had never been on anything but NSAIDS and he said to him, that is the perfect candidate, and he never came in. I said if that is the patient he is looking for in their practice than he may have a harder time finding someone for Butrans since he told me everyone who comes in is usually on an opioid. We discussed 10mcg starting dose for those patients and titration. Reviewed managed care coverage grid and savings cards program. I gave him inviet for the Butrans program and he said he may come.
PPLPMDL0020000001	Stow	OH	44224	4/28/2011	Introduced Butrans, relieved FPI, indication, boxed warning, dosing and administration, titration, 5 core messages. She said this is really nice because she is new to the practice and she doesnt know her patients really well, She likes the fact it is once a week. I reminded her it is a schedule 3 and that it still has the same potential for abuse as other schedule 3 opioids. She said she would try it, she had to go. I rieweud managed care and saigns cards program with her as well quickly
PPLPMDL0020000001	Cleveland	OH	44105	4/28/2011	Abdul,Pharmacist,said he hasnt seen any scripts for Butrans yet and he has the medication in stock.Abdul asked who i was working with in the area so we discussed specific physicians and Abdul said he gets Dr.Celeste,Talbot,Carson,Harrington,Tabbaa and Ryan's patients.i asked Abdul if he would ever recommend Butrans to doctors,if patients are telling him their short-acting opioids arent lasting long enough? Abdul said no,he wouldnt recommend any medications to doctors but he would recommend Butrans to patients,to talk to their doctors.Abdul asked if i had anything i could leave that was educational for patients? i showed Abdul the Butrans patient information booklet and said i could leave 1 booklet and if he could talk to 1 patient about Butrans and that patient gets started on Butrans,then i will leave more Butrans patient information booklets for him.i asked if Abdul needed any more OxyContin savings cards or conversion guide,he didnt and he has all 7 tablet strengths in stock.
PPLPMDL0020000001	South Euclid	OH	44121	4/28/2011	Quick call with pharmacist, Amanda, as she was very busy. I asked about the movement of Butrans. She said she had not filled any scripts since the one that was previously written and written incorrectly. ti gave her the savings card sell sheet and the REMS webinar for pharmacist.
PPLPMDL0020000001	Cleveland	OH	44130	4/28/2011	Dr Fedorko said he has not yet had any clinical feedback on Butrans. I asked him if he would prescribe Butrans instead of Vicodin for patients who have a chronically painful condition instead of around-the-clock Vicodin. He said he would do this. He added that he thinks Butrans is "better" because it does not have "street value" & "kids on the street won't sell it". I reminded Dr Fedorko that Butrans is a CII medication & an opioid, which means it does have abuse & addiction potential just as any other opioid does. He said that he knows that but that he feels that it is less likely to be abused. I told him there is no data to suggest that & that Butrans is abusable. Reminded him of commercial insurance coverage & savings cards for eligible patients.
PPLPMDL0020000001	Berea	OH	44017	4/28/2011	I reviewed the managed care grid for Butrans and patients can get Butrans for as low as \$15 per month with the savings cards. Reminder about OxyContin as a Q12hr option as well. I also spoke with Shirley about the managed care.
PPLPMDL0020000001	Cleveland	OH	44113	4/28/2011	dr said he's not sure about Butrans yet as he needs some experience with the medication and has to get comfortable with it.i asked dr what his max dose of tramadol is that he'll prescribe? dr said 300mg tramadol.I told dr when patients are at that point,300mg tramadol,but telling him that dose isnt controlling their pain anymore or they are asking for something different,thats where Butrans could be placed dr asked if patients could take Butrans and tramadol at same time,wondering if there would be any interference with the mu-opioid receptors? i showed dr Butrans fpi,section-initiation of therapy and maintenance of therapy,told dr he can choose opioid or non-opioid medications with Butrans.i asked dr what he does right now,when patients are at 300mg tramadol and its not working? dr said nerve blocks,injections,refers to pain mangagement.i asked if dr could think of 1 patient to start on Butrans,dr said yes,discussed formulary coverage.discussed Ryzoit and Ryzoit value cards
PPLPMDL0020000001	Parma	OH	44129	4/28/2011	Laura was filling in for Jen at the Parma location today. She said that Dr Nickels has started a few patients on Butrans but has not had feedback so far. She said that if he starts to use it more, she probably will too. I asked what types of patients Dr Nickels has started. She said that one that sticks out in her mind has kidney problems due to diabetes, so Dr Nickels did not want that patient taking any acetaminophen or ibuprofen anymore so he switched that patient to Butrans. She also said that this patient had Caresource & she knows for sure that the prescription just got approved yesterday. She said this was a patient type she would also consider for Butrans if she encounters more like him (ie renal issues). She asked what types of patients other physicians are prescribing it for. Reviewed various patient types (opioid-naive, patients asking for more Vicodin or a switch in medication). Gave her information about upcoming webcasts- she said she would like to take part in one.
PPLPMDL0020000001	Stow	OH	44224	4/28/2011	I asked Dr what do his new patients typically come in on when they are new and he said usually some dosage of Vicodin. I asked how many of those patients are chronic when they come in and he said probably the majority of them. I asked what is his goal with them and he said to put them on a long acting. I asked how long does that take to get them on a long acting and he said they have a consult and then he puts them on a long acting. I asked where he would write Butrans and he said probably in a patient taking Vicodin or Percocet ATC. We talked about 10mcg starting dose and reviewed tapering. HE then said once a day, right? i said no once every 7 days and it is schedule 3 so he can call it in. HE said oh, he can think of some patients this would be good on. Reviewed managed care formulary grid and savings card program. Gave him invite to program in Cleveland. Discussed the patients on Vicodin ATC if they are on more than 40mg a day going to Oxycontin q12h.
PPLPMDL0020000001	Cleveland	OH	44109	4/29/2011	i talked to Shelby,Pharmacist,about Butrans initiation guide and who the appropriate patient is to start on Butrans and what i am saying to doctors in the field so she understood my messaging.Shelby said she thinks a few doctors have prescribed Butrans but couldnt look that information up for me,to confirm right now.we talked about Butrans application dvd/booklet and i asked Shelby if this patient education tool was valuable to her and the pharmacy staff,when educating patients? Shelby said yes and asked that i leave a few booklets.we talked about Butrans formulary coverage and patient savings cards for commercial plan patients.i asked Shelby if she would recommend Butrans to doctors,for those patients that are complaining to pharmacy that their pain isnt controlled with their short-acting opioid? Shelby said she usually doesnt do that and probably wouldnt but she will keep patient education booklets and perhaps give 1 or 2 to patients like this and see if they talk to their doctors
PPLPMDL0020000001	Parma	OH	44129	4/29/2011	Spoke with MA Jill & tried again to schedule an appointment with Dr Gallagher to follow-up on our Butrans discussion. She said that he is not doing any appointments right now due to his schedule. Discussed Butrans indication, dosing, & appropriate patients as well as Butrans & OxyContin savings cards for eligible patients. She said she would give my information to Dr Gallagher & to check back later next month when Lynn (nurse) is back in the office to try to schedule something with Dr Gallagher. Also left invitation for May dinner.
PPLPMDL0020000001	Westlake	OH	44145	4/29/2011	Quick follow up thru window, I asked if he was able to see Butran in the e-prescribing and he said it is working now. I asked if he would prescribe for just one patient today so he can start gaining some experience with Butrans. He agreed and said that he knows Dr Kaslan as been prescribing quite a bit. Reminder that OxyContin is still a Q12hr option for appropriate patients.
PPLPMDL0020000001	Independence	OH	44131	4/29/2011	I asked Dr Pai what his usual trigger is to move a patient from a short-acting around-the-clock pain medication to a long-acting option. He said it really depends on the patient & their condition. He said that some patients "become fixated" on taking pills every few hours for their pain, so it can be difficult to change them to a long-acting option. Discussed Butrans positioning. He said that he would prescribe Butrans for appropriate patients before going to a short-acting opioid if he knows the patient's condition is chronic. He also said he would prescribe it for patients already on an opioid if they requested an increase in dose or change in medication. He added that he is very comfortable with buprenorphine & has "no problems" with Butrans, it can just be difficult to find patients who have commercial insurance who fit the indication also. He said he is looking for more Butrans patients. Discussed OxyContin as a long-acting option for appropriate patients beyond Butrans 20mcg.
PPLPMDL0020000001	Cleveland	OH	44113	4/29/2011	i talked to dr about patients she's started on Butrans and why she chose Butrans.dr said these patients were all taking vicodin or percocet and not controlled and asking her for something different or more medication,so she talked to patients about Butrans.dr said she likes that Butrans is a patch and once weekly dosing is simple for patients.we talked about Butrans initiation guide and patient information booklet/application dvd and how this is helping her patients as an educational tool.i asked dr if she will see a few patients today and next week,that she can start on Butrans? dr said yes,we discussed BWC and commercial plan coverage for Butrans.i recommended Spoke with Denise who said that Dr Boose has not yet prescribed Butrans so she still has plenty of savings cards. Discussed indication, dosing, & delivery system as well as positioning. She said i would have to wait until my lunch to have a discussion with Dr Boose about it. She also said she has enough OxyContin savings cards for now. I asked her to give some Butrans information to Dr Boose & she agreed to do this.
PPLPMDL0020000001	Cleveland	OH	44113	4/29/2011	worked pain management dept-dr shen and dale novak,pa
PPLPMDL0020000001	Westlake	OH	44145	4/29/2011	Quick call at window, I reminded Dr of what he said about using Butrans instead of vicodin when appropriate. He said that he will try Butrans and he just forgot. He asked about managed care and we reviewed managed care for Butrans and that OxyContin is an option if Butrans is not covered.
PPLPMDL0020000001	Cleveland	OH	44109	4/29/2011	i talked to dr about Butrans being an option for patients taking short-acting opioids that tell him their pain isnt controlled,showed dr Butrans initiation guide for discussion.dr said he only has a few patients taking short-acting opioids and noone has complained to him yet,but he does think Butrans is a great option being transdermal and once weekly dosing,we talked about commercial plan coverage and BWC coverage for Butrans.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	4/29/2011	dr said he hasnt started anyone on Butrans yet only because he hasnt had many patients ask him for something different they are all doing well on short-acting opioids.dr said he remembered Butrans being transdermal and once weekly dosing option and that its a CII,but couldnt remember insurance coverage,we talked about dr considering patients with BWC or commercial plan insurance that are taking short-acting opioids but telling him,or nurse,that pain isnt controlled, and they are asking for something different.dr said ok he'll keep it in mind.i asked dr if he could think of 2 patients today and next week to consider initiating Butrans? dr said he will do his best to keep Butrans in mind and if appropriate,he will talk to patients. I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	4/29/2011	dr said he hasnt started any patients on Butrans but he does have some patients in mind because he likes that Butrans is a patch and dosed once a week and some of his patients taking short-acting opioids will ask him for something different. I asked dr if he would see 2 patients today or next week,that he feels Butrans would be appropriate? dr said he's not sure,but will keep in mind.we talked about Butrans patient savings cards and i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44130	4/29/2011	Spoke with technician who said the pharmacist could not see me today. Discussed savings for Butrans & talked about going online to Butrans.com to print savings cards if necessary. Also discussed OxyContin savings cards & eligibility requirements. Gave her online pharmacist education information to pass along to the pharmacists.
PPLPMDL0020000001	Cleveland	OH	44109	4/29/2011	i talked to dr about patients taking short-acting opioids,that are saying their pain isnt controlled and considering Butrans as an option,instead of refilling the short-acting opioids.dr said to remind him of insurance,commercial plans and BWC for Butrans and he will start a few patients on Butrans.i recommended Senokot-S

	Westlake	OH	44145	4/29/2011	Quick call at window, I asked if he has thought more about where Butrans might fit in. He said he didn't know, he will probably want to see where the specialist use Butrans. I reviewed managed care for Butrans and OxyContin with Claudia. -font color=blue>-cb>CHUDAKOB's query on 05/05/2011</b>-</font>How will he know where the specialist is using Butrans? Did he do the same when prescribing OxyContin? Sound like he doesn't understand the molecule or the positioning?<font color=green>-cb>HOLUBA's response on 05/09/2011</b>-</font>I agree. The first time we discussed Butrans in depth, he said he didn't know if he would use it. He does not seem to understand positioning or see any benefits at this point. I will work on it. -font color=blue>-cb>CHUDAKOB added notes on 05/11/2011</b>-</font>-OK. Glad we are on the same page!
PPLPMDL0020000001	Cleveland	OH	44109	4/29/2011	worked pm&r dept-see call notes; worked internal medicine-left Butrans initiation guide and patient information booklet and business card-for Dr. Lindheim,Dr.Ricanati,Dr.Harrington and Dr.Falck-Ytter
PPLPMDL0020000001	Westlake	OH	44145	4/29/2011	I asked her thought about Butrans 7 day dosing for her patients. She said it sounds like a good option. I asked if she would give it a try for just one patient today and she said she will try. She just forgot about it.Reminder about Butrans and OxyContin managed care coverage.
PPLPMDL0020000001	Beachwood	OH	44122	4/29/2011	Spoke with pharmacist, Elsa, who said that she has not dispensed any Butrans but said she has seen it on the shelf. Discussed Relay Health e-voucher for eligible patients. Also discussed OxyContin savings cards & reviewed eligibility for savings programs, reminding her that patients with any type of government insurance are not eligible to use the savings cards. Also gave her online pharmacist education flyer.
PPLPMDL0020000001	Beachwood	OH	44122	4/29/2011	Quick call- Saw Dr Yokiel at the window briefly. Invited him to Butrans dinner program in May. He said he was not sure if he would be able to attend as Tuesdays he is in New Philadelphia, but he may be able to come. Spoke with Vickie who said she still has enough patient education & savings cards for now. She has not heard any Butrans feedback. Also spoke with Laura who asked if she could give a copy of the Butrans dinner invitation to Dr Barrett as well.
PPLPMDL0020000001	Rocky River	OH	44116	4/29/2011	Spoke with Stan, I reviewed the Butrans medication guide and I asked for his assistance in instructing the patients on the proper use and application. We discussed steady state and that patients should wait till day 3 before titration. Reminder about OxyContin as an option and I asked if he would recommend Senokat S.
PPLPMDL0020000001	Westlake	OH	44145	4/29/2011	Spoke with Lisa, I reviewed the medication guide for Butrans and the managed care and savings program. We discussed that patients can titrate after 3 days. Reminder about OxyContin as a Q12hr option when patients might not get adequate analgesia with Butrans. I asked her to recommend Senokat S.
PPLPMDL0020000001	BEACHWOOD	OH	44122	4/29/2011	Spoke with Bill Bidwell (pharmacist) & asked him if they would be willing to open a carton of Butrans to dispense fewer than 4 patches if they received a prescription written that way. He said that he would have to check with Sandy, the pharmacy manager, to see what her thoughts were on this. He made a note to call her & told me to give him about a week & then to check back. Discussed Butrans e-voucher & OxyContin savings cards & reviewed eligibility for savings programs (ie patients with government insurance are not eligible). Also gave him online pharmacist education information.
PPLPMDL0020000001	Cleveland	OH	44109	4/29/2011	I talked to dr about why he hasnt started any patients on Butrans yet,dr said he just hasnt thought much about Butrans.i asked dr if he hears from patients,that their short-acting opioids arent controlling their pain anymore and they ask him for something different? dr said yes,he hears that from patients.i showed Dr Butrans initiation guide and said thats where he can think of Butrans.we discussed proper tapering and initiation of Butrans 5mgc or 10mcg and discussed formulary coverage.i asked dr if he could start a few patients on Butrans like we discussed to give it a fair trial? dr said yes he will do that.i talked to dr about OxyContin being an option,after Butrans 20mcg,with 7 tablet strengths and preferred coverage on medicaid and we discussed OxyContin coverage on medicare plans and commercial plans.i recommended Senokat-S
PPLPMDL0020000001	Cleveland	OH	44130	4/29/2011	Quick call- Saw Dr Kansal at the window briefly. Asked him if he thought any of his patients taking around-the-clock short-acting opioids for a chronically painful condition might like the option of a once-a-week transdermal system. He said he didn't know & then walked into a patient room. Dorothy said he has been especially busy lately. Reviewed Butrans, OxyContin, & Ryzoft savings cards with her.
PPLPMDL0020000001	Mayfield Hts	OH	44124	4/29/2011	Quick call.....invited doc to the Butrans Peer group program on May 24th. I told him that it would be a live speaker. He said he is familiar with the speaker and would try to attend. He asked me to remind him.
PPLPMDL0020000001	Cleveland	OH	44113	4/29/2011	I talked to dale,pa,about considering his patients who are taking tramadol for chronic pain but telling him the medication isnt controlling their pain,to start them on Butrans.Dale said that made sense,would consider doing so and asked which dosage strength of Butrans would patient get started on,i taking tramadol? i showed dale Butrans initiation guide,discussed tapering and initiation of Butrans 5mgc or 10mcg,focusing on tramadol patients.i asked if dale will see a few patients today or next week,where he could consider initiating Butrans? dale said yes and we discussed formulary coverage for BWC and commercial plan patients. i recommended Senokat-S
PPLPMDL0020000001	Cleveland	OH	44130	4/29/2011	Spoke with MA (Heather?) who said that neither Dr Sawnyh & Shelley were available to speak with me. Reviewed Butrans information with her & asked her if Dr Sawnyh ever attends dinner programs. She said that he does occasionally. I gave her an invitation & she said she would give it & the information I gave her to him. Also asked her to give Shelley an OxyContin formulary grid & she said she would.
PPLPMDL0020000001	Cleveland	OH	44109	4/29/2011	I talked to Erin,Pharmacist,about Butrans initiation guide and who the patients were that I am talking to physicians about,that are appropriate for Butrans.Erin said she thinks Dr.Nickels has started a few patients so they ordered Butrans and will have it in stock.we talked about importance of stocking all 3 dosage strengths of Butrans so patients arent turned away and told to return in 24hrs,Erin understands that and said they were waiting for 1st script of Butrans to come through.we discussed managed care coverage for Butrans and Erin asked about medicaid and medicare coverage so we talked about these 2 plans as it relates to Butrans and i told Erin Medicare will not cover Butrans and medicaid requires a prior authorization.i asked Erin if she would recommend Butrans,when speaking to doctors about patients taking short-acting opioids that might be telling her their pain isnt controlled with the short-acting opioids? Erin said it depends on the physician,but she would consider it
PPLPMDL0020000001	Euclid	OH	44117	5/1/2011	Spoke with doc about the Butrans indication, patient type and dosing. Reviewed how to initiate for both opioid naive as well as opioid experienced. He said he would try for opioid naive - after tramadol failures. Doc committed to prescribing for those patients with BWC.
PPLPMDL0020000001	Lakewood	OH	44107	5/2/2011	Quick call at window, I asked Dr if he could start just one new patient today on Butrans. He said that he will try to remember. I reviewed the managed care and appropriate patient types with Jamie and she agreed to help reminded him if an appropriate comes in.
PPLPMDL0020000001	Westlake	OH	44145	5/2/2011	Dr said he has just not remembered Butrans, we reviewed the initiation guide again and I asked his thoughts as to where it will fit into his practice. He said he is not sure yet. We reviewed the managed care for Butrans and the savings cards. I asked if he would try it on just one patient to start gaining g experience and he said he will consider it.
PPLPMDL0020000001	Lakewood	OH	44107	5/2/2011	I asked Megan about the Butrans movement, she did not think there have been any scripts. We reviewed the Butrans medication guide and asked for her help in teaching the patients about hoe to use Butrans. Reminder about OxyContin and Ryzoft as other options and that we are still discussing them with Drs in the area. I asked if she would recommend Senokat S and she agreed.
PPLPMDL0020000001	Lakewood	OH	44107	5/2/2011	Quick call as she returned from the hospital. I asked if she sees a place for Butrans in her practice, not just nursing homes. She said she does if managed care is covered. We reviewed the managed care and savings cards for Butrans. Reminder that OxyContin is covered on Medicaid and some Med D as another option.
PPLPMDL0020000001	Lakewood	OH	44107	5/2/2011	Quick call thru window, I was reviewing the manged care and savings cards for Butrans with Angela and Dr said he has not had a chance. I asked if he would try just one patient this week with commercial insurance and he agreed. I also reviewed the managed care and OxyContin savings cards with Angela.
PPLPMDL0020000001	Westlake	OH	44145	5/2/2011	Caught Dr while he was finishing up with a patient and he decided to give her a Butrans script right then. He reviewed the initiation guide and decided to initiate 10mcg since she was already taking 5mg vicodin. He gave her a savings card and a patient medication guide. I invited Dr to peer group and he said he would like to go and will have vice call and register him.
PPLPMDL0020000001	Lakewood	OH	44107	5/2/2011	I asked Dr how his Butrans patient is doing and he said he has not heard back yet. I asked if he would continue to start new patients so that he can gain more experience with Butrans and he said he will. Reminder about OxyContin as a Q12hr option and he said he does prescribe in the hospital. He let me know that Katie resigned and will be working at CVS minute clinic.
PPLPMDL0020000001	Lakewood	OH	44107	5/2/2011	I asked Dr if she would be seeing just one patient this week on 3-4 5mg vicodin whose pain is not well controlled? She was not sure. I asked if she would try just a few of these types of patients on Butrans and she agreed. Reminder about OxyContin as a Q12hr option and is covered on Medicaid.
PPLPMDL0020000001	Westlake	OH	44145	5/3/2011	Dr said that he still has no feedback from the one Butrans patient he was tapering down from OxyContin. We reviewed the initiation guide and he said that he would like to covert more of his BWC patients out to Butrans and he committed to doing so. He said that he is still seeing some patients who are more appropriate for OxyContin because they have severe pain and he is also performing injections for them as well. I spoke with Angela and Danielle and they are both reminding the Dr to start appropriate patients on Butrans.
PPLPMDL0020000001	Westlake	OH	44145	5/3/2011	I reminded Dr of our last conversation about prescribing Butrans after tramadol or celebrex and instead of vicodin for appropriate patients who meet the Butrans indication. I asked if he would start a patient like this this week and he agreed. We reviewed commercial patients for Butrans. Reminder that OxyContin is still a Q12hr option and he said he continues to start patients on OxyContin since they are usually on higher doses of vicodin or I asked Dr. Yee if he had initiated therapy to any of the patients we had discussed on

PPLPMDL0020000001	Akron Akron	OH OH	44320 44320	5/4/2011 5/4/2011	Misty said she initiated her first patient on Butrans and was really pleased. She said she would continue to initiate therapy to patients who are on low doses of Vicodin and Percocet ATC. I asked Dr. Bonyo if he saw a benefit to prescribing a product that provided 7 day analgesia and he said he thinks so. I reminded him that Butrans was an option for patients requiring an ATC opioid analgesic.<font color=
PPLPMDL0020000001	Rocky River	OH	44116	5/4/2011	Spoke with Sharon, we discussed the Butrans medication guide and how to instruct patients about the proper use of Butrans. We discussed the savings cards and commercial insured patients. We discussed OxyContin as an option when Butrans does not provided adequate analgesia. Reminder to recommend Senokot 5 with opioid scripts.
PPLPMDL0020000001	Fairlawn	OH	44333	5/4/2011	Spoke to Gary. Al is the other pharmacist typically there. Gary told me that because they did not see movement with Butrans they shipped it back. I explained that I had been out in the field for a short time and there was movement in the area. I told him I was surprised he had not seen movement and that was not the case for other pharmacies in the area. He said if a script came in he could get it in 24 hours.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	5/4/2011	Introduced Butrans and FPI. He said that this may be an option for his patients who have never been on opioids and said he would review the information.
PPLPMDL0020000001	Rocky River	OH	44116	5/4/2011	Met Dr in Dr Raslan's office. We discussed pain management topics and how to protect your practice with the tools available. Dr Raslan told him where Butrans and OxyContin fit into his practice.
PPLPMDL0020000001	Westlake	OH	44145	5/4/2011	Dr said that he likes to use Butrans as another option for vicodin. He will use Butrans in his rotation with vicodin and tramadol. After Butrans he would most likely try Duragesic or Methadone. He said prefers not to prescribes OxyContin but said he will use it when a patient has cancer. I asked if he would continue to use Butrans as an option, he said he will and it helps when I come by and remind him often.
PPLPMDL0020000001	Fairlawn	OH	44333	5/4/2011	Spoke to Gilbert who was a fill in pharmacist for the day. Jessica and Bobby were both unavailable. I discussed Butrans and explained how I was positioning it physicians. Gilbert suggested hammering home the Schedule 3 message and that it was LAO. He told me Butrans is a great product and there is a definite need in the market for it.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	5/4/2011	Introduced Butrans and FPI. Dr. Sassano said that the patients he had in mind would be conversions from Percocet and Vicodin to Butrans. He like that this was a single entity, LAO, schedule 3 drug. He said he already had patients in mind and committed to trying it.
PPLPMDL0020000001	Parma	OH	44129	5/4/2011	Spoke with Jackie who said that she had called her manager to make sure she can open Butrans cartons to dispense fewer than 4 patches of Butrans. She said he has still not called her back, so if she gets prescriptions in the meantime, she will open the box as she sees no issue with that. Discussed appropriate Butrans patients & patient counsel.
PPLPMDL0020000001	Akron	OH	44320	5/4/2011	I asked Dr. Duppdastni said he had not yet tried Butrans therapy. She said that it was a managed care issue. I explained our coverage on commercial insurances and BWC and she seemed surprised I asked if this made her feel more confident and she said it did. I asked if she had a clear understanding of what type of patient was ideal for therapy and she said yes but seemed uncertain. I explained the patient type using the titration guide.
PPLPMDL0020000001	Copley	OH	44321	5/4/2011	Explained what type of patient to initiate Butrans therapy to using the initiation and titration guide. I explained that for more severe patients OxyContin may be an appropriate option.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	5/4/2011	Re-introduced Butrans and FPI. Dr. Higley said he liked this concept and would absolutely give it a try. He was most interested in converting patients from Percocet, which I explained using the initiation and titration guide. He said he had several patients in mind and committed to trying it.
PPLPMDL0020000001	Parma	OH	44129	5/4/2011	Spoke with Sam (pharmacist) & asked what their policy was on dispensing one Butrans patch if they get a prescription written that way. Sam said he will have to check with the pharmacy manager at that location. He said that he has seen some instances where they will open a box of a product & others where they will not. Told him that it is Purdue does not mandate that the carton cannot be opened & explained that some physicians write for one patch initially to ensure correct dosage for that patient before prescribing more. He asked what the maximum dose was. I told him it is 20mcg & that we only recommend that a patient wear one patch at a time, applied every 7 days, as this is how we studied it. Discussed CII & abuse/addiction potential. Reviewed e-voucher & offered additional OxyContin savings cards but he said they have some.
PPLPMDL0020000001	Bedford	OH	44146	5/4/2011	I asked Dr Haddad what feedback he has received from his patients for whom he has prescribed Butrans. He said that one of the patients is very happy with the analgesia she is getting from Butrans. He said that the patient's insurance would not cover Butrans, so the patient had to pay out-of-pocket for it- He added that this patient is so pleased with Butrans that she told Dr Haddad that she is willing to continue to pay out-of-pocket for it. Reminded him of savings cards & discussed eligibility. He said he had forgotten but would give one to the patient when he sees her & will remember them for future patients. I asked if he had considered using Butrans for patients who call too soon for refills of their short-acting pain medications- he said he has not, but will consider using it there as he does not like to give those patients what they ask for usually. Also discussed OxyContin as a q12h option for patients beyond Butrans 20mcg. He also said he will attend the program the 24th.
PPLPMDL0020000001	Independence	OH	44131	5/4/2011	Quick call- invited Dr Trickett to Cleveland dinner program & let her know about limited attendance. She said that she would really like to go to discuss with other physicians how/where they are using Butrans, but that it is very difficult for her to make it to them depending on when they occur. I added that we also have webcasts available that may be more suitable to her schedule & gave her information on May 11th date. Discussed Butrans positioning & Dr Trickett said that she really doesn't know why she hasn't prescribed Butrans since that first prescription. She said again that she would like to discuss Butrans with other physicians to find out more about how it is being prescribed & how to transition a patient from a short-acting around-the-clock oral pain medication to a long-acting transdermal system.
PPLPMDL0020000001	Hudson	OH	44236	5/5/2011	I asked Dr Seiple why he has not yet prescribed Butrans. He said it is really going to take a very specific type of patient & will only fit in a small niche. He added that he recently spoke with a pain management specialist who indicated that in general, he does not like prescribing long-acting medications due to increased likelihood of dose escalation, although they did not discuss Butrans specifically. He also said that he does like buprenorphine as a molecule, but that "those things don't ever stick". I asked him to clarify & he said that he has found no transdermal product actual sticks like it is intended to. I showed him a Butrans demo. He said that it completely changes his opinion & that after seeing the demo & feeling it, he will prescribe Butrans. He added that he thinks I should show the demo to everyone I talk to. We reviewed managed care coverage & savings cards for those eligible. Also discussed OxyContin as an option for appropriate patients beyond Butrans 20mcg.
PPLPMDL0020000001	Hudson	OH	44236	5/5/2011	Introduced myself & Purdue's products to Dr Juliano. She said she had not heard of Butrans. Delivered 5 core messages & presented initiation guide. She said that she just had a patient who she thinks might have been a potential candidate, but since she did not know about Butrans, she ended up putting the patient on the lowest dose of fentanyl, although she wanted an alternative. She said the patient has ovarian cancer with chronic pain. The patient has difficulty swallowing & does not want any type of injection, so Dr Juliano decided a transdermal option would be best. She said had she known of Butrans, she would have rather started the patient on that, although the patient has Medicaid. Reviewed managed care & savings for eligible patients. She said she would keep Butrans in mind because she likes that it is transdermal & long-acting. Also discussed OxyContin as a long-acting option for appropriate patients beyond Butrans 20mcg.
PPLPMDL0020000001	Hudson	OH	44236	5/5/2011	I asked Dr Tosino what was holding him back from prescribing Butrans. He said he will probably never prescribe it. I told him this surprised me based on our previous conversations when he had said that he liked that Butrans is transdermal & only once every 7 days. He said he is trying to get away from "pain management". I asked him if he has patients for whom he is still willing to consider opioids as those would be the patients I would ask for him to consider. I added that Butrans is a CII opioid & like all opioids does carry abuse & addiction potential. He said he has some. I reminded him of Butrans positioning & asked what his thoughts were on using Butrans instead of short-acting around-the-clock opioids in appropriate patients. He said he prefers using long-acting medications whenever possible. Reviewed managed care coverage & savings cards & reminded him of OxyContin as a long-acting option for patients beyond Butrans 20mcg.
PPLPMDL0020000001	Cleveland	OH	44130	5/5/2011	I told Dr Diab I had an exclusive invitation for him for a Butrans webcast since he is unable to attend the dinner program this month. He said he thinks the date will work & asked me to put the information on his desk so that he could review it. Also reminded him that his commercial insurance patients can get Butrans for approximately \$15 out-of-pocket with the savings cards he has. He pointed out that he has savings cards for Butrans in the hallway with other products' savings cards as well as in his office on his filing cabinet.
PPLPMDL0020000001	Stow	OH	44224	5/5/2011	Spoke to Kim Armstrong who is pharmacy tech who works for Dr Yang, Bressi and Geiger and she said no one has written Butrans yet. She said Yang and the PAs writes most of the scripts and Bressi and Geigar do most of the procedures. Bressi does consultations. She said she and 3 other girls process 19000 prescriptions every month. She basically does the prior auths and processes the scripts. I gave her a formulary grid and told her where the Drs would use Butrans and he suggestions is to get in front of the Drs as much as I can. Gve her information and invite for the Drs. They do not write Oxycontin any more.
PPLPMDL0020000001	Akron	OH	44333	5/5/2011	Spoke with Dr. Ross and he was unsure about what A LAO, I explained steady state plasma concentrations and he seemed to better understand. I explained the patient type and he was interested in converting patients already on Vicodin or Percocet and I explained how to get patients started utilizing the initiation and titration guide.
PPLPMDL0020000001	Cleveland	OH	44130	5/5/2011	Spoke with Mindy (MA) who said that Dr Fedorko was already on his vacation, so he is not in this week & is out until Wednesday of next week. Discussed Butrans patient type with her & asked if she has any managed care issues with Butrans. She said she has not had any troubles so far. She said that she knows he has a couple patients on Butrans already & so far, coverage/cost has not been an issue, especially with the savings cards. Mindy said Dr Fedorko has a lot of patients who may benefit from Butrans & she thinks once he gets more familiar with writing it, he will prescribe it more frequently. Also discussed Ryzolt managed care & value cards.
PPLPMDL0020000001	Parma	OH	44129	5/5/2011	Dr Gigliotti said he "almost" had a Butrans patient, but that the patient elected not to take it. I asked him to clarify & elaborate by telling me more about the patient & more about why she did not want to be put on Butrans. He said that this was the first time he has seen this patient & she has lumbar stenosis & chronic pain from surgeries she had in the past. The patient's former physician had the patient taking 3-4 Vicodin per day & wanted to switch her to OxyContin, but the patient refused because she was "afraid" of it. He said that he told the patient about Butrans but she did not want to be on a patch. He said he explained to her that Butrans is not the same as Duragesic. He explained once-a-week application, but the patient said that she "wanted pills". Reminded him that patients can take supplemental analgesia if necessary, per FPI 2.4. He said the patient just refused but that he "is trying". Invited him to join May webcast, which he said he will do & marked his calendar
PPLPMDL0020000001	Akron	OH	44304	5/6/2011	Re-introduced Butrans and quickly showed him the initiation and titration guide through the window so he would have a better understanding on who to initiate therapy for. I asked him if he prescribed a lot of SAO's and he said he did.
PPLPMDL0020000001	Brooklyn	OH	44144	5/6/2011	Quick call- I asked Dr Detwiler what his thoughts were in participating in an interactive Butrans program & handed him an invitation. He said that dinners are too difficult to get to. I clarified by telling him this was a live webcast that he can do from home via computer. He said he may be able to join & said he would check into it. I pointed out the Butrans & OxyContin savings cards & reminded him to give those to appropriate patients with commercial insurance.
PPLPMDL0020000001	Parma	OH	44129	5/6/2011	Spoke with floater pharmacist & reviewed Butrans indication, dosing, & appropriate patient type/positioning. He said he has seen it on the shelves at some of the locations but has not yet dispensed it. Discussed savings via e-voucher for Butrans as well as savings cards for OxyContin. He said he would give my information to the pharmacist & pharmacy manager.
PPLPMDL0020000001	Parma	OH	44129	5/6/2011	Dr Roheny said he actually never found out what that patient's feedback was who he had put on Butrans. He asked Kathy to call her while I was there because he was curious how she was doing on it. After calling the patient, Kathy said the patient told her she could not get Butrans because her insurance wouldn't cover it. I asked questions to uncover what plan the patient had. Her primary insurance (with whom she has her prescription coverage) is through a pension but she did not say which company. Dr Roheny said this was not good feedback for me. I asked him why not try Butrans on other patients who meet the indication who have commercial insurance so that he can get true clinical experience. He said that "adds another layer" to the product & makes it one more thing he has to think about. I asked him if he thought his patients would benefit from Butrans- he did not answer. I invited him to take part in webcast & reminded him of OxyContin for appropriate patients & he walked away.
PPLPMDL0020000001	Garfield Hts	OH	44125	5/6/2011	I asked Dr Sadowski if he had identified any patients with chronically painful conditions for Butrans. He said he has not. I asked him if he thought listening to a discussion on Butrans amongst his peers & specialists might help him identify appropriate patients & he said maybe. I handed him a webcast invitation. He said that he would see if he could take part in it & would try. Spoke with Deena who asked me if Humana covered Butrans. Reviewed Butrans formulary grid & discussed coverage & savings cards for eligible patients. She also asked me if someone who was on 3 Vicodin per day plus 3 Lidoderm patches for arthritis would be a candidate for Butrans. Reviewed indication with her. She said that if the patient's insurance will not continue to cover her medications, she was going to ask Dr Sadowski to switch the patient to Butrans. Deena said that she is looking for Butrans patients because she believes it can benefit some of his patients.
PPLPMDL0020000001					

	Beachwood	OH	44122	5/6/2011	Spoke with Donnie (nurse) who said that Dr Warren will not be in during the afternoons this month as he will be over at the hospital instead. He also said that because of this, his mornings will be so busy that I should avoid coming to see him until next month. Discussed Butrans appropriate patient & savings cards for those eligible. He said Dr Warren has not yet used Butrans to his knowledge but was not sure why. Asked him to give Butrans information & webcast invitation to Dr Warren & he said he would.
PPLPMDL0020000001	Lakewood	OH	44107	5/6/2011	Spoke with Pam, she said she is surprised that more doctors are not prescribing Butrans instead of vicodin around the clock. She feels it is a great option. We discussed the initiating guide and where OxyContin may be an option when 20mcg Butrans may not provide adequate analgesia. We discussed the laxative lines for opioid induced constipation.
PPLPMDL0020000001	Lakewood	OH	44107	5/6/2011	Caught Dr at Lakewood office. I let him know he has Butrans savings cards here and gave him the initiation guide.
PPLPMDL0020000001	Lakewood	OH	44107	5/6/2011	Quick call, I asked dr if he has patients coming in today who are on vicodin around the clock. I told him those may be appropriate Butrans patients and asked him to try a few patients. He agreed. I reviewed managed care for Butrans with Kim, and we discussed OxyContin managed care as well.
PPLPMDL0020000001	Akron	OH	44319	5/6/2011	Re-introduced Butrans and the FPI. I asked him he felt like there was a place for Butrans in his practice and he said he wasn't sure. I asked if he felt comfortable prescribing LAO's and he said he did but wanted to review the information I was leaving before committing to starting a patient. I asked if I could come back next week and he agreed.
PPLPMDL0020000001	Akron	OH	44312	5/6/2011	Asked Dr. Manning through the window if he has had a chance to review any of the Butrans material that I had left. He said he briefly reviewed it and would look at it again. No new information learned.
PPLPMDL0020000001	Brooklyn	OH	44144	5/6/2011	Quick call- I asked Dr Miguel his thoughts on participating in an interactive Butrans webcast next week. He said he would look at his calendar & asked me to leave the information with Tiffanie.
PPLPMDL0020000001	Lakewood	OH	44107	5/6/2011	I asked Dr if he has patients on vicodin around the clock that could benefit from once a week Butrans. He said he will give it a try.
PPLPMDL0020000001	Westlake	OH	44145	5/6/2011	Quick call at window, Dr said she had thought of Butrans for a patient but they have Med D and she thinks it was too expensive. She thinks that Butrans would be great for older patients. I discussed the managed care where patients will have the best access to Butrans. I spoke with Linda about the savings program.
PPLPMDL0020000001	Akron	OH	44333	5/6/2011	I asked Dr. Shah if he was writing for refills and he said he was. He said that he was getting it approved on Medicaid and had yet to have to take a patient off Butrans. He said that he was very happy with Butrans therapy.
PPLPMDL0020000001	Uniontown	OH	44685	5/6/2011	Introduced Butrans to Dr. Stetler. He said he was prescribing low dose hydrocodone and thought Butrans was a good step therapy prior to using OxyContin. He said he thought there was a definite need for Butrans in his practice-Ce and committed to using.
PPLPMDL0020000001	Lakewood	OH	44107	5/6/2011	Dr said that he started a patient on Butrans, he said it was a patient who was taking a few vicodin a day, but has chronic arthritis pain. He said she does not like to take the vicodin and she waits until she has trouble walking before she will take a vicodin. He started her on 5mcg of Butrans. We discussed initiation and titration of Butrans and managed care. We discussed OxyContin as an option when Butrans may not provide adequate analgesia.
	Beachwood	OH	44122	5/6/2011	Dr Tabbaa said he has a patient on Butrans 5mcg who has complained of her Butrans not sticking for 7 days. He also said he has titrated her up to 10mcg. He added that the patient is happy with the analgesic results from Butrans & only has had issues with the patch not sticking for a week. Discussed ability to tape edges with first aid tape or cover with Bioclusior or Tegaderm. Jim said he gave the patient such covering today when they saw her. He added that they prescribed Butrans for 2 additional patients today. Dr Tabbaa said that he is getting good results with analgesia for his patients with Butrans. I asked how frequently he has to titrate. He said occasionally he titrates a patient to 10mcg but has not needed to put someone on 20mcg. He added that some patients do use supplemental analgesia with Butrans. Discussed managed care for Butrans & OxyContin & reviewed savings cards for eligible patients. Jim said he submitted a prior authorization for a Med D patient for Butrans today.
PPLPMDL0020000001	Akron	OH	44312	5/6/2011	Talked to the pharmacist and introduced Butrans. I explained the message I was delivering to physicians and explained steady state.
PPLPMDL0020000001	Shaker Heights	OH	44122	5/6/2011	Spoke with Dominique (technician) as all pharmacists were assisting customers & were "backed up". Reviewed Butrans positioning & went through patient information booklet. I asked if they have any problems opening a package to dispense fewer than 4 patches- she said this should not be an issue as they do this for various other products. Also discussed e-voucher for Butrans & OxyContin savings cards.
PPLPMDL0020000001	Akron	OH	44333	5/9/2011	I asked Dr. Griffiths if she felt more comfortable prescribing Butrans since we chatted last and identified specific patients and she said she did. She said she really liked the idea behind Butrans and wasn't writing because of pure habit.
PPLPMDL0020000001	Parma	OH	44129	5/9/2011	Quick call- caught Dr Taylor at the window. She said that she forgot about Butrans as she has had a lot on her mind. Reminded her of appropriate patient type that we had talked about & that she had agreed to try it on.
PPLPMDL0020000001	Cleveland	OH	44114	5/9/2011	Spoke with Mary & reviewed savings cards for Butrans & OxyContin.
PPLPMDL0020000001	Cleveland	OH	44109	5/9/2011	I talked to Dave, Pharmacist, about doctors in area writing Butrans and appropriate patients to initiate therapy with Butrans by showing Butrans initiation guide. we discussed proper tapering of short-acting opioids and initiation of Butrans 5mcg or 10mcg. Dave and I discussed managed care coverage and Butrans patient savings cards. I recommended Senokot-S.
	Cleveland	OH	44109	5/9/2011	I talked to dr about considering Butrans as an option for patients taking short-acting tramadol, vicodin or percocet, that are asking him for something different because their short-acting opioids aren't controlling their pain. dr said he hasn't really thought about Butrans. I asked dr what benefits he even saw in Butrans for his patients? dr said he likes Butrans is a patch and dosed once a week but he has so much Medicaid and won't do the prior authorization for Butrans so he's not sure about it. I asked dr how much commercial and BWC plans he has here? dr said probably 50%, so we discussed Butrans being an option for these patients and I showed dr Butrans initiation guide, discussing proper tapering and initiation of Butrans. I asked dr if he had 2 patients, to be seen this week, that he could discuss Butrans with and start them? dr said he wasn't sure but would keep Butrans in mind. we discussed OxyContin formulary coverage, appropriate patients and conversion guide and I recommended Senokot-S.
PPLPMDL0020000001	Cleveland	OH	44109	5/9/2011	I talked to dr about Butrans being an option for her patients that are telling her their short-acting opioids aren't controlling their pain and they are asking for something different. dr said she likes that Butrans is a patch and dosed once a week, but she really hasn't had any patients ask for anything different lately. dr said she's also concerned with Butrans' formulary coverage and asked about Medicaid coverage. we discussed Medicaid, BWC and commercial plans coverage for Butrans. I asked dr to think of 2 patients who have been calling every month sooner than they should for refills, perhaps thinking a long-acting opioid could be an option for them. dr agreed and said she would see if a few patients would be interested in starting Butrans. I talked to dr about appropriate patients for OxyContin, formulary coverage, savings cards and asked dr to think of OxyContin for 2 patients that she feels are appropriate. dr agreed. I recommended Senokot-S.
PPLPMDL0020000001	Cleveland	OH	44109	5/9/2011	I talked to dr about Butrans 5 core messages, FPI, initiation guide and formulary coverage. dr said she likes that Butrans is a patch and is dosed once a week as she does have patients with moderate to severe chronic pain that don't always like taking short-acting opioids around the clock so this could be an option. dr said her only concern is insurance coverage as she has a lot of Medicaid and cash paying patients. I asked dr if she had any commercial plan patients? dr said a small percentage and wanted to know what the coverage for Butrans was on Medicaid? we discussed Medicaid and commercial plan insurance coverage for Butrans. I asked dr if she could think of 2 patients who meet Butrans indication that are telling her their pain isn't controlled with short-acting opioids and start them on Butrans? dr said she'll think about it, as this is a new medication and she needs to read more of the Butrans FPI. we discussed OxyContin formulary coverage and appropriate patients. recommended Senokot-S.
PPLPMDL0020000001	Akron	OH	44333	5/9/2011	I asked Dr. Brown what types of patients she had initiated therapy to. She said that she had initiated therapy to 3 patients all who were previously on Vicodin. She said that she liked converting those patients to a LAO and would continue to do so as she got busier.
PPLPMDL0020000001	Mogadore	OH	44260	5/9/2011	Joe said he has not started anyone on Butrans, he said he likes the medication he just has to find the right patient. I asked who is the right patient and he said probably someone who is taking Vicodin or who he would normally put on Vicodin. HE said he just needs to remember it. Then Dr Cain told him he started a patient and the patient is doing well. Dr Cain said it is great for those people who call in refill after refill after refill. HE mentioned something about the nurse practitioner formulary and I asked why can't he write it under the Dr and he said that is true.
PPLPMDL0020000001	Cleveland	OH	44125	5/9/2011	Spoke with pharmacist, Christine (pharmacist) & reviewed Butrans e-voucher & OxyContin savings cards & eligibility requirements. Also asked her what insurance plans she sees most of in this area. She said a lot of Medical Mutual, Aetna, & Caremark. I asked about Medicare/Medicaid volume. She said there is quite a bit of Medicaid & also a good amount of Medicare. She said that it is probably close to 50/50 with commercial plans/government.
PPLPMDL0020000001	Cleveland	OH	44109	5/9/2011	I talked to dr about Butrans being an option for his patients taking short-acting tramadol, but telling him their pain isn't controlled with the short-acting and asking for something different. dr said he hasn't had any patients ask for something different but likes Butrans being a patch, dosed once a week and thinks some of his patients may be interested in it but he hasn't seen them recently. dr asked about managed care coverage so we discussed that and I asked dr to think of 2 patients, like we discussed, to start on Butrans? dr agreed and I recommended Senokot-S.
PPLPMDL0020000001	Cleveland	OH	44109	5/9/2011	dr said he hasn't started any patients on Butrans yet as he hasn't seen any patients that he feels are appropriate, so I showed dr Butrans initiation guide and asked dr if he ever hears from patients that their short-acting opioids aren't controlling their pain? dr said sometimes but usually his patients like taking their pills for their chronic pain. I asked dr to think of 2 patients, who are telling him their short-acting opioids aren't controlling their pain, discuss Butrans with them and start them on Butrans. dr asked about insurance coverage for Medicaid as he couldn't remember, so we talked about Medicaid, BWC and commercial plan coverage for Butrans and dr said he would do his best to remember Butrans and start a few patients. I recommended Senokot-S.
PPLPMDL0020000001	Cleveland	OH	44109	5/9/2011	worked pm&R dept-see call notes, worked rheumatology dept-see call notes and worked internal medicine -see call notes
PPLPMDL0020000001	Bedford	OH	44146	5/9/2011	Dr Moufawad said he could not stop because he was running so far behind. He did pause before walking into the patient room to say that "Butrans is doing fine". He also added that he is going to do the web conference in June that I told him about. Reviewed Butrans formulary with Amber (MA). Also spoke with Sandy (MA & office manager) who said that several staff members have quit lately, so they are busier than ever, trying to pick up that slack. Right now, they are supplementing staff with temporary employees.
PPLPMDL0020000001	Cleveland	OH	44103	5/9/2011	I talked to Amol, Pharmacist, about Butrans stocking, scripts for Butrans and who's prescribing. we discussed Butrans 5 core messages and I showed Amol Butrans initiation guide. we discussed electronic voucher program at Rite Aid for Butrans scripts and we discussed OxyContin stocking and who's prescribing OxyContin and I gave Amol OxyContin conversion guide. we discussed managed care coverage for OxyContin and I recommended Senokot-S.
PPLPMDL0020000001	Akron	OH	44333	5/9/2011	Spoke to Dr. Shah about his success with Butrans, he said that he liked that patients were more compliant with Butrans and that it was a LAO. He said that some of his Medicare patients were complaining about cost. I explained our coverage on both BWC and private insurance plans.
PPLPMDL0020000001	Mogadore	OH	44260	5/9/2011	Dr said he wrote Butrans in 3 patients one got denied, Aetna. He said he understands the employee carve outs. HE said he likes this in his patients who are taking Vicodin and he can get them off of the Vicodin. He asked how it works in fibromyalgia and I told him we are indicated for moderate to severe chronic pain and that we were studied in patients who are opioid naive and opioid experienced with chronic pain around the clock. HE said he wanted to start more patients on Butrans, especially those who just call for refills all of the time. HE asked about Summa care and I showed him formulary grid. Discussed Oxycontin in patients taking higher doses of Oxycontin and managed care coverage as well.
PPLPMDL0020000001	Mogadore	OH	44260	5/9/2011	Introduced Butrans to Dr. reviewed FPI, indication, dosing and initiation and titration, boxed warning and 5 core messages. He asked how it was covered and I reviewed managed care and savings cards. I asked him if he sees many patients like that he and said yes, he is very behind, he will review the information, gave him titration guide and patient education.
PPLPMDL0020000001	Solon	OH	44139	5/9/2011	Dr Zaidi said he has not yet prescribed Butrans. I asked him why not. He said he wants to hear from other physicians who are using Butrans so that he can get their feedback. I invited him to the May 24 program & mentioned a webcast as an alternate. He said he would try to attend but was not sure. He asked who is prescribing Butrans. I told him that practitioners of various different specialties are prescribing Butrans. He asked me what type of feedback I am getting. I asked him if he has talked to anyone yet about Butrans. He said he has not. He asked how long Butrans has been available & I told him we launched in January. I encouraged him to attend the program so that he may have the opportunity to discuss Butrans with other key physicians & mentioned limited attendance. Reviewed managed care & savings cards. He said he might be able to find one or two patients to prescribe Butrans for before he sees me. I reminded him that he has said this before. Reviewed OxyContin savings cards.
PPLPMDL0020000001					

	Cleveland	OH	44109	5/9/2011	i talked to dr about Butrans being an option for his patients that are taking tramadol around the clock for their moderate to severe chronic pain and asking for something different because their short-acting tramadol isnt controlling their pain.dr said he has a few patients in mind,that he believes can benefit from Butrans's once weekly dosing and he likes that Butrans is transdermal,but he hasnt seen these patients yet.i asked dr if patients call in to office for refills earlier than they should,for their short-acting tramadol,would dr consider Butrans,if patients meet indication and are appropriate? dr said yes he would so i showed dr Butrans initiation guide and we discussed proper tapering and initiation of Butrans.i asked dr to think of 2 patients this week,to start on Butrans and let me know how that goes next time i see him,dr said he'll keep Butrans in mind.we discussed managed care coverage and i recommended Senokot-5
PPLPMDL0020000001	Mogadore	OH	44260	5/9/2011	Dr said she has not written Butrans, she has forgotten. I asked where she would write Butrans and she said she was not sure. We reviewed information and I asked her when patients are failing on NSAIDS where does she go. She said usually Tramadol. I then asked her when she gets calls from patients saying their Vicodin is not working what does she do and she said that is when she refers to pain management. I said then when she has a patient failing on NSAID or Tramadol, instead of going to Vicodin would she write Butrans if they are chronic and she said she would try. Reviewed managed care.
PPLPMDL0020000001	Cleveland	OH	44104	5/9/2011	i talked to dr about Butrans being an option for his patients that are taking vicodin or percocet,but asking dr for something different or saying their short-acting opioids arent controlling their pain.dr said he hasnt thought of Butrans as he's so frustrated with his pain patients and its easier to just fill their short-acting opioids instead of talking to them about a new medication.i asked dr to think of 2 patients that are calling in earlier for refills,if patients are appropriate for Butrans,to consider starting them on Butrans.i showed dr Butrans initiation guide,discussed tapering and initiation of Butrans.i asked dr to think of these 2 patients with BWC coverage.i
PPLPMDL0020000001	Akron	OH	44333	5/9/2011	I asked Linda about her success with Butrans and she reported that she had put a patient on the 20 mcg patch and that the patient reported it was only working a little. I explained that patients could remain on their SA therapy for break through pain and that steady state is not reached for 3 days. She concieted my point and asked if we could talk more next Monday.
PPLPMDL0020000001	Maple Heights	OH	44137	5/9/2011	Spoke with Dawn (technician) who said Jim was too busy to speak to me today. I asked her if she could recommend a day/time when their pharmacist may be available for a minute. She said he is always busy. Gave her information on Butrans savings & discussed savings cards for Butrans & OxyContin. She said she would let Jim know.
	Cleveland	OH	44109	5/9/2011	i talked to dr about Butrans 5 core messages, fpi,initiation guide and formulary coverage.dr said she likes that Butrans is a once weekly dosing and transdermal delivery,instead of her patients having to take short-acting opioids around the clock as some patients dont like this regimen.i asked dr if she could think of 2 patients taking percocet that arent controlled and have asked her for something different? dr said yes,patients ask for more pills,increases in dosage strengths and often call in earlier requesting refills earlier than they should.i showed dr Butrans initiation guide,discussed proper tapering and initiation of Butrans.dr said that seemed easy but what was the coverage on Medicaid?we discussed formulary coverage for Butrans. we talked about OxyContin being an appropriate option for patients,showed OxyContin conversion guide and discussed formulary coverage.i
PPLPMDL0020000001	Cleveland	OH	44122	5/9/2011	Spoke with Dr Goldner's MA who said that Dr Goldner was too busy to meet with me. She said that as a rule, he does not see reps. Introduced Purdue's products & let her know that he has likely not had a full discussion about Butrans as it was just launched in January. I asked if I could speak with his nurse (Stacey), but the MA told me that she was too busy to see me as well. She said she would give Dr Goldner the information I left.
PPLPMDL0020000001	Fairlawn Cleveland	OH OH	44333 44109	5/9/2011 5/9/2011	I asked Dr Lefkowitz if he has reviewed the Butrans information I had left. He said he had. I asked if he had any questions and he said no. No new info learned. i talked to dr about considering Butrans for her patients taking tramadol around the clock for their moderate to severe chronic pain that arent controlled and asking her for something different.dr said she hasnt had any patients ask for anything different so she hasnt thought of Butrans.i asked dr if patients ever call in to her office asking for refills earlier,each month,than they should,so perhaps the short-acting tramadol isnt lasting long enough? dr said yes,that does happen,so i asked dr to consider Butrans for those patients,instead of refilling their short-acting tramadol.dr said that made sense and would consider Butrans.i showed dr Butrans initiation guide to discuss proper tapering of short-acting tramadol and initiation of Butrans. we discussed managed care coverage for Butrans.i recommended Senokot-5
PPLPMDL0020000001	Parma	OH	44129	5/9/2011	Spoke briefly with Dr Ortega who said that he has not yet gotten any feedback from patients on Butrans. He said this is probably a good sign as patients usually call if they have a problem with a medication. I asked him how soon he typically has patients follow up. He said usually a month. I asked him if he needs to get their feedback before prescribing Butrans for more patients. He said no & that he will continue to look for more Butrans.
PPLPMDL0020000001	Fairlawn	OH	44333	5/9/2011	Spoke with Jessica who told me that Dr. Lefkowitz was still prescribing a lot of OxyContin and Dr. Shah has been initiating therapy with Butrans. I explained the patient education guide and steady state. She told me that a Medicare patient was able to get a Rx filled for 25 dollars.
PPLPMDL0020000001	Parma	OH	44129	5/9/2011	I spoke with Ellie (nurse) to follow-up on our previous Butrans discussion. She said that Dr Salewski was not interested in hearing about Butrans right now. I asked her if she knew the reason. She said they have been so busy lately & have so many patients scheduled, that Dr Salewski had to cancel his vacation so that they can get caught up. She said it is not anything against Butrans. It is just bad timing. She said they are not scheduling anything until after July & asked me to follow-up with her as that time grew closer so that we can schedule something. Reminded her of Butrans key points & patient type & asked her to call me if anything opens up in the mean time.
PPLPMDL0020000001	Mogadore	OH	44260	5/9/2011	Dr said he has forgotten about Butrans, he said he does remember it is for moderate to severe chronic pain and that it is long acting patch. I asked what type of patient would he use it in showing him the 2 patient types and he said probably both, he sees both patient types and that it would be nice on one hand to get patients off of Vicodin and on the other hand to not start them on it. He asked about coverage and we reviewed that. I asked him when he has a patient who calls in and they are on a NSAID and are chronic, and it is time for an opioid where does he go and he said usually Tramdol. I said that is a good spot for Butrans and he agreed. HE said he will try it.
PPLPMDL0020000001	Cleveland	OH	44106	5/10/2011	Rmeinded him if patient is on higher doses of Vicodin they may be more appropriate for Oxycontin. dr said she hasnt started anyone on Butrans because she really doesnt have that many patients on narcotics.i showed dr Butrans initiation guide and asked if she had patients taking tylenol with codeine or tramadol,for their chronic pain? dr said yes,she does but those patients are controlled on their short-acting opioids and she hasnt had anyone ask her for something different.dr said she likes that Butrans is a patch and dosed once a week.dr said if patients are asking her for more pills or saying their short-acting opioids arent controlling their pain,she refers to pain management specialists as she doesnt want to manage these patients. dr said she's been in practice 12years and has had too many patients try to get pills and not really have chronic pain and she knows that ruins it for the patients who truly are in chronic pain,but she doesnt want to manage patients pain levels.i asked dr if she could think of 1 patient where Butrans could be an option and dr said she may have 1.
PPLPMDL0020000001	Parma	OH	44129	5/10/2011	Quick call- Saw Dr Rossi briefly at the window. Handed back Butrans formulary grid & reviewed managed care coverage & savings cards for eligible patients. She said she had patients to see. Spoke with Britney & reviewed Butrans seven days buprenorphine delivery in one application & appropriate patient type. Also scheduled next available lunch.
PPLPMDL0020000001	Cleveland	OH	44113	5/10/2011	i talked to dr about Butrans 5 core messages,Butrans fpi,initiation guide to discuss appropriate patients,tapering of short-acting opioids and initiation of Butrans. we discussed managed care coverage for Butrans and Butrans patient savings cards.i asked dr when he felt a long-acting opioid was appropriate? dr said when patients start asking for more pills or a higher dosage strength,he'll consider a long-acting opioid.dr said he liked that Butrans was a once weekly dosing option and was a patch,as he has some patients who dont like taking pills around the clock for their chronic pain so a pach would be a nice option for them.i asked dr if he could think of 2 patients that have commercial insurance,that are like we discussed and start them on Butrans? dr said yes,he'll have to think about a couple of patients and when they are coming in to office.i recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44195	5/10/2011	i talked to dr about Butrans being an option for his patients taking Percocet that are coming to him saying their pain isnt controlled with Percocet and are asking for something else and i showed dr Butrans initiation guide with tapering and initiation information.dr said he does have patients ask for more pills and sometimes for something completely different,so he'll think of Butrans for those patients.dr asked about insurance coverage so i showed dr Butrans formulary grid and we discussed Butrans patient savings cards for commercial plan patients. we talked about OxyContin formulary coverage and appropriate patients and i gave dr OxyContin conversion guide.i recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44113	5/10/2011	i talked to dr about his patients taking vicodin that are asking him for something different or calling in sooner each month for refills,dr said that does happen and he could think of Butrans there.dr said he couldnt remember insurance coverage for medicaid as thats the majority of his patients.i asked if dr had any commercial plan patients taking Vicodin for their chronic pain? dr said yes he had a few patients with commercial insurance,so we talked about Butrans formulary coverage on commercial plans and Butrans patient savings cards.dr couldnt remember tapering and initiating dosage strengths so i showed dr Butrans initiation guide noting tapering of vicodin and initiating at Butrans 5mcg or 10mcg.i asked dr if he had 2 patients this week that he thinks would be appropriate for Butrans? dr said he might and he'll think about Butrans. we discussed OxyContin for appropriate patients,showed OxyContin visual aid,conversion guide and formulary grid and asked dr to consider OxyContin
PPLPMDL0020000001	Cleveland Cleveland	OH OH	44113 44195	5/10/2011 5/10/2011	worked several physician offices here and out-patient pharmacy worked pm&r-left Butrans fpi,initiation guide,formulary grid and patient information booklet for Dr.Schaefer and Dr.Capulong.i left OxyContin fpi,formulary grid and conversion guide for both doctors and senokot-5 protocol pad for each doctor; worked rheumatology-left Butrans fpi,initiation guide,patient information booklet and formulary grid for Dr.Calabrese,Dr.Chatterjee and Patty Paczos,PA;left doctors OxyContin fpi,conversion guide and formulary grid. worked anesthesia/pain management dept-see call notes on Dr.Cheng,Dr.Syed and Dr.Mekhaill. left Butrans fpi,initiation guide and formulary grid for Dr.Frost as i couldnt see him today.
PPLPMDL0020000001	Brooklyn Westlake	OH OH	44144 44145	5/10/2011 5/10/2011	Quick call- Saw Dr Deeb up at the window. Reviewed Butrans indication & delivery system. He waved & said to come back another time. Audrey (MA) said to check with her in a few weeks for scheduling. i asked Dr if he has written for vicodin this week. He said he has and we discussed that some of those patients may have been Butrans patients if they meet the indication and have chronic pain. Reminder that OxyContin is still an option when patients are taking more than 40mg per day of vicodin.
PPLPMDL0020000001	Brooklyn	OH	44144	5/10/2011	Spoke with Carol (MA) & Wendy (nurse) & reviewed Butrans indication, delivery system, managed care information, & savings cards. They said Dr Hilton was not scheduling as many lunches as she did prior, but they allowed me to schedule one. I asked who takes calls from patients who are requesting refills on pain medications too soon & they said they both do.
PPLPMDL0020000001	Parma	OH	44129	5/10/2011	Quick call- Jen said that she had just heard that Dr Nickels had prescribed Butrans for a few patients. She said that she is waiting to see what he says about it. Spoke with Dawn who said that all the practitioners are meeting tomorrow (as they do every 3 months) & that one of the topics on the meeting schedule is Butrans. She said that Dr Nickels will share his Butrans feedback at that point. She said to come back next week or the following week & she would tell me what was said at the meeting. I asked Dawn if Jen is still prescribing Ryzoft & Dawn said that she just wrote two prescriptions for Ryzoft today.
PPLPMDL0020000001	Westlake	OH	44145	5/10/2011	Spoke with Juan, he said he thinks Dr has tried a few patients on Butrans but has not heard a lot of feedback yet. He said he feels the Dr is just stuck in his ways and is hesitant to try something new. Juan said he is reminding the Dr about Butrans as an option.
PPLPMDL0020000001	Barberton	OH	44203	5/10/2011	I asked Dr. Patel if he was having success with the patients he was initiating Butrans therapy to and he said he was. He said that the majority of patients were opioid experienced and were now on 10 mcgs. I reminded him that Butrans had been studied in patients who were opioid experienced and asked if he felt confident starting those patients who were appropriate on Butrans and he said yes and knew to start all of those patients on 5 mcgs.
PPLPMDL0020000001	Westlake	OH	44145	5/10/2011	I asked Dr if he would start another new patient on Butrans today. He said he would and he's been getting good feedback from patients so far regarding Butrans. Reminder about OxyContin as an option and he agreed to prescribe when patients have pain associated with cancer.
PPLPMDL0020000001	Parma	OH	44134	5/10/2011	Spoke with Binka (MA) & reviewed Butrans dosing/delivery system & also went over patient information booklets. She said she does not know if Dr Scanlon has been prescribing Butrans & said that they have savings cards still for both Butrans & OxyContin. Reviewed eligibility for savings card usage.<font color=blue><b>CHUDAKOB's query on 05/19/2011</b></font>One question you might begin finding out is what her specific role is in the office. How does she interact with the patients or the physician relating to prescriptions?<font color=green><b>APSEGAS's response on 05/23/2011</b></font>That is a good idea. I am trying to nudge my way into that office at both locations by increasing my presence. so I will try to talk more to her during my next visit. Thank you for the suggestion.<font color=blue><b>CHUDAKOB added notes on 05/24/2011</b></font>Great! I will be interested to hear how this works out.
PPLPMDL0020000001	Brooklyn	OH	44130	5/10/2011	Spoke with Renee (pharmacy manager) & reviewed e-voucher for Butrans & OxyContin savings cards. Discussed eligibility requirements for savings programs. I asked Renee what managed care plans she sees most. She said that they see a lot of Medicaid & Medicare at this location. She said that with commercial insurance, they see mostly Medical Mutual, Express Scrpts, & PCS. I also asked if she has seen any patients on the 20mcg dose of Butrans. She said she knows of only one of their customers on Butrans & she said she is on the 10mcg dose.
PPLPMDL0020000001					

	Independence	OH	44131	5/10/2011	I asked Dr Sundaram what feedback the patient who he had put on Butrans had given him. He said that the patient "wasn't too happy with it". I asked him to clarify. He said the patient said it was not working very well at controlling his pain. I asked Dr Sundaram what he did for that patient & he said he titrated the patient to the 10mcg dose. Dr Sundaram said he just put a patient on Butrans earlier today as well. I asked him to describe that patient- he said she has chronic back pain & had been put on Duragesic before but that it was "too strong" for her. Discussed titration ability every 3 days to a maximum of 20mcg. Also discussed OxyContin as an option for patients beyond that 20mcg/hr dose of Butrans. Also reviewed managed care coverage.<font color=blue><b>CHUDAKOB's query on 05/19/2011</b></font>-It sounds like this may have been a titration issue. What do you think about this situation?<font color=green><b>APSEGAS's response on 05/23/2011</b></font>-I agree. When I asked him what he did for the patient, I was happy to hear that he titrated him up rather than discontinuing his Butrans. I submitted it as an AE because he said the patient said it was not working, even though it was probably just a dosage issue, just to be on the safe side. This is something (titration) I will address with him again at our lunch this week to make sure he understands this well.<font color=blue><b>CHUDAKOB added notes on 05/24/2011</b></font>-Thank you Ashleigh!
PPLPMDL0020000001	Cleveland	OH	44106	5/10/2011	I talked to Matthew,Pharmacist,about Butrans 5 core messages,initiation guide and doctors prescribing Butrans at the Cleveland clinic.Matthew asked for some Butrans patient information booklets and I left a few with the application dvd/booklet.I asked Matthew,based on the scripts he's seeing get filled for Butrans,what clinical benefits did he see in Butrans,for their patients? Matthew said the once weekly dosing and Butrans being a patch were the 2 main benefits he saw and doctors are seeing success with patients who have started on Butrans.Matthew said to stop back next week and see Steve,Pharmacy Manager,to be sure he doesn't have any questions about Butrans because he wasn't here today.I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44195	5/10/2011	I talked to curt,pharmacy manager,about Butrans stocking,initiation guide to discuss proper tapering and initiation of Butrans,formulary coverage and Butrans patient savings cards and we talked about doctors prescribing Butrans at the clinic.I left Curt Butrans patient information booklets and application dvd/booklets and senokot-S protocol pads.I recommended Senokot-S
PPLPMDL0020000001	North Olmsted	OH	44070	5/10/2011	Spoke with Ken, We discussed Butrans 5 key messages and I asked his thoughts. He said the thinks it could be a good option and they have tons of patients on short acting opioids around the clock who should be on long acting. we reviewed the initiation guide for Butrans and how to initiate patients based on their current amount of opioid. Reminder about OxyContin as a Q12hr option and asked if him to recommend Senokot S.
PPLPMDL0020000001	Brooklyn	OH	44144	5/10/2011	Spoke with technician as the pharmacist was too busy to see me. Reviewed Butrans savings, including going to Butrans.com to print savings cards for patients as needed, & also reviewed OxyContin savings cards. Discussed eligibility for these savings programs (ie no government insurance).
PPLPMDL0020000001	Cleveland	OH	44195	5/10/2011	I talked to dr about Butrans being an option for his patients taking short-acting tramadol who are telling him their pain isnt controlled and showed dr Butrans initiation guide to discuss proper tapering and initiation of Butrans.dr said he usually waits awhile before he prescribes a new medication and Butrans is still new to him.dr said if he at least had 2 patients in mind that have asked him for something else because their short-acting tramadol wasn't controlling their pain? dr said yes,sometimes patients will ask for a different medication,so i asked dr to think of 2 patients to start on Butrans.dr said he'll think about it and asked about managed care coverage,so i showed dr Butrans formulary grid and talked about Butrans patient savings cards for commercial plan patients.
PPLPMDL0020000001	Cleveland	OH	44195	5/11/2011	I talked to Kathy,PA,about appropriate patients to start on Butrans by showing Butrans initiation guide and we talked about patients taking tramadol for their chronic pain that meet Butrans indication but are asking for something different.Kathy said dr.mintzer and dr.mekhal haven't started anyone on Butrans and she's not sure why dr.mintzer hasn't as she has stated that Butrans once weekly dosing and Butrans being a patch are 2 benefits she see's for her patients. i asked Kathy if she would recommend Butrans,for appropriate patients based on our discussion today,to both doctors and Kathy said yes.we talked about insurance coverage for Butrans use of Butrans patient savings cards for commercial plan patients.I recommended Senokot-S
PPLPMDL0020000001	Broadview Heights	OH	44147	5/11/2011	Dr Samuel said that he had a patient for whom he prescribed Butrans who experienced hyperhydrosis & application site skin rash & redness. He said that he gave the patient hydrocortizone ointment for the skin reaction & is not sure if the hyperhydrosis is from Butrans or not. He said the patient is continuing on Butrans for now. He said all the patient he has started on Butrans have been opioid-naive because he feels these patients offer the best opportunity for success with the product. He said he is still trying to figure out what to use for breakthrough-He said he likes using long-acting medications whenever possible. Discussed OxyContin as an option for patients beyond Butrans 20mcg. He said that he thinks OxyContin is a great medication for appropriate patients & that it has an unfortunate negative stigma. Spoke with Margaret & reviewed Butrans, managed care, savings cards, & patient information booklets. She does prior authorizations, calls from
PPLPMDL0020000001	Broadview Heights	OH	44147	5/11/2011	Dr Samuel said that he had a patient for whom he prescribed Butrans who experienced hyperhydrosis & application site skin rash & redness. He said that he gave the patient hydrocortizone ointment for the skin reaction & is not sure if the hyperhydrosis is from Butrans or not. He said the patient is continuing on Butrans for now. He said all the patient he has started on Butrans have been opioid-naive because he feels these patients offer the best opportunity for success with the product. He said he is still trying to figure out what to use for breakthrough-He said he likes using long-acting medications whenever possible. Discussed OxyContin as an option for patients beyond Butrans 20mcg. He said that he thinks OxyContin is a great medication for appropriate patients & that it has an unfortunate negative stigma. Spoke with Margaret & reviewed Butrans, managed care, savings cards, & patient information booklets. She does prior authorizations, calls from
PPLPMDL0020000001	Cleveland	OH	44114	5/11/2011	I talked to John,PA,about Butrans being an appropriate option for patients taking short-acting opioids that are telling him their pain isnt controlled with the short-acting opioids or they are simply asking for something different.John said both dr.katz and dr.marshall are starting patients on Butrans and they are seeing good clinical results and no complaints from patients.i asked John to continue recommending Butrans as an option for appropriate patients and showed Butrans initiation guide for our discussion.we talked about Butrans formulary coverage.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44114	5/11/2011	I talked to dr about patients she has started on Butrans and why she has chosen Butrans,dr said patients that she's seeing for follow-up appointments,that she started on Butrans,are doing great and no complaints and she's seeing improvements in patients pain levels so she's pleased with her choice of starting patients on Butrans.i showed dr Butrans initiation guide,discussed more appropriate patients,for dr to continue starting on Butrans and we discussed proper tapering of short-acting opioids and initiating Butrans at the appropriate dosage strength.we discussed Butrans formulary coverage and use of Butrans patient savings cards.we discussed OxyContin being an appropriate option for patients,formulary coverage and savings cards.i recommended Senokot-S
PPLPMDL0020000001	Akron	OH	44320	5/11/2011	I asked Misty about the success she has had with Butrans she said that she had not heard back from the first patient and had initiated therapy to another patient. I asked her if she felt confident prescribing Butrans instead of low dose hydrocodone and she agreed she absolutely did.
PPLPMDL0020000001	Warrensville Heights	OH	44122	5/11/2011	I asked Dr Brooks to tell me about the patients he has put on Butrans so far. He said he has 5 patients on Butrans & has had follow-up with one of them so far. He said that patient is doing well on Butrans so far with no complaints. He did not recall what dose he had put the patient on. He said that all the patients he has tried on it have already been on narcotics of some sort. I asked if he has considered using Butrans for patients who are not currently on opioids but for whom he would typically start on a short-acting around-the-clock medication. He said he will start using Butrans in that type of patient. He also added that he does not refer to pain management, but rather treats those patients himself. Reminded him of commercial insurance coverage & savings cards. He said to give these to Beth or Jaz, his medical assistants. Discussed OxyContin as an option for patients beyond
PPLPMDL0020000001	Cleveland	OH	44113	5/11/2011	worked orthopedic dept-see call notes on dr bohli and dr berkowitz
PPLPMDL0020000001	Cleveland	OH	44195	5/11/2011	worked Anesthesia/Pain management dept-see call note on Kathy Kraus,PA and had to leave Butrans initiation guide,patient information booklet and Butrans formulary grid for Dr.Shin as i couldnt see him today
PPLPMDL0020000001	Independence	OH	44131	5/11/2011	Spoke with JT about area physicians who prescribe a lot of Vicodin or short-acting opioids for chronic conditions. He mentioned Rutkowski, Hernandez, Kuschnir, & also said that a lot come from physicians in Euclid & Lorain. JT said he hasn't really seen patients on Butrans than other pain medications. Reviewed Relay Health e-voucher & discussed Butrans savings cards that can be printed online at Butrans.com if Drug Mart does not participate in Relay Health. JT said he has filled "a couple" Butrans prescriptions so far.
PPLPMDL0020000001	Fairlawn	OH	44333	5/11/2011	I asked Dr. Domdera if he was any closer to prescribing his first Butrans Rx. He said that although he really liked the concept he was still waiting to hear some feedback from other practitioners, he said that this is a product he could see himself prescribing in the future.
PPLPMDL0020000001	Akron	OH	44320	5/11/2011	I asked Dr. Dupstadt if she saw a benefit o the 7 day delivery system that Butrans could provide to her patients and she did and would keep it in mind. Quick call. Nothing new learned.
PPLPMDL0020000001	Copley	OH	44321	5/11/2011	Quick call. Reminded Dr. about Butrans. No new info gained.
PPLPMDL0020000001	Copley	OH	44321	5/11/2011	I asked Dr. Machado if he had had the opportunity to initiate Butrans therapy and he said he did not. He told me he would continue to use OxyContin but was not sure about Butrans.
PPLPMDL0020000001	Cleveland	OH	44104	5/11/2011	i talked to dr about her patients taking vicodin that are asking for something different or requesting more pills and to consider Butrans as an option,if appropriate.dr said she hasn't thought of Butrans and couldn't remember the insurance coverage and asked if medicaid covered Butrans.we talked about Butrans formulary coverage for medicaid,commercial and BWC patients.i showed dr Butrans initiation guide and discussed proper tapering of short-acting opioids and initiation of Butrans dosage strengths 5mcg or 10mcg,i asked if dr could think of 2 patients this week,that are taking vicodin but not controlled,where Butrans may be an appropriate option,dr said she will have to see who come's in this week but does like that Butrans is a once weekly dosing option and is a patch.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44104	5/11/2011	I talked to dr about her patients taking Percocet,that are asking for more pills or telling her their pain isnt controlled with percocet and asking for something different,to consider Butrans for these patients if appropriate.dr said she hasn't thought about Butrans and asked about the dosing and initiating dosage strengths,i showed dr Butrans initiation guide,discussed tapering and initiation of Butrans and we discussed formulary coverage for Butrans.i asked dr if she can think of 2 patients coming in this week,taking Percocet and not controlled,to start on Butrans? dr said if patients are complaining to her that they want something different,she'll think of Butrans.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	5/11/2011	dr said he hasn't started any patients on Butrans yet as he has a lot of acute pain patients and not as many chronic pain patients.i asked dr if his chronic pain patients taking Vicodin,ever asked him for something different or told him the Vicodin wasn't controlling their pain? dr said yes he does hear that from patients occasionally but most of the patients want more pills.i showed dr Butrans initiation guide,discussed proper tapering of Vicodin and initiation of Butrans. we talked about Butrans formulary grid and use of Butrans patient savings cards.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	5/11/2011	dr didn't speak to me that long other than stating he was disappointed that he has had 4 patients with systemic rashes,after starting Butrans,which i reported in last call note.i showed dr Butrans fpi again and we discussed adverse event rates for rashes and severe allergic reactions seen in Butrans clinical trials and dr said he didn't know what to tell me but that he wasn't comfortable writing Butrans anymore because of these 4 reactions patients got from Butrans.i asked dr if we could call Purdue Medical services,so that he could speak with a pharmacist and share his concerns,ask questions,dr said he didn't have time today but to stop back friday morning and he might be able to call then.
PPLPMDL0020000001	Akron	OH	44320	5/11/2011	I asked Dr. Bonyo if he feels like a LAO could benefit patients who are currently calling in and asking for more Vicodin. He said yes. I reminded him that Butrans was a once a week LAO and a schedule 3, ideal for exactly those type of patients.
PPLPMDL0020000001	Cleveland	OH	44120	5/11/2011	i talked to dr about Butrans being an option for patients taking percocet that are telling her their pain isnt controlled with the short-acting opioid and they are asking her for something different.dr said she hasn't thought about Butrans due to insurance coverage as she has medicaid and cash paying patients.we talked about Butrans formulary coverage for medicaid and commercial plan patients as dr said she has a couple of commercially insured patients.we talked about Butrans patient savings cards for commercial plan patients.i asked dr to think of 2 patients with commercial insurance,taking percocet,but asking for something different and showed Butrans initiation guide discussing proper tapering of percocet and initiation of Butrans.dr said she'll have to see who comes in and if she has 2 patients with commercial insurance that would be interested in starting on Butrans.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44114	5/11/2011	I talked to dr about Butrans being an appropriate option for patients taking short-acting opioids,like Vicodin or Percocet,that are telling him their pain isnt controlled with their short-acting opioids.dr said he is also considering Butrans for those patients that ask him for more pills,as he thinks Butrans could be an appropriate option right there.i showed dr Butrans initiation guide,discussed proper tapering of vicodin or percocet and initiation of Butrans 5mcg or 10mcg,i asked dr to think of 2 patients that he can start,based on our conversation,on Butrans,this week? dr said yes he will do that and we talked about Butrans formulary coverage and use of Butrans patient savings cards for commercial plan patients.we talked about OxyContin being an appropriate option for some patients,showed dr OxyContin formulary coverage grid and i recommended Senokot-S
PPLPMDL0020000001	Akron	OH	44320	5/11/2011	Reviewed patient education guide with pharmacist. Explained application and disposal. Reminded him about steady state.

PPLPMDL0020000001	Independence	OH	44131	5/11/2011	Dr Jack said he would like to hear other physicians talk about their experience with Butrans. He asked if I could bring in an expert or specialist in to speak with him about it. I told him about the May 24 program & asked if he would attend. He said he might. Asked who he refers to & he said Dr Nickels & Dr Yokiel mostly. I asked if he needed to hear other physicians talk about Butrans before he would consider prescribing it himself & he said yes. He said that if Dr Nickels attends, he might as well.
PPLPMDL0020000001	Cleveland	OH	44195	5/12/2011	I talked to Janet, Pharmacist and Brittany, Pharmacy tech, about Butrans stocking and both of them said they haven't seen any Butrans scripts yet. we talked about appropriate patients for Butrans and I showed Butrans visual aid with this information and then Butrans initiation guide. Janet said I should talk to a few doctors in Taussig Cancer Center that she thinks may be interested in hearing about Butrans. I gave Janet name's of physicians I am working with as some of her recommended physicians were the same as the one's I have been leaving information for and trying to get appointments with to discuss Butrans. we discussed OxyContin being an appropriate option, formulary coverage and OxyContin conversion guide. I recommended Senokot-S
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	5/12/2011	I asked Dr. DiLauro about her success with Butrans. She said that she has had no complaints and is really pleased with how patients are responding. She said that because of her positive feedback Butrans will continue to be a therapy she will continue to use for the appropriate patients.
PPLPMDL0020000001	Independence	OH	44131	5/12/2011	Reviewed Butrans indication, dosing, delivery system, & appropriate patient type. I asked if he would consider Butrans for patients who had never been on an opioid- He said he would. He said that some of his chronic pain patients get referred to pain management if they are going to need to be on something every month, but he said he does maintain some himself if he knows & trusts them. He asked what feedback about the adhesive & skin has been. Showed FPI section 6 & discussed application/adhesion. I asked when he uses a long-acting instead of a short-acting around-the-clock. He said sometimes cost is the determining factor. He asked about managed care. Reviewed formulary grid/savings cards for commercially insured patients. He said he would use Butrans in patients for whom he is ready to put on an opioid if they have a chronic condition. Discussed OxyContin & he mentioned reformulation. Reviewed field card bullet points-told him to be as cautious as always when prescribing it.
PPLPMDL0020000001	Cleveland	OH	44195	5/12/2011	I talked to Anne, NP, about considering Butrans as an option for her patients taking tramadol that tell her their pain isn't controlled with their short-acting tramadol or if she is considering a long-acting opioid with once weekly dosing. Anne said she sees Dr. Stanton-Hicks's patients and he hasn't started anyone on Butrans so she's waiting to see what he does with the medication before she approaches him about starting anyone on Butrans. Anne told me to leave information on Butrans, for Dr. Stanton-Hicks, again and she'll talk to him about appropriate patients. I showed Anne Butrans initiation guide for our discussion on proper tapering and initiation of Butrans. we discussed Butrans formulary coverage and I recommended Senokot-S
PPLPMDL0020000001	Independence	OH	44131	5/12/2011	Introduced myself & Purdue's products to Dr Grusenmeyer. Reviewed Butrans indication, delivery system, dosing, & appropriate patients. He said he generally refers chronic pain patients to pain management. He added that pain patients are difficult to treat & are very time-consuming & frustrating to deal with. He said that he would "look into" using Butrans & might consider it if he does decide to maintain a chronic pain patient. Told him it does carry abuse/addiction potential because it is an opioid. Discussed Butrans as a CIII, long-acting option. He said a once-a-week option would be "more convenient" for patients. Discussed OxyContin reformulation & reviewed field card bullet points. Told him to be just as cautious in prescribing it as he always has been.
PPLPMDL0020000001	Cleveland	OH	44195	5/12/2011	I talked to dr briefly about appropriate patients to start on Butrans by showing Butrans visual aid and initiation guide. we discussed tapering of short-acting opioids and initiation of Butrans. I asked dr if she ever has patients taking tramadol that aren't controlled and ask her for something different? dr said yes. I told dr that is where Butrans could be an option, if patients meet Butrans indication. dr said okay she liked once weekly dosing of Butrans and that it was a CIII we discussed Butrans formulary coverage and I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44103	5/12/2011	I talked to dr about her patients taking percocet that are asking her for something different because their short-acting opioid isn't controlling their pain and perhaps a once weekly dosing option and a single entity opioid like Butrans could be an option. dr said she started 1 patient on Butrans, as that patient was asking for more pills and dr wasn't comfortable giving any more pills so dr asked patient if there was an interest to try Butrans. I asked dr to think of 2 patients, like we discussed, that she can tell patients Butrans is going to be the next option and not refill their percocet and give Butrans patient savings card. dr said she has a lot of Medicaid and Medicare patients but does have a few commercial plan patients so she'll think of a couple of patients that she could try Butrans in and let me know what happens. we discussed OxyContin being an option, formulary coverage and OxyContin savings cards.
PPLPMDL0020000001	Cleveland	OH	44113	5/12/2011	worked pain management dept - dr daoud and dale novak
PPLPMDL0020000001	Cleveland	OH	44195	5/12/2011	worked taussig cancer center pharmacy - see call note, work center for spine and pm&r - dr zachary and dr capuloung-left Butrans fpi, initiation guide, patient information booklet/dvd and Butrans formulary grid, also left OxyContin fpi, formulary grid and OxyContin conversion guide for each doctor; worked chronic pain-couldn't see dr covington so left Butrans fpi and initiation guide for him. worked anesthesia/pain management dept-see call notes on Anne Crawford, NP and Dr. Minzter
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	5/12/2011	I asked Dr. DiLauro why she had not considered trying Butrans on at least one of the patients we had talked about in the past. She said she does not treat a ton of pain. I asked her if she thought there was any place for Butrans in her practice and she said she thought there was.
PPLPMDL0020000001	Cleveland	OH	44130	5/12/2011	I asked Dr Fedorko if he would be more likely to prescribe Butrans for a patient with chronic pain who was not currently on an opioid or a patient who was already on a short-acting. He said someone who is already on short-acting because at that time, you don't necessarily know if the person's pain is chronic or acute. Asked what kind of feedback he has gotten so far from his Butrans patients. He said that he has been looking for more patients for Butrans but is not sure that he sees enough patients in his practice who fit the indication. He said he would keep looking for patients for Butrans & would think of it for patients who were taking short-acting around-the-clock opioids for chronic conditions. Discussed managed care & savings cards for Butrans. Also reminded him of Ryolt Value Cards.
PPLPMDL0020000001	Cleveland	OH	44113	5/12/2011	I talked to dr about the patients he's starting on Butrans, dr said he hasn't gotten any feedback yet from patients as he just started patients over the last 2 weeks. we talked about Butrans application dvd/booklet and formulary coverage. I asked dr to continue starting patients on Butrans that he feels are appropriate for a long-acting opioid, dr said he will and will let me know what patients say about Butrans. I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	5/12/2011	I talked to dale, pa, about patients he's recommending to dr shen to start on Butrans. dale said dr daoud, pain management doctor here, hasn't started anyone and he's not sure why as he knows that patients do ask for something different or for more pills after the first dosage strength of their short-acting opioids aren't controlling their pain anymore. dale said dr shen is seeing success in patients who she's started on Butrans so she is comfortable starting patients on Butrans. dale said once weekly dosing of Butrans and the fact that Butrans is a patch are two benefits in his eyes. we talked about Butrans patient information booklets and dvd's and discussed formulary coverage. I recommended Senokot-S
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	5/12/2011	Dr. Azemd that she has already initiated therapy and would continue to do so for patients currently on SAO's that she felt needed to be converting to a LA agent. I reminded her how to initiate therapy and how to titrate using the initiation and titration guide.
PPLPMDL0020000001	Cleveland	OH	44113	5/12/2011	I talked to dr briefly about his patients taking tramadol or vicodin that are asking for something different because their short-acting opioids aren't controlling their pain. dr said he hasn't had anyone lately say that but does think Butrans is a good option being a patch and dosed once a week. I showed dr Butrans initiation guide, discussed tapering and initiation of Butrans and discussed formulary coverage with dr and asked him to think of 2 patients taking tramadol or vicodin that he feels could benefit from once weekly dosing of Butrans and a single entity opioid. dr agreed. I recommended Senokot-S
PPLPMDL0020000001	Parma	OH	44129	5/12/2011	Reminded Dr Gigliotti about the patient who he had told me about who was "almost" a Butrans candidate who wanted to be on pills instead of a transdermal. I asked him if that happens frequently & he said yes. Asked how he felt about that & he said he wishes he did not have a DEA number. He said patients like pills because they are "safer". I asked how they are "safer". He said it is easy to take pills & added that if was a patient he would rather take pills but then also added that he would forget to take pills. Asked isn't that a reason to be on a transdermal product instead of pills & he said "good point". I asked him if instead of keeping them on pills only, he would put someone on Butrans with a reduced supply of short-acting medication in case of breakthrough. He said maybe. I asked what he ended up doing with that particular patient & he said he doesn't know but probably re-
PPLPMDL0020000001	Parma	OH	44134	5/12/2011	Dr Hernandez said he continues to get great results with Butrans. He said that he had a patient who had gotten nausea from Butrans & he gave her fenergan to treat the nausea because the patient did not want to come off Butrans because her pain relief was so good. He also said he had a patient who complained of constipation from Butrans, but that she also wanted to stay on Butrans because of the analgesia. I asked how many refills he gives patients & he said he writes for one month at a time. He said he believes in Butrans because it is safe & effective. Reminded him that Butrans is abusable & does have addiction potential. Let him know I would bring Senokot-S samples when I receive more & also made sure he has enough savings cards for Butrans & OxyContin.
PPLPMDL0020000001	Cleveland	OH	44103	5/12/2011	I talked to dr about patients that are appropriate for Butrans, looking at Butrans initiation guide and dr said he has a few commercial plan patients that might benefit from Butrans, so we talked about proper tapering of short-acting opioids and initiation of Butrans and Butrans patient savings cards for commercial plan patients. I talked to dr about OxyContin being an appropriate option for patients and dr said he starts a lot of patients on OxyContin when their short-acting opioids aren't controlling their pain, he will start them on a long-acting opioid like OxyContin. we discussed formulary coverage for OxyContin and OxyContin savings cards. I recommended
PPLPMDL0020000001	Cleveland	OH	44102	5/12/2011	I talked to dr about her patients taking tramadol that are asking her for something different and instead of increasing the dosage strength of tramadol or converting them to vicodin, I asked dr to consider Butrans as an option. we looked at Butrans initiation guide, discussed tapering and initiation of Butrans. we talked about Butrans formulary coverage for commercial plan patients and use of Butrans patient savings cards. dr said she will think of a couple of patients to talk to about Butrans. I recommended Senokot-S
PPLPMDL0020000001	Westlake	OH	44145	5/13/2011	Quick call with Amid, he does not remember seeing any Butrans scripts. We reviewed the appropriate patient types for Butrans and I asked his thoughts. He does think it would be a good option for patients who are taking vicodin every day. We discussed the application and what to do if the patch starts to come off per the FPI and medication guide. Reminder about OxyContin as a Q12hr option and asked to recommend Senokot S.
PPLPMDL0020000001	Independence	OH	44131	5/13/2011	Roman said that he is looking forward to the Butrans dinner program on May 24. He said that he has questions about titration & dosing. I reviewed initiation & titration guide with him. He asked if a patient could wear two Smcgs systems at a time instead of one 10mcg if he starts them on 5 & finds that they need to be titrated. I told him this is not recommended & that we have not studied it this way. Let him know that patients could use savings card again in the same month for the next higher strength if it was for titration. Reviewed CIII & abuse/addiction potential. Also discussed OxyContin for patients beyond Butrans 20mcg & recommended Senokot-S for opioid-induced constipation.
PPLPMDL0020000001	Westlake	OH	44145	5/13/2011	She is an IM and ER resident in her 5th year as a resident. She will be moving to Austin TX. We reviewed Butrans 5 key messages and the indication. We discussed the OxyContin conversion guide and how to choose appropriate patients. We reviewed Ryolt as a once a day tramadol option and reminder about Senokot S with opioids.
PPLPMDL0020000001	Westlake	OH	44145	5/13/2011	I reviewed our last conversation and that he saw many benefits to Butrans if managed care weren't an issue. I asked if he would try just a few appropriate patients who have commercial insurance and he said he would try. Reminder about OxyContin for those patients with AARP Med D plans and for nursing home patients where Butrans may not be covered.
PPLPMDL0020000001	Sagamore Hills	OH	44067	5/13/2011	I asked Dr Sevier what a "Butrans patient" looks like to him. He said he is looking for a patient with a chronic issue causing pain who may be a candidate for Duragesic, but added that he has no patients on Duragesic right now. I reviewed appropriate patient type & reminded him that patients on fentanyl were excluded from our studies. He said then that he would maybe think of Butrans for chronic pain patients who can't tolerate Vicodin or get constipation from other opioids. Showed FPI section 6, reviewing adverse events. I reviewed positioning of Butrans & asked him if instead he would consider Butrans for patients before he puts them on around-the-clock Vicodin chronically. He said he didn't realize it could be used in those patients. Reviewed dosing & titration, managed care, & savings cards. Also discussed OxyContin for patients beyond Butrans 20mcg & recommended Senokot-S for opioid-induced constipation.
PPLPMDL0020000001	Cleveland	OH	44106	5/13/2011	I talked to Patty, Pharmacist, about Butrans stocking, any scripts they have seen here filled for Butrans and what doctors are prescribing Butrans. I showed Patty Butrans initiation guide, discussed appropriate patients, tapering of short-acting opioids and initiation of Butrans. I showed Patty Butrans patient information booklet and asked her and the pharmacy staff to show patients the pages on application of Butrans, rotation of Butrans and the log book section in back of Butrans patient information booklet. Patty said okay that made sense to show patients that information. I recommended Senokot-S
PPLPMDL0020000001					

PPLPMDL0020000001	Sagamore Hills	OH	44067	5/13/2011	Introduced myself & Purdue's products to Dr Hugus. He said that he had retired at the end of 2010, but has decided to come back to work to see patients two days per week. Introduced Butrans & core messages. I asked him when he might use a long-acting opioid instead of a short-acting. He said it really depends on each patient & their individual condition. He asked about side effects, so I showed FPI section 6. Also discussed CIII & abuse/addiction potential. He said it seems that have to be more cautious than ever in prescribing opioids. I agreed that he should be cautious & also told him again that Butrans does carry abuse/addiction potential.
PPLPMDL0020000001	Cleveland	OH	44109	5/13/2011	Reviewed application, dosing, managed care, & savings cards for eligible patients. Also discussed OxyContin for an option for appropriate patients beyond Butrans 20mcg & recommended Senokot-S for opioid-induced i talked to dr about appropriate patients to start on Butrans and showed Butrans visual aid,we discussed Butrans initiation guide,tapering of short-acting opioids and initiation of Butrans 5mcg or 10mcg. I asked dr if he would consider starting patients that are taking tramadol that arent controlled,on Butrans? dr said he hasnt really thought about Butrans as he hasnt had any patients ask for a different medication lately. I asked dr if patients call in early for refills,would he consider a long-acting opioid at that point? dr said it depends and if patients are willing to stop taking their short-acting opioids and start Butrans he might consider a long-acting opioid. I showed dr Butrans fpi discussing patients taking short-acting opioids and non-opioids with Butrans initially and throughout maintenance of Butrans,dr said he forgot about that and appreciated information. I asked dr to think of 2 patients to start on Butrans,dr agreed. I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	5/13/2011	dr said he started a patient on Butrans last week. we looked at Butrans initiation guide,discussed appropriate patients,tapering and initiation of Butrans, we talked about Butrans formulary coverage and I talked to Juan,doctors medical assistant to be sure Juan gave this patient the Butrans patient information booklet. Juan said Lisa, Patient care coordinator, handed booklet to patient and processed prior authorization for this patient and he hasnt heard anything from patient so thats a good thing otherwise if there was a problem the patient would have called Juan by now.
PPLPMDL0020000001	Sagamore Hills	OH	44067	5/13/2011	Quick call- Dr Lenox came back to lunch only briefly. I asked when he might prescribe a long-acting opioid instead of a short-acting around-the-clock regimen. He did not respond. He then started telling Dr Sevier about how Methadone can be prescribed by physicians for pain & that "there is no respiratory depression risk" with Methadone. Recommended OxyContin for appropriate patients beyond Butrans 20mcg. Also recommended Senokot-S for opioid-induced constipation. I invited Dr Lenox to take part in a June web conference but he declined, saying that a web conference is "a dinner program without the food". He said he did not see the point. He walked out of the room before I could respond.
PPLPMDL0020000001	Twinsburg	OH	44087	5/13/2011	Dr Leonard said she has not prescribed Butrans yet. Reviewed indication, delivery system, CIII, & abuse/addiction potential. I asked her what she typically does after a patient fails an NSAID or COX-2 with a chronically painful condition. She said that she generally will try Lyrica for the patient & if that does not work, she usually refers to Dr Moufawad at pain management. I asked if she maintains any of those patients or sends always to pain management. She said she has some that she maintains & sometimes pain management sends them back to her to deal with medications. Reviewed appropriate patient types, managed care, & savings cards for those eligible. She said she is very cautious in prescribing any narcotics. I told her she should be, & she should be just as cautious with Butrans. She said that the patients she is thinking of for Butrans are some of her Medicare patients but she will try to think of others. Discussed OxyContin as option for patients beyond Butrans 20mcg.
PPLPMDL0020000001	Westlake	OH	44145	5/13/2011	I asked Dr if he started any Butrans patients this week and he said that he did. He said that he is using Butrans as an alternative to vicodin around the clock and has also tapered patients down from methodone. I reviewed the managed care with Pam. I reviewed the appropriate patient type with Jenny She likes the fact that Butrans is a transdermal system and she will continue to encourage the Dr to prescribe.
PPLPMDL0020000001	Westlake	OH	44145	5/13/2011	Quick call at window. Dr said that he has tried Butrans for a few patients who were on low dose vicodin instead of increasing their dose. He said he has not heard back from these patients yet so he has no feedback. Laura could not remember which managed care but did not remember getting a call back for a PA. Reminder about OxyContin as an option when managed care may not allow Butrans.
PPLPMDL0020000001	Independence	OH	44131	5/13/2011	Spoke with Marcus (pharmacist) who was filling in at this location (as he is usually at the Chagrin/Woodmere location. Reviewed Butrans dosing, once-a-week application, & savings program. He said he has not dispensed any & checked this location's shelves & said they do not have it here. I asked him what the policy is at CVS with regards to reviewing a box of a product to dispense one patch if they receive a prescription written that way. He said they generally don't like to do that, but if they move enough of it, they will do it.
PPLPMDL0020000001	Westlake	OH	44145	5/13/2011	We reviewed our last conversation about Butrans and I asked if he had thought more about the types of patients who might benefit. Dr said that he has not tried Butrans yet, but thinks that it sounds like it could be a good option. We reviewed the initiation guide and he said that he has more chronic pain patients who are already on various doses of short acting. We reviewed OxyContin as an option when Butrans may not provide adequate
PPLPMDL0020000001	Cleveland	OH	44109	5/13/2011	I talked to dr about considering Butrans for his patients taking short-acting opioids that are asking him for something different or if dr thinks a once weekly dosing option would be beneficial to patients. dr said he hasnt had any patients complain of their medications lately or ask for a change but he'll keep Butrans in mind. I asked dr to think of 2 patients who call in early for refills as that might be a sign that a long-acting opioid could be appropriate and dr said he will consider that. I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	5/13/2011	I talked to dr about why he's not started any patients on Butrans yet and dr said he likes that Butrans is in a patch but he's thinking of Butrans for more severe pain patients, so I showed dr Butrans initiation guide and discussed more moderate pain patients trying Butrans. I asked dr to consider patients on vicodin or percocet that ask him for a medication change because their pain isnt controlled with their short-acting opioids or perhaps Butrans's once weekly dosing option is something dr wants for the patients. dr said he will consider Butrans for a few patients and we discussed formulary coverage. I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	5/13/2011	dr said he started 2 patients on Butrans last week. I asked dr why he chose Butrans or thought it was an appropriate option for patients? dr said it wasnt the patients that asked for anything, they were both taking tramadol and he just thought it would be a good idea to try Butrans in these patients and see what happens and both of the patients were happy to try Butrans. I asked dr what patients said about Butrans? dr said both patients liked that Butrans was a patch and dosed once a week. dr asked if Butrans was a CII or CIII as he couldnt remember? I told dr Butrans was a CIII and dr said that was good as CIII's are much easier to prescribe and he can have his staff call in refills. I asked dr to continue finding patients to start on Butrans, that are perhaps taking tramadol but are calling in sooner for refills because the short-acting tramadol isnt controlling their pain or a once weekly dosing option could be appropriate for them. dr agreed and said he will start more patients on Butrans
PPLPMDL0020000001	Cleveland	OH	44109	5/13/2011	dr said she hasnt started anyone on Butrans as she hasnt had any patients ask for a medication change or complain to her that their current medication isnt controlling their pain. I asked dr if patients ever call in earlier in the month than they should, for refills, thinking perhaps a long-acting opioid could be an option at that point? dr said sometimes patients call in sooner than they should so I asked dr to think of Butrans at that point, if patients are taking tramadol, vicodin or percocet, instead of refilling their medication, start them on Butrans. dr said she will consider this option and asked about insurance coverage for Butrans on medicaid. we talked about Butrans formulary coverage on medicaid, bwc and commercial plans. I recommended Senokot-S
PPLPMDL0020000001	Akron	OH	44319	5/13/2011	I talked to Dr. Katirji about initiating therapy to an opioid naive patient. He said that he would keep it in mind but still wants to continue to educate himself on Butrans therapy first. I asked him what information was the most important to him and he said there wasn't one thing in particular. I asked if I could follow up with him next week and he said yes.
PPLPMDL0020000001	Akron	OH	44312	5/13/2011	Quick call through window. Asked Dr. Manning if he had the opportunity to review the Butrans material I had left. he said he read through it briefly but would be more interested to hear about it over a lunch, which I
PPLPMDL0020000001	Cleveland	OH	44102	5/13/2011	I talked to dr about considering Butrans for her patients taking tramadol that are calling in sooner for refills or telling dr their short-acting tramadol isnt controlling their pain. dr said most of her patients like taking pills but she'll keep Butrans in mind. dr wanted to know what the insurance coverage was for Butrans so we discussed commercial coverage and use of Butrans patient savings cards. I asked dr to think of 2 patients with commercial insurance, like we discussed and showed Butrans initiation guide. I recommended Senokot-S <font color=blue>-<b>CHUDAKOB's query on 05/19/2011</b>-</font>Her patients may like taking pills according to her, but how does she feel as the physician about her patients taking pills? This might be a good follow up question to ask when the physician gives you this objection. <font color=green>-<b>BROOKAM's response on 05/25/2011</b>-</font>good question-<font color=blue>-<b>CHUDAKOB added notes on 05/26/2011</b>-</font>Let me know how it works out!
PPLPMDL0020000001	Akron	OH	44312	5/13/2011	Quick call through the window. I asked Dr. McRoberts if he had read the Butrans material I had left behind and he agreed with Dr. Manning that they would prefer I schedule a lunch to discuss the product more in depth.
PPLPMDL0020000001	Cleveland	OH	44109	5/13/2011	worked pm&dr dept - see call notes
PPLPMDL0020000001	Cleveland	OH	44102	5/13/2011	i talked to dr about Butrans being an option for her patients taking Percocet that are asking her for more pills or saying their percocet isnt controlling their pain, dr said it makes sense to try a medication like Butrans as she likes the once weekly dosing and the fact that Butrans is a patch. dr said the challenge is that most of her patients dont want to stop taking their pills. I asked dr if she ever has patients that call in earlier for refills? dr said yes. I told dr that could be a sign that the percocet isnt controlling her patients pain and perhaps Butrans could be an option. I asked dr to think of 2 patients with commercial insurance that she can try Butrans and get some clinical experience? dr agreed. I recommended Senokot-S
PPLPMDL0020000001	Westlake	OH	44145	5/13/2011	I reviewed our last conversation about Butrans and I asked where she sees Butrans fitting in. She said she does think that it could be a good option after tramadol or when patients are already on vicodin and need something else. We reviewed the initiation guide and the starting dose of Butrans depending on what patients are already taking. I asked if she would try it on a few patients who are taking low dose vicodin and she agreed but she wanted to know what the cost is. We reviewed managed care for Butrans and the savings cards. Reminder about OxyContin as an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Akron	OH	44312	5/13/2011	I asked Dr. Smith if he had seen any of the patients we discussed on my last visit. He said he had not yet seen those patients or initiated therapy. I scheduled another appointment with Katie.
PPLPMDL0020000001	Uniontown	OH	44685	5/13/2011	I asked Dr. Stetler if he had initiated therapy to the patients we had discussed on my last visit and he said that he had. He told me he started to patients, both who were opioid tolerant. He said the patients were doing well and he would titrate them to the 5 mcg patch if he needed to titrate. He asked me about our clinical studies which I reviewed using the FPI.
PPLPMDL0020000001	Akron	OH	44312	5/13/2011	Spoke to the pharmacist who said they had recently seen movement from Dr. Stetler. I asked if the patient had any questions and they said no. I explained steady state so they could prepare for a possible call back from the
PPLPMDL0020000001	Woodmere	OH	44122	5/13/2011	Spoke briefly with Angie (pharmacist). She said they do now have Butrans in stock. She said she does not know off hand what strengths & was too busy to check the system. Discussed e-voucher for Butrans as she was unfamiliar with it & reviewed OxyContin savings cards which she said they have some of. I asked her what insurance plans she sees most of at that location. She said she sees a mix of "everything". I asked her the ratio of commercial insurance to government plans. She said she sees more private insurance than government plans.
PPLPMDL0020000001	Twinsburg	OH	44087	5/13/2011	Spoke with pharmacist, Michelle & reviewed Butrans indication, dosing, & delivery system. Went over patient information booklet & discussed application instructions & adherence. Michelle said the booklet would be useful for them if/when patients call for questions. She recommended a speak with Dr Moufawad. I let her know I am working with him. Also reviewed OxyContin savings cards & 7 available tablet strengths.
PPLPMDL0020000001	Independence	OH	44131	5/13/2011	Saw Dr Pai briefly at the window. Attempted to stop him by inviting him to a Butrans webcast. He waved & thanked me & then walked into a patient room. Spoke with Jill about managed care, prior authorizations, & savings cards. She said she will do a prior authorization if Dr Pai wants a patient to have a particular medication. Also asked her to tell Dr Pai about the Butrans webcast invitation. She said she will recommend to him that he attend, but that he rarely does things like that. She said they are in the process of switching over to EMR, so both she & Dr Pai have been especially busy. She said I may be able to get more time with him in a couple weeks.
PPLPMDL0020000001	Cleveland	OH	44103	5/13/2011	I talked to Amy, Pharmacist, about Butrans stocking, scripts she has seen here and asked who is writing a lot of hydrocodone or oxycodone combo's in area, we discussed Butrans initiation guide and talked about tapering of short-acting opioids and initiation of Butrans. Amy asked about the patient information booklet and what she should be telling patients. I told Amy to focus on application sites, rotation of Butrans and log book in back of Butrans patient information booklet. I showed Amy Butrans application dvd/booklet and said this may be an additional tool to help her when explaining to some patients about Butrans, if she doesnt have a lot of time to do patient counseling. we discussed Butrans formulary coverage. <font color=blue>-<b>CHUDAKOB's query on 05/19/2011</b>-</font>You asked her who is writing hydrocodone or oxycodone in the area, but I do not see her answer in your call notes?<font color=green>-<b>BROOKAM's response on 05/25/2011</b>-</font>I didnt note doctors names. I am limiting information in my call notes as I write too much-<font color=blue>-<b>CHUDAKOB added notes on 05/26/2011</b>-</font>I would think that this was important information as you asked the question?
PPLPMDL0020000001	Cleveland	OH	44113	5/13/2011	I talked to dr about the patients she's starting on Butrans and why she's continually choosing Butrans as an option. dr said she's seeing improvements in patients pain so clinically there are improvements being seen after patients start on Butrans so she's happy and patients think putting on the patch and only having to change it once a week is easy so that makes it easier for her and her staff. we looked at Butrans initiation guide, discussed tapering and initiation of Butrans 5mcg or 10mcg. we discussed Butrans formulary coverage. I recommended Senokot-S
PPLPMDL0020000001					

	Beachwood	OH	44122	5/13/2011	Spoke with Dr Yokie's medical assistant & reviewed Butrans formulary grid & went over savings cards for commercially insured patients. Also discussed OxyContin savings cards. She said they have about 4 cards for each product & also have sufficient Butrans patient education. She said that Dr Yokie is currently overly busy, doing more procedures. They are also trying to work out a schedule for Jennifer (NP) who will be seeing all Dr Yokie's & Dr Barrett's follow-up appointments by August. Scheduled early June lunch.
PPLPMDL0020000001	Parma	OH	44129	5/16/2011	Dr Ortega said he has not had any feedback on Butrans yet, but continues to look for more patients to start on it. He told me about a patient who used to be on 80mg OxyContin q12h that he has since weaned down to 20mg q12h. He asked me if this would be a potential candidate for Butrans. Reviewed initiation/titration guide with him & discussed taper of current opioid before starting Butrans 10mcg. He said the patient is committed to getting rid of his pain while reducing the amount of medication that he has to take. Reminded Dr Ortega that Butrans is CII & does have abuse/addiction potential. He said that he couldn't remember how to start Butrans for patients, so he did not start this patient when he saw him most recently, but is considering calling in a Butrans prescription for him before his next appointment. Discussed OxyContin as an option for appropriate patients. He asked if Dr Hernandez is using Butrans- recommended that he call Dr Hernandez for his feedback.
PPLPMDL0020000001	Brooklyn	OH	44144	5/16/2011	Spoke with pharmacist Cheryl who said that while they do have Butrans in stock, she has not yet dispensed any. Discussed area physicians- she had no specific recommendations of what practitioners may be interested in Butrans based on their patient population. Reviewed appropriate patient type & e-voucher. Also discussed OxyContin savings cards, which Cheryl said they have plenty of.
PPLPMDL0020000001	Parma	OH	44129	5/16/2011	Quick call as I caught Jen on her way from one patient room to another. She said they had just talked about Butrans & that Dr Nickels said it was one of the products he finds acceptable for them to prescribe. I spoke with Dawn & asked what that meant. She said that last week, all the practitioners had a meeting where several "new" products were discussed. She said they do this occasionally to make sure that everyone "is on the same page" with prescribing. She added that Dr Nickels said he has tried a few patients on Butrans & that it was added to the list of products that the nurse practitioners could all prescribe (as a sort of pre-approval by Dr Nickels). Dawn said that Jen will probably be the last of the NP's to prescribe it only because she is more reserved since she is so new, but that she would do her best to point out appropriate patients to Jen.
PPLPMDL0020000001	Cleveland	OH	44106	5/16/2011	I talked to dr about Butrans fpi,5 core messages,initiation guide,patient information booklet and Butrans formulary coverage.dr asked what patients could benefit best from Butrans? we talked about patients taking tramadol,hydrocodone or oxycodone combinations where their pain isnt controlled and perhaps a once weekly dosing option like Butrans would be appropriate.i showed dr Butrans initiation guide.dr asked what's the next step after Butrans doesnt work anymore? i told dr he has option of OxyContin,we discussed appropriate patients for OxyContin,7 tablet strengths for flexibility in titration and formulary coverage.i asked dr if he had patients taking short-acting opioids that werent controlled and dr said yes.dr said he thinks Butrans will be more appropriate out-patient initially,as most of his chronic pain patients are discharged within 3-4 days,dr asked if he could give patients short-acting opioids,i told dr yes and showed Butrans fpi with this information
PPLPMDL0020000001	Cleveland	OH	44102	5/16/2011	i talked to Amol,Pharmacist,about Butrans initiation guide-appropriate patients,tapering of short-acting opioids and initiation of Butrans.we reviewed Butrans patient information booklet and i asked Amol to share with patients the application and rotation of Butrans and showing patients the log book.Amol agreed but said he hasnt seen any Butrans scripts.we talked about importance of stocking Butrans and i asked Amol if he would recommend Butrans to physicians,if patients are telling Amol that their pain isnt controlled with their short-acting opioids,Amol said it depends on the physician and his relationship with that doctor but he will do his.I
PPLPMDL0020000001	Akron	OH	44333	5/16/2011	I asked Dr. Griffiths why she had not initiated Butrans therapy. She mentioned she had 2 patients coming in this afternoon and said she would initiate therapy to both of them. I asked about their insurance and she looked and told me they both had a private plan. I explained those were the perfect patients. I asked if I could come in next week to follow up and she agreed.
PPLPMDL0020000001	Akron	OH	44333	5/16/2011	I asked Dr. Brown how the patients she started on Butrans were doing. She said she liked the concept of this therapy and would continue to initiate as she gets busier. She said she is still focused on building her practice but feels Butrans will become really significant as her practice grows.
PPLPMDL0020000001	Cleveland	OH	44113	5/16/2011	worked pain management dept-see call note on dr daoud
PPLPMDL0020000001	Cleveland	OH	44195	5/16/2011	worked Neurology dept-left Butrans fpi,initiation guide,patient information booklet,formulary grid and Butrans dinner invitation for Dr.Kriegler,Dr.Mays,Dr.Spears and Dr.Stillman-NEUROLOGY dept. worked anesthesia/pain management dept-left Butrans fpi,initiation guide,patient information booklet,formular grid and Butrans dinner invitation for Dr.Minzter,Dr.Mekhail,Dr.Cheng,Dr.Vrooman,Dr.Shin,Dr.Katyal-couldnt see any of the physicians as dept was packed and doctors were either in surgery or seeing patients.
PPLPMDL0020000001	Lakewood	OH	44107	5/16/2011	Quick call, I told Dr that last time we spoke he said he had several patients who he thought might benefit from Butrans. He said he will try to write it for them. I asked Dr if there was anything holding him back from prescribing Butrans and he said no.
PPLPMDL0020000001	Lakewood	OH	44107	5/16/2011	Quick call, I asked Dr his thoughts on where Butrans fits in and he said he has not thought about it. I reviewed the 5 key messages and he said that it sounds good and to leave the information. I pointed out the initiation guide and showed him where Butrans can fit in. I reviewed the savings program. I spoke with Robin and asked her to remind the Dr about Butrans and she agreed.
PPLPMDL0020000001	Cleveland	OH	44106	5/16/2011	I talked to dr about Butrans fpi, 5 core messages,initiation guide,patient information booklet/dvd,Butrans formulary grid and Butrans patient savings cards.dr said a transdermal option is better than giving patients enormous amounts of pills every month and he thinks Butrans could be a good option in the hospital for their chronic pain patients too.I asked dr to think of a couple of patients to try Butrans in and get some clinical experience,Dr
PPLPMDL0020000001	Parma	OH	44129	5/16/2011	Quick call at the window- Butrans positioning message & asked her to consider an upcoming webcast for Butrans. She waved & said she would look into it. Spoke with Natalie who said they have plenty of savings cards for both Butrans & OxyContin.
PPLPMDL0020000001	Lakewood	OH	44107	5/16/2011	I asked the Dr to tell me about the success he's been having with Butrans. He said that he has had good results. Pat came over as said that she has been getting good feedback but she has had to do some prior auths.
PPLPMDL0020000001	Akron	OH	44333	5/16/2011	I asked Dr Richter if his thoughts about prescribing a LAO have changed. He said that he had a handful of patients that he would consider Butrans for but wanted to read about it on his own. I asked him why he didn't like LAO and he said he just prefers to send those patients to Pain Management.
PPLPMDL0020000001	Fairlawn	OH	44333	5/16/2011	Talked to Jessica. Followed up about a Medicare patient we discussed on my last visit. She said that they had not heard back from the patient yet. She said Dr. Shah is not typically writing refills and that they are continuing to get new starts from Dr. Shah.
PPLPMDL0020000001	Akron	OH	44333	5/16/2011	I asked Dr. Shah if he was writing refills and he mentioned that for the most part he was. He said that he really liked the patient education guides and asked me to leave more. I encouraged him to continue initiating therapy to his low dose hydrocodone patients just as he has been doing.
PPLPMDL0020000001	Cleveland	OH	44130	5/16/2011	Spoke with pharmacist, Deb, & reviewed savings programs for Butrans & OxyContin. Let her know that she could print savings cards by going to Butrans.com. She said she has not dispensed any yet. I asked her if she had any strengths in stock & she said no. I let her know that many physicians have reported to me that they are calling pharmacies to find out who is stocked so they know where they can send their patients to get it same-day. She said she may order some because of that. Reminded her of dosing/titration.
PPLPMDL0020000001	Cleveland	OH	44104	5/16/2011	dr said he was happy i was having lunch with him as he had a patient today tell him the percocet wasnt controlling her pain anymore and dr wasnt comfortable giving her a refill of the percocet or increasing the dosage strength so dr thought Butrans could be an option.we talked about proper tapering of percocet and initiation of Butrans,i showed dr Butrans initiation guide for this discussion.i showed dr Butrans patient information booklet and importance of application sites for Butrans and rotation of Butrans and the log book in the booklet,dr said he's going to call in the medication for this patient and have her go to pharmacy to get Butrans.i asked dr to think of a few more patients like this who arent controlled on their short-acting opioids and perhaps a once weekly dosing option like Butrans is appropriate,dr agreed.we talked about OxyContin being an option after Butrans
PPLPMDL0020000001	Cleveland	OH	44113	5/16/2011	20mcg isnt controlling pain,discussed formulary coverage and gave dr OxyContin conversion guide.recommended
PPLPMDL0020000001	Cleveland	OH	44113	5/16/2011	i talked to dr about his patients taking tramadol that meet Butrans indication and are asking him for something else as their tramadol isnt controlling their pain and perhaps a once weekly dosing option like Butrans is appropriate.i showed dr Butrans initiation guide for this discussion.dr said he does a lot of procedures and hasnt seen any patients recently that he feels meets the Butrans indication.dr said he did have 1 patient last week that he was going to start on Butrans but the patient failed the drug screen and had street drugs in his system so dr had to remove this patient from his practice,so clearly he couldnt start this patient on Butrans.dr said he is leaving wednesday for Italy and will be gone until June1st,so he'll think of some patients in June,to start on Butrans.We discussed Butrans formulary coverage and patient savings cards for commercially insured patients.I
PPLPMDL0020000001	Cleveland	OH	44130	5/16/2011	I asked Dr Diab to tell me about the feedback he has gotten about Butrans. He said that he has not gotten any yet. He then went on to say that Butrans is a "good product" & that he sees a place for it in his practice & that I just "need to be patient". I asked him what he likes about Butrans. He said that one thing he likes is that he feels it helps improve compliance since it is once-a-week. I asked if he would continue to prescribe Butrans for appropriate commercial insurance patients to increase his clinical experience & he said he intends to. Also reminded him of OxyContin as an option for patients beyond Butrans 20mcg.
PPLPMDL0020000001	Cleveland	OH	44106	5/16/2011	i talked to dr about Butrans fpi,5 core messages,initiation guide,patient information booklet/dvd,Butrans formulary coverage and Butrans patient savings cards.dr said he thinks there is a place for Butrans in the out patient setting as they have a lot of patients on tramadol,that do ask for something different or when they are asking for more pills,he's not always comfortable giving more pills,so this would be a great option for that sub group of patients.we talked about once weekly dosing being an option for patients that he feels would prefer that dosing instead of around the clock dosing of their immediate release opioids.I showed dr Butrans initiation guide with proper tapering and initiation of Butrans,dr said it seemed easy and would think of some patients to try Butrans in and get some clinical experience.I told dr i would follow-up with him on wednesday at ground rounds to hear of his success starting a few patients,dr said that was fine.
PPLPMDL0020000001	Cleveland	OH	44106	5/16/2011	i talked to dr about Butrans fpi,5 core messages,initiation guide,patient information booklet/dvd,Butrans formulary coverage and Butrans patient savings cards.dr said he thinks Butrans would be a great option for those patients that dont like to take pills and would be willing to put a patch on once a week but he would have to be sure the patient was responsible enough to rotate the patch every week.dr said he see's a lot of patients in the hospital that have chronic pain and are taking tramadol,vicodin and percocet around the clock and thinks Butrans could be used in the hospital setting as well as the out-patient setting.I asked dr to think of a couple of patients,like we discussed,and start them on Butrans,dr agreed and we talked about proper tapering of short-acting opioids and initiation of Butrans.
PPLPMDL0020000001	Berea	OH	44017	5/16/2011	I reviewed the 5 key messages for Butrans, boxed warning and initiation guide. Dr had questions about adverse events, hepatic effect, and clinical trials and we reviewed the FPI. Dr had concerns about the patch sticking for 7 days and we reviewed what to do if the patch starts to come off per the medication guide. I asked if he has had problems with the patch falling off with other meds and he said no. I asked the Dr how he decides that a patient has chronic pain. He said it is based on their condition or disease state. I asked the Dr where he would most likely prescribe Butrans and he would most likely convert a patient from low dose vicodin. I reminded the Dr that OxyContin is still a long acting option.
PPLPMDL0020000001	Lakewood	OH	44107	5/16/2011	I asked Dr if he had tried Butrans yet, he said no. I asked what he thinks of it and he asked a few questions. He asked about steady state and the doses available. We reviewed the initiation guide and how to start a patient on Butrans. He said he will give it a try.
PPLPMDL0020000001	Independence	OH	44131	5/16/2011	Dr Trickett saw me at the window, waved & said, "Butrans, I know..." & then walked back into the patient treatment area. Steve said she has been really busy, so I should try back another time to talk to her more. He said to try next week or the week after. Discussed Butrans webcast for June 1 & asked Steve to give Dr Trickett an invitation. Also reviewed managed care coverage.
PPLPMDL0020000001	Cleveland	OH	44106	5/16/2011	conducted a lecture for the anesthesia/pain management fellows(2), residents(3) and 1 attending physician (Dr.Ko) on Butrans-we discussed Butrans fpi,initiation guide,patient information booklet/dvd and formulary coverage-all of the physicians said there are a lot of chronic pain patients in hospital when they think Butrans would be a great option for and even those patients that are only in hospital for 3-4 days,they could start patients on Butrans and give short-acting opioids for the first 2-3days until patients reach steady state and when patients are discharged they can get Butrans at Bolwell pharmacy as they know its stocked in Bolwell.all of the physicians agreed that there should be a limitations of use,perhaps only apm doctors,for Butrans initially,so i asked them to fill out the drug review form and send to pharmacy to show more support for Butrans

	Cleveland	OH	44106	5/16/2011	I talked to dr about Butrans fpi,5 core messages,initiation guide,patient information booklet,Butrans formulary coverage on commercial,bwc and medicaid,and Butrans patient savings cards for commercial patients.dr said he loves transdermal products,prefers them over pills for chronic pain patients.dr said he likes the once weekly dosing option and thinks Butrans would be a great option in the hospital for chronic pain patients.we discussed Butrans being presented,in March,to the p&t committee but not getting approved,so i asked dr if he believes in this medication to start some patients and perhaps at the next review,he could support Butrans by filling out the drug review form.dr agreed and said he see's patients who have chronic pain and are in the hospital longer than 3-4 days,which is the perception that they are all acute pain patients here,so he thinks a once weekly transdermal medication like Butrans would be ideal.we discussed proper tapering of immediate release opioids and
PPLPMDL0020000001	Westlake	OH	44145	5/17/2011	Spoke with Jennifer, we reviewed Butrans 5 key messages. We discussed the medication guide and i asked if she would help us instruct the patient on proper use and application. I asked if she would also inform the patient to give Butrans 3 days to work before calling the Dr to give feedback. She agreed.
PPLPMDL0020000001	Shaker Heights	OH	44122	5/17/2011	Quick call at the window. Positioned Butrans for patients taking low doses of around-the-clock tramadol or Vicodin for chronic conditions who call for refills too soon or who ask for an increase or change in dose. He thanked me, waved, & walked away. Spoke with Michele (MA) & reviewed savings cards & appropriate patients.
PPLPMDL0020000001	Parma	OH	44129	5/17/2011	Quick call- Dr Paat said he did not remember Butrans. Reviewed Butrans key points & reminded him that Butrans is the only 7 day analgesic & only CIII long-acting opioid. He said he liked the once-a-week dosing. Discussed appropriate patient type & positioned Butrans for patients who are on low-dose Vicodin or tramadol who ask for an increase in dose or change in medication. Also reminded him to focus on commercially insured patients who can utilize savings cards, bringing them down to approximately \$15 out-of-pocket. He said he will try Butrans.
PPLPMDL0020000001	Parma	OH	44129	5/17/2011	Spoke with Terry (nurse) who said that Dr Roeheny was not in the office today & they are not allowing reps for the rest of the week. Reviewed with her formulary grids for Butrans & OxyContin & also went over appropriate patient type for Butrans.
PPLPMDL0020000001	Sagamore Hills	OH	44067	5/17/2011	Dr Scanlon said he really does not know why he has not prescribed Butrans yet. I asked if he saw merit in Butrans. He said yes & that he has no clinical objections. He said he truly thinks it is a matter of not remembering it. I told him my goal was to help him remember & asked him how frequently he sees patients for whom Butrans may be appropriate. He said daily. He then said that he actually had a patient yesterday & said he really should have prescribed it for him. I reminded Dr Scanlon that Butrans can be called in as it is CIII. I asked him if he sees enough of a benefit in Butrans to call a Butrans prescription in for that patient. He said he would retrieve the patient's file immediately & would make the call this morning. Also discussed savings cards & OxyContin as an option for appropriate patients beyond Butrans 20mcg.<font color=blue><b>CHUDAKOB's query on 05/27/2011</b></font>-Nice job of getting the physicians to take action! Did you follow-up to make sure he called the patient to change the script?<font color=green><b>APSEGAS's response on 05/27/2011</b></font>I just had lunch with him this week. (he called me his "favorite stalker" because I manage to see him at both locations with breakfasts & lunches so frequently. I did ask him about this & he said he did call in the script for that patient. He also said he should have more than just that patient, so we talked about ways to get him to think of Butrans for his other appropriate patients. He did agree that he has many, many patients who could benefit from Butrans. Looking forward to seeing results!<font color=blue><b>CHUDAKOB added notes on 06/02/2011</b></font>-OK! Good job! Stay persistent!
PPLPMDL0020000001	Westlake	OH	44145	5/17/2011	Dr is pain fellow starting July 1st at OH for one year program. After that he hopes to join a practice in chardon. He said that does like transdermal systems and thinks that Butrans would fit in well as an alternative to prescribing vicodin around the clock. We reviewed the initiation guide and FPI. We reviewed Purdue's pain products and reminded him that Ryzoit and OxyContin are also options. We discussed some of Purdue's resources to help him pick appropriate pain patients. (His wife is a school teacher for autistic kids in Brecksville, has one year old and a baby on the way)
PPLPMDL0020000001	Maple Heights	OH	44137	5/17/2011	Introduced Butrans to Dr Gene. Reviewed Butrans key points (indication, delivery system, appropriate patients, CIII, abuse/addiction potential). Discussed how Butrans may not be appropriate for patients on >80mg morphine & how OxyContin may be an option for some of those patients. He asked about adverse events- showed FPI section 6. He asked if it was more/less abusable than other opioids. Told him we have no comparative data & advised him to be just as cautious with Butrans as he would with other opioids. Also discussed structure of the patch itself & showed a demo. He asked about "street value". I told him I have no specific information on that & reminded him that it is an opioid with abuse/addiction potential. He said he could think of a few patients who may be good candidates & mentioned low back pain, spinal stenosis, & arthritis. Reviewed managed care & savings. He said he refers to pain mgmt if a patient starts needing "more & more" medication & handles it on case-by-case basis
PPLPMDL0020000001	Cleveland	OH	44103	5/17/2011	i talked to dr about her patients taking percocet, that are telling her their percocet isnt lasting long enough or asking for something different instead of increasing the dosage strength or interval.i asked dr to consider Butrans for those patients.dr said she will do that and has thought of a few patients but they haven't wanted to stop taking their percocet.we talked about dr speaking to patients,about Butrans,that arent happy with their current short-acting opioid and could perhaps benefit from once weekly dosing of Butrans.dr agreed and said that makes sense and will think of Butrans.i talked to dr about OxyContin formulary coverage and appropriate patients.i recommended Senokot-S
PPLPMDL0020000001	Maple Heights	OH	44137	5/17/2011	Spoke with Antuina, pharmacist, & reviewed Butrans indication, dosing, & appropriate patient type. Also went through managed care coverage & savings cards/e-voucher & discussed OxyContin savings cards. I asked what type of managed care mix they see at that location & she said it is a combination of Medicare, Medicaid, & commercial insurance. She said it is probably equal parts of each. Also asked her if they stock OxyContin & she said they do, but on a very limited basis.
PPLPMDL0020000001	Cleveland	OH	44106	5/17/2011	dr said he started a couple patients on Butrans last week,as they were taking tramadol and not controlled so he thought he would try Butrans as another option.we discussed appropriate patients,tapering of short-acting opioids and initiation of Butrans and i asked dr to continue starting more patients on Butrans,that are taking tramadol but not controlled or calling in earlier every month for refills,dr said he will do that.i recommended
PPLPMDL0020000001	Cleveland	OH	44113	5/17/2011	dr said he hasn't started anyone on Butrans yet,but he likes that it's transdermal, a patch and dosed once a week.dr asked who was the appropriate patient as he couldn't remember?i showed dr Butrans initiation guide,discussed appropriate patients,tapering of short-acting opioids and initiation of Butrans.dr asked who covers Butrans?we discussed formulary coverage for Butrans,dr said he has a lot of medicaid,medicare and commercial,we discussed Butrans patient savings cards for commercial plan patients.Sheila,dr nurse,takes all medication refill requests and she said this made sense to try Butrans in those patients calling early every month for refills of their short-acting opioids as they complain to her that their medication isnt lasting long enough.Sheila processes all insurance claims and prior authorizations so we discussed medicaid requirements for butrans approval.i asked dr if he could think of a few patients to try Butrans in and i'll follow-up next week,dr said yes.
PPLPMDL0020000001	Cleveland	OH	44103	5/17/2011	i talked to dr about Butrans being an option,for his patients that tell him their short-acting opioids arent controlling their pain.dr said he does get calls that vicodin or percocet isnt working and dr will consider a long-acting opioid at some point for these patients.dr said his only problem with Butrans is that he's not willing to do the prior authorization for medicaid patients and thats majority of patients here.i talked to dr about commercial plan patients and them using Butrans patient savings cards.i asked dr if he could think of 2 patients,commercially insured,to try Butrans in and get some clinical experience? dr said he didnt know off hand but will keep it in mind.we talked about OxyContin formulary coverage,appropriate patients and OxyContin savings cards.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	5/17/2011	i talked to dr about appropriate patients to start on Butrans,proper tapering of short-acting opioids and initiation of Butrans,showed dr Butrans initiation guide.dr said his patients on Butrans say their pain is controlled and rarely do they need their short-acting opioids so dr is happy.i asked dr to think of more patients,like the one's he started on Butrans,that arent controlled on their short-acting opioids and perhaps once weekly dosing of Butrans could be an option.dr agreed.i recommended Senokot-S
PPLPMDL0020000001	Fairlawn	OH	44333	5/17/2011	I asked Dr. Weidman if she would continue to initiate Butrans therapy to patients who have a similar profile as her previous starts. She said she doesn't treat a ton of chronic pain but would keep it in mind.
PPLPMDL0020000001	Akron	OH	44319	5/17/2011	I asked Dr. Yee where he thought he would like use Butrans therapy. He explained that he liked it for patients currently on low doses of SAO's. He said that he liked it was a single entity and that it was a schedule 3.
PPLPMDL0020000001	Akron	OH	44310	5/17/2011	I asked Dr. Cremer where he was having success and he mentioned most patients were BWC patients and most all new starts were conversions from hydrocodone.
PPLPMDL0020000001	Akron	OH	44333	5/17/2011	Quick call. I reminded Becky that when she initiated Butrans therapy to a patient to utilize the savings cards in the sample room. She has started patients without a card and patients have complained of price.
PPLPMDL0020000001	Fairlawn	OH	44333	5/17/2011	I asked Dr. Oyakawa if he thought Butrans would fit somewhere in his practice and he said it would. I asked him why he hasn't trailed it on at least one patient and he said he would this week.
PPLPMDL0020000001	Akron	OH	44333	5/17/2011	Quick call. I asked Lisa if she felt comfortable identifying a Butrans patient and she said she did. She said she would keep it in mind for the remainder of the day!
PPLPMDL0020000001	Akron	OH	44333	5/17/2011	I stopped back in to drop off the patient education DVDs. Dr. Shah said that he really liked handing out patient education with a Rx of Butrans. I explained the DVDs and reminded him again to write for refills.
PPLPMDL0020000001	Independence	OH	44131	5/17/2011	Quick call- Dr Sundaram said he has two patients on Butrans so far. He said he has one male patient (who he has told me about) & one female patient who he started most recently. Presented patient information guide & asked Dr Sundaram if this kind of information would be useful for him to give to patients when prescribing Butrans or for him during patient counsel. He said he would like to use one when talking to patients & also wanted a few to keep on hand for patients to take with them. He said he tries to explain medications to patients when he prescribes a medication that is new for them. He said he would let me know clinical feedback when he gets it.
PPLPMDL0020000001	Cleveland	OH	44106	5/17/2011	worked pain management dept-seen call notes
PPLPMDL0020000001	Westlake	OH	44145	5/17/2011	I asked Dr Khalil if he would try Butrans after tramadol and before going to vicodin around the clock. He said he thought it made a lot of sense to prescribe Butrans in this place. He had questions about steady state, titration dosing, geriatric patients and we reviewed the FPI to address his questions and concerns. We reviewed Ryzoit as a once a day tramadol option and then OxyContin when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Maple Heights	OH	44137	5/17/2011	Spoke with Nurse, Helene, who said that Dr Dale was running two hours behind & therefore would not be coming back to speak with me for lunch. Attempted to leverage Butrans, a product that he has not been detailed on yet, but Helene said he was not even speaking to his staff at the moment, so i would have to talk to him another time. Reviewed Butrans key points with her. She said Butrans sounded like something he may be interested in. Scheduled a lunch for next month to see him. Reviewed managed care/savings cards for Butrans & OxyContin.<font color=blue><b>CHUDAKOB's query on 05/27/2011</b></font>-Can you see this physician often enough to make an impact?<font color=green><b>APSEGAS's response on 05/27/2011</b></font>-It doesn't seem so at this point. He is not on my top 4 tiers of physicians due to his access, although I was hoping between his two locations i would get to see him more than I have through scheduling lunches.<font color=blue><b>CHUDAKOB added notes on 06/02/2011</b></font>-OK. Thanks! Be sure to make good business decisions on who you are
PPLPMDL0020000001	Cleveland	OH	44109	5/17/2011	i talked to Nate,Pharmacist,about Butrans stocking,scripts they have seen here for Butrans and who's prescribing in area,we discussed Butrans initiation guide,proper tapering and initiation of Butrans.i asked Nate if the pharmacy staff would show patients the Butrans patient information booklet noting application and rotation of Butrans and the log book in back of booklet,as that patient education would help patients getting started on Butrans,Nate agreed and said that made sense,we discussed Butrans formulary coverage.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44114	5/17/2011	i talked to dr about continually starting patients on Butrans,showed Butrans initiation guide and discussed proper tapering and initiation of Butrans.we talked about patients dr has started recently on Butrans and feedback from them,we talked about Butrans formulary coverage.i recommended Senokot-S
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	5/17/2011	I asked about movement which they said has started to pick up. I asked what questions patients had or about call backs and they had none. I explained steady state and prepared them for patients to call back on those first 3
PPLPMDL0020000001	Cleveland	OH	44114	5/17/2011	I talked to dr about patients he's starting on Butrans and why he's choosing Butrans.i showed dr Butrans initiation guide,discussed proper tapering and initiation of Butrans 5mcg or 10mcg,we discussed Butrans formulary coverage.i asked dr to think of a couple more patients that are taking short-acting opioids and their pain isnt controlled and if appropriate start on Butrans.dr agreed and i recommended Senokot-S
PPLPMDL0020000001	Akron	OH	44333	5/17/2011	Quick call. Dr. thanked me for bring ing breakfast and I gave him the Butrans FPI and explained it had recently been introduced to the market. I acknowledged that he does not see reps but left my card with him in case he had any questions.
PPLPMDL0020000001	Cleveland	OH	44114	5/17/2011	i talked to John,PA,about patients he's recommending to doctors to start on Butrans,we discussed Butrans initiation guide,tapering of short-acting opioids and initiation of Butrans and we talked about Butrans formulary coverage. John said he'll continue to recommend Butrans for patients he feels are appropriate,to the doctors and is looking forward to the dinner program next week.

	Cleveland	OH	44113	5/18/2011	dr said she hasnt thought about Butrans and asked me to review Butrans with her as we had lunch today and she had more time to think about who's really appropriate for Butrans in her practice.dr said she has a small group of patients taking tramadol and doesnt write a lot of narcotics.dr said she is overwhelmed and frustrated with being a dr as she's expected to do more but get paid less from insurance companies and pain is something she doesnt really like to manage.i asked dr to explain the benefits she saw in Butrans for her patients? dr said once weekly dosing is easy for a lot of patients instead of pills around the clock for their chronic pain and transdermal delivery with Butrans being in a patch.i asked dr if patients ever call in to office asking for refills,earlier than they should,so perhaps their short-acting tramadol isnt controlling their pain long enough? dr said yes they get those calls,i asked dr to think of Butrans for a couple of those patients if appropriate...
PPLPMDL0020000001	Parma	OH	44129	5/18/2011	Dr Gigliotti said he knows it is just a matter of time before he gets a Butrans patient. I agreed that based on what we have talked about in the past, that he likely has man patients who would be appropriate candidates. Discussed Butrans positioning & Dr Gigliotti said he "is ready to just do it". Reviewed managed care & savings cards for Butrans & OxyContin & spoke with Jazz (MA) to cover these details as well.
	Warrensville Heights	OH	44122	5/18/2011	Introduced Butrans to Dr Garwood, highlighting indication, dosing, CIII, abuse/addiction potential, & application. Also presented initiation guide & positioned Butrans for patients after NSAID's/COX-2's or instead of short-acting around-the-clock. He mentioned a few different specific patients who he thought may be good candidates for Butrans who had chronic conditions & were already on short-acting medications. He said he thinks Butrans sounds like a good option. He asked about adverse events- showed FPI section 6. Discussed titration ability every 3 days to a max dose of 20mcg. Also reviewed managed care & savings cards & he agreed that \$15 was a reasonable co-pay for commercially insured patients. Also showed him a demo & went over application, adhesion, & rotation. Positioned OxyContin q12h for appropriate patients beyond Butrans 20mcg & recommended Senokot-S for opioid-induced constipation.
PPLPMDL0020000001	Cleveland	OH	44114	5/18/2011	I talked to Laura,Pharmacist,about Butrans initiation guide,discussed appropriate patients,tapering of short-acting opioids,initiation of Butrans,importance of stocking Butrans and Laura said when she see's a script for Butrans she will stock it. I asked Laura to discuss with patients the Butrans application,rotation of the transdermal system and the log book section in the Butrans patient information booklet.Laura said she will when she gets scripts and see's patients.we talked about OxyContin being an appropriate option for patients,formulary coverage and OxyContin conversion guide and we discussed doctors writing OxyContin in the area and what strengths.I recommended Senokot-S
PPLPMDL0020000001	Warrensville Heights	OH	44122	5/18/2011	Reviewed Butrans indication, dosing, delivery system, CIII & abuse/addiction potential with Dr Mueller. He said he generally does not prescribe opioids & refers to pain management whenever possible. He said he did think that Butrans sounded like an interesting option for some patients. He looked at the demo patch with Dr Kessler. Positioned OxyContin q12h as an option for appropriate patients beyond Butrans 20mcg.
PPLPMDL0020000001	Cleveland	OH	44113	5/18/2011	I talked to dale,pa,about appropriate patients to start on Butrans,showed Butrans initiation guide and asked dale if he would consider patients who are taking tramadol that arent controlled,to start on Butrans? dale said he's been thinking of vicodin and percocet patients but that makes sense to consider those patients.we talked about proper tapering of short-acting opioids and initiation of Butrans.we talked about Butrans formulary coverage.i recommended Senokot-S
	Cleveland	OH	44113	5/18/2011	I talked to dr about appropriate patients she's starting on Butrans,showed dr Butrans initiation guide,discussed proper tapering and initiation of Butrans and we discussed dr starting more patients on Butrans,bt earlier in therapy so right after the 1st dose of short-acting opioids arent controlling patients pain,to consider Butrans right there instead of refilling short-acting opioids.dr said she is pleased with clinical results she's seeing once patients get started on Butrans and hasnt heard any complaints from patients that she's started on Butrans.we discussed Butrans formulary coverage and I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	5/18/2011	I talked to Laura about appropriate patients to start on Butrans,showed Butrans initiation guide and talked about her patients taking Vicodin that are asking for something else as their Vicodin isnt lasting long enough and instead of increasing the vicodin dosage strength or increasing dosing interval,i asked Laura if she would consider Butrans,if patients are appropriate? Laura said she might as dr nickels has started some patients on Butrans so she wants to see how they do and she might consider prescribing but she feels pressured to see so many patients every day that she doesnt have time to explain a new medication to patients,we talked about Butrans application dvd/patient information booklet and how that would be an educational tool to help her as it relates to the time needed when explaining a new medication or medication change to patients,laura said she'll think about it and appreciated the information.
PPLPMDL0020000001	Akron	OH	44304	5/18/2011	I asked Dr. Amanambui if he felt comfortable prescribing Butrans to patients currently on low dose hydrocodone and he said he thought so. I asked if he had many patients that were currently on SAO's that he thought could benefit from a LAO and he said yes. I showed him how to initiate therapy to an opioid experienced patient. He asked about coverage which I explained and closed utilizing the co-pay cards.
PPLPMDL0020000001	Akron	OH	44320	5/18/2011	I asked Misty if she has continued to initiate Butrans therapy to patients with similar profiles. She said that she liked the idea of Butrans mainly because it was a schedule 3.
PPLPMDL0020000001	Cleveland	OH	44143	5/18/2011	I asked doc what he does for patients' pain after tramadol is no longer adequate. He said he would go to narcotics. I discussed Butrans as an option - the indication, positioning, CIII status. He asked about the molecule. I explained its Buprenorphine. He was familiar with it. He said it sounds like a great alternative as he writes a lot of pain drugs. He asked about coverage. I explained the commercial coverage and the use of the savings cards. I explained that medicaid/medicare will be difficult to get through. He said he understands as it(butrans) is still relatively new. I explained the initiation guide and how to start opioid naive and opioid experienced patients. He said he would try it.
PPLPMDL0020000001	Cleveland	OH	44113	5/18/2011	I talked to dr about considering Butrans for his patients taking short-acting opioids for chronic pain that meet Butrans indication and are asking dr for something different as their short-acting opioids arent controlling their pain.dr said he only has a few patients that are chronic pain taking short-acting opioids,the majority of patients are acute pain.so I told dr to consider Butrans for the chronic pain patients that he feels are appropriate and could benefit from a long-acting opioid and once weekly dosing of Butrans: dr said okay he would keep in mind and asked about insurance coverage so we discussed formulary coverage for Butrans.I recommended Senokot-S
PPLPMDL0020000001	Mayfield Heights	OH	44124	5/18/2011	Window call.....HCP said he did not need more Butrans savings cards. Reminded her of the commercial covered plans and also how to initiate dosing - 5mcg for opioid naive, 10mcg for opioid experienced. Nothing learned.
PPLPMDL0020000001	Akron	OH	44320	5/18/2011	I asked Dr. Bonyo what he felt the difference between a Vicodin and Percocet patient was. He didn't really respond but he took the initiation guide I was holding and said he would keep it in mind. Nothing new learned.
PPLPMDL0020000001	Akron	OH	44333	5/18/2011	I asked Dr. Brown about the types of patients she had initiated Butrans therapy to. She said that all 3 were already on opioids and those will be the patients she continues to treat with Butrans therapy. She mentioned many of her patients are past the point of Butrans and I then reminded her about OxyContin.
PPLPMDL0020000001	Cleveland	OH	44113	5/18/2011	worked pain management dept,orthopedics office and internal medicine office (premier physicians)-see call notes on dr gadmack,flores and nouralain
PPLPMDL0020000001	Fairlawn	OH	44333	5/18/2011	I asked Dr. Domdera if he was any closer to prescribing Butrans therapy and he said he was. He mentioned that he typically liked to wait a while to hear feedback from other practitioners. I mentioned that I had an upcoming dinner program and he expressed interest in coming.
PPLPMDL0020000001	Mayfield Hts	OH	44124	5/18/2011	Window call. Doc said that he has been writing a few scripts of Butrans but they all seem to require a PA. I asked him if he recalls which plans he did not know. I explained that he should focus on commercial patients as medicaid/medicare will likely not cover Butrans. Gave him a formulary grid and asked him to keep trying to prescribe. He said ok.
PPLPMDL0020000001	Westlake	OH	44145	5/18/2011	I told Dr that Butrans has been available since January and has he thought about giving it a try. He said he he will take another look and to leave the info, he said I could stop back next Monday to follow up.
PPLPMDL0020000001	Fairlawn	OH	44333	5/18/2011	Quick call. I asked Dr. Parisi about his success with Butrans. He said that he had success and would continue to keep it in mind. No new information learned.
PPLPMDL0020000001	University Heights	OH	44121	5/18/2011	I asked doc what he remembers about Butrans. He remembered that it is a 7 day pain patch for patients that have not been on opioids. I confirmed that he was correct and that Butrans is also indicated for patients that are opioid experienced as well. He said he has not had an opportunity to prescribe yet. I reviewed the formulary coverage and the importance of the savings card. Nothing else learned.
PPLPMDL0020000001	Akron	OH	44320	5/18/2011	Talked to the pharmacist about Butrans movement. I asked if there was anyone else in the area that is worth calling on and he mentioned some of my current Pain docs. I went over the patient education guides and explained removal and application.
PPLPMDL0020000001	Parma	OH	44134	5/18/2011	Dr Hernandez said that he just had a patient in who was on 5mcg Butrans for chronic low back pain & the patient complained of nausea. Dr Hernandez said that he is having the patient stay on Butrans & take fenergan for the nausea. I asked Dr Hernandez, as a supporter of both OxyContin & Butrans, how he determines whether someone is an OxyContin patient or a Butrans patient. He said that for him, he will most often prescribe Butrans now that it is available because he finds more & more patients who do not want to take oral pain medication. Reminded him that Butrans is an opioid, & therefore does carry abuse/addiction potential. Also discussed pharmacy stocking- Dr Hernandez said that he is prescribing the entire box of 4 patches for patients more often now because he is tired of getting hassled & his patients getting frustrated with pharmacies.
PPLPMDL0020000001	Cleveland	OH	44124	5/18/2011	Doc said he just printed Oxycontin savings cards from the website as he had run out. Provided 2 boxes. He said it seems like less insurers are covering it without a PA. Mostly medicaid/medicare. I gave him a formulary grid and explained the quantity limits with medicaid. He does not do PAs in his office so patients are switched to products that dont require a PA. I asked him what he remembers about Butrans. He said he remembers that it is a patch. I explained the 7 day delivery and CIII status. I asked him if he sees a place for such a product in his practice. He said many of his patients require more analgesia than a CIII.
PPLPMDL0020000001	Cleveland	OH	44113	5/18/2011	dr said she couldnt remember much about butrans and wanted to know the indication and dosage strengths again.we talked about Butrans 5 core messages,initiation guide and proper tapering of short-acting opioids specifically we talked about doctors patients taking tramadol for their chronic pain that are telling her or calling into office saying their tramadol isnt lasting long enough or controlling their pain.i told dr that she could start patients on Butrans at that point,if appropriate,instead of increasing tramadol dose.dr said ok that made sense and she'll consider a couple patients and see what happens.dr asked who's covering Butrans? we discussed Butrans formulary coverage and Butrans patient savings cards.
PPLPMDL0020000001	Parma	OH	44134	5/18/2011	Spoke briefly with tech, Cheryl, who said Allene was not in today & the other pharmacists were unable to speak with me today. Reviewed savings cards/e-voucher for Butrans & OxyContin savings cards. She said she has not seen any Butrans get dispensed, but she was unsure. She said she would leave my information for Allene.
PPLPMDL0020000001	Cleveland	OH	44106	5/18/2011	dr said she hasnt started anyone on Butrans and isnt sure if she will as she doesnt have a lot of patients on narcotics.i asked dr if she had any patients on tramadol,that had chronic pain? dr said yes she did.i showed dr Butrans initiation guide and said that patients who are taking tramadol for chronic pain but perhaps telling her that their pain isnt controlled with their short-acting medication could benefit from once weekly dosing of Butrans,dr said that made sense and she would consider it if patients ask for something else.we discussed tapering of short-acting opioids,initiation of Butrans and formulary coverage.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44122	5/18/2011	Reviewed Butrans indication, dosing, delivery system, CIII & abuse/addiction potential. Presented initiation guide & she looked over pg 6 with Dr Kessler. She said she had paperwork to get to & could not stay to talk longer. Dr Kessler said that many of the residents lack the experience & comfort level to prescribe opioids, which he thinks is somewhat unfortunate. He said he would share the Butrans information with the residents in effort to get them more comfortable with the idea of it, if nothing else just in case a patient comes to them already on Butrans.
PPLPMDL0020000001	Warrensville Heights	OH	44122	5/18/2011	Dr Kessler said that he has not prescribed Butrans. He said that because he works mostly with the residents & in administration, he does not prescribe as many opioids as in the past. He said that often, the resident's comfort level is not high enough with pain management to prescribe opioids for patients, whereas he himself is very comfortable. Reviewed Butrans key points & discussed that it is long-acting & CIII. Also reminded him of abuse/addiction potential. He asked the "street value" I told him I know of no specifics but again said that it is abuseable & addictive, as all opioids are & he should be just as cautious in prescribing. He asked about managed care-reviewed formulary grid & savings cards. He said he has no problem prescribing Butrans if he has the opportunity to do so when seeing patients. Also discussed OxyContin q12h as an option for patients beyond Butrans 20mcg. Showed him a demo patch & discussed adhesion.
PPLPMDL0020000001	Cleveland	OH	44113	5/18/2011	I talked to dr about Butrans 5 core messages,initiation guide discussing proper tapering of short-acting opioids and initiation of Butrans,Butrans patient information booklet/dvd and Butrans formulary coverage.dr asked why he would start patients on Butrans if his patients are controlled on their short-acting opioids? I told dr that's NOT who I'm asking him to consider for initiation of Butrans,i told dr if patients are asking him for something different because their short-acting opioids,like tramadol,arent lasting long enough or not controlling their pain,thats who he could potentially consider to start on Butrans.we talked about moderate pain patients taking tramadol,hydrocodone or oxycodone combo's around the clock for their chronic pain,that arent controlled,to be considered for Butrans therapy.dr asked who's covering Butrans? dr said he has a lot of workers comp,medicaid and commercial pain patients,we discussed all of those.dr said if his patients are taking short-acting opioids
PPLPMDL0020000001	Warrensville	OH	44122	5/18/2011	Quick call with Dr Rakowsky who asked what Butrans was while I was talking to Dr Kessler & Dr Kersey-Barrett. Went over Butrans indication, delivery system, & dosing. She immediately said she does not "deal" with "any of those drugs" & then left the room.

PPLPMDL0020000001	Independence	OH	44131	5/18/2011	Reminded Dr Jack that he had told me on my last visit that he would not prescribe Butrans without first speaking to fellow physicians or experts about their experience with it. He said that he doesn't think that is necessarily true, but he does want to talk to other physicians to hear about their experiences with Butrans. I asked him if he has spoken with Dr Nickels, who he mentioned as someone he would want to talk to about it. He said he has not yet, but would. I explained limited availability of seating at the program, told him Dr Nickels is registered to attend. Dr Jack said that if Dr Nickels goes, he will go. I asked how soon he will speak to him. He committed to calling Dr Nickels today. I asked him to also commit to registering online if he does plan to attend due to limited attendees permitted. He committed to do this today.
PPLPMDL0020000001	Independence	OH	44131	5/18/2011	Caught Dr Rob for a quick hallway call. I asked him what his thoughts were on attending the Butrans dinner program next week. He looked at the invitation & said that this is something he would like to attend. Reviewed format of the program & encouraged him to attend, telling him that because Butrans is not a product he has heard a program for before & because of the attendees we have coming, it would be a great opportunity for him to discuss Butrans with peers. He said he was truly going to try to make it next Tuesday.
PPLPMDL0020000001	Cleveland	OH	44195	5/19/2011	I talked to dr about appropriate patients to start on Butrans,showed Butrans initiation guide and discussed patients taking percocet around the clock for their chronic pain that dr feels could benefit from a single entity opioid and once weekly dosing.dr said patients will sometimes ask for something else if their percocet isnt controlling their pain so he will keep Butrans in mind as an option for some patients.dr asked if i talked to his NP,Mae,about Butrans? I told dr i spoke with Mae briefly about Butrans but haven't been able to get a lot of time with her.dr said to follow-up with her again as she is treating all of his patients and needs this information again.i asked dr to start 2 patients on Butrans,per our discussion,and i'll follow-up in next week to hear some feedback.i recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44103	5/19/2011	I talked to Dave,Pharmacy Manager,about Butrans stocking,any scripts they have seen for Butrans and who's prescribing Butrans,dave said they have seen a couple of scripts here for Butrans.I asked Dave to discuss Butrans application and rotation of the transdermal system with patients and showed this information in the Butrans patient information booklet. I asked Dave to show patients the log book section in this booklet so that patients can remember where they applied Butrans,the date and how they disposed of Butrans.Dave said he would do this,as they have been focusing their discussion with patients on these areas. we discussed Butrans formulary coverage and Butrans patient savings cards,they dont need them here as they have electronic vouchers for Butrans.we talked about OxyContin stocking,appropriate patients and OxyContin formulary coverage and OxyContin savings cards.i recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44104	5/19/2011	I talked to dr about his patients taking percocet for chronic pain that perhaps ask him for something different,where a long-acting opioid could be appropriate,dr said he has patients say that all the time that their short-acting opioid isnt controlling their pain so he'll usually prescribe OxyContin as its available on Medicaid.we talked about dr considering any commercial plan patients,that tell him this about percocet,where he feels once weekly dosing of Butrans could be an option,dr said he only has a couple of those patients but will keep it in mind for them and we talked about Butrans patient savings cards. we talked about appropriate patients for OxyContin,showed OxyContin visual aid for discussion,OxyContin conversion guide to discuss conversion and 7 tablet strengths and OxyContin formulary coverage.i recommended Senokot-5
PPLPMDL0020000001	CLEVELAND	OH	44109	5/19/2011	I talked to Rod,Pharmacy Manager,about Butrans stocking and rod said they did order Butrans 10mcg as they had a script come through pharmacy.we talked about doctors writing Butrans and importance of having Butrans 5mcg and 10mcg stocked.i asked Rod to show patients Butrans patient information booklet-sections on application and rotation of Butrans transdermal system and log book in back of booklet.we discussed Butrans formulary coverage.Rod said ok he hasn't done that but that would be helpful to patients.we talked about OxyContin stocking,appropriate patients for OxyContin,formulary coverage and OxyContin savings cards. I recommended Senokot-5
PPLPMDL0020000001	Alkron	OH	44333	5/19/2011	I asked Lisa if she would continue to initiate therapy to the appropriate patients and she said she would based on the success she has had. She said she likes that Butrans provides steady state plasma levels and that it is Revealed the Butrans indication and patient type with her. She said she has not seen any appropriate patients yet. I explained the positioning - after tramadol or opioid naive. I invited her to the Peer Group speaker program on 5/24 and that we will have other programs throughout the summer. She said that the summer is a difficult time because of the kids and vacations.
PPLPMDL0020000001	Lyndhurst	OH	44124	5/19/2011	I talked to Erin,Pharmacist,about Butrans stocking and she said they do have Butrans 5mcg and 10mcg in stock as they finally got some scripts from dr nickels patients for Butrans.we talked about the importance of Butrans patient information booklet and discussing application and rotation of Butrans and the log book section in back of booklet and I asked Erin if she and the other pharmacist could be sure to discuss this information with patients? Erin said yes that made sense and would help patients get started on Butrans.we discussed Butrans initiation guide discussing proper tapering of short-acting opioids,initiation of Butrans and Butrans formulary coverage.we talked about OxyContin stocking,appropriate patients and OxyContin formulary coverage and OxyContin savings cards. I recommended senokot-5
PPLPMDL0020000001	Stow	OH	44224	5/19/2011	Spoke to Jeff, he said he still has not seen scripts from Pain management for Butrans. He said he will order when they are writing. I told him Dr Yuang is writing and he will see scripts soon. They do not stock Oxycontin as do the Drs do not write that as well
PPLPMDL0020000001	Stow	OH	44224	5/19/2011	Dr said he didnt prescribe yet and asked if I had some sort of conversion chart and I said I do not have a conversion chart but I do have an initiation guide that shows what the patient is currently taking is where a patient would start on Butrans. HE said he thinks we have a good thing here so I asked why hasn't he written then and he said he just needs to write it once and remember. I asked how often he is seeing new patients come in, he said they get new patients every week. I asked what are they coming in on and he said everything, Vicodin PErcoctet, Tramdol. I asked are they chronic and he said yes. I said those are Butrans patients. HE said he promises he will. He is putting in a pharmacy and wondering if they will get special pricing. his wholesaler is Amerisource Bergan. Spoke with Kim and Marcy in billing, Lisa in BWC, Rachel and Angie are the triage nurses but only spoke with Rachel. Audre and Angela work on medical side as well with prescriptions.
PPLPMDL0020000001	Cleveland	OH	44195	5/19/2011	worked anesthesia/pain management-couldnt see Dr.Vrooman,Dr.Katyal,Dr.Mekhail and Dr.Syed so I left Butrans fpi,initiation guide,Butrans patient information booklet,Butrans formulary grid, my business card and Peer Group dinner invitation, for all of the physicians. worked chronic pain dept-had to leave Butrans initiation guide,patient information booklet and Butrans formulary grid for Dr.Covington as he was with patients and I couldnt
PPLPMDL0020000001	Westlake	OH	44145	5/19/2011	I asked the Dr what his hesitation is in trying Butrans. He said he will when he sees the right patients. I asked if he would prescribe Butrans before going to vicodin around the clock. He agreed to prescribe. He said he is still prescribing OxyContin and finds that more of his patients may be appropriate for OxyContin.
PPLPMDL0020000001	Stow	OH	44224	5/19/2011	Sharon said she has not written yet but she has not written much of anything, she is still shadowing the Drs and Steve and observing what they do. I asked what type of patient if she were to come across patient and she asked if we could review information. We reviewed dosing and initiation and when she sees patients who are not controlled on short acting and instead of increasing or changing, writing Butrans.
PPLPMDL0020000001	Lyndhurst	OH	44124	5/19/2011	Discussed the Butrans patient type with doc. Asked her if she has started any new patients lately and if she has written the scripts with refills. She said that she has a couple of patients on Butrans but she is not sure if she wrote for refills. She forgot it can be called in. I reminded her of the formulary coverage. Invited her to the Peer group program but she cant make it. She suggested I talk to Paricia about it.
PPLPMDL0020000001	South Euclid	OH	44121	5/19/2011	Window call.....Reviewed the Butrans patient type and indication. Gave him an invitation to the 5/24 peer group. No commitment. Scheduled appointment for further discussion.
PPLPMDL0020000001	Barberton	OH	44203	5/19/2011	I asked Dr. Patel if he was continuing to initiate therapy to new patients and he said he absolutely was. I asked him if he was titrating as needed and he said that most of his patients were now on the 10 mcgs.
PPLPMDL0020000001	Stow	OH	44224	5/19/2011	Dr said he wrote 2 scripts of Butrans but doesnt know if they went through, he has not heard anything back yet. I spoke with Marcy and she showed me the script that was for 5mcg and the patient was med D Caremark and it needed prir authed. She said she is going to try again but they are giving the run around. I asked Dr what is the protocol with patients, is he getting them on short acting or are they getting switched at consult with Bressi. HE said he does consults too. He said patient comes in on short acting, they get the good and the bad and need to sort them. They like to do some sort of procedure and see if the pain is real, they see if they trust the patient and then they will start patient on long acting. I asked if he does most of the switching to long acting and he said they all do. We discussed initiation and titration and managed care coverage. I asked if he thinks this will fit into his pain regimen and he said yes. Lisa in BWC said she had a patient who may be good on Butr
PPLPMDL0020000001	Cleveland	OH	44102	5/19/2011	I talked to dr about Butrans 5 core messages,fpi,initiation guide,Butrans patient information booklet,Butrans formulary coverage and Butrans patient savings cards.this was my 1st time meeting dr and having lunch,dr is new to practice and is surprised with the number of patients taking opioids,we talked about patients taking vicodin or percocet as dr said they have a lot of patients on these short-acting opioids for chronic pain and he does think a long-acting opioid is appropriate for some patients.i showed dr Butrans initiation guide and discussed proper tapering of short-acting opioids,initiation of Butrans and coverage on BWC and commercial plans.i asked dr to start a couple patients on Butrans,to get some clinical experience,dr agreed.we talked about OxyContin being an option for patients and who was appropriate for OxyContin,showed dr Butrans conversion guide noting 7 tab strengths and OxyContin formulary coverage and OxyContin savings cards.i recommended Senokot-5
PPLPMDL0020000001	Stow	OH	44224	5/19/2011	Steve said he still has not seen the right type of patient. I asked him who is the right patient and what types of patient does he think Butrans will work best in. HE said patients who have never taken any types of opioids. I said isnt that somewhat of a small window considering he works in one of the biggest pain clinics where he said most patients come in on some sort of opioid. HE said yes. I said when he sees the patients after consultt who are on 3,4,5 Vicodin, PErcoctet, Tramadol a day is where he would taper them down and start them on Butrans. I asked how many new patients he sees a week and he said he didnt know, alot he guesses. I said how many of the m are chronic, he said all. I asked when they come in on 4-6 short acting and are chronic, will he write Butrans and he said yes.
PPLPMDL0020000001	East Cleveland	OH	44112	5/19/2011	I reminded doc of the Butrans patient type and indication. He said he still has not seen any patients on it yet. I asked him if he needs to see a patient already on it before he tries it. He said yes. He is concerned because the product is still new. I explained to him that it is a CII and the molecule has been around for years. He reluctantly said he would try it. I asked for just one patient trial. He also said that patients are no longer liking oxycotin. Patients have complained that even the generic oxycotin is not available. Told him that in fact, the generic will become harder to find in the pharmacists due to limited availability.
PPLPMDL0020000001	Cleveland	OH	44195	5/19/2011	I talked to Anne,NP,about considering patients who are taking tramadol but not controlled,to start on Butrans.Anne said she hasn't thought of Butrans as an option for patients and she is waiting to see what Dr.Stanton-Hicks does with his patients and he's not prescribed Butrans yet.I talked to Anne about the fact that she's an NP,she can prescribe Butrans as its a CII,but Anne said it doesnt matter as she discusses ALL medication changes or starts for her patients with Dr.Stanton-Hicks,so he has to approve.i showed Anne Butrans initiation guide,discussed proper tapering of short-acting opioids and initiation of Butrans.we discussed Butrans formulary coverage and Butrans patient savings cards for commercially insured patients.i asked Anne to consider 2 patients,taking tramadol but not controlled and perhaps asking her for something different and a once weekly dosing option could be an option for them.Anne said she will consider Butrans for some patients.i recommended Senokot-5<font color=blue><b>-CHUDAKOB's query on 05/27/2011/<b>-</font>Did you ask Anne how you can get to Stanton-Hicks to tell him about Butrans? She won't write it if he doesn't give her the go ahead. Sound familiar?<font color=green><b>-BROOKAM's response on 05/27/2011/<b>-</font>she said to leave information with Pat,he doesnt meet with Reps.she has said this to me several times. I am not sure who you are referring to (sound familiar comment?) but truthfully at the end of June,if she's not done anything with Butrans i will not be focusing on her. i do need to just come out and say Anne,if Dr.Stanton-Hicks hasn't started anyone on Butrans,are you telling me that you will NEVER consider Butrans as an option? if the answer is no,she wont be a core for me<font color=blue><b>-CHUDAKOB added notes on 06/02/2011/<b>-</font>Sound like a pian! I was referring to Dr. Nickels and his NP's
PPLPMDL0020000001	Cleveland	OH	44121	5/19/2011	Window call.....reviewed the Butrans indication/patient type and covered insurance plans. Gave formulary grids and invitation to 5/24 peer group speaker program.
PPLPMDL0020000001	Stow	OH	44224	5/19/2011	Dr said he has not written Butrans. HE said lets figure out the patient type. I asked what his patients who are new to the practice come in on and he said short acting of some sort. I said if they are chronic and they are no long er controlled, he would use Butrans there. He said the only problem with patients on Vicodin is they like their Vicodin. I asked do they like their Vicodin or do they likethe pain relief. HE said these people all come on Vicodin from PCPs when patients feel the high at the beginning they feel that it is working. When they have steady blood states where Drs would like them to be, they feel it is not working. HE said also, the problem he runs into with patches is allergic skin reactions and can we rub benidryl under our patches I said they can use water only. HE said their is a nasal benedryl as well. HE said he would try it. We reviewed dosing and managed care plans with savings cards. HE was confused on card and how many times can use.
PPLPMDL0020000001	Lyndhurst	OH	44121	5/19/2011	Spoke to Bill about the stocking of Butrans. He confirmed that they do have Butrans but he has not seen any scripts for it. I explained the positioning and the savings cards. He asked why the doctors are still prescribing oxycotin TID. I explained that we, as reps, try to explain to docs that oxycotin is only indicated q12. Bill said that he chooses not to fill scripts that are written for Oxycontin TID.
PPLPMDL0020000001	Cleveland Hts	OH	44118	5/19/2011	Discussed the Butrans 5 selling messages. Doc asked how Butrans differs from Fentanyl and what is Butrans most like. I explained that there is no head to head data with fentanyl. I also explained that there is no other 7 day delivery of an opioid analgesic. He did not remember that it is 7 days. I discussed the positioning - after NSAIDS/tramadol. He asked if those patients allergic to hydrocodone would also be allergic to Butrans. I told him we had no studies on that. I did review the AE profile of Butrans. He said vicodin is a lot cheaper than Butrans. I explained the commercial coverage and the savings cards. He said that works since they no longer take samples and he likes the \$40 savings. He said he would like to give Butrans a try and asked me to keep on him about it. He also asked me to schedule another lunch. [already scheduled]. Gave oxycotin coverage reminder.
PPLPMDL0020000001					

PPLPMDL0020000001	Highland Heights	OH	44143	5/19/2011	Window call....Reminded doc of the commerical insurance coverage and the savings cards program. I asked him if he would be interested in attending a speaker program about Butrans. I gave him an invitation. He said he might be able to go another time.
	Cleveland	OH	44109	5/20/2011	dr said he hasnt thought of Butrans lately and asked me to remind him of the indication and appropriate patient type.i showed dr Butrans visual aid for the indication,discussed Butrans 5 core messages and showed dr Butrans initiation guide for appropriate patients to start on Butrans.dr said ok,made sense and he would think of a few people to try Butrans on as he does like the once weekly dosing option of Butrans and he likes that the medication is transdermal.we discussed insurance coverage for Butrans and Butrans patient savings cards.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44104	5/20/2011	dr said he started another patient on Butrans,we talked about why he chose Butrans and discussed appropriate patients to start on Butrans.i showed dr Butrans visual aid discussing opioid naive and asked dr to consider Butrans as an option before patients are started on short-acting opioids,dr said he'll consider that if patients have chronic pain because he normally starts patients on short-acting opioids and over time will decide if a long-acting opioid is appropriate.we discussed Butrans formulary coverage and i asked dr to continue starting patients on Butrans,per our discussion today,dr agreed.i recommended Senokot-S
PPLPMDL0020000001	Barberton	OH	44203	5/20/2011	I asked Dr. Minich if Butrans was a therapy that she could see herself prescribing for the appropriate patients. She said she still wasn't sure. I reminded her that this was a schedule 3 LAO and a single entity therapy. I asked if she understood where to write it and she seemed unsure so I explained patient type utilizing the initiation and titration guide.
	Cleveland	OH	44104	5/20/2011	dr said she hasnt thought about Butrans as an option,keeps forgetting and asked what the indication was again and who covers Butrans? I showed dr Butrans visual aid,discussed indication and appropriate patients for Butrans,showed Butrans initiation guide and discussed formulary coverage.i asked dr to think of 2 patients that can benefit from Butrans,taking short-acting opioids but not controlled and have commercial insurance,dr agreed.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44104	5/20/2011	dr said she likes the idea of Butrans being in a patch and once weekly dosing option yet forgot about the insurance coverage and hasnt started anyone yet.i showed dr Butrans initiation guide and visual aid to discuss appropriate patients,tapering of short-acting opioids and initiation of Butrans.we discussed Butrans formulary coverage and use of Butrans patient savings cards.i recommended Senokot-S
PPLPMDL0020000001	Akron	OH	44319	5/20/2011	I let Jon know that I had spoke with Dr. Yee about Butrans and left him some patient education guides and Introduced Butrans using the FPI.
	Cleveland	OH	44109	5/20/2011	dr said he did start a patient on Butrans,that was in the hospital and going home and instead of giving the patient tramadol,dr decided to try Butrans because the patient didnt want to take pills around the clock.we talked about Butrans application and rotation weekly,the Butrans patient information booklet and Butrans formulary coverage.i asked dr to start 2 more patients,perhaps taking tramadol but not controlled,on Butrans,dr agreed.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	5/20/2011	dr said he hasnt started anyone on Butrans and wasnt sure if he would because of insurance coverage,dr asked about coverage for medicaid patients,we talked about doctors BWC and commercial plan patients because dr said he does have a lot of those patients,i asked dr to think of 2 patients with BWC or commercial insurance that are taking vicodin or percocet and their pain isnt controlled,and start them on Butrans to just get some clinical experience.dr said he'll think about it and appreciated the information.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	5/20/2011	i talked to dr about considering Butrans for her patients that tell her their tramadol isnt controlling their pain anymore and they are asking for something different,dr said she hasnt had anyone say that recently but does know of patients who arent happy taking tramadol around the clock so she will consider Butrans.dr asked about insurance coverage so we discussed Butrans formulary coverage.i asked dr if she can start 2 patients on Butrans,to get some clinical experinece,per our discussion today? dr said she would.i recommended Senokot-S
PPLPMDL0020000001	Euclid	OH	44119	5/20/2011	Quick call...reminded doc of the appropriate Butrans patient - after NSAIDS/tramadol. He said he would usually go to hydrocodone but butrans would be a option. I explained the once weekly application and the CII status.
PPLPMDL0020000001	Berea	OH	44017	5/20/2011	Gave formulary grid and initiation guide.
PPLPMDL0020000001	Berea	OH	44017	5/20/2011	Dr said he started a few new patients on Butrans, but walked away before I could find out more. It looked like 2-3 savings cards were gone. Staff said they have not heard any feedback yet and did not know if any managed care issues.
PPLPMDL0020000001	Akron	OH	44312	5/20/2011	Quick call through the window. I let Dr. Kile know that I was with a new company and carrying OxyContin and Butrans. I asked if I could schedule a lunch to talk with him more about the use of Butrans. He asked for my card and said they would let me know.
PPLPMDL0020000001	Berea	OH	44017	5/20/2011	Quick follow up. I told Dr last time you said you would convert a patient from low dose vicodin to Butrans. I reviewed the initiation guide and asked if he would prescribe for that type of patient, he agreed.
PPLPMDL0020000001	Cleveland	OH	44109	5/20/2011	worked pm&r dept and internal medicine-left Butrans fpi and initiation guide with my business card for Dr.Lindheim and Dr.Harrington
PPLPMDL0020000001	Lakewood	OH	44107	5/20/2011	I asked Dr if he has patients who are taking tramadol or vicodin every day and meet the indication for Butrans. He said he did and he would give Butrans a try. I asked how many patient it will take him to get a fair trial and he didn't know but said he will try a few and go from there. I reviewed the managed care for Butrans and for OxyContin for Medicaid patients.
PPLPMDL0020000001	Cleveland	OH	44106	5/20/2011	i talked to George,Pharmacist,about Butrans stocking,scripts they have seen here for Butrans,who's prescribing Butrans and his role in patient education for Butrans.i asked George to focus on Butrans patient information booklet-section on application and rotation of Butrans and log book with patients,George agreed.we discussed Butrans formulary coverage and savings cards.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	5/20/2011	i talked to Ron,Pharmacist,about Butrans stocking,scripts he has seen for Butrans here and who's prescribing Butrans.i asked Ron if he could focus his patient discussions on the Butrans application and rotation of the transdermal system and also the log book section in Butrans patient information booklet.we discussed Butrans formulary coverage.Ron agreed.we talked about OxyContin stocking and who's prescribing and i recommended
PPLPMDL0020000001	Akron	OH	44319	5/20/2011	I asked Dr. Wu if he thought that based on our last discussion if Butrans could benefit his practice and how he is treating chronic pain. He said that he like it because it was still a schedule 3 and a LAO. He said he had many patients that could benefit from a therapy like this.
PPLPMDL0020000001	Westlake	OH	44145	5/20/2011	I asked the Dr to tell me about his success with Butrans. He said he is continuing to prescribes and for most patients they are doing well. I asked about titrating and he said he has had to titrate at least 2 patients. He said he thinks the girls may have had to do a few prior auths but overall it has been going thru.
PPLPMDL0020000001	Olmsted Falls	OH	44138	5/20/2011	Spoke with Matt, He said that he has seen at least 2 scripts but could not remember which Drs wrote. we reviewed Butrans medication guide and how to instruct patients on proper use. I asked for his assistance in telling the patients how to use Butrans and he agreed. We discussed steady state for Butrans for him to let the patients know what to expect. Reminder about OxyContin as an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Westlake	OH	44145	5/20/2011	Quick follow up. Dr said that he has not tired Butrans yet when he saw me. I reviewed the initiation guide when he asked if he would try just a few patients who are on low dose vicodin and are asking for more tablets. He said that he is afraid managed care will be a hassle, i reviewed the managed care for Butrans and asked him to focus on commercial patients. I reviewed OxyContin as an option when Butrans may not provide adequate
PPLPMDL0020000001	Lakewood	OH	44107	5/20/2011	I told Dr last time we spoke you said that you would covert patients on low dose vicodin to Butrans, how many patients do you see each day who are taking short acting opioids around the clock? He said at least a couple a day. I asked if he would convert those patients to Butrans and he agreed. Reminder about OxyContin as a Q12hr option when patients may not get adequate analgesia with Butrans.
PPLPMDL0020000001	Barberton	OH	44203	5/20/2011	Left patient education guides and explained steady state so i could prepare them for any possible call backs over the first few days of therapy.
PPLPMDL0020000001	Cleveland	OH	44104	5/20/2011	i talked to dr about patients that would be appropriate for Butrans stocking,showed Butrans initiation guide for Butrans,talked about tapering short-acting opioids and starting a couple patients on Butrans to get some clinical experience.dr said he has a lot of acute pain patients in office so he hasnt thought of Butrans,we talked about Butrans formulary coverage and use of Butrans patient savings cards.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	5/23/2011	i talked to Nate,Pharmacist,about Butrans 5 core messages,initiation guide and Butrans patient information booklet.Nate said they have seen scripts for Butrans here and have Butrans in stock,we discussed who was prescribing Butrans and i asked Nate if he and the other pharmacists would be willing to recommend Butrans for appropriate patients? Nate said depending on the relationship with the dr they might do that,we discussed opioid naive and opioid experienced patients trying Butrans.i asked Nate to focus patient discussions on application and rotation of Butrans in Butrans patient information booklet and log book section in booklet,Nate agreed.we discussed OxyContin stocking,appropriate patients and OxyContin formulary coverage.i recommended Senokot-S
PPLPMDL0020000001	Lakewood	OH	44107	5/23/2011	Quick call, we reviewed the initiation guide for Butrans and I asked where he sees Butrans fitting in. He said said probably for patients starting to take vicodin around the clock. I asked him to try a few of his low dose vicodin patients when their pain is not well controlled. I spoke with Robin and she does think that Butrans is something that could benefit their patients. She agreed to help me remind the Dr when she sees an appropriate patient.
PPLPMDL0020000001	Independence	OH	44131	5/23/2011	Spoke with Diane (MA) & reviewed Butrans dosing, indication, & appropriate patient type. Also discussed savings cards for Butrans & OxyContin. She said they had enough of both cards. Gave her a Butrans program invitation for Dr Keppler & one for Roman as a reminder. Diane said she knows Roman plans to attend but does not know if Dr Keppler will be able to go.
PPLPMDL0020000001	Maple Heights	OH	44137	5/23/2011	Quick call-spoke with Andy briefly as he was on the phone with 4 other lines holding & 3 customers waiting. Reviewed Butrans savings/e-voucher & OxyContin savings cards. He asked that I come back another day/time so that we have more time to discuss. Also spoke with technician & reviewed Butrans appropriate patient type/indication.
PPLPMDL0020000001	Cleveland	OH	44104	5/23/2011	i talked to dr about Butrans 5 core messages,fpi,initiation guide and patient information booklet.dr said he thinks Butrans is a great option for patients being a patch and dosed once a week,however majority of his patients are medicaid and medicare and he's not willing to do the prior authorization for medicaid patients as its too much work for him since he does all prior authorizations in his office and medicare doesnt cover Butrans.i asked dr if he had 2 commercial plan patients taking vicodin or percocet,that arent controlled,and perhaps could benefit from Butrans? dr said he might have 1 or 2 patients and will consider Butrans for them.we talked about appropriate patients for OxyContin,i showed dr Butrans visual aid for discussion and OxyContin conversion guide discussing 7 tablet strengths for flexibility in titration and we discussed OxyContin formulary coverage.i
PPLPMDL0020000001	Brooklyn	OH	44144	5/23/2011	Reviewed Butrans indication, delivery system, dosing & appropriate patient type with Dr Miguel. He said he has heard that the state will be placing more restrictions on physicians prescribing narcotics. Discussed importance of appropriate patient selection. Dr Miguel asked about formulary coverage, so i reviewed with him & Tiffanie the formulary grids for both Butrans & OxyContin & also went over savings cards. Dr Miguel said he is going to try to cancel his dealings with Medicare because he said they do not reimburse much of anything & they never seem to cover his patients' medication.
PPLPMDL0020000001	Parma	OH	44129	5/23/2011	Dr Taylor asked me to come back to her office as she had some information she wanted to tell me about. She then showed me a copy of Ohio House Bill 93 which she said was put into effect as of 5/20. She told me that within the 80 page document, it states that physicians who do not have a pain management specialty will have various strong restrictions on the way they prescribe pain medications. She asked if I had seen it & I told her I had not. She said she is wondering what pharmaceutical companies will do about it & I told her I did not know. I asked her how this would effect the way she practices, specifically in prescribing opioids-she said she will continue to work with her existing patients & but will not be taking any new patients who need help with pain. Discussed importance of appropriate patient selection. She said she will now be required to do drug testing as well as join OARRS, which i agreed is a great way to protect her practice. Butrans indication/dosing messaging
PPLPMDL0020000001	Akron	OH	44333	5/23/2011	When I came in Dr. Ahmad saw me at the window and come up and mentioned that he still has not written a Rx of Butrans. I asked why and he said he had not been working as much since he just had a new baby and had just forgotten. He said he would try to keep it in mind moving forward.
PPLPMDL0020000001	Cleveland	OH	44195	5/23/2011	worked crile bldg pharmacy - see call note and left Butrans fpi,initiation guide and Butrans patient information booklet for each doctor,pa and np in rheumatology
PPLPMDL0020000001	Akron	OH	44333	5/23/2011	Linda said that she has continued therapy with a couple patients but had not started any one new. I asked why and she said that she didn't have the opportunity because many patients are already on a LAO. I explained that she was right in identifying patients and showed her the appropriate Butrans patient using the initiation guide.
PPLPMDL0020000001	Mayfield Heights	OH	44124	5/23/2011	Quick call....doc was still supplied with Butrans savings cards. Reminded her of the covered insurance plans and BWC coverage. Oxycontin coverage and savings cards reminder. Nothing learned.
PPLPMDL0020000001	Akron	OH	44333	5/23/2011	Followed up from our lunch on Friday. I told her I just wanted to stop in and remind her to initiate therapy to at least 2 patients like we talked about at our lunch. She committed to initiated therapy by the end of the day.
PPLPMDL0020000001	Bedford	OH	44146	5/23/2011	Spoke with Halley (MA) who said Dr Haddad could not see me this morning. I gave her a copy of the program invite to give to Dr Haddad as a reminder, as he committed to attend. She said she would give him the information as soon as he was done seeing patients. Reviewed Butrans & OxyContin savings cards/eligibility & she said that they have enough of both kinds. She said I may be able to see Dr Haddad Wednesday late afternoon, so I let her know I would be back.
PPLPMDL0020000001					

PPLPMDL0020000001	Copley	OH	44321	5/23/2011	I asked Dr. Machado if he would try just one patient on Butrans or a trial so we could talk about the that patient responds to therapy. He agreed that he thought he could find one. I asked if I could follow up with him next week and he agreed.
PPLPMDL0020000001	Lakewood	OH	44107	5/23/2011	I told Dr that in the past we talked about Butrans as an option instead of increasing the dose of vicodin around the clock. I asked if he would start a few new patients like this. He said that he will. He said he tries not to prescribes any long acting opioids but if procedures don't work, we will try Butrans. Reminder about OxyContin as a long acting option as well.
PPLPMDL0020000001	Akron	OH	44333	5/23/2011	Lisa said that she had already refilled 2 patients on Butrans that morning. She continues to say positive things and says she likes the therapy and will continue to use it for the right patients.
PPLPMDL0020000001	Euclid	OH	44119	5/23/2011	Quick call.....I reviewed the Butrans patient type and indication. I asked him what feedback he has had with using Butrans. He said not much. He tried a patient but has not heard anything back. Gave him formulary grid and initiation guide. Nothing learned.
PPLPMDL0020000001	Cleveland	OH	44115	5/23/2011	I talked to dr briefly about Butrans,clinical benefits she see's in medication for her patients which were once weekly dosing of Butrans and that its a patch.I asked dr to think of 2 patients taking tramadol that arent controlled,and if appropriate start on Butrans.dr agreed and said she hasn't thought about Butrans but does think it could be appropriate for some patients.dr asked again about insurance coverage so we discussed Butrans formulary coverage.I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44114	5/23/2011	I talked to Joel,Pharmacy Manager and Patty,Pharmacy Tech,about Butrans 5 core messages,initiation guide and Butran patient information booklet and stocking Butrans.they havent seen any scripts for Butrans,Joel said until he does he wont order Butrans,we discussed importance of stocking and when patients do go there to get Butrans scripts filled,we talked about Butrans patient information booklet and focusing on application/rotation of Butrans and log book section in patient information booklet. we discussed OxyContin stocking,7 tablet strengths available for titration and formulary coverage.I recommended Senokot-S
PPLPMDL0020000001	Mayfield Heights	OH	44124	5/23/2011	Quick call.....Reviewed the Butrans indication and patient type. Explained that Butrans can be used in opioid naive patients and before patients are titrated on short acting opioids like hydrocodone. Gave formulary grid.
PPLPMDL0020000001	Solon	OH	44139	5/23/2011	Spoke with MA, Chrissy, who said Dr Zaidi was too busy this morning to see any reps. I reviewed tomorrow's Butrans program information with her & asked if Dr Zaidi was going to attend, as the program is almost full. She checked with him & said that he will not be attending. Reviewed savings cards for Butrans & OxyContin. Chrissy said they have enough of both. Worked with her to schedule soonest available lunch next month.
PPLPMDL0020000001	Brooklyn	OH	44144	5/23/2011	Dr Detwiler asked me to tell him why Butrans was "better" & "different" than anything else used for pain. I told him we do not have comparative data, but that I could share an Butrans information that he wanted to know. Reviewed buprenorphine as a partial agonist. Also reviewed Butrans as a long-acting, once-a-week CIII option in a transdermal system. He asked about adverse events- I showed FPI section 6. He said he always uses generics first to save his patients money, so he would try generic medications before going to Butrans. I asked him what generics he meant & he said hydrocodone or tramadol. He added that he does see a place for Butrans, & he would use it for patients with chronic conditions who were not tolerating tramadol or hydrocodone who he trusted who have commercial insurance. I agreed that this was an ideal patient type to try. He added that he has very few patients like that. I asked him to think of just one. Reviewed OxyContin savings cards.
PPLPMDL0020000001	Cleveland	OH	44103	5/23/2011	I talked to Rick,Pharmacist,about Butrans 5 core messages,fpi,initiation guide and Butrans patient information booklet.Rick said he liked that Butrans was in a patch and dosed once a week but I needed to speak with Mike,Pharmacy Manager,about stocking Butrans.Rick said Mike is a hard person to reach but I could leave my business card with Butrans fpi and initiation guide and Mike will look information over and contact me if he's interested.I left this requested information for Mike and told Rick I would follow-up with Mike in June if I dont hear back from him.
PPLPMDL0020000001	Parma	OH	44129	5/23/2011	Spoke with Jackie who said she has not seen any prescriptions for Butrans written for fewer than 4 patches. I asked if there were any area physicians who she thought may have patients who may benefit from Butrans & she mentioned Dr Susters & Dr Chagin as physicians who they see pain medication prescriptions from. We also discussed OxyContin dosing. She said that she has a few regular customers on OxyContin. She said she knows of only one who is on it on any dosing interval other than q12h. She said she has not been given any direction on filling/not filling alternate dosing intervals. Let her know that we promote q12h dosing only as that is the only way Butrans has been studied. She said she would let me know if she hears anything else.
PPLPMDL0020000001	Cleveland	OH	44121	5/24/2011	Reveiled the Butrans indication, dosing, and appropriate patient. She is a NP that does not treat much pain but likes to be aware of newer options. She asked if the Butrans patch can be applied anywhere. I discussed how to properly apply the patch to the 4 sites. Gave her a formulary grid and let her know that Dr. Deloseph has savings cards.
PPLPMDL0020000001	Akron	OH	44310	5/24/2011	I asked Dr r Cramer how his patients were doing on Butrans therapy. He said they were doing well and that he has heard a lot of great feedback. He said he would continue to initiate therapy to the appropriate patients.<font color=blue><b>CHUDAKOB's query on 06/02/2011</b></font>You are getting new patients from him. What about refills? Is he writing refills for his patients?<font color=green><b>LAPMACA's response on 06/05/2011</b></font>I will try and ask him on my next visit<font color=blue><b>CHUDAKOB added notes on 06/07/2011</b></font>This is an important message to relay to all your physicians who are prescribing Butrans
PPLPMDL0020000001	South Euclid	OH	44121	5/24/2011	Quick call.....Reminded doc of the Butrans appropriate patient, formulary coverage, and savings cards for commercially insured patients. I asked doc what questions he still has about the product. He said he does not have any questions he just needs to find the right patient with coverage and condition.
PPLPMDL0020000001	Copley	OH	44321	5/24/2011	I explained Butrans in depth over a lunch appt utilizing the FPI. Dr. Heim felt very comfortable with the molecule Buprenorphine and said there were many patients in his practice that would benefit from therapy. He said he would definitely start to incorporate Butrans therapy into his practice. He said he felt confident initiating therapy to both opioid naive and opioid experienced patients.
PPLPMDL0020000001	Euclid	OH	44132	5/24/2011	Window call.....doc said he tried Butrans again a couple of times but its not being covered. I remind him that medicare /medicaid will not cover. Gave him a formulary grid and reminded him of BWC coverage as well.
PPLPMDL0020000001	Akron	OH	44308	5/24/2011	Introduced to Artina, Dir of Community Relations. She is responsibility for provider information/programs to the community. She's not interested in product info so we discussed non-branded resources like disposal/storage of meds, which she liked. She's also interested in participating in pain management webinar programs that we coordinate through the Case Managers. Email her the flyer for the programs scheduled for June.
PPLPMDL0020000001	Akron	OH	44319	5/24/2011	Spoke with the pharmacist Gretchen, I told her that I had been talking to Dr. Wu about Butrans therapy and explained he liked it because it was a LAO schedule 3. She said she would talk to Jon about getting it stocked and I told her I would check back next week.
PPLPMDL0020000001	Cleveland	OH	44130	5/24/2011	I told Dr Diab that I had waited patiently for 8 days instead of returning again last week to find out what his Butrans feedback was. He told me that I was welcome any time. I asked if he had since had any clinical feedback. He said he has not but that he has prescribed it. I asked how long he usually waits until having a patient follow up & he said 2-3 months. Re-stocked OxyContin savings cards.
PPLPMDL0020000001	Westlake	OH	44145	5/24/2011	Quick call, I asked Dr if he has started any new patients on Butrans that he could tell me about. He said he hasn't started any new lately but it's working well for the ones who are on it. I asked if he would continue to start new patients since he's had success and he said he will.
PPLPMDL0020000001	Akron	OH	44333	5/24/2011	I stopped by to follow up with him from my Friday lunch. I left him an initiation guide and explained that he could use it to help him to decide what strength of Butrans should be initiated. He said he would start a few new patients on therapy this week.
PPLPMDL0020000001	Parma	OH	44129	5/24/2011	Reminded Dr Roheny that I have been in to discuss Butrans with him & that he had seemed before that he saw a place for it, but that I got the feeling now that he was not as enthusiastic about it. He said that he "wants to use it" but that he wants to use it on older patients, where it is not covered. Asked him if he had commercially insured patients with chronically painful conditions. He said that it would be "too expensive" for even them. Reminded him that Butrans has coverage on many commercial insurance plans & that those patients can utilize the savings cards, bringing them to a \$15 copay. Positioned Butrans for patients calling in too soon for Vicodin refills if their condition is chronic & they have commercial insurance. Dr Roheny started walking into his next patient room, picked up the patient's file, & said that patient may be a Butrans candidate.
PPLPMDL0020000001	Independence	OH	44131	5/24/2011	Quick call- Reminded Dr Jack that he was going to call Dr Nickels to discuss Butrans. for feedback & asked what the result was. He said he did just talk to him but that they did not discuss Butrans. I asked him if he was going to attend the Butrans program this evening. He asked if Dr Nickels was going. I told him he is still registered. He said he might. I told him I was only asking for a couple hours of his time & reminded him this would be a great opportunity to discuss Butrans with experienced physicians.
PPLPMDL0020000001	Akron	OH	44309	5/24/2011	Introduced to Chief Medical Director at OAHF Conference. She was unfamiliar with Butrans so reviewed FPI & conversion guide. She inquired about rebating/pricing. I referenced PBM, Catalyst but she hinted they may either be changing PBMs or becoming their own PBM but wouldn't tell me anything more. She asked about promotion to providers in area. She said Dr. Bressi & Geiger are no longer with Summacare. Local reps should work with pain clinics for formulary influence. She never meets with manufacturer reps & her Team is good about doing that. She recommended contacting Tracy Dankoff for more info and Barb Berger, who is trainer for education for
PPLPMDL0020000001	Independence	OH	44131	5/24/2011	Dr Sundaram said he has a couple of patients on Butrans now. He said that one patient in particular really likes it & is having success. I asked him if he had been prescribing for patients who were already on opioids & he said yes. He said that he would "work on" finding more patients for Butrans.
PPLPMDL0020000001	Akron	OH	44319	5/24/2011	I asked Dr yee if he had the opportunity to prescribe Butrans yet. He said he had not but had some patients in mind and would certainly try it, I asked if he felt confident what type of patient he was looking for and he said he did and described a patient currently on a low dose SAO.<font color=blue><b>CHUDAKOB's query on 06/02/2011</b></font>My guess is he wouldn't tell you if he didn't feel confident in his patient selection. You might try asking him to tell you the type of patient he has in mind. This will allow you to see if he really knows.<font color=green><b>LAPMACA's response on 06/05/2011</b></font>Will do<font color=blue><b>CHUDAKOB added notes on 06/07/2011</b></font>I look forward to seeing how this works
PPLPMDL0020000001	Cleveland	OH	44130	5/24/2011	Positioned Butrans for patients taking Vicodin, Percocet, or tramadol around-the-clock for chronic issues who are calling in too soon for refills or asking for increases in dose/changes in medication. I asked him how frequently this happens & he said it happens daily. I asked if those would be patients for whom he would consider Butrans & he said yes. Presented initiation/titration guide & walked him through initiating Butrans treatment in those patients, including taper & starting on 10mcg if their current opioid dose is in the 30-80mg morphine range. He said he would do this & asked about managed care. Reviewed Butrans formulary grid & asked him to think of commercially insured patients or those with BWC who call in too soon for refills of their around-the-clock short-acting medication & he agreed to do this. Spoke with Shelly (Office Manager) & reviewed Butrans formulary grid, BWC, & savings cards. Also discussed positioning & asked her to help me remind Dr Sawhny-she agreed.
PPLPMDL0020000001	Akron	OH	44319	5/24/2011	I brought in the initiation and titration guide and reviewed what type of patient would be most ideal for Butrans therapy. He said he would trial it on 3 patients and let me know.
PPLPMDL0020000001	South Euclid	OH	44121	5/24/2011	I discussed the Butrans indication and other selling messages. She remembered that it was a patch but wanted to know where exactly Butrans should be used. I explained after NSAIDS/APAP/Tramadol or before short acting opioids. I explained how to initiate the dosing. She asked about the coverage. I reviewed the formulary grid and the savings cards. She said she could think of a couple of patients that could benefit.
PPLPMDL0020000001	Westlake	OH	44145	5/24/2011	Spoke with Darrel, we reviewed the Butrans medication guide and I asked for his help in assisting patients on proper use. We discussed steady state at 3 days. He said he thinks Butrans is a great option and hopes that it helps patients not have to take short acting all day. Reminder about managed care for Butrans and OxyContin.
PPLPMDL0020000001	Cleveland	OH	44130	5/24/2011	Dr Fedorko said that he just prescribed Butrans for a patient & then asked Mindy if it had gotten approved. Mindy said that it was just approved. Dr Fedorko said that it took 3 days for approval. I asked what insurance the patient had but he said he does not know & does not have time to look at that. Asked him to think of patients with commercial insurance when prescribing Butrans. He said he does not have time to think of that & that most of his patients are older. He said that he likes Butrans because it is "convenient for the patient" but that he gets frustrated with insurance because it never covers the medications. Spoke with Mindy who said that she had been busy so it took her 3 days to get to the prior authorization for that patient but that it was approved within minutes. She said the patient had Aetna Medicare but Butrans was approved for her. Reviewed positioning for Butrans & insurance coverage. She said she will always fight for a medication for a
PPLPMDL0020000001	Cleveland	OH	44121	5/24/2011	I asked doc what he remembers about Butrans. He said he thinks it is a long acting patch along the lines of tramadol. I reviewed the indication and other selling messages and the positioning after tramadol or NSAIDS. He asked how much it costs. I explained the commercial coverage and the savings cards. He said that he has a lot of medicare patients but he does have a few patients that might be appropriate as they are asking for higher doses of their meds. He asked about the MOA and I read the MOA section of the FPI. I explained the proper application and initiation. He still had savings cards. Reminded him of the oxycontin indication.
PPLPMDL0020000001					

PPLPMDL0020000001	Akron	OH	44312	5/24/2011	I have continued to stop in and each week and just ask Dr. Fouad what additional questions he has a bout Butrans, he keeps saying he will write but has still not initiated therapy.<font color=blue><b>CHUDAKOB's query on 06/02/2011</b></font>There is something he is not comfortable with. Your challenge is to find that out. By asking him what additional questions he has and him telling you none, you are probably not moving the process forward.<font color=green><b>LAPMACA's response on 06/05/2011</b></font>I will continue to try and challenge him.<font color=blue><b>CHUDAKOB added notes on 06/07/2011</b></font>Your challenge is to find out the reason he won't prescribe. Once you find this out, you will have something to see to.
PPLPMDL0020000001	Independence	OH	44131	5/24/2011	Quick call- Dr Rob grabbed a Butrans program invitation when he walked by. I reminded him that it is this evening & that he has said before that he would like to go. Let him know the time & location & asked for a commitment. He said it all depends on what time he can get out of the office tonight. He said he was giving me his promise that he would try to attend, but that he could not commit 100%.
PPLPMDL0020000001	Cleveland	OH	44111	5/25/2011	Quick call, I told Dr I want him to think of Butrans for his patients who are on tramadol around the clock instead of moving to vicodin. He said he will try it. I spoke with Barb and she is going to try to help remind Dr about Butrans as an option.
PPLPMDL0020000001	Akron	OH	44320	5/25/2011	I asked Misty if she had considered initiating therapy to other patients similar to that of the first patient she had tried. She mentioned that her goal is to get many her patients on Butrans she just says she needs to be
PPLPMDL0020000001	Cleveland	OH	44111	5/25/2011	I asked Barbara what she thought the Drs hesitation is in prescribing Butrans. She said she thinks that the Drs are just hesitant to start something new and it's tough to break old habit. I asked if she sees merit in Butrans and she does think it is a great option instead of vicodin or percocet around the clock. I asked her assistance in recommending Butrans. Reminder about OxyContin as an option when Butrans may not provide adequate analgesia.<font color=blue><b>CHUDAKOB's query on 06/02/2011</b></font>Who is Barbara?<font color=green><b>HOLUBA's response on 06/09/2011</b></font>Barbara is the PA at CCF Fairview pain mgmt.<font color=blue><b>CHUDAKOB added notes on 06/09/2011</b></font>Got it
PPLPMDL0020000001	Akron	OH	44320	5/25/2011	I asked Dr. Dupstadt if she thought there was a place for Butrans in her practice and she said she thought there was but was waiting for the right patient. I asked her what she meant by that and she said many of her patients are past the point of Butrans therapy but she would keep it in mind for appropriate patients.
PPLPMDL0020000001	Parma	OH	44134	5/25/2011	Dr Hernandez said that he ended his day yesterday with a follow-up appointment with a patient who he had started on Butrans. He said that the patient was remarkably better & was thrilled with her results. Dr Hernandez said that the patient told him that Butrans has changed her life & that her family & friends were commenting at how much improved her attitude & demeanor are. He said that her positive results are consistent with other patients he is seeing. I asked him if his patients, when switching from Vicodin to Butrans, take supplemental analgesia or if they make a complete switch from Vicodin to Butrans. He said they make a "clean break" & come completely off Vicodin. He said that the first step in treating pain is to ease patient fears & really take the time to listen to & educate them.Also discussed OxyContin q12h as an option for appropriate patients beyond Butrans 20mcg. He also told me he called medical services & was very pleased with the response of the company. Senokot-S
PPLPMDL0020000001	Cleveland	OH	44130	5/25/2011	Dr Kansal told me that it is "almost impossible" to change a patient from a short-acting opioid to a long-acting. I asked him if patients are ever not already on an opioid when they see him & he said no. Reviewed Butrans FPI 2.4 & discussed the ability for patients to use supplemental analgesia for breakthrough. I asked him how he thought patients would react to switching to Butrans once weekly if they could still have some short-acting on hand in case of breakthrough. He said he thinks patients may be receptive to that idea. He told me the majority of his pain patients are Medicaid or BWC. Told him BWC is paying for Butrans. I told him I was not asking him to switch all his patients & asked if it was fair of me to ask him to try Butrans for one or two of the patient type we talked about (BWC, chronic moderate to severe pain, on low-dose Vicodin around-the-clock). He agreed to this request. Also discussed OxyContin q12h for appropriate patients beyond Butrans 20mcg.
PPLPMDL0020000001	Lakewood	OH	44107	5/25/2011	Dr said that he just still hasn't remembered Butrans very well. We reviewed the initiation guide and appropriate patients. I asked him to think of Butrans as an alternative to tramadol or vicodin around the clock and he said it makes sense. He asked about managed care and said he has a lot of Medicaid patients. We discussed commercial and BWC will be no Prior Auths. We discussed the savings cards for commercial and the copays. I reviewed the managed care with Stacy and Sally. Reminder about OxyContin as an option when patients are taking more than 40mg hydrocodone per day.<font color=blue><b>CHUDAKOB's query on 06/02/2011</b></font>You positioned Butrans for the Dr., but did you every find out why he is not prescribing Butrans? It can't be he just forgets, because if he was sold, he wouldn't forget? You job is to find out why he is not writing it. Once that occurs, you will have something to work with.<font color=green><b>HOLUBA's response on 06/09/2011</b></font>Ok Thanks.<font color=blue><b>CHUDAKOB added notes on 06/09/2011</b></font>Implement this philosophy and you will increase prescriptions
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	5/25/2011	Dr. Azem came to the window and said that she has now started a couple patients on Butrans and is pleased with the therapy so far. She asked for additional patient education guides which I left.
PPLPMDL0020000001	Westlake	OH	44145	5/25/2011	Quick call, Dr said he's been trying to prescribe Butrans. He did think that it was too expensive for a few patients. I asked what insurance and he didn't know. I followed up with Laura and we reviewed managed care for Butrans. She said the one patient was a Med D patient and we discussed that Butrans will not be covered and they can not use the savings cards. We discussed focusing on Commercial patients and she will try to remind the Dr of that. Reminder that OxyContin is covered on most insurance when Butrans may not be.
PPLPMDL0020000001	Cleveland	OH	44130	5/25/2011	Quick call- Spoke with Ron & reviewed Butrans & OxyContin savings programs. I asked what type of managed care mix he sees & he said it was an equal amount of commercial & government plans. He then got called away to work with a patient.
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	5/25/2011	Dr. Cyndi said that she is starting to become very comfortable prescribing Butrans to the right type of patients and continues to talk about the positive feedback she is getting from patients. I asked is she felt comfortable enough to use it first line over low dose hydrocodone and she said she thinks so.
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	5/25/2011	I asked Dr. Roseanne what type of patient she was waiting for to trial Butrans. She said she liked the concept of Butrans but did now necessarily like treating chronic pain. She said she would talk to Dr. Cyndi to gain her feedback on Butrans and how her patients like it.
PPLPMDL0020000001	Fairview	OH	44111	5/25/2011	Spoke with Tom, he did think that he saw a script for Butrans but could not remember who wrote it. He thought pain management possibly. I asked who else he thought I should talk to, and he thinks CCF Pain management would be the best to get on board. He said that Dr Lalli and Shamir also prescribe a lot of opioids for pain. We reviewed OxyContin is still an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	5/25/2011	Dr. Hegde just returned from maternity leave and gave me a quick second at the window to review Butrans and the FPI. She asked me to leave the info behind and said she would discuss it in more depth over lunch.
PPLPMDL0020000001	Lakewood	OH	44107	5/25/2011	I asked Dr how his Butrans patients are doing. He said that one patient said it was expensive. He did not know which insurance they had. We reviewed the managed care for Butrans, using the savings cards and copays. Dr asked me about geriatric use and I reviewed the geriatric section per the FPI. He said that his mother in law is taking percocet just 2 per day and is still in a lot of pain. He may try this for her if her supplemental insurance covers Butrans. Reminder about OxyContin as an option when Butrans may not be covered.
PPLPMDL0020000001	Fairlawn	OH	44333	5/25/2011	Quick call. I asked Dr. Parisi if he had kept the patients he had started on Butrans therapy and he said he wasn't sure and walked away. no new info learned.
PPLPMDL0020000001	Akron	OH	44333	5/25/2011	I asked Dr. Steurer if had reconsidered trialling just one patient on Butrans therapy so he could gain some clinical experience with the molecule and give me some feedback. He said that he still unsure about initiating therapy and said most of his patients are doing well on their current therapies.
PPLPMDL0020000001	Lakewood	OH	44107	5/25/2011	Spoke with Aduwa, we reviewed the medication guide for Butrans I asked for her help in instructing patients on the proper use of Butrans. She said she does think that Butrans is a great option and that she is surprised she is not seeing more scripts yet. We discussed the fact that Butrans take 3 days to reach steady state so patients should wait 3 days before asking to titrate. We discussed managed care for Butrans and OxyContin.
PPLPMDL0020000001	Bedford	OH	44146	5/25/2011	Spoke with Quaretta (technician) who said the pharmacist was too busy to see me. Reviewed Butrans & OxyContin savings programs with her. She said they do not have Butrans but that it sounded like something that they would carry based on the customers they have. She said she would give my information to Oleg & recommend that they get Butrans in stock.
PPLPMDL0020000001	Lakewood	OH	44107	5/25/2011	Spoke with floater filling in for Chuck, we discussed the 5 key messages for Butrans and the initiation guide. I asked for his assistance in instruction patients on the proper use and application of Butrans and he agreed. Reminder about OxyContin as a Q12hr option and asked him to recommend Senokot S with opioid scripts. He said that he does recommend Senokot.
PPLPMDL0020000001	Highland Heights	OH	44143	5/25/2011	Spoke to Kristen about the stocking of Butrans. She confirmed the stocking but no scripts yet. I explained the positioning, savings card program and relay health. She is still seeing a steady volume of oxycontin with a few regular patients. She has been noticed increased scripts written for TID.
PPLPMDL0020000001	Bedford	OH	44146	5/25/2011	Spoke with MA Roberta who said that Dr Haddad was too busy this afternoon to see me. She suggested that I switch & start trying to see him on Mondays around 1:30 for a better chance of catching him. Discussed Butrans & OxyContin managed care & savings cards with her as she takes call-backs & does prior authorizations.
PPLPMDL0020000001	Cleveland	OH	44143	5/25/2011	Doc said he does not like to treat chronic pain because he has a lot going on and he chooses not to juggle pain meds. He said he would got to a vicodin after tramadol failures. After discussing the Butrans selling messages I asked if he would consider a product like Butrans - a CIIl transdermal. he said that has no bearing on his prescribing. He asked for journal articles about studies.
PPLPMDL0020000001	Bedford	OH	44146	5/25/2011	Dr Moufawad said Butrans is causing some of his patients to go into withdrawal. I asked him how they were being initiated & he said he finds that patients have to do a "two day washout" of their current opioid before starting Butrans. He said that switching patients to Butrans requires a lot of time & educating the patient. I asked if patient information guides would help. He said patients still would have to take the time to read. I offered DTD option- he said he may try that. I also asked if the patients were committed to getting rid of their pain if it was worth a few minutes of education- he said yes. He also said he is having trouble with what to give for supplemental analgesia but that he did not have further time to discuss it at this time.
PPLPMDL0020000001	Broadview Heights	OH	44147	5/25/2011	Spoke with Nancy (MA) who said Margaret (nurse) was requesting more Butrans savings cards, which I provided. Reviewed managed care coverage for Butrans & OxyContin. Nancy said she was not sure on any specifics with Dr Samuel prescribing Butrans & said that Nancy was tied up seeing patients & that today was not a good day to see her. Worked with her to schedule next available lunch & let her know I would be back in a couple weeks to try to speak with Margaret & Dr Samuel again.
PPLPMDL0020000001	Broadview Heights	OH	44147	5/25/2011	Spoke with Nancy (MA) who said Margaret (nurse) was requesting more Butrans savings cards, which I provided. Reviewed managed care coverage for Butrans & OxyContin. Nancy said she was not sure on any specifics with Dr Samuel prescribing Butrans & said that Nancy was tied up seeing patients & that today was not a good day to see her. Worked with her to schedule next available lunch & let her know I would be back in a couple weeks to try to speak with Margaret & Dr Samuel again.
PPLPMDL0020000001	Beachwood	OH	44122	5/25/2011	Quick call- Dr Tabbaa said he is continuing to try different patients on Butrans with good results. I asked if patients typically take supplemental analgesia with it or if they are only taking Butrans once they reach steady state. He said they all have short-acting (usually Vicodin or Percocet) on-hand in case of breakthrough. Spoke with Jim & reviewed managed care for Butrans & OxyContin & also reviewed savings cards. Jim said he will fight for a patient to get a medication if it is what Dr Tabbaa thinks is best.
PPLPMDL0020000001	Euclid	OH	44119	5/26/2011	Quick call.... Asked doc how he feels about prescribing vicodin after tramadol. He said "maybe, sometimes." He said now there is the patch. I discussed the appropriate positioning. Reminded him of the commercial and BWC coverage and the Savings cards.
PPLPMDL0020000001	Shaker Heights	OH	44122	5/26/2011	Quick call- Dr Agarwal said he has not prescribed Butrans. Reviewed dosing information, delivery system, appropriate patient type & managed care/savings cards. He said he would keep it in mind then walked away. Reviewed Butrans with Stephanie, including dosing, savings cards, & appropriate patient type.
PPLPMDL0020000001	Berea	OH	44017	5/26/2011	Spoke with April, I asked how Butrans has been received by patients, she said she has not heard much feedback. We reviewed the appropriate patients for Butrans and key messages. I asked her thoughts and she does think it would be a good option for some patients and she likes that it is a CII. We discussed OxyContin as an option and reviewed the medication guide. Reminder to recommend Senokot S.
PPLPMDL0020000001	Cleveland	OH	44109	5/26/2011	dr said he hasn't seen any patients that he felt Butrans was appropriate for, I showed dr Butrans initiation guide and we talked about appropriate patients, I asked dr if he's started anyone on vicodin or percocet this week, dr said yes, I told dr those could have potentially been Butrans patients, dr said he'll think about some patients and maybe 1 or 2 patients would be willing to take a patch once a week, I talked to dr about Butrans formulary coverage and asked him to focus on 2 patients to start on Butrans, dr agreed, I recommended Senokot-S

PPLPMDL0020000001	Cleveland	OH	44109	5/26/2011	i talked to tania,pharmacist,about butrans 5 core messages,initiation guide,patient information booklet and stocking of Butrans.Tania said she hasnt seen any scripts for Butrans here and because Butrans isnt covered on Medicare that will be a tough sell to their pharmacy manager,as the majority of patients seen at the Senior Wellness Center are geriatric,over 65 years of age and have medicare as their primary insurance.we talked about Butrans formulary coverage for any commercial plan patients and Tania said to follow-up with pharmacy manager next week,talk to him about stocking Butrans.Tania said Butrans in a patch and dosed once a week are 2 benefits she see's but i need to follow-up next week.we talked about OxyContin stocking,appropriate patients and OxyContin formulary coverage.i recommended Senokot-S
PPLPMDL0020000001	Parma	OH	44129	5/26/2011	Dr Gigliotti said again that he has not had a Butrans patient come in yet, but that he is ready to prescribe. I reminded him that he has been telling me this for months. I told him that perhaps these potential Butrans patients were not coming in but rather are calling in, asking for increases or changes in pain medication. He said that was a good point. He asked about insurance coverage- went over formulary grid & asked him to think of his commercial insurance patients, calling in too soon for refills or asking for increases or changes in pain medication, if their condition is chronic. He dug out his initiation guide & i walked him through page 6 & discussed titration ability every 3 days. He said that he would find a Butrans patient for me & added that he will prescribe Butrans today. I asked him if this was a firm commitment, & he said maybe not today, but before he sees me next, he will have found someone. Also reviewed OxyContin q12h for appropriate patients beyond Butrans 20mcg.
PPLPMDL0020000001	Independence	OH	44131	5/26/2011	Spoke with Denise (MA) & attempted to schedule a lunch, but she said they are booked for this month & the books will open again in June for July. Reviewed Butrans & OxyContin savings cards & eligibility requirements. She said she keeps them in a drawer with the formulary information i have given her. Also gave them Senokot-S samples & recommend they give them out to patients taking medications that cause constipation.
PPLPMDL0020000001	Cleveland	OH	44195	5/26/2011	worked anesthesia/pain management dept-only got to see a few hcp's but left Butrans fpi,initiation guide and patient information booklet for Dr.Ali,Dr.Vrooman and Dr.Katyal with my business card.worked neurology dept- left Butrans fpi,initiation guide,patient information booklet and business card with medical secretaries for Dr.Spears,Dr.Stillman,Dr.Kriegler and Dr.Mays.
PPLPMDL0020000001	Berea	OH	44017	5/26/2011	Spoke with Diane tech. She did not think they have Butrans in stock, she did not see it. We reviewed the manged care and savings program for Butrans as well as OxyContin.
PPLPMDL0020000001	Euclid	OH	44119	5/26/2011	Spoke to Kevin about the stocking and movement of Butrans. He confirmed stocking and that he has seen at least one script. He thinks it was a pain mgmt doc but he did not recall who. I explained the indication and positioning, savings cards. He has still stocked on all oxycontin strengths and having no issues. Provided CE catalog.
PPLPMDL0020000001	Cleveland	OH	44109	5/26/2011	i talked to dr about his patients taking tramadol that are asking for something different or saying their tramadol isnt controlling their pain,to consider Butrans for these patients if they are appropriate.dr said he hasnt had anyone complain lately but does remember Butrans is a once weekly dosing option and he should think of moderate chronic pain patients to start on the Butrans 5mcg or 10mcg.i showed dr Butrans initiation guide and asked him to start 2 patients on Butrans,if patients call in office earlier in the month for their tramadol,instead of refilling medication,dr said if appropriate he will do that.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	5/26/2011	i talked to dr about considering patients that are taking percocet but not controlled and asking for something different,to start on Butrans.dr said he just hasnt thought of Butrans,we discussed Butrans initiation guide,patient information booklet and i asked dr to think of 2 patients that he feels are appropriate to start on Butrans,dr agreed.i recommended Senokot-S
PPLPMDL0020000001	Olmsted Falls	OH	44138	5/26/2011	I told Dr last time we spoke he said he had some patients in mind who could benefit from Butrans. I asked if he can think of any of those with commercial insurance. He said the ones he can think of are Med D but he will think about it. We reviewed managed care for Butrans. I reminded him about OxyContin as an option that is covered on some Med D and Medicaid plans.
PPLPMDL0020000001	Berea	OH	44017	5/26/2011	i asked Dr about the patients he started on Butrans. He said he started 2 patients but has not heard back and he's not sure if they filled the scripts of not. We reviewed the key messages for Butrans and i asked if he sees a benefit. He said he does. I asked if he still has a lot of patients on hydrocodone. He said he does and i asked him to consider Butrans for those patients who meet the indication. He said he will prescribe it. Dr said he only has one patient still on OxyContin, he is trying to get away from treating chronic pain.
PPLPMDL0020000001	Cleveland	OH	44195	5/26/2011	i talked to Kathy,PA,about her patients taking tramadol but telling her their pain isnt controlled and perhaps a long-acting opioid like Butrans could be appropriate,Kathy said she likes that Butrans is a patch and dosed once a week but she see's all of Dr.Mekhal and Dr.Mintzer's patients and unless they approve of Butrans,shell have a hard time starting patients on Butrans.i asked Kathy to think of 2 patients,that she knows call early every month for refills,where she could talk to doctors about these 2 patients and discuss Butrans as an option if appropriate.Kathy said that would be fine.i recommended Senokot-S
PPLPMDL0020000001	Berea	OH	44017	5/26/2011	Quick call at window, I reminded Dr of our last conversation on Butrans and asked if he would try Butrans for a patients instead of going to around the clock vicodin
PPLPMDL0020000001	Parma	OH	44134	5/26/2011	Quick call with technician who said their regular pharmacist was not in. Reviewed Butrans & OxyContin savings programs & eligibility. She said they try to give out coupons to customers whenever they can. She said to stop in another day to try to catch James.
PPLPMDL0020000001	Solon	OH	44139	5/26/2011	Spoke with Jackie about a clinical presentation for Butrans to be scheduled through Mike Schneider. She said the P&T meeting is June 15 where it will be reviewed. She was unaware of this meeting but agreed to the discussion & gave me options for dates. Email her and copy Dan & Mike as she will include Lora Wilson, VP of Pharmacy in the email chain.
PPLPMDL0020000001	Cleveland	OH	44109	5/26/2011	worked pm&r dept-see call notes. worked internal medicine dept-had to leave Butrans fpi,initiation guide,formulary grid,patient information booklet and my business card for Dr.Lindheim,Dr.Harrington,Dr.Falk-Ytter,Dr.McCreery and Dr.Ricanati,as they were all with patients and reps couldnt see doctors this am.worked rheumatology dept-left Dr.Ballou and Dr.Magrey Butrans fpi,initiation guide,formulary grid and patient information booklet with my business card for them as i couldnt see them today
PPLPMDL0020000001	Highland Heights	OH	44143	5/26/2011	Doc and nurse, Marianne said that he tried a patient on Butrans and the patient complained that the patch would not stay on. They wanted to know what the solution is. I explained that proper application to a clean dry, hairless site. I also advised that patients can apply tegaderm or first aid tape. This particular patient works a very physical job where he sweats a lot. Doc asked about coverage again - is it covered on medicare. I explained no coverage on medicare/medicaid but reviewed the commercial plans and the coverage with BWC. He said he has medical mutual, anthem, united. He did say he has had good feedback from a couple of patients. He said he has been converting patients from SA opioids, not necessarily opioid naive.
PPLPMDL0020000001	Parma	OH	44134	5/26/2011	Dr Scanlon showed me that he keeps the Butrans information that i leave for him in effort to help remind him to prescribe it when the right patient comes in. I asked if he had called in the prescription for the patient we discussed & he said he did, but that that is the only patient he has tried on it & he knows he needs to have more patients. I asked if there was a nurse or MA that could help & he said no. He said he just needs to think of Butrans when those right patients come in. I asked him if it is possible that many potential Butrans patients are not actually coming in, but rather calling in for an increase in dose or change in medication & he said that was a very good point. He said that does happen & that those would be great patients to start on Butrans. He thanked me for my frequent visits/reminders to him. I told him that it sounds like he has many patients that may be able to benefit from Butrans-he said that is true without a doubt. OxyContin savings cards reminder.
PPLPMDL0020000001	Highland Heights	OH	44143	5/26/2011	Reviewed the butrans indication, patient type, dosing, and formulary coverage. She had not had any experience with it yet but thought she had a patient in mind.
PPLPMDL0020000001	Westlake	OH	44145	5/26/2011	Quick call at window, i asked if he could start just one new patient on Butrans instead of giving vicodin or tramadol around the clock. He said that he just keeps forgetting about it. I reviewed the initiation guide and dosing.
PPLPMDL0020000001	Cleveland	OH	44109	5/26/2011	i talked to dr about her patients taking percocet that are complaining to her that their medication isnt lasting long enough,so perhaps a long-acting opioid like Butrans dosed once a week could be appropriate,dr said she hasnt had any patients complain lately but does like that Butrans is in a patch and dosed once a week.dr asked about medical coverage as she has a lot of those patients.we discussed medical prior authorization for Butrans and i asked dr if she had BWC patients? dr said yes,we discussed BWC coverage for Butrans.i asked dr to just think of 2 patients,per our discussion,to start on Butrans.dr said if she see's any patients that are appropriate,shell consider Butrans.i recommended Senokot-S
PPLPMDL0020000001	Solon	OH	44139	5/26/2011	Tony said they're having trouble with their system breaking out the data per plan with the appropriate rebate %. He's only able to provide the necessary reports for the higher percent rebates. We both agreed since greater than 95 of the utilization comes from the Duals/LIS that we should move forward in processing the higher rebate now. We can address the lower % rebate later.
PPLPMDL0020000001	Westlake	OH	44145	5/26/2011	I reviewed our last conversation about Butrans instead of vicodin. I asked if she would give Butrans a try for this type of patient and she said she will but she is worried about cost. We reviewed the manged care for Butrans and i let her know to stick with commercial insurance and give out the savings cards. Reminder about OxyContin as an option that is covered on Medicaid.
PPLPMDL0020000001	Euclid	OH	44119	5/26/2011	Spoke to David about the stocking of Butrans. He has both 5 and 10mcg of Butrans. He has not seen any scripts. He said he doe not see many transdermals coming through there but he did name Dr. Keum as a prescriber of transdermals. I explained the CII and 7 day status. Discussed the relay health program and savings cards. He talked about Dr. Thomas Craig's scripts that he has been rejecting - he spoke of a elderly patient taking 2 tabs of 80mg q12. I explained that technically within the prescribing guidelines.
PPLPMDL0020000001	Sagamore Hills	OH	44067	5/26/2011	Introduced Butrans to Dr Mike, delivering 5 core messages & alerted him to box warning. He said that he hates treating pain. I told him that i understand the frustrations & difficulties this type of patient can offer, & asked him to focus on patients who he trusts. He said he generally tries to get patients off opioids, not put them on them or increase their medications. He said that he finds that almost zero patients actually need opioids to control pain & said that people over-exaggerate their pain. He also added that he thinks narcotics lower one's pain tolerance, making one more susceptible to pain sensations. I asked him if he believes some people are in true pain & do need opioids & would take them responsibly. He said maybe. He said Butrans may fit a niche of patients who do need something for moderate pain that is long-acting & CII. Asked him to think of 1 or 2 patients who may benefit & he said he would keep it in mind. Recommended Senokot-S for opioid-induced constipation
PPLPMDL0020000001	Cleveland	OH	44104	5/27/2011	i showed dr Butrans initiation guide,discussed appropriate patients to start on Butrans,dr said she likes that Butrans is in a patch and once weekly dosing is easy but she hasnt had any patients tell her lately that their short-acting opioids arent controlling their pain.i asked dr to think of 2 patients,with commercial insurance,that call into office earlier than they should,monthly,asking for more pills or for something different and perhaps Butrans could be appropriate for them.dr agreed.we talked about Butrans formulary coverage on medical,commercial and BWC.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44104	5/27/2011	i talked to dr about her patients taking percocet that arent controlled and need another option.i asked dr to consider Butrans for 2 patients,as we discussed,that she feels are appropriate and meet Butrans indication,showed Butrans visual aid on appropriate patients,dr said she will consider Butrans she just hasnt thought about it and forgot what the insurance coverage was like for medicaid patients as she has a lot of medicaid.we talked about Butrans formulary coverage.we talked about appropriate patients for OxyContin,showed OxyContin flashcard being an appropriate option,formulary grid and we discussed OxyContin savings cards.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44114	5/27/2011	i talked to Laura,Pharmacist,about Butrans stocking and Laura said until she see's a script for Butrans,she wont order it,we talked about importance of stocking,discussed Butrans initiation guide and appropriate patients for Butrans,i asked Laura if she would recommend Butrans,to doctors,if patients are telling her that their short-acting opioids arent controlling their pain? Laura said she might do that it depends on relationship with doctor.we discussed Butrans formulary coverage and we talked about appropriate patients for OxyContin,stocking of OxyContin and formulary coverage for OxyContin.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44120	5/27/2011	i talked to Stewart,Narcotics Buyer/pharmacist,who said he's gotten a few scripts here for Butrans.dr rosenfield has been 1 physician,dr sahgal and he's not sure of the others,but we talked about Butrans initiation guide and doctors starting patients on Butrans 5mcg or 10mcg.Stewart said he's seeing more of the Butrans 10mcg scripts come through so we talked about appropriate patients for Butrans 5mcg and i asked Stewart to focus his discussion with patients on the application and rotation of Butrans and showing them the log book section in Butrans patient information booklet.Stewart said he'll talk to patients about this information and we discussed Butrans formulary coverage we discussed appropriate patients for OxyContin,7 tablet strengths and i showed Stewart OxyContin conversion guide and we discussed OxyContin formulary coverage.i recommended Senokot-S
PPLPMDL0020000001	Chagrin Falls	OH	44023	5/27/2011	Spoke with Anita & introduced Butrans (indication, appropriate patient type, dosing, CII). Also reviewed managed care coverage & savings cards & let her know she could print them at Butrans.com. She said they do stock the 5 & 10mcg but only have one customer on it right now. She could not think of any specific recommendations of who to call on in the area. Also reviewed OxyContin savings cards & discussed eligibility requirements for savings programs.
PPLPMDL0020000001	Parma	OH	44129	5/27/2011	Asked Jen what her comfort level with using Butrans is. She said that she really would like to get a good sense from Dr Nickels where & how to prescribe it. I asked her if she sees having Butrans as a CII that is long-acting as a benefit & she said she does think it offers a potential benefit. She said that Dr Nickels has a few patients on Butrans & that as he gets feedback & uses it more, she will get more comfortable in selecting her own patients.
PPLPMDL0020000001					Discussed Ryzolt as a q24h option for appropriate patients.

PPLPMDL0020000001	Independence	OH	44131	5/27/2011	Roman apologized for missing the program & said that he had been in surgery that night until after 10:30pm. He said he has one patient on Butrans who really likes it & who is getting refills. He asked how to initiate treatment in patients. I asked him to be more specific- those not on an opioid or patients on opioids already? He said everyone is already on one when he sees them. Reviewed initiation guide page 6 & discussed initiating treatment, including taper of current opioid. Also reviewed titration ability every 3 days. He said he would probably start everyone on 10mcg & would not "bother" with the 5mcg. I told him if the patient was opioid-naïve or on <30mg morphine equivalent, we would recommend a 5mcg starting dose. Also discussed OxyContin for appropriate patients beyond Butrans 20mcg & Senokot-S for opioid-induced constipation.
	Cleveland	OH	44104	5/27/2011	I talked to dr about his patients taking percocet but asking for something different as their pain isnt controlled and to consider Butrans if patients meet Butrans indication.I showed dr Butrans visual aid and initiation guide for this discussion,dr said his patients like taking their pills and hasnt had anyone complain lately but he likes that Butrans is a patch dosed once a week.I asked dr if patients ever call into office earlier than they should,monthly,for their percocet? dr said yes that can happen.I asked dr to think of 2 patients like that and start them on Butrans,instead of refilling patients percocet.dr said if appropriate and if patients are willing to take a patch,he will consider Butrans at that time.we discussed OxyContin being an option,appropriate patients for OxyContin,7 tablet strengths for titration flexibility,showed OxyContin conversion guide and discussed OxyContin formulary coverage and patient savings cards.I recommended Senokot-S
PPLPMDL0020000001	Chagrin Falls	OH	44022	5/27/2011	Dr Hudson asked me to remind her about details of Butrans as she only remembers that it is a long-acting patch for pain. Reviewed indication, appropriate patient type, positioning (range of patients- also discussed OxyContin for appropriate patients beyond Butrans 20mcg), CIII & abuse/addiction potential. She said she was surprised to hear that it is once-weekly. Also discussed buprenorphine molecule as a partial agonist at mu opioid receptor & reminded her that like all opioids, Butrans does carry abuse/addiction potential. Also reviewed managed care, asking her to focus on commercially insured patients. She said Butrans sounds like something she may be able to utilize in her practice on chronic pain patients.
	Chagrin Falls	OH	44022	5/27/2011	Dr Rood said that his Butrans patient is doing very well. He said that he asked her how well the patch was adhering, since adherence had been such an issue for her with the fentanyl patch & the patient reported that the patch sticks for the entire 7 days with no problem & no skin irritation. Dr Rood said that more importantly, she is getting great pain relief, something this patient has not had in a very long time. I asked him what other patients he has identified who may be potential Butrans candidates. He said that he really does not have many patients on opioids. I asked if he would use Butrans on patients who were not currently on an opioid & he said he would if their condition was chronic. I asked if he would also use it on patients who were taking around-the-clock short-acting opioids for chronic conditions if they called in asking for increases/changes in medication & he said yes.
PPLPMDL0020000001	Cleveland	OH	44104	5/27/2011	Also discussed OxyContin q12h for appropriate patients beyond Butrans 20mcg. I talked to dr about patients he treats that are taking short-acting opioids like tramadol,vicodin or percocet,that he feels are appropriate for Butrans and why he's started a few patients on Butrans.dr said he likes that Butrans is in a patch and dosed once a week as that seems to be easier for some patients.I showed dr Butrans visual aid,discussed appropriate patients,tapering of short-acting opioids and initiation of Butrans and I asked dr to continue starting patients on Butrans,dr agreed we talked about OxyContin being an appropriate option for patients,formulary coverage and OxyContin savings cards. I recommended Senokot-S
	Mayfield Heights	OH	44124	5/27/2011	Debbie said she is having success with butrans. She said she just wrote a script this week. She also had a male patient on it who loves it and it works great. She asked if/when there will be changes with medicaid. I told her not yet but I would keep her updated with any changes. I reviewed the proper initiation dosing for Butrans and the commercial plans.
PPLPMDL0020000001	Cleveland	OH	44143	5/27/2011	Quick call.....provided doc the branded Butrans FPI and briefly explained the clinical trials section. Scheduled lunch for further discussion on Butrans. Nothing learned.
	Independence	OH	44131	5/27/2011	Spoke with Jill (MA) & reviewed Butrans indication, positioning, & managed care/savings cards. She said she sees very few commercially insured patients but that he does have some. She said that she is the one who handles calls from patients requesting more pain medication & that this does happen sometimes. Also reviewed OxyContin savings cards & discussed eligibility.<font color=blue><b>CHUDAKOB's query on 06/02/2011</b></font>How can you get Jill involved in the process with Dr. Pai? What action did you ask her to take?<font color=green><b>APSEGAS's response on 06/03/2011</b></font>She has said that she does not get involved in recommending medication changes to Dr Pai & that that is his decision, but I was thinking that I could see if she would be willing to flag patient charts if they meet the indication & are calling in for increases or changes in their chronic pain medications.<font color=blue><b>CHUDAKOB added notes on 06/07/2011</b></font>Very good ideal
PPLPMDL0020000001	Westlake	OH	44145	5/27/2011	Dr told me that he has had a few denials for Butrans. Some where Medicaid and one was UHC, he said that he gave methadone with Butrans and I told him this is way it may have been denied. I discussed that Butrans should not be used with other long acting meds and that he could still use short acting meds for supplemental analgesia. He said he understands and will prescribe it as indicated in the FPI. We reviewed OxyContin as an option when Butrans may not provide adequate analgesia. He apologized for not making the peer group program, he had a long day and was too tired to go. I let him know there will be another one coming up soon.
	Mayfield Hts	OH	44124	5/27/2011	Spoke to tech, Tina, about the stocking of Butrans. She said they do have it and she has seen a couple of scripts. She could not recall the prescriber. I asked if she recalls the use of a savings card. She could not recall a card but that the costs was not to expensive. I explained the savings cards and the relay health program.
PPLPMDL0020000001	Cleveland	OH	44135	5/27/2011	Spoke with Dr and Randy nurse, we reviewed the dosing for Butrans and appropriate aptients. Dr said he will try to remember. I asked Randy for his assistance in recommending Butrans for appropriate patients and he agreed. We reviewed the savigns cards for Butrans and OxyContin.
	Cleveland	OH	44106	5/27/2011	worked pm&r dept dr krupkin and dr balg,set-up appt with him and talked to secretary (jennifer) about Butrans S core messages,initiation guide,patient information booklet/dvd and Butrans formulary grid. worked internal medicine-had to leave Butrans fpi,initiation guide,patient information booklet and Butrans formulary grid for attending physicians and OxyContin fpi,conversion guide and formulary grid. worked family medicine-left Butrans fpi,initiation guide,patient information booklet and Butrans formulary grid for attending physicians and I left OxyContin fpi,conversion guide and OxyContin formulary grids for all attending physicians.
PPLPMDL0020000001	Mayfield Heights	OH	44124	5/27/2011	Doc said she is continuing to prescribe Butrans - for those who have not gone on to stronger opioids yet. These are mainly newer patients to her practice. I asked if she has had titrate Butrans at all. She said she has titrated some patients but overall it is working fine. She would like to prescribe for older patients but she is sticking with commercial patients.
	Beachwood	OH	44122	5/27/2011	Spoke with technician who said both Ashley & Alan were dealing with customer issues. Reviewed Butrans & OxyContin savings programs & eligibility. Also let her know they could print Butrans savings cards at Butrans.com.
PPLPMDL0020000001	Mayfield Hts	OH	44124	5/27/2011	Went over patient information guides & application. She said she would leave my information for the pharmacists.
					Doc said he has been prescribing Butrans and he likes it for the elderly patients. He said he had one this week - an elderly patient that said she is not good with remembering her pills. He said he thinks that Butrans is perfect for elderly patients. I reminded him that Butrans is not covered on medicare/medicaid so elderly patients may have trouble getting it. He said he has a lot of medicare. I reviewed the commercial coverage. He said he doe have medical mutual, anthem and untied. He said he will continue to prescribe it.
PPLPMDL0020000001	Independence	OH	44131	5/27/2011	Reviewed Butrans indication, dosing, & initiating therapy. She expressed interest in attending a Butrans program & asked that I let her & Roman know when the next event occurs. She said she has not personally prescribed Butrans for any patients yet, but does not have a problem with it. She said she thinks Roman & Dr Keppler both have patients on it right now. Also recommended Senokot-S for opioid-induced constipation.
	Cleveland	OH	44114	5/31/2011	dr said she didnt have a lot of time to talk today,was a bad day,but she's still trying to work on 1 patient to start on Butrans,dr apologized for missing Butrans dinner program and she would talk to me more next time i come to see her
PPLPMDL0020000001	Cleveland	OH	44113	5/31/2011	i talked to dr about what he remembered about Butrans,dr said not much,i talked to dr about Butrans being a once weekly dosing option and CIII as dr said he liked these features about Butrans.dr said he wants to wait and see what other doctors are doing in real world as he's conservative.dr said his wife is an internist in practice with him and she's more conservative than him,dr said a webinar or dinner program would be helpful for him to listen to someone talk about Butrans.I gave dr Butrans fpi,initiation guide and told dr i would stop back tomorrow with Butrans webinar flyer.
	Cleveland	OH	44114	5/31/2011	I asked John how dinner program was last week on Butrans and his feedback and John said it was a good program,misssed me and had to go see 2 patients so he'll talk to me later.
PPLPMDL0020000001	Cleveland	OH	44114	5/31/2011	I asked dr how dinner program was last week on Butrans and what his thoughts were post the program? dr said he thought it was a good presentation but there were a few questions on some of the case studies that didnt show an mri diagnosis as he thinks you cant change patients medication without an mri diagnosis.nothing learned after that as dr had to see patient
	Cleveland	OH	44113	5/31/2011	I talked to dr about patients she's started on Butrans and how they are doing and dr said some patients are doing extremely well and she's seeing improvement in patients pain control but others arent as controlled but are still staying on Butrans.dr said there are variability patterns with the patients she's starting on Butrans.dr asked what the insurance coverage was for medicare and medicaid? we discussed those 2 plans,commercially insured patients using Butrans patient savings cards and BWC coverage.dr said to leave Butrans formulary grid with Pam as she has all of the Butrans materials together.
PPLPMDL0020000001	Cleveland	OH	44130	5/31/2011	I asked Dr Diab if, since he had not yet received patient feedback on Butrans, he considers that good news, since generally patients call only when they are dissatisfied. He said yes. I asked him then if he would continue to prescribe Butrans for appropriate patients & he said yes.
	Independence	OH	44131	5/31/2011	Dr Jack said that he still needs to talk to Dr Nickels regarding Butrans. I told him that I was not asking him to switch all of his patients to Butrans, but rather that I am asking him to switch one or two appropriate patients so that he can get some sort of clinical experience & form his own opinion on whether or not there is a place for Butrans in his practice. He said I made a good point. He looked at his next patient's chart & said it actually may be a patient he could try on Butrans.
PPLPMDL0020000001	Cleveland	OH	44130	5/31/2011	I asked Dr Fedorko how many calls he gets each day/week from patients on around-the-clock Vicodin who are requesting increases or changes in medication & he said "not very many". He said this is because patients "know him" & know that he is very cautious of drug seekers & will "fire" them from his practice. He then said if or when that does happen, he has no problem switching them to Butrans. He asked me to review dosing/titration with him. Presented initiation guide & showed pg 6, also discussing titration ability every 3 days up to 20mcg maximum. Also reviewed managed care, asking him to consider patients with commercial insurance only to save on time & frustrations. Went over savings cards as well. Also showed him Ryzolt savings cards for appropriate patients.
	Parma	OH	44129	5/31/2011	Dr Ortega said he just had a patient who he had switched to Butrans from Percocet complaining that Butrans did not work. The patient put on a 5mcg patch, then waited one day & took it off because he said it didn't work, but then put a new one on the next day to try it again. The patient waited a day & then removed it, once again saying it did not work. Dr Ortega told the patient that he should try Butrans again, this time leaving it on for the full week & taking Percocet for supplemental analgesia. He has not heard back from the patient about the results of this. I told Dr Ortega that it sounded like he did the right thing. Dr Ortega said that the other patients he has put on Butrans have done well. He asked about titration ability & writing refills. Discussed ability to titrate every 3 days to a max 20mcg dose. Also discussed OxyContin for appropriate patients beyond Butrans 20mcg. He said he will continue to look for patients. Cindy said he just started another patient on it today.
PPLPMDL0020000001	Independence	OH	44131	5/31/2011	Stopped Dr Rob in the hallway- he asked what Butrans is for. Reviewed indication & also went over appropriate patient type/positioning. I asked if he has chronic pain patients who call in asking for refills too soon & he said yes. I told him some of them are potentially Butrans patients. He said he would keep it in mind & walked into a room.
	Akron	OH	44333	5/31/2011	I asked Dr Brown about her patient load and she mentioned she had partnered with several docs in the area and is starting to get busier. She mentioned that Butrans is certainly a drug that she feel is beneficial to her practice and said she currently has 3 patients on it.
PPLPMDL0020000001	Cleveland	OH	44124	5/31/2011	Window call....Doc needed more oxycontin savings cards. I discussed the current formulary plans where oxycontin is second tier. I discussed the Butrans indication and the positioning. I explained the 7 day delivery and the CII status which means that it can be refilled or called in. I asked if he sees a place for it in his practice. He says he has a few patients that use transmdermals. Nothing more learned.
	Cleveland	OH	44105	5/31/2011	I talked to Abdul,Pharmacist,about Butrans stocking and he's not ordered Butrans yet as he wants to wait for a script to come through,not seen any scripts for Butrans here.I asked Abdul if he would recommend Butrans to doctors he has a good relationship with,if patients tell him their pain isnt controlled with their short-acting opioids and Abdul said he would consider doing that as he likes that Butrans is a once weekly dosing and he likes that Butrans is a patch.Abuld asked if I had any patient information to leave behind and I said I had Butrans patient information booklet that he could give patients if patients arent controlled on their short-acting opioids and abdul recommends Butrans to patients.Abuld said he has a couple booklets so he'll do that.
PPLPMDL0020000001	Akron	OH	44310	5/31/2011	I asked Dr. Cremer how many new patients he was starting on Butrans each week and he told me he started a handful of new patients last week. He is continuing to have success primarily with his BWC patients.

PPLPMDL0020000001	Cuyahoga Falls	OH	44223	5/31/2011	I asked Dr. Dinsmore if Butrans was a therapy that he though would benefit his practice and how he currently treats pain. He mentioned that he liked the idea that it was a 7 day therapy and a schedule 3. He asked if I would schedule a lunch so we could discuss it more in depth.
PPLPMDL0020000001	MAYfield Heights	OH	44124	5/31/2011	Spoke to pharmacist, Jesse about the script volume for Butrans. He said he has only seen maybe one. He could not recall the prescribe but he also does not recall any issues with it. I explained the savings card program and the relay health voucher. I asked him about oxycontin volume. He said they dont get many new scripts just a few regule customers. Only carrying the 10, 20, 40mg
PPLPMDL0020000001	Copley Cleveland	OH	44321	5/31/2011	Quick call through window. I asked Dr. Heim if he had initiated Butrans therapy and he said that the patients he had in mind had not come in but he still would trial it on those patients.
PPLPMDL0020000001		OH	44113	5/31/2011	I asked dr what he remembered about Butrans from our last lunch together? dr said he remembered that Butrans was for moderate chronic pain but that was it. I told dr he told me he liked that Butrans was a CIII as he could call in refills and that made it easier for him.dr asked who's covering Butrans and what was medicaid coverage as he has a lot of medicaid.i talked to dr and nurse,shelia,about Butrans formulary coverage and asked dr to start 1-2 chronic pain patients on Butrans,instead of refilling vicodin or increasing vicodin dose when its not controlling patients pain,dr agreed.
PPLPMDL0020000001	Mayfield Hts Brooklyn	OH	44124	5/31/2011	Window call...Reminded doc of the appropriate Butrans patient type - instead of going to vicodin ATC. Reminded him that commercial patients are best candidates. Gave formulary grid. Nothing learned.
PPLPMDL0020000001		OH	44144	5/31/2011	Spoke with pharmacist, Michele, & inquired as to what type of managed care mix they see at that location. I asked if they see mostly Medicare, Medicaid, or commercial insurance & she said there really is an equal mixture of all of them. Discussed savings programs & eligibility requirements for Butrans & OxyContin.
PPLPMDL0020000001	Mayfield Hts	OH	44094	5/31/2011	Quick call.....I asked doc if he sees a place for a long acting, CIII in his patient population. He said he is not in the pain mgmt business. I asked if he has patients taking tramadol or vicodin several times a day. No response. I reminded him of the indication of Butrans. Gave him an initiation guide.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	5/31/2011	Dr. Pitt thought he had a potential candidate for Butrans therapy but after further discussion the patient was already taking to LAO and passed the point of Butrans therapy. I used the initiation guide to help him and Liz identify a better suited patient and asked if he had any of those patients coming in today and he said he would keep it in mind.
PPLPMDL0020000001	Westlake	OH	44145	5/31/2011	I asked Dr to tell me about the feedback he as been getting from Butrans. He said that he hasn't heard a let of feedback so patients seem to be doing well. I asked if he would continue to convert patients and he said he will.
PPLPMDL0020000001	Cleveland	OH	44109	5/31/2011	He has put Butrans in with his opioid rotation. Reminder about OxyContin as an option when 20mcg Butrans may not provide adequate analgesia. He said he will keep it in mind but he prefers not to prescribe CII when he can. I talked to Mana and Andy,Pharmacists,about Butrans stocking and doctors prescribing,they both said they havent seen any scripts lately.I talked to them about recommending Butrans to physicians and patients,as they may not know of another option.Mana said he would recommend Butrans to doctors but it comes down to doctors choosing the medication and writing it.I aked mana and andy to focus their patient discussions on Butrans patient information booklet and Andy asked about insurance coverage for commercial and medicaid so i showed Butrans formulary grid and talked about Butrans patient savings cards.
PPLPMDL0020000001	South Euclid Cleveland	OH	44121	5/31/2011	Quick follow up from last weeks breakfast. I reminded him of the Butrans patient type and the coverage with commercial plans. Gave him an initiation guide as a dosing reminder and how to start. Nothing learned.
PPLPMDL0020000001		OH	44113	5/31/2011	I talked to dr about his thoughts on Butrans dinner program 5/24,dr said the case studies presented were helpful to give him another perspective on butrans he could consider starting on Butrans,dr said he feels more comfortable knowing Butrans is not an agonist/antagonist which was a concern of his and he did receive the medical information request form answer i sent to medical services and they discussed it at the dinner.dr said he's started a few patients,most of them have been on vicodin 10-15yrs,he's adding Butrans on to vicodin and will see what happens.dr said he has patient information booklets,savings cards,etc.
PPLPMDL0020000001	Lyndhurst	OH	44124	5/31/2011	Spoke to Erin, pharmacist about the stocking and movement of Butrans. She said she has seen a few scripts "here and there". She did have a patient that complained of really bad side effects - skin irritation and increased pain at the application site even after removal of the patch. This patient apparently submitted a complaint to Purdue. Patient was one of Dr. Dews and was ultimately switched to another product. She did not believe the customer had a savings card. I explained the program and the focus on commercially insured patients.
PPLPMDL0020000001	Lyndhurst	OH	44124	5/31/2011	Quick call.....Spoke to Steve about the stocking of Butrans. He said he very busy and only stated that he has Butrans stocked but he has not seen any scripts. He asked the techs and they did not recall any scripts either.
PPLPMDL0020000001	Independence	OH	44131	5/31/2011	Nothing learned.
PPLPMDL0020000001		OH	44131	5/31/2011	Spoke with Angela (technician) as the pharmacist was too busy to see me today. We reviewed savings cards for Butrans & OxyContin as well as eligibility. She said she would give the pharmacists my information & said to stop in another day to speak with them.
PPLPMDL0020000001	Cleveland	OH	44121	5/31/2011	Window call....I asked doc if he has any questions about prescribing butrans. He said no. He just needs to find the right patient. I explained that patients fitting the indication of moderate to severe pain with commercial insurance would be appropriate. Gave him a formulary grid.
PPLPMDL0020000001	Akron	OH	44310	5/31/2011	I asked Dr. Schukay if he though there was a place for Butrans in his practice and he said there was. He said he had forgotten about it because he has been so busy in transition to the new practice. He said he would read some info on his own and get back to me.
PPLPMDL0020000001	Independence	OH	44131	5/31/2011	Dr Sundaram said that he is "keeping his eyes out" for more Butrans patients. I asked him who he considers to be the ideal Butrans patient. He said someone who is on chronic opioids. He then told me about a female patient of his who has chronic pain & takes 2-3 Vicodin per day. He said that the patient needs the Vicodin due to her pain, but that she does not like taking it & experiences adverse events from it. He said that the next time she comes in he is going to switch her to Butrans. I told him that this sounded like a great candidate & asked what her insurance was. He said he thinks she is Medicare. Reviewed managed care & likelihood for prior authorization & also reviewed savings cards for patients with commercial insurance. I asked Dr Sundaram how frequently he gets calls from patients requesting an increase or change in chronic pain medication & he said it happens every day. I asked him why not think of Butrans for those patients & he said as long as it is covered he will.
PPLPMDL0020000001	Cleveland	OH	44103	6/1/2011	i reviewed Butrans 5 core messages,dr said she has started 1 patient who was taking percocet around the clock for his chronic pain but wasnt controlled and he wanted more pills and she wasnt going to give him more pills so she started patient on Butrans and gave him 20 percocet for monthly break through pain and its been controlling this patients pain.dr said its tough to talk to patients about Butrans when they have been taking pills for years and just want more pills,dr wanted more Butrans patient booklets with application dvd as she thinks that'll help her educate patients on Butrans and she will get more acceptance from patients,to try Butrans.i asked dr who the appropriate patient was for butrans? dr said patients calling in to her office earlier every month asking for refills sooner than they should or if patients are taking 15-40mg percocet and still not getting enough pain relief.i showed dr Butrans initiation guide,we discussed Butrans formulary coverage,discussed OxyContin
PPLPMDL0020000001	Mayfield Heights	OH	44124	6/1/2011	I reviewed the patient type and positioning. He said he likes to refer patients to pain mgmt and he will then manage them. He said he would prescribe a product like Butrans for elderly patients. I explained the commercial coverage and the savings cards. He liked the idea of the 5mgc starting dose. He said he would try Butrans for appropriate patients. Discussed the oxycontin patient type and dosing.
PPLPMDL0020000001	Lakewood	OH	44107	6/1/2011	Quick call with Rick and Cindy, we discussed Butrans as an option to vicodin around the clock. We reviewed the medication guide and how to instruct patients on how to use Butrans. They said they did not think they have seen scripts. Reminder that OxyContin may be an option when 20mcg Butrans does not provide adequate analgesia.
PPLPMDL0020000001	Parma	OH	44129	6/1/2011	Dr Gigliotti pulled out his initiation guide for Butrans & said that he is "so close" to finding a patient for Butrans. Again I reminded him that he has said this many times. He said he knows but that he really thinks it will be very soon & told me not to give up. I assured him that I would not & reviewed the patient type that we discussed last week, reminding him that the appropriate patient may call in, not come in to be seen, asking for an increase in chronic pain medication. Also reviewed savings cards for both Butrans & OxyContin.
PPLPMDL0020000001	Cleveland	OH	44103	6/1/2011	i talked to dr about Butrans 5 core messages,reviewed information,discussed appropriate patients dr can consider starting on Butrans and dr said it comes down to insurance and if Medicaid covers butrans,we talked about prior authorization for Butrans and dr said he's just not willing to do the PA for Butrans at this time,but dr said he will continue starting patients on OxyContin so i showed dr OxyContin visual aid and we disussed appropriate patients to start on OxyContin,we talked about OxyContin formulary coverage and i asked dr to continue starting patients on OxyContin,that he feels are appropriate.i recommended Senokot-S
PPLPMDL0020000001	Maple Heights	OH	44137	6/1/2011	Dr Yager said there has been a paradigm shift in the medical community's view of treating pain. He said that when he completed residency 8-9 years ago, it was popular to treat pain aggressively with narcotics, but that now it seems to have shifted in the opposite direction. He went on to say that now it is more common to avoid narcotics whenever possible, including in pain management specialties. I agreed that caution should be exercised in selecting patients for any opioid therapy. I told him that he should be just as cautious with Butrans. Discussed appropriate patient type/positioning, dosing, titration, CIII, & abuse/addiction potential. Dr Yager agreed that some patients do need opioids to control pain & agreed to consider Butrans for patients who are not well-controlled on NSAID's or COX-2's or who request increases in their tramadol or Vicodin dose. Discussed OxyContin as an option for appropriate patients beyond Butrans 20mcg.
PPLPMDL0020000001	Parma	OH	44134	6/1/2011	Dr Hernandez said he continues to get great feedback on Butrans every day & said that he just wrote another script for the patient he had just seen because she was doing so well on it. He said that he is writing for the whole box of patches now, just to save time & calls from the pharmacies who won't break a carton to dispense a single patch. He said that many of his patients have called Butrans "life saving" & he said he plans to continue to prescribe it for appropriate patients. He said he especially likes it for patients who were taking Vicodin around-the-clock chronically. Reminded him of abuse/addiction potential because it is an opioid.Also discussed OxyContin for appropriate patients beyond Butrans 20mcg & the importance of appropriate patient selection.
PPLPMDL0020000001	Cleveland	OH	44106	6/1/2011	i reviewed Butrans 5 core messages,i asked dr who is the appropriate patient in his mind to start on Butrans? dr said he talked to my counterpart for awhile 2 weeks ago about patients taking tramadol that arent controlled and considering Butrans there instead of converting them to vicodin.i asked dr if that made sense to him and how often did he see those patients? dr said he see's those patients every day and knows that Lisa,patient care coordinator,gets refill requests from these tramadol patients daily so she could also tell him if patients arent getting pain relief from their tramadol or vicodin doses.dr said he knows Butrans isnt for patients taking high doses of methadone or morphine,he should think of Butrans earlier for patients. dr said he will consider starting a few patients on Butrans that are either taking tramadol or vicodin and arent getting pain relief,we discussed Butrans formulary coverage.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	6/1/2011	i asked dr how he defined appropriate patient for Butrans,dr said patients taking percocet,5mg or 10mg,1 or 2 tabs a day,that arent controlled,and if they are asking him for more pills he will not refill their percocet.dr said if percocet isnt lasting long enough,he thinks a long-acting opioid is appropriate and will consider Butrans for those patients.i showed dr Butrans initiation guide and i asked dr how often he see's these types of patients,per our discussion? dr said the 2 days he works,every week,he see's these patients all day,dr said patients call medication refill line too and will say their vicodin or percocet isnt giving them pain relief so his patient care coordinator,Lisa,will come to him and talk about Butrans.i asked dr to continue starting those patients on Butrans.dr agreed,we talked about appropriate patients to start on OxyContin,formulary coverage and OxyContin savings cards.i recommended Senokot-S
PPLPMDL0020000001	Macedonia	OH	44056	6/1/2011	Quick call- Dr Shenigo asked for a Butrans "refresher". Reviewed dosing, appropriate patient type/positioning, managed care/savings, CIII, & abuse/addiction potential. Dr Shenigo said that she really does not prescribe many opioids but said she would keep it in mind if she does have a patient for whom she is willing to prescribe opioids.
PPLPMDL0020000001	Cleveland	OH	44113	6/1/2011	i reviewed Butrans 5 core messages with dr i asked him what were the most important things to him when deciding if a long-acting opioid was appropriate for his patients? dr said he liked that Butrans was a patch and dosed once a week and that it was a CIII so that made it much easier because he could call in refills,dr said he has a lot of acute pain patients and only a few chronic pain patients so he cant think of anyone that can benefit from Butrans now but he will keep it in mind for chronic pain patients.dr asked about insurance coverage,we discussed BWC and commercial insurance.i asked dr to think of 2 patients with chronic pain,that are taking vicodin but not controlled,if appropriate to start on Butrans,dr agreed.i recommended Senokot-S
PPLPMDL0020000001	Akron	OH	44320	6/1/2011	I asked Dr. Bonyo why he had not initiated therapy and he said that he had not seen the right patient. Misty explained to him that she had started 2 patients and was having success. He took an initiation guide but did not say much else.
PPLPMDL0020000001	Bedford	OH	44146	6/1/2011	Spoke with Oleig (pharmacy manager) who said he did order Butrans in & actually has received a prescription for it, but the insurance (he said probably Medicaid) required a prior authorization & the office never completed it. Discussed Relay Health program & also reviewed OxyContin savings cards. He said he has noticed a lot of switches from OxyContin to Opana ER since the reformulation of OxyContin. He said he did not need any more OxyContin savings cards.
PPLPMDL0020000001					

PPLPMDL0020000001	Cuyahoga Falls	OH	44221	6/1/2011	I asked Dr. DiLauro how her Butrans patients were responding to therapy and she said that all of the feedback has been positive. I asked if she could start a new patient on therapy by the end of the week and she said she
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	6/1/2011	Dr. Dilauro asked me how Butrans was going I told her I had her some positive feedback and asked her after all our discussions surrounding Butrans if there was any reason she would not trial just one patient. She said she would keep it mind.
PPLPMDL0020000001	Akron	OH	44320	6/1/2011	Dr. Duppsandt was involved in the conversation I was having with Misty. Misty had mentioned that she was having success with Butrans and liked that it was a LAO and a schedule 3. Dr. Duppsandt said she liked the concept but managed care was a big obstacle since most of her patients have state plans.
PPLPMDL0020000001	LAKEWOOD	OH	44107	6/1/2011	Spoke with Ronnie tech, we reviewed Butrans medication guide and how to teach patients how to use Butrans properly. He said that he does not know if they have had scripts and the pharmacist is a floater today so she will not know. I reviewed the savings cards for Butrans and OxyContin. Reminder to recommend Senokot S.
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	6/1/2011	Quick call through the window. I asked Dr Hegde if she had reviewed the Butrans materials I had left and she said she looked through it. No new info learned.
PPLPMDL0020000001	Westlake	OH	44145	6/1/2011	Quick call, I asked if he has anymore Butrans success stories, he said he does and that he thinks it's a great job. I asked if he would start more patients and he said he will.
PPLPMDL0020000001	Cleveland	OH	44113	6/1/2011	I talked to Justin,Pharmacist,about recommending Butrans to doctors,i patients are telling him their vicodin or percocet isnt controlling their pain,Justin said he would do that but it depends on relationship with dr,Justin said he thinks a patch dosed once a week is much better for patients,i asked Justin to focus his discussions with patients on application/rotation/log book section in Butrans patient information booklet,Justin agreed saying that was important for patients to remember so he would do that,Justin said he's not seen any scripts lately from Dr.Bohl as he was starting a lot of patients in march and april but he has seen some from Dr.Shen,so we talked about importance of stocking Butrans and we discussed Butrans formulary coverage,i recommended Senokot-S
PPLPMDL0020000001	Parma	OH	44134	6/1/2011	Spoke with Linda (MA) & introduced myself & Purdue's products. She gave me the office protocol & let me know that Dr Mandat is in the office Mondays & Thursdays & does nursing home work on many of the other days.
PPLPMDL0020000001	Euclid	OH	44117	6/1/2011	She said that if I come back next week, I can probably catch him briefly as his lunch schedule is completely booked for the rest of the year. Linda agreed to call me if they get any cancellations.
PPLPMDL0020000001					Asked doc what benefits he sees with Butrans. He said he likes the simple dosing. He would probably use in opioid naive and opioid experienced. He said he is going to start using because it fits a need - a long acting CIII. He wanted to know who else is writing it. I told him many of the pain docs. Instead of going to 120 tabs/month start patients on Butrans. Explained the initiation dosing. Also let him know about the acceptable use of supplements.
PPLPMDL0020000001	Bedford	OH	44146	6/1/2011	Quick call- Dr Moufawad said he did not have time to talk today because he was so far behind. He did say that he plans to participate in the webinar this evening, so I let him know I would follow-up with him. Reviewed patient education booklet & DVD with Melina (MA).
PPLPMDL0020000001	Akron	OH	44302	6/1/2011	Introduced Butrans and FPI. I asked him if he felt like he had the right type of patients that we had identified when talking about Butrans. He said that he had many different patients and he liked that this gave him an additional option when treating chronic pain.
PPLPMDL0020000001	Parma	OH	44134	6/1/2011	Spoke with Marko (pharmacy manager) & reviewed savings programs & eligibility for Butrans & OxyContin. Also asked if he would be willing to break a carton of Butrans to dispense one patch if he received a script written that way. He said he would do this if he starts to see more prescriptions for it, but as of right now, he only has seen one, so as it stands, he would not be likely to authorize it.
PPLPMDL0020000001	Cleveland	OH	44106	6/1/2011	worked internal medicine-talked to residents briefly about Butrans,giving Butrans fpi,initiation guide and Butrans patient information booklets (1-2pm)work pain management dept (2-4pm)- see call notes on dr sahalg and dr
PPLPMDL0020000001	Warrensville Heights	OH	44122	6/1/2011	Spoke with Adrienne (MA) who said Dr Zivic was not in today. Reviewed savings cards for Butrans & OxyContin & also discussed eligibility requirements, including letting her know that they cannot be used for patients with any type of government insurance, including Medicare & Medicaid. She said Dr Zivic does see a lot of Medicare patients but also does have some patients with commercial insurance as well. Adrienne said she does not get very involved in prescriptions. She said she usually passes those phone calls & messages on to Michele.
PPLPMDL0020000001	Lyndhurst	OH	44124	6/1/2011	Asked doc what triggers her to prescribe a Butrans for a particular patient. She said she would consider a patient that had daily migraine but not progressed to vicodin or percocet. She does not have many of them but they are most females 18-55. She has not had many AEs but did have a patient titrated back down to 5mcg because of somnolence. Showed her the incidence in the FPI. She will continue to prescribe for the right patient. She was still good on oxycontin savings cards.
PPLPMDL0020000001	Akron	OH	44320	6/1/2011	I asked Misty about her success with Butrans therapy. She was busy and did not remember much about the patients but said she had not heard back from them. She did mention to Dr. Bonyo and Duppsadt that she was having success and wanted to continue to go to it more.
PPLPMDL0020000001	Westlake	OH	44145	6/1/2011	Met Dr at Avon Lake CCF location. He is FM. He asked about Butrans and I reviewed the key messages. I asked if he treats a lot of chronic pain in his practice. He said that he does not prescribe chronic opioid therapy unless a patient has cancer. He said he is more into preventative medicine. I asked what he does when his patients complain of chronic pain and he said he will give them supplements or try to get to the root of the problem.
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	6/1/2011	Talked to the pharmacist Steve who told me that he had gotten some Rx's from Dr. Lababidi. I explained the message that I was focused on when talking to the physicians about Butrans and explained steady state.
PPLPMDL0020000001	Munroe Falls	OH	44262	6/1/2011	Quick call. Dr Kolaczewski said she was too busy and asked if I could come by her next week. I left some material for her to review and asked if we could discuss it on my next visit and she said yes.
PPLPMDL0020000001	Cleveland	OH	44113	6/1/2011	I talked to aurora,MA,to dr bohl who was on vacation this week,about patients he started on Butrans,Aurora said he told me about on 4/28th that had systemic reactions were not the only one's,she thinks there were a couple more patients with hives after starting Butrans,i reported all of the AE information below and called Purdue medical services,Aurora said dr had her pull all of the patient charts,take all Butrans patient savings cards,booklets out of exam rooms as he doesnt want his patients knowing anything about Butrans until this is resolved,Aurora said she thinks Purdue contacted dr as he was filling out information and faxing it to someone,but she wasnt sure if it was Purdue,Aurora said with dr being gone all week,next week is bad to see him to discuss this but she booked lunch on june 13th so i can talk to him then
PPLPMDL0020000001	Lakewood	OH	44107	6/1/2011	Quick follow up, I said Dr. last week you said you just keep forgetting about Butrans so here is your weekly reminder. I asked if he would prescribe Butrans this week and he agreed. Reminder about OxyContin as an option when patients come to him taking more than 40mg of vicodin.
PPLPMDL0020000001	Cleveland	OH	44195	6/2/2011	I asked dr who the appropriate patient was for Butrans? dr said he couldnt remember,but did remember that Butrans was a CIII and a patch,i reviewed Butrans 5 core messages with dr,i showed dr Butrans initiation guide,discussed appropriate patients and asked dr if he had patients he could think of that would benefit from Butrans? dr said yes,he thinks some patients would like wearing a patch and dosing once a week is sometimes easier for patients who dont like taking their pills around the clock,i asked dr to think of 2 patients like that,to start on Butrans,dr agreed,we discussed Butrans formulary coverage,i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44195	6/2/2011	I asked Anne who she thought the appropriate patient was for Butrans? Anne said patients taking vicodin or percocet that arent controlled or asking for more pills,i showed Anne Butrans visual aid,appropriate patient section and we talked about patients taking tramadol that arent controlled and asking for something different,to consider Butrans for those patients,Anne said she would consider Butrans for some patients but as she's mentioned to me in past,she always talks to dr stanton-hicks about each patients medication changes,Anne said the once weekly dosing option of Butrans and the fact its a patch are 2 benefits in her eyes,i asked Anne to think of 2 patients,as we discussed,that arent getting pain relief from their tramadol,to start on Butrans,Anne agreed,i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44195	6/2/2011	I asked dr who the appropriate patient was for Butrans? dr said he didnt know off hand and didnt know if he would be starting anyone on Butrans as he's trying to get his patients off opioids,dr said he prefers to give injections,stimulators,other surgical procedures instead of giving patients narcotics,i asked dr if he had any patients taking around the clock vicodin or percocet,for their chronic pain? dr said yes,he does,i asked dr if those patients ever say their vicodin or percocet isnt lasting long enough or not giving them enough pain relief? dr said yes he hears that occasionally but he usually will explore surgical procedures for these patients,i asked dr to consider Butrans for those patients,if they are appropriate and showed dr Butrans initiation guide to discuss tapering of vicodin and percocet and initiation of Butrans,dr said he'll think about it and i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	6/2/2011	i discussed Butrans 5 core messages,fpi,initiation guide,patient information booklet and formulary coverage with dr dr said he hadnt heard anything about Butrans but liked that it was a patch and dosed once a week,dr said he has a lot of chronic pain patients in family medicine that are taking tramadol around the clock for their chronic pain but not getting pain relief so Butrans could be an appropriate option,dr wanted to see the demo of Butrans,so i showed dr and he asked to keep one demo as he had some patients in mind to try Butrans in and let me know how it goes,we talked about appropriate patients as i showed dr Butrans initiation guide,we discussed proper tapering of short-acting opioids and intiation of Butrans,dr said it sounded easy and would try it,i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	6/2/2011	i talked to dr about Butrans 5 core messages,initiation guide,patient information booklet and formulary coverage,dr said he hasnt heard of Butrans but likes that Butrans is a patch and dosed once a week,i asked dr if he has patients taking tramadol,vicodin or percocet,around the clock for their chronic pain that arent getting pain relief? dr said thats all they see,hundreds of patients like that and patients are always wanting more and more pills,i asked dr to consider starting a couple patients,as we discussed,on Butrans instead of refilling their short-acting opioids,dr agreed,dr asked who's covering Butrans? we discussed Butrans formulary coverage,i recommended
PPLPMDL0020000001	Cleveland	OH	44195	6/2/2011	i reviewed Butrans 5 core messages and asked Kathy what were the top 3 things that stuck out the most to her that were critical when deciding if Butrans was appropriate for her patients? Kathy said once weekly dosing,transdermal delivery system of Butrans and the fact Butrans was a patch,i asked Kathy if she has patients taking tramadol around the clock for their chronic pain but not controlled or not getting pain relief? Kathy said yes she see's patients like that every day,but she has to get approval from dr minzter and dr mekhail as she's treating their patients and they havent thought Butrans was an appropriate option for patients yet,i asked Kathy to talk to both doctors about Butrans as an option for patients we discussed,gave Kathy Butrans initiation guide and Kathy said she'll talk to doctors if patients ask for something different,i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	6/2/2011	i talked to dr about Butrans 5 core messages,initiation guide,patient information booklet and formulary coverage,dr said he hasnt heard of Butrans but likes that Butrans is a patch and dosed once a week,i asked dr if he has patients taking tramadol,vicodin or percocet,around the clock for their chronic pain that arent getting pain relief? dr said thats all they see,hundreds of patients like that and patients are always wanting more and more pills,i asked dr to consider starting a couple patients,as we discussed,on Butrans instead of refilling their short-acting opioids,dr agreed,dr asked who's covering Butrans? we discussed Butrans formulary coverage,i recommended
PPLPMDL0020000001	Cleveland	OH	44195	6/2/2011	reviewed 5 core Butrans messages with dr and asked dr what were the most important factors she's considering when looking at Butrans as an option for her patients? dr said she likes that Butrans has a transdermal system,its a patch and dosed once a week,dr said she hasnt thought about Butrans as most of her patients like taking their tramadol and dont really ask for anything else,except for more pills,i asked dr to consider Butrans for patients taking tramadol around the clock,for their chronic pain,but arent getting pain relief,dr asked who's covering Butrans? we discussed formulary coverage for Butrans and i showed dr Butrans patient savings cards,i asked dr to think of 2 patients,as we discussed,that could benefit from trying Butrans,dr said if patients ask for something different,she'll consider Butrans,i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	6/2/2011	i discussed Butrans 5 core messages with dr,showed Butrans fpi,initiation guide and Butrans patient information booklet,dr said she liked that Butrans was transdermal,dosing once a week is easier for a lot of patients and CII's are much easier if she can call Butrans in for refills,i asked dr if she had patients taking around the clock tramadol,vicodin or percocet,for their chronic pain,but not getting pain relief? dr said yes,i told dr those are the patients,if appropriate,she can consider starting on Butrans,we discussed tapering of short-acting opioids and initiation of Butrans and dr asked who covers Butrans? i asked dr who are the biggest payers here and dr said medicaid and patients on sliding fee scale at metrohealth,apple program,i talked to dr about Butrans formulary coverage and asked her to think of 2 patients that could benefit from Butrans,dr said she will and appreciated information,i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	6/2/2011	i discussed Butrans 5 core messages with dr,showed Butrans fpi,initiation guide and Butrans patient information booklet,dr said she liked that Butrans was transdermal,dosing once a week is easier for a lot of patients and CII's are much easier if she can call Butrans in for refills,i asked dr if she had patients taking around the clock tramadol,vicodin or percocet,for their chronic pain,but not getting pain relief? dr said yes,i told dr those are the patients,if appropriate,she can consider starting on Butrans,we discussed tapering of short-acting opioids and initiation of Butrans and dr asked who covers Butrans? i asked dr who are the biggest payers here and dr said medicaid and patients on sliding fee scale at metrohealth,apple program,i talked to dr about Butrans formulary coverage and asked her to think of 2 patients that could benefit from Butrans,dr said she will and appreciated information,i recommended Senokot-S
PPLPMDL0020000001					

PPLPMDL0020000001	Cleveland	OH	44109	6/2/2011	i discussed Butrans 5 core messages with dr,showed Butrans fpi,initiation guide and Butrans patient information booklet.dr said she liked that Butrans was transdermal,dosing once a week is easier for a lot of patients and CIII's are much easier if she can call Butrans in for refills.i asked dr if she had patients taking around the clock tramadol,vicodin or percocet,for their chronic pain,but not getting pain relief? dr said yes,i told dr those are the patients,if appropriate,she can consider starting on Butrans,we discussed tapering of short-acting opioids and initiation of Butrans and dr asked who covers Butrans? i asked dr who are the biggest payers here and dr said medicaid and patients on sliding fee scale at metrohealth,apple program,i talked to dr about Butrans formulary coverage and asked her to think of 2 patients that could benefit from Butrans,dr said she will and appreciated information.i recommended Senokot-S

PPLPMDL0020000001	Cleveland	OH	44109	6/2/2011	i talked to dr about Butrans 5 core messages,fpi,initiation guide,patient information booklet and formulary coverage.dr said she hasnt heard of Butrans but liked that it was a transdermal delivery system and dosed once a week.i asked dr if she had patients taking around the clock tramadol,vicodin or percocet for their chronic pain? dr said yes and usually they are asking for more pills and it never stops.dr said they are careful as to who gets narcotics in family medicine but she thinks Butrans could be an option for those patients taking short-acting opioids but not getting pain relief from them.i asked dr to think of 2 patients,as we discussed,to start on Butrans,i showed dr Butrans initiation guide,discussed tapering and initiation of Butrans.dr said she will review all of the information again and will think of a few patients to try Butrans.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	6/2/2011	i talked to dr about Butrans 5 core messages,initiation guide,patient information booklet and formulary coverage.dr said he hasnt heard of Butrans but likes that there is an option for his chronic pain patients that arent controlled with their short-acting opioids,we talked about patients taking tramadol around the clock for their chronic pain that arent getting pain relief,to consider starting on Butrans,we talked about tapering of short-acting opioids and initiation of Butrans.dr said he can think of a few patients who can benefit from trying Butrans but asked what the insurance coverage was? we discussed Butrans formulary coverage.i asked dr to think of 2 patients,as we discussed,to start on Butrans,dr agreed and i recommended senokot-S
PPLPMDL0020000001	Barberton	OH	44203	6/2/2011	Dr. Patel said that he started a few new patients just last week and that he really likes the therapy. He said he would continue to initiate therapy for the appropriate patients. I asked if he had any coming in this afternoon and he said he would check.
PPLPMDL0020000001	Cleveland Heights	OH	44118	6/2/2011	I discussed the appropriate patients for Butrans, Oxycontin, and ryzolt. I positioning Butrans after tramadol. I explained the 7 day delivery and the CIII status. He asked me to leave some info so he could read it later. Nothing more learned.
PPLPMDL0020000001	Cleveland Hts	OH	44118	6/2/2011	I reminded doc that of his expressed interest in Butrans and that he wanted me to keep reminding him of the appropriate patient. He said he has not started a patient yet but he wanted to be sure he had savings cards. I pointed them out in his newly rearranged sample/voucher cabinet. He just said "good, sounds like a plan"
PPLPMDL0020000001	Barberton	OH	44203	6/2/2011	Dr. Minich said that she is still not tried Butrans therapy and wants to continue to learn more about it before prescribing it. I asked if she felt comfortable with the molecule buprenorphine and she said she did. She mentioned that she is still prescribing OxyContin for the appropriate patients.<font color=blue><b>CHUDAKOB's need to know about it before she is willing to prescribe it</font color=green><b>LAPMACA's response on 06/14/2011</font>I will ask her next time I<font color=blue><b>CHUDAKOB added notes on 06/15/2011</font>She apparently does not feel comfortable with buprenorphine or Butrans itself if she said she needs to learn more about it. Your challenge is to find out why?
PPLPMDL0020000001	Independence	OH	44131	6/2/2011	Dr Faيمان said that he has indeed put a few patients on Butrans. I asked what type of patients he was selecting. He said that the have been patients with chronic pain (2 have arthritis, 1 with pain from multiple failed surgeries), who were taking low dose Vicodin or Percocet around-the-clock daily. He also added that he is selecting patient with commercial insurance. I told him it sounds like he is choosing wisely. He said that he will continue to identify patients like this to gain more clinical experience. He said that as he gets more patients on Butrans, as he starts getting positive feedback, he will start using it more & more. He said that some people are "patch people" & others do not like using them. Also discussed OxyContin q12h for appropriate patients beyond Butrans. He said that he was finally able to get a patient back on OxyContin who's insurance had suddenly stopped covering it. He said the patient is happy to have his pain relief back.
PPLPMDL0020000001	Cleveland	OH	44109	6/2/2011	i talked to Mike,Pharmacist and Chris,Pharmacist,about Butrans stocking and they said Rob,Pharmacy manager,did order Butrans so they have it in stock as some physicians have prescribed,neither one could look up in their system who has prescribed but said if they see more scripts they will let me know.Chris,pharmacist,said he thinks they are from pain management doctors,but wasnt positive.we discussed Butrans 5 core messages and i asked both pharmacists,what they felt were the most important factors in a long-acting opioid and both of them said as it relates to Butrans,CIII calling in refills is a benefit,once weekly dosing and transdermal delivery of Butrans.we talked about appropriate patients to start on Butrans and i showed Butrans initiation guide to both pharmacists,discussed tapering of short-acting opioids and initiation of Butrans.we discussed Butrans formulary coverage.
PPLPMDL0020000001	Parma	OH	44129	6/2/2011	Dr Paat said he had not put any patients on Butrans yet. He said he did not remember. Reviewed with him dosing, appropriate patient type/positioning, CIII, & abuse/addiction potential. He asked about adverse events. I showed FPI section 6. He asked where patients apply Butrans & how they should apply it. Went over patient information booklets which he said he wanted a few of so that he could give them to patients when prescribing Butrans. He said that some patients truly need pain medications & that he will prescribe Butrans for appropriate patients. He asked about managed care coverage & cost- i reviewed formulary grid & went over savings cards/eligibility. HE asked how Butrans compares with Vicodin with efficacy. Told him we have no comparative data. He said again that he would prescribe Butrans. I asked if he was thinking of specific patients & he said yes. Discussed OxyContin q12h as an option for patients beyond Butrans 20mcg.
PPLPMDL0020000001	Parma	OH	44129	6/2/2011	Dr Tolentino said she has not put anyone on Butrans yet but did not know why. Reviewed dosing, appropriate patient type/positioning, CIII & abuse/addiction potential. She said she is trying to prescribe fewer opioids but that she knows that some patients really do need something more than their current therapy. She asked how it compares to Duragesic. I told her we have no comparative data. Asked her to think of more "moderate" pain patients & showed initiation guide page 6 to help her position Butrans better. She asked about managed care coverage- reviewed formulary grid & discussed savings cards/eligibility. Also discussed application, heat warning, & patient information booklets. She said she would prescribe Butrans for appropriate patients. I asked if she could think of one or two specific patients who she thought could benefit from Butrans & she said yes. Discussed OxyContin as an option for appropriate patients beyond Butrans 20mcg.
PPLPMDL0020000001	University Hts	OH	44118	6/2/2011	Window call....reviewed the Butrans patient indication, positioning, and CIII status and 7 day delivery. I asked him if he sees a place for such a product in his practice. He said maybe, for the right patient. I asked him if I could schedule an appt with him to discuss further. He said sure. I scheduled with JoAnn for 6/15.
PPLPMDL0020000001	Cleveland	OH	44195	6/2/2011	worked pain management dept-see call notes and left Butrans fpi,initiation guide and Butrans patient information booklet with my business card for Dr.Vrooman,Dr.Mekhal,Dr.Stanton-Hicks,Mae,NP for Dr.Cheng's patients and Dr.Covington as i couldnt see these physicians. worked rheumatology dept-left Butrans fpi,initiation guide and patient information booklet for Dr.Calabrese,Dr.Long,Patty Paccos,PA and Dr.Chatterjee,as i couldnt see doctors and had to leave information with my business card for them to review information and if interested,they will contact me.
PPLPMDL0020000001	Akron	OH	44333	6/2/2011	Linda said she was having success with the few patients she had started on Butrans. I asked if she had started any new patients on therapy and she said she had not but because she has had success will keep it in mind.
PPLPMDL0020000001	Parma Heights	OH	44129	6/2/2011	Reviewed savings programs for Butrans & OxyContin with pharmacist Larissa. Also discussed how she can print Butrans savings cards on Butrans.com. I asked her what types of managed care are most popular in the area & she said that she gets a lot of Medicare & commercial insurance. She said that she does get some Medicaid, but not a lot. Reviewed eligibility requirements for savings programs, reminding her that patients with government insurances are not eligible.
PPLPMDL0020000001	Berea	OH	44017	6/2/2011	I asked Dr to start a patient on Butrans instead of going to vicodin around the clock. He said he would and that he is starting to prescribe Butrans.
PPLPMDL0020000001	Cleveland	OH	44109	6/2/2011	worked dept of family medicine-lunch with residents and attending physicians-see call notes
PPLPMDL0020000001	Highland Heights	OH	44143	6/2/2011	Quick call.....i reviewed the Butrans formulary coverage and that Butrans will be difficult to get for medicare patients. Gave him a formulary grid for both Butrans and oxycontin explaining that oxycontin might be appropriate after 20mcg of Butrans.
PPLPMDL0020000001	Cleveland	OH	44109	6/2/2011	i talked to dr about Butrans 5 core messages,initiation guide,patient information booklet and formulary coverage.dr said she hasnt heard of Butrans but likes that Butrans is a patch and dosed once a week.i asked dr if he has patients taking tramadol,vicodin or percocet,around the clock for their chronic pain that arent getting pain relief? dr said thats all they see,hundreds of patients like that and patients are always wanting more and more pills.i asked dr to consider starting a couple patients,as we discussed,on Butrans instead of refilling their short-acting opioids,dr agreed.dr asked who's covering Butrans? we discussed Butrans formulary coverage.i recommended
PPLPMDL0020000001	Highland Heights	OH	44143	6/2/2011	Window call.... brief review of the Butrans patient type and the savings cards. Nothing learned.
PPLPMDL0020000001	Parma	OH	44129	6/2/2011	Spoke with pharmacist Heath & reviewed Butrans savings program/e-voucher. Also went over OxyContin savings cards & reminded him of eligibility requirements for savings programs. I asked him what managed care plans he sees the most of in this location & he said he sees a little Medicaid, some commercial insurance, & mostly Medicare plans.
PPLPMDL0020000001	Parma	OH	44129	6/2/2011	Dr Roheny said that he actually did put a patient on Butrans & the patient is doing well on it. I asked what made him choose the patient & he said that the patient was on 4 Vicodin per day chronically & had commercial insurance. I told him it sounded like he chose an ideal candidate & asked if he has more like that patient that he can think of so that he can expand his clinical experience with Butrans. He said he does. Discussed initiation of Butrans on 5mcg or 10mcg dose depending on what their current opioid therapy/dose is. Also discussed titration ability every 3 days to a max 20mcg. Gave him Senokot-S & Colace samples & recommended Senokot-S for opioid-induced constipation, discussing dual mode of action.
PPLPMDL0020000001	Westlake	OH	44145	6/2/2011	I asked Dr if he has thought about initiation Butrans for a patient who is taking 2-3 5mg hydrocodone per day instead of increasing the dose. He said this sounds like a good idea instead of giving the patients more pills. We discussed that he can still give short acting analgesics as supplemental with Butrans. He said he will start doing this for BWC and commercial. He said that he was able to get a prior auths through for Butrans for Medicaid and he will let me know how the patient is doing. We discussed OxyContin is still a long acting option. He asked about the generics for OxyContin and I let him know there was a limited amount available.
PPLPMDL0020000001					

	Westlake	OH	44145	6/2/2011	We reviewed our last conversation in that he is having a hard time finding the right patient. He said that many of his patients are already on higher doses of medication. I asked if he has any patients who are taking tramadol around the clock and are asking for more. He said he could see prescribing Butrans in that case. He said he would not switch them if they are only taking a few short acting a day and doing well, I supported this and said he can initiate Butrans when those short acting are not controlling the pain and he agreed. We discussed OxyContin for those other patients taking over 40mg of hydrocodone per day.<font color=
PPLPMDL0020000001	Cleveland	OH	44109	6/2/2011	asked him to covert patients when short acting are not controlling their pain. Thanks.<font color=blue><b>CHUDAKOB's query on 06/09/2011</b></font>looks like your next call objective could have been your close on this call.<font color=green><b>HOLUBA's response on 06/14/2011</b></font>Yes I should have closed for a patient this week after I asked him to covert patients when short acting are not controlling their pain. Thanks.<font color=blue><b>CHUDAKOB added notes on 06/15/2011</b></font>Thanks for your response.
PPLPMDL0020000001	Cleveland	OH	44109	6/3/2011	i reviewed Butrans 5 core messages with dr,asked dr what were the top 3 things he considered most important about Butrans,looking at 5 core messages in visual aid? dr said once weekly dosing, Butrans being a patch and the fact its a CII so he can call in refills makes it easier than a CII.we talked about appropriate patients to start on Butrans,dr said he hasnt thought about Butrans and hasnt had anyone ask for something different lately as his patients like taking their pills.i asked dr if patients ever call office earlier every month,as that might be an indication a long-acting opioid is more appropriate,dr said that does happen and i made a good point i asked dr to consider 2 patients,that arent controlled on their vicodin or percocet,and start them on Butrans.dr asked about insurance coverage so we discussed formulary coverage.we talked about OxyContin being an appropriate option for patients,conversion guide looking at 7 tablet strengths and formulary coverage for OxyContin.
PPLPMDL0020000001	Cleveland	OH	44115	6/3/2011	i talked to dr about Butrans 5 core messages,appropriate patients to start on Butrans showed Butrans initiation guide and we discussed formulary coverage.dr said she does have a lot of patients with chronic pain taking tramadol so Butrans would be a great option.dr said she likes that Butrans is once a week and is a patch so its easy for patients.dr asked about starting dosage strengths of Butrans,i showed initiation guide again and Butrans patient information booklet with application dvd to help dr educate patients on Butrans,dr said she'll think of a few patients that would be interested in starting on a patch and try Butrans in them.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44104	6/3/2011	i talked to dr about 5 Butrans core messages and asked dr what were the top 3 things looking at these messages that were important to her when deciding if a long-acting opioid was appropriate for patients. dr said she liked that Butrans was a once weekly dosing option and transdermal delivery.i asked dr if Butrans being a CII,single entity opioid,was important? dr said CII was easier for her as she can have staff call in refills.i asked dr if she had chronic pain patients taking vicodin around the clock but still not getting pain relief? dr said yes,hundreds of those patients.i showed dr Butrans initiation guide and asked her to consider 2 patients,on vicodin but not controlled to start on Butrans and think of commercial plan patients so they can use Butrans patient savings cards,dr said she would do that and we discussed Butrans patient booklet with application dvd to assist dr in educating patient on Butrans.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	6/3/2011	i reviewed 5 Butrans core messages with dr,she said that Butrans is a great option as a patch and likes the once weekly dosing but she hasnt had any patients be willing to take a patch and stop their pills.i told dr she can still give immediate release opioids with Butrans,i showed dr Butrans fpi,noting this information, and i asked dr to think of 2 patients who are taking tramadol around the clock for their chronic pain and not getting pain relief, and start them on Butrans knowing she can still give some tramadol if she chooses to or non-opioids with Butrans.dr said ok she'll think about it.dr asked about insurance coverage for Butrans on medicaid and medicare,we discussed all formulary coverage for Butrans.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	6/3/2011	i reviewed 5 Butrans core messages with dr,he said he hasnt seen any patients that he thought were appropriate to start on Butrans and his biggest concern is insurance coverage.i told dr if insurance wasnt an issue,what is it about Butrans that he likes for his patients? dr said he likes that Butrans is once weekly dosing and is a patch,instead of his patients taking short-acting opioids around the clock and still complaining that they dont get pain relief we talked about patients that are taking vicodin around the clock,but not getting pain relief,to try Butrans and focus on commercially insured patients and BWC patients.dr said ok he'll think about it and consider 1 or 2 patients to try Butrans in and let me know.i recommended Senokot-s
PPLPMDL0020000001	Beachwood	OH	44122	6/3/2011	Quick call- Reviewed Butrans dosing, appropriate patient type, & managed care with Jennifer. She asked for another initiation guide so that she could reference it. She said she did not have time today to have a discussion but that she appreciated the information.
PPLPMDL0020000001	BEACHWOOD	OH	44122	6/3/2011	Sandy (pharmacist) was not available, so I spoke with the technician & reviewed Butrans appropriate patient type & delivery system. She said she has seen it on their shelf but does not think they have had any prescriptions come in for it. Reviewed with her savings programs for Butrans & OxyContin. She said she would give me information to Sandy.
PPLPMDL0020000001	Cleveland	OH	44109	6/3/2011	i reviewed Butrans 5 core messages with dr,discussed appropriate patients to start on Butrans,dr said he hasnt thought about Butrans as he doesnt see a lot of patients on narcotics.i asked dr if he has patients taking vicodin around the clock for their chronic pain that arent getting pain relief? dr said he's sure there are some,i told dr thats where he can consider Butrans,i showed dr Butrans initiation guide and asked him to start 2 patients on Butrans instead of refilling the vicodin for a few patients,dr said if patients ask for something different he'll consider Butrans.dr asked about insurance coverage so we discussed Butrans formulary coverage. i recommended
PPLPMDL0020000001	Independence	OH	44131	6/3/2011	Spoke with Toni who was filling in for Jill today. She said Dr Pai was only coming in for a couple of hours today & that his schedule was full, so I should come back next week when it is less hectic. She checked his schedule & said next Friday morning would probably be my best opportunity to see him. Reviewed Butrans indication, delivery system, & appropriate patient type with Toni. She said that she remembers hearing something about it at the other location where she normally works with Dr Pai.
PPLPMDL0020000001	Cleveland	OH	44104	6/3/2011	i reviewed 5 Butrans core messages and talked to dr about what he felt were the most important factor when considering a long-acting opioid for his patients.dr said side effects and contraindications.we talked about Butrans AE's,contraindications and who's appropriate for Butrans,i showed dr Butrans initiation guide.i asked dr if he would consider his patients taking tramadol that arent getting pain relief,to start on Butrans? dr said he hasnt thought about them but that was a good point,instead of going to vicodin or percocet.i asked dr to consider 2 patients as we discussed to start on Butrans and not refill their tramadol,dr agreed.we discussed formulary coverage for Butrans.i showed dr OxyContin visual aid,discussed appropriate patients for OxyContin,7tablet strengths available and OxyContin formulary coverage.
PPLPMDL0020000001	Garfield Hts	OH	44125	6/3/2011	Quick call- Reviewed appropriate patient type for Butrans. Dr Sadowski asked me if Butrans is covered on Medicaid. I told him it would require prior authorization. He told me that the only patients who he has that fit the description are Medicaid patients & then walked into a room. Also spoke with Deena (MA) & asked how frequently she gets calls from patients requesting increases or changes in their chronic pain medications. She said she probably gets 5-10 calls & faxes per week. I asked if they are all Medicaid patients & she said no. I asked her if she would help remind Dr Sadowski of Butrans for appropriate patients when she gets these calls, especially those patients with commercial insurance & she agreed to do this. She said that usually that is what it takes to get him to start prescribing newer medications. She said she knows that he has a lot of patients who could benefit from Butrans.<font color=blue><b>CHUDAKOB added notes on 06/09/2011</b></font>Nice job going to the MA to verify what the physician said as well as asking her to take action.
PPLPMDL0020000001	Fairlawn	OH	44333	6/3/2011	Quick call. Met Dr. Parisi at the window and asked if he had any failures with Butrans since it does not look like he is calling in refills. He said that as far as he knew patients were responding well and he would continue to keep it in mind for the appropriate patients.
PPLPMDL0020000001	Cleveland	OH	44104	6/3/2011	i reviewed Butrans 5 core messages with dr,discused appropriate patients to start on Butrans,dr said she has some patients taking Vicodin and percocet that she knows are always asking for more pills because their medication isnt lasting long enough.we talked about proper tapering of short-acting opioids and initiation of Butrans.i asked dr to think of 2 patients on vicodin or percocet,not getting pain relief that she can start on Butrans.dr said she will remember Butrans and asked about insurance coverage.we discussed Butrans formulary coverage and i recommended Senokot-S
PPLPMDL0020000001	Beachwood	OH	44122	6/3/2011	Dr Warren said that he does have a patient he put on Butrans. I asked him to tell me about the patient & he said the patient was on short-acting around-the-clock opioids. I asked what type of feedback he has received & he said none yet, so he considers that good. I asked if he would continue to choose more patients to switch to Butrans & he said yes. I asked what he liked about Butrans. He said he likes that it is a long-acting CIII. He said one of the things he likes is that it gives a steady/constant drug delivery & is not "as strong" as fentanyl. I reminded him that it still carries abuse/addiction potential as it is an opioid. He said he understands. I asked him to be just as cautious in prescribing Butrans as he would be with any other opioid. He said he would. Reviewed managed care coverage & savings program. Also reminded him of OxyContin q12h for appropriate patients beyond Butrans. Spoke with nurse Donny who takes the phone calls from patients about medications.
PPLPMDL0020000001	Cleveland	OH	44114	6/3/2011	i asked Joel,Pharmacy Manager,if he has seen any Butrans scripts here? Joel said no they havent seen anything.we discussed 5 Butrans core messages and i asked Joel what did he think the top 3 most important things were about Butrans,for patients? Joel said once weekly dosing,transdermal delivery and doctors will like that Butrans is a CII and can call in refills.i asked Joel if he would recommend Butrans to patients,if they arent getting pain relief with their short-acting opioids? Joel said he didnt have anything to give them so i gave Joel Butrans patient information booklets that patients could read and show their doctor,Joel liked that idea and took some and agreed to keep Butrans in mind for some patients.i recommended Senokot-S
PPLPMDL0020000001	Fairlawn	OH	44333	6/3/2011	i asked Dr. Domdera if he was any closer to prescribing Butrans now that it has been out for a while. He said that he really liked the concept and had some patients that made him consider Butrans therapy but he had not done it yet.
PPLPMDL0020000001	Cleveland	OH	44109	6/3/2011	i reviewed Butrans 5 core messages with dr,asked dr what were the most important things when he saw these 5 core messages(used visual aid for discussion)dr said once weekly dosing and Butrans being a patch.i asked dr if he has had any patients on around the clock tramadol tell him they arent getting enough pain relief? dr said no,not lately,most of his patients do physical therapy,acupuncture,other alternative methods for pain relief as dr doesnt like to write a lot of narcotics.dr said if he has any patients tell him they arent getting pain relief with their tramadol,he'll consider Butrans.i showed dr Butrans initiation guide and discussed Butrans formulary coverage.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	6/3/2011	worked pm&dr dept-see call notes, worked rheumatology dept-left Butrans fpi,initiation guide,formulary grid and patient information booklet and my business cards for Dr.Ballou and dr.Magrey as i couldnt see them this am;follow-up next week with Linda,RN,to book lunches for the rest of the year in rheumatology dept.
PPLPMDL0020000001	Cleveland	OH	44103	6/3/2011	i talked to Amol,Pharmacist,about Butrans stocking and who they are seeing scripts from.Amol said he couldnt look anything up in computer but does know they have gotten a few scripts from UH and Cleveland Clinic doctors.i asked Amol if he could focus his discussions with patients on the application and rotation of Butrans and showed Amol the Butrans patient information booklet with this information,Amol said he would do that.i asked Amol if he would recommend Butrans to doctors,if patients tell him that their short-acting opioids arent giving them pain relief? Amol said it depends on the physician,some doctors he can do that and others he cant,but he will keep that in mind.i recommended Senokot-S
PPLPMDL0020000001	Beachwood	OH	44122	6/3/2011	Spoke with Shelly & asked about area managed care plans. She said they see mostly Medco & Caremark and also Medicare Part D plans. She said she thinks she maybe has 10 customers with Medicaid. She said she has not had any Butrans activity since the initial prescription they filled. I asked what her thoughts were on Butrans. She said that she thinks it is a great idea & that it has a lot of potential, but that it can be difficult to switch patients from short-acting around-the-clock opioids to long-acting medications because people like to have the "control" over being able to take medication when they feel pain. She said she thinks it is largely psychosomatic.
PPLPMDL0020000001					Reviewed FPI 2.4 & discussed ability of patients to take short-acting medications for supplemental analgesia. She said she thinks it will come down to how well physicians are educating patients.
PPLPMDL0020000001	Akron	OH	44312	6/3/2011	Quick call. I asked Dr. Smith if he had an opportunity to prescribe Butrans and he said he had not. No new info learned.

	Beachwood	OH	44122	6/3/2011	I asked Dr Yokiell about his experience & thoughts on Butrans since it seems his initial excitement about Butrans has faded. He said that he had a few get pushed back from insurance. I asked him if managed care didn't exist, if there was anything clinically holding him back. He said it honestly is a matter of comfort level with buprenorphine. He said he has not used buprenorphine like many anesthesiologists have, so he is not very comfortable with the molecule. I asked if prescribing it for more patients to give him more feedback would bolster his confidence & he said yes, but also that prescribing Butrans takes more thought for him since he is not used to it yet. Presented initiation guide & asked what an example of a typical dose of opioids is for his patients. He said 4-5 Percocet per day. Showed pg 6 & walked through initiating Butrans & discussed supplemental analgesia (opioid or non-opioid), titration, & managed care. Discussed OxyContin for patients beyond Butrans.
PPLPMDL0020000001	Warrensville Heights	OH	44122	6/3/2011	Quick call- caught Dr Brooks at the window while speaking with his medical assistant. He said he didn't have time to talk today but thanked me for the visit. I let him know I would schedule an appointment for us to sit down to discuss Butrans in more depth & he said that was a good idea.<font color=blue><b>CHUDAKOB's query on 06/09/2011</b></font>Was this really a call? Did you discuss anything relating to Butrans with the Dr.<font color=green><b>APSEGAS's response on 06/13/2011</b></font>Nothing in depth or clinical. Only that I was there to continue our Butrans discussion. He told me he didn't have time today & said to schedule something so we could talk about it. I set up a breakfast later this month to do that.<font color=blue><b>CHUDAKOB added notes on 06/14/2011</b></font>This probably should not be considered a call. If you mentioned any type of information relating to Butrans, then that is OK. If not, then it probably should not be considered a call. Thanks for the clarification!
PPLPMDL0020000001	Akron	OH	44312	6/3/2011	I let the pharmacist know the message I was giving to the physicians in the area and explained the ideal type of patient for Butrans. I explained steady state and prepared him for patient call backs within the first 72 hours.
PPLPMDL0020000001	Akron	OH	44319	6/3/2011	I discussed the most ideal type of patient with Dr. Katrji including opioid naive patients and asked if he treats many of those patient types. He said he did and that he liked the concept of Butrans. I asked him what he liked and he said the fact that it was a schedule 3 and a LAO. He said he would further review the info that I had left.
	Cleveland	OH	44109	6/6/2011	I reviewed Butrans 5 core messages with dr,j asked dr what were the top 3 things he felt were critical to consider when looking at a long-acting opioid? dr said he looks at side effects,efficacy and cost of a drug.we talked about side effects of Butrans,i showed dr Butrans visual aid for discussion,we talked about clinical trials of Butrans addressing efficacy of Butrans and i showed dr Butran formulary grid and discussed Butrans patient savings card for commercially insured patients.i asked dr if he had 2 patients with commercial insurance,taking tramadol around the clock for their chronic pain but not getting pain relief,that could benefit from Butrans? dr said yes he has a lot of patients taking tramadol and some of them might be willing to take a patch once a week,so he would have to talk to a few patients and see what happens.we discussed appropriate patients to start on OxyContin,7 tablet strengths available and OxyContin formulary coverage.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	6/6/2011	i talked to dr about 5 Butrans core messages,appropriate patients to start on Butrans,showed Butrans initiation guide and discussed insurance coverage for Butrans.dr said he's been out of town for a few weeks,hasnt started anyone on Butrans,but will keep Butrans in mind. i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	6/6/2011	i talked to Dale,PA,about 5 Butrans core messages,appropriate patients to start on Butrans and asked Dale if he would consider patients taking tramadol around the clock that arent getting pain relief,to start on Butrans.Dale said he would and we discussed Butrans formulary coverage.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44115	6/6/2011	i reviewed 5 Butrans core messages with Lisa,PA,asked her what was important when she looked at this information in Butrans visual aid? Lisa said Butrans being a patch and dosed once a week were 2 benefits she saw as she knows of the 1 patient dr keppler started on Butrans,was a woman taking vicodin around the clock and not getting pain relief so this patient was excited to try Butrans and is doing great without having to take any vicodin. we discussed appropriate patients for Butrans,i showed Lisa Butrans initiation guide and asked her to consider patients taking less than 15mg vicodin,if they arent controlled,and try Butrans,she agreed.we talked about OxyContin being an appropriate option for patients,i showed OxyContin visual aid for discussion and we discussed 7 tablet strengths,conversion guide and OxyContin formulary coverage.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44104	6/6/2011	i reviewed 5 Butrans core messages with dr and asked dr what were a couple factors he considered when looking at a long-acting opioid like Butrans? dr said once weekly dosing is much easier for some patients and Butrans being a patch was good in his eyes for patients dr asked what were the starting dosage strengths as he couldnt remember them,i showed dr Butrans initiation guide and we talked about proper tapering of short-acting opioids and initiation of Butrans.dr asked about BWC coverage for Butrans,we discussed that and dr considering commercial plan patients to start on Butrans.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44130	6/6/2011	Spoke with Danielle (technician) who said the pharmacist was not available. Reviewed with her Butrans & OxyContin savings cards & reminded her of eligiblity guidelines. She said they do give out savings cards when they are able to. Also discussed Butrans dosing, indication, and appropriate patient type. She said she would give my information to the pharmacists.
PPLPMDL0020000001	Cleveland	OH	44115	6/6/2011	i reviewed 5 Butrans core messages with dr,dr said she liked that Butrans was a once weekly dosing option in a patch but she only has a handful of chronic pain patients that take narcotics around the clock and didnt know if Butrans was really going to play a role in her practice.i asked dr if she had patients taking tramadol,that had chronic pain,around the clock? dr said yes she had some like that but majority of patients she treats take tramadol prn and have acute pain.we talked about Butrans indication,i showed dr Butrans visual aid with indication,appropriate patients and dr said she thought Butrans was for patients taking max doses of tramadol.i showed dr Butrans initiation guide looking at patients taking less than 300mg tramadol,to consider Butrans for those patients if their tramadol isnt giving them pain relief.dr said that made sense and she would consider that for a handful of patients.dr asked about Butrans formulary coverage,discussed commercial plans and butrans patient
PPLPMDL0020000001	Parma	OH	44134	6/6/2011	Introduced myself to Dr Mandat who immediately said, "Butrans" when I said I was with Purdue. He said he has 6 patients on Butrans so far & that he feels it is a great product. I asked what type of patients he is using it on & he said that he is the medical director of 5 hospices & has been using it on those patients with success. He said that who of them had been on fentanyl & are now doing well on Butrans after being titrated. He said that he first learned about Butrans in a journal article & has continued to try it on patients because of the results he has gotten so far. Discussed appropriate patient types, managed care, & savings cards for those eligible. He said he really doesn't prescribe many opioids for patients in his practice & does so only for his hospice patients. He was also happy to have Senokot-S & Colace samples- recommended Senokot-S for medication-induced constipation.
PPLPMDL0020000001	Solon	OH	44139	6/6/2011	Spoke with MA's Chrissy & Deborah who said they do not think Dr Zaidi has prescribed Butrans but do not know why. They also said he was too busy to see me today. Reviewed details of June 16th webcast & asked them to give an invitation to Dr Zaidi. Reviewed with them Butrans delivery system & appropriate patient type. They said again that they do not know why he has not written. Also asked them to check their stock on OxyContin savings cards- they did not need more cards.
PPLPMDL0020000001	Cleveland	OH	44115	6/6/2011	i talked to Roman,PA,about 5 Butrans core messages and asked Roman who was the appropriate patient to start on Butrans? Roman said they have 200 patients,monthly,that have chronic pain and take narcotics so he thinks someone taking vicodin or percocet all the time for their pain,but not getting relief,could benefit from Butrans.Roman said he missed the Butrans dinner program and was disappointed as he wanted to speak with other physicians prescribing Butrans and hear real world experience with Butrans.Roman said to tell Ashleigh that he will go to a program in july,if she has 1 then.we discussed Butrans patient information booklet,with application dvd,acting as an educational tool,based on the limited time they have with patients.Roman said he only has a few minutes with patients,as dr keppler can see 60 patients a day like he had scheduled today.we discussed Butrans insurance coverage and Butrans patient savings cards.we talked about OxyContin being an option for patients and who was
PPLPMDL0020000001	Cleveland	OH	44115	6/6/2011	dr asked me what is Butrans? i showed dr Butrans visual aid,discussed 5 Butrans core messages.i asked dr who were the appropriate patients he would consider for Butrans? dr said patients taking 6-8 Vicodin a day.i asked dr what strength of vicodin he was referencing? dr said 5mg Vicodin.i asked dr if he would consider Butrans for patients taking 1-2 vicodin a day,so less than 15mg hydrocodone? dr said he might but he's thinking more about patients taking 6-8 vicodin a day as he gets concerned with patients taking too much acetaminophen. dr said he's started a few patients on Butrans and 1 of them was a woman taking vicodin,not getting pain relief and tired of taking pills around the clock for her chronic pain,so Butrans was an option she was interested in hearing about.we talked about Butrans patient information booklet with dvd being an educational tool,dr said that would help as they dont have time to explain everything.dr asked about insurance,we discussed commercial plans.i asked
PPLPMDL0020000001	Fairlawn	OH	44333	6/6/2011	Dr. weidman said she had tried the rapt and liked the idea of Butrans because it was a LAO. She said that her biggest obstacle is remembering to write it when the appropriate patient comes in. I asked how many patients she thought she would see this week that she could try it on. She said that she was sure she would see a few and would try harder o remember it.<font color=blue><b>CHUDAKOB's query on 06/16/2011</b></font>Re-read your call note. I beleive it is a mistype, but I cannot figure out what a "rapt" is. In addition did you ask her to clarify what she felt was the appropriate patient? Does she know what the appropriate patient is?<font color=green><b>LAPMACA's response on 06/17/2011</b></font>She does know the right type of patient. I meant that she had tried Butrans therapy...spell check must have changed it. Sorry for the typo.<font color=blue><b>CHUDAKOB added notes on 06/21/2011</b></font>No problem, I just couldn't figure it out.
PPLPMDL0020000001	Fairlawn	OH	44333	6/6/2011	Spoke with Julie who is a floating pharmacist. I explained the core Butrans message and the most appropriate type of physicians that I had been talking to physicians about. She checked and told me that Butrans was not currently stocked and that they could not get it stocked until a Rx came through.
PPLPMDL0020000001	Cleveland	OH	44113	6/6/2011	worked pain management dept
PPLPMDL0020000001	Akron	OH	44333	6/6/2011	Linda said she still had one patient on Butrans therapy and liked it. I asked her why she had not prescribed to any new patients and she said she would and said she was running behind and promised to talk to me at a later
PPLPMDL0020000001	Cleveland	OH	44130	6/6/2011	Dr Fedorok asked me to go over the Butrans dosing with him again. Reviewed initiation guide & dosing for both opioid naive & opioid-experienced patients. He said that it will take repetition with him to remember Butrans details. He said he has no clinical objections to Butrans but that managed care can be an issue. Reviewed with him managed care coverage & savings cards. Also reviewed Ryzolt savings cards & recommended Senokot-S for opioid-induced constipation. Worked with Mary Ann & Maryellen, covering managed care details & savings cards.
PPLPMDL0020000001	Akron	OH	44333	6/6/2011	Dr. Griffiths told me that she had initiated Butrans therapy to 2 patients and had not yet heard back from them. She said that she would continue to use it but said most of her patients are Buckeye patients. I told her to just keep it in mind for her patients who were commercially insured or had BWC.<font color=blue><b>CHUDAKOB's query on 06/16/2011</b></font>Did you ask her about why she chose Butrans for those patients? By asking this you may gain insight into her thought process.<font color=green><b>LAPMACA's response on 06/17/2011</b></font>I will do that!<font color=blue><b>CHUDAKOB added notes on 06/21/2011</b></font>I hope it goes well! I am guessing you will have some good discussion.
PPLPMDL0020000001	Cleveland	OH	44109	6/6/2011	worked rheumatology dept -see call note on dr ballou
PPLPMDL0020000001	Bedford	OH	44146	6/6/2011	Quick call- Dr Moufawad said that he did not do the Butrans webcast as promised & then added that he does not think that he is going to be writing Butrans. I asked him why & he said that none of his patients who he tried it on liked it & he is confused "not sure about it". He said with Butrans being an agonist/antagonist, he just does not want to "mess with it". I told him that Butrans is a partial agonist, not an agonist/antagonist but he just waved & walked into a patient room.
PPLPMDL0020000001	Akron	OH	44333	6/6/2011	I asked Dr. Shah how many patients did not continue on their Butrans therapy. He said there were very few patients that had discontinued and he was still prescribing for new patients. He said that he did not feel comfortable prescribing more than a 10 mcg patch and would convert patients requiring more than that.
PPLPMDL0020000001	Uniontown	OH	44685	6/6/2011	I asked Dr. Stetler about his success with Butrans therapy. He said he very much liked the therapy and had initiated it to several patients and would continue to do so and then walked away from the window.
PPLPMDL0020000001	CLEVELAND	OH	44109	6/6/2011	I talked to Rod,Pharmacist,about 5 Butrans core messages and asked Rod what were a few things he saw in Butrans that were important? Rod said once weekly dosing of Butrans and Butrans being a patch.i asked Rod if he would recommend Butrans to patients by giving them a patient information booklet,if they arent getting pain relief from their short-acting opioids and perhaps Butrans could be an option. Rod said he would do that with some patients. I left a few Butrans patient information booklets and we discussed Butrans formulary coverage.i recommended Senokot-S
PPLPMDL0020000001	Bedford	OH	44146	6/6/2011	Quick call- Caught Dr Haddad in the hallway. He apologized for missing the program last month & requested to be invited to the next available program. He said that he has had good results with Butrans. He said that he finds that most patients do need to be titrated to the 10mcg or 20mcg dose. I told him it sounded like he is doing what he should be, titrating when necessary. Reviewed savings cards for Butrans & OxyContin. Dr Haddad said he would continue to identify Butrans patients.
PPLPMDL0020000001	Parma	OH	44129	6/6/2011	Spoke with nurse, Lynne, in effort to obtain an appointment with Dr Gallagher. She said that he is so extremely busy that he has no time for patients, let alone reps. Reminded her of my initial appointment with Dr Gallagher & let her know that he & I had discussed a follow-up of some sort to discuss Butrans again. She took my information & said she would do her best to get me some time with Dr Gallagher. Reviewed with her Butrans dosing, indication, & delivery system.
PPLPMDL0020000001					

PPLPMDL0020000001	Akron	OH	44333	6/6/2011	I asked Becky if she had initiated Butrans therapy to any new patients and she said she had not. She said that she liked the therapy though but had just not really seen any pain patients. I reminded her what the ideal patient looked like and she committed to using it when she saw the appropriate type of patient.<font color=blue><b>CHUDAKOB's query on 06/16/2011</b></font>Instead of you reminding her, ask her what type of pain patient she is looking for? The more they talk, the more you learn<font color=green><b>LAPMACA's response on 06/17/2011</b></font>thanks<font color=blue><b>CHUDAKOB added notes on 06/21/2011</b></font>You are Dr Ortega retrieved his initiation guide where he had taken some notes on patients for whom he was prescribing & getting feedback for Butrans. He said that he has two very happy patients on it & one who he is not sure about yet (who he told me about last week). He said he has two patients who he would like to get on Butrans who are now on OxyContin. He said both the patients are willing to taper their current dose to a lower level in order to initiate Butrans. Dr Ortega asked me if he would start these patients on 5mcg. I told him that per our FPI & initiation guide, it is recommended that those patients start at the 10mcg dose. Dr Ortega asked what we recommend for supplemental analgesia- I told him we make no specific recommendations, but that in our studies patients were given acetaminophen or ibuprofen. He said he is glad that I come in frequently because he thinks of questions. Reminded him of OxyContin savings cards.
PPLPMDL0020000001	Parma	OH	44129	6/6/2011	Dr. Oyakawa told me that he does not like to write a lot of branded products because he gets too much push back. Once I explained coverage he said he felt more comfortable and would definitely keep it in mind, I went over the most ideal types of patients and he mentioned that he has many of those patients at his practice. I asked if he would try Butrans on 2 of them and he said he would.
PPLPMDL0020000001	Fairlawn	OH	44333	6/6/2011	I reviewed 5 Butrans core messages with dr,asked dr what were important factors to him about Butrans for his patients? dr said he liked once weekly dosing,transdermal delivery and that Butrans is a CII so thats easier for him to call in refills.dr said he hasnt thought about Butrans and couldnt remember insurance and wanted to know if Butrans was covered on Medicaid? we discussed formulary coverage for Butrans.i asked dr to focus on 2 patients,commercial plans,that are taking vicodin around the clock but not getting pain relief and asking for something different,to start them on Butrans.dr agreed.we discussed initiation of Butrans with Butrans 5mcg or 10mcg and patient information booklet.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	6/7/2011	I reviewed 5 Butrans core messages,dr said he remembered that Butrans was transdermal and dosed once a week.i asked dr if he had patients taking vicodin that werent getting pain relief and coming to him asking for something different? dr said yes,all the time,he hears that and Sheila,RN,gets calls from patients on medication refill line.i showed dr Butrans initiation guide,discussed proper tapering of short-acting opioids,initiation of Butrans and then we discussed Butrans patient information booklet as dr said the application dvd in booklet will help educate patients.dr asked about insurance coverage for medicaid patients.we discussed insurance coverage for medicaid and commercial plans and use of Butrans patient savings cards. I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	6/7/2011	Window call.....discussed the appropriate patient for Butrans. He said he does use some transdermals but they tend to be too expensive for some patients. I explained how Butrans has a savings card program similar to oxycotin and that commercially insured patients can save \$40 off their co pay. I gave him a branded FPI for his review. He said he would look at it.
PPLPMDL0020000001	Cleveland	OH	44106	6/7/2011	I reviewed Butrans 5 core messages with Steve,Pharmacy Manager and asked him what were the most important factors he saw in Butrans? Steve said once weekly dosing and Butrans being transdermal were the 2 that stood out.we talked about appropriate patients for Butrans,i showed Steve Butrans initiation guide and i asked Steve if he would recommend Butrans to patients by giving them a patient information booklet? Steve said if patients tell him their pain isnt controlled with their short-acting opioids,he will do that but depends on patient.i asked Steve if he would feel comfortable recommending Butrans,to doctors,if patients tell him they arent getting pain relief from their short-acting opioids? Steve said it depend on doctor and his relationship with doctor but he might be able to do that with some physicians. we discussed Butrans formulary coverage and patient savings cards.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	6/7/2011	Dr. Pitt sat down with me and went through some of his charts in an effort to find an appropriate patient to trial Butrans on and came up with a patient who is currently taking Percocet a couple times a day. He committed to trying Butrans on this patient so he could get some patient feedback.
PPLPMDL0020000001	Parma	OH	44129	6/7/2011	Reviewed with Dr Chagin Butrans indication, dosing, application, positioning, CII, abuse/addiction potential. He said he has forgotten but has no clinical issues with it. I asked where he could see himself using it. He said he has many patients on Vicodin chronically that he could switch. Discussed managed care & savings cards. Discussed OxyContin as an option for appropriate patients beyond Butrans & reviewed Ryzolt q24h & managed care. Also recommended Senokot-S for opioid-induced constipation.Spent time with MA Lynn- went over Butrans appropriate patient type/positioning, dosing, titration, initiation guide, how to write the prescription, CII, abuse/addiction potential. Asked what the best way for me to follow up & remind Dr Chagin more frequently & asked for her help. She committed to recommending Butrans to Dr Chagin for appropriate patients when she identifies them when they call or come in. She also said she would help me gain access to Dr Chagin more frequently.
PPLPMDL0020000001	Euclid	OH	44132	6/7/2011	Opened the call by reminded doctor that he said hee liked the idea of Butrans because it reduces the number of tablets patients take. I reminded him of the appropriate patient type. He said he tried it for a patient that had rotator cuff surgery and is getting good relief. He said the problem is that the cost is too high and its not covered everywhere. He has a lot of workers comp (private and state) and has some medical mutual and medco. I reviewed the grid and expressed the importance of giving savings cards. He needed more. He said he will try to prescribe more as he does not like it when patients ask for percocet or vicodin (for example).
PPLPMDL0020000001	Parma	OH	44129	6/7/2011	Spoke with pharmacist Keith & asked him if he knew their policy on opening boxes of products to dispense, for example, one of four patches. He said they do not do this. Reviewed Butrans & e-voucher system & also discussed OxyContin savings cards. I asked him what insurance plans he sees a lot at this store & he said Humana comes to mind. I asked if he saw mostly Medicare/Medicaid, or commercial plans & he said "a lot" of Medicare
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	6/7/2011	Quick call through window. I asked Dr. Stetler about his success with Butrans and he said he had not heard back from the patient he had tried it on. I asked if they were still on Butrans therapy and he said he was not sure.
PPLPMDL0020000001	Mayfield Heights	OH	44124	6/7/2011	Spoke to Debbie about Butrans patient type - explained the application of the patch and how to properly dispose of it. She said she has not had any issues with the adhesion of the patch. She asked if the patch can be applied anywhere. I explained the 4 sites and how to rotate. I reviewed the managed care and how I spoke with Dr. Laham about the commercially insured patients as appropriate for Butrans.
PPLPMDL0020000001	Cleveland	OH	44195	6/7/2011	I talked to Steve,Assist Pharmacy Manager,about 5 Butrans core messages,asked Steve what were top 3 factors most important about Butrans? Steve said once weekly dosing,transdermal delivery and CII as doctors can call in refills.i asked if Steve would recommend Butrans to doctors,if patients tell them their pain isnt controlled with short-acting opioids? Steve said he might,depends on dr.i asked Steve to focus his discussions with patients,when getting Butrans scrips,on application/rotation section in Butrans patient information booklet.Steve said he would do that.i recommended Senokot-S and left protocol pad
PPLPMDL0020000001	Cleveland	OH	44113	6/7/2011	worked internal medicine physician-dr elbadaway see call note; worked a few more physicians offices in building (dr bhimani, dr gadmack and dr flores but couldnt see these doctors so had to leave Butrans initiation guide,patient information booklet,formulary grid and my business cards for these physicians)
PPLPMDL0020000001	Cleveland	OH	44195	6/7/2011	worked neurology dept - left Butrans fpi,initiation guide,patient information booklet, formulary grid and my business card for Dr.Spears,Dr.Stillman,Dr.Kriegler and Dr.Mays. I also left OxyContin formulary grid and conversion guide for each doctor in neurology. worked rheumatology dept-left Butrans fpi,initiation guide,patient information booklet,formulary grid and my business card for Dr.Calabrese,Betsy Kirschner(NP),Patty
PPLPMDL0020000001	Akron	OH	44310	6/7/2011	I asked Dr. Cremer what he liked best so far about Butrans therapy. He said he liked that his patients seemed to like it and weren't calling back complaining and walked away. Char told me he has been continuing to initiate therapy to new patients, especially BWC patients.
PPLPMDL0020000001	Parma	OH	44134	6/7/2011	Spoke with Nathan (pharmacist) & inquired as to whether they had Butrans stocked. He said that they do have it & that they have a few patients on it. Reviewed savings program/e-voucher which he was very familiar with & also reviewed OxyContin savings cards for those eligible. I asked what his policy was on opening a box of Butrans should they receive a prescription written for one. He said that he has opened a box for a patient, so he will do it if the doctor does not want to switch the prescription, but he did say that they always call the doctor to clarify. I asked if it was Dr Hernandez & he said yes.
PPLPMDL0020000001	C. Falls	OH	44223	6/7/2011	Spoke with Larry. I asked if he had seen any additional movement from Dr. Sables group and he said he had not. They did have Butrans stocked but said they they did expect much from the pain group since they focus mainly on procedures.
PPLPMDL0020000001	Independence	OH	44131	6/7/2011	Quick call- Dr Jack said he still has not "jumped on the bandwagon" for Butrans. I told him he should join the many Butrans prescribers & asked what happened to trying it on the patient he was walking in to see last week when I was in. He said it "didn't work out" & then walked away. I stopped him again by asking him how his stock on OxyContin savings cards was. He did say he could use some more & then walked into a room.
PPLPMDL0020000001	Warrensville Heights	OH	44122	6/7/2011	Spoke with Carol (nurse) who said that Dr Shin was still not seeing reps. She said that Debbie handles that & she is out for vacation until next week. She said that I should call Debbie on Monday to try to get something figured out as to how I may be able to see Dr Shin. Discussed Butrans dosing, delivery system, & savings cards. She said they have enough savings cards for Butrans & OxyContin.
PPLPMDL0020000001	Akron	OH	44304	6/7/2011	Introduced Butrans and FPI. He said that Butrans was an ideal medication for many of his patients currently on a low dose SAO. He committed to trying it on 2 patients.
PPLPMDL0020000001	Mayfield Heights	OH	44124	6/7/2011	Window call...Reveiwed the Butrans patient type and formulary coverage with doc and Debbie. She was between injections so nothing learned and no savings cards needed.
PPLPMDL0020000001	Cleveland	OH	44130	6/7/2011	Quick call- Dr Diab said he did not have time for questions today. Reminded him of Butrans savings cards & showed formulary grid. Let him know that eligible patients who have commercial insurance & utilize savings cards will pay around \$15 for a month's supply. He said he felt this was a "good deal". Spoke with MA Karen & reviewed managed care & savings cards & scheduled a breakfast.
PPLPMDL0020000001	Parma	OH	44129	6/7/2011	Quick call- Jen said she has not started any patients on Butrans yet & then walked into a room. Spoke with Dawn (nurse/office manager) who asked how the Butrans program was. Told her it was a good program & that Dr Nickels was there & had good questions. She said she thinks that he is probably OK with starting new patients on Butrans & that is where he told the nurse practitioners they could prescribe it. She said they all still have reservations about starting patients on opioids on Butrans. I asked her to clarify at what quantity of opioid does the concern begin. She said she wasn't sure but that the concern is about putting patients into withdrawal or having to taper them. I reminded her that patients taking <15mg Vicodin per day could start on the 5mcg dose without an initial taper. She said that there is always the issue with insurance too. I reminded her that state BWC is currently paying for Butrans so cost should not be an issue. Also discussed Ryzolt value cards.
PPLPMDL0020000001	Parma	OH	44134	6/7/2011	Spoke with pharmacy manager, James, who said he needed more OxyContin savings cards. He said that he really appreciates them & that there are a few patients who do not have insurance who use them. I reminded him that cash-paying patients can use the OxyContin savings cards once every 14 days. Inquired about Butrans activity- He said that he thinks it is a great idea but he has not seen a single prescription for it so far. Reviewed Butrans savings through e-voucher or savings Cards.
PPLPMDL0020000001	Independence	OH	44131	6/7/2011	Quick call- Butrans positioning message to Dr Rob in the hallway. He said he could not stop to talk today. I let him know I gave Dr Jack more OxyContin savings cards. He waved & walked away.
PPLPMDL0020000001	Cleveland	OH	44113	6/8/2011	I reviewed 5 Butrans core messages with dr and asked him what were the most important factors to him about Butrans,for his patients? dr said he likes that Butrans is a transdermal medication,once weekly dosing and its a CII so that makes it easy for refills,but dr said he has a lot of acute pain patients and the chronic pain patients he has are happy taking their pills.i asked dr if he has patients taking vicodin that ask for something different as their pain isnt controlled with the vicodin,dr said sometimes patients will ask for something different but usually they are asking for more pills.i showed dr Butrans initiation guide,discussed appropriate patients like the patients taking vicodin but not getting pain relief,to consider Butrans as an option.we talked about Butrans formulary coverage and i asked dr to think of 2 patients that he can start on Butrans,dr said he will do that if patients are appropriate. I recommended Senokot-S<font color=blue><b>CHUDAKOB's query on 06/16/2011</b></font>When the doctor said that his patients usually ask for more pills, this may have been a great time to ask him how he feels about giving them more pills<font color=green><b>BROOKAM's response on 06/20/2011</b></font>he has already told me in past calls that he doesnt like giving more pills, but thanks for mentioning<font color=blue><b>CHUDAKOB added notes on 06/25/2011</b></font>You seem to think that because he told you in the past, it is the end of the discussion. Have him tell you until he says he told you in the past. Because he said this in the past does not mean he feels that way today.
PPLPMDL0020000001	Cleveland	OH	44114	6/8/2011	I talked to John,PA,about 5 Butrans core messages,John said he likes that Butrans is a patch and dosed once a week and he is recommending Butrans to both doctors in office.I asked John who are appropriate patients to start on Butrans? John said patients taking short-acting opioids that arent controlled and asking him for more pills,that who he's recommending to dr katz and dr marshall to start on Butrans.we discussed Butrans formulary coverage and i asked John to continue recommending Butrans for those patients,John agreed.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44103	6/8/2011	dr said he started 1 patient on Butrans,hospice patient that he shares with dr rosenfield.i reviewed 5 Butrans core messages with dr and asked him who was the appropriate patient to start on Butrans? dr said patients taking low doses of morphine 30-80mg,not controlled,i told dr he could also start patients on Butrans if they are taking less than 30mg oral morphine and not getting pain relief with that regimen,dr said he knew that and would keep it in mind.dr asked about insurance coverage for Butrans as he has majority Medicaid patients,we discussed Butrans formulary coverage.i asked dr to think of a few patients,with commercial insurance,like we discussed and start them on Butrans.dr said he's moving to Texas July 1st,so he'll only see me this month and will be gone.i recommended Senokot-S

PPLPMDL0020000001	Cleveland	OH	44114	6/8/2011	i reviewed Butrans 5 core messages with dr,dr said he likes the once weekly dosing of Butrans and that its a patch and has started a few patients on Butrans and they are doing fine.i asked dr who are the appropriate patients to start on Butrans? dr said patients on vicodin or percocet that arent getting pain relief and asking him for more pills,he isnt going to give them more pills so Butrans is a great option.we discussed Butrans initiation guide,tapering of short-acting opioids and initiation of Butrans,dr said he gets it and will continue starting patients on Butrans. we discussed Butrans formulary coverage and i recommended Senokot-5
	Cleveland	OH	44104	6/8/2011	i talked to dr about Butrans 5 core messages,dr said he likes that Butrans is a patch and dosed once a week but he said majority of his patients are taking vicodin and percocet as needed,for acute pain and if they have chronic pain they dont take their short-acting opioids around the clock.dr said he only has a handful of chronic pain patients taking vicodin and percocet around the clock so he could think of Butrans for them if he feels they need a medication change.i showed dr Butrans initiation guide and discussed appropriate patients,tapering and initiation of Butrans. we discussed Butrans formulary coverage and i asked dr to think of 2 patients taking percocet around the clock for their chronic pain but not getting pain relief,to consider Butrans for them,dr agreed. i recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44114	6/8/2011	i reviewed 5 Butrans core messages with dr and asked her what were the most important factors to her about Butrans,for her patients? dr said she likes that Butrans is a long-acting opioid, a CIIi so its easier to call in refills and likes the once weekly dosing for her patients.i asked dr if she is considering Butrans for patients taking 1-2 Vicodin,5mg,around the clock,but not getting pain relief from that regimen? i showed dr Butrans initiation guide for discussion. dr said no she would increase dosing interval for patients or strength of vicodin before considering a long-acting opioid.i asked dr if she could discuss Butrans with 2 patients like this,and start them on Butrans instead of increasing dosage strength or interval? dr said she'll think about it.dr said she has some patients on Butrans and they are doing great so she'll continue thinking of Butrans as an option. we discussed Butrans formulary coverage and i recommended Senokot-5
	Akron	OH	44333	6/8/2011	Dr. Brown said she was having success with Butrans now that she was starting to get busier. She said she is converting patients from SAO's who are not stable. She said she would continue to initiate therapy to the appropriate patients. She mentioned one of her patients experienced a drop in their blood pressure which i addressed via the FPI.
PPLPMDL0020000001	Cleveland	OH	44104	6/8/2011	i talked to dr about Butrans 5 core messages,asked dr who was appropriate to start on Butrans? dr said she could only remember that Butrans was a patch and once weekly dosing.dr asked who was appropriate patient and what was insurance coverage? i showed dr Butrans initiation guide and asked dr if she had patients taking percocet around the clock for their chronic pain that weren't getting pain relief and asking her for something different or more pills? dr said yes all the time.i told dr she could consider Butrans,if patients meet Butrans indication,for these patients and if they have commercial insurance they can use Butrans patient savings cards.dr said ok she'll talk to a few patients and see what they say about Butrans.i recommended Senokot-5<font color=blue><b>CHUDAKOB's query on 06/16/2011</b></font>The core visual aid has a page (p9) that discusses the appropriate patients for Butrans. Take a look at it and see how you can incorporate it into your presentations.<font color=green><b>BROOKAM's response on 06/20/2011</b></font>Barry i know there is a page in core visual aid but thats not the visual aid i chose to use in this call, but thanks for the reminder that we have the Butrans visual aid<font color=blue><b>CHUDAKOB added notes on 06/22/2011</b></font>Amy, this is something we will be using more in the future so there is not time like the present to start using it.
	Uniontown	OH	44685	6/8/2011	I asked Dr Stetler about his success with Butrans and he mentioned that it was good so far and he had not heard back from any of his patients. He said that ONE of his patients was opioid experienced. He said he would continue use for the appropriate patients.
PPLPMDL0020000001	Hudson	OH	44236	6/8/2011	I reminded Dr Tosino of our last conversation, where he told me that he does not like to prescribe opioids in general & asked him what types of patients he does prescribe opioids for. He does not like to do it, but does if the patient is established with him as trustworthy or has legitimate pain. I agreed that he should be cautious & added that he should use the same caution with Butrans. He said that he has tried sending patients to pain management, but that they end up coming back to him on multiple pain medications, which they sometimes don't comply with & that it just complicates treatment, so he does prescribe opioids where appropriate. Positioned Butrans for patients taking 2-3 Vicodin per day who call in too soon for refills. I asked him if he gets calls like this & he said he gets them daily. I asked him if it is fair for me to ask him to identify a few patients like this to switch to Butrans & he said yes. OxyContin reminder for appropriate patients beyond Butrans 20mcg.
	Hudson	OH	44236	6/8/2011	Spoke with pharmacist, Bob, & inquired about Butrans activity. He said he has a few customers on it, so he always makes sure to keep some of the 5mcg & 10mcg doses in stock. He said that one customer is on 5 & 10mcg. I told Bob we do not recommend wearing more than one patch at a time. He said he knows this, but that is how the doctor wants it. I asked who wrote the prescription but he said he did not know & that he doesn't remember the patient's name so he couldn't look it up. Discussed savings for Butrans through e-voucher & also reviewed OxyContin savings cards. He said he did not need any savings cards at this time.
PPLPMDL0020000001	Cleveland	OH	44120	6/8/2011	i talked to Stewart,Narcotics Buyer/Pharmacist,briefly about Butrans stocking,scripts they are getting for Butrans,we talked about my message to doctors on who's appropriate and not appropriate for Butrans.i asked Stewart to focus patient discussions,when getting their Butrans,on application and rotation of Butrans and show this information in Butrans patient information booklet.Stewart said he'll do that.we talked about Butrans insurance coverage and i recommended Senokot-5
	Hudson	OH	44236	6/8/2011	Quick call- Beth said she still has Butrans but has not seen a single script for it. Reviewed savings cards for Butrans & discussed how she can print them from Butrans.com. Asked if she needed additional savings cards for OxyContin & she said she would take some.
PPLPMDL0020000001	Cleveland	OH	44106	6/8/2011	i reviewed 5 Butrans core messages and asked dr who was appropriate to start on Butrans? dr said he knows Butrans is a good option for patients taking low doses of short-acting opioids like vicodin or percocet.dr said he's started a few patients on Butrans that were taking tramadol but not getting pain relief so i should see that in my data soon.i told dr i wasn't aware of him starting anyone on Butrans but was happy to hear that if he did start a couple patients on Butrans.i showed dr Butrans initiation guide and asked dr to think of a few patients taking tramadol,around the clock,for their chronic pain,that arent controlled,to start on Butrans.dr said he would do that and asked about insurance coverage.we discussed Butrans formulary coverage.i recommended Senokot-5<font color=blue><b>CHUDAKOB's query on 06/16/2011</b></font>What specifics did you find out about the patients he started on Butrans? A simple question like tell me about the patients, or one of the patients you started on Butrans may have opened him up to discussion.<font color=green><b>BROOKAM's response on 06/20/2011</b></font>i already wrote in past call notes, tramadol patients, not controlled that was it, gave to Usa to start them - i have used that opener before thanks<font color=blue><b>CHUDAKOB added notes on 06/25/2011</b></font>That doesn't mean he remembers it. If they remember every opening you used, they would be prescribing lots of Butrans.
	Cleveland	OH	44115	6/8/2011	dr is a resident at ST.Vincent's hospital but was in dr rosenfield,dr pandit,dr eleuze and dr bennett's office today for lunch so i reviewed 5 Butrans core messages with dr,Butrans fpi,initiation guide,patient information booklet and formulary grid.dr said he hasnt heard about Butrans but thinks its a great option for patients instead of refilling their vicodin or percocet.we talked about patients taking short-acting opioids with Butrans or giving non-opioids and i showed this information in Butrans fpi.dr said ok he'll keep Butrans in mind and asked if Butrans was on hospital formulary? i told dr Butrans wasnt on formulary so if he prescribed Butrans he would have to fill out a non-formulary drug form.dr asked if Butrans was covered on medicaid as thats majority of patients at hospital,so we discussed Prior Authorization for medicaid patients.
PPLPMDL0020000001	Cleveland	OH	44130	6/8/2011	Quick call- Saw Dr Kansal at the window as i was discussing Butrans managed care & savings cards with Dorothy & Sharon. Reminded Dr Kansal of our lunch conversation in which he agreed to try some patients on Butrans. He said he didn't have time to talk today about it & then walked away. Worked with Dorothy to schedule an appointment with him to discuss Butrans further. She requested more Senokot-5 & Colace samples & said the patients really have been appreciating them.
	Garfield Hts	OH	44125	6/8/2011	Spoke with MA Amy who said they are still not allowing any pharmaceutical reps due to EMR & computer system. I attempted to schedule an appointment, but she said they are not even scheduling anything at this time. She had no recommendations on how i may be able to gain access to Dr Kline & did not know when they will start seeing reps again. She said i will just have to keep checking back to see.<font color=blue><b>CHUDAKOB's query on 06/16/2011</b></font>While I can see why you might want this in your call notes, there is no appearance of a product discussion and therefore cannot be a call, even if it is a non-HCP call.<font color=green><b>APSEGA's response on 06/17/2011</b></font>i will make sure that I do not put in any non-HCP calls for anything that does not include a clinical discussion.<font color=blue><b>CHUDAKOB added notes on 06/19/2011</b></font>Thank you! Remember a non-HCP call still has to be with a nurse, MA or someone that is clinically involved in the process.
PPLPMDL0020000001	Parma	OH	44129	6/8/2011	Linda (pharmacist) said she had ordered Butrans early but still has not seen any prescriptions for it. Reviewed positioning for Butrans & also discussed savings cards & let her know she could print savings cards online from Butrans.com. Also discussed OxyContin savings cards but she said they do not stock it at that location.
	Cleveland	OH	44104	6/8/2011	i reviewed 5 Butrans core messages with dr,dr said he's started a few patients on Butrans but none of them were in the office these are hospice or assisted living patients.i asked dr why he felt Butrans was appropriate for these patients? dr said Butrans is a great option for patients taking percocet or vicodin around the clock for their chronic pain but the short-acting opioids are wearing off too soon,thats where he feels a long-acting opioid is appropriate.dr said Butrans is easy to apply,no issues for patients and he's still giving them some short-acting opioids for breakthrough pain.dr said to leave a couple Butrans patient information booklets as he will give them to patients,we discussed Butrans formulary coverage and we discussed where OxyContin is appropriate,i showed OxyContin visual aid for discussion,showed OxyContin conversion guide and dr wanted some OxyContin savings cards and we discussed insurance coverage.i recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44106	6/8/2011	i talked to dr about Butrans 5 core messages and asked what were the most important factors about Butrans,for patients? dr said the fact Butrans is a patch and once weekly dosing is much easier for many of doctors patients.i asked dr who's appropriate for Butrans? dr said patients taking percocet that arent controlled and asking for more pills,he's stopping and not refilling their percocet,he's considering Butrans for them. we discussed Butrans formulary coverage and i recommended Senokot-5<font color=blue><b>CHUDAKOB's query on 06/16/2011</b></font>If he is really doing the things he says he is, why do you think we are not seeing more Butrans out of him? Just curious on your thoughts.<font color=green><b>BROOKAM's response on 06/20/2011</b></font>because he doesnt have a huge volume - tuesday and wednesday seeing patients<font color=blue><b>CHUDAKOB added notes on 06/25/2011</b></font>Ok. We discussed this in person. Thank you!
	Beachwood	OH	44122	6/8/2011	Spoke with Yvonne (MA) who said i just missed Jim & Dr Tabbaa. Discussed Butrans positioning, indication, delivery system & patient education booklet. She said i may be able to catch Dr Tabbaa on Friday afternoon & suggested i try back.<font color=blue><b>CHUDAKOB's query on 06/16/2011</b></font>Looks like you discussed some important information with Yvonne. What action, if any, did you ask her to take after your call? Even if you said would you make sure this information gets on Dr. Tabbaa's desk, that would have been better than inaction, don't you think?<font color=green><b>APSEGA's response on 06/17/2011</b></font>Yes, i agree that an action is always better than inaction. I think what i need to do is not only have a plan for my next call objective with each physician, but also have one with staff, especially if, like in this case, i am unable to catch the doctor as expected. I will start putting this into my pre-call planning so that i am better prepared when i go into each office.<font color=blue><b>CHUDAKOB added notes on 06/19/2011</b></font>That is certainly a good idea in offices where you know that you will see one person if the doctor is unavailable. This might serve as an arduous task. Most importantly is when making a non-HCP call, ask them to do something for you as well.
PPLPMDL0020000001	Cleveland	OH	44106	6/8/2011	worked pain management dept
	Cleveland	OH	44113	6/8/2011	i worked orthopedic office-couldnt see Dr.Bohl,1st day back from week of vacation and too busy to talk but did see Dr.Berkowitz,orthopedic physician in same office
PPLPMDL0020000001	Parma	OH	44129	6/8/2011	Quick call- Dr Giogliotti said he was very busy & running way behind. He said he has not prescribed Butrans. Invited him to take part in June 16th webcast. He checked his calendar & said he did not have any schedule conflicts for that evening.
	Hudson	OH	44236	6/8/2011	Dr Seiple said he tried a patient on Butrans & that the patient felt "horrible" on it. I asked what he meant- he said the patient just said that he generally felt bad all over while on Butrans. I asked him what dose of opioid the patient had previously been on. Dr Seiple said Opana ER 30mg q12h & that he started the patient on Butrans 5mcg. I asked if he knew exactly how the patient initiated Butrans (ie how long after he took the Opana did he start Butrans) but he said id not know. I showed initiation guide page 6 & asked if he thought that patient may have been out of the range current opioids & might have been on too high a dose of Opana to be considered appropriate for Butrans. He said that was very possible & that he hadn't thought of that. I asked if this helped clarify where to position Butrans & he said yes. Positioned Butrans for patients on 2-3 Vicodin per day. I asked if this experience would prevent him from finding different patients for Butrans & he said no.<font color=blue><b>CHUDAKOB added notes on 06/16/2011</b></font>Very nice job of clarifying and diagnosing through good

	Independence	OH	44131	6/8/2011	Dr Trickett asked how Butrans is being received. I told her that it has been well received by various specialties as so many types of physicians have patients who need chronic opioid therapy. Positioned Butrans for patients who are taking 2-3 Vicodin per day chronically who call for refills too soon or ask for changes in medication. I asked her if she had patients like this- she said many. I asked if she would, instead of increasing their current opioid, switch them to Butrans. She said yes. Discussed Butrans as a CII long-acting option & also reminded her of abuse/addiction potential. Discussed importance of setting patient expectations & educating them prior to starting them on Butrans. She said she will have to "sell" the medication to them to get them to switch from short-acting. I asked if she was committed to doing this- she said yes & added that she will target patients with commercial insurance on chronic Vicodin or Percocet Discussed OxyContin savings cards & managed care.
PPLPMDL0020000001	Cleveland	OH	44103	6/9/2011	I reviewed 5 Butrans core messages with dr,talked about appropriate patients that could try Butrans and dr said she loves that Butrans is a long-acting opioid as she believes this is better for patients who have chronic pain.dr said her challenge with Butrans is that she is getting resistance from patients not wanting to stop their percocet or other short-acting opioids and start on Butrans.I showed dr Butrans fpi,noting maintenance of therapy section where dr can continue giving short-acting opioids with Butrans or non-opioid medications,its up to her,dr said ok she forgot about that.I showed dr Butrans initiation guide,discussed Butrans 5mcg and 10mcg as 2 starting dosage strengths,we talked about Butrans patient information booklet and the application dvd as an educational tool because dr said she doesnt have additional time to explain everything about Butrans.I asked dr to think of a few more patients to start on Butrans,to continue getting clinical experience,dr agreed.
PPLPMDL0020000001	Cleveland	OH	44106	6/9/2011	I discussed 5 Butrans core messages,fpi,initiation guide,patient information booklet and insurance coverage for Butrans.I asked dr what were the most important factors in Butrans that he saw? dr said he likes that Butrans is transdermal delivery,dosed once a week and a CII so he can call in refills.I asked dr to think of a few patients taking tramadol around the clock,that meet Butrans indication,but arent getting pain relief,and start them on Butrans.dr said he will and we discussed commercial plan coverage for Butrans.I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44195	6/9/2011	I reviewed 5 Butrans core messages with Anne,NP,and asked what were the most important factors about Butrans that Anne would consider when thinking to start a patient,Anne said once weekly dosing is easier for some patients and some patients would like a patch instead of taking pills so she could see Butrans for those patients.I showed Anne Butrans initiation guide,discussed tramadol patients who arent getting pain relief and asking for something different,to try Butrans,Anne said she'll keep it in mind. we discussed insurance coverage for Butrans and I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	6/9/2011	dr said he's still finding those right patients to start on Butrans,even though he had to stop a few patients this week because Butrans wasnt working.I asked dr what strength these patients were taking? dr said he started them on Butrans 10mcg and titrated to Butrans 20mcg but that wasnt enough pain relief.dr said he doesnt know if its just because some of these patients wanted more pills again or if Butrans truly didnt work for them.I asked dr who were the "right" patients he was starting on Butrans? dr said patients taking 4 tabs,10mg,vicodin a day,so these are patients he doesnt know what else to give them if 40mg hydrocodone isnt working thats why he's thought Butrans would be a great add-on to this dosing regimen.I asked dr if he would consider starting patients on Butrans,earlier in therapy,so once patients taking 5mg vicodin and that doesnt work,instead of increasing dosing interval,then to 7.5mg,then to 10mg,go to Butrans immediately? dr said yes he's considering that,as early
PPLPMDL0020000001	Cleveland	OH	44102	6/9/2011	I reviewed 5 Butrans core messages,dr said he couldnt remember much about Butrans other than it was a long-acting opioid and transdermal.I showed dr Butrans visual aid and asked what were the most important factors to him when choosing a long-acting opioid for his chronic pain patients? dr said safety,efficacy and cost of drug.I showed dr Butrans visual aid looking at clinical trials,adverse event profiles and we discussed Butrans insurance coverage.I asked dr if he is seeing patients on vicodin or percocet,that arent controlled,and would consider Butrans for them? dr said he might if patients ask for something different,we talked about proper tapering and initiation of Butrans and I showed Butrans initiation guide for discussion.I told dr I have lunch with him in 2wks,could he think of 2 patients,with BWC or commercial insurance,to start on Butrans,before then? dr said he'll do his best,he's new to this practice and still learning about patients.I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44195	6/9/2011	I reviewed 5 Butrans core messages with Kathy,PA, and asked her what were the top 3 things she saw in Butrans that were important for her patients? Kathy said efficacy,safety and cost of Butrans.Kathy said once weekly dosing is also good for those patients who dont want to take pills and are asking for another option,so she is keeping Butrans in mind.I showed Kathy Butrans visual aid looking at clinical trials,efficacy of Butrans in these trials and adverse event/safety profile and we discussed insurance coverage for Butrans.I asked Kathy to consider 2 patients of dr mekhails or dr minters,that are taking tramadol and not controlled,and start them on Butrans,Kathy said she will talk to both doctors as she thinks Butrans is a great option for patients.I recommended Senokot-S
PPLPMDL0020000001	Garfield Hts	OH	44125	6/9/2011	Spoke with pharmacist, Sarah, who said they do not have Butrans in stock. Reviewed indication, dosing, appropriate patient type/positioning, delivery system, & savings program. She said they would only order it if they see a prescription. I encouraged her to order now, as area physicians are prescribing but she said they adhere to their policy. Also discussed OxyContin savings cards & eligibility. She said they do stock OxyContin at that location & dispense it quite frequently.
PPLPMDL0020000001	Parma	OH	44134	6/9/2011	Dr Hernandez said he & his patients are still happy with the results they are getting from Butrans. He said that he still occasionally has issues with pharmacies, but that clinically he is very satisfied with Butrans. I asked if he was still generally prescribing the full box of 4 patches now & he said yes & that it has saved some pharmacy hassle. I asked him if he is still prescribing Butrans mostly for patients who were on Vicodin around-the-clock chronically. He said that he is still doing that, but now he is also putting new patients on Butrans instead of starting them on Vicodin around-the-clock if he knows their condition is chronic. I told him I was glad to hear that he is branching out to new types of appropriate patients. He requested more samples of Senokot-S.
PPLPMDL0020000001	Westlake	OH	44145	6/9/2011	Quick call, I told Dr, last time you told me you think Butrans is a great drug. Will you write for more of you appropriate patients? He said he would.
PPLPMDL0020000001	Cleveland	OH	44103	6/9/2011	I talked to dr about 5 Butrans core messages,we discussed Butrans being an option for patients taking percocet around the clock for their chronic pain but not getting pain relief and asking for something different,I asked dr to think of 2 patients like this with commercial insurance as he does have a small percentage of commercially insured patients,dr said he'll keep it in mind but its all about insurance and once Butrans is covered on Medicaid,he'll consider prescribing Butrans for those patients,we talked about Prior Authorization for medicaid patients,if they meet Butrans indication and PA requirements,dr said he wont do PA for Butrans,we talked about appropriate patients for OxyContin,formulary coverage and savings cards.dr said he prescribes OxyContin,its available on medicaid and patients do well on OxyContin.I recommended Senokot-S
PPLPMDL0020000001	Independence	OH	44131	6/9/2011	Quick call- Reminded Dr Sundaram of our lunch conversation when he told me that he would switch appropriate patients who were calling in too soon for refills for their chronic pain medications or asking for increases or changes to those medications to Butrans. He said he has not started anyone since then. He said he would still keep it in mind for those patients. Reviewed savings cards for Butrans & OxyContin with him & Lisa.
PPLPMDL0020000001	Cleveland	OH	44104	6/9/2011	I reviewed 5 Butrans core messages with dr,dr said he likes that Butrans is a CII as thats easy for refills and its a long-acting opioid which he prefers to prescribe for patients but insurance is an issue with Medicaid,for Butrans as he's not doing the Prior authorization for Butrans.I asked dr to think of 2 patients with commercial insurance,that arent controlled on their percocet and asking for something different,if dr feels patients would be appropriate,consider Butrans right there instead of refilling percocet.dr said he will do that,but he only has a few patients with commercial insurance,we talked about appropriate patients for OxyContin,showed OxyContin visual aid,conversion guide we talked about 7 tablet strengths available for flexibility in titration and insurance coverage for OxyContin.dr said he writes a lot of OxyContin,no problem with insurance as majority of patients are Medicaid and OxyContin is covered on Medicaid.I recommended Senokot-S
PPLPMDL0020000001	Independence	OH	44131	6/9/2011	Roman said that he is anxiously awaiting a dinner program so that he can talk about Butrans with an expert with experience. I asked if there is anything at all that I can answer for him. He said that he just wants to talk to an expert because they can tell him about their clinical experience with Butrans. I offered medical services phone number again & let him know that if he has something specifically that he might want to know, they could answer. He declined. He looked at the demo patch & we discussed application, rotation, & disposal. Also discussed initiating treatment in patients taking (6) 5mg Vicodin per day, including taper before beginning on 10mcg dose. He said there is no way patients would do this. Discussed that buprenorphine can precipitate withdrawal in patients on high doses of opioids. He asked if Butrans has the same ingredient as Buprenex. I told him they both contain buprenorphine. Discussed OxyContin q12h for appropriate patients beyond Butrans.
PPLPMDL0020000001	Cleveland	OH	44195	6/9/2011	worked anesthesia/pain management dept-had to leave Butrans fpi,initiation guide,patient information booklet,formulary grid and my business card for Dr Mekhail,Dr Minzter,Dr.Cheng,Dr.Vrooman and Dr.Katyal as i couldnt see any of them
PPLPMDL0020000001	North Royalton	OH	44133	6/9/2011	Introduced myself to Cheryl (Pharmacist) & asked if she was stocking Butrans. She said she does have the 5 & 10mcg doses in stock & has at least two customers on it. Reviewed with her savings program/e-voucher. Also inquired about OxyContin stocking at that location. She said they do not stock it at that store so they did not need savings cards.
PPLPMDL0020000001	Cleveland	OH	44106	6/9/2011	i had an impromptu lunch with dr,so i asked dr if he saw any patients yesterday that he felt would be appropriate to start on Butrans? dr said noone said they wanted to try anything different,so no he didnt start anyone and he was doing procedures all of today.i asked dr who was appropriate for Butrans? dr said patients taking vicodin or percocet that arent controlled and asking for more pills.i told dr that was right but he could also consider patients taking tramadol but not getting pain relief or if they are calling into office requesting tramadol refills sooner than they should every month.dr said okay he'll keep it in mind as he's seeing patients next week and then leaving for 2 weeks so he wont see patients again until JULY.I asked dr to just think of 2 patients like we discussed,with commercial insurance,that he could start on Butrans,dr said he will do that and knows he needs to write Butrans as its a great option for patients.
PPLPMDL0020000001	Independence	OH	44131	6/9/2011	I asked Dr Pai if he gets calls from moderate to severe chronic pain patients who are requesting increases or changes in their medication. He said he does get them often. I asked him why not consider Butrans for those patients, if appropriate. He said he will consider it. He said that the patient he initially put on Butrans, is now in hospice & had a hard time getting the Butrans approved, but finally did accomplish this. He added that she is doing well. I asked him if hospice patients would typically be a type where he would use Butrans. He said it depends on the patient's family as cost can be an issue. Reviewed Butrans & OxyContin managed care.
PPLPMDL0020000001	Barberton	OH	44203	6/9/2011	I asked Dr. Patel how long he expected a patient to be on Butrans once he prescribed it. He said that he expects most patients to be on it for the long haul and his patients were having success. He said that he is writing for refills right on the Rx.
PPLPMDL0020000001	Cleveland	OH	44106	6/9/2011	worked pain management dept-lunch with dr hayek and aaron compton,md/fellow in pain dept-this was impromptu lunch as i was supposed to have lunch with residents.
PPLPMDL0020000001	Westlake	OH	44145	6/9/2011	I asked the Dr if he has seen any patients recently whose pain is not well controlled on hydrocodone. He said he does sometimes. I asked if he would switch this type of patient to Butrans instead of increasing the short acting dose and he agreed. He said he is still trying to find that right patients and he will try to write for Butrans. We discussed OxyContin as a long acting option for patients on high doses of short acting opioids.<font color=
PPLPMDL0020000001	Independence	OH	44131	6/9/2011	I asked the Dr if he has seen any patients recently whose pain is not well controlled on hydrocodone. He said he does sometimes. I asked if he would switch this type of patient to Butrans instead of increasing the short acting dose and he agreed. He said he is still trying to find that right patients and he will try to write for Butrans. We discussed OxyContin as a long acting option for patients on high doses of short acting opioids.<font color=
PPLPMDL0020000001	Independence	OH	44131	6/9/2011	Quick call- Caught Dr Reddy at the window. He said he keeps forgetting Butrans. Reviewed indication, dosing, & delivery system. Offered June 16th webcast & recommended he participate to hear Butrans information from an expert. He said he would try to log on.
PPLPMDL0020000001	Barberton	OH	44203	6/9/2011	Spoke with Bill the pharmacist. Introduced Butrans and the FPI, discussed once a week dosing and went over my core message that I am discussing with physicians in the area. Reviewed steady state. Also met and introduced Butrans to Pattie who is the tech.

PPLPMDL0020000001	Independence	OH	44131	6/9/2011	Lisa told me that the patient who they have on Butrans is getting great results. She said the patient likes it so much that she called asking for refills after her initial prescription. Lisa asked me if there are specific parts of the body that have to be used. Reviewed 4 recommended application sites, rotation, & disposal. She said that she will think of Butrans for patients who are taking 6 Vicodin per day who are willing to do the taper before starting on Butrans. She said that she thinks some patients will not want to do the taper, but others will. She asked about future dinner programs & I let her know I was working on getting one together for July.
	Cleveland	OH	44113	6/10/2011	I reviewed 5 Butrans core messages with dr,asked dr who he felt were appropriate patients to start on Butrans? dr said patients taking opioids every day for their chronic pain and still not controlled.I showed dr Butrans initiation guide,discussed vicodin patients that arent controlled and asking dr for something different,to consider Butrans for them,dr asked about insurance coverage for medicaid patients as thats majority of his patients.we talked about Prior Authorization requirements for Butrans and i asked dr if he has commercial plan patients that could try Butrans and use Butrans patient savings cards? dr said he has some patients with commercial and will think of them.I asked dr to just think of 2 patients,commercial insurance,that are taking vicodin daily but not getting pain relief and asking for something different,to start them on Butrans.dr said he'll do his best to remember Butrans.I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	6/10/2011	I reviewed 5 Butrans core messages with dr,talked about appropriate patients to start on Butrans,dr said he has patients taking vicodin and percocet that arent controlled and ask for more pills,so he could think of Butrans for them instead of giving them more pills.I showed dr Butrans initiation guide,discussed proper tapering and initiation of Butrans.we talked about BWC and commercially insured patients.I asked dr to focus on 2 patients to start on Butrans per our discussion and I'll follow-up in 2 weeks,dr agreed.I recommended Senokot-S
	Cleveland	OH	44113	6/10/2011	I reviewed 5 Butrans core messages with dr,dr said he hasnt thought much about Butrans but does remember its a transdermal delivery medication and that was it.I asked dr from 5 core messages,what were top 3 factors he considers important when considering a long-acting opioid for his patients.dr said safety,efficacy and cost of Butrans were all important.dr said once weekly dosing is easier for some patients but not everyone and Butrans being a CIII is also easier for him as he can call in refills.I asked dr if he ever has patients taking tramadol,daily,that arent getting pain relief and asking for something else? dr said yes every day he see's those patients and his staff gets those calls from patients.I showed dr Butrans initiation guide,looking at tramadol dosing and asked dr to consider 2 patients,with commercial insurance,that arent controlled on tramadol,to start on Butrans.dr said he has to think about his patients as not everyone wants to take a patch.
PPLPMDL0020000001	Cleveland	OH	44109	6/10/2011	I reviewed 5 Butrans core messages,talked to dr about his patients taking tramadol every day but not controlled,to consider Butrans for them.dr said he will but hasnt had any patients ask for something different.I told dr if patients call in early for refills that could be a sign that their short-acting tramadol isnt lasting long enough and perhaps a long-acting opioid would be appropriate.dr said he'll keep it in mind.we talked about commercial plan patients trying Butrans using Butrans patient savings cards.I recommended Senokot-S
	Cleveland	OH	44102	6/10/2011	I reviewed 5 Butrans core messages with dr,dr said she likes that Butrans is a patch and a CIII.I asked dr why the CIII made a difference to her? dr said its easier to call in refills than having to see her percocet patients all the time because they have to pick their scripts up at the office.dr said her chronic pain patients are extremely frustrating but she knows she has to treat their pain and doesnt like when she sends them to specialists at the Cleveland Clinic and all they want to do is take them off opioids and do procedures.even tho she is part of the Cleveland clinic,until JULY 1st,she doesnt refer to pain doctors here anymore.dr said she thinks Butrans would be great for her percocet patients that come to her asking for more pills or saying their percocet isnt lasting long enough,she would feel comfortable starting them on Butrans.dr said its all about insurance coverage as she has a lot of medicaid,we discussed prior authorization requirements for butrans on medicaid. I
PPLPMDL0020000001	Warrensville Heights	OH	44122	6/10/2011	Spoke with Joyce (MA) who said that Dr Kessler's nurse, Eileen was not in today to see me. She said they are in the process of transitioning to EMR, so things have been hectic there lately & they are not scheduling any rep appointments for the month of June. Reviewed Butrans appropriate patient type & savings cards. She said she would give the information for Dr Kessler to Eileen upon her return. She said they did not need any OxyContin savings cards.
	Cleveland	OH	44109	6/10/2011	I talked to dr about 5 Butrans core messages,reviewed appropriate patients dr can consider starting on Butrans as dr couldnt remember who was the appropriate patient-showed Butrans initiation guide for discussion,dr asked about insurance coverage on medicaid,we discussed dr considering BWC or commercially insured patients,dr said he has a lot of medicaid patients too so I explained the Prior authorization requirements for Butrans for Medicaid.dr said ok he does have patients taking vicodin and percocet that ask for something different when their first dose isnt controlling their pain any longer,so I asked dr to consider 2 patients,taking vicodin or percocet daily for their chronic pain,that he could start on Butrans to get some clinical experience.dr agreed and said he will consider that for some patients.I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	6/10/2011	I talked to Dale,PA,about appropriate patients for Butrans and showed Dale Butrans initiation guide for discussion.I asked Dale to think about patients taking tramadol around the clock that arent controlled,to start them on Butrans.dale said he will consider that and that makes sense to think of patients taking tramadol,he's only been thinking of vicodin and percocet patients.we talked about Butrans insurance coverage and patient savings cards.I recommended Senokot-S
	Cleveland	OH	44102	6/10/2011	I talked to Vicky,Pharmacy Manager,about Butrans stocking,5 Butrans core messages,initiation guide,Butrans patient information booklet and Butrans formulary coverage.Vicky said she hasnt seen any scripts for Butrans but does have Butrans stocked,we talked about importance of having all 3 Butrans dosage strengths in stock so that patients can get medication and not being turned away and told to return in 24 hours,Vicky agreed with me saying that made sense but until she see's scripts for Butrans,she wont order Butrans 20mcg,we discussed appropriate patients for Butrans and I showed Butrans initiation guide for discussion and then discussed formulary coverage.I asked Vicky if she would recommend Butrans to patients,giving them a Butrans patient information booklet,if they tell her their pain isnt controlled with their short-acting opioids,and then patients can discuss Butrans with their doctors? Vicky said she would do that.I recommended Senokot-S
PPLPMDL0020000001	Parma	OH	44129	6/10/2011	Reminded Dr Rossi of our Butrans conversations & let her know I wanted to continue to discuss patients who suffer from moderate to severe chronic pain & who are taking short-acting around-the-clock pain medications. I asked if Butrans, with a once-weekly application would be something she thought those patients may be interested in. She said some might like that. She asked about usage in the elderly. Discussed use in older patients & showed FPI 8.5. Also discussed managed care & asked if she had patients with commercial insurance who might meet the indication & she said yes. I asked if, instead of re-filling a patient's tramadol or Vicodin prescriptions, she would consider switching appropriate patients to Butrans if they have commercial insurance. She said she would consider this, although she said she does not like to prescribe opioids. I asked if she would consider Butrans only for those patients who she already is prescribing opioids. Senokot-S for opioid-induced constip
	Cleveland	OH	44113	6/10/2011	I talked to dr about 5 Butrans core messages,asked her what were the most important factors she see's in Butrans? dr said she likes that Butrans is a once weekly dosing option,a CIII is easy to call in refills and its a patch.we talked about appropriate patients to start on Butrans,dr said if patients are asking for more pills and she's not comfortable refilling that medication,she's considering Butrans.I asked dr to continue starting patients on Butrans,reviewed Butrans formulary coverage and I recommended Senokot-S
PPLPMDL0020000001	Chagrin Falls	OH	44022	6/10/2011	Quick call- Caught Dr Hudson up at the window. Butrans appropriate patient message. She waved, thanked me, & walked away. Spoke with Sherry & reviewed Butrans savings cards, eligibility, & also gave Colace samples. Scheduled a lunch for next month to speak with Dr Rood & Dr Hudson.
	Mayfield Heights	OH	44124	6/10/2011	Spoke to Warren about the Butrans stocking and scripts. He said he sees a few scripts mostly from pain mgmt(Hillcrest). I asked if he is seeing any refilled scripts. He said a couple of patients are on it nd he has not heard anything bad about it. I explained the proper application to the 4 sites and the disposal units to discard the patch. Reminded him of the savings cards and the potential for monthly use.
PPLPMDL0020000001	Cleveland	OH	44113	6/10/2011	worked pain management dept
	Akron	OH	44319	6/10/2011	Spoke to Gretchen and went over the message that I had spoke with Dr. Wu about and my core message with physicians in the area. I asked if she could think i=of anyone else that was writing a lot of SAO but she couldn't really think of any but said Dr. Wu was.
PPLPMDL0020000001	Mayfield Heights	OH	44124	6/10/2011	Spoke to Anthony (filling in for Hillary)about the stocking of Butrans. He had only heard about it in a journal and did not know it was available. He confirmed that they do have it stocked. I explained the indication, positioning, application/disposal, and 7 day CIII status. Let him know about savings cards for commercillay insured customers. Provided FPI and patient info guides.
	Fairlawn	OH	44333	6/10/2011	I asked Dr. Domdera if would really consider writing Butrans for just one patient so he could get some feedback. He said he was still unsure since it was still very new to the market. He said he would keep it in mind but still does not feel incredibly comfortable with it?
PPLPMDL0020000001	Lyndhurst	OH	44124	6/10/2011	Quick call..... Asked doc if he had a moment....to talk about an alternative to starting patients on vicodin ATC. I informed him that it is a CIII like vicodin however Butrans is dosed just once weekly. I asked him if that sounds like a benefit. He said sure and walked away. Nothing learned.
	Akron	OH	44319	6/10/2011	I asked Dr Katrjij if he thought there was a place for Butrans based on our previous conversations and he said he thought so. I identified patients who would be Butrans candidates and asked how many times a week he saw similar type of patients and he said often. I asked him if he would feel confident enough to try it on 2 patients and he said he was not sure.
PPLPMDL0020000001	Mayfield Hts	OH	44124	6/10/2011	I reminded doc of the Butrans indication and positioning. I asked him if he has patients taking tramadol or even vicodin daily for persistent pain. He said he tries not to. I reviewed the starting dosing and the coverage for commercial patients. He asked about medicaid. Told him its not covered on medicaid but is covered on BWC. Gave him an initiation guide and formulary grid.
	Akron	OH	44312	6/10/2011	Introduced Butrans and FPI. I talked about patient profiling and asked if she had many patients on SAO's. She said she did but said insurance was going to be an issue because the patients she thought of for Butrans had Medicaid or Medicare. I told her Butrans was not necessarily for those patients and asked if she would remember it more for her patients with a private insurance. She said she would keep it in mind.
PPLPMDL0020000001	Mayfield Hts	OH	44124	6/10/2011	Window call..... reminded doc of the appropriate Butrans patient - low dose IR narcotics of opioid naive patients. I also explained that commercially insured and BWC patients have the best chance for success. Provided formulary grid and oxycontin savings cards. Nothing learned.
	Parma	OH	44129	6/10/2011	Spoke with pharmacist Marcella who said that they still have 5mcg Butrans in stock. She said she has not dispensed any & was not sure if anyone else had. Reviewed savings through e-voucher & also discussed OxyContin savings cards. Reviewed eligibility for savings cards, including that they cannot be used for patients with any type of government insurance. I asked what insurance plans she sees mostly & she said it is mostly Medicaid (maybe 30% she said) with a mixture of commercial insurance & Medicare.
PPLPMDL0020000001	Mayfield Heights	OH	44124	6/10/2011	I asked doc what he remember about Butrans. He said he remembers that it is a 7 day patch. I confirmed that it is the first analgesic delivery over 7 days and is a CIII indicated for moderate to severe chronic pain. I asked him to think of Butrans instead of initiating patients on hydrocodone ATC. Explained the savings cards and the coverage with private insurance and BWC.
	Akron	OH	44319	6/10/2011	I asked Dr. Yee if he had the opportunity to trial Butrans yet and he said that he had been keeping it in mind and thinking of it for patients who are currently on a low dose SAO. I reminded him that Butrans had also been studied in opioid naive patients so he should feel comfortable prescribing it to those patients as well.
PPLPMDL0020000001	Akron	OH	44319	6/10/2011	I asked Dr. Wu if he had considered Butrans in place of hydrocodone like we had previously discussed and he said he had thought about it but not as often as he would like. He asked again about the does and initiation which I explained via the initiation and titration guide.
	Parma	OH	44134	6/10/2011	Spoke with Mercedes & inquired about Butrans stocking. She said they do not have it in stock & asked what it is. Reviewed Butrans indication, dosing, positioning, & e-voucher. She asked if there was any indication for drug addiction & I told her Butrans is only indicated for pain & is not to be used for the treatment of drug addiction. Reviewed positioning with her. Also discussed OxyContin savings cards. I asked what insurance plans they see most often. Mercedes said that she mostly sees commercial insurance plans at this store.
PPLPMDL0020000001	Cleveland	OH	44109	6/10/2011	I reviewed 5 Butrans core messages with dr,dr said she likes that Butrans is transdermal and is once a week dosing but she hasnt had any patients ask for something different.I asked dr if patients tell her their tramadol or vicodin isnt lasting long enough? dr said yes she does hear that from patients.I told dr she could consider Butrans for those patients,if appropriate,I showed dr Butrans initiation guide and we discussed proper tapering and initiation of Butrans.dr said ok and asked about insurance coverage for medicaid patients as thats majority of their patients.we talked about prior authorization for medicaid and i asked dr to think of BWC and commercially insured patients to try Butrans in and dr said ok she'll keep it in mind she thinks Butrans is a good medication.I recommended Senokot-S
PPLPMDL0020000001					

PPLPMDL0020000001	Cleveland	OH	44143	6/10/2011	I asked doc if he had an opportunity to reueiw the Butrans FPI and the clinical trials. He said "no, i don't think so." I reminded him of the 7 day analgesic delivery for patients that fail on NSAIDs/tramadol. He said ok. Nothing more learned.
	Solon	OH	44139	6/10/2011	Had Butrans webinar by Rupa and Mary Cook with Jackie dialing in and Mike and I in the conference room. Mike asked if patches are what pain Docs like to prescribe first and Jackie asked how Butrans compared to Duragesic. Mike said he will know the policy MH is recommending to the P&T Committee on Wed and he will let me know ahead of time. If their P&T decides a May Add then Dan and Mike will have to go to Caremark to gain agreement too. MH's P&T Committee will dissolve after next weeks meeting where they are required to go to Caremark's P&T Committee. Mike checked Butrans utilization and found there to be over 250 Rxs for it. He said this is average for new drugs but the cost is slighly higher than \$200 per Rx. Caremark may run their Part-D business out of Solon so Mike believes so far their jobs are safe. I shared the new resources "Storage/Disposal" which he liked esp because it was done in cooperation with APCA. We reviewed wording on OC marketing pcs where co-pay amts aren't good.
PPLPMDL0020000001	Parma	OH	44129	6/10/2011	Quick call- Dr Roheny said that I picked a very busy day to come in, so he did not have time to talk today. I told him I would return next week so that we could discuss Butrans in more detail. He said he would look forward to it. I also offered the June 16th webcast.
PPLPMDL0020000001	Beachwood	OH	44122	6/10/2011	Quick call- Dr Tabbaa said that he did not have time to talk to me today but that he does not have any questions about Butrans & that things are going "fine" with it. Spoke with Randy (nurse) (Jim was off today) & discussed savings cards for both OxyContin & Butrans, reviewing eligibility. He said that he did not see any Butrans savings cards in their cabinet & that they are running low on OxyContin cards, so he requested both. He said he has not had a lot of patient contact with patients on Butrans yet. He said he usually works with Dr Bryan at the other office.
PPLPMDL0020000001	Cleveland	OH	44104	6/13/2011	I reviewed 5 Butrans core messages with dr,dr said he had a patient in mind to start on Butrans that was taking vicodin but she didnt want to take a patch.I told dr patients can still take vicodin and Butrans,i showed dr Butrans fpi,maintenance of therapy section and dr said ok he forgot about that.I showed dr Butrans initiation guide and asked dr to think of 2 patients taking percocet,daily,that arent controlled,and seeking another option,to start them on Butrans.dr asked where is Butrans covered? I talked to dr about BWC and commercially insured patients.dr said ok he'll think of a few patients and let me know what happens.I recommended Senokot-5
PPLPMDL0020000001	Waterford	OH	45786	6/13/2011	W - Miral said that she believes there is a place for Butrans. She said that she normally treats with codeine and tramadol. She said that if she must use hydrocodone she will but she would rather not. She asked about the adhesive or the ability of Butrans to stick for 7 days?I - Butrans follow up and review of indication and 7 days of therapy in 1 application with a CIII scheduling. Review of FPI and medication guide to discuss appropriate application sites, disposal as well as if the Butrans starts to come off the use of first aid tape around the edges. Formulary coverage review - BWC and commercial plans with a 3T status. Savings card program eligibility.
PPLPMDL0020000001	Waterford	OH	45786	6/13/2011	W - She said that Butrans may be a good option for patients that are hesitant to be put on other long acting meds for fear of one reason or another. She said she normally will treat patients with hydrocodone and then if the pain becomes chronic she will let Dr. Waters prescribe their pain meds. I - Butrans review of indication and 7 days of therapy in 1 application with a CIII scheduling. Discussion of appropriate patient selection after vicodin when the indication is met. Review of formulary coverage and patient eligibility for the savings card program.
PPLPMDL0020000001	Lakewood	OH	44107	6/13/2011	I asked the dr what benefits he sees in Butrans, he asked me if he could start his month-in law on Butrans. I told him that it does sound like an appropriate patient type however managed care will be difficult for older patients. I encouraged him to find other appropriate patients on low dose hydrocodone or OxyContin who have commercial insurance. I spoke with Pat and we reviewed the savings cards and managed care for Butrans.
PPLPMDL0020000001	Lakewood	OH	44107	6/13/2011	I reviewed our last conversation about the appropriate patients about Butrans, I asked if he would have a patient coming in today who will ask for an increase in their tramadol or low dose vicodin. He said he probably will see that type of patient and he agreed to think of Butrans as an option if they have commercial insurance coverage. I reviewed the managed care with the staff and asked them to help identify appropriate Butrans patients. We discussed OxyContin as an option that is covered on Medicaid.
PPLPMDL0020000001	Waterford	OH	45786	6/13/2011	W - Waters discussed that patients uncontrolled on short acting meds that are uncontrolled would be patients he would consider for Butrans. Patients who are hesitant to take morphine or even oxycodone would be patients to consider as well. I - Butrans review of indication and 7 days of therapy in 1 application with a CIII scheduling. Discussion of appropriate patient selection after tramadol/vicodin when the indication is met. Review of formulary coverage - BWC and commercial plans with a 3T status. Patient eligibility for the savings card program. Discussion of OxyContin formulary coverage as well as savings card program eligibility.
PPLPMDL0020000001	Cleveland	OH	44113	6/13/2011	worked dr bohl's office-orthopedic at lutheran hospital - lunch with them; worked lutheran hospital out-patient pharmacy-see call notes
PPLPMDL0020000001	Cleveland	OH	44195	6/13/2011	worked anesthesia/pain management dept-left Butrans fpi,initiation guide,patient information booklet and formulary grid,my business card for Dr.Stanton-Hicks and Dr.Vrooman as i couldnt see either physician. worked neurology dept-left Butrans fpi,initiation guide,patient information booklet and formulary grid,OxyContin fpi,conversion guide,formulary grid for OxyContin with my business card for Dr.Kriegler,Dr.Mays,Dr.Spears and Dr.Stillman as representatives can't see doctors unless they call you for an appointment,per secretaries. worked spine center-left Butrans fpi,initiation guide,patient information booklet,formulary grid and my business card for Dr.Schaefer,Dr.Mazane and Dr.Zachary-same rule as above,doctors call representatives if they want to set-up an appointment
PPLPMDL0020000001	Akron	OH	44333	6/13/2011	I asked Linda how many patients she currently had on a low dose SAO and were not stable. She said she had those patients and would keep Butrans in mind. I asked if she had any coming in later today and she said she was not sure. I reminded her to focus on patients with commercial insurance.
PPLPMDL0020000001	Akron	OH	44333	6/13/2011	I asked Dr. Griffiths about her success on Butrans and she said everything so far was good. She said she now had a handful of patients on therapy. She said she was focused on patients with private insurance but many patients she thought of as Butrans patients had a state plan.
PPLPMDL0020000001	Cleveland	OH	44113	6/13/2011	i talked to Maria,Pharmacy Technician and Justin,Pharmacist,about Butrans stocking,scripts they are seeing and doctors prescribing,the majority are from dr shen and a few from dr bohl in past few months.we talked about importance of pharmacy staff showing patients Butrans patient information booklet section on application and rotation of Butrans,cleaing site with water only and log book section of booklet,they all agreed to do this with patients.i asked Justin if he would give Butrans patient information booklets to patients who ask for something different if their short-acting opioids arent controlling their pain? Justin said he would do that.we discussed Butrans formulary coverage and patient savings cards and i recommended Senokot-5
PPLPMDL0020000001	Akron	OH	44333	6/13/2011	I asked Becky about starting some opioid naive patients. She said that she writes a couple new hydrocodone Rx's each week. I explained that those patients could potentially be Butrans patients.
PPLPMDL0020000001	Lakewood	OH	44107	6/13/2011	I asked Dr what types of patients he feels would be best for Butrans. He said for those patients with chronic pain and he does not want to increase the number of pills. We reviewed the invitation guide and how to initiate Butrans. I asked if he would start few new patients this week and he said he will try. Reminder about OxyContin as an option, he said he does continue to use it in the hospital.
PPLPMDL0020000001	Fairlawn	OH	44333	6/13/2011	I asked Dr. Oyakawa if he truly thought he would initiate Butrans therapy to a patient and he said he would. He said he would keep it in mind.
PPLPMDL0020000001	Fairlawn	OH	44333	6/13/2011	I asked Dr. Weidman if she would consider writing Butrans in instances where patients were calling asking to be titrated on their current SAO's. She said she would try it.
PPLPMDL0020000001	Cleveland	OH	44113	6/13/2011	dr said he's been contacted by Purdue medical services about his 3 patients who had severe,systemic rashes from Butrans,all 3 cases occurred within a few days after applying Butrans.all of the AE information was reported in April and i called June 1st as i wasnt sure if there were more patients who had more Allergic reactions per a discussion with dr.bohl's medical assist,Aurora.dr bohl said there are only 3 patients,but thats 75%,if it was 1 out of 4 patients,he would consider prescribing Butrans again but because this was 3 out of 4 patients,he's not going to prescribe Butrans again.dr said he's disappointed as he liked that Butrans was a patch and his patients were intrigued by this option.dr said purdue wanted all of his patients information,he sent that 2-3wks ago,we called purdue med svcs who transferred us to product complaint and spoke with "trish",who said there were no notes in system of patients feedback yet.dr asked if someone could call him once they had more patient info
PPLPMDL0020000001	Cleveland	OH	44102	6/13/2011	i talked to Vince,Pharmacist,about Butrans 5 core messages.Vince said he likes that Butrans is transdermal and once weekly dosing is easier for some patients but they have a lot of patients who like their vicodin and percocet every day so Butrans isnt for everyone.i agreed with Vince and showed Vince Butrans initiation guide and asked him if patients ever tell him their short-acting opioids arent lasting long enough? Vince said yes they do hear that.i asked Vince if some of these patients could possibly benefit from a long-acting opioid like Butrans? vince said some patients might benefit but thats up to the doctor to change patients medications.i asked vince if he would recommend Butrans to doctors,if patients tell him they arent getting pain relief from their short-acting opioids? Vince said he might do that depends on dr.i left Butrans patient information booklets and said if patients ask for something different,can he give booklets to them? Vince said he would.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44103	6/13/2011	i talked to Amy,Pharmacy Manager,about Butrans stocking and scripts she's seeing.Amy said she did get a Butrans script from one of Dr.Boyd's patients.i asked amy to focus on Butrans application and rotation section in Butrans patient information booklet and the log book section so patients are aware of this critical information.Amy said she would do that.i asked Amy if she would recommend Butrans to those patients that tell her their short-acting opioids arent lasting long enough and they want something different? Amy said she might do that with a couple of patients and have them talk to their doctor.we discussed Butrans 5 Core messages,initiation guide and Butrans formulary coverage.i recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44104	6/14/2011	i reviewed 5 Butrans core messages with dr,we talked about appropriate patients to start on Butrans,dr said if patients are taking short-acting opioids for their chronic pain,every day and not getting pain relief or telling him the medications wearing off sooner than it should,he's considering Butrans for them.we talked about dr considering a couple of his tramadol patients that arent getting pain relief,to consider Butrans before he starts them on vicodin,dr said he will do that.we discussed insurance coverage briefly and i recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44113	6/14/2011	i reviewed 5 Butrans core messages with dr,i asked dr who are the appropriate patients to start on Butrans? dr said patients taking a couple pills a day and not controlled and asking her for more pills.dr said she's starting patients on Butrans and then giving them 30 pills a month of short-acting opioids for break through pain.we talked about dr considering her percocet patients that are taking 1-2,5mg tabs,a day and not controlled and asking for something else,dr said she will consider Butrans earlier in therapy.we discussed formulary coverage for Butrans.
PPLPMDL0020000001	Cleveland	OH	44106	6/14/2011	i reviewed 5 Butrans core messages with dr,showing dr Butrans visual aid for the discussion.dr said he likes that Butrans is transdermal and dosed once a week and the fact its a CIII is much easier for the office staff to call in refills.i asked dr who was the appropriate patient to start on Butrans? dr said he thinks patients taking short-acting opioids like tramadol or vicodin,daily for chronic pain,that arent getting pain relief,should try Butrans.I showed dr Butrans initiation guide,discussed tapering of short-acting opioids and initiation of Butrans.we talked about insurance coverage and i asked dr if he would consider 2 patients to start on Butrans,per our discussion? dr said he will do that but he's finishing his fellowship here at UH the end of June,then moving back home to KY. i recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44113	6/14/2011	i reviewed 5 Butrans core messages as dr said he only remembered that Butrans was a patch,i asked dr who he felt was the appropriate patient for Butrans? dr said he has so many patients taking vicodin and percocet,he writes those medications daily and hates it,dr said he thinks these chronic pain patients who are not controlled on their vicodin or percocet should be the one's starting on Butrans.I showed dr Butrans initiation guide,discussed tapering of short-acting opioids and initiation of Butrans and dr asked if Butrans was covered on Medicaid.i asked dr if that was a large patient population for him? dr said yes,he has a lot of medicalaid patients and a few commercially insured patients.i talked to dr about Prior Authorization requirements,for medicalaid,dr said he rarely writes long-acting opioids,CII's,so he probably wont be able to start medicalaid patients on Butrans.I told dr its easier to focus on 2 commercial plan patients,use savings cards and give patient information bookletsfont color=blue>=b>CHUDAKOB added notes on 06/23/2011</b></font>Amy, please try to limit your notes on the call to the topic section and not have if flow into the next call objective. Continue to work on shortening your call notes. I know you can do this!
PPLPMDL0020000001	Cleveland	OH	44106	6/14/2011	i reviewed 5 Butrans core messages with dr,we talked about appropriate patients to start on Butrans,dr said he's continually starting patients on Butrans that are taking 1-2 5mg tabs of percocet a day and not controlled and asking him for more pills,dr said when patients start asking for more pills that his sign that a long-acting opioid could be more appropriate if percocet isnt lasting long enough.I showed dr Butrans initiation guide,we talked about his percocet and vicodin patients,after 1-2 tabs,isent controlling patients pain,to not refill scripts or increase dosage strength/interval but to consider Butrans.dr agreed and we discussed briefly managed care coverage for Butrans.i recommended Senokot-5
PPLPMDL0020000001	Parma	OH	44134	6/14/2011	Dr Scanlon said that to be honest, he has not thought of Butrans. He said that he even left the initiation guide I had given him in his mailbox at the Parma office to help him remember. I reminded him that he has said that he has no clinical objection to Butrans & asked if that is still the case- he said yes. I said it sounded like he does see merit in Butrans & asked if that is the case & he said yes. I reminded him that we have been talking about patients who take Vicodin or tramadol every day & asked if this causes him to think of any specific patients- he said yes. I suggested he flag the charts. He said that because he has 2 offices this can be tough, so he said he would place an initiation guide at his station where he does notes. Discussed ability to call in prescriptions & asked that he do this when he thinks of specific patients. He said he would do this. Reviewed savings cards for

PPLPMDL0020000001	Cleveland	OH	44103	6/14/2011	dr said she's started a few more patients on Butrans,we talked about 5 Butrans core messages and why she's choosing Butrans as an option for patients.dr said she likes that Butrans is long-acting and is a patch and she's still giving patients some short-acting opioids for break through pain as needed.i showed dr Butrans initiation guide,discussed percofet patients not getting control and dr considering Butrans for them instead of increasing dosage strength or interval.dr agreed,we talked about Butrans formulary coverage and i asked dr to continue starting patients on OxyContin,when appropriate,discussed 7 tablet strengths available and OxyContin formulary coverage.dr said she will continue starting patients on OxyContin,its a good long-acting opioid and it works so she's happy with OxyContin and no problems with insurance coverage.i recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44113	6/14/2011	i reviewed Butrans 5 core messages with dr,talked about appropriate patients for Butrans and i asked dr to think of patients who are taking vicodin earlier in therapy,not waiting till they are at 40mg vicodin a day.dr agreed saying he is thinking of patients who arent controlled,after 10-15mg vicodin doesnt control pain anymore.we discussed Butrans formulary coverage and i recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44130	6/14/2011	i asked Dr Diab if, since Butrans is CIII, he would consider calling in prescriptions for Butrans for appropriate patients who call in for refills of their pain medications too soon rather than waiting for them to come into the office to see him. He said that he does not ever call in prescriptions for any pain medications.
PPLPMDL0020000001	Cleveland	OH	44113	6/14/2011	i had an in-service with dr and med assistants to discuss Butrans-appropriate patients i showed Butrans initiation guide for discussion,dr said she understood that Butrans is for patients taking tramadol,vicodin or percofet but not controlled,so earlier in therapy than later.i showed Butrans patient information booklet,discussed application/rotation of Butrans and we discussed formulary coverage for BWC and commercial patients.dr asked about medicaid coverage so we discuss Prior Authorization requirements for Butrans.i asked dr to think of a couple patients taking tramadol but not controlled and perhaps Butrans could be an option.dr agreed and said she'll think of patients to try Butrans on and let me know what happens.
PPLPMDL0020000001	Munroe Falls	OH	44262	6/14/2011	i reintroduced Butrans to Dr. Kolacewski via the FPI and after identifying appropriate patients asked if she had patients she felt could benefit from this therapy. She said she did and that she especially was thinking of patients who were on a SAO.
PPLPMDL0020000001	Parma	OH	44129	6/14/2011	Dr Ortega said that he is still trying patients on Butrans but has not received any additional feedback yet. i asked if he considers this a good sign & he said he does. He said that he has a patient who has intermittent pain & takes Vicodin or Percocet for it when it occurs. He asked me if this would be a potential Butrans patient. i told him that Butrans is contraindicated for intermittent or PRN pain. He said he would continue to look for additional patients for Butrans. Also recommended OxyContin for appropriate patients beyond Butrans 20mcg. He said that he still uses OxyContin for patients.
PPLPMDL0020000001	Westlake	OH	44145	6/14/2011	Spoke with Deanna, we reviewed the key messages for Butrans and appropriate patient types. i asked if she could think of any appropriate patients who refill their short acting month after month and she said lots of people do but she would be surprised if they wanted to give up their pills. i asked her to recommend Butrans as another option and she will keep it in mind. We reviewed OxyContin as an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Parma	OH	44129	6/14/2011	Spoke with nurse, Kathy, who said that Dr Tolentino was way too far behind today to see me. Reminded her of our recent lunch & Butrans discussion. She said she doesn't think that Dr Tolentino has prescribed Butrans for anyone yet but said she would remind her for appropriate patients. Kathy requested more Senokot-5 & Colace samples as they were running low.
PPLPMDL0020000001	Cleveland	OH	44106	6/14/2011	i reviewed 5 Butrans core messages with dr,we talked about appropriate patients dr can consider starting on Butrans,dr said he knows that he has a lot of patients taking tramadol and some of them arent controlled and could benefit from a long-acting opioid like Butrans.dr said he's been traveling so much and not seeing that many patients,when he's here he's doing a lot of procedures.i asked dr to think of a few patients today,as he's seeing patients,taking tramadol that arent controlled and are asking him for something else,to start them on Butrans.dr said he will do that and asked me to talk to Lisa,Patent Care coordinator who takes all medication refill requests.i talked to Lisa about appropriate patients for Butrans,showed Butrans initiation guide and asked her to recommend Butrans to dr when patients are taking tramadol but calling her saying they arent getting control or tramadol isnt lasting long enough,she agreed to do so and said she'll work with dr.i recommended Senokot-5
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	6/14/2011	i asked Dr. Bicak if she had the opportunity to prescribe Butrans and she said she had not. i asked if he has seen ANY patients who were currently not stable on their current low dose SAO. She said not that she recalled.
PPLPMDL0020000001	Mayfield Heights	OH	44124	6/14/2011	Reminded Debbie that Butrans is a CIII which means it can be called in and refilled. She said she remembers but most patients come back every month. Thanked her for her support and fave her patient info guides.
PPLPMDL0020000001	Mogadore	OH	44260	6/14/2011	Dr peeked head out and said he has written Butrans and he thinks the others may have also and that they need more savings cards. Rmeinded to use in commercial patients and commercial plans.
PPLPMDL0020000001	Cleveland	OH	44113	6/14/2011	in-service for Dr.Gadmack and her medical assistants on Butrans, worked pain management dept-saw dr shen
PPLPMDL0020000001	Westlake	OH	44145	6/14/2011	Quick call, i reviewed our last conversation about Butrans being covered on BWC. i asked if he has any red charts that are coming in today for an increase in their short acting medication that he could convert to Butrans. He said he will look. i spoke with Angela and she flagged a chart to remind the Dr to discuss Butrans.<font color=blue><b>CHUDAKOB's query on 06/24/2011</b></font>Good!!! Did you follow-up the next day to insure the patient got Butrans?<font color=green><b>HOLLUBA's response on 06/27/2011</b></font>I followed up the next Tuesday which was the first day i could as he is only in my territory 2 days a week and i was on vacation on Thursday. i spoke with Angela and they did not switch the patient because the patient wanted to stay on short acting. Dr did try to write another script but it was for Medicaid and did not go thru. i'm trying to get him to focus on commercial and BWC.<font color=blue><b>CHUDAKOB added notes on 06/30/2011</b></font>OK. Sounds like you are at least getting him to think of it.
PPLPMDL0020000001	Stow	OH	44224	6/14/2011	Steve said he started a patient on Butrans last week. i asked what made him write it and he said he has been coming to his mind a little more and he thought of it with this patient because he did not want to prescribe them pills. HE asked if it is covered on BWC and i said yes. HE said he can think of some other patients who it may work with. RMeinded him that it is still the only schedule 3 once a week analgesic.
PPLPMDL0020000001	Akron	OH	44310	6/14/2011	i asked Dr. Cremer about his success with Butrans and he said that patient seem to like it so much that they even went through a prior auth process to get it approved for a Medicaid patient.
PPLPMDL0020000001	Rocky River	OH	44116	6/14/2011	Quick call with Leigh Ann, we reviewed the key messages for Butrans and how to instruct patients on proper use. She has not seen any scripts yet. Reminder about OxyContin as long acting option.
PPLPMDL0020000001	Richmond Heights	OH	44143	6/14/2011	Quick call...Spoke to Mel about the stocking of Butrans. He confirmed that the has it and he said he has seen maybe one script and it was for medicaid. He said it went through but he did not remember anything more. i explained the commercial coverage and the savings cards before he walked away.
PPLPMDL0020000001	Mayfield Heights	OH	44124	6/14/2011	Window call...Reminded doc of the Butrans coverage with commercial plans and BWC. Provided formulary grid reminder and patient information booklets. Nothing learned.
PPLPMDL0020000001	Westlake	OH	44145	6/14/2011	i reviewed the 5 key messages for Butrans and asked if he has any patients coming in today on low dose hydrocodone where he could try Butrans. He said he will give Butrans a try.
PPLPMDL0020000001	Cleveland	OH	44130	6/14/2011	Dr Fedorko congratulated me. i asked what for. He told me that he has a patient who will be picking up a Butrans prescription tomorrow. i asked him to tell me about the patient. He said that she has had back surgery prior & still has pain. i asked what she has been taking for it. He said that she was taking Percocet but was getting nauseated & constipated from it. He picked up his initiation guide & showed me page 6, telling me he would be starting her on the 10mcg dose. i told him it sounded like he was prepared. He said that she was a Mediare patient & asked if it would be covered. i told him he would have to do a prior authorization & it would depend what the plans requirements were. He said he hopes they approve it.Recommended Senokot-5 for opioid-induced constipation.
PPLPMDL0020000001	Twinsburg	OH	44087	6/14/2011	Spoke with pharmacist, Michelle, & asked her about the managed care make-up of this store. She said that if she had to put a percentage on it, she would estimate that 10% is Medicaid, 30% is Medicare, & the rest is commercial insurance. Discussed savings programs & eligibility for savings programs. She said she did not need any more OxyContin savings cards at this time.
PPLPMDL0020000001	Stow	OH	44224	6/14/2011	Sharon said she has not written Butrans yet but she has been following the other PAs and she said she has just started writing. RMeinde her that it is schedule 3 and she said that is important to her and that it is once a week. She said she would write it. Rmeinded of managed care.
PPLPMDL0020000001	Cleveland	OH	44104	6/14/2011	i reviewed 5 Butrans core messages with dr,i asked dr who was appropriate for Butrans? dr said if patients are taking vicodin or percofet and maxed out on dosage strengths and dr doesnt feel comfortable giving more pills,he's thinking Butrans could work there.dr said he likes that Butrans is a patch and dosed once a week but he has a small percentage of chronic pain patients.dr asked about insurance coverage for Medicaid as thats biggest group of patients,we talked about Prior Authorization requirements for medicaid patients to try and get Butrans approved.i told dr to think of 2 patients,commercial plans,that can use Butrans patient savings cards,dr said ok he'll see what he can do.i recommended Senokot-5
PPLPMDL0020000001	Westlake	OH	44145	6/14/2011	Quick call,i asked how many of her patients complain that their short acting medication is not controlling their pain. She said she has a few. i asked her to prescribe Butrans instead of increasing their short acting and she said she will keep it in mind.
PPLPMDL0020000001	Akron	OH	44333	6/14/2011	i asked Dr. Shah about refills and how he writes them. He said he has his patients come back each month for a refill. He also said that although he likes Butrans therapy the majority of patients he started on therapy were on State plans and have been unable to continue to get it approved.
PPLPMDL0020000001	Brooklyn	OH	44130	6/14/2011	Spoke with Renee (pharmacist) & reviewed Butrans patient information booklet. She showed me the Butrans boxes on the shelf & said that she thought the guides would help customers, especially when they are picking up their first Butrans prescription. She said that while they do not have a lot of customers on Butrans, they do have a few & it may be helpful for them. She then got a phone call from a customer she had to answer.
PPLPMDL0020000001	Stow	OH	44224	6/14/2011	Dr said he has written some more scripts. i said Marcy said that 2 of them needed PA and one did not go through because it was medicare. i reminded him it is PA in medicare and that he will have more success in BWC and commercial. HE asked to see grid and then said it is covered on BWC and i said yes.HE said he sees alot of BWC that it would work with.i asked how many new patients he sees a wweek and he said about 20. i asked for 10 of those new patients if they are appropriate and he said he would try. i asked if there is anything that is preventing him from writing more Butrans and he said no, he just forgot about it this week but has w ritten some a couple of weeks ago.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	6/14/2011	Quick call through window. i asked Dr. Sable if he had any patients that he was seeing this week that were asking to be titrated on their current SAO therapy. He said he didn't know off the top of his head. i explained that if he did maybe those patients would benefit from Butrans therapy.
PPLPMDL0020000001	Stow	OH	44224	6/14/2011	Dr said he wrote his first script of Butrans and the patient got nauseated. i asked what dose and he said 5mcg, he took him off. HE said he will try more patients. i asked what made him write this script, he said it just came to his mind when the patient was talking and he thought it would be a good fit. HE said he has now written one he will write more. i said what makes it different from the others and he said less diversion. i said it is C3 and still has the potential for abuse as any other C3. HE then started talking about scheduled medication and Oxycontin and the problems with abuse and diversion. HE asked again about the new formulation and asked what is in the coating and i told him we can fill out a medical request and he said that is ok. HE said his pharmacy is closed provider, he will only be stocking what they write, i asked if he will be stocking Butrans and he said yes.
PPLPMDL0020000001	Mayfield Heights	OH	44124	6/14/2011	i reviewed the Butrans indication and asked doc where she would use a product like Butrans. She asked if it is along the lines of darvocet. i told her no and that Butrans is a 7 day CIII. i confirmed that it could be called in and refilled. She asked about side effects. i referred to the AE section of the FPI as she was particularly curious about skin rash. i pointed out the incidence of skin reactions per FPI. She asked if it really stays on for 7 days. i told her that the feedback about adherence has been very positive. She asked about the starting dose. i reviewed the proper initiation. She also asked if Butrans can also be used for withdrawal. i told her not at all - only indicated for pain, not withdrawal. Reviewed the formulary coverage and savings cards. Reminded her that oxycontin would be appropriate after 20mcg/hr of Butrans.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	6/14/2011	Went over the patient education guide with pharmacist. Discussed the ideal type of Butrans patient and the core message i was delivering to local physicians.
PPLPMDL0020000001	Mogadore	OH	44260	6/14/2011	Spoke to Jerry and he said they are stocking butrans, He said they have seen some scripts. i asked from Cain and he said he could not remember. Rmeinded of safety information with direct heat and application. He said they do not do alot with Oxycontin. Discussed SenS with him for opioid induced constipation.
PPLPMDL0020000001	Westlake	OH	44145	6/14/2011	i told Dr I've been in week after week, what is his hesitation about it, and he doesn't have that many patients who request a medication change but he is keeping it in mind. i asked if he would just find one patient to try Butrans and he agreed. He said he does have a handful of patients on OxyContin still and many of his might need OxyContin as a next step after short acting vs going to Butrans.
PPLPMDL0020000001	Stow	OH	44224	6/14/2011	Dr said he has not tried Butrans. He said he does more of the procedures. HE said he feels the window may be limited in their practice because most people come in on alot of Vicodin. i said what is a lot of Vicodin and he said 6 pills a day. i said he can still go to Butrans, and he said if they are no longer controlled he will go to something stronger and procedure. HE said they are coming out with alot of good pain medications the last couple of years and i said what do you think stands out with Butrans and he said long acting, C3 and he feels it would have less diversion. i reminded him that it is schedule 3 and that it still has the potential for abuse as any other schedule 3. HE said he will keep it in mind.
PPLPMDL0020000001					

PPLPMDL0020000001	Twinsburg	OH	44087	6/14/2011	Introduced myself & Purdue's product portfolio to Dr Hillard. Delivered Butrans 5 core messages & alerted him to box warning. I asked him where/how he typically uses opioids in his practice. He said that he does have some patients who he is comfortable prescribing for, but as a general rule he does not like to prescribe them. He asked if Butrans could be used for a patient for 2-3 months. I asked him what period of time he considers "chronic". He said over one month. He asked if there was any information about patients building a tolerance to Butrans vs other that tendency in other opioids. I told him we do not have any comparative data but offered to submit an e-MIRF & he accepted. He asked how he would take someone off Butrans. Told him we recommend a gradual taper, like he would do with other opioids. I asked him if he thought Butrans sounded like something he would ever utilize & he said he is thinking of a few specific patients he may consider it for.
PPLPMDL0020000001	Westlake	OH	44145	6/14/2011	I asked Dr when he decides to prescribe Butrans. He said he does not like to prescribe opioids in general, but thinks Butrans is great for patients who are taking a few vicodin per day. I asked if he would write for this type of patient this week and he said he will try. Dr said that he is happy that Purdue reformulated OxyContin. I discussed the field card for his review.<font color=blue><b>CHUDAKOB's query on 06/24/2011</b></font>Why is he happy we reformulated it if he doesn't prescribe opiates? He doesn't write it anyway. You could also clear up misconceptions about the reformulation by clarifying what he meant.<font color=green><b>HOLUBA's response on 06/27/2011</b></font>We had discussed this in the past and he is happy about it because he has increased business in his addiction clinic. I have reviewed the field card with him several times and that we have no data to support OxyContin being harder to abuse.<font color=blue><b>CHUDAKOB added notes on 06/30/2011</b></font>I see.
PPLPMDL0020000001	Mayfield Heights	OH	44124	6/14/2011	I reminded doc of our previous lunch and his expressed interest in Butrans. I asked what risks/disadvantages he sees with trying Butrans. He said he has no reservations about it. I asked him to try 1 patient this week that meets the indication. He asked me to leave the initiation guide. He has savings cards.
PPLPMDL0020000001	Euclid	OH	44117	6/14/2011	Opened the call by asking doc about patients that fail on tramadol or max out on tramadol...what does he do next. I reminded him that he said he might use Butrans for those patients. He stated that he does see a place for a long acting CII. He said he is definitely going to find a place for it. He brought up the Senate Bill 93. He said that things will likely be changing and he is not sure how. I reviewed the initiation dosing and the coverage on Spoke with Eve (pharmacist) & reviewed Butrans patient information booklets. She said she would like to keep on one hand so that she can reference it if she gets any questions about Butrans from customers. She said that she has not yet dispensed Butrans, but she has gotten 2 prescriptions for it. I asked her to clarify. She said in both cases, the patient had Medicare. She said in one case, it got denied & in one case it was approved but the co-pay was too high for the patient to pay for it. Reviewed managed care & savings cards/eligibility. Also discussed appropriate Butrans patient/positioning. Asked if she needed additional OxyContin savings cards but she said they are OK for now.
PPLPMDL0020000001	Cleveland	OH	44114	6/15/2011	I talked to dr about 5 Butrans core messages, appropriate patients for Butrans and we talked about patients dr is continually starting on Butrans. dr said she started a few more patients recently as these were patients taking vicodin and percocet but not controlled and wanting something different, so dr thought Butrans would be a good option. I showed dr Butrans initiation guide for discussion and asked her to continue thinking of patients to start on Butrans. dr agreed and said she is seeing positive results in patients. we talked about Butrans formulary coverage and patient savings cards and I asked dr to also give patients Butrans patient information booklets when leaving office with a script, dr agreed. I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	6/15/2011	I talked to dr about her patients taking tramadol, daily, that arent controlled and asking her for something else, to consider Butrans if patients are appropriate. dr said she likes that Butrans is a patch and once weekly dosing could be easier for some patients but she has a lot of medical aid patients and she's not willing to do the prior authorization for Butrans because she doesn't write much long-acting opioid medications so it won't work. I asked dr to focus on 2 patients commercially insured, that are taking tramadol but not controlled, and start them on Butrans. dr said she'll think about it but doesn't have a lot of commercial insurance. I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44195	6/15/2011	I talked to Kathy, PA, about Butrans 5 core messages, showed visual aid for discussion and I showed Kathy Butrans initiation guide and asked her to consider her tramadol patients taking tramadol daily that arent controlled and asking her for something different, to start them on Butrans. Kathy said she does like Butrans being transdermal and loves the once weekly dosing but she's not heard from patients that they want to stop their pills. we talked about Kathy starting a couple of patients on butrans but still giving them some tramadol for breakthrough pain, I showed Kathy Butrans fpi, maintenance of therapy section, for this discussion. Kathy said ok she'll think about it. I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44195	6/15/2011	I talked to dr about 5 Butrans core messages, dr said she likes that Butrans is transdermal and dosed once weekly but she doesn't have a lot of patients on narcotics and tries not to put her patients on narcotics. I talked to dr about her tramadol patients taking tramadol daily that arent controlled and asking for something different to consider Butrans. dr said she might if patients ask for something else, we also talked about patients that call in for refills earlier every month as that might be a sign that a long-acting opioid is appropriate. dr said ok she'll keep in mind. we talked about Butrans insurance coverage. I recommended Senokot-S
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	6/15/2011	I asked Dr. DiLauro what type of specific patient she had in mind to initiate Butrans therapy to. She said that while she maintained some patients on their current therapy she does not like to treat chronic pain and therefore treats little of it. She said she like the idea of Butrans and would initiate to the appropriate patients.
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	6/15/2011	I asked Dr. Axem about her success with the patient she had trailed Butrans on. She said her success was good as far as she knew. I asked if she would then consider it on other appropriate patients. She said she would keep it in mind.
PPLPMDL0020000001	Cleveland	OH	44113	6/15/2011	I reviewed 5 Butrans core messages with dr, discussed appropriate patients to start on Butrans, dr said he's not sure if he has any patients for Butrans as most of his patients have acute pain. dr said he likes that Butrans is a patch and dosed once a week as that might be a good option for some of his chronic pain patients but he doesn't have a lot of chronic pain patients. I asked dr to consider Butrans for 2 patients taking vicodin or percocet and not controlled, that meet Butrans indication (showed Butrans visual aid for discussion) dr said he would do that. dr asked about insurance coverage so we discussed that too. I recommended Senokot-S
PPLPMDL0020000001	Maple Heights	OH	44137	6/15/2011	Spoke with Jim (pharmacist) who said he does not have anyone on Butrans. I asked if he has seen prescriptions (ie getting prescriptions, but the patient's plan not covering it). He said he has not seen a single script. Reviewed appropriate patient type/positioning with him & also discussed patient information booklets. He said he would keep it on hand for patient counsel in the event that he sees a prescription. Jim said his OxyContin savings cards have expired & asked for more, so I provided them & reviewed eligibility.
PPLPMDL0020000001	Bedford	OH	44146	6/15/2011	Spoke once again with Dr Mahna's medical assistant who said he was doing a deposition today & so he could not see me. I asked if Wednesday is still generally the best day to see him & she said it is. She asked for my card & said she would give it to the office manager, the doctor's wife, to schedule an appointment. I let her know I have left my card a couple of times & am requesting a short appointment with Dr Mahna to discuss a product that he has not yet been detailed on. She said she would let the office manager know that when she requests my appointment. Reviewed Butrans indication, delivery system, & appropriate patient type with her. She said she would try to get me an appointment.
PPLPMDL0020000001	Lyndhurst	OH	44124	6/15/2011	I reminded HCP of the Butrans indication and that it is a CIII which means it can be refilled and called in. I asked her if being a CIII makes it likely that she would prescribe for appropriate patients. She said she would try it. I reviewed the commercial insurance plans.<font color=blue><b>CHUDAKOB's query on 06/24/2011</b></font>Look how you started this call! I reminded. You asked her a close ended question. Perhaps a question like, tell me your thoughts on a transdermal delivery system in pain medications. This might get her opening up a little more.<font color=green><b>SIMERTOC's response on 06/30/2011</b></font>Yeah. She seems less interested and hands off than the doc in terms of prescribing in general. I have to practice the "tell me your thoughts" spiel.<font color=blue><b>CHUDAKOB added notes on 07/02/2011</b></font>Keep working on it!
PPLPMDL0020000001	Cleveland	OH	44103	6/15/2011	I talked to Dave, Pharmacy Manager, about Butrans 5 core messages and we discussed appropriate patients for Butrans. Dave said he hasn't seen any scripts for Butrans. I asked Dave if he could recommend Butrans, if patients taking short-acting opioids aren't controlled and telling him their medications not lasting long enough? Dave said he might do that. I gave Dave Butrans patient information booklets to give patients for their information. we talked about appropriate patients for OxyContin, I showed OxyContin visual aid and we talked about OxyContin formulary coverage. I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44114	6/15/2011	I reviewed 5 Butrans core messages with dr, we talked about appropriate patients to start on Butrans and I showed dr Butrans initiation guide for discussion. dr said if patients are taking vicodin, percocet or oral morphine and arent controlled and asking him for more pills, he's talking to them about Butrans and starting them. we talked about proper tapering of short-acting opioids, initiation of Butrans and I asked dr to consider 2 more patients to start on Butrans. dr agreed. we talked about Butrans formulary coverage and I recommended Senokot-S
PPLPMDL0020000001	Independence	OH	44131	6/15/2011	I asked Dr Jack what has to happen for him to start writing Butrans. He said he just has "old habits" & he needs to get out of them. I told him he is a young doctor & that many older physicians have managed to remember & asked what he thinks the hang-up really is. I asked if he truly sees merit in Butrans. He said he does. He went on to say that he feels that transdermal products are generally good, effective medications. He also said he likes that Butrans is once weekly. He asked if Butrans is CII- I told him it is CIII but still carries abuse/addiction potential. He said he can't believe he didn't realize it was CIII. I asked if Butrans being a long-acting CIII meant anything for him & he said that it was an important feature that he never thought of before. Reviewed appropriate patient type. He said what he needs to do is choose one patient to try on Butrans, get their feedback, & go from there. I agreed this is a good place to start.
PPLPMDL0020000001	Independence	OH	44131	6/15/2011	Quick call- Dr Rob said he didn't have time to come back to lunch. I asked him if Butrans being a CIII that is long-acting meant anything to him. He said "perhaps" but then walked away. Spent time with Maria discussing Butrans appropriate patient type, delivery system, dosing & managed care/savings cards for eligible patients. I asked how she thought it could be used in the Rutkowski's practice. She said they both have a lot of patients who fit the patient profile. I asked her how we can get them to try some patients on it. She said that it just takes repetition with them & that eventually they will write it. She encouraged me to not give up & to just continue to come in to talk to them- I agreed.
PPLPMDL0020000001	Cleveland	OH	44114	6/15/2011	I talked to John, PA, about Butrans 5 core messages, we discussed appropriate patients to start on Butrans and John said he is recommending to both dr katz and dr marshall to start more patients on Butrans. John said patients with chronic pain will take 1-2 tabs of short-acting opioids one day and then if they have a bad day with their pain, they could take a lot more which concerns him because of the acetaminaphen levels being exceeded. John said he likes once weekly dosing and that Butrans is a patch. I asked John to continue recommending Butrans and he said he will. we briefly discussed managed care coverage for Butrans.
PPLPMDL0020000001	Akron	OH	44304	6/15/2011	Quick call. Dr. Amanambu came to the window and I asked about his Butrans potential. He said he was running behind and asked me to stop back next Thursday. No new info learned.
PPLPMDL0020000001	Cleveland	OH	44143	6/15/2011	Window call....I reviewed the Butrans indication and positioning for patients - opioid naive or those on low doses of short acting. I reminded him to focus on commercially insured patients and give them savings cards.
PPLPMDL0020000001	Akron	OH	44320	6/15/2011	Nothing learned.
PPLPMDL0020000001	Northfield	OH	44067	6/15/2011	I asked Dr. Bonyo why he had not yet felt comfortable enough to initiate Butrans therapy. He said he would give it a shot.
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	6/15/2011	Spoke with Sun-Li (pharmacist) who said that they do not have Butrans there & she had not heard of it. I reviewed with her the indication, dosing, positioning, savings program/e-voucher, & delivery system. I want the store policy is on ordering products. She said they will have to have a prescription before ordering. Also discussed OxyContin & asked if they stock it at that location. She said they do have it. She said I could bring more savings cards Dr. DiLauro said that she was having success with Butrans and liked it most for compliant issues. She said that many of her patients on low dose SAO's do not remember or like to take it multiple times a day and Butrans gives them another option.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	6/15/2011	I reintroduced Butrans to Dr. Dinsmore. I identified several patients that would be appropriate for therapy and I asked if he had any of those types of patients. He said he did. He said he would give Butrans a try and liked that it was a LAO and a schedule 3.
PPLPMDL0020000001	Rocky River	OH	44116	6/15/2011	Quick call with Stan, we reviewed the key messages for Butrans. He said that he still has not seen scripts at this location and they do not have a ton of chronic pain. We reviewed OxyContin as an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	University Heights	OH	44121	6/15/2011	Started to discuss the patient that is currently taking NSAIDs/tramadol daily....doc said he remembers...."the patch". He asked the name of it again. I told him Butrans and the indication. I reminded him that it is a CIII with 7 day delivery. I asked him if he sees any advantages to Butrans. He said as long as patients don't have to pay more. I reminded him of the commercial coverage and the potential cost of \$15 with the savings cards. I asked him to try it. NOTHING else learned before he started dictating.
PPLPMDL0020000001	South Euclid	OH	44121	6/15/2011	Window call....ASked doc what the recalls about Butrans. He said that it is a patch like fentanyl. I confirmed that it is a patch but not like fentanyl. It is a 7 day delivery and a CIII. I reminded him of the commercial coverage and the savings cards. He said he has some.

PPLPMDL0020000001	Warrensville Heights	OH	44122	6/15/2011	Spoke with MA Adrienne who said I missed Dr Zivic again. I asked if he has changed his hours as it seems that I can never catch him. She said that he has changed them slightly & is now at that location earlier on Wednesdays & leaves earlier to go to Hillcrest. She said the best time to catch him now is between 10-12 on Wednesdays. I asked if he is still doing lunches there & she took my card & said she would call me to schedule. Reminded her of Butrans & OxyContin savings cards for eligible patients. She said they have a lot of Medicare Part D but some commercial insurance.
PPLPMDL0020000001	University Hts	OH	44118	6/15/2011	I opened the call by explaining Butrans as a long acting CII option in lieu of prescribing hydrocodone ATC. I discussed the positioning - after NSAIDs/tramadol and before oxycotin. I asked him if he sees any merit to Butrans for his patient population. He said sure and asked about medical/medicare/BWC coverage. I reviewed the commercial coverage and the savings cards. He asked about side effects so I reviewed the AE section of the. He asked if patients are able to drive after starting on Butrans. I explained the risks similar to other opioids. I explained the appropriate initiation dosing. He said that because it is covered on BWC there is a better chance of him writing it. I reminded him of the oxycotin patient type and the preferred formulary coverage.
PPLPMDL0020000001	Warrensville Heights	OH	44122	6/15/2011	Dr Brooks said that he has been trying more patients on Butrans & has been getting good results. He said that he believes there will be more of a place for Butrans now with the passage of Ohio House Bill 93 which limits the amount of narcotics non-pain management physicians can prescribe. I reminded Dr Brooks that Butrans is CII & still carries abuse/addiction potential. He said that he feels that Butrans is "better" than short-acting opioids like Vicodin & Percocet because it has no street value. I told him it still carries abuse/addiction potential as it is an opioid. He said he realizes that but that is his medical opinion. He asked about managed care. Reviewed coverage & savings cards where applicable. Also reviewed savings cards for Butrans & OxyContin with Beth & Jazz (MA's) who confirmed that Dr Brooks has been prescribing Butrans more.
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	6/15/2011	Spoke with the pharmacist and reviewed the patient education guide. Explained application and disposal and explained steady state.
PPLPMDL0020000001	South Euclid	OH	44121	6/15/2011	Spoke to Laureen and tech about the stocking and movement of Butrans. Laureen had not seen any scripts but tech specifically remember a script from Debbie Bizjak. The script went through without any problems. I explained the positioning and how to properly apply and dispose of patch. Gave her a patient info guide and savings card sales piece.
PPLPMDL0020000001	Parma	OH	44134	6/15/2011	Dr Hernandez said that he is switching all his Vicodin patients to Butrans. He said that the only time a patient like this would not end up on Butrans is if he had anyone who had some sort of reaction that could not be controlled with other medications. He added that this has not happened yet. He said he wishes more primary care physicians understood Butrans & buprenorphine & would be more open-minded to switching patients to it. He said that he thinks Ohio House Bill 93 is going to effect the way many physicians prescribe due to limitations on the number of patients on chronic pain medications each doctor is allowed to have. I asked if it would impact the way he practices at all & he said no. He also said that he still feels that OxyContin is a good medication but added that he usually only prescribes it at low doses & sometimes chooses Butrans for the patients he would
PPLPMDL0020000001	South Euclid	OH	44121	6/15/2011	Spoke to Mitch about the stocking of Butrans. He said that they are stocking Butrans but he has not seen any scripts (He said that's my fault). He discussed with him the positioning of Butrans and the selling messages of Butrans. He asked about the insurance coverage. I explained the commercial coverage and the savings cards - medicare/medicaid not covered.
PPLPMDL0020000001	Bedford	OH	44146	6/15/2011	Dr Moufawad stopped & apologized for being so short during my last visit with him. He said things have been so busy & hectic for him that he did not have time to delve into detail about his Butrans experience but then felt bad after I left. Told him I understand & that I want to try to understand where his feelings about Butrans have come from & asked if he could tell me more about it. He said that one problem he has encountered is that when he has a patient on Butrans who also takes Percocet for breakthrough, the pharmacists give him trouble or report him for having patients on agonists & agonist/antagonists at the same time or too many opioids at the same time. He said the problem is that pharmacists don't understand Butrans & he feels that could get him into "trouble". He said he is still prescribing it for patients "here & there" & asked that I try to come in tomorrow to sit down with him for 5 minutes to discuss. I agreed.
PPLPMDL0020000001	Lyndhurst	OH	44124	6/15/2011	Quick call...Reviewed the Butrans indication, positioning, starting dose and how to apply. She asked again about medicare as she can think of some medicare patients. I explained the PA required for medicare/medicaid. Gave an initiation guide to review. <font color=blue><b>CHUDAKOB's query on 06/24/2011</b></font>Did you explain where it was covered on this call? Is she sold on the clinical benefits of Butrans? How do you know this?<font color=green><b>SIMERTOC's response on 07/07/2011</b></font>I reviewed the commercial coverage on this call as I do on every call whenever the question of medical/medicare comes up. Is she sold? When the patient is appropriate (i.e. coverage, has been on a short acting already)<font color=blue><b>CHUDAKOB added notes on 07/10/2011</b></font>If she is sold on the clinical benefits of the product, she would look for patients to put on Butrans.
PPLPMDL0020000001	Parma	OH	44129	6/16/2011	Dr Chagin said that he does intend to prescribe Butrans, but that he just hasn't thought of it. I showed him a demo patch & he said he felt that the adhesive seemed like it would be effective for the full 7 days. Reviewed with him the appropriate patient type/positioning & asked how frequently he sees or hears from patients like this - he said daily. I asked that he choose 1 or 2 patients who are calling too soon for refills or asking for increases or changes in their chronic pain medication to switch to Butrans. He asked if he could call Butrans in - I told him yes & reviewed dosing & initiation with him. Also reminded him of commercial insurance coverage & savings cards. He said he will prescribe Butrans for those patients. Also reviewed Ryzolet q24h dosing & managed care for Ryzolet.
PPLPMDL0020000001	East Cleveland	OH	44112	6/16/2011	Reminded doc that he said he would try Butrans for an appropriate patient that may be on a low dose of a short acting narcotic. He said he can't think about that now that the new senate bill has passed. He may stop taking new patients and treating pain. If he just keeps that patients that he already has most of them are on stronger doses of narcotics. I reminded him of the indication and max dose. He said he still has lots of patients on oxycotin and needed more savings cards. Provided same.
PPLPMDL0020000001	Brooklyn	OH	44144	6/16/2011	Spoke with MA Audrey who said Dr Deeb could not see me today. I asked her what the best way for me to catch him to follow-up on our previous Butrans discussion is. She said she would take my card & would call me to schedule a lunch. She also asked what Butrans is. Reviewed with her indication, delivery systems, dosing, & appropriate patient type/positioning. I attempted to leave an initiation guide, but Audrey said she cannot take any information at all. She said she would let me know about the lunch appointment.
PPLPMDL0020000001	Cleveland Hts	OH	44118	6/16/2011	I discussed the Butrans appropriate patient positioning and dosing - 5mcg/hr for opioid naive and low dose opioid, 10mcg/hr if converted from other short acting opioids. I asked doc where he is likely to prescribe. He said maybe switch after patient has been on another med. I reviewed the initiation dosing for those patients. Let him know of the savings cards for Butrans and Oxycontin.
PPLPMDL0020000001	Barberton	OH	44203	6/16/2011	I asked Dr Patel what he would need to know about Butrans for him to prescribe it consistently? He said he thought he was using it in all the appropriate patients and would continue to do so.
PPLPMDL0020000001	Akron	OH	44319	6/16/2011	I have continued to work with Dr. Yee in an effort to identify the most appropriate patients to start on Butrans therapy. He says he has many of the patients I have described and says he likes the concept of Butrans, since it is LA and a schedule 3. He said he would try harder to identify the right patients.
PPLPMDL0020000001	Parma	OH	44129	6/16/2011	Dr Gigliotti showed me his Butrans webcast invitation & told me he still plans to log on. I asked him what the real odds were that he would participate. He said 70%. I asked why he thinks he has not found a Butrans patient yet. He said he hasn't written any opioids lately because no patients with pain have been in. I asked what all he likes about Butrans & he said he likes that it is a transdermal medication, not an oral around-the-clock. He said the next patient who meets the indication & who he would prescribe an opioid for will be his Butrans patient. I also asked him to consider OxyContin q12h for appropriate patients beyond Butrans 20mcg.
PPLPMDL0020000001	Shaker Heights	OH	44122	6/16/2011	Dr Agarwal said that he has not yet prescribed Butrans but that he is interested in it. Showed him a demo patch & reviewed with him dosing, initiation, indication, & delivery system. He said that in the office he really does not maintain many patients on chronic pain medications. He said that the patients he has on chronic pain medications are those that he attends to in the nursing homes he goes to. Reviewed managed care coverage, including likelihood of having to complete a prior authorization for Medicare. He also said he has wanted to try Butrans on patients but wanted to wait because he didn't "want to be the first one" to prescribe it. I assured him that this would not be the case. He said he would start looking for patients to try Butrans on.
PPLPMDL0020000001	South Euclid	OH	44121	6/16/2011	Spoke to Stephanie about the indication and positioning of Butrans. I discussed the proper application and disposal per the patient information guide. She has not seen any scripts for Butrans so far. I reviewed the savings card program and the potential out of pocket cost.
PPLPMDL0020000001	South Euclid	OH	44121	6/16/2011	Spoke to Gary about the Butrans indication and positioning. They still do not have it stocked as no scripts received yet. He asked about coverage. I reviewed the commercial coverage and BWC. He asked about where to apply...I discussed the possible sites. He asked what to do if patients are particularly hairy. I told him they should keep the hair clipped if they may not be appropriate for Butrans. He said he would order when they get a
PPLPMDL0020000001	Akron	OH	44333	6/16/2011	I asked Dr Fouad if he had initiated Butrans therapy or if he thought he would. He told me that he was still looking for the right patient.
PPLPMDL0020000001	Barberton	OH	44203	6/16/2011	I asked Dr Minich about Butrans therapy and how often she was treating chronic pain. She said she felt comfortable treating chronic pain but was still unsure about initiating Butrans therapy. I asked what was most important to her before prescribing a drug for the first time and she said efficacy.
PPLPMDL0020000001	Highland Heights	OH	44143	6/16/2011	Window call...I reviewed with doc and Marianne the proper application of Butrans - to a clean dry site, clipped free of hair and to the possible sites. Marianne asked if it could be place on the lower back. Told her we have not studies on any other site but they can switch sides of the body. Provided formulary grid reminder.
PPLPMDL0020000001	Cleveland	OH	44130	6/16/2011	Spoke with Dr Sawhny's medical assistant who informed me that starting July 1st, Dr Sawhny will be leaving & opening a private practice in Building B. I asked if the staff will be going with him, but she said they could not because they all need the medical benefits that the hospital offers. She said he will be keeping the same phone number & advised me to call the new office after July 1st to schedule a lunch or appointment with him. She said he was not taking any product information at this time due to the upcoming move.
PPLPMDL0020000001	Cleveland	OH	44130	6/16/2011	Spoke with Dawn (pharmacist) who said that she has yet to see an actual prescription for Butrans. I asked her to clarify. She said she has taken a few phone calls from patients asking if they have it in stock, but the patients did not want to wait until Dawn could get it in the next day. I told her this is why I tried to get pharmacies stocked before launch & encouraged her to order now since she is hearing some evidence that it is being written. She said she did not need additional OxyContin savings cards at this time.
PPLPMDL0020000001	Akron	OH	44319	6/16/2011	I asked Dr. Wu what type of patient of his he thought would best benefit from Butrans. He said that he has some patients who are in need of being converted to a LAO and liked that Butrans was still a schedule 3. He asked again about initiation which I went over via the initiation and titration guide.
PPLPMDL0020000001	Akron	OH	44319	6/16/2011	Spoke with Gretchen, who is now familiar and had no questions regarding Butrans. I explained what I had been talking to Dr. Wu about and she seemed confident he would try it.
PPLPMDL0020000001	Bedford	OH	44146	6/16/2011	Dr Moufawad said the problem he has had with Butrans is that one or more pharmacists have reported him to the Medical Board for prescribing Butrans in addition to other opioids. He said that he had a patient, for example, who was on Percocet who he had taper down & then start Butrans. The patient said Butrans did not work for him, so Dr Moufawad said he had him taper off Butrans & then put the patient back on short-acting medication. He said the Medical Board questioned his prescribing of "agonists with an agonist/antagonist". He added that he knows that Butrans is not an agonist/antagonist, but that the pharmacists & Medical Board are uneducated about Butrans & may be getting it confused with Suboxone. Dr Moufawad would like a Medical Liaison from Purdue to somehow help with this issue & he said he is surprised that others are not having this issue. He added that he does not appreciate being interrogated as though he is "running a pill mill" & that he is cautious in how he Rx's
PPLPMDL0020000001	Highland Heights	OH	44143	6/16/2011	I asked Debbie if a product like Butrans is something she would initiate independent of the doc. She said maybe but she is only in the office part time and does not see the same patients regularly so follow up would be difficult. I reminded her of where Butrans is positioned and gave initiation guide.
PPLPMDL0020000001	Shaker Heights	OH	44122	6/17/2011	Spoke with Nahlia (pharmacist) who said she has not dispensed Butrans. I asked if she has seen prescriptions or had any phone calls about it & she said she has not. Reviewed appropriate patient type, delivery system, & savings program. I asked what type of insurance plans she sees most frequently. She said they see mostly Medicare Part D. She said they also see a fair amount of commercial insurance plans like Medical Mutual, Aetna, & Caremark. She said they did not need additional OxyContin savings cards at this time.
PPLPMDL0020000001	Beachwood	OH	44122	6/17/2011	Spoke with Shawnte' (MA) & attempted to see Dr Warren, but she said that she asked that I come back Monday morning as he was too far behind to stop to talk to me this afternoon. She asked me what Butrans is, so I reviewed with her indication, dosing, delivery system, & appropriate patient type with her. She said it sounded "interesting". I asked if I would be able to schedule a lunch with the doctors & staff to discuss it. She said she & Jennifer (another MA) work together on scheduling them & she took my card to meet with Jennifer & said she would find out before Monday when I come in. She said Dr Askari (another rheumatologist) does not allow

PPLPMDL0020000001	Parma	OH	44129	6/17/2011	Spoke with Fred, pharmacist, & asked if he was able to change the pharmacy manager's mind about stocking Butrans. He said that unfortunately, he does not think this will happen as the pharmacy manager is afraid to stock opioids in general due to getting robbed when he worked at a Drug Mart years ago. Reviewed the appropriate patient type for Butrans as well as dosing & titration. He said he still thinks it is a good idea. He said Dr Nickels is the only practitioner who really comes to mind as being someone in the area to discuss Butrans with. I asked if they needed OxyContin savings cards but he said they do not.
PPLPMDL0020000001	Parma	OH	44129	6/17/2011	I reminded Dr Roheny that he had shared with me that he had prescribed Butrans for a patient & asked him what kind of feedback he has gotten. He said he has not heard anything else from the patient. I asked if he considered that a good sign n& he said yes. I asked if he had identified any other patients like that one who he could switch to Butrans. He said he has not but that he has been too busy to think about it & said he would do his best. He had to go to the hospital to see patients. Spent time speaking with Lorraine, Kathy, & Terri (nurse) & reviewed Butrans delivery system, appropriate patient type, & managed care/savings cards for eligible patients. They said they all take patient phone calls regarding medications, but usually it is Terri or Kathy who does. They said they do not get very involved with prescriptions as Dr Roheny handles it.
PPLPMDL0020000001	Brooklyn	OH	44144	6/17/2011	Quick call- Dr Detwiler said he is still "keeping Butrans in mind". I asked if he is considering Butrans for appropriate chronic pain patients who either do not get relief or do not tolerate Vicodin or tramadol with commercial insurance & he said yes.
PPLPMDL0020000001	Fairlawn	OH	44333	6/17/2011	I asked Dr. Domdera how long it typically takes for him to prescribe a drug for the first time and he said it depends on the product. He said it was taking him longer than usual with Butrans because it was a pain med. He said he could see himself using this product done the road because he had a group of patients he feels could benefit from it.
PPLPMDL0020000001	Copley	OH	44321	6/17/2011	I asked Dr. Heim if he had seen the patients we had discussed on my last visit and if he had initiated Butrans therapy yet. He said he had not, but had just forgotten about it. I asked if I could talk to Jen about flagging a patients charts so he would have a reminder when the appropriate patient comes in and he said yes.
PPLPMDL0020000001	Mayfield Hts	OH	44124	6/17/2011	Reminded doc that Butrans is a schedule III opioid which can be called in or refilled. I asked if he is writing it with refills. He said most patients come in once a month for their pain meds. I asked him to continue Butrans for patients that fit the indication and have commercial insurance combined with savings cards.
PPLPMDL0020000001	Fairlawn	OH	44333	6/17/2011	Quick call. Thanked Dr. Lefkowitz for his OxyContin business and asked if he though there was any potential for Butrans. He said he didn't know. No new info learned.
PPLPMDL0020000001	Copley	OH	44321	6/17/2011	I asked Dr.r Machado if he was any closer to prescribing Butrans since we had discussed the molecule in more depth. He said that he feels like many of his patients are passed the point of Butrans. I asked if he finds himself ever prescribing low dose hydrocodone for an opioid naive patient and he said he did. I reminded him that those patients are potential Butrans patients.
PPLPMDL0020000001	Brooklyn	OH	44144	6/17/2011	Quick call- Caught Dr Miguel on his way into a room & asked if he has patients with chronic conditions on around-the-clock short-acting opioids. He said he has some, but not as many as Dr Detwiler.
PPLPMDL0020000001	Euclid	OH	44119	6/17/2011	Asked doc what experience he has had with Butrans. He said he did try it but patient complained that it was too expensive. I asked him what the coverage was. He thought it might have been medicare. I reminded him that it won't be covered on medicare/medicaid. I gave him a formulary grid and asked him to give a savings cards with scripts. Spoke with nurse who confirmed that they still have savings cards.
PPLPMDL0020000001	Akron	OH	44319	6/17/2011	I asked Dr. Katrjij how many patients he sees each week that are failing or asking to be titrated on their current SA therapy. He said he had some. I asked how many of those patients were on low doses of their SAO. He said a few but that many of those patients were Medicaid patients. I asked if would try Butrans on just 2 patients who were failing on their current therapy AND had a private insurance. He said he would keep it in mind.
PPLPMDL0020000001	Independence	OH	44131	6/17/2011	Spoke with Janelle & Denise (MA's)- reviewed savings cards for Butrans & OxyContin. Janelle said they did not need additional savings cards at this time. She also said they are already completely booked for lunches & will re-open books on September 1, so I asked to be put on the cancellation list. She asked if I could ever bring snacks in to them. I told them that any food I bring must be accompanied by a clinical discussion with the physician. Janelle said she may be able to have the doctor come out to speak with me if I bring something by. Let her know I would call before bringing something by to ensure that a physician was there. She said she would give Dr Boose the information I left.<font color=blue>->->-CHUDAK08 added notes on 06/24/2011</font>->->-/font>-Nice job on the compliance issue of having to have a clinical conversation in order to bring food.
PPLPMDL0020000001	Akron	OH	44333	6/17/2011	I asked Dr. Brown if she knew if patients had gotten their Rx's filled. She said she was sure a handful had but they live all around and she was unsure what pharmacy they were going to. She said many of her patients had followed her from Cleveland. I asked about specific patient types and she said the majority of patients she had started were failing on their current low dose SAO.
PPLPMDL0020000001	Northfield Center	OH	44067	6/17/2011	Spoke with pharmacist Kate & inquired about Butrans stocking. She said that they do not have it. She said that they only have 3 patients on the "oral version". Reviewed indication & let her know that Butrans is only indicated for pain & is not to be used for the treatment of drug addiction. I also asked if there were any area physicians who came to mind as having chronic Vicodin or tramadol patients. She said that there used to be a pain management facility nearby that they got a lot of prescriptions from, but that they had been closed for awhile now because of "something illegal going on". She said no one really comes to mind.
PPLPMDL0020000001	Fairlawn	OH	44333	6/17/2011	Spoke to Jessica and asked if she had seen any movement from Dr. Brown she said she did not believe she had but was unsure. She said Dr. Shah had slowed down and verified many of his initial patients had a state plan.
PPLPMDL0020000001	Beachwood	OH	44122	6/17/2011	Dr Yokiel was out for vacation, so I spoke with Vickie, his nurse. She said they just got a call from a Butrans patient who was complaining of chest pain on Butrans, but that she does not think it is from Butrans. Laura added that the patient complained of pain in his left arm, the arm that he was wearing Butrans on. I asked how long the patient has been on Butrans & Vickie said he has been on it for a few months. She said he has complained of it before as well. She said the patient has continued on Butrans despite this because they do not believe these adverse effects are actually from Butrans. Vickie requested additional OxyContin savings cards but said she has enough Butrans cards & patient education for now.
PPLPMDL0020000001	Cleveland	OH	44107	6/20/2011	Spoke with Laurie. We reviewed Butrans medication guide and how to instruct patients on the proper use and application of Butrans. We reviewed the steady state of 3 days and not to titrate until after this. We discussed managed care for Butrans and the savings cards for Butrans and OxyContin.
PPLPMDL0020000001	Cleveland	OH	44104	6/20/2011	dr said he started a patient on Butrans.i asked dr why? dr told me patient was taking vicodin,not controlled and wanting more pills and he wasnt comfortable giving this patient more pills,so Butrans made sense.i showed dr Butrans initiation guide,discussed proper tapering of short-acting opioids and initiation of Butrans.we discussed once weekly dosing and Butrans being transdermal as these were 2 things dr pointed out that he liked about Butrans.dr said he also liked that Butrans was a CII so he could call in refills which is much easier to him than a CII where patients have to pick scripts up in office.we talked about Butrans patient information booklet and i asked dr to show patients the application/rotation section as this was critical information for them to know about Butrans,dr agreed and said he would do this moving forward.i asked dr if he had a couple more patients like this one,not controlled on short-acting opioids,that he could start on Butrans? dr said yes he did
PPLPMDL0020000001	Beachwood	OH	44122	6/20/2011	Spoke with Michael (technician) & Paul (fill-in pharmacist) as Alan was on vacation & Ashley was on the phone. Paul said he has heard of Butrans but did not know a lot about it. Reviewed indication, appropriate patient type, dosing, managed care, & savings cards. I let him know more savings cards could be ordered online if necessary. Also asked if they needed additional OxyContin savings cards but they said they have enough. Paul said he would give my information to Alan & Ashley.
PPLPMDL0020000001	Westlake	OH	44145	6/20/2011	I asked Dr why he has not tried Butrans yet, he said he has not thought about it. We reviewed the 5 key messages and I asked if he sees any benefit for his patients. He said the 7 day dose is interesting. We discussed appropriate patients for Butrans and I asked if he would try just a few patients on tramadol or low dose vicodin. He agreed. I also spoke with Sam about appropriate patients. She said she would try to think of a few to remind with MA, Melissa, & reviewed savings cards for Butrans & OxyContin, discussing eligibility requirements for usage. Also discussed Butrans appropriate patient type & delivery system. Scheduled appointment to meet with Drs Seiple & Tosino. Melissa said she would give the Butrans information I left to each of the doctors.
PPLPMDL0020000001	Solon	OH	44139	6/20/2011	Reminded Dr Zaidi of previous Butrans conversations when he told me that he wants to hear feedback from other physicians & specialists before prescribing Butrans. I shared with him that Butrans has had a very successful launch & that it has been very well-received. He asked if patients could take other opioids with Butrans. I showed FPI 2.4 & told him they can. He asked if that would cause them to go into withdrawal. Discussed Butrans as partial agonist & also reviewed initiation guide pg 6, walking through how to initiate treatment in patients on opioids, including taper. Discussed appropriate range of patients & appropriate patient selection for all opioids. Also reviewed titration ability every 3 days, application, managed care, & savings cards for those eligible. I asked him if he would at least try Butrans on a few patients so he has his own clinical experience & he agreed to do this. Also discussed OxyContin for patients beyond Butrans & Senokot-5 for opioid-induced constipation.
PPLPMDL0020000001	Lakewood	OH	44107	6/20/2011	I asked Dr to think of Butrans for any patients who say their low dose vicodin is not working and he said he will. The only reason he has not tried it is he forgets about it. I spoke with Dawn and we reviewed the appropriate patients for Butrans. I asked if she would look through a few charts today and put a Butrans medication guide in an appropriate patient's chart to remind the Dr that it is an option. She said she will. We also discussed patients appropriate for OxyContin.
PPLPMDL0020000001	Parma	OH	44129	6/20/2011	Quick call- Jen stopped before going into a room & said that she has not switched or started anyone on Butrans but she has been using Ryzolt. Spoke with Dawn & reviewed appropriate patient type & range of current opioid dose that would be appropriate to consider for switching. Also discussed Ryzolt managed care coverage. Dawn said they changed their hours & also said that they have had multiple violent patient encounters lately. She said that ever since Dr Lundgreen (?) got in trouble for his "pill mill", many of his patients are coming there, wanting pain medications. She said the police had to be called. She added that Jen did not handle it well & that it has been a big adjustment for her coming from oncology. Dawn said to give Jen some time & that she would eventually come around for Butrans.
PPLPMDL0020000001	Lakewood	OH	44107	6/20/2011	I asked Dr why he hasn't tried Butrans yet, he said that he just forgets. We reviewed the key messages and I asked if he would try Butrans for patients who say their vicodin is no longer controlling their pain. We reviewed the use of short acting meds as supplemental analgesia. I reviewed Butrans key messages, managed care and savings cards. They said they do see a benefit in Butrans and will help remind the Dr when they see appropriate patients. Reminder about OxyContin as an option that is covered on Medicaid.
PPLPMDL0020000001	Cleveland	OH	44109	6/20/2011	I talked to Ron, Pharmacy manager, about Butrans 5 core messages and asked ron what were the top 3 factors that he considered to be most important about Butrans? Ron said he likes that Butrans is transdermal and once a week dosing is easier for some patients. we talked about appropriate patients and I showed Ron Butrans initiation guide for discussion, we discussed proper tapering of short-acting opioids and initiation of Butrans. ron said he hasn't seen any scripts yet but has told a few doctors about Butrans, when patients have told him their short-acting opioids arent lasting long enough.I asked if Ron could give patients the Butrans patient information booklet, if they tell him their short-acting opioids arent controlling their pain,ron said he would do that.I asked ron to focus on application/rotation of Butrans,if anyone comes in with a script for Butrans,ron said he would do that. we talked about appropriate patients for OxyContin,discussed formulary coverage and I recommended Senokot-5
PPLPMDL0020000001	Solon	OH	44139	6/20/2011	Spoke with pharmacist, Nate & inquired about Butrans stocking. He said they do not have it & added that he hasn't seen a single prescription for it. I asked if he had taken any phone inquiries about stocking from offices or patients & he said actually a Walgreen's called him last week to see if they had it. I let him know that Butrans has been very well received by physicians & patients & asked him to stock it. He said he would still wait for the prescription. Reviewed e-voucher & discussed OxyContin savings cards & eligibility.
PPLPMDL0020000001	Bedford	OH	44146	6/20/2011	Dr Haddad told me again about the patient who he has who is on Butrans & likes it so much that she pays for it out-of-pocket. I asked him if positive feedback like that encourages him to look for more patients to try on it. He said somewhat. I asked why not consider Butrans when patients with chronic conditions who take short-acting opioid around-the-clock. He said he would try to use it more & he has no reason not to. Shared with him that Butrans has been very well received from physicians & patients around the country. Reviewed managed care & savings cards for Butrans & OxyContin. We also discussed the importance of proper patient selection & told him he is right in being cautious when prescribing all opioids.
PPLPMDL0020000001	Lakewood	OH	44107	6/20/2011	I asked Dr what his hesitation with prescribing Butrans is. He said to be honest he just hasn't had time to think of it, things have been crazy as his wife had twins two weeks ago and he's been working a lot. He agreed to try to find a patient this week.
PPLPMDL0020000001	Cleveland	OH	44109	6/20/2011	worked internal medicine dept-left Butrans fpi,initiation guide,patient information booklet,formulary grid and business card for each physician:dr lindheim,dr ricanati,dr harrington,dr falkc-ytter and dr mccreeny also left each doctor OxyContin fpi,conversion guide and formulary grid.worked Oncology dept-had to leave Butrans fpi,initiation guide,patient information booklet,formulary grid and business card for each physician:dr o'brien,dr hergenroeder and dr snell and also left each physician an OxyContin fpi,conversion guide and formulary grid.
PPLPMDL0020000001	Lakewood	OH	44107	6/20/2011	Dr said that he has been trying to write for Butrans but is finding that it needs a prior auths. We reviewed managed care coverage and the savings cards. I asked him to focus on commercial insurance. I spoke with Pat regarding managed care and savings cards for Butrans and OxyContin. She said that she does not mind doing the prior auths as long as it takes all day. I focused her on commercial insurance for Butrans.

PPLPMDL0020000001	Fairlawn	OH	44333	6/20/2011	I asked Dr. Oyakawa about Butrans therapy and how many patients he thinks he sees a month that would benefit from Butrans therapy. He said that he had many, I asked if he would try therapy on just one so he would have some patient feedback and he said he would.
	Cleveland	OH	44103	6/20/2011	I talked to Amol, Pharmacist, about Butrans stocking and asked if Amol could focus his discussions with patients on Butrans application/rotation and showed Butrans initiation guide? Amol said he would do that and they have seen a few scripts from UH and Cleveland Clinic doctors but didn't remember who wrote the scripts. I asked Amol if he could recommend Butrans to patients, if they tell him their pain isn't controlled with their short-acting opioids, and give them a Butrans patient information booklet? Amol said he'll do that but most patients like taking their vicodin and percocet and he doesn't hear many complaints from patients. I showed Amol Butrans fpi, maintenance of therapy section, and told him patients could still take vicodin or percocet and apply Butrans. Amol said ok he didn't think patients could take both short-acting opioids and Butrans. I recommended Senokot-S. Quick call with Dave floater, we reviewed the key messages for Butrans and I reviewed the medication guide. He said he has been seeing a few scripts at various stores. He could not remember who prescribed. Reminder about OxyContin as a long acting option.
PPLPMDL0020000001	Cleveland	OH	44111	6/20/2011	Quick call, I asked if she would try just one patient on Butrans this week instead of going to vicodin around the clock. She agreed. I reviewed the savings cards and asked her to focus on commercial insurance.
PPLPMDL0020000001	Lakewood	OH	44107	6/20/2011	Spoke with doc about the Butrans indication and positioning after NSAIDs or tramadol. I asked her if she would consider a product like Butrans after before progressing to hydrocodone. She said she doesn't know and asked how much it cost as she has a lot of medicare/medicaid patients. I explained the coverage with commercial plans like medical mutual, Anthem, etc. and the savings cards. She said patients don't want to pay anything anymore. I asked her to consider Butrans next time she considers going to vicodin. She said ok. Gave formulary grid and initiation guide.
PPLPMDL0020000001	Akron	OH	44333	6/20/2011	Dr. Shah said he has continued to initiate Butrans to new patients but has slowed down because of coverage. He said that he would continue writing for patients who are unstable on their current SAO's.
PPLPMDL0020000001	Parma	OH	44129	6/20/2011	Spoke with Jackie, pharmacist, who said she still has not seen any Butrans prescriptions. Discussed the customer types she sees at her store. I asked if she thinks that she gets more prescriptions for patients who have doctors in the area or who live in the area. She said it is half & half. I asked about managed care plans she sees. She said she mostly sees commercial plans & Medicare. She said she does see a little Medicaid, but not very much. Also discussed OxyContin savings cards.
PPLPMDL0020000001	Parma	OH	44129	6/20/2011	Dr Taylor asked if I had heard anything else about Ohio House Bill 93. I told her I had not & that I did not have any information about it at this time. I asked her if she thinks it will have a big impact on her practice. She said she has already stopped taking on any new patients. She said she is keeping her short list of patients & will maintain them. I asked if for those patients, she would still consider switching them to different opioids than they are currently on if appropriate. She said she would. I asked if Butrans being the only long-acting CII available meant anything to her. She said she hadn't thought of that & that it was "nice" to have a long-acting option as a CII. Discussed managed care coverage & savings cards with her & Mary. Dr Taylor said she "still may prescribe Butrans".
PPLPMDL0020000001	Fairlawn	OH	44333	6/20/2011	I asked Dr. Weidman why she had not initiated therapy on some of the patients we had discussed on my last visit and she said she had not seen them yet, she said she would try it when they came in.
PPLPMDL0020000001	Akron	OH	44333	6/20/2011	I asked Dr. Griffiths if she would consider writing Butrans for patients who are currently asking to be titrated on their current SAO's. She thought that was a great idea and said she would focus on those specific patients moving forward.
PPLPMDL0020000001	Akron	OH	44313	6/20/2011	I spoke with the pharmacist who was a floater and typically works at the wellness center. He said he was familiar with Butrans through Dr. Bressi and did not have any questions.
PPLPMDL0020000001	Cleveland	OH	44114	6/20/2011	I discussed 5 Butrans core messages with Joel, Pharmacy Manager, asked Joel what were the top 3 factors about Butrans that Joel thought were important? Joel said he liked that Butrans was a patch and once weekly dosing was good for some patients, Joel said the problem is that majority of the patients he sees here, like taking their vicodin or percocet and won't want to stop their pills. I showed Joel Butrans fpi, initiation of therapy and maintenance of therapy sections and discussed with Joel the fact that patients can take their short-acting opioids while taking Butrans. Joel said he hasn't seen any scripts for Butrans but does get a lot of vicodin and percocet scripts. I asked if Joel would recommend Butrans to doctors if patients tell him their short-acting opioids aren't controlling their pain? Joel said it depends on dr but he'll consider it if patients say anything to him. I identified the most appropriate types of Butrans patients and asked Linda how many of those patients she sees each day. She said she had many ideal patients and simply needed to remember Butrans more. I told her I would come in every Monday to remind her and she agreed.
PPLPMDL0020000001	Akron	OH	44333	6/20/2011	Quick call, I reviewed our last conversation and showed steady state. Dr had question about managed care and we reviewed the managed care and savings cards for Butrans. I spoke with his staff regarding Butrans, we reviewed managed care and savings cards. Reminder that OxyContin is a long option acting covered on Medicaid.
PPLPMDL0020000001	Lakewood	OH	44107	6/20/2011	Quick call - Dr Warren said he has not put any more patients on Butrans & still only has the one he has told me about. I asked about feedback & he said he has not heard anything. I asked if he is still looking for potential Butrans patients & he said yes. I asked what he is looking for. He said he would prescribe it for a patient who was taking short-acting around-the-clock pain medications for chronic conditions. I told him this would be an ideal patient type & asked if he encounters them frequently. He said he does & then went into a room. Discussed managed care & patients who call in too soon for pain medication refills or who ask for changes or increases in pain medication with Donny & Elisa. Also followed up with Shawnte' who said she had not yet spoken with Jennifer to figure out a lunch date. She said she would let me know later this week.
PPLPMDL0020000001	Westlake	OH	44145	6/21/2011	I asked Dr how his Butrans patients are doing. He said he still has one patient on Butrans and they are doing well. He recently tried to prescribe Butrans for a Medicaid patient but they could not get the prior auths to go thru. I let him know that BWC and commercial will be the best chance of going through. He said that he will continue to prescribe Butrans. Reminder about OxyContin as an option and Dr said he still maintains many patients on OxyContin. I spoke with Danielle and Angela and they are trying to remind the Dr to use Butrans when appropriate patients come in. Dr has to have open heart surgery before the end of the year.
PPLPMDL0020000001	Cleveland	OH	44106	6/21/2011	I talked to dr about appropriate patients to start on Butrans, dr said he understands that Butrans is for patients who are taking vicodin or percocet, daily but not getting pain relief and asking him for more pills or something different. I showed dr Butrans visual aid, appropriate patients section, and told him if patients are taking tramadol, vicodin or percocet and not controlled, he had Butrans as an option. We talked about patients still taking some short-acting opioids for breakthrough pain while taking Butrans and I referenced maintenance of therapy section in Butrans fpi. I asked if dr had 2 commercial plan patients like we discussed that he could consider Butrans for, dr said he will keep it in mind as Butrans sounds like a good option for some patients. I recommended Senokot-S.
PPLPMDL0020000001	Cleveland	OH	44113	6/21/2011	I reviewed 5 Butrans core messages with dr and asked what were the top 3 factors she considered important when deciding if Butrans was an option for patients? dr said if patients are taking 1-2 vicodin or percocet daily and that's not controlling their pain, she's considering Butrans for those patients instead of giving them more pills. I asked dr if she would consider starting patients on Butrans, right after the initial dosage strength of vicodin or percocet isn't working? dr said she might do that, but usually she would max the dosage strength out and then consider Butrans. I showed dr Butrans visual aid for appropriate patients discussion and I asked dr to consider starting a few more patients on Butrans as we discussed, dr agreed. Briefly discussed Butrans formulary coverage and patient savings cards. I recommended Senokot-S.
PPLPMDL0020000001	Cleveland	OH	44130	6/21/2011	Dr Fedorko said the patient he told me about last visit was able to get her Butrans prescription filled & is currently taking it. He said he has not had feedback from her. I asked if he was identifying additional patients to try on Butrans & he said he that he has no issue or problem with Butrans, so he will continue to prescribe & then he added "for patients coming out of the hospital". I asked him why he has only been using it for patients coming out of the hospital. He said that this is because if someone was in the hospital, there is evidence of "real" legitimate pain, so he feels more comfortable prescribing Butrans for those patients. I agreed that he should be cautious. I asked him if he has patients in the office who he feels have legitimate pain. He said he does, but he is most comfortable with patients with real evidence of pain. Discussed managed care & reminded him of commercial.
PPLPMDL0020000001	Cleveland	OH	44113	6/21/2011	I reviewed 5 Butrans core messages with dr, asked dr what were some important features about Butrans that he would consider if starting a patient on Butrans? dr said he knows that Butrans is transdermal in a patch and the once weekly dosing of Butrans is easier for some patients than having to take vicodin or percocet every day. dr said his biggest challenge is insurance coverage as he doesn't prescribe a lot of long-acting opioids so he wouldn't have anyone that qualified for pre-requirements that Medicaid has for approving Butrans. I asked dr to focus on 2 commercial plan patients that are taking vicodin, daily and not controlled, and start them on Butrans and give them Butrans patient savings cards. dr has small percent of commercial. I showed dr OxyContin visual aid, discussed appropriate patients, 7 tablet strengths and gave dr OxyContin conversion guide and formulary grid. dr said he has 1 patient on OxyContin and doesn't like prescribing OxyContin. I recommended Senokot-S.
PPLPMDL0020000001	Parma	OH	44134	6/21/2011	Spoke with Pam (pharmacist) who confirmed that this location does have Butrans, but she was unable to tell me who, if anyone, they have seen prescriptions from. She was not very familiar with Butrans, so I reviewed with her dosing, usage, indication, & appropriate patient type. Also discussed savings opportunities for both Butrans (through e-voucher) & OxyContin (through savings cards) & also reviewed with her eligibility requirements. She said they do not need any more savings cards at this time.
PPLPMDL0020000001	Cleveland	OH	44130	6/21/2011	Introduced Butrans to Dr Lindes, delivering 5 core messages & reviewing box warning. He asked what comparative data has been done. I told him we do not have comparative data & presented initiation guide, reviewing pg 6. He asked how I was going to tell him Butrans is "better" than pills. I told him I would not make that claim. Discussed various appropriate patient types & asked that he be just as cautious in prescribing Butrans as he would any other opioid. He agreed. He asked if patients could take other pain medications on top of Butrans. Reviewed FPI 2.4 & discussed ability to take supplemental analgesia. He said he thought Butrans sounded "interesting". I asked if he sees patients who fit the indication who may be appropriate. He said he might have some he could switch. Discussed managed care & savings for eligible patients.
PPLPMDL0020000001	Cleveland	OH	44125	6/21/2011	Spoke with Angie (pharmacist) who said she has not dispensed any Butrans since the initial prescription for it months ago. She said she still has the other box she had ordered on her shelf. I asked if she has seen prescriptions at all, for example that just haven't been covered (ie by Medicare or Medicaid). She said she has not seen any at all. Discussed appropriate patient type & also reviewed savings programs for both Butrans & OxyContin. She said she would let me know if she sees any activity.
PPLPMDL0020000001	Cleveland	OH	44130	6/21/2011	Reminded Dr Lash of our previous conversation about Butrans. He asked for a re-cap of Butrans details. Reviewed indication, dosing, delivery system, CII, abuse/addiction potential, appropriate patient type, & managed care/savings information. He said that he heard that there were going to be requirements by the state that any physician who writes long-acting opioids would have to take courses about them first. I told him I did not know of this. I asked where he usually uses long-actings. He said if he sees that a patient is taking 6 Percocet or so per day, he goes to a long-acting option. Presented initiation guide & reviewed pg 6, showing range of patients. He asked about using supplemental analgesia. Showed FPI 2.4 to support that patients can take immediate release opioid or non-opioid medication with Butrans & discussed titration. Also discussed OxyContin q12h as an option for appropriate patients beyond Butrans 20mcg. He said he would look for a Butrans patient.
PPLPMDL0020000001	Cleveland	OH	44106	6/21/2011	I showed dr Butrans visual aid, discussed 5 core messages and appropriate patients for Butrans. dr said he has some patients on Butrans that are doing well and he is seeing improvements in patients pain levels. I asked dr how often he is seeing the appropriate patients for Butrans? dr said some weeks he sees 1 or 2 patients, then none, then he may see 4 patients who he feels are appropriate, it varies every week. I asked dr to stop and consider Butrans next time he sees patients taking percocet 5/325mg but not controlled and asking for something else, don't refill the script or increase dosage strength but instead consider Butrans for those patients. dr agreed. We talked about Butrans formulary coverage and use of Butrans patient savings cards. I recommended Senokot-S.
PPLPMDL0020000001	Cleveland	OH	44130	6/21/2011	I spoke with Marie, Dr Tomsik's MA, who said that Dr Tomsik doesn't come back to speak with reps. Let her know that he has not been detailed on Butrans yet & she asked me to tell her about it so that she could tell him. Reviewed 5 core messages with her & went through initiation guide, discussing range of appropriate patients. I asked if Dr Tomsik treats patients who fit the indication & she said he does - a lot. Discussed managed care & savings cards with her. I asked her to give Butrans information to Dr Tomsik. She agreed to do this & said that she thinks he will be interested in it enough to read the information, something she said he does not always do. Gave her my card in case she or the doctor have any questions.
PPLPMDL0020000001	Westlake	OH	44145	6/21/2011	I reviewed the 5 key messages for Butrans and asked his thoughts. Dr said that he really does not like to treat chronic pain with opioids long term, he sends them to pain management especially if they are younger patients. He has a fear of abuse and wants to the patients to explore other options to help their pain other than medication alone. We discussed appropriate patients for I asked if there is a place for Butrans in his practice and he said he thinks there is a niche. I asked him where that niche is, he said most likely after tramadol or for a patient who takes vicodin every day. I asked if he would try a few of these types of patients and he agreed. We reviewed the managed care and savings cards for Butrans. We reviewed the conversion guide for OxyContin and appropriate patients.
PPLPMDL0020000001					

	Cleveland	OH	44106	6/21/2011	i talked to Matthew,Pharmacist,about 5 Butrans core messages and i asked Matthew what were the 3 features about Butrans he felt were most important? Matthew said he liked that Butrans was a patch and dosed once a week.Matthew said some doctors care that its a CII so that they can call in refills while others dont care about that,i asked Matthew if he would recommend Butrans to patients that are taking short-acting opioids but not controlled,that meet Butrans indication? Matthew said he would and they do patient counseling so he will keep this in mind,i asked Matthew to hand patients the Butrans patient information booklet if he feels patients are appropriate for Butrans,so they can talk to their doctors about Butrans.Matthew said ok and to leave a couple booklets with him. we talked about Butrans formulary coverage and patient savings cards and i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	6/21/2011	worked pain management dept-saw dr shen, worked premier physicians office-dr elbadaway he is based at lutheran hospital
PPLPMDL0020000001	Akron	OH	44310	6/21/2011	I asked Dr. Cremer how long he typically expects his patients to stay on Butrans once it is prescribed to them. He said that he expects them to stay on it for some times unless there is an issue with coverage and the patient can no longer afford it.
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	6/21/2011	I asked Dr. Cyndi how long she expected her [patients to stay on Butrans once she prescribed it to them and she said is all depends but until they feel better. I reinforced that this was a LAO so it is meant for a more chronic type of patients which she said she understood. I asked her if she had any of those patients coming in this week so she could continue to trial Butrans and she said she would keep it in mind.
PPLPMDL0020000001	Akron	OH	44312	6/21/2011	I asked Dr. Fouad why he does not feel confident prescribing Butrans at this point. He said that he feels that since most of his patients do not have insurance he likes to prescribe mostly generics.
PPLPMDL0020000001	Mayfield Heights	OH	44124	6/21/2011	Window call..... reviewed the Butrans indication and positioning with Barb and asked her to consider Butrans instead of starting patients on vicodin. She asked how many days the patch is good for. I explained the 7 day delivery and with proper application the patch stays on for the entire 7 days. Gave her a patient info guide which she said she would like at and talk to dr. dews.
PPLPMDL0020000001	Mayfield Hts	OH	44124	6/21/2011	Doc said he is still trying to prescribe Butrans but everyone requires a PA. I asked if he recalls which plans. He said he did not remember and that I should ask Denise. I explained the coverage with most commercial plans and BWC. SPOke to Denise who said that doc's scripts are requiring a PA. Gave her a formulary grid.
PPLPMDL0020000001	Cleveland	OH	44143	6/21/2011	I asked doc if he had a chance to reveilw the Butrans FPI I previous ly left. I reminded him of the once weekly application of analgesia in a CIII. He said he did not and that he does not have time. Nothing learned
PPLPMDL0020000001	Cleveland	OH	44130	6/21/2011	Spoke with Dr McBurney's MA, Sharon, who said he would not come back for breakfast. Introduced Butrans to her, delivering 5 core messages & alerting her to box warning. I asked if she thought Dr McBurney might be interested & she said he does treat a lot of patients who fit the indication & who may like a transdermal option that they only have to apply once a week. Reviewed managed care & savings cards with her & asked her to give Butrans information to Dr McBurney- she agreed to do this.
PPLPMDL0020000001	Mayfield Hts	OH	44094	6/21/2011	Reminded doc that Butrans is the first 7 day delivery of an analgesic, is a CIII. I asked him to thin of Butrans instead of starting patients on hydrocodone tablets ATC. Provided formulary grid and initiation guide
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	6/21/2011	I asked Dr. Pitt about his success with Butrans. He said that he had not yet heard back from his patient. I asked if he had similar patients coming in this week and asked him if it would be okay if I spoke with Liz and flagged their chart, he agreed.
PPLPMDL0020000001	Cleveland	OH	44130	6/21/2011	Spoke with Fran, MA, who worked with me to reschedule the lunch that they canceled. Reminded her of Butrans indication, delivery system, and patient type. She said she remembers thinking that Butrans sounded interesting when she first heard about it. I asked her to give Butrans information to Dr Rogers & she agreed to do this.
PPLPMDL0020000001	Cleveland	OH	44106	6/21/2011	worked pain management dept-see call note on dr.sahgal,dr.hayek is out of town for 2 weeks so i wont see him again until July.
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	6/21/2011	I asked Dr. DiLauro if he felt comfortable identifying potential Butrans patients. She said she did but described a more severe type of patient that is most likely passed the point of Butrans. I showed her the initiation and titration guide and explained that Butrans had also been studied in opioid naive patients.
PPLPMDL0020000001	Munroe Falls	OH	44262	6/21/2011	I asked Dr Kolaszewski if she had reviewed the info I had left as promised and she said she had looked it over but had not yet prescribed Butrans. She said she had some patients and I reviewed titration with her again. She said she would keep it in mind.
PPLPMDL0020000001	Cleveland	OH	44195	6/21/2011	worked pain/anesthesia dept-had to leave Butrans fpi,initiation guide,patient information booklet and formulary grid for Dr.Vrooman,Dr.Katyal,Dr.Mekhail and Dr.Cheng as i couldnt see any of them. i also left each physician OxyContin fpi,conversion guide and formulary grid. all of the NP's and PA's were busy seeing patients and couldnt see me today, worked Rheumatology dept-left Butrans fpi,initiation guide,patient information booklet and business card for Dr.Calabrese,Dr.Long and Dr.Chatterjee - have to leave information at front desk and receptionist gives information to medical secretaries,if doctors are interested they will call me.
PPLPMDL0020000001	Mayfield Heights	OH	44124	6/21/2011	Quick call.....reminded doc of the 4 application sites for Butrans and how to apply to a clean dry site. She asked if there was anything new with Butrans. Told her not at the moment but I would keep her informed. I asked if she had any questions/concerns. She said no and everything is fine. Provided oxycontin savings cards.
PPLPMDL0020000001	Westlake	OH	44145	6/21/2011	We reviewed the key messages for Butrans. Dr said that he does not like to prescribe opioids when he can help it, but he does treat chronic pain and has patients that could benefit from Butrans. I asked if he could think of any specific patients and he said he has one patient who he may try. The patient is on 30mg of oxycodone per day and we discussed the initiation guide and how to taper the patient down and initiate Butrans. We discussed starting patients on Butrans who are on tramadol or low dose hydrocodone. Dr said that he will try it, as long as he can get it covered on managed care. We reviewed the managed care and savings cards for Butrans. We reviewed the conversion guide for OxyContin and as a option when Butrans may not provide adequate analgesia. He said he does have a handful of patients on OxyContin and will prescribe it.(Dr lives in Avon Lake, 4 kids,
PPLPMDL0020000001	Parma	OH	44129	6/21/2011	Dr Ortega said that he had a male patient who discontinued Butrans because he "didn't like it". I asked him to clarify & he said that the patient just said he "didn't like it" & wanted to just take Percocet. He also said he has other patients who are doing great on Butrans. He said that one patient had surgery to correct the problem that originally contributed to his pain & he asked me how he should take that patient off Butrans when the time comes. I told him he should taper the patient gradually from Butrans & then give them short-acting opioids if he deems that appropriate for the patient & referenced FPI 2.5. I told him we have no specific information on exact doses for tapering. He asked how other physicians are doing it. I told him I have no information on that. He said that he does like to gradually take all his patients off opioids as part of his treatment plan. He said he will be considering more patients for Butrans.
PPLPMDL0020000001	Independence	OH	44131	6/21/2011	Dr Sundaram said that he has not had any more Butrans patients & has not had a patient with chronic pain. I asked him what usually triggers him to switch a patient from short-acting around-the-clock opioids to a long-acting option like Butrans or OxyContin. He said that unfortunately, narcotic prescriptions are very patient-driven. I asked him what he meant exactly. He said that usually he will only switch a patient from one drug to another if they ask him to. He said that typically, patients are "conveniently allergic" to the pain medications that they don't want & "can only tolerate" whichever one they want. Discussed OARRS with him. He said that he just signed up & has started using it & is glad he did. I agreed that this is a great way to protect his practice & screen patients. He said that many years ago, his prescription pad has been stolen by a patient so he always likes to be cautious.
PPLPMDL0020000001	Cleveland	OH	44109	6/22/2011	I talked to dr about 5 Butrans core messages,discussed appropriate patients to start on Butrans,dr never heard of Butrans but liked that it was transdermal and dosed once a week.i asked dr how she treated her patients chronic pain? dr said she gives patients tramadol or vicodin but doesnt like to treat chronic pain with acute pain medications so Butrans being a CII would be a good option as its long-acting and indicated for chronic pain.i asked dr to consider a few patients taking tramadol or vicodin,not controlled on their dosing regimen and consider Butrans,dr said she would and asked about insurance coverage.we discussed Butrans formulary coverage and patient savings cards.
PPLPMDL0020000001	Independence	OH	44131	6/22/2011	Spoke with Eckta, a floater pharmacist. She said this location does not have Butrans stocked & asked me about it. Reviewed with her indication, dosing, CII, abuse/addiction potential, & e-voucher program. Also discussed appropriate patient type/positioning. She said she thinks there is a place for Butrans as a long-acting CII & that a lot of patients might prefer a transdermal option over taking pills several times every day. She said she would leave the information for the regular pharmacist.
PPLPMDL0020000001	Westlake	OH	44145	6/22/2011	Quick call with Lisa and tech, we reviewed the medication guide for Butrans and she will make sure patients don't have any questions about how to apply. Reminder of the appropriate patients for Butrans and appropriate patients for OxyContin when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Cleveland	OH	44114	6/22/2011	dr said she has a few patients on Butrans that are doing well and are controlled and she is going to continue starting patients on Butrans.dr said she had a long day and still had more patients to see so she couldnt really discuss anything more with me today
PPLPMDL0020000001	Cleveland	OH	44109	6/22/2011	i talked to dr about Butrans 5 core messages,fpi,initiation guide and asked dr what were some features about Butrans that he liked? dr said he liked that Butrans was transdermal and a long-acting opioid.dr said its challenging to treat chronic pain with short-acting analgesics so he could see a place for Butrans in his practice.i asked dr if he has patients taking percocet daily that arent controlled and could benefit from Butrans? dr said yes and asked about insurance coverage,we discussed Butrans formulary coverage. i talked to dr about patients for OxyContin that he feels are appropriate,showed OxyContin conversion guide and discussed formulary coverage.
PPLPMDL0020000001	Cleveland	OH	44109	6/22/2011	i talked to dr about 5 Butrans core messages,fpi,initiation guide,patient information booklet and formulary coverage.dr said he has some chronic pain patients that could benefit from Butrans as he likes the once weekly dosing and transdermal delivery of Butrans.we talked about patients still taking immediate release opioid or non-opioid analgesics with Butrans and i showed Butrans fpi-maintenance of therapy section for discussion.i showed dr Butrans demo,carton for discussion of what Butrans looks like and i asked dr to consider a couple patients taking tramadol,vicodin or percocet that arent controlled and start them on Butrans.dr said he would do that and asked about insurance coverage.we talked about workers comp and commercial plan patients trying Butrans and discussed Butrans patient savings cards.i recommended Senokot-S
PPLPMDL0020000001	Akron	OH	44320	6/22/2011	I asked Dr. Duppstadt if she had any hesitations about prescribing Butrans for the appropriate patient. She said that she understands the patient but the patients she have in mind have state plans and can not get it covered. She said she will continue to keep it in mind for a patients that has coverage.
PPLPMDL0020000001	Parma	OH	44134	6/22/2011	I asked Dr Hernandez if he was still as positive & enthusiastic about Butrans as he was when he first started prescribing it. He said he is & that he actually just gave a patient a prescription yesterday for it. He went on to say that his patients really like it & he is confident in prescribing it. I reminded him that he has shared with me in the past that he typically prescribes Butrans for patients who are taking around-the-clock short-acting opioids & he agreed. I asked him what type or types of patients he would not consider for Butrans. He said that if someone is on Percocet or OxyContin or Opana, he would not switch them to Butrans because he would not expect Butrans to be effective for those patients. I showed initiation guide pg 6 & agreed that many patients fall out of the appropriate range of patients for Butrans but those on <40mg oxycodone per day may still be an option. He said he would think of doing this to see how it goes. Discussed OxyContin for appropriate patients.
PPLPMDL0020000001	Cleveland	OH	44109	6/22/2011	I reviewed 5 Butrans core messages with dr,dr said he remembered Butrans and liked that it was a patch with once weekly dosing as he does have some chronic pain patients who arent controlled and could benefit from another option like Butrans.dr said he consults with pain or pm&r specialists,as it relates to chronic pain patients,so he would discuss patients narcotic use with them as their patients have to sign an opioid contract stating they will only see 1 dr for their opioid scripts.dr mentioned that he had a patient who dr greenwood,pm&r,was treating,and taking 2 percocet a day and not controlled,dr said Butrans would have been perfect for this patient.I told dr i work with dr greenwood too but if he could recommend Butrans to dr greenwood and other specialists,if appropriate,that would allow him to get some clinical experience with Butrans.dr said that was good,i gave Butrans initiation guide and formulary grid,discussed OxyContin appropriate patients and insurance coverage.
PPLPMDL0020000001	Independence	OH	44131	6/22/2011	Quick call- Dr Jack stopped briefly before going into a patient room & said that he has not yet prescribed Butrans but that I should not "give up" on him. Spoke with Maria & reviewed Butrans appropriate patient type. She said again that he has a lot of patients who fit the profile & said I just have to keep reminding him. I asked her how long it usually takes him to start prescribing something new to him & she said sometimes a year.
PPLPMDL0020000001	Garfield Heights	OH	44125	6/22/2011	Spoke with Heather (pharmacist) who said she has not seen any Butrans activity. Reviewed appropriate patient type, dosing, & managed care/savings cards. She said thinks it is a great idea. I asked who in the area comes to mind as having a lot of patients like that & she suggested the Rutkowski's. She also said that many of the oncologists prescribe chronic pain medications. She said she would try to think of more doctors to tell me next time. Discussed OxyContin q12h for patients beyond Butrans & asked her if she wanted savings cards. She said she just had a patient yesterday who pays cash for his OxyContin every month who would be thrilled with a savings card. Gave her a package & she was very grateful.
PPLPMDL0020000001					

	Independence	OH	44131	6/22/2011	Caught Dr Rob in the hallway & told him I just had one quick question for him. I asked him if he sees a place at all for Butrans in his practice. He paused & looked through the initiation guide I handed him. I reminded him of Butrans' once-weekly dosing in a transdermal system of buprenorphine & reminded him of the appropriate patient type. He said he does think it is something he can use. I asked him if he would use Butrans, as a long-acting CII, in place of Vicodin for appropriate patients who he is getting ready to start on it for a chronic condition, or after Vicodin, but before Percocet. He agreed that he could use it after Vicodin but before Percocet since it is the only long-acting CII option. Reminded him it does still carry abuse & addiction potential & he said he understands that. Also reminded him of OxyContin for appropriate patients beyond Butrans 20mcg.
PPLPMDL0020000001	Cleveland	OH	44109	6/22/2011	I talked to dr about 5 Butrans core messages,discussed appropriate patients for Butrans,dr said he has a lot of chronic pain patients and he will consult with pm&r and pain management to see what their recommendations are,but he likes that Butrans is transdermal and dosed once a week.dr asked if patients can still take their short-acting analgesics like vicodin or percocet,i showed dr Butrans fpi,maintenance of therapy section and confirmed that he can do that or give non-opioid medications with Butrans.dr asked if i had any clinical trials to show him? I showed dr clinical trials section in Butrans fpi and also referenced this information in Butrans visual aid.I asked dr if he had patients taking tramadol,vicodin or percocet,daily,but not controlled? dr said he did.i showed dr Butrans initiation guide,discussed proper tapering of short-acting opioids and initiation of Butrans.dr said he will try it in a few patients and see what happens.we discussed formulary coverage and where
PPLPMDL0020000001	Akron	OH	44320	6/22/2011	I talked with Dr. Bonyo about helping him identify a specific patient for Butrans. He was in a rush so I left the initiation guide for him. No new info learned.
PPLPMDL0020000001	Stow	OH	44224	6/22/2011	Spoke to Kim in prescriptions and she said she has personally not had to do any PAs with Butrans but one of the other girls may have. I said when she sees appropriate patient who she may see refills month after month if she would remind them and she said she would.
PPLPMDL0020000001	Westlake	OH	44145	6/22/2011	Quick call, I asked Dr about his success with Butrans. He said he thinks it is working well and he hasn't had many call backs. I asked if he would continue to prescribe and he agreed.
PPLPMDL0020000001	Cleveland	OH	44109	6/22/2011	dr came in to lunch quickly,i asked dr if she recalled anything about Butrans? dr said no,not really the information is sitting on my desk. dr said she started to look through the Butrans information as she thought it was something else,but it turned out not to be so she stopped reading about Butrans.dr said she didnt need another Butrans fpi or initiation guide as she has it and she will read it. dr left to go to a meeting after those comments.
PPLPMDL0020000001	Copley	OH	44321	6/22/2011	Dr. Machado said that he had started 2 patients on Butrans and both, to his knowledge, were doing well. He said both patients were previously on SAO's. I asked if he had similar patients coming in this week that could also benefit from therapy and he said he would keep it in mind.
PPLPMDL0020000001	Cleveland	OH	44114	6/22/2011	dr said he's having success with patients getting started on Butrans but 1 patient did say that Butrans fell off and didnt want to take it anymore.i asked dr to show patients the Butrans patient information booklet,with the section on first aid tape or dressings over Butrans,if there are issues with patients not adhering to the skin.dr said he knows thats there and they do give the booklets to patients but he thinks this patient just didnt want to stay on Butrans and only wanted his pills.i asked dr who was appropriate in his mind,to start on Butrans? dr said patients with intermediate pain,taking vicodin or percocet and not controlled,thats who he thinks should be started on Butrans.I told dr that was great he was considering those patients,thinking earlier and dr said they only had 1 instance of insurance not covering Butrans but for the most part its been going through on plans.<font color=blue>-<b>CHUDAKOB added notes on 06/30/2011</b>-</font>Please make sure you call this in as it looks like you didn't report it.
PPLPMDL0020000001	Lakewood	OH	44107	6/22/2011	Quick follow up, I reviewed our last conversation when the Dr said that he thinks Butrans would be a good option instead of increasing their dose of short acting. I asked him if he would start a pateint like that today and he agreed. I reminded him and the staff to focus on commercial insurance with the savings card.
PPLPMDL0020000001	Cleveland	OH	44109	6/22/2011	I talked to dr about Butrans 5 core messages,dr said he likes that Butrans is transdermal and is a patch dosed once a week.dr said he is finishing residency and going to start his fellowship in geriatrics next week.dr said he knows the attendings write a lot of short-acting analgesics like tramadol,vicodin and percocet for their chronic pain patients.dr said Butrans could be an option,even with it being a long-acting opioid,but did Medicare cover Butrans? I told dr no,most medicare plans wont cover Butrans so he could focus on commercial or BWC patients,dr said ok.I asked dr to think of a few patients with commercial or BWC insurance that are taking the short-acting opioids daily,but not controlled,and start them on Butrans.dr said he'll consider it for sure as he thinks this is a good medication for some patients.I recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44105	6/22/2011	I talked to dr about Butrans 5 core messages,dr said Butrans being a CII was important and significant to him so that he can call in refills.dr said he liked that Butrans was transdermal and once weekly dosing was easier for some patients.I asked dr if he had chronic pain patients that were taking short-acting opioids,daily,but not controlled? dr said he has a few,but doesnt prescribe a lot of narcotics.dr said he'll take the information and read it and if he has any patients in mind he'll consider Butrans.dr asked about insurance coverage so I showed dr Butrans formulary grid.
PPLPMDL0020000001	Warrensville Heights	OH	44122	6/22/2011	Spoke with Debbie (nurse) who said that they did not need any Butrans or OxyContin savings cards. She said that their department remains in turmoil & changes keep coming. She told me again that they have fewer members of staff than ever which causes those left to do extra work to make up for that. She said as a result, they are still not seeing reps & that the policy remains. She said to keep checking back as things can change rapidly there.
PPLPMDL0020000001	Cleveland	OH	44109	6/22/2011	dr said she didnt remember much about Butrans other than it was transdermal.I reviewed 5 Butrans core messages with dr,dr said she likes the once weekly dosing and does treat a lot of chronic pain patients with short-acting analgesics like vicodin and percocet and some patients arent controlled on these medications.I asked dr if she would consider Butrans for those patients taking vicodin or percocet,not controlled? dr said she might and that she would take the information and read it over and think about it as she had to go.I gave dr Butrans fpi and initiation guide.I recommended Senokot-5
PPLPMDL0020000001	Independence	OH	44131	6/22/2011	I reminded Dr Trickett of our lunch conversation when she was telling me how time-consuming it can be to explain new medications to patients when prescribing a medication for the first time. I handed her a Butrans patient information guide & showed her how it explains general information, application, & disposal. I asked her if she thought this would be a useful tool for her to help her initiate treatment with Butrans. She said she did think it would help & that she thinks that her patients would take the time to read through it. She thanked me & walked away.
PPLPMDL0020000001	Bedford	OH	44146	6/22/2011	Spoke with Jessica, a new pharmacist at this location. Inquired about Butrans activity & stocking. She said that they do have it stocked & she has noticed at least one open carton, so they must have dispensed some, although she said she herself has not dispensed any. Reviewed Butrans indication, dosing, delivery system & also went over e-voucher. Discussed OxyContin savings cards although they do not stock it there.
PPLPMDL0020000001	Warrensville Heights	OH	44122	6/22/2011	Spoke with Michelle, Dr Zivic's MA, who said he "did not show up" for work today. Let her know I have been trying to reach him for a few months & asked how I can catch him best. She looked at his schedule & she said that he will not be back in the office until after the 27th of July. She suggested I come back then. I discussed Butrans & OxyContin savings cards with her & reviewed eligibility. She said she has enough of both type of savings cards.
PPLPMDL0020000001	Akron	OH	44333	6/22/2011	Dr. Brown said she has now started many patients on Butrans and is having much success with Butrans. She said she had to recently take a patient off because of severe nausea and headache. I asked how long the patient wore the patch and she said they could only tolerate for 3 hours. However that is the only patient that did not have a positive experience.
PPLPMDL0020000001	Cleveland	OH	44135	6/22/2011	Spoke with Megan, we reviewed the medication guide for Butrans and asked her to hand them out to the patients. We discussed steady state for Butrans and that patients should not titrate until 3 days. We reviewed appropriate apptelns for OxyContin when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Cleveland	OH	44109	6/22/2011	dr said she remembered that Butrans was a transdermal medication and dosed once a week which she likes but she has majority of cash paying patients in hospital and Butrans wouldnt be an option for them.dr asked about insurance coverage,I talked to dr about commercial plan patients and BWC patients trying Butrans and dr said she only has a few but dr said she does like OxyContin as a long-acting opioid,its covered on hospital formulary and wanted to know about OxyContin savings cards.I explained OxyContin savings cards program to dr and gave dr OxyContin conversion guide.I recommended SEnokot-5
PPLPMDL0020000001	Bedford	OH	44146	6/22/2011	I showed Dr Moufawad Butrans FPI 2.4 & told him that this was his proof & evidence that immediate release opioid or non-opioid analgesics can be used with Butrans. He told me he already knows this, it is the Medical Board who is confused & "uneducated". I told him I know that he knows it, but wanted to provide him with the FPI in the event that he is questioned again or if he wants to show the Medical Board that he is prescribing correctly. I told him that I could either give him the number to call Medical Services to make them aware of this or that I could call them with him. He said he would like me to be there when he calls. He asked me to come back Monday between 12-12:30 to call Medical Services to discuss this issue with them.
PPLPMDL0020000001	Cleveland	OH	44195	6/23/2011	I saw dr in hall,brief conversation,but I talked to dr about Butrans 5 core messages and asked what were the features of Butrans that were important to him? dr said he started 1 patient on Butrans because he heard of it through his colleagues and he liked that it was transdermal delivery and once weekly dosing.I asked dr how patient is doing and he said patients doing fine on butrans.I asked dr to consider patients taking percocet,daily,that arent controlled and asking for something else,and start them on Butrans.I showed Butrans visual aid and initiation guide-appropriate patients sections for discussion.dr said he will keep Butrans in mind and had to go
PPLPMDL0020000001	Cleveland	OH	44195	6/23/2011	I reviewed 5 Butrans core messages with Anne,NP, and asked her what were the top 3 features of Butrans she felt were important? Anne said she likes the transdermal delivery of Butrans and once weekly dosing but she hasn't had any patients complain to her that their medications not working.I asked Anne if any patients say their tramadol isnt lasting long enough or controlling their pain? Anne said once in awhile she hears that and does consider medication changes at that time.I asked Anne to consider Butrans,for those patients taking tramadol daily and not controlled.Anne said she'll consider it.I showed Anne Butrans visual aid,appropriate patients section and initiation guide for this discussion.We discussed Butrans formulary coverage and I recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44102	6/23/2011	I talked to Nagla,PA,about 5 Butrans core messages.Nagla said she started a patient on Butrans,that was with Dr.Celeste in this office,patient was resistant at first as she was taking percocet and not controlled and wanted more pills.Nagla said she and dr celeste told this patient they werent giving more pills and the only option she had was to try Butrans.patient agreed to try Butrans and has been doing very well on the medication.I asked Nagla to consider patients taking tramadol or vicodin,daily,that arent controlled and asking for something different,to start them on Butrans.Nagla agreed and said she will seriously consider Butrans for more patients as she likes the once weekly dosing and transdermal delivery of Butrans.we discussed Butrans formulary coverage and I recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44195	6/23/2011	I reviewed 5 Butrans core messages with Kathy,NP,asked her what were the top 3 features of Butrans that she felt were important? Kathy said once weekly dosing of Butrans and the fact Butrans is a CII,so she can prescribe Butrans and call in refills.Kathy said her biggest challenge has been that both doctors-dr minzter and dr mekhail havent felt Butrans was appropriate for anyone and she treats all of their patients.I asked Kathy if she had patients taking tramadol,on a daily basis,that werent controlled? Kathy said yes she see's them all the time and both physicians prefer if she increases dosing interval of tramadol or dosage strength.I asked Kathy and showed her Butrans visual aid,if she could take 2 patients not controlled on tramadol and start them on Butrans or at least discuss with both physicians? Kathy said she will do that but cant promise anything. we discussed Butrans formulary coverage.I recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44109	6/23/2011	I talked to Erin,Pharmacist,about 5 Butrans core messages and asked her what were the top 3 features of Butrans she thought were most important? Erin said transdermal delivery and once weekly dosing were the 2 features she liked most about Butrans.Erin said they have seen a few of dr nickels patients get Butrans scripts here so she knows he's prescribing.I asked Erin to give patients Butrans patient information booklet and focus discussion on application/rotation of Butrans,Erin said she would do that as they have been doing that recently.we discussed formulary coverage for Butrans and patient savings cards and I recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44102	6/23/2011	dr said he remembered Butrans was transdermal and a patch but that was it,I reviewed 5 Butrans core messages with dr,dr said once weekly dosing was a benefit and he liked that Butrans was a CII so he can call in refills.I asked dr if he see's patients on tramadol,vicodin or percocet,dosing daily but not controlled? dr said almost all of their patients are like that,so he thinks there's a place for Butrans in their practice.dr said he is new to practice and that if patients are taking 40mg of hydrocodone or oxycodone combis,he will refer them to Cleveland Clinic pain management as he doesnt want to deal with them and there's nothing more he can do for these patients.dr said he will consider a few patients, that are taking less than 15mg or 15-30mg of short-acting opioids,to start on Butrans.dr asked about insurance coverage,we discussed Butrans formulary grid and I asked dr to focus on commercial or BWC patients.I recommended Senokot-5
PPLPMDL0020000001	Parma	OH	44129	6/23/2011	Quick call- Dr Gigliotti said he was running way behind this morning so he did not have time to talk. He said that he has not found a Butrans patient yet & asked that I come back later to discuss it further. Spoke with Jazz & reviewed Butrans appropriate patient type & savings cards for Butrans & OxyContin.
PPLPMDL0020000001	Cleveland	OH	44104	6/23/2011	I reviewed 5 Butrans core messages with dr,dr said he likes Butrans being transdermal and once weekly dosing but he only has a few commercial plan patients that he could consider starting on Butrans and Butrans hasn't been on his mind as majority of patients are medicaid.dr said he writes a lot of OxyContin because medicaid covers it so its easy for him.dr said he likes long-acting opioids and would prescribe Butrans if it was available on Medicaid without a prior authorization.we talked about appropriate patients for OxyContin,showed flashcard with this information,discussed 7 tablet strengths and OxyContin formulary coverage.dr said he didnt need savings cards as majority are medicaid patients for OxyContin.I recommended SEnokot-5

PPLPMDL0020000001	Parma	OH	44134	6/23/2011	Spoke with Linda (MA) who said Dr Mandat would be out of the office all day & would return Monday afternoon. I reminded her of my previous visit when I left savings cards for Butrans & Senokot-S & Colace samples. She said she did not know if he has gone through any of the cards or samples. I reviewed Butrans appropriate patient type & delivery system with her & asked her to give Dr Mandat Butrans information. She agreed & asked me to come back next week to try to catch him for a discussion.
	Parma	OH	44129	6/23/2011	Dr Paat said that he has not been remembering Butrans but that he does want to use it. He looked at the initiation guide pg 6 & asked me how to titrate & start a patient. I asked him to show me which range of current opioids his average patient who he might switch to Butrans would be on. He said the column of <15mg hydrocodone. Discussed starting that patient on 5mcg dose & the ability to titrate every 3 days if necessary. Reminded him that he has said that he liked the once-a-week dosing & he said he does like that feature. He said he is going to try to use it. Spoke with Shari & asked her to try to help Dr Paat remember Butrans when she sees or takes a call from an appropriate patient.<font color=
PPLPMDL0020000001	Maple Heights	OH	44137	6/23/2011	Introduced Butrans to Dr Dale, delivering 5 core messages & alerting him on box warning & abuse/addiction potential. I asked Dr Dale if he saw a place for Butrans. He said he does. I showed initiation guide pg 6 & discussed initiating treatment in appropriate patients who were not well controlled on NSAID's/COX-2's & patients already on opioids. He said in general, he likes transdermal products & feels they are effective because they are constantly released instead of having plasma levels increase & decrease with each short-acting dose. I asked what usually causes him to switch a patient's pain medication & he said usually if there is a side effect or tolerance issue he will switch. Discussed Butrans as only CIII long-acting. He said he likes this feature & will consider using in patients already on opioids. Also discussed OxyContin q12h for appropriate patients beyond Butrans 20mcg & recommended Senokot-S for opioid-induced constipation.
PPLPMDL0020000001	Parma	OH	44134	6/23/2011	Spoke with Allene who said she has not seen any Butrans activity since the initial script. She said she knows that patient "didn't like it" & discontinued. I asked her if she knew what the patient didn't like (ie if it made her not feel well, didn't relieve the pain, had trouble with transdermal) but she did not know because another pharmacist was the one who spoke with the patient. Also discussed OxyContin savings cards. Heath, a Pharm D student was shadowing her for the day & she asked me to tell him about Butrans. Reviewed with him indication, dosing, appropriate patient type, box warning, CIII.<font color=
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	6/23/2011	Dr. Azem said she now had 2 patients on Butrans and has not heard back from either and assumes therapy is going good. She said she had many other patients that she thinks will benefit from the LA therapy the Butrans offers and said she would prefer it over SAO's.
PPLPMDL0020000001	Akron	OH	44319	6/23/2011	Spoke with Gretchen and explained what I had been talking to Dr. Wu about. She agreed that he had patients who are on SAO's that would absolutely benefit from Butrans therapy.
PPLPMDL0020000001	Cleveland	OH	44102	6/23/2011	I talked to Brian, Pharmacy technician, as Vince, Pharmacist, wasn't available to talk. I discussed 5 Butrans core messages with Brian and asked him what features of Butrans he felt were important? Brian said once weekly dosing of Butrans was easier for some patients and the fact its a patch is another benefit in his eyes. Brian said they have recommended Butrans to some patients by giving them Butrans patient information booklets but he's not sure about any scripts that have come through here, he doesn't think anyone has prescribed yet but told me to check back with Vince, Pharmacist, next time I am in the area. I gave Brian Butrans initiation guide and formulary grid and we discussed Butrans insurance coverage. I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44121	6/23/2011	Window call....reviewed the Butrans indication and once weekly application in a 7 day delivery. Reviewed commercial coverage and provided formulary grid.
PPLPMDL0020000001	Cleveland	OH	44113	6/23/2011	I talked to Mike, Pharmacy Manager about Butrans 5 core messages as he was asking if anyone was writing Butrans yet we talked about some physicians prescribing like Dr Nickels as he is at Grace Hospital with Mike. Mike said Butrans is a great medication being transdermal and the once weekly dosing is appealing to many patients, we talked about Butrans insurance coverage and I showed Mike Butrans formulary grid. I gave Mike the brochure/flyer for medical education resources and told him to log onto site and register if he would like some educational materials and also to see what certified medical education classes are there.
PPLPMDL0020000001	Cleveland Heights	OH	44118	6/23/2011	Opened the call discussing the Butrans indication and the CIII status available in a 7 day delivery system. I asked doc if a once a week dose was a benefit to his patients. He said it could be and he asked for clarity on the frequency of dosing. I explained that it is a once weekly patch which may be appropriate instead of starting patients on hydrocodone ATC. He asked me to leave literature on his desk. Reminded him of the oxycontin indication and provided savings cards.
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	6/23/2011	Re-introduced Butrans and FPI to Dr. Hegde. She said she thought she had some patients that could benefit from Butrans but felt more comfortable referring patients to Pain Specialists once they became more chronic.
PPLPMDL0020000001	Cleveland	OH	44130	6/23/2011	met with Melenie Petropoulos and Tom Roth. Melenie is originally from Pittsburgh. She is a Steelers fan. Tom is a Browns fan. Gave updated OxyContin PI and discussed minimal OxyContin generics left on market. Reviewed Butrans FPI and updated on how the product is doing. Gave savings card info. They are with Relay Health. Went over Med Ed Resources guide and other new educational materials. Tom will put the Med Ed Resources web site on their intranet for access by their pharmacists. Melenie also said they would inform pharmacists about the upcoming webinar in August. Discussed our laxative card to pharmacists about the computer. They will not be attending NACDS P&T Meeting in Boston in August as they are putting in a new pharmacy system then.
PPLPMDL0020000001	Maple Heights	OH	44137	6/23/2011	Quick call- Dr Mary said she was buried in paperwork & would not be able to stay for lunch. Butrans indication & once-weekly dosing option messaging. Spoke with Dana, her MA & went over Butrans dosing, delivery system, & savings cards for eligible patients. She said she would give Dr Shenigo the information & remind her.
PPLPMDL0020000001	Cleveland	OH	44130	6/23/2011	I reminded Dr Kansal of our previous discussion of Butrans & how he told me that he would be willing to try it on a patient who was taking short-acting around-the-clock opioids for a chronic condition who had commercial insurance. I asked him what his experience has been with doing that. He told me he has tried it on one person so far. I asked him to tell me about the patient. He said the patient is a young male who "is a mess" & has tried "every" pain medication available & is still not getting relief. He said he started him on 10mcg & that he just titrated the patient up to 20mcg. I told him it sounded like he was on the right track & asked if he would try additional patients, ie some who are not some of his worst-case scenario type patients. He said he plans to do this. He said he likes that patients can transition "smoother" from short-acting to Butrans by taking supplemental analgesia if needed as Butrans gets to working levels. Reminder of OxyContin for patients beyond Butrans
PPLPMDL0020000001	Barberton	OH	44203	6/23/2011	Dr. Patel said that he was having a lot of success with Butrans and has focused on prescribing it to patients who are already on opioid therapy. He said he feels most comfortable starting patients on the 5 mcg patch in which I explained initiation showing him that in some case the 10 mcg would be more appropriate. He said he would rather titrate them up to the 10 mcg patch after making sure they tolerate it well.
PPLPMDL0020000001	Akron	OH	44319	6/23/2011	Dr. Wu asked again about initiation which I quickly showed him using the titration guide. I explained the strengths and that the 20 mcg was only a titration dose.
PPLPMDL0020000001	Mayfield Heights	OH	44124	6/23/2011	I opened the call discussing the 5 Butrans selling messages. I asked doc where she might prescribe Butrans. She said maybe for patients that can't tolerate hydrocodone or after Ultram. I told her that it is a perfect place for Butrans as long as the patient meets the indication. Reviewed the initiation dosing and the commercial coverage. Provided formulary grid.
PPLPMDL0020000001	Cleveland	OH	44120	6/23/2011	I talked to Stewart, Narcotics Buyer/Pharmacist, about Butrans stocking and asked if he has seen anymore scripts for Butrans? Stewart said yes, he saw 1 of dr rosenfield's patients and dr sahal's patients. We talked about 5 Butrans core selling messages and I asked Stewart what he felt was most important about Butrans. Stewart said the transdermal delivery of Butrans and once weekly dosing are 2 features he thinks are important. I asked Stewart if he would focus on application/rotation of Butrans, with patients he see's, showing them the Butrans patient information booklet? Stewart said he will do that and has been giving the booklets to patients. I asked if Stewart has recommended Butrans to any patients? Stewart said he has told a few patients to speak with their doctors about Butrans because their short-acting opioids weren't controlling their pain and they wanted
PPLPMDL0020000001	Mayfield Heights	OH	44124	6/23/2011	Opened the call discussing the 5 selling messages of Butrans. He said he is going to try it - its just hard to remember something new. I reminded him to think of Butrans after tramadol or before going to hydrocodone. I asked him to prescribe for commercially insured patients.
PPLPMDL0020000001	Highland Heights	OH	44143	6/23/2011	Quick call.....Reminded doc of the appropriate Butrans patients - after tramadol failures or those on low dose short acting. I asked if he needed any savings cards. He did not know but Marianne confirmed that they still have some. Gave formulary grid reminders for oxycontin and Butrans
PPLPMDL0020000001	South Euclid	OH	44121	6/23/2011	Window call....reviewed he Butrans indication and other selling messages. Provided formulary grid and initiation guide. Nothing learned.
PPLPMDL0020000001	Uniontown	OH	44685	6/23/2011	I asked Dr. Stetler about his success with Butrans. He said it seems patients were having success and liked the therapy. I showed him the disposal unit since that was a concern on my last visit.
PPLPMDL0020000001	Cleveland	OH	44109	6/24/2011	I reviewed 5 Butrans core messages with dr and asked dr what were some features of Butrans that dr liked? dr said he likes that Butrans is a patch and once weekly dosing is easy for some patients. dr said he hasn't had any patients complain of their current dosing regimen so he hasn't considered Butrans. I showed dr Butrans visual aid, appropriate patients and asked dr to think of 2 patients taking tramadol daily, that aren't controlled, instead of refilling their tramadol, start them on Butrans? dr said he will if patients are open to wearing a patch. I showed dr Butrans fpi, maintenance of therapy section noting immediate release opioids or non-opioid analgesics can be used concurrently with Butrans, dr said ok that might help when he's talking to some patients who still want their pills every month. We discussed Butrans formulary coverage and I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	6/24/2011	I reviewed 5 Butrans core messages with dr, dr said he forgot about Butrans and hasn't started anyone. dr wanted to know who covered Butrans and did Medicaid cover Butrans? We discussed Butrans formulary coverage and I asked dr to put that aside for the moment so we could discuss appropriate patients for Butrans. I asked dr what features of Butrans did he like? dr said he likes that Butrans is a patch, once weekly dosing and its a CIII so he can call in refills. I asked dr if he had patients taking tramadol daily, that weren't controlled and ask him for something else? dr said yes that happens a lot. I showed dr Butrans visual aid, appropriate patients section, and said for those patients asking for something else, why not try Butrans? dr said he will try it in a few patients. I showed dr Butrans patient information booklet and asked him to focus patient discussion on application and rotation of Butrans, dr agreed. I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	6/24/2011	I reviewed 5 Butrans core messages with dr and asked her what she liked about Butrans? dr said she keeps forgetting about Butrans but she likes that its a patch, once weekly dosing is easier for some patients and Butrans is a CIII so they can call in refills which is easier for her and her staff. I asked dr if she's had any patients taking percocet daily, that aren't controlled? dr said she hasn't heard any patients complain to her recently but it does happen occasionally where patients want more pills or something different than what they are taking. I showed dr Butrans visual aid, appropriate patients section and asked dr to think of 2 patients taking percocet every day, but not controlled, to start them on Butrans. dr said she will if patients are willing to wear a patch. We talked about patients still taking immediate-release opioids with Butrans, if dr deems appropriate. I showed Butrans fpi with this information. We discussed Butrans formulary coverage. I recommended Senokot-S
PPLPMDL0020000001	Woodmere	OH	44122	6/24/2011	I spoke with a technician who said that the pharmacists were not available to see me today. Reviewed Butrans dosing availability & delivery system & savings cards for Butrans & OxyContin. Also reminded her of eligibility requirements for savings programs (ie patients cannot use them if they have any type of government insurance like Medicaid or Medicare.) She said she would give my card & information to Angie.
PPLPMDL0020000001	Cleveland	OH	44111	6/24/2011	Spoke with John. We reviewed the Butrans patient medication guide and how to instruct patients. We reviewed state in 3 days and that patients should wait 3 days to titrate. We discussed managed care for Butrans and OxyContin.
PPLPMDL0020000001	Maple Heights	OH	44137	6/24/2011	Quick call as I was told this was not a good time. Reviewed with the technician Butrans & OxyContin savings cards & eligibility requirements. I asked her to give my card & Butrans information to Kim- she agreed to do this & said to come back another time when they are not so busy.
PPLPMDL0020000001	Cleveland	OH	44113	6/24/2011	I reviewed 5 Butrans core messages with dr, dr said he hasn't thought about Butrans and only remembered it was a long-acting opioid. I asked dr what features of Butrans were important to him. dr said he liked that Butrans was transdermal, with once weekly dosing and he was surprised to hear that it was a CIII medication. I asked dr if that was a good thing, being a CIII? dr said yes because its easier to call in refills. I showed dr Butrans visual aid, appropriate patients section and discussed patients taking tramadol or vicodin every day that aren't controlled and asking for something different, that's where he can consider Butrans. dr said he has a lot of chronic pain patients taking opioids every day and its challenging to treat their pain so he likes the idea of a long-acting opioid for some patients. dr said he's not sure if patients will want to stop taking their pills and wear a patch. I showed dr maintenance of therapy section, butrans fpi, noting use of immediate release opioids or non-opioid
PPLPMDL0020000001					

PPLPMDL0020000001	Cleveland	OH	44103	6/24/2011	i talked to Dave, Pharmacy manager, briefly about 5 Butrans core messages. Dave said they have seen a few scripts for Butrans but he didn't have time to look and see who they were from but he knows they were out of the Cleveland clinic. I asked Dave what were some features of Butrans that he liked? Dave said Butrans being transdermal and dosed once a week are 2 features he likes. I asked Dave to give patients the Butrans patient information booklet, focus his discussions with them on application and rotation of Butrans, when picking up their scripts, Dave said he would do that. We briefly talked about appropriate patients for OxyContin, showed flashcard with this information, gave Dave OxyContin conversion guide and showed him OxyContin formulary grid. I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44114	6/24/2011	I talked to Laura, Pharmacist, about Butrans stocking and if she's seen any scripts? Laura said she's not had any Butrans scripts yet and won't order Butrans until she does. I reviewed 5 Butrans core messages with Laura and asked her what she felt were the most important features of Butrans? Laura said she likes that Butrans is a patch and dosed once a week. I asked Laura if she could give patients the Butrans patient information booklet, if they are taking short-acting opioids every day and not controlled, so that patients can talk to their doctors? Laura said she will do that if patients say anything to her. I discussed OxyContin stocking, appropriate patients (showed flashcard with this information) and gave Laura OxyContin conversion guide and formulary grid. I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	6/24/2011	I reviewed 5 Butrans core messages with Dr. J. asked Dr. what were the important features of Butrans? Dr. said he liked that Butrans was transdermal and once weekly dosing is much easier for some patients. Dr. said majority of his patients are controlled on their tramadol which is what he prescribes the most and he has patients doing physical therapy, so there's no need to add Butrans right now. I showed Dr. Butrans visual aid, appropriate patients section, discussed tramadol patients who are taking tramadol every day and not controlled and asking for something different, to consider Butrans for them. Dr. said he will keep it in mind and we discussed Butrans formulary coverage. I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44102	6/24/2011	I reviewed 5 Butrans core messages with Dr. Dr. said she knows Butrans is an option but her biggest challenge is that she doesn't prescribe long-acting opioids so she can't get prior authorization for Medicaid patients to try Butrans. I asked Dr. if she had any commercial plan patients, where she could try Butrans in them? Dr. said a couple but not many, majority of practice is Medicaid and Medicare. Dr. said she likes that Butrans is a patch and dosed once a week and would prefer to give her patients Butrans instead of all the pills she prescribes monthly for patients however with Medicaid prior authorization requirements for Butrans as they are, it'll be tough for her to start anyone. I showed Dr. Butrans visual aid for our discussion on appropriate patients, if she has any commercial plan patients she feels are appropriate for Butrans and I showed Dr. Butrans formulary grid. I recommended
PPLPMDL0020000001	Cleveland	OH	44130	6/24/2011	Dr. Diab said that Butrans 5mcg "doesn't work". I asked him to clarify. He said that he titrated one patient to the 10mcg & 2 patients did not want to try a higher dose, they wanted to discontinue. He also said that insurance did not cover Butrans for two other patients. Reviewed managed care & reminded him of commercial coverage, which he said he remembers now. I asked how his experience thus far would influence his future prescribing of Butrans. He said he still is doing to prescribe it for patients because he likes that it can be refilled & likes having "a different option" for patients. Also reminded him of OxyContin q12h for appropriate patients beyond Butrans 20mcg. He promised he would not give up on Butrans just like I have not given up on coming in frequently to see him.
PPLPMDL0020000001	Fairlawn	OH	44333	6/24/2011	Dr. Parisi said that he had success with Butrans and will continue to use it in appropriate patients. I asked him which of his patients would benefit most from therapy and he said patients who were failing on a low dose SAO. I explained that was certainly an ideal patient.
PPLPMDL0020000001	Parma	OH	44129	6/24/2011	I reminded Dr. Roheny of our previous Butrans conversations & that he told me that he has not heard anything negative back so far. He said that he still has not heard anything from that patient, so either she is happy or she is not taking it. I asked him where he saw a place for Butrans & he said he does think it seems like a good option to have. I asked him if, then he plans to put more patients on it & he said he would. He then said that he heard a story on the news about someone who went into a pharmacy in New York & held them up at gunpoint & asked them for OxyContin. I told him I had not heard of this & that it is unfortunate & tragic when events like this happen. I asked him if he would agree that when in the hands of appropriate, legitimate patients, OxyContin can be a good option. He said he guesses & then added that he forgot that I also sold OxyContin. He said that with him, I should probably focus on Butrans & then went into a room.
PPLPMDL0020000001	akron	OH	44333	6/24/2011	I asked Dr. Bashor if he had seen any patients that could benefit from Butrans therapy over the last few weeks. He said that in his practice he probably only has a handful of patients that had the right insurance since the patients he thinks would benefit from it are elderly. I asked if he would flag the few patients charts that could benefit AND have the right insurance. He told me to talk with Gretchen on my next visit.
PPLPMDL0020000001	Mogadore	OH	44260	6/24/2011	I asked Dr. if we can talk about her patients who are no longer controlled on NSAIDs or Tramadol who would benefit from Butrans and she said she has not written Butrans, she has forgotten about it. She said she has a good amount of patients on Vicodin but not many new patients. She asked how it is initiated and we reviewed that and she said he would be more likely to write it in patients on Tramadol, she said she would give it a try.
PPLPMDL0020000001	Cleveland	OH	44130	6/24/2011	Spoke with Dave & asked him if he had ordered Butrans per our last discussion. He said that he ordered & has one box of 10mcg in stock & added that he has not seen a prescription yet. Discussed with him the Butrans patient type I am discussing with physicians (ie patients taking Vicodin or tramadol every day for chronic conditions). Also reviewed e-voucher & asked him if they needed any OxyContin savings cards. He said he has enough & will keep his eye out for Butrans prescriptions.
PPLPMDL0020000001	Fairlawn	OH	44333	6/24/2011	I asked Dr. D'Onofrio if he was any closer to prescribing Butrans and he said he was. We talked about specific patients that may be potential candidates for therapy and I asked if he would consider flagging their charts so when he is comfortable prescribing he would remember those patients and he agreed.
PPLPMDL0020000001	Mogadore	OH	44260	6/24/2011	Joe said he has not prescribed Butrans simply because he has forgotten and he has tried to cut down on writing chronic pain medicine. HE said he likes this because it is schedule 3 and it is once a week. HE asked what the coverage is and we reviewed managed care coverage. HE said he thinks he has some patients who may benefit.
PPLPMDL0020000001	Cleveland	OH	44111	6/24/2011	Spoke with Katie tech, we reviewed Butrans patient medication guide and I asked if she would put them with the medication. We reviewed the savings cards for Butrans and OxyContin and they do have the e-voucher system.
PPLPMDL0020000001	Copley	OH	44321	6/24/2011	I asked Dr. Hein about his success with Butrans on the patients he had committed to trialing. He said he had not tried it because the patients preferred to stay on their oral medications. I asked if he thought that was the best therapy? He said "we'll see" and walked away.
PPLPMDL0020000001	Lyndhurst	OH	44124	6/24/2011	Quick call....opened the call discussing patients that he is considering placing on hydrocodone. He said he tried Butrans. I asked him for patient feedback. He said it worked fine. Nothing else learned as he walked away. Let him know I was leaving a formulary coverage reminder and an dosing guide.
PPLPMDL0020000001	Lyndhurst	OH	44124	6/24/2011	I discussed the Butrans indication, 7 day delivery of analgesia, once weekly dosing and positioning - before going to hydrocodone. I asked her if she sees any merit to such a product for her patients. She said she does not really get into treating too much pain. She does not have those chronic patients. I let her know that Butrans is a CII which means it can be called in or refilled.
PPLPMDL0020000001	Fairlawn	OH	44333	6/24/2011	I asked Dr. Lefkowitz if he thought he had any patients that could benefit from Butrans therapy and he said no. I thanked him for his OxyContin business. No new info learned.
PPLPMDL0020000001	Fairlawn	OH	44333	6/24/2011	Dr. Lefton said that he very rarely treats chronic pain but in the event that a patients required more than a SAO would prescribe Butrans. He said he liked that it was a schedule 3 product and a LAO.
PPLPMDL0020000001	Cleveland	OH	44109	6/24/2011	worked pm&r dept-see call notes on physicians, worked internal medicine dept-left Butrans fpi, initiation guide, patient information booklet and formulary grid for Dr. Lindehm, Dr. Ricanati, Dr. Harrington and Dr. Falck-Ytter, as I couldn't see any of these physicians.
PPLPMDL0020000001	Westlake	OH	44145	6/24/2011	I asked Dr. to tell me about the success he is having so far, he said he is having a lot of success. He said he did have one patient report that they had some type of skin reaction to the patch and they discontinued use. But other patients have been doing well. He said the only complaint is that it is too expensive. He said one patient said it was \$160 and I let the Dr. know that that patients must have not had managed care coverage. We reviewed the managed care for Butrans and the savings cards. I let him know that patients can get Butrans for as little as \$15 per month. I asked Dr. if he will continue to prescribe Butrans for patients taking short acting every day and he agreed.
PPLPMDL0020000001	Akron	OH	44319	6/24/2011	I asked Dr. Yee if had the opportunity to prescribe Butrans and gather some patient feedback like we had discussed and he said he will keep it in mind moving forward. No new info learned.
PPLPMDL0020000001	Lyndhurst	OH	44124	6/24/2011	I reviewed the Butrans indication and the 7 day delivery. I provided confirmation that it is a CII and not a CII which means it can be called in and refilled. She asked about the max dose and constipation as a side effect. I referred to the AE's section of sales piece and explained the 20mcg is the max dose. Low dose oxycodone might be an appropriate next step. She asked about the savings cards and how long they can be used. I explained the 12/11 expiration date. She said she has a couple of patients in mind for Butrans. I explained the proper initiation dosing and positioned Butrans after tramadol/ryzolt failures and before oxycodone. She said she would try it.
PPLPMDL0020000001	Independence	OH	44131	6/24/2011	Reminded Dr. Pal of our previous Butrans discussions where we have talked about the various kinds of patients he might try on Butrans (ie in place of chronic tramadol, as a switch for patients requesting changes or increases in their chronic pain medications). I asked him what chronic pain patients he would NOT consider for Butrans. He said if someone is on something as "strong" as fentanyl or 6 Percocet, for example, per day, he would not consider Butrans because he does not think it would work. He also said it can be difficult to switch patients from one opioid to another because they get mentally "caught up" on the name of the drug they are taking or the name of the drug they think will work. Discussed setting patient expectations for pain control. He said it is very time consuming counseling these patients & also said he is concerned with addiction in these patients. I agreed that he should be cautious in prescribing all opioids.
PPLPMDL0020000001	Garfield Hts	OH	44125	6/24/2011	Spoke with MA Dina who said that Dr. Sadowski took another day off to care for his sick daughter. I asked her if she has had the opportunity to remind Dr. Sadowski about Butrans when she gets a call from a patient who may be appropriate. She said she has not done this yet as he has not been in the office very often lately. She did add that he has "so many" patients who would be good candidates for Butrans. Discussed patients calling in too soon for refills or asking for changes or increases in chronic pain medications. She said he has many patients on chronic Vicodin & then he will step them up to Percocet. I told her that my goal was to try to get him to consider Butrans, a long-acting CII, before going to Percocet, another short-acting & a CII. I did remind her that Butrans still could carry abuse & addiction potential. She said she thinks he may be willing to do this if we can keep reminding him. She said to try in another day to catch him.
PPLPMDL0020000001	Cleveland	OH	44113	6/24/2011	I reviewed 5 Butrans core messages with Dr. and asked her what were the most important features about Butrans that she liked? Dr. said she likes that Butrans is a patch, a long-acting opioid and dosed once a week. Dr. said Butrans being a CII is much easier for her so she can call in refills. We talked about patients Dr. started on Butrans and the success they are having. Dr. said she's seeing improvements in patients pain levels so she's happy and patients are controlled on Butrans. Dr. said some patients still need some short-acting analgesics and some don't. I showed Dr. Butrans visual aid and asked Dr. if she would consider patients on NSAIDs, to start on Butrans before going to tramadol or vicodin. Dr. said probably not she will go to short-acting opioids first, then long-acting if patients aren't controlled with the short-acting. I recommended Senokot-S
PPLPMDL0020000001	Mogadore	OH	44260	6/24/2011	I asked Dr. to continue our conversation about Butrans and his patients who are no longer controlled on NSAID or Tramadol and he said he has not written any but forgot about it but was mad because he said he should really write this instead of Vicodin. We reviewed managed care and dosing and if their patients are on higher doses of Vicodin they can go to low dose Oxycodone
PPLPMDL0020000001	Beachwood	OH	44122	6/24/2011	Spoke with Tara & Shelly (MA) who said that Jim & Dr. Tabbaa had just left for the evening. I asked if Fridays after 4PM are still best for catching Dr. Tabbaa. They said that they have been getting out earlier recently. They went on to say that the policy with respect to reps will likely be changing because they have "been getting in trouble" for allowing reps to come back. They said they will probably be completely inaccessible to reps in the near future. I gave them Butrans information & asked them to give it to Jim & Dr. Tabbaa when they return to the office- they agreed. Reviewed savings cards for both products. I also asked them to take my card & let me know of any policy changes regarding reps & told them I would come back to try to see Dr. Tabbaa & Jim.
PPLPMDL0020000001	Beachwood	OH	44122	6/24/2011	Vickie (nurse) said that Dr. Yokiel would not be able to see me today because he had a waiting room full of patients & had to leave ASAP. Reminded her of our previous Butrans discussion & she said she has not heard anything further. I asked her to give Butrans information to Dr. Yokiel & to Jennifer, since she is starting to see patients more in the office. She agreed to do this & said to try another day to catch Dr. Yokiel.
PPLPMDL0020000001	Cleveland	OH	44113	6/27/2011	I reviewed 5 Butrans core messages with Dr. Dr. said he likes that Butrans is transdermal and remembered it was a CII dosed once a week. I asked Dr. if he had 2 commercial plan patients taking vicodin, every day, but their pain not controlled? Dr. said he does have a few commercial patients but not many as most of his patients are Medicaid and he can't meet Butrans prior authorization requirements for Medicaid so he's not sure if he can give me much Butrans business. I told Dr. to just think of those few commercial plan patients and if Dr. feels patients meet Butrans indication and are appropriate (I showed Butrans visual aid for discussion) then start them on Butrans. Dr. said he will do that and we discussed patient savings cards for those commercial plan patients that he would start on Butrans. I recommended Senokot-S

	Cleveland	OH	44114	6/27/2011	i talked to Dave,pharmacy manager,about Butrans scripts he's seeing from doctors and we discussed who appropriate patients are for Butrans,i showed butrans visual aid for discussion.dave said he thinks some doctors are waiting too long,to consider patients for butrans,so patients who are already taking oxycontin or duragesic instead of patients taking vicodin or percocet and thinking of butrans earlier in therapy.i asked Dave if he would recommend Butrans to any physicians he has a good relationship with,if patients tell him their pain isnt controlled with their short-acting opioids? dave said he would do that and i asked dave to focus patient discussions on application and rotation of butrans when they get scripts filled,dave said he would do that,i left butrans patient information booklets and we discussed Butrans insurance coverage.we talked briefly about OxyContin stocking,showed appropriate patients flashcard,conversion guide and showed dave OxyContin formulary grid
PPLPMDL0020000001	Parma	OH	44129	6/27/2011	Caught Dr Chagin at the window & asked him how the initiation of Butrans was going for him. He said he has not prescribed it yet but wants to- he is just not remembering it.Spoke with Debbie (MA) & reviewed Butrans appropriate patient type, managed care, & savings cards. She requested additional OxyContin savings cards & OTC samples. Also scheduled first available breakfast to discuss Butrans further with Dr Chagin. She said to keep reminding him about Butrans.
PPLPMDL0020000001	BEDFORD	OH	44146	6/27/2011	Spoke with technician as there was no pharmacist available. She said i could come back another time to try to catch him. I reviewed with her Butrans appropriate patient type & also discussed managed care & savings cards for Butrans & OxyContin. She said she did not think they needed any more cards for OxyContin.
PPLPMDL0020000001	Lakewood	OH	44107	6/27/2011	Quick call at window, i told Dr he seemed excited about Butrans and what is his hesitation. He said that he is working on it and will give it a try. I asked Kim what he means by "working on it" and she didn't know. She said she will still try to recommend patients and we reviewed the appropriate patients on tramadol or vicodin around the clock.
PPLPMDL0020000001	Garfield Hts	OH	44125	6/27/2011	Quick call- I asked Dr Sadowski why not think of Butrans for appropriate patients before he starts them on Percocet/after Vicodin. He paused & said he had not thought of doing that. I asked him to prescribe Butrans for the next patient who is on around-the-clock Vicodin who he would typically step up to Percocet. He agreed. Spoke with Dina & let her know that Dr Sadowski committed to prescribing Butrans instead of Percocet for a patient on around-the-clock Vicodin & asked for her help in reminding Dr Sadowski of that commitment. She agreed.
PPLPMDL0020000001	Cleveland	OH	44103	6/27/2011	i talked to Joe,Owner of Shella Drug,about 5 Butrans core messages and asked Joe what were the top 3 features of butrans that he liked? Joe said he liked that Butrans had transdermal delivery and was a once weekly dosing option for patients.Joe said he had Butrans in stock,as it was auto-shipped by wholesaler but hasnt seen any scripts for Butrans yet.i showed Joe Butrans visual aid,appropriate patients section and asked if Joe could recommend Butrans to any patients who told him their short-acting opioids werent controlling their pain? Joe said he rarely hears that from patients,but would keep it in mind.i gave Joe a couple of Butrans patient information booklets and said he could give these to patients he deems appropriate for Butrans,so they can discuss with their doctors.Joe said that was fine.we discussed Butrans formulary coverage and Butrans patient savings cards. we discussed OxyContin,appropriate patients and i showed flashcard,joe said he doesnt stock oxycontin here
PPLPMDL0020000001	Akron	OH	44333	6/27/2011	Dr. Griffiths said she is happy with the patients she has on Butrans and will continue to keep it in mind for appropriate patients with the right insurance. She said she is really considering putting patients on Butrans who are asking to be titrated on their SAO's. I explained those were ideal types of patients.
PPLPMDL0020000001	Cleveland	OH	44104	6/27/2011	i talked to dr about 5 Butrans core messages and appropriate patients to start on Butrans,dr said he started 1 patient on Butrans,as we discussed last time i talked to him.dr said he is looking at patients who have a negative MRI and are taking vicodin or percocet and not controlled and asking him for more pills.dr said he's not going to refill their short-acting and will consider Butrans for these patients.i showed dr Butrans visual aid,appropriate patients,opioid experienced and discussed tapering of short-acting opioids and initiation of Butrans.we talked about Butrans insurance coverage.i asked dr to start a few more patients on Butrans,like the 1 he started,that he feels are appropriate for Butrans.dr agreed.i recommended Senokot-5
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	6/27/2011	Dr. DiLauro said that she liked Butrans therapy and had some additional patients in mind that she could trial it on. She said that patients really liked that it lasted for 7 days and they also had reported that it stuck well.
PPLPMDL0020000001	Barberton	OH	44203	6/27/2011	Introduced Butrans via the FPI. I asked how pf ten he was treating pain and he admitted that he did treat it and thought this would be a great option for patients that need a LAO. He said he would trial it on 2 patients and let me know what he thought.
PPLPMDL0020000001	Akron	OH	44333	6/27/2011	I asked Linda if she would try Butrans on some additional patients so she can get a fair trial. She said she liked to prepare her patients for Butrans therapy. When I asked for clarification she said that on the next visit she would explain Butrans therapy to potential patients so she could start therapy soon after.
PPLPMDL0020000001	Lakewood	OH	44107	6/27/2011	Quick call, i only had time to remind Dr about Butrans and ask if he has just one patient taking low dose vicodin he could convert to Butrans. He agreed.
PPLPMDL0020000001	Cleveland	OH	44125	6/27/2011	Spoke with Christine & asked how she thought patients with chronic pain may benefit from Butrans. She said some people do not like to take pills around-the-clock, so the transdermal option may be more convenient for them. She also said that because compliance can be an issue only having to think about the medication once a week may be helpful for them. Reviewed savings cards for Butrans & OxyContin & made sure she had enough Dr. Higley said that he had thought of some Butrans patients but honestly had just forgotten to prescribe it. He said that he had many patients that could benefit from therapy and would try harder to keep it in mind. He also said that he felt very confident prescribing it. I asked if i could stop in each week and send back a brochure as a reminder and he agreed.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	6/27/2011	I reviewed the key messages for Butrans and asked the Dr if he had just one patient this week who might benefit. He said he will keep it in mind and we reviewed the invitation guide. Reminder about OxyContin as an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Lakewood	OH	44107	6/27/2011	i reviewed 5 Butrans core messages with dr,dr said she could only remember that Butrans was transdermal.dr asked what the dosing was for Butrans and what schedule it was? i showed dr Butrans visual aid,looked at 7 day dosing interval for Butrans and that Butrans is a CII so she could call in refills for Butrans.dr said she had patients taking vicodin and percocet that are sometimes asking for something different so she could consider Butrans for them,but she has a lot of medicaid patients.dr asked if Butrans was covered on Medicaid? i discussed Medicaid prior authorization requirements for Butrans,dr said she doesnt prescribe a lot of the long-acting opioids that medicaid requires first,for approval of butrans,so that could be her challenge.i asked dr if she had any commercial plan patients that she could consider,to start on Butrans? dr said she has a handful but not many.i asked dr to think of 2 patients,commercial plan,that are taking percocet every day but their pain isnt
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	6/27/2011	Introduced Butrans and FPI. Dr. Lazlo said he rarely treats pain but in the event he prescribed an opioid for the first time liked Butrans for compliance reasons since it was once a week and that it was a schedule 3.
PPLPMDL0020000001	Lakewood	OH	44107	6/27/2011	I asked Dr about the success of his Butrans patients. He said they are doing fine when it is approved on managed care. I asked if he has started any new patients recently and he said he might have last week but he can't remember. We reviewed the managed care for Butrans and the savings cards. He said he is handing out the savings cards with each script. We discussed OxyContin as a long acting option that is covered on Med D AARP and Medicaid. He said he does still prescribe OxyContin when patients are taking 4 or more vicodin or percocet around the clock.
PPLPMDL0020000001	Parma	OH	44129	6/27/2011	Quick call- Dr Ortega said that he has had nothing new come up with Butrans since we talked last week. He said that he is still looking for additional patients to switch & will keep me posted on his progress. Spoke with Cindy who checked her stock of savings cards for Butrans & OxyContin & said she was OK on them. I asked if she has had any calls from patients or pharmacies regarding Butrans & she said she has not.
PPLPMDL0020000001	Parma	OH	44134	6/27/2011	I reminded Dr Mandat of our previous conversation when he told me that he prescribed Butrans for a few patients after reading about it in a journal. I asked him what the initiation process was like for him in these patients & what type of titration he has had to do for them. He said he starts everyone at the 5mcg, as he is most comfortable doing that. He said he finds he always has to go to at least 10mcg & in some cases to 20mcg. I asked him what determines if he will give a patient Butrans or if he will choose something different & he said that typically he uses Butrans when the patient has failed everything else. I asked him if this is because he has less experience with Butrans because it has not been out as long as others & he said yes. Also gave him more Colace samples per his request.<font color=blue><b>CHUDAKOB's query on 07/09/2011</b></font>Have the patients he has on Butrans had success? If so, this may be something to build upon to increase his comfort level. What do you think?<font color=green><b>APSEGAS's response on 07/10/2011</b></font>He has said that he has had success with Butrans so far. He said that he has only used it on patients who he sees in hospice as he does not prescribe many opioids for patients in the office setting. I do agree that reminding him of the success he has had would be a good angle. I need to try to uncover how many opioids he really does prescribe in the office setting. Sometimes they will say they don't prescribe them there when they really do.<font color=blue><b>CHUDAKOB added notes on 07/10/2011</b></font>Good thinking! Sounds like you have a plan!
PPLPMDL0020000001	Lakewood	OH	44107	6/27/2011	Spoke with Megan, she said they might have one or two patients on Butrans but the 20mcg has not moved yet. We reviewed the invitation guide and how to titrate to the 20mcg. I let her know I am discussing this with the Drs and patients should not titrate until 3 days when they reach steady state. We reviewed OxyContin as an option when the Butrans 20mcg may not be adequate analgesia.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	6/27/2011	Introduced Butrans via FPI. I asked Dr. Wilson how often he was prescribing pain meds and treating chronic pain. He said more often then he likes and said that Sr. Sassano was the one prescribing the most. He said there was a definite place for Butrans at his practice, both for opioid naive and opioid experienced patients. I explained how to initiate therapy for both utilizing the titration guide.
PPLPMDL0020000001	Solon	OH	44139	6/27/2011	Spoke with Julie (nurse) & let her know i had lunch with Dr Zaidi last week & that he had expressed interest in prescribing Butrans & that i was there to follow up/see if he had any questions. She then spoke with Dr Zaidi & said that he said he did not have any questions at this time. Julie said that he kept my card & will call me if they start to have any questions when prescribing Butrans. I also let her know that i left OxyContin savings cards & Senokot-5 samples during my last visit & asked her to call me if they need more at any time.
PPLPMDL0020000001	Warrensville Heights	OH	44122	6/27/2011	Spoke with Jazz (MA) & inquired about recent Butrans activity. She said that she doesn't know specifically if Dr Brooks has prescribed it lately, but she does know that he has been trying to use it more. I asked if she does the prior-authorizations for medications & she said she does sometimes & Beth also does them. She said they did not need more OxyContin or Butrans savings cards at this time. Made appointment to speak with Dr Brooks.
PPLPMDL0020000001	Westlake	OH	44145	6/27/2011	I reviewed the 5 key messages for Butrans as asked what benefits he sees. The Dr said that it sounds fine, but is concerned about managed care being a hassle. I reviewed the managed care and savings cards and asked if he had just a few commercial insurance patients to try Butrans for. He said he will give it a try. I reminded him that OxyContin is still a long acting option that is covered on Medicaid and Med D AARP.
PPLPMDL0020000001	Bedford	OH	44146	6/27/2011	I let Dr Moufawad know that we are working with the medical board to clarify the use of Butrans with them to help prevent any more issues with prescribing. He said he very much appreciated this. He added that he knows he is doing nothing wrong when prescribing Butrans with supplemental analgesia, but he said it seemed that the medical board was getting it confused with Suboxone & they did not understand that Butrans is used for pain & not addiction. He thanked me again for trying to help him & asked me to keep him posted.
PPLPMDL0020000001	Cleveland	OH	44135	6/30/2011	Spoke with Jenny, MA. We discussed Butrans and examples of appropriate patients. We reviewed the savings cards for Butrans, OxyContin and Ryzolt. She said that the Dr has been referring many of his chronic opioid patients including OxyContin patients, to pain management due to the house bill. He does not want to register as a pain management clinic so he will not have more than 50% of his patients on chronic pain meds.
PPLPMDL0020000001	Cleveland	OH	44111	6/30/2011	I asked Barbara her thoughts on how Butrans might benefit her patients. She thinks the 7 day dosing sounds like a good thing. She said that she has not had the chance to prescribe it lately since she is on the floors of hospital now. She is taking Scott's place for now since he moved to N Carolina. I reviewed OxyContin as an option for those patients in the hospital instead of short acting around the clock and she said she does recommend it.
PPLPMDL0020000001	Cleveland	OH	44103	6/30/2011	had opportunity to see dr and gave him OxyContin savings cards.nothing learned
PPLPMDL0020000001	Cleveland	OH	44111	6/30/2011	Quick call, Dr told me that he had tried Butrans before i could even say anything. I asked if the patient was able to get it ok and that i wanted to make sure everything goes smoothly for his office. He asked me to talk to Barb. Barb said that she did not remember what managed care but she thinks the patient was able to get it after a prior auths. I let her know i will follow up next week to make sure the patient has success with Butrans and to see if i can do anything to help. She said they still do have a handful of patients on OxyContin and they seem to all be doing really well.
PPLPMDL0020000001	Lyndhurst	OH	44124	6/30/2011	Quick call with tech, Lia. I discussed the indication and appropriate patient for Butrans. She said she has seen 1 or 2 scripts for it. I reviewed the patient information guide and what to tell patients about the application should they have questions. She asked if the patch should be rotated. Told her 7 day and not to repeat within 21 days. Provided Medical education catalog and CEs for pharmacist.
PPLPMDL0020000001	Cleveland	OH	44135	6/30/2011	I spoke with Brad, he said there has not been any movement with Butrans. He said that he has seen a few scripts but they were not able to get the prior auth for Medicaid. He said they have many appropriate patients but very high Medicaid population. We reviewed the managed care information for Butrans. Brad told me that he sees a lot of opioid scripts and refills from Dr Kevin Masterson and he feels that if he starts prescribing Butrans it will start moving at his location. I wrote down Dr Masterson's address and will investigate. We reviewed that OxyContin is a long acting option that is covered on Medicaid and commercial patients can use the OxyContin savings cards. He said that he has not seen Ryzolt scripts for the same reason as Butrans. He said he remembers some Ryzolt scripts, but they eventually went to generic due to managed care.
PPLPMDL0020000001					

PPLPMDL0020000001	Akron	OH	44333	6/30/2011	I asked Dr. Brown how her patients were responding on Butrans and if they were continuing to get pain relief as a result of therapy. She said that they were and she was using it quite a bit and would continue to do so because the majority of her patients were responding so well to therapy.
PPLPMDL0020000001	Akron	OH	44319	6/30/2011	Stopped in as promised and spoke with Gretchen about the message and information I was covering with Dr. Yee. She said that she feels many patients could benefit from Butrans and many of his patients are on SAO's.
	Copley	OH	44321	6/30/2011	I spoke with Dr. Heim and asked how his patients are doing on Butrans, he told me he had not started anyone yet, I asked him what he expected after initiating therapy to a patient or 2 and he said efficacy. I asked him if he would trial it so we could talk about the efficacy and how his patients liked it. He said he would. <font color=blue><b><CHUDAKOB's query on 07/09/2011</b></font><b>I misreading this or was your next call objective answered on this call with efficacy?<font color=green><b>LAPMACA's response on 07/11/2011</b></font><b>plan on asking about efficacy and how his patients are responding to therapy.<font color=blue><b>CHUDAKOB added notes on 07/12/2011</b></font><b>OK. Thanks for the clarification.
PPLPMDL0020000001	Cleveland	OH	44113	6/30/2011	spoke with Sheila,RN,about her handling refills,says many patients on tramadol most not taking more than 2 Vicodin/day,5/500.reviewed savings card program,focus on commercial insurance.spoke with dr about his patients on tramadol and how Butrans can fit in after tramadol.showed dr starting dose for patients taking less than 300mg/tramadol/day,dr felt patch and committed to trying a few patients on Butrans.focused dr on commercial insurance patients.
PPLPMDL0020000001	Mayfield Hts	OH	44124	6/30/2011	Quick call....doc still had Butrans savings cards. Reminded him of the covered insurance plans and BWC coverage. Oxycontin formulary grid reminder.
PPLPMDL0020000001	Cleveland	OH	44111	6/30/2011	Quick call, I asked Dr if he would be seeing any patients today who could benefit from Butrans 7 day dose. He said that he is keeping it in mind.
PPLPMDL0020000001	Cleveland	OH	44113	6/30/2011	I asked dr if he gave more thought on Butrans being appropriate for his patients taking vicodin daily but not controlled? dr started 1 patient on Butrans who had spinal cord stimulator and no other opioids worked.no feedback yet,however no call-backs yet from patient.patient coming in today.i asked dr to try Butrans on similar patients to the 1 he tried.dr wants to wait for feedback
PPLPMDL0020000001	Akron	OH	44319	6/30/2011	I asked Dr Yee about his patients success on Butrans. He said that he had not yet tried it. I asked what benefit he saw in initiating Butrans therapy to his patients and he said that it was LA.
PPLPMDL0020000001	Barberton	OH	44203	6/30/2011	I asked Dr. Minich if she felt comfortable identifying potential Butrans patients? She said she was looking for chronic pain patients who were on low dose SAO's. I explained those were potentially ideal Butrans for patients and asked if she would consider trialling it and gaining some patient feedback
PPLPMDL0020000001	Mayfield Heights	OH	44124	6/30/2011	Window call....Reviewed the Butrans dosing options - 5 mcg for opioid naive patients and 10mcg for those that may be converted from a short acting opioid. Asked if she has had to titrate to 20mcg. She did not think she has anyone on 20mcg. I explained that that is the maximum dose and that a low dose of oxycontin may be appropriate after that.
PPLPMDL0020000001	Cleveland	OH	44111	6/30/2011	We reviewed the medication guide for Butrans and how to instruct patients on proper use and application of Butrans. He said that he has seen a few scripts of Butrans but he could not remember who wrote them. I asked if he would had out the medication booklets with Butrans and he agreed. We discussed that patients should wait 3 days before titrating or determining efficacy. We discussed that OxyContin is a long acting option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Mayfield Heights	OH	44124	6/30/2011	I opened the call discussing the indication, CII status and 7 day delivery of Butrans. I asked her what her thoughts were on Butrna. She said she actually prescribed 2 scripts last week. In both cases, the patients were being treated with a couple of tabs of short acting opioids (vicodin and percocet) which were not adequately controlling their pain. She thinks they were started on 5mcg/hr. I reviewed the dosing for naive and experienced patients and also the 3 days before steady state is reached at which time they could be titrated. She asked about the use of supplemental analgesics. I referred to the FPI and confirmed that they can be used.
PPLPMDL0020000001	Akron	OH	44319	6/30/2011	I asked Dr. Wu how many patients he currently had on SAO's that he thought could benefit from Butrans therapy. He said that he had many who were stable. I asked if any of them were failing on their SA therapy or asking to be titrated, he said some. I asked if he thought those patients could benefit from Butrans and he said he would keep it in mind.
PPLPMDL0020000001	Cleveland	OH	44103	6/30/2011	I asked dr about her patients overall success with Butrans? dr said it was great.dr prefers longacting opioids for chronic pain and doesnt believe short-acting opioids should be used for these patients.I asked dr when patients take tramadol,daily and arent controlled,whats the next step? dr said she doesnt use short-acting opioids for chronic pain.dr said that would be a Butrans patient and she may give 28 pills of a short-acting medication for breakthrough pain but didnt state which 1. talked to dr about prescribing OxyContin after 20mcg Butrans,at a starting dose of 20mg OxyContin Q12H.
PPLPMDL0020000001	Cleveland Heights	OH	44118	6/30/2011	Tried to open the call by asking doc how often he has patients complain that their tramadol or NsAids are no longer working....doc was busy and asked that I just tell him about my product. I explained the indication and positioning of butrans, CII status and the 7 day delivery. He said he would try it for the right patient. NOTHING more learned.
PPLPMDL0020000001	Cleveland	OH	44135	6/30/2011	Spoke with Krista NP, Jim RN and Randy RN, I asked how I can help with any managed care or questions regarding Butrans, OxyContin or Ryzolt. They said that OxyContin seems to be going thru managed care much easier in the past with fewer prior auths. We reviewed the managed care for OxyContin and the savings program. Jim said that he knows Dr Tabbaa is prescribing Butrans but he has not seen Dr Ryan try it yet. Randy said that he also did not think that Dr Astley has prescribed yet either. Dr Astley may be at the 150th location full time soon. I asked them how often they get call backs from someone who is asking for an increase for their low dose vicodin or percocet. They said that it happens all of time and we reviewed the invitation guide and that these patients may be appropriate for Butrans. We reviewed the managed care for Butrans and they said that they see a lot of BWC patients who might benefit from Butrans.
PPLPMDL0020000001	Cleveland	OH	44113	6/30/2011	I asked dr about the overall experience of his patients taking Butrans? dr said its too early to tell,some have done well,some have not.I asked dr if he's thought about starting hydrocodone patients earlier,ie,5/500 Q6h.dr agreed he has some of those patients but hasnt started them.dr said he's still thinking of higher dose vicodin but did admit has lower dose patients as well.I asked dr if he would ever re-consider prescribing OxyContin,dr said
PPLPMDL0020000001	Barberton	OH	44203	6/30/2011	I asked Dr. Patel to tell me about his success and failures with Butrans. He said that he has had success and efficacy but recently had to take a patient off of therapy because of an application site reaction. I showed him the FPI pointing out the side effect profile and explained that we did see that in our trials. However he said his other patients were doing really good and he felt comfortable continuing to initiate therapy.
PPLPMDL0020000001	Mayfield Hts	OH	44124	6/30/2011	Spoke to floater, Andy, who did not know about this stores volume of Butrans. At his store he recalls one initial concern with butrans where he got a script for (1) patch. It was denied by BWC but there have not been any issues since. I reviewed the proper application and sites for Butrans. Provided info on savings cards to be left for Sandy.
PPLPMDL0020000001	Highland Heights	OH	44143	6/30/2011	I asked doc if patients were satisfied with their analgesic relief with Butrans and are able to access their prescriptions without any issues. He said he has had a few PA but medicare is the problem. I reminded him that commercial and BWC patients will be the best candidates. Gave him a formulary grid for butrans as well as oxycontin.
PPLPMDL0020000001	Cleveland	OH	44104	7/1/2011	talked to dr about 5 Butrans core messages as she said she couldnt remember much about Butrans other than it was transdermal.I asked dr if she would ever consider a long-acting opioid,after tramadol wasnt controlling patients pain? dr said she's never had a CII option so she normally would go to Vicodin.I showed dr Butrans visual aid,discussed appropriate patients section and talked about her patients taking tramadol every day but not controlled,go to Butrans instead of Vicodin,dr said she'll consider it and she just needs to remember Butrans.We discussed commercial plan patients trying Butrans.I recommended Senokot-S
PPLPMDL0020000001	Berea	OH	44017	7/1/2011	Spoke with Jo, she still do have the 5 and 10mcg in stock. She was not sure if they have had scripts. I reviewed the patient medication guide and she will hand them out with any scripts. We reviewed appropriate patient types and she has a family member who is taking percocet around the clock that she is going to have talk to their Dr about Butrans. We discussed OxyContin for patients where Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Akron	OH	44320	7/1/2011	I asked Misty what her patients seemed to like best about Butrans. She said that they liked the fact it was once a week and didn't have to worry about taking meds multiple times day. I asked if she had other patients in mind that she thought could benefit and she said she planned on initiating it first line to appropriate patients.
PPLPMDL0020000001	Cleveland	OH	44106	7/1/2011	talked to Amy,Pharmacy manager,about Butrans scripts and who's prescribing in area.Amy said she couldnt look it up now as she was too busy but knew a couple of them have come from the Cleveland Clinic.I showed Amy Butrans patient information booklet and asked if she could focus on application/rotation section with patients filling scripts for Butrans,amy agreed.showed Butrans visual aid and discussed appropriate patients for Butrans,so amy knows what i am telling physicians.amy said she appreciated information and would give booklets to patients if they dont have them.confirmed stocking and recommended Senokot-S
PPLPMDL0020000001	Akron	OH	44320	7/1/2011	I asked Dr. Bonyo if he had patients who were currently not stable on their current SAO's. He said some and I asked how he though those patients could benefit from Butrans therapy and he said he didn't know. I explained Butrans was a schedule 3, LAO.
PPLPMDL0020000001	Berea	OH	44017	7/1/2011	Quick call with Adam, he said he has yet to see any Butrans an none from Dr Kavlich, I reviewed the medication guide and how to instruct patients on the proper use and application of Butrans. We discussed the savings program for both Butrans and OxyContin.
PPLPMDL0020000001	Cleveland	OH	44109	7/1/2011	dr said she hasnt started anyone on Butrans but does think the transdermal delivery is different and likes the once weekly dosing option for patients.I showed dr Butrans visual aid,we discussed 5 Butrans core messages and i asked dr if there was anything else that stood out to her about Butrans? dr said she thought Butrans was a CII because its a long-acting opioid.i told dr Butrans is a CII,she can call in 5 refills up to 6 months and showed Butrans visual aid for this discussion.I asked dr who was appropriate for Butrans? dr said she thought patients taking pills that arent controlled and complaining to her about their medications.I told dr she was right,patients taking percocet every day but not controlled,asking for more pills or wanting something different,thats the Butrans patient.I asked dr if she had 2 patients like we discussed that she could start on Butrans? dr asked about insurance coverage,discussed BWC and commercial plans.
PPLPMDL0020000001	Berea	OH	44017	7/1/2011	I asked Dr to tell me about the patients that he decided to prescribe Butrans for. He said they are doing well and would not talk to me further. I spoke with Shirley and she did not know if any managed care issues or patients not being able to get Butrans. I reviewed managed care and medication guides for the patients.
PPLPMDL0020000001	Cleveland	OH	44109	7/1/2011	I asked dr what he recalled about Butrans? dr said he doesnt remember much about Butrans other than its transdermal.I showed dr Butrans visual aid and talked about 5 Butrans core messages and asked what top 3 factors about Butrans stood out to him.dr said once weekly dosing,Butrans being a patch and a CII.I told dr since Butrans is a CII he can call in 5 refills up to 6 months.dr said that was easier than a CII.dr asked about insurance coverage,focused on BWC and commercial patients and i asked if dr had patients taking tramadol,every day,that arent controlled? dr said yes.I asked dr to consider 2 patients like this that he could start on Butrans,dr said he will do that.I recommended Senokot-S
PPLPMDL0020000001	Lyndhurst	OH	44124	7/1/2011	I asked doc how her patients are doing on Butrans. She said that the ones on itare doing well. She has had no issues with access and cost as she focuses on commercially insured patients. I asked her if she has prescribed butrans with refills. She said that her policy is that patients call in monthly with updates on how they are doing and the office will then adjust their medication or call in a refill. She said that she did not currently need savings cards. Provided formulary coverage reminder.
PPLPMDL0020000001	Cleveland	OH	44113	7/1/2011	I asked dr who was appropriate for Butrans? dr said patients taking percocet,1-2 pills a day,not controlled and asking her for more pills,she thinks Butrans is appropriate.I told dr that was great she was thinking of Butrans there,I showed Butrans visual aid and asked if she would tk of Butrans earlier,after tramadol isnt controlling patients pain? dr said she might do that.I showed dr Butrans initiation guide,discussed Butrans 5mcg,if patients are taking less than 300mg tramadol/daily,dr said ok she'll consider it for patients we talked about Butrans insurance coverage.
PPLPMDL0020000001	Lyndhurst	OH	44124	7/1/2011	I asked Karen what her thoughts are on Butrans - a CII, 7 day transdermal. She said she thinks its a great idea and a nice way to reduce the number of pills patients are taking. She said she has not seen any of Dr. Reeds patients for follow so she has not heard of the feedback nor the opportunity to prescribe it. I reviewed the initiation dosing and the savings card program.
PPLPMDL0020000001	South Euclid	OH	44121	7/1/2011	Window call....asked doc what his thoughts are on a CII transdermal system delivered in a once weekly patch. He said he thinks it would be too expensive. I explained that commercially insured patients will pay as little as \$15/mo and the medicare/medicaid will be more difficult and require a PA. Provided savings cards, formulary grid and initiation guide.
PPLPMDL0020000001	Uniontown	OH	44685	7/1/2011	I asked Dr. Stetler if he had heard back from his Butrans patients and he said that they liked therapy and he was pleased with the efficacy. I asked him how long he generally expected a patients to stay on Butrans and he said until their pain is gone. I explained the indication and that Butrans is a LAO.

PPLPMDL0020000001	Cleveland	OH	44104	7/1/2011	dr said she didnt remember much about Butrans other than it was a transdermal option,i showed dr Butrans visual aid with 5 core messages and asked dr what were a few factors that were important to her when considering a long-acting opioid for her patients? dr said safety and efficacy,i showed dr Butrans visual aid and fpi with Butrans clinical trial info and then Adverse events page in visual aid.i asked dr if she had a few patients taking vicodin,daily,that arent controlled and asking for something different? dr said yes and she'll try Butrans in a few patients as she does have a handful of chronic pain patients.i talked to dr about Butrans patient information booklet and insurance coverage for commercial plans.i recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44121	7/1/2011	Window call.....reminded doc that he previously expressed interest in Butrans. I asked him if he has any patients that could benefit in a once weekly dose. He said he keeps forgetting and just can not the right patient with the right insurance. I reminded him of the commercial insurance plans and the savings cards. He confirmed that the still has them and said he will try.
PPLPMDL0020000001	Akron	OH	44319	7/1/2011	I asked Dr. katriji if he had any patients that he thought could benefit from the 7 day analgesia that Butrans could offer patients. He said he did have some but felt that he did not know enough about it. I asked if we could sit down and talk more about it but he said he would read some material and let me know if he had any questions.
PPLPMDL0020000001	Independence	OH	44131	7/6/2011	Dr Jack said that he hasn't prescribed Butrans yet but that he has thought of it. I told him that I wasn't even going to ask him about Butrans today. He told me that Butrans is CIII & that "that is the best part". I asked him why. He said he can call it in. He asked to see a demo again, so I showed him & he asked for something with the name on it that he can put on his desk so that he can think about Butrans, so I gave him an initiation guide. Reviewed OxyContin savings cards. He said he has a few left so he did not need them at this time.
PPLPMDL0020000001	Cleveland	OH	44106	7/6/2011	i talked to dr about his patients taking vicodin,every day,that arent controlled and calling into office earlier every month asking for refills.dr said he gets a lot of those patients.i asked dr if he would stop and think of Butrans for those patients taking 1-2 vicodin,daily,that arent controlled? dr said he probably would do that.i showed dr butrans visual aid,discussed appropriate patients like we discussed and initiation of butrans.dr said his patients are doing great on butrans,no complaints,so he's happy.i asked dr to think of 2 patients,per our discussion,and start them on butrans.dr agreed. we discussed butrans for commercial plan patients and use of butrans patient savings cards.i recommended Senokot-5
PPLPMDL0020000001	Northfield	OH	44067	7/6/2011	Re-introduced Dr Lango to Butrans as she did not recall what it is. Reviewed 5 core messages & discussed box warning/CIII. Discussed positioning & appropriate patient type. I asked her thoughts on transdermal products. She said she has no issue with them & likes that Butrans is once weekly. She said she probably has more patients on opioids than any of the other doctors in her practice. I asked what type(s) of patients she could see herself prescribing Butrans for. She said she has many patients on chronic Vicodin that may be appropriate & that she would use it after Vicodin but before going up to Percocet or OxyContin. She said she has patients who are taking 5mg Percocet 3 times per day who she would be willing to switch to Butrans. She said she feels that the chances of them getting nausea from Butrans would be less than oral opioids. I told her we have no comparative data & that nausea is a side effect that is possible with Butrans as well & showed rates.
PPLPMDL0020000001	Cleveland	OH	44104	7/6/2011	talked to dr about 5 Butrans core messages,dr said he hasnt started anyone on butrans,i asked dr what features he likes about butrans? dr said he likes that butrans is once weekly dosing and is a patch.i asked dr if butrans being a CIII was important to him? dr said if he can call in refills that makes it easier.i asked dr if he has any patients taking tramadol,daily,that arent controlled and calling in earlier every month for refills? dr said yes.i showed dr butrans visual aid,appropriate patients,discussed that information and asked dr to start 2 patients,per our discussion,on butrans. dr said he has a lot of medicaid so unless its covered on medicaid it might be tough.we talked about dr considering his commercial plan patients to start on butrans. dr said ok he'll keep it in mind.i recommended senokot-5
PPLPMDL0020000001	Cleveland	OH	44104	7/6/2011	talked to dr about his patients taking tramadol daily,not controlled,and calling office earlier every month for refills.dr said he has those patients.i showed dr butrans visual aid,appropriate patients,talked to dr about starting 2 patients like that on butrans and focus on commercial plan patients.dr said he can do that we talked about butrans patient savings card and patient information booklet.i recommended senokot-5
PPLPMDL0020000001	Sagamore Hills	OH	44067	7/6/2011	Dr Sevier said he actually prescribed Butrans for a patient shortly after our last conversation. I asked him to tell me about that patient. He said it was an 85 year old woman with arthritis who has been taking Vicodin every day, but does not like taking it. He said that unfortunately, Medicare would not cover it & it was too expensive for her. I told him that clinically, this patient sounded ideal & reviewed managed care, asking him to keep working patients with these types of issues in mind. He said he would do this. He asked about adverse events. Showed FPI section 6. He said he felt the rates were low. Discussed initiation in patients on different doses of opioids, titration ability every 3 days to a max 20mcg dose & OxyContin q12h for appropriate patients beyond this max Butrans dose. He said he will try to write Butrans for a patient who has a chronically painful condition such as low back pain & who has commercial insurance.
PPLPMDL0020000001	Sagamore Hills	OH	44067	7/6/2011	Dr Maguire asked me for a refresher on Butrans. I reviewed 5 core messages & discussed box warning, asking him to be just as cautious in prescribing Butrans as he is with other opioids. Also went over dosing, titration, CIII. I asked his thoughts on having a long-acting CIII available for appropriate patients. He said he likes having a CIII option & asked how many refills a patient could have at a time. I let him know they could have up to 5 refills in a 6 month period & asked why he liked the CIII feature. He said it is convenient to call in medications. He said he has patients who sound like they would be good candidates. I reviewed with him managed care & savings cards for those eligible. Also discussed titration ability every 5 days. Discussed OxyContin q12h for appropriate patients beyond Butrans 20mcg.
PPLPMDL0020000001	Independence	OH	44131	7/6/2011	I reminded Dr Rob that we had discussed starting an appropriate patient from Vicodin to Butrans instead of switching them to Percocet. He said he hasn't done this yet. I reminded him that he said he liked that Butrans offers once-weekly dosing & CIII. I reminded him of the appropriate patient type & asked him if he would still consider using Butrans in the type of patient we had discussed during our last conversation. He said he still thinks he would use it between Vicodin & Percocet. Reminded him of OxyContin q12h for appropriate patients beyond Butrans 20mcg & he asked for savings cards.
PPLPMDL0020000001	Akron	OH	44333	7/6/2011	I asked Dr. Brown how many patients she had on Butrans therapy and what her success rate was. She said she only had to take one patients off of therapy which we talked about last time. I asked her with her high success rate if she was likely to continue and she said yes.
PPLPMDL0020000001	Akron	OH	44304	7/6/2011	I asked Dr. Amambunji if he saw a benefit to initiating Butrans therapy to his patients currently on low dose SAO's and he said he liked that it was once a day. I reminded him it was actually once a week and he was pleased to hear that. He said he would keep it in mind for the right patient.
PPLPMDL0020000001	Akron	OH	44320	7/6/2011	I asked Misty how long she expected her patients to stay on Butrans and she said until their pain subsides. I explained that Butrans was a LAO and most appropriate for chronic pain which she understood.
PPLPMDL0020000001	Mayfield Heights	OH	44124	7/6/2011	Window call.....Debbie asked for more savings cards for Butrans. They were completely out or they could not find them. I asked if she was prescribing butrans with refills. She said that their patients come back every month. I reminded her that it can be called in as well. Provided Butrans sealed article and engage invite.
PPLPMDL0020000001	Highland Heights	OH	44143	7/6/2011	Spoke to Diana G about the stocking of Butrans. She is a floater filling in for Kristen so she is not too familiar with the volume at this store. She has however seen a few. I explained the savings cards program and the availability online and thru relay health. She asked about where to apply the Butrans. I discussed the application sites and the proper way to apply. She was unaware of oxycontin savings cards. She sometimes sees high copays for oxycontin but not often enough to get savings cards.
PPLPMDL0020000001	Cleveland	OH	44106	7/6/2011	i talked to dr briefly about 5 Butrans core messages,dr said he's started a few patients on Butrans but hasnt seen them back for follow-up so he doesnt have any feedback yet.dr said he knows where Butrans is appropriate,low dose vicodin or percocet patients,not controlled,i asked dr to consider patients taking tramadol,daily,that arent controlled,to start on Butrans instead of increasing tramadol dose or converting to vicodin,dr said ok he'll consider that.i recommended Senokot-5
PPLPMDL0020000001	Mayfield Hts	OH	44124	7/6/2011	Window call....I asked to think of those patients that may prefer to take fewer dosages of their pain meds and then think of Butrans. Reminded him that Butrans is a CIII delivered in a once weekly dose. Offered him a sealed Butrans article. He asked if there is comparative data. I told him I was not sure.
PPLPMDL0020000001	Cleveland	OH	44143	7/6/2011	Spoke to Angela about my previous discussion with doc about Butrans. I explained the 7 day delivery of a CIII analgesic. I discussed the appropriate dosing for opioid naive and experienced. Doc stated the he would go to vicodin after tramadol. Provided savings cards and formulary grid. She would give the sealed article to the doctor.
PPLPMDL0020000001	Lakewood	OH	44107	7/6/2011	I asked Dr to tell me how the patients are doing who have started Butrans. He said he only has a couple, but they are doing well. I asked if he has any other patients taking short acting opioids everyday who he feels might benefit from Butrans and he said he will see. I reviewed that OxyContin is still an option when Butrans may not provided adequate analgesia. He said he does still use it in the hospital when patients are not adequately controlled on short acting.
PPLPMDL0020000001	Lakewood	OH	44107	7/6/2011	Quick call, I reviewed the key messages for Butrans. I asked if he thinks a long acting CIII can benefit his practice in any way. He said he does like that it is a CIII instead of a CII. He said he will give it a try. I reviewed the Butrans and OxyContin saving cards.
PPLPMDL0020000001	University Heights	OH	44121	7/6/2011	Reminded doc of his previous interest in Butrans and that Butrans can be affordable for commercial patients. He said he has a lot of poor patients. I showed the formulary grid and the covered plans. He stated that 3rd tier is an expensive co pay. I explained the savings with the card. He asked about availability in the hospital. I asked him if that is where he would prescribe Butrans. He said maybe. He asked if the patch stays on during showers. I told him with proper application it should stay on. Discuss application and sites. I asked him to consider going to Butrans once weekly when he has a patient on low dose vicodin. He said patients like their vicodin. I asked him to prescribe before going to vicodin. Reminded him of the oxycontin savings cards as well. Gave him a butrans article.
PPLPMDL0020000001	Cleveland	OH	44106	7/6/2011	i worked pain management dept-see call notes,worked internal medicine dept and found out that dr batts,dr nock, dr kamoga are all attending staff physicians at UH BUT they dont see patients here at main campus,they have private practice offices,so i could leave any information with the Internal Medicine/out-patient health clinic,worked family medicine-found out that dr kale is a staff physician at UH BUT this physician is in private practice OUT of my territory.
PPLPMDL0020000001	Lakewood	OH	44107	7/6/2011	Spoke with Bob, we reviewed the medication guide for Butrans. I asked what he thought of it and if he would hand it out or consult the patients. He said he does ask the patients if they have any questions when they receive their medications. We discussed how to instruct patients and that patients should allow 3 days to reach steady state. We discussed OxyContin as an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Akron	OH	44320	7/6/2011	I asked Dr. Duppstandt is she thought there was a place for Butrans in her practice and she said she wasn't sure. I explained the ideal types of patients and asked if she saw many of those patient types she said some but most of them are Medicaid patients. I explained our coverage.
PPLPMDL0020000001	Lakewood	OH	44107	7/6/2011	I reviewed our past conversation about Butrans as a option for patients instead of increasing patients dose of vicodin. I asked if he has just one patient this week who might benefit from 7 day dosing. He said that he will prescribe it. I reviewed OxyContin as another long acting option and he said he is continuing to prescribe OxyContin. I asked when would he use Butrans vs OxyContin and he said that most of his patients are taking higher doses of short acting and he feels comfortable converting them to OxyContin.
PPLPMDL0020000001	Brooklyn	OH	44144	7/6/2011	Spoke with David & reviewed OxyContin savings cards & Butrans savings program. Also discussed eligibility requirements. He asked for more OxyContin savings cards. He also said that he just received & filled his first Butrans prescription yesterday. I asked him who wrote the prescription & he said he could not tell me. He said he thought it was for a Medicaid patient but then said maybe it was not. Discussed managed care & asked what managed care mix he sees. He said probably 60% commercial & a mix of the remaining 40% of government plans. He said he knows for sure whatever plan it was, the prescription was approved. He also added that he thinks that when the higher doses of acetaminophen-containing medications are pulled later this month that more patients will switch to single-entity opioid options such as Butrans. He said that he has no idea if this is really going to happen, but that is his opinion.
PPLPMDL0020000001	Parma	OH	44129	7/6/2011	Dr Gigliotti said he has not found anyone to start on Butrans yet. I asked Dr Gigliotti what has to happen for him to prescribe it. He said he hasn't written anything lately- "not even OxyContin". I reminded him that Butrans is CIII, but still carries abuse/addiction potential. I asked him if he has seen anyone for whom he has refilled Vicodin, Percocet, or tramadol. He said he probably has. I asked him why none of them were Butrans candidates. He said one of them might be, but she has Caresource insurance. I asked him if he has any working patients like that. He said he has "been scared" to write any opioids due to Ohio House Bill 93. I asked how he thought it would effect his practice & he said he wasn't sure yet. He told me that he kicked his first OxyContin rep out of his office & that it took him awhile to "get on board" with it, so I should just be patient.
PPLPMDL0020000001					

	Cleveland	OH	44114	7/6/2011	I asked dr how soon does she follow-up with patients,once started on butrans? dr said 2wks later she see's patients,unless patients cant get to her office for some reason then it'll be 3wks.dr said her patients on butrans are doing great,they are having improvement in pain levels and feel pain is well controlled.talked to dr about patients taking 1-2 5mg vicodin,daily,that arent controlled and asking for something else,would she consider Butrans instead of increasing dosage strength or interval? dr said she might do that for some patients,if she wasnt comfortable giving them more pills.dr asked about caresource/medicaid coverage for butrans as she keeps getting denial letters and thought medicaid was approving butrans.we talked about medicaid's prior authorization requirements for butrans and that caresource has their own formulary separate than state medicaid for butrans,dr said to let her know if that changes.told dr to think of bwc patients for butrans.i recommended senokot-s
PPLPMDL0020000001	Bedford	OH	44146	7/6/2011	Quick call- Dr Moufawad asked if I had any new information regarding the Ohio Medical Board. I told him I did not at this time but would update him as soon as I had information. I asked him if in the meantime he is writing off Butrans completely or if he is still prescribing. He said he has been prescribing for "a few patients" & then walked into a room.
PPLPMDL0020000001	Lakewood	OH	44107	7/6/2011	I reviewed out last conversation about steady state and asked what benefit this offers his patients. He said the benefit is they don't have to take tablets every day. I asked if he could think of just one patient this week who might benefit from Butrans and he said he would.
PPLPMDL0020000001	Lakewood	OH	44107	7/6/2011	Spoke with Aduwa, I asked what questions she feels that she might get from Butrans patients. She said probably about application site and if they can swim with it on. We reviewed the medication guide and how/where to apply Butrans. We reviewed steady state. I asked if she would consult with patients to make sure they have all the info they need and she agreed. Reminder about OxyContin as an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Lakewood	OH	44107	7/7/2011	Quick call with Joe, we reviewed Butrans medication guide and how to instruct patients on proper application. He said he has not seen scripts yet. We reviewed the appropriate patients for Butrans and then patients that would be appropriate for OxyContin when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Cleveland	OH	44111	7/7/2011	Quick call, I asked if he has any other patients who could benefit from Butrans like the one he started. He said that he will think about it. I spoke with Barb and she said that she is still reminding him and keeps the Butrans savings cards in front of him as a reminder.
PPLPMDL0020000001	Westlake	OH	44145	7/7/2011	Quick call, Dr was way behind. I asked him to think of Butrans for those patients not well controlled on low dose vicodin or percocet who have BWC or commercial insurance. He said he is still trying to think of it and will start to prescribe for more BWC patients. Reminder that OxyContin is still an option that is covered on Medicaid.
PPLPMDL0020000001	Independence	OH	44131	7/7/2011	Quick call- Spoke with Angela (technician) who said that their regular pharmacists were not in today. Reviewed savings cards/eligibility for Butrans & OxyContin with floater pharmacist. He said he has not dispensed Butrans. Reviewed appropriate patient type. He said he would leave my information for the regular staff pharmacists.
PPLPMDL0020000001	Cleveland Heights	OH	44118	7/7/2011	Reminded doc of the appropriate patient for Butrans and asked him if he has any such patients that might benefit. He said he is sure he does. I offered him the engage invite and the pain medicine news article. I explained that I would like to further discuss butrans at next weeks lunch. He said that would be better.
PPLPMDL0020000001	Cleveland	OH	44103	7/7/2011	I talked to dr about her use of short-acting opioids for acute pain and what the clinical reasoning was for using those same med's to treat chronic pain.dr said every patient starts out acute,so she will prescribe tramadol,then vicodin and percocet but after a few months,if patients pain still persists,she considers pain to be chronic and prefers long-acting opioids.dr said a lot of patients like taking their pills every couple hours as they feel it controls their pain but she does try to talk to them about long-acting opioids like OxyContin as its dosed q12h but now there's option of Butrans before OxyContin so she's talking to patients about Butrans.i showed dr Butrans visual aid,discussed appropriate patients section and asked dr to think of 2 patients taking tramadol,daily,that arent controlled,that she could start on Butrans.dr said she has some patients on tramadol and would do that.we discussed butrans formulary coverage and i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44195	7/7/2011	worked pain management dept-left Butrans fpi,initiation guide,formulary grid,patient information booklet,OxyContin fpi,conversion guide,appropriate patients and challenging flashcards for OxyContin and my business card-left all of this information for Dr.Mekhail,Dr.Minzter,Dr.Cheng,Dr.Syed and Dr.Vrooman as i couldnt see any of the doctors and was told to just leave information; worked chronic pain/rehabilitation dept-left Dr.Mathews and Dr.Covington-Butrans fpi,initiation guide,patient information booklet and formulary grid with my business card for each doctor as i couldnt see them. worked rheumatology dept-left Butrans fpi,initiation guide,patient information booklet,formulary grid and business card-for Dr.Calabrese, Dr.Capulon,Dr.Chatterjee, Dr.Deal and Dr.Mazanec-per the medical secretaries I had to leave information and if doctors are interested they will contact
PPLPMDL0020000001	Cleveland	OH	44124	7/7/2011	Doc was not in today. Spoke to Vickie about the butrans patient type and the 7 day delivery. Gave her an invite to provide to doc as well as a pain medicine news article. Nothing learned.
PPLPMDL0020000001	Mayfield Heights	OH	44124	7/7/2011	Spoke with Candice about the butrans patient type dosing and savings cards. Also explained the invite for a presentation. She was not aware if doc has prescribed butrans yet. Doc is on vacation until 7/18.
PPLPMDL0020000001	Lakewood	OH	44107	7/7/2011	Spoke with floater Ricky, he said that he has seen scripts for Butrans at the Amherst store but not much from Oberlin, Wellington or Lakewood. He said that I need to work on Dr Shah, Malak and Ray in order to get it moving out east. We discussed the medication guide and how to instruct patients on the proper use and application of Butrans. He will keep some of the medication guides to hand out. We reviewed the invitation guide for Butrans and that OxyContin is still an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Westlake	OH	44145	7/7/2011	We reviewed the initiations presentation. Dr. said that only 1% of his patients are chronic pain. His staff thought it was more like 60% but he said he has about 4000 patients total and not many are chronic pain. He said that it may seem like more since they tend to see the chronic pain patients more often. I asked if he had any low dose patients who could benefit from Butrans and He wanted to review the conversion guide further. We reviewed that OxyContin is an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Cleveland	OH	44130	7/7/2011	Dr Fedorko said that one of the patients he had put on Butrans after she had been in the hospital was unable to get her prescription refilled because of her Medicare plan. I told him that is why his greatest successes for getting Butrans through would be commercial insurance plans & reminded him that those patients can use the savings cards monthly to receive a savings up to \$240 for the remainder of the year. He said the majority of his patients are Medicare, so he is having a hard time coming up with patients to put on Butrans. Reviewed patient type & positioning with him & spoke with Mindy & Mary Ann about insurance coverage & savings cards. They both said that the case Dr Fedorko told me about was the only one that has been denied so far & that they have had no other issues.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	7/7/2011	I re-introduced Butrans to Dr. Johnston via the FPI. He said he felt comfortable trying new products and this was certainly a product that he sees a need for. He said he had several patients currently not stable on their SAO that he would try Butrans on. I explained managed care.
PPLPMDL0020000001	Lakewood	OH	44107	7/7/2011	Quick call as Dr told me it is not a good day. I reminded him about Butrans as an option and left the initiation guide. He said that he will finally give it a try.
PPLPMDL0020000001	Lakewood	OH	44107	7/7/2011	I asked Dr how his patients are doing on Butrans. He said that one of his patients is doing well and is taking vicodin as supplemental analgesia. He asked me about prescribing OxyContin for supplemental and I reviewed the FPI and that patients should only take long acting opioid or non-opioid for supplemental analgesia. He asked about managed care and I reviewed the managed care coverage along with the savings cards. I asked if he has any other patients like the one who is doing well who might also benefit from Butrans. He said he will think about it. Dr was on his way to the hospital and I reminded him that OxyContin is an option instead of short acting around the clock for his hospital patients.<font color=blue><b>CHUDAKOB's query on 07/14/2011</b></font><b>CHUDAKOB's response on 07/18/2011</b></font>Thank you, this was a typo. We discussed that SHORT acting opioid or non opioids can be taken as supplemental analgesia per the FPI. Thanks.<font color=blue><b>CHUDAKOB added notes on 07/19/2011</b></font><b>CHUDAKOB added notes on 07/19/2011</b></font>Thanks for the clarification!
PPLPMDL0020000001	Independence	OH	44131	7/7/2011	Spoke with Jill (MA) who said that today would not be a good day to see Dr Pai due to his schedule. She said I could try back tomorrow but that it may not be much better. I showed Jill the patient information guide for Butrans & asked her if she thought it would be helpful for patients for whom Dr. Pai prescribes Butrans for the first time. She said she thinks so but that I should ask him. She said that he usually handles giving information & samples to patients.
PPLPMDL0020000001	Barberton	OH	44203	7/7/2011	I asked Dr. Patel what his overall thoughts were about initiating Butrans therapy. He said he liked that therapy lasted 7 days and that it was a LAO. He said patients liked therapy and the success rate so far was high.
PPLPMDL0020000001	Highland Heights	OH	44143	7/7/2011	Window call.....asked doc if his patients are still using the savings cards for oxycontin and Butrans. He said he still has some. Nothing more learned. Gave him the engage invite and the pain medicine news article.
PPLPMDL0020000001	Akron	OH	44310	7/7/2011	Dr. Schukay said that he had several patients in mind to start on Butrans therapy. He mentioned his biggest challenge was managed care and but committed to keeping it in mind for patients currently not stable on their SAO's and who have a private or commercial insurance.
PPLPMDL0020000001	Independence	OH	44131	7/7/2011	Dr Sundaram said he has not had a chance to find a Butrans since our last discussion as he has been out of the office a lot. He also added that today was not a good day due to the holiday this week. I let him know I would return at another time for a more detailed discussion. I gave him the initiations invite & asked him to consider participating in it during one of my visits. He said he would consider.
PPLPMDL0020000001	Highland Heights	OH	44143	7/7/2011	Quick call.....reminded Debbie of the Butrans patient type and how to initiate for opioid naive patients and those that are coming from another short acting opioid. Gave initiation guide and pain medicine news article and engage invite.
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	7/7/2011	I asked Dr. Azem how her patients felt about Butrans therapy. She said they were pleased as was she but asked about initiation which I reviewed utilizing the initiation and titration guide. She said that potential candidates of hers would most likely start at the 10 mcg.
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	7/7/2011	Dr. DiLauro said that she had another 2 patients in mind for Butrans therapy. She said both were currently not stable on their SAO's. I explained that both patients were ideal candidates and based on their previous therapy the 10 mcg patch may be most ideal.
PPLPMDL0020000001	Independence	OH	44131	7/7/2011	Dr Trickett asked me how well Butrans works in the elderly population. I told her there is no dosage adjustment in older patients & that she should use the same caution she usually does when prescribing opioids when using Butrans for those patients. I told her that Medicare plans are generally not paying for Butrans yet, although she could try to prior-authorize the prescription if she felt it was worth it. I added that for appropriate Medicare patients, OxyContin q12h may be an option. She said that she wishes she could use Butrans in her older patients because she feels this is an ideal type. She asked what the out-of-pocket cost was for a patient with no insurance. I showed her the WAC info sheet. She said the price was reasonable & that she has a patient who she will switch to Butrans as his current medication is too expensive. Discussed initiating treatment. She said she does not like continuing to refill Vicodin for patients & that she just thought of another pt to start on it.
PPLPMDL0020000001	Cleveland	OH	44130	7/7/2011	I reminded Dr Kansal of our previous conversation when he told me about the patient he had started on Butrans & then titrated up. I asked how the patient was doing. He said that the patient ended up "not liking" Butrans. I asked him to be more specific & he said that it just did not work for that patient. I asked him if he thought based on the appropriate range of patients for Butrans in morphine equivalent if the patient might have been beyond what Butrans is designed for & more of an OxyContin patient. He said yes & that he is now on OxyContin. He added nothing had worked for him, so he wanted to give Butrans a shot. I told him it sounds like he's doing the right thing & asked if he will still consider it for other patients & asked how often he sees patients on 3-4 5mg Vicodin per day. He said very frequently. I told him some of those patients may be more appropriate & he said the key will be getting them on Butrans before they are on Vicodin for too long.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	7/7/2011	I asked Dr. Saunders about treating chronic pain which he said he rarely does. He did mention that he had some patients that were currently asking to be titrated on their current SAO and those were the patients he would focus on. He admitted he did not have a ton of them but would definitely given Butrans a shot on those types of patients.
PPLPMDL0020000001	Akron	OH	44310	7/7/2011	Introduced Butrans via the FPI. Identified the most ideal types of patients for therapy and asked if she felt there was a need for Butrans at her practice. She was immediately able to identify potential patients and said she would try it on some of her opioid experienced patients. I explained managed care.
PPLPMDL0020000001	Strongsville	OH	44136	7/7/2011	Spoke with James, pharmacist, & reviewed Butrans.com & savings information. He said he has a patient taking Butrans. I asked him if the prescriptions they fill there are usually from physicians within that building, from only Cleveland Clinic physicians, or from physicians all over. He said they come from all over but that this one came from Dr Dews. He recommended I try to speak with or get information to Dr Grimm & Dr Zachary in their building as they do pain management, although he added he understands our access issues. I let him know I would try to get information to them. Reviewed indication & that Butrans is for pain only, not the treatment of drug addiction. Also reviewed OxyContin savings cards & gave him a pack per his request. Gave him a few Butrans patient information guides & walked him through usage.
PPLPMDL0020000001					

PPLPMDL0020000001	Cleveland Hts	OH	44118	7/7/2011	Quick call....doc was just back from vacation and very busy. I reminded him of the Butrans 7 day delivery of a CIII opioid for pain. He said he has not written it yet. I gave him an engage invite and the pain medicine news article. Let him know I would return next week for lunch to discuss the information.
	Parma	OH	44134	7/7/2011	Dr Hernandez said that he has been prescribing Butrans a lot lately. I asked him to tell me about the patients. He said that he finds it works best for patients who "don't like to take medicine". I asked him what he meant & he said patients who don't like to take oral medications. He said that he likes Butrans & his patients like it. He said he is suspicious of drug-seekers if a patient does not want to take Butrans. I asked him where OxyContin has a place for his practice now that he is prescribing Butrans. He said he would use that in patients who either do not respond with Butrans or who need something stronger. Reviewed savings programs for both products. He said that he will keep prescribing & hopes that more primary care physicians start using it as well so that patients can get that relief sooner.<font color=blue><b>CHUDAKOB's query on 07/14/2011</b></font>Ashleigh, when the doctor said he is suspicious of drug seeker if they do not like to take Butrans, how did you respond to that?<font color=green><b>APSEGA's response on 07/15/2011</b></font>I reminded him again that Butrans does have abuse/addiction potential & that he should be just as cautious in prescribing it as he would be any other opioid.<font color=blue><b>CHUDAKOB added notes on 07/17/2011</b></font>OK. Thanks for the clarification!
PPLPMDL0020000001	Cleveland	OH	44113	7/7/2011	dr said the patient he saw last week that he started on Butrans ended up NOT starting Butrans as he was afraid to start the medication after reading that death can occur.dr explained that Butrans was an opioid with risks and discussed side effects with patient.dr said that patient wanted to think about it and might try it but will continue taking vicodin in the meantime.dr asked if his patients could take Butrans with breakthrough medications? I told dr yes,showed dr Butrans fpi,maintenance of therapy section,noting patients can take opioid or non-opioid therapy with Butrans.dr said he is looking through his patient lists every day and thinking who would be appropriate for Butrans.dr said I should show his staff Butrans patient information booklet as he doesn't have time to explain everything about Butrans to patients.i showed staff the booklet and Butrans carton/demo for visuals as dr and staff asked how Butrans was packaged.i asked dr to think of 2 patients,taking vicodin but not
PPLPMDL0020000001	Cleveland	OH	44103	7/7/2011	reviewed 5 Butrans core messages with dr,asked dr to consider Butrans for 2 commercial plan patients that are taking vicodin every day,but not controlled,and asking him for something else.dr said he would do that but he doesn't have a lot of commercial patients,majority are medicaid patients.we talked about butrans patient savings cards for commercial patients and dr said he writes a lot of OxyContin as its covered on medicaid so he'll think of those patients.i showed dr OxyContin appropriate patients flashcard,formulary grid and gave dr OxyContin conversion guide and asked dr to start a few patients on OxyContin 10mg or 15mg q12h,dr said he would do that.i recommended Senokot-S
PPLPMDL0020000001	Lakewood	OH	44107	7/7/2011	I asked if she has patients who's pain is not well controlled on their short acting who might be able to try Butrans. She said she does not have too many, but will keep it in mind. Reminder about OxyContin as a Q12hr option.
PPLPMDL0020000001	Cleveland	OH	44113	7/7/2011	She said she has been prescribing OxyContin in the nursing homes.
					reviewed 5 Butrans core messages with Laura,NP,and asked her what features of Butrans she felt were important? Laura said transdermal delivery,once weekly dosing and that Butrans is a CIII but she doesn't have the time to explain something "new" to patients.I showed Laura Butrans patient information booklet and asked if this booklet would assist her in the time she has with patients? Laura said probably not,it's easier to refill their short-acting.Laura said she knows dr nickels has a group of patients on Butrans and I should just focus on him and talk to him about Butrans because at this point she's not prescribing Butrans.i told Laura I appreciated her honesty and that I would continue working with dr nickels and if she changed her mind to know that Butrans patient information booklet has an application dvd that could educate patients as well as the booklet information,laura said ok i recommended Senokot-S
PPLPMDL0020000001	Cleveland Hts	OH	44118	7/7/2011	Introduced the Butrans indication and other selling messages - CIII, 7 day delivery, opioid naive and opioid experienced patients, once weekly dosing. He said he heard something about this and asked if it is like fentanyl. I explained that there is no head to head data and that Butrans is the first 7 day delivery of an opioid analgesic. He asked about medicaid coverage. I explained that it is not covered on medicare or medicaid yet but is well covered on commercial insurance plans. I reviewed the formulary grid and provided savings cards and initiation guide. He said he would look at the info.
PPLPMDL0020000001	Independence	OH	44131	7/8/2011	Roman said I had to "make it quick" because he was running behind with Dr Keppler being out of town. He asked me if I had arranged a program yet for Butrans. I told him I am working on it & hope to have information for him soon. He said he wants to talk to someone who is using Butrans before he starts using it. I offered medical services' number & information again, but he declined. I gave him the sealed "special report" article & told him I could not discuss it, but wanted to give it to him since it was recently given to us. He said he would have a look at it & hoped it would offer some "real life" information that would help him. He also told me he has been writing OxyContin. I let him know I would return on a different day to speak with him in more depth & would bring program information as soon as I have it.
PPLPMDL0020000001	Beachwood	OH	44122	7/8/2011	Spoke with Denise (MA) who gave me the updated office policies on scheduling time with Dr Carman. She said she would give my card to her scheduler. I gave her a Butrans overview, discussing indication, dosing, appropriate patient type, & managed care coverage. She said Dr Carman may be interested in hearing more about Butrans but that she did not have any time to do that today. I asked her to give Dr Carman my information & also discussed initiations invite, asking her to be sure to ask Dr Carman about an opportunity to go through the presentation with her. Denise promised to forward this information.
PPLPMDL0020000001	Akron	OH	44310	7/8/2011	Introduced Butrans and FPI. Dr. Goswami was interested to learn about Butrans but mentioned that most patients that he deems appropriate have state plans and would not be able to get it paid for. I asked if he thought he had ANY appropriate patients who had a commercial plan and he said he would have to see.
PPLPMDL0020000001	Lakewood	OH	44107	7/8/2011	We reviewed the initiations presentation. When discussing chronic pain patients, he said it's probably about 50-60% of his patients. He counted up the pain patients he saw that morning alone and it was about 4-5 patients. I asked if any of these patients would be appropriate for Butrans and he said that some of them might be. I asked what benefits he sees in Butrans for his patients and he said that he does think that 4 patches per month would be better than patients having to take pills everyday. We reviewed the invitation guide and demo. I asked Laura and Kim if they would help remind the Dr about Butrans when an appropriate patient comes in and they agreed. We reviewed the medication guide and I asked them to give a savings card and medication guide with each commercial script. We reviewed OxyContin as an option when Butrans may not provide adequate
PPLPMDL0020000001	Mayfield Heights	OH	44124	7/8/2011	I went over the Butrans RM presentation with doc to identify appropriate patients. Focused on the cases of Evelyn and John and he thought they helped with where to prescribe Butrans. He was behind already and unable to do the survey but said he would try Butrans. He asked for clarity that 5mg is the starting dose for opioid naive patients. I confirmed and reviewed all the doses. I explained that a low dose of oxycontin may be appropriate for patients requiring greater than 20mcg/hr.
PPLPMDL0020000001	Richmond Heights	OH	44143	7/8/2011	Spoke to MA, Laura about the indication and appropriate patient for Butrans. I asked her if she knew if doc prescribed transdermals like fentanyl. She did not know as she does not see what he is writing when patients leave.
PPLPMDL0020000001	Cleveland	OH	44113	7/8/2011	She said doc is on vacation until 07.18.11.
PPLPMDL0020000001	Mayfield Heights	OH	44124	7/8/2011	talked to dr about his patients taking tramadol every day that arent controlled and asking for something else.dr said he will usually increase tramadol dose to 300mg max then go to vicodin 5mg,showed dr Butrans visual aid,appropriate patients,discussed starting these patients on Butrans,after the 1st tramadol dose wasn't controlling pain instead of increasing tramadol or converting patients to vicodin,dr said he'll consider it but depends on insurance coverage.dr asked if Butrans was covered on Medicaid,we discussed PA requirements for medicaid patients.i recommended Senokot-S
PPLPMDL0020000001	Mayfield Heights	OH	44124	7/8/2011	I asked doc if he is getting mostly newly referred or opioid naive patients. He said some are newer to pain mgmt and some are residual Dr. Yonan patients. I explained that those might be appropriate patients for Butrans. He asked for a reminder of the dosing options and conversion rate. I reviewed the dosing. Explained the guide for dosing conversion are approximations to morphine equivalents. He asked about the use in renal impairment. I referred to the FPI- that no doing adjustment necessary. He asked about the use of supplemental analgesics and if Butrans can be called in. Confirmed both points. Reviewed coverage and savings cards.
PPLPMDL0020000001	Cleveland	OH	44113	7/8/2011	He said he does not like fentanyl but would like to try Butrans. Explained the difference in those patient types. Gave engage invite.
PPLPMDL0020000001	Cleveland	OH	44113	7/8/2011	i talked to dr about her patients taking tramadol,daily,for their chronic pain but not controlled and asking for something else.i showed dr butrans visual aid,appropriate patients and asked dr if she would consider starting patients right after tramadol instead of increasing dose or converting patients to vicodin? dr said she might do that but she has really been thinking of her vicodin and percocet patients to start on Butrans.i asked dr to start 2 patients like we discussed on Butrans,focus on commercial and BWC,dr said she would and we discussed Butrans formulary coverage.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44104	7/8/2011	talked to dr about her patients taking 1-2.5mg Vicodin,daily,for their chronic pain but not controlled and asking dr for something else.i showed dr Butrans visual aid,appropriate patients and asked dr if she had 2 patients like this? dr said she has a lot of patients taking 1-2 vicodin every day and at some point their pain isnt controlled so they want more pills,higher dosage strength,different medication.i asked dr if it made sense to try Butrans in 2 patients? dr said yes and asked about insurance coverage.we talked about medicaid prior authorization requirements as dr said she has a lot of medicaid patients and commercial plan patients only small% i recommended
PPLPMDL0020000001	Uniontown	OH	44685	7/8/2011	Dr. Stetler said he had several patients on Butrans and most of them were doing well. He said one patient had to be removed from therapy because of application site irritation, which I reported as an AE. I asked if he felt confident continuing to prescribe Butrans for the appropriate patients and he committed to continuing to start new patients on therapy.
PPLPMDL0020000001	Beachwood	OH	44122	7/8/2011	Spoke with Jim & Dr Tabbaa who told me that one of the patients they saw last week had to discontinue treatment with Butrans due to skin discharge & vesicles. I showed FPI 5.9 explaining this adverse reaction & let them know I would report this to Purdue. Dr Tabbaa said that that happens with all patches. I let them know I would still let Purdue know. Dr Tabbaa said this would not prevent him from prescribing Butrans for other patients. He said his patients are getting good results. I asked if they are getting refills of Butrans & Jim said they are. He added that almost all of their patients are on multiple pain medications concomitantly. Also discussed OxyContin q12h for appropriate patients. Jim said he recently got a denial for it from a Medicare plan, but that he is generally not having issues. Reviewed coverage & savings programs.
PPLPMDL0020000001	Cleveland	OH	44104	7/8/2011	talked to dr about her patients taking tramadol,daily,for chronic pain but not getting pain controlled with tramadol,asked dr how often she see's these types of patients? dr said she only has a small group of patients on opioids but does hear occasionally from patients that their short-acting opioids arent controlling their pain.dr said usually patients want more pills.i asked dr if she would consider starting 2 patients,after the 1st tramadol dose doesn't work, on butrans? dr said she would do that if patients are willing to wear a patch once a week.dr asked about insurance coverage and we discussed commercial plan patients and patient savings cards.i
PPLPMDL0020000001	Cleveland	OH	44113	7/8/2011	worked pain management dept-saw dr shen and dale novak,pa; left information for cleveland clinic rheumatologists who have offices here at lutheran hospital-on butrans:butrans fpi,initiation guide,patient information booklet,formulary grid and my business card.
PPLPMDL0020000001	Beachwood	OH	44122	7/8/2011	Spoke with nurse Vickie & discussed initiations presentation, asking her to tell Jennifer about it & ask her if we could go through it at my upcoming lunch. Vickie said she thought it was a good idea & she would let Jennifer know. Vickie said she has been giving out Butrans patient information & savings for Butrans & OxyContin but is OK on her stock of them for now.
PPLPMDL0020000001	Brooklyn	OH	44144	7/8/2011	Dr Detwiler said he had no time to talk today. I reminded him that he has told me in the past that it takes him some time to become comfortable with a product he has never prescribed before & that because of that I would try to bring him new information as it is given to me. I handed him the sealed "special report" & told him that it was information that I just received & thought he may be interested. He told me that the wrapping was intriguing. I let him know this was not an article that I would be able to discuss with him specifically & was for his information only. He said he would not make any promises to read it. Spoke with Trish & reviewed managed care coverage & savings cards for Butrans & OxyContin.
PPLPMDL0020000001	Westlake	OH	44145	7/8/2011	Quick call, I reviewed our last conversation and that the Dr said he would write Butrans as long as it goes through on managed care. I asked if he's had any issues with the managed care and he said he hadn't tried yet. I asked why not and he said he promises to try a few patients.
PPLPMDL0020000001	LAKEWOOD	OH	44107	7/8/2011	Quick call with Pam, we discussed Butrans medication guide and I asked what she thinks will be most important to talk to the patients about. She said probably where to apply it and that it should go on clean dry skin. We reviewed OxyContin as a long acting option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Copley	OH	44321	7/8/2011	I asked Dr. heim if he had seen the patients who we had discussed trialing Butrans on. He said that he did not think he had but liked the concept of Butrans and would keep it in mind when he saw those patients.
PPLPMDL0020000001	Lakewood	OH	44107	7/8/2011	I reviewed our last conversation and that the Dr was going to take a closer look at the Butrans info. I asked if he had a chance to do so and what his thoughts were. He said it looks good but has not tried it yet. I asked that type of patients he feels might benefit and he said he could cut back on the number of vicodin each day. We reviewed the initiation guide and I asked if he would try just a few patients on Butrans and he agreed.
PPLPMDL0020000001	Brooklyn	OH	44144	7/8/2011	Spoke with Michelle (pharmacist) who said that she does have a few patients on Butrans now. I asked her if she has been seeing all new prescriptions or if some have been refills. She said that she has at least one person refilling it. Reviewed with her details of savings program & let her know that savings cards could be printed on line at Butrans.com if necessary. Also discussed OxyContin & Ryzolt savings cards. She said she does not move Ryzolt at all & still has some OxyContin cards & did not need more at this time.
PPLPMDL0020000001					

PPLPMDL0020000001	Cleveland	OH	44113	7/8/2011	i talked to dale,pa,in hallway as he was in hospital making rounds and asked him how Butrans dinner program was in May? Dale said it was good,he learned some things about Butrans that he didnt know and would tell me more next week at lunch.i asked dale what feedback he's getting from patients on Butrans? dale said patients seem to have better control of their pain and no complaints of side effects or product falling off,so he's happy with clinical results.
PPLPMDL0020000001	University Heights	OH	44121	7/8/2011	Quick call....introduced butrans to doc - discussed the indication, positioning, CII status and the 7 daye delivery. He asked if it is really for 7 days. confirmed that it is. He asked if its like fentanyl. I explained there is no head to head data and that Butrans can be use as a first line opioid. He asked about medicalid coverage. Told him no coverage on medicalid/medicare but well covered commercially. gave him an initiation guide, engage invite and formulary grid. NO commitment.
PPLPMDL0020000001	Cleveland	OH	44103	7/8/2011	i talked to Mike,Floater Pharmacist,as Amy,Pharmacy Manager is out till monday.Mike said he just had a refill request this morning for Butrans 10mcg but they dont have Butrans 10mcg in stock,only Butrans 5mcg.i talked to Mike about why its so important to order and stock Butrans 5mcg and 10mcg.Mike agreed and said he's calling other pharmacies for patient so they will most likely lose the script.i showed Mike the Butrans patient information booklet and asked him to focus patient discussions on application/rotation of Butrans.mike said he will and he liked the booklet.we talked about commercial plan patients using Butrans patient savings cards and discussed Rite Aid's electronic vouchers so its easy for patients.Mike said if patient has to get a PA for Butrans then she might have to get script on Monday and would go to this pharmacy otherwise if she's commercial insurance she'll go somewhere else today.
PPLPMDL0020000001	Akron	OH	44319	7/8/2011	Dr. Wu said he had patients in mind and has forgotten to prescribe Butrans. I explained that Butrans therapy is the only LAO that is also a schedule 3 that is available and asked if saw that as a benefit which he said he did. I asked if there was anyone he could think of coming in today that he could initiate therapy on and he said he would see and try harder to keep it in mind.
PPLPMDL0020000001	Beachwood	OH	44122	7/8/2011	Quick call- Saw Dr Yokiel at the window & he said he did not have time today & asked what information I had for him. I handed back an initiations invitation & asked him to consider going through the presentation with me at our upcoming lunch so that he may become more comfortable with Butrans. He said he would have to see how much time he had that day. Spoke with Laura who said that Dr Yokiel does have some patients on Butrans & she thought he had been using it more lately. She said that pretty much anyone he is only seeing reps at lunches. I scheduled a follow-up to the upcoming lunch with her.
PPLPMDL0020000001	Akron	OH	44319	7/8/2011	Dr. Yee said that he was still not 100% sure how to initiate therapy. I explained there are 3 doses and the 20 mcg is reserved as a titration dose only. I reviewed initiation using the titration guide and asked what medications the patients were on that he had in mind for Butrans therapy. He said they were all on more than 20 mgs of hydrocodone and I showed him the suggested starting dose was 10 mcgs.
PPLPMDL0020000001	Akron	OH	44319	7/8/2011	Spoke with Gretchen and asked her if she thought Dr. Wu had the right type of patients for Butrans and she agreed that he did. I explained that I was focusing on his patients who were currently failing on their current low dose SA therapy and she agreed that was best.
PPLPMDL0020000001	Brooklyn	OH	44144	7/8/2011	Spoke with pharmacist Gary & reviewed savings information for Butrans, showing him that he can print savings cards for eligible patients on line at Butrans.com. He said this could be helpful. He said that he has seen a couple prescriptions for Butrans but that both were Medicaid & were denied. I asked him what percentage of his business was comprised of Medicaid. He said 60-70%. Discussed managed care coverage & appropriate Butrans patient. He said he definitely thinks there is a place for it, but that unfortunately, patients may not "want it" because they may not be able to abuse it as easily. I told him there is abuse/addiction potential with Butrans as it is an opioid. He said that he does not think it is as abuseable & that many patients will know that & therefore not want it. I told him that those would not be the type of patients who would be considered appropriate. I asked if he needed savings cards for OxyContin or Ryzoil. He said he has enough.
PPLPMDL0020000001	BEACHWOOD	OH	44122	7/8/2011	Sandra (pharmacist) said that she was much too busy to talk to me. Spoke with Monique (technician) & reviewed savings information for Butrans & OxyContin & reminded her of eligibility requirements for these programs (ie no government insurance plans). She said she would give the information to Sandra to review later. Also left my card & let her know I would come back another time.
PPLPMDL0020000001	Lyndhurst	OH	44124	7/8/2011	I asked doc how the patient (that he said he started on Butrans) was doing on their therapy. He said he did not know as he has not heard back from them. I asked what dose he started them on. He said he does not remember and did not have time to day because he is busy as Dr. Kim is out today. Gave him an engage invite and initiation guide.
PPLPMDL0020000001	Lyndhurst	OH	44124	7/8/2011	I reviewed the Butrans indication and CII status and asked Sarah if this is a product that she would/could initiate independent of the doc. She said she is usually seeing follow up patients and might recommend the product to the doc but they usually have to be on board with it first. I asked her if she sees any benefits to Butrans. She said sure - it lasts 7 days. I gave her an initiation guide and asked her to think of Butrans after NSAID or Dr Miguel told me that Dr Detwiler has "a ton" of patients with chronic pain & that he really does not write many pain medications. He asked me if Butrans was dosed every 3 days. I reviewed once-weekly dosing with him & asked him if he also remembered that Butrans is CII & added that it still carries abuse & addiction potential because it is an opioid. He said he did not know that & that it surprised him. I added that CII medications can be called in. He also said he did not know that. I asked him if he realized that that means that Butrans is a CII medication dosed once weekly for moderate to severe chronic pain. He said he "has to" be able to use that for someone & that he would think about patients he could use it in. I also reminded him of OxyContin q12h for patients beyond Butrans & let him know of favorable Medicare coverage.
PPLPMDL0020000001	Cleveland	OH	44104	7/11/2011	talked to dr about his patients taking vicodin 5mg,1-2 tabs daily, that arent controlled and asking him for something different,instead of increasing vicodin dosage strength,i asked dr to convert patients to Butrans.i showed dr Butrans visual aid,appropriate patients page,dr said he might do that if MRI is negative and he doesnt want to give more pills to patients,he'll consider Butrans.i showed dr Butrans initiation guide,dr wanted that on his desk for reference,i told dr to focus on BWC and commercial patients,we talked about OxyContin being an option after Butrans 20mcg isnt controlling patients pain anymore,showed dr OxyContin appropriate patients flashcard and conversion guide,dr took conversion guide and said he will start patients on OxyContin after they are maxed out on all orals.i recommended Senokot-S
PPLPMDL0020000001	Parma	OH	44134	7/11/2011	Caught Dr Mandat in the hallway & asked him if we could continue our discussion about Butrans. He said today was not a good day. I handed him a Butrans "Initiations" invitation & asked him to log on to participate in the program, explaining that it can be a useful tool in learning about the appropriate patient type. He said he would look at it. He said that he does not have patients in his office on opioids because he "doesn't have time to mess around on OARRS". I agreed that OARRS is a great tool to protect his practice & that he should be cautious in prescribing all opioids, including Butrans. He thanked me for the information & walked into a patient room.
PPLPMDL0020000001	Cleveland	OH	44109	7/11/2011	worked internal medicine dept-left Dr.Lindheim,Dr.Harrington,Dr.McCreery,Dr.Falck-Ytter,Dr.Jones,Dr.Eisen and Dr.Ricanati-OxyContin fpl,appropriate patients and challenging flashcards for OxyContin,conversion guides and OxyContin formulary grids,with my business card for each dr as i couldnt see them. worked family medicine-left exact same OxyContin information with my business card for Dr.Forde,Dr.Liu and was able to leave Family Medicine residents information in their mailboxes.
PPLPMDL0020000001	Akron	OH	44333	7/11/2011	I asked Dr. Ross about his success with Butrans and he said that he liked the therapy and that patients were really pleased. He said that based on his initial success he felt comfortable continuing to prescribe Butrans for the appropriate patients.
PPLPMDL0020000001	Akron	OH	44333	7/11/2011	Dr. Shah said he really liked Butrans therapy and is prescribing it first line to appropriate patients. He said he most patients have remained on therapy and he plans on it staying that way.
PPLPMDL0020000001	Parma	OH	44129	7/11/2011	Dr Taylor said she is waiting to find out what the final law will be from House Bill 93 to see what the future of her practice will hold. She said that she did not submit the necessary materials to be grandfathered in as a pain management clinic by June 20th as required, so she does not know what will happen. I asked if she dispenses any medications there & she said she does not. I reminded her of our previous conversations about Butrans & also our discussions about considering Butrans for patients taking chronic Vicodin around-the-clock who request increases in medication. I asked what she typically does for a patient who she had recently started on low dose Vicodin around-the-clock for chronic pain who on follow-up says their medication is wearing off too quickly. She said she increases the dose or dosage interval. I asked if she would instead, choose an appropriate patient to switch to Butrans & she agreed. Also discussed Initiations program & asked her to consider doing it.
PPLPMDL0020000001	Parma	OH	44129	7/11/2011	Introduced myself & Purdue's products to Dr Moss. Delivered Butrans 5 core messages & reviewed box warning. I asked him if he saw any place for Butrans in his practice based on the overview of information. He said perhaps. Discussed appropriate patient type, presenting initiation guide pg 6. He asked me if a patient taking 20mg total per day of Percocet would be a Butrans candidate. I told him that this could be a potential patient. He told me he doubts that would work. I asked why. He said the patient "wouldn't want Butrans because it wouldn't give them a high." I told him that Butrans is an opioid & does carry abuse/addiction potential & added that if a patient was seeking "a high", he may not consider that patient appropriate for any opioid, including Butrans. I asked what his thoughts were on having patients go from short-acting around-the-clock to transdermal & he said they will probably not want to do that. Discussed ability to use supplemental analgesia, managed care, & savings
PPLPMDL0020000001	Cleveland	OH	44115	7/11/2011	i talked to dr about her patients taking tramadol every day,but not controlled,and,instead of increasing tramadol dose or converting to vicodin,i asked dr to start 2 patients on Butrans.dr said she might do that if patients are willing to wear patch and she can trust that they will rotate patch once a week.i showed dr Butrans visual aid,appropriate patients page and Butrans patient information booklet,noting application/rotation section,to help dr educate patients,dr said that will help i asked dr to focus on commercial patients and give them Butrans patient savings cards dr agreed.i recommended Senokot-S
PPLPMDL0020000001	Akron	OH	44333	7/11/2011	Dr. Ahmad said he tried Butrans on an opioid naive patient and initiated therapy at the 5 mcgs. He said he has not heard back from the patient but assumes they are still on therapy. I asked if he thought he would continue to initiate therapy to opioid naive patients moving forward and he said he would continue to keep Butrans in mind.
PPLPMDL0020000001	akron	OH	44333	7/11/2011	I spoke with Dr. Bashor about flagging charts of potential Butrans patients which he agreed. I spoke with Gretchen and we were able to identify 2 patients coming in at the end of the month.
PPLPMDL0020000001	Lakewood	OH	44107	7/11/2011	I asked Dr what seven day dosing might mean to some of his patinetes. He said he thinks they would be more compliant. I reviewed the initiation guide and asked if he would try just a few patients. He said he will try, I reviewed OxyContin as an option when Butrans may not provide adequate analgesia and he does still prescribe OxyContin as an option.
PPLPMDL0020000001	Cleveland	OH	44103	7/11/2011	i talked to Maria Geier,RN,as i couldnt see dr,gave Butrans fpl,initiation guide,patient information booklet,formulary grid and explained managed care coverage for Butrans.Maria said the doctors werent seeing reps as Metro made it a "no-rep" policy,so they stopped booking lunches.Maria said the doctors may be interested in meeting with me individually as this product is transdermal and she thinks there is a place for it, with some of their chronic pain patients.Maria said to stop back later this week or next week and she'll give me some feedback.
PPLPMDL0020000001	Lakewood	OH	44107	7/11/2011	Quick follow up. I asked the Dr if he has a few patients he can start on Butrans instead of incresing their short acting tramadol or vicodin. He said he will. I left the interact card.
PPLPMDL0020000001	Bedford	OH	44146	7/11/2011	Spoke with Echo (MA) who said Dr Haddad said he could not see me today. He asked that I come back another time & I agreed. I reviewed Butrans with Echo & asked her to give Dr Haddad the Butrans special report article. She agreed to do this.
PPLPMDL0020000001	Lakewood	OH	44107	7/11/2011	I asked Dr if he has any other patients in mind who might benefit from 7 day Butrans. He said he will think about it. I asked him what type of patients come to mind and he said he likes it as another option. We reviewed the initiation guide and I asked him to think of patients whose short acting may not be providing efficacy. We reviewed OxyContin as an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Lakewood	OH	44107	7/11/2011	Quick call, I reviewed the key messages for Butrans and asked if he has just one patient today where tramadol or vicodin is not controlling their pain who could benefit from Butrans. He said he would prescribe it.
PPLPMDL0020000001	Lakewood	OH	44107	7/11/2011	Walked with Dr on his way to the hospital. I reviewed our last conversation about Butrans for patients instead of going to vicodin. I asked if he has any other patients who might benefit from Butrans and he said he will continue to give it a try. Reminder about the managed care for Butrans and that OxyContin is an option covered by Medicaid.
PPLPMDL0020000001	Lakewood	OH	44107	7/11/2011	I asked the Dr what benefits he sees in Butrans for his patients. He said that patients might be able to take less tablets. We reviewed the key messages and asked him if he can think of a few patients who could benefit and he could start on Butrans, he said that he will try. I reviewed the Butrans managed care. Reminder about OxyContin as an option that is covered on Med D AARP and Medicaid.
PPLPMDL0020000001	Fairlawn	OH	44333	7/11/2011	I asked Dr. Oyakawa if he thought Butrans had a place in his practice and if he thought he would trial it on just one patient so he could get some patietn feedback. He said he would prescribe Butrans if and when the right patient presented.
PPLPMDL0020000001	Beachwood	OH	44122	7/11/2011	Quick window call- Dr Warren said he would not have any time for a discussion today. I let him know I would return at a more convenient time & handed him a Butrans Initiations invitation, asking him to consider logging on to go through the interactive experience or consider going over it with me at our upcoming lunch. He said he would have a look. I told him it would be a good tool to practice initiating Butrans in different patients.

PPLPMDL0020000001	Westlake	OH	44145	7/11/2011	Quick follow up, I reviewed our last conversation and reviewed the conversion guide again. I asked if he would try just a few of the patients that we discussed and he said he will. He was concerned about managed care, and we reviewed the managed care. I reminded him about OxyContin as an option that is covered on Medicaid.<font color=blue><b>CHUDAKOB's query on 07/28/2011</b></font>Andrea, we do not have a conversion guide for Butrans, only an initiation and titration guide. Just wanted to clarify that they are not synonymous.<font color=green><b>HOLUBA's response on 07/29/2011</b></font>Thank you, I do know it is only an initiation guide.<font color=blue><b>CHUDAKOB added notes on 07/30/2011</b></font>Ok. Thanks!
PPLPMDL0020000001	Parma Heights	OH	44129	7/11/2011	Spoke with Al (pharmacist) who looked through some prescriptions & recommended Dr Levin, Dr Demagone, & Dr Salewski as physicians who I may want to contact regarding Butrans. He gave me their addresses & phone numbers. He said he has not dispensed any Butrans yet, but sees a place for it & believes area physicians will catch on at some point. Reviewed savings program & offered OxyContin & Ryzoil savings cards but he said he has enough for now. He said he would continue to think of physicians for me to discuss Butrans with.
PPLPMDL0020000001	Rocky River	OH	44116	7/11/2011	Spoke with Kim, we reviewed the Butrans medication guide and steady state. I asked what info she thought was important to let the patients know about for Butrans and she said probably where to apply it. We discussed The initiation guide and the types of patients that may be appropriate for Butrans. I reviewed when OxyContin may be an option where Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Parma	OH	44129	7/11/2011	Quick call- Saw Dr Ortega at the window & gave him a Butrans "Initiations" invitation. I asked him to either log on & participate in the interactive program or to consider going over it with me during an upcoming visit. He said he would have a look. Also gave him "Special Report" sealed information. He said he would look it over. He added that he has no new questions on Butrans & then walked into his office. Spoke with Cindy & reviewed savings cards for Butrans & OxyContin. She said she has enough savings cards & patient education for now. She said she has not heard from any pharmacists or patients regarding Butrans lately.
PPLPMDL0020000001	Fairlawn	OH	44333	7/11/2011	Dr. Weidman said she had a patient come in that she had written Butrans for but the patient is scared to get the Rx filled. She said she had prescribed a 5 mcg and she was going to talk to the patient about the benefits of
PPLPMDL0020000001	Westlake	OH	44145	7/12/2011	Quick call, with Jamie, we reviewed the Butrans medication guide for patients. He has not received any feedback yet regarding Butrans. Reminder that OxyContin is still another long action option for appropriate patients.
PPLPMDL0020000001	Cleveland	OH	44109	7/12/2011	showed dr butrans visual aid,5 core messages and I asked dr what features of Butrans were important to him? dr said he likes that butrans is transdermal,dosing once a week is appealing for some patients and its a CII so he can call in refills.I showed dr Butrans visual aid,appropriate patients section,discussed doctors patients taking tramadol every day but not controlled and considering Butrans as an option for them instead of increasing tramadol dose or converting them to Vicodin.dr said that made sense and he will consider that but he hasn't had any patients complain of their short-acting opioids lately,so he'll keep it in mind.dr asked who covers butrans? I showed dr butrans formulary grid and asked dr to focus on commercial patients so they can use butrans patient savings cards.dr said ok and I told dr I would be back on Friday to see if he started anyone by then,dr said he will keep butrans in mind.I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	7/12/2011	dr said he's got a handful of patients on Butrans and they are doing well.dr said he's realizing most of his patients need to be started on Butrans 10mcg and probably will end up being titrated on Butrans 20mcg.I showed dr Butrans visual aid,discussed appropriate patients and I asked dr if he's thinking of his chronic pain patients that are only taking 1-2 vicodin,5mg,but not controlled? dr said if patients complain to him,on that dose,then he'll think of Butrans.we talked about Butrans formulary coverage.
PPLPMDL0020000001	Parma	OH	44129	7/12/2011	Quick call- caught Dr Tolentino at the window briefly & invited her to do the Butrans "Initiations" program. She said she did not have time & that she does not do "those online things". She asked me to give her nurse, Kathy, more Butrans information. Kathy said that Dr Tolentino was just asking her about Butrans & had requested additional information, so my timing was ideal. I asked if she knew specifically what she was looking for but Kathy did not know. I gave her sealed "Special Report" article & let her know I would not be able to discuss it's contents. Also reviewed appropriate patient type & savings cards. She said she would give the information to Dr Tolentino & I let her know I would return to follow-up to ensure her questions have been answered.
PPLPMDL0020000001	Westlake	OH	44145	7/12/2011	Spoke with Amid, we reviewed the medication guides for Butrans and I asked what he thought would be most important for him to tell his patients. He said that they should know that it might take 3 days to fully start working. We reviewed the demo and how to apply Butrans. Reminder that OxyContin is still a long acting option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Cleveland	OH	44109	7/12/2011	only got a few minutes with dr dr said he didnt remember anything about Butrans other than it was transdermal.I showed dr Butrans visual aid,we discussed 5 core messages and I asked dr what were some features about Butrans he did like? dr said the fact that butrans is a patch and dosed once a week. dr said he was surprised to see butrans be a CII but that was good.I talked to dr about Butrans being a CII so he could call in 5 refills up to 6 months.dr asked if butrans was covered on medicaid? I asked dr if he was ready to prescribe since he was asking me about insurance coverage? dr said no he needs to read Butrans fpi again and look over information but was wondering about medicaid coverage as he has a lot of those patients.I shared with dr Butrans prior authorization requirements for Medicaid but asked dr to focus on commercial plan patients so they can use Butrans patient savings cards and BWC patients.dr said ok and he would talk to me Friday at lunch.
PPLPMDL0020000001	Shaker Heights	OH	44122	7/12/2011	Dr Agarwal said he has "thought of" Butrans but is not sure where he would use it. I asked him how often he sees patients who are on chronic Vicodin or tramadol. He asked if I meant in nursing homes or in the office. I said either. He said daily, most frequently in nursing homes. I asked what he does if those patients ask for more or complain it is not working. He said many of them. He said he goes to tramadol right after NSAID's & then Vicodin. I asked why not Butrans there. He said he typically refers to pain management if a patient needs chronic pain medications, especially in the office. He said more than 1 month is chronic. He asked if he could prescribe one month at a time. Reviewed managed care & savings, CII, abuse/addiction potential & box warning. Dr Agarwal said he would try Butrans on a few patients for one month to see how it goes. Also discussed 7 available OxyContin strengths, Ryzoil q24h dosing, & OTC products.
PPLPMDL0020000001	Westlake	OH	44145	7/12/2011	I asked Dr if he was going to see any BWC patients today who's pain is not well controlled on short acting. He said he probably will. I asked if he would start them on Butrans instead of increasing the dose, and he said he will because he is trying to taper patients down on their current doses of opioids. I gave the interact invite and encouraged him to check it out on line.
PPLPMDL0020000001	South Euclid	OH	44121	7/12/2011	I reviewed the Butrans indication, positioning, and dosing. she said she was just thinking about butrans as she saw the savings cards. She does have some appropriate patients and she is ready to try it. She has patients that complain about their current analgesic therapy. I showed her how to initiate for opioid naive and experienced patient. I showed the formulary grid and she confirmed that she has some of the plans.
PPLPMDL0020000001	Cleveland	OH	44130	7/12/2011	Quick call- I handed Dr Diab a Butrans "Initiations" invitation, explaining that it is an exciting new interactive tool to aid him in becoming more familiar with Butrans & various appropriate patients. He said he would have a look at it & walked into a room. Spoke with MA Karen & scheduled breakfast & also reviewed savings cards for Butrans & OxyContin with her.
PPLPMDL0020000001	Parma	OH	44129	7/12/2011	I invited Dr Roeheny to log on to the Butrans "Initiations" program, telling him that it would be a good interactive tool for him to utilize to identify patients who may benefit from Butrans. I asked if he had gotten feedback from the patient who he said he prescribed Butrans for & he said no. He said that he has, however, been thinking of it. I asked him what is preventing him from converting his thinking into action. He said he wasn't sure. I told him that was one reason I thought of him for the "Initiations" program. He said he might have a look. Reviewed with him buprenorphine molecule & appropriate patient type & he said he would try to find more patients.
PPLPMDL0020000001	Garfield Hts	OH	44125	7/12/2011	I stopped Dr Sadowski in the hallway by handing him a Butrans "Initiations" invitation, explaining that it would be good practice for him in identifying patients who may benefit from Butrans. He said it sounded interesting but he could not do it right now. I let him know we could sit down & do it at an upcoming lunch. Started to discuss appropriate patient type, but he had to take a call from the hospital. Spent time with Dina reviewing appropriate patient type. She said she has been keeping an eye out for an opportunity as she thinks some of the patients could really benefit from a once weekly transdermal option for pain.
PPLPMDL0020000001	Cleveland	OH	44106	7/12/2011	showed dr Butrans visual aid,discussed appropriate patients to start on Butrans,I asked dr if he would consider Butrans for patients taking 1-2,percocet 5mg,if that dose isnt controlling patients pain? dr said he might if patient's willing to try something different.dr said he's been thinking of Butrans for those patients who have been calling into office for refills earlier and asking for more pills.I told dr that was a great place too,but could he think of 2 patients that are taking 1-2 5mg Percocet,that arent controlled and start them on Butrans? dr said he will consider that.we talked about OxyContin being available after Butrans 20mcg,7 tablet strengths and OxyContin formulary coverage.I recommended Senokot-S
